(65) Mr. Cabouat added that he hoped this work would help to facilitate the task of the Secretariat in interpreting the Uruguayan proposal.

(66) Mr. RANIERI (Uruguay) accepted the French delegate's interpretation.

(67) Mr. MAHEU (Assistant Director-General) did not think that the interpretation given by the French delegation facilitated the Secretariat's task; it only complicated it.

(68) The CHAIRMAN asked the meeting to consider the French delegation's proposal recommending the adoption of draft resolution 55, subject to the interpretation given by Mr. Cabouat.

(69) Mr. AVIDOR (Israel), seconded by Mr. COWELL (United Kingdom), asked for the resolution to be taken in two parts, as the first part had no budgetary implications.

(70) In view of what the Assistant Director-General had said, Mr. CABOUAT (France) expressed his willingness to withdraw his motion if it was felt that it complicated the task of the Secretariat.

(71) A vote was taken on this offer, which was accepted unanimously.

(72) Mrs. MYRDAL (Director, Department of Social Sciences) pointed out that (a) would have to precede any work under (b), which, she thought, must be deferred.

(73) Sub-paragraph (a) was put to the vote and carried by 3 in favour, 2 against and 6 abstentions.

Sub-paragraph (b)

(74) Mr. LEE (United States of America) wished this point to receive a low priority and be deferred for the moment to the Secretariat.

(75) Mr. AVIDOR (Israel) seconded the proposal.

(76) Adopted by 9 in favour, none against, one abstention.

Draft resolutions relating to the Natural Sciences Nos. 1, 9, 18, 29, 32, 35, 42, 44, 47, 51, 54, 56, 58, 59, 60, 61.

DR/1: Radio-isotopes

(77) Mrs. PECSON (Executive Board) informed the meeting that the Executive Board recommended the resolution, on the understanding that Member States in Europe would be consulted before a meeting of experts was called.

(78) Mr. COWELL (United Kingdom) questioned the Board's decision. Was this new activity really necessary? The matter was now being discussed in the United Nations. Two international organizations should not be working at the same time in the same field, and he proposed that the project be deferred.

(79) Mr. SOMMERFELT (Norway) seconded the proposal by the delegate of the United Kingdom for deferment.

(80) Mr. SILLER (Mexico) supported the proposal of the delegate of the United Kingdom.

(81) Mr. MAHEU (Assistant Director-General) said that the Director-General had forwarded the text of the French draft resolution to the Secretary-General of the United Nations. The Secretary-General's reply, dated 4 November, had reached Montevideo on the seventh and read as follows:

"I appreciate your thoughtfulness in consulting me on the draft resolution relating to European research on problems connected with radio-isotopes which has been submitted by the French delegation to the Unesco Conference. It would naturally be my hope that Unesco's action under such a resolution would make the fullest contribution to any wider programme for the development of peaceful uses of atomic energy that may be undertaken through the United Nations; for this reason, some reservation may be desirable at this stage regarding the detailed programme for 1955 suggested in the second paragraph of the draft. Apart from this comment, I can only say that intensified research on problems connected with the production, distribution and use of radio-isotopes is clearly very desirable and that Unesco is the international body which should promote and co-ordinate it."

(82) Mr. AUGER (Director, Department of Natural Sciences) explained that during his stay in New York he had discussed the question in detail at United Nations headquarters. The prospective International Atomic Agency would undertake responsibility for relations with non-governmental organizations, governments and regional bodies. He had encountered no opposition to a meeting of European experts as proposed by the French delegation.

(83) Mr. ABDEL-RAHMAN (Egypt) proposed that the resolution should be referred to the International Advisory Committee on Research in the Natural Sciences, which could advise what part Unesco should take in this field. That would mean that the resolution could only be taken into account in the 1957-58 budget.

(84) Mr. MAHEU (Assistant Director-General) pointed out that the International Advisory Committee on Research in the Natural Sciences had the duty of advising the Director-General not only on the planning of future programmes but also on the execution of current programmes.

(85) If the Conference approved the proposal before them, the Director-General would be in a position to consult the Committee at its Milan meeting.

(86) In reply to Mr. Avidor, who seemed to have understood that the Secretary-General of the United Nations meant that a decision on the Unesco scheme at this stage might be premature, Mr. Maheu said that the Secretariat did not take the letter in that sense but as indicating that the Secretary-General of the United Nations hoped that Unesco would take action but in concert with that to be taken by the United Nations. The last sentence of the passage he had read left no doubt on that point.

(87) Mr. COWELL (United Kingdom) remarked that there was no specific reference in the letter to the proposal to create an International Atomic Agency, which was due to come before the General Assembly of the United Nations shortly. That was an important consideration both for DR/1 and for DR/9.

(88) Mr. LEE (United States of America), while deferring his judgment until the United Nations Representative had been heard on the subject, still felt a lot could be done in the exploration of the use of radio-isotopes in medicine and agriculture. He added a hope that, while the meeting was a regional one, it would not exclude experts from outside the area.

(89) Mr. CABOUAT (France) felt he should give the Committee some explanation of the advantage, from the international and inter-governmental standpoint, of research undertaken in Europe on the medical, radiological and agricultural applications of nuclear energy. The suggested European laboratory for nuclear research would be less costly than the International Institute for Atomic Research, but would still be too heavy a financial charge for a government to shoulder by itself.

(90) The Council of Europe had decided to contribute up to 500,000 francs towards the financing of the project, a sum equivalent to that which the French delegation was asking Unesco to provide. In addition, the Pasteur Institute, the Institut National d'Hygiène and the Italian Government had indicated their intention of making funds available. The aim of the French proposal was not to launch a new activity but to assist one already in being; the idea was to place the experience of Unesco and its Secretariat at the disposal of this branch of science. If the Unesco budget could not support the expense, the Organization might at least provide certain professional services in the early stages.

(91) Finally, the delegate of France confirmed that, whatever the Committee and the General Conference decided, account would be taken of the subsequent decisions taken by the United Nations.

(92) Mr. AVIDOR (Israel) proposed two amendments to the resolution: (1) that the meeting of experts be convened in 1956 instead of 1955, in order that it might receive the comments of the Secretary-General of the United Nations; (2) he supported the United States proposal that experts from outside Europe should also be invited to the meeting.

(93) Mr. ABDEL-RAHMAN (Egypt) suggested that, as draft resolutions 9 and 32 were connected with this one, they should all be examined before a decision was taken on any of them.

(94) Mr. CABOUAT (France) thought that at the moment it was difficult to instruct the Secretariat in too much detail as to who should participate in the project and how it should be financed, and also pointed out that they were dealing with 1956 and not 1955. The point was that they did not yet know what the General Assembly of the United Nations would decide.

(95) Mr. AVIDOR (Israel) signified agreement.

(96) Mr. MAHEU (Assistant Director-General) thought it would be useful, in connexion with these three draft resolutions, for Mr. Auger to tell the Committee about the conversations which had taken place currently at United Nations headquarters in New York. Before the meeting of the Committee presided over by Dr. Ralph Bunche, the Director-General had informed the Secretary-General of the United Nations that Unesco held itself at his disposal for taking part in the examination of the scientific aspect of the problem of the utilization of atomic energy for peaceful ends. Accordingly Mr. Auger, himself a distinguished atomic scientist, had gone to New York and spent a fortnight attending the meetings of the Bunche Committee. He had left New York ten days past, but he was fully abreast of the decisions being taken there. Since his departure the question of the utilization of atomic energy for peaceful purposes had come before the First Commission of the General Assembly. The proposal put forward by Mr. Cabot Lodge (United States of America), currently under consideration by the First Commission, did not appear to differ much from what information in Mr. Auger's possession had suggested.

(97) Mr. AUGER (Director, Department of Natural Sciences) began by reminding the Committee that atomic energy had already been in use for peaceful purposes for ten years but that the military application of this branch of science had prevented the detailed discussion in international organizations of its peaceful uses.

(98) However, a discussion on the subject had been inaugurated at the current session of the General Assembly of the United Nations and the principal project, presented by seven countries, provided for: (1) a Specialized Agency which, on coming legally into being, would enter into relations with the United Nations in exactly the same way as WHO, FAO, Unesco itself and the other agencies had done before it; (2) a scientific conference to be convened by the Secretary-General of the United Nations. On the programme to be submitted for its approval, the Secretary would be able to consult Unesco, FAO and WHO. It was probable that the Director-General would be approached by the Secretary-General regarding the preparatory work for the Conference, which was likely to take place in August 1955 and, like any other international conference of such importance, would require some months of preparation, beginning, probably in January 1955. The intention was that the Conference should be attended both by government delegates and also by various experts and scientists invited personally. There would be a Preparatory Committee for the Conference, which would be empowered to enter into direct consultation with Unesco on matters within the latter's province.

(99) These circumstances invested draft resolutions 9 and 32 with great importance as concerned the Director-General's future action. The uranium reactors which generated electricity also gave off radio-active material from which the public must be protected. If the Committee decided on the means to be given the Director-General for meeting the request of the United Nations, the intentions of these draft resolutions would be automatically satisfied.

(100) Mr. Auger added that he had made a very provisional estimate which might be sufficient to cover the expenses envisaged for 1955-56.

(101) Mrs. PECSON (Executive Board), speaking on draft resolutions 9 and 32, said that, in the light of Mr. Auger's information, the Board had taken the two resolutions together and decided to recommend DR/9 proposing collaboration with the United Nations on the use of atomic energy for the benefit of man. With regard to DR/32, the means of collaboration prepared should be reviewed in the light of arrangements currently being made by the United Nations.

(102) Mr. ABDEL-RAHMAN (Egypt) felt the decision taken about resolutions 9 and 32 was clear. On No.1 there was a good proposal.

(103) Mr. LEE (United States of America) asked whether the meeting could not dispose of DR/1 at this stage, and refer Nos. 9 and 32 to the Programme Commission, on the assumption that they would be referred to working parties which would include people more qualified to discuss them in the light of information arising out of United Nations action.

(104) Mr. JUNANKAR (India) thought that DR/9, which merely authorized the Director-General to extend the co-operation of the Organization to the United Nations, need hardly be referred to a working party. The Committee should recommend the resolution to the Programme and Budget Commission.

(105) The delegates of INDONESIA and ISRAEL agreed.

(106) Mr. COWELL (United Kingdom) said that the purpose of the resolution (DR/9) was to authorize the Director-General to continue the co-operation already undertaken with the new agency envisaged. Was it specifically necessary to make such a resolution?

(107) Mr. MAHEU (Assistant Director-General) informed the United States delegate that a representative of the United Nations would be present at the General Conference and would be able to give all necessary information on the results of the discussions currently proceeding in New York. With regard to the point raised by the delegate of the United Kingdom, the Secretariat did need such a resolution and he would draw the delegate's attention to the last clause of draft resolution 32.

(108) Mr. AUGER (Director, Department of Natural Sciences) explained that the proposed budget for the whole project was $26,500 in 1955 and $10,000 in 1956. Protection of the civil population, which was the subject of draft resolution 32, was only a part of the whole and could be reckoned at about a fifth in budgetary terms.

(109) Mr. LEE (United States of America) was in favour of the spirit of the resolution. The formulation could be left until later.

(110) Mr. AVIDOR (Israel) thought resolution 9 should stand even if 32 fell, because it was an invitation to all Member States, and even as a declaration it had some force.

(111) The CHAIRMAN pointed cut that Mr. Auger had said that in approving DR/9 the meeting would be implicitly approving DR/32 as well.

(112) Mr. COWELL (United Kingdom), on DR/9, had two minor drafting amendments to propose: line 1, after "Conference" insert "believing in the urgent necessity of action in disarmament, invites all governments to join together in a common action as a result of which efforts..."; and line 2, after "armaments", insert the words "could be diverted".

(113) The CHAIRMAN said the Committee could mention that a Draft would be accepted if revised as suggested, but the meeting should not be asked to accept drafting alterations.

(114) Mr. JUNANKAR (India) wanted the resolution approved as it stood.

(115) Mr. COWELL (United Kingdom) accepted the Chairman's remark. He had merely not wanted to give the impression that the United Kingdom had agreed to the unrevised version.

(116) Mr. MAHEU (Assistant Director-General) agreed with the delegates of India and the United States of America that the Committee should decide on the general lines of the resolutions and the corresponding estimates without regard to details of wording. The drafting would be done later.

(117) The CHAIRMAN indicated that a note to this effect could be included in the Committee's report.

(118) Put to the vote, draft resolution 9 was adopted unanimously.

(119) The CHAIRMAN said that the meeting was not in a position at that stage to adopt resolution DR/32 with its budgetary implications. It could merely say that it considered the proposal to belong to the type of activity Unesco was called on to carry out.

(120) Mr. LEE (United States of America) agreed with that view, considering that at that time some other agency besides Unesco might be making a working plan.

(121) Mr. MAHEU (Assistant Director-General) recalled that the Indian text (document 8C/DR/9) had no financial estimate attached to it but that preliminary costings had given a figure already suggested by the Secretariat.

(122) A vote was then taken on the proposal by the delegate of the United Kingdom, seconded by the delegates of Israel and India, to refer draft resolution 32 to the Secretariat and recommend that it should be implemented in the light of the report made by the United Nations. This proposal was adopted by 6 in favour, 3 against and 3 abstentions.

(123) The proposal by the delegates of the United Kingdom, Norway and Mexico to defer draft resolution 1 was then taken up.

(124) Mr. COWELL (United Kingdom) thought that any essential activities could be undertaken by the Relationship Agreement between the United Nations and Unesco.

(125) Mr. MAHEU (Assistant Director-General) pointed out that the proposed operation was conditional and depended on the decisions taken later by the General Assembly of the United Nations. However, if no financial provision were made, no activity would be possible before 1957.

(126) Mr. CABOUAT (France) shared the view of the Assistant Director-General and suggested that the resolution be adopted subject to the two amendments proposed by the delegate of Israel (paragraph 92).

(127) Mr. ABDEL-RAHMAN (Egypt) agreed with the delegate of France.

(128) A vote was taken on the proposal by the delegates of the United Kingdom, Norway and Mexico to defer draft resolution 1 until the United Nations had dealt with the question. It was rejected by 4 in favour, 8 against and no abstentions.

(129) The proposal by the delegates of Israel, France and Egypt to adopt the resolution with the two clarifications made by the delegation of Israel - that the framework of the project should be widened and meetings held when the Secretariat considered it most practical - was approved in principle.

The meeting rose at 6.55 p.m.

# SEVENTEENTH MEETING

*11 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.3 OF THE AGENDA. DISCUSSION OF DRAFT RESOLUTIONS SUBMITTED BY MEMBER STATES** (continued)

DR/18

(1) Mr. AUGER (Director, Department of Natural Sciences), introducing draft resolution 18 submitted by the delegation of India, pointed out that a number of proposals were combined in the resolution, the first being concerned with the development of international collaboration and the possibility of taking the Indian National Scientific Documentation Centre as a model for the establishment of similar centres in the underdeveloped areas. The Secretariat welcomed a proposal which showed that the Indian Centre had been a genuine success and was proving useful. What was suggested was that the Director-General be asked to study the possibility of taking such action with a view to eliciting requests for technical assistance from the countries concerned.

(2) Mr. COWELL (United Kingdom) asked whether it was not true that much of the activity proposed under the first section of the document was covered by resolutions already dealt with by the Committee.

(3) Mr. AUGER (Director, Department of Natural Sciences) explained that it was a new proposal, whose object was simply to make known in underdeveloped areas the achievements of the Indian National Scientific Documentation Centre.

(4) Mr. JUNANKAR (India) said that the proposal was intended to emphasize the importance of the Documentation Centre in India and the value of contributions from underdeveloped areas.

(5) In reply to a question from the delegate of Israel, Mr. AUGER (Director, Department of Natural Sciences) confirmed that the Centre in India had been set up under the technical assistance programme.

(6) Mr. LEE (United States of America) said that the Indian Government should be commended for its initiative, but, as the Secretariat already had authority to carry out the kind of work envisaged, he did not see any point in passing resolutions to confirm existing powers. He therefore proposed that no action be taken.

(7) Mr. JUNANKAR (India) could not recall any such programme in the Department of Natural Sciences. The Centre had been established by the Indian Government under the technical assistance programme, and the resolution supported the lines of action.

(8) Mr. LEE (United States of America) said that he was not opposing the idea, which he considered an excellent one.

(9) Interpreting the feeling of the meeting, Mr. MAHEU (Assistant Director-General) suggested that, when the technical assistance programme came up for discussion, the delegation of India should make a statement drawing attention to the value of the project and thus providing the Secretariat with pointers to the degree of importance to be given to the proposed activity in that programme.

(10) The CHAIRMAN invited the representative of the Executive Board to report the comments of the Board.

(11) Mrs. PECSON (Executive Board) said that the Board's views were as follows:

First section: Development of International Collaboration

The Executive Board recommended its adoption on the understanding that Unesco would only be required to inform Member States of existing centres and encourage them to ask for similar ones under the technical assistance programme, and also that the project involved no budgetary implications for Unesco.

Second section: International Exchange

The Executive Board expressed its approval, noting that there were no budgetary implications.

Third section: Dissemination and Teaching of Natural Sciences

The Executive Board welcomed the proposal and recommended that a study be prepared for the ninth General Conference and that Member States be encouraged to submit suggestions as early as possible to help the Secretariat in its work.

Fourth section: Development of Scientific Co-operation

The Executive Board was opposed to the proposal, since the activities under (a) and (b) were already being carried out and (c) was a programme within the field of the United Nations.

Fifth section: Subvention of $3,000 to the Indian National Committee for Mathematics

The Executive Board was favourable to the proposal.

(12) The CHAIRMAN said that the Advisory Committee had already agreed to make a recommendation on the necessity for resolutions to be sent at an early date for inclusion in the next programme and budget.

(13) He invited the Committee to return to discussion of the first resolution (Development of International Collaboration).

(14) Mr. AVIDOR (Israel) moved the adoption of the resolution on the understanding that it did not come within the budget of the regular programme.

(15) Mr. LEE (United States of America) said that budgetary implications could not be avoided: the Secretariat would inevitably be called upon to incur some expenditure, if only in time allocated to the project.

(16) Mr. CABOUAT (France) asked whether the action proposed in the draft resolution was not already covered by certain passages in the Organization's programme, in which case it would be pointless to adopt it.

(17) Mr. AUGER (Director, Department of Natural Sciences) replied that the proposal of the delegation of India was not completely covered by the programme as it stood. Under draft resolution 2.12 (paragraph 40), the Director-General was authorized to advise and encourage international organizations concerned with the development and improvement of scientific documentation; with the standardization of terminology; with the compilation of multilingual dictionaries and with the improvement of scientific translations. The project before the Committee was designed to assist towards the establishment of national centres and was a typical technical assistance item; Unesco had already taken action on four separate occasions under that programme to assist in the foundation of scientific bodies which had proved successful. He felt it preferable not to confuse the ordinary and the technical assistance programmes.

(18) Mr. JUNANKAR (India) said that there were no budgetary implications at the present stage, since the resolution was only concerned with possible future action. While the United Nations technical assistance programme was limited, that of Unesco was broad and spread over all parts of the programme; it would therefore be possible to support the idea in general terms, leaving the Secretariat to arrange projects in accordance with the wishes of Member Governments.

(19) The CHAIRMAN interpreted the Indian delegate's statement as seconding the delegate of Israel's proposal, in spite of the comment of the United States delegate on use of Secretariat time.

(20) Mr. LEE (United States of America) said that his comment should not be taken as indicating disapproval of the idea behind the resolution.

(21) Mr. COWELL (United Kingdom) said that the Indian Government was to be congratulated on its Scientific Documentation Centre, and it was a good principle to make useful activities in one country known to others. He thought, however, that, before adding to existing resolutions, it would be well to consider whether there were other methods of achieving the desired object, for example, through clearing house activities in the Department of Natural Sciences, or through the Indian National Commission. He supported Mr. Auger's remarks concerning resolution 2.12 (paragraph 40) and on the advisability of not confusing regular and technical assistance programmes. Unesco already had enough work to handle at the international level, and should not undertake activities at a national level. He appealed to the delegate of India not to press the proposal.

(22) Mr. JUNANKAR (India) was puzzled by the remarks of the United Kingdom delegate. A resolution could not be ruled out of order because it related to an activity initiated in a Member State, and in any case Unesco performed its work through Member States.

(23) Mr. MAHEU (Assistant Director-General) suggested that the exploration of the possibility of establishing such centres be treated as a normal activity of the science co-operation offices, to be undertaken in conjunction with the Member States of the region concerned. If such projects took shape, they could be included in the draft programme for 1957-58, when the Director-General would consider whether they should be put in the ordinary or the technical assistance programme.

(24) The CHAIRMAN asked for a vote on the proposal of the delegate of Israel, seconded by the delegate of India, that the resolution be approved on the understanding that it had no budgetary implications.

(25) The proposal was adopted by 7 votes to 2 with 1 abstention.

(26) Mr. AUGER (Director, Department of Natural Sciences) introduced the second item of the Indian motion (International Exchange) dealing with the international exchange of technical books, periodicals, scientific films and other scientific material. What was proposed was in fact one of the normal responsibilities of the Director-General and the effecting of such exchanges was a routine task of the Secretariat and more especially of the science co-operation offices. Thus, the only point of the proposal would be to remind the Secretariat of the importance of such exchanges.

(27) Mr. LEE (United States of America) said that elaborate and expensive machinery already existed for working out programmes and integrating plans and ideas; what was needed was to encourage the initiative of the Secretariat and Member Governments. He did not oppose the Indian Government's resolution, but believed that from a procedural point of view the Secretariat already had the necessary authority.

(28) Mr. BOW (Canada) agreed with the United States delegate. It was important to give the Secretariat a free hand and not restrict it by the terminology of resolutions. He proposed that the recommendation be referred back to the Secretariat for information.

(29) Mr. JUNANKAR (India) did not understand the procedural complications. Unesco had a programme for 1955-56 covering a vast variety of subjects and he could not see how recommendations concerning emphasis on different aspects would either hamper or give unlimited powers to the Secretariat. He would like clarification from the Secretariat on the subject.

(30) The CHAIRMAN said that the remarks of the United States and Canadian delegates did not concern the procedure of the Committee, which was entirely within its rights in making recommendations to the Programme and Budget Commission. They related to the general procedures of the Organization and it would be useful to have comments from the Secretariat on its general procedure in dealing with new projects.

(31) Mr. MAHEU (Assistant Director-General) observed that a major question of procedure had indeed been raised. He felt that, if such resolutions were adopted by the General Conference and incorporated in the programme, the effect would be to give an impression of dispersion which the Director-General had been at pains to avoid in drawing up the programme. Besides, it would overstress certain aspects of a given problem and the Secretariat would have the feeling that it was likely to be too definitely committed - which was certainly not the intention of the Indian proposal.

(32) The Committee might perhaps suggest a procedure to the General Conference for dealing with such resolutions; it would consist in recommending the Director-General to take any such proposals submitted by delegations into account, in the execution of the programme adopted and in the preparation of the programme for the following period. In other words, he would suggest that such proposals be covered by a general directive accompanied by a list of the suggestions of delegations. That procedure would avoid supplementary resolutions, while still satisfying delegations wishing to see emphasis laid on certain programme items. The Secretariat would thus have the benefit of directives while retaining its freedom of action.

(33) The CHAIRMAN said that the Assistant Director-General's suggestion was helpful. It was not clear, however, whether the indication that the Committee might want, in certain cases, to recommend to the Commission that resolutions be borne in mind by the Secretariat in executing the 1955-56 programme and preparing the 1957-58 programme, implied that the Committee considered that the text of the resolution should not be approved.

(34) Mr. MAHEU (Assistant Director-General) agreed with the Chairman. As he had already mentioned, the Secretariat would be sorry to see the text adopted as it stood, and he suggested that its substance, in summarized form, be incorporated in a list of suggestions to the Director-General.

(35) Mr. CABOUAT (France) thought that, in the light of what had been said, the Committee could, as each draft resolution came up for consideration, decide whether it was a real resolution with budgetary implications, or whether it was a suggestion suitable for inclusion in the proposed general resolution to be addressed to the Director-General.

(36) Mr. AVIDOR (Israel) considered that the resolution had budgetary implications and he proposed that it should not be adopted as a recommendation but submitted for the Secretariat's attention.

(37) Mr. BOW (Canada) thanked the Assistant Director-General for his able elaboration of his remark on terminology. The Secretariat and the Executive Board had constantly given assurances that they were in the hands of the Committee, but he did not wish to see them bound by resolutions in respect of which there had not been time to study either the terminology or their effect on the programme and budget.

(38) The CHAIRMAN asked for a vote on the proposal of the United States delegate, seconded by the delegate of Israel, that the resolution be transmitted to the Secretariat for guidance in executing the 1955-56 programme and preparing the 1957-58 programme.

(39) The proposal was adopted by 11 votes to 1 with no abstentions.

(40) Mr. AUGER (Director, Department of Natural Sciences) introduced the third part of DR/18 on the dissemination and teaching of natural sciences. The proposal appeared to be covered by the decision just taken by the Committee, for it was a question of authorizing the Director-General to examine the matter and submit the resolution formally to the General Conference at its ninth session, if he thought that satisfactory results could be expected. The proposal might, therefore, be included among the suggestions to the Secretariat for the ninth session of the General Conference.

(41) Mr. JUNANKAR (India) questioned the right of the Committee to change the nature of resolutions submitted by Member Governments.

(42) The CHAIRMAN said that the Committee, under its terms of reference, could make any recommendation which it deemed fitting in respect of the adoption or modification of a proposal. In reply to a further comment by the delegate of India, he said that the Conference was free to take whatever action it considered advisable on the Committee's recommendations, but the Committee had freedom of recommendation.

(43) Mr. LEE (United States of America) proposed that the Committee should recommend adoption of the resolution on the understanding that the Secretariat would consider it within the framework described by the Chairman in respect of the previous section.

(44) Mr. COWELL (United Kingdom) seconded the proposal.

(45) Mr. CABOUAT (France) pointed out that the procedure proposed by the United States delegate was contrary to that which the Committee had recently decided to follow. It was not a question of adopting a resolution, but of including the item in a general resolution giving the Director-General directives for the execution of the programme for 1955-56 and the preparation of the programme for 1957-58.

(46) Mr. LEE (United States of America) accepted that interpretation.

(47) Mr. MAHEU (Assistant Director-General) explained that his idea was to sort the draft resolutions into two lists of directives to the Director-General: (1) for action under the programme for 1955-56 and (2) for use in the preparation of the programme for 1957-58. The substance of draft resolutions would be given in one or other of those lists, or possibly in both. He felt that the draft resolution at present under discussion should appear only in the second list.

(48) The CHAIRMAN said that the proposal of the United States delegate was henceforth to be envisaged under the second category of projects, those calling for study with a view to possible inclusion in the programme for 1957-58.

(49) The proposal was adopted unanimously.

(50) Mr. AUGER (Director, Department of Natural Sciences) introduced the fourth point in the draft resolution - "Development of Scientific Co-operation", which had several subdivisions. Section (a) - symposia on subjects connected with geological and geophysical studies of the earth's crust in South East Asia - was largely covered by ICSU's arrangements for a "Geophysical Year" in 1957-58 and it seemed pointless to stage another symposium over and above its programme, in which Unesco was collaborating. Section (b) provided for regional symposia on the development of wind, water and solar energy; there again, a symposium on the same subject had recently been held in Delhi and Mr. Auger thought that the publication of the proceedings of that meeting would achieve the delegate of India's purpose. Section (c) concerned symposia on calendar reforms and it would be recalled that the Executive Board had taken the view that it was an activity falling rather within the province of the United Nations; Unesco could deal only with the scientific aspect, which had already been dealt with thoroughly. In any case, the obstacles to the adoption of a universal calendar were less scientific than political.

(51) Mr. AVIDOR (Israel) proposed the adoption of the Executive Board's recommendation.

(52) Mr. COWELL (United Kingdom) seconded the proposal, which was adopted unanimously.

(53) Taking the last paragraph in the resolution (Subvention of $3,000 to the Indian National Committee for Mathematics), the CHAIRMAN recalled that the Executive Board was in favour of the resolution.

(54) Mr. AUGER (Director, Department of Natural Sciences) said that the project was one to which the Union of Mathematical Science attached great importance.

(Mr. BOW (Canada) asked whether the subvention would meet the criteria established for Unesco subventions.

(56) Mr. MAHEU (Assistant Director-General) said that it would meet the criteria for contracts but not for subventions.

(57) Mr. LEE (United States of America) opposed the recommendation on the grounds that the project needed more study. A large sum of money was involved and it should be weighed up as carefully as other projects.

(58) The proposal of the United States delegate, seconded by the delegate of Canada, that the Committee should not recommend adoption of the resolution was adopted by 5 votes to 4 with 2 abstentions.

DR/29: International Computation Centre

(59) Mrs. PECSON (Executive Board) said that the Executive Board recommended adoption of the resolution in order to keep the project in force pending the decision of Member States on ratification.

(60) The CHAIRMAN asked for information on the budgetary implications of the project.

(61) Mr. AUGER (Director, Department of Natural Sciences) stated that, if the Committee decided, in accordance with the Italian proposal, that a subvention should be granted to the Preparatory Committee of the Computation Centre, the Secretariat would propose to allocate a total sum of $3,000 for the two years. Obviously, if the necessary ratifications were not secured in the two-year period 1955-56, all aid from Unesco to the Committee would cease. One thousand five hundred dollars would be appropriated for each of the two years, on the understanding that, if all the ratifications were secured in 1955, the subvention to the Committee for 1956 would automatically lapse. To date, four ratifications had been received, coming, in chronological order, from Japan, Belgium, Italy and Ceylon. Six further ratifications were needed for the Centre to come legally into being.

(62) Mr. LEE (United States of America) asked whether the project was described in the proposed programme and budget.

(63) The CHAIRMAN said that it had appeared in previous programmes but was not included in the present proposals.

(64) Mr. MAHEU (Assistant Director-General) confirmed that nothing was included in the proposed programme for 1955-56; what the Italian delegation was asking for was the restoration of the appropriations in the 1953-54 budget of $5,000 per year. The intention of the Secretariat was to set aside $1,500 per year for this project, on the understanding that, if ten ratifications were received before 1956, the appropriation for 1956 would be cancelled automatically.

(65) In reply to a question from Mr. AVIDOR (Israel) why there was no appropriation in the proposed programme for 1955-56 Mr. AUGER (Director, Department of Natural Sciences) said that the omission was on grounds of principle: with a convention in prospect, the Secretariat was bound to assume that it would be ratified and that there would be no time-lag between its signature and its entry into force. The Italian delegation, on the other

hand, anticipated such a time-lag and was requesting aid to cover it.

(66) Mr. CABOUAT (France) asked the nature of the Preparatory Committee's present work.

(67) Mr. AUGER (Director, Department of Natural Sciences) replied that its task was to prepare premises for the prospective centre; as a result of the contract concluded by Unesco in 1954, office space had been made available to the Centre in Rome and some people were already working there. The Committee had to draw up a list of the material needed in order that the Centre might start to operate immediately the necessary ratifications were received. The Italian Organizing Committee could continue that preparatory work.

(68) Mr. LEE (United States of America) asked whether, if the Centre was only to come into existence at an unspecified date in the future, there would be a loss on time and money already expended and on deterioration of machinery.

(69) Mr. AUGER (Director, Department of Natural Sciences) replied that the Italian Organizing Committee was conducting negotiations with manufacturers of computation machines with a view to securing them on free loan for a given term of years or to obtaining special purchase prices. The work already done would be lost if suspended, as the entire series of negotiations would have to be started again.

(70) Mr. JUNANKAR (India) asked whether the assistance in question could not take the form of a subvention.

(71) Mr. AUGER (Director, Department of Natural Sciences) explained that the assistance given to the Italian Organizing Committee had been in the form of contracts for the fitting out of the offices and that it was requesting the extension of those contracts.

(72) Mr. COWELL (United Kingdom) pointed out that the Centre was mentioned in paragraph 61 of Chapter 2 of the proposed programme and budget in conjunction with the European Centre for Nuclear Research. The latter was established under the impetus of Unesco but with the entire cost provided by participating Member States; he wondered whether the same principle was applied to the Computation Centre. In that case, the grant should be in the form of a loan and not a subvention, and he asked whether or not it would be recoverable.

(73) To clarify the proceedings, Mr. AUGER (Director, Department of Natural Sciences) pointed out that the European Centre for Nuclear Research had cost Unesco the relatively low sum of $25,000, because the main expenses of preparation had been borne by the Member States of the interim and, later, the permanent body. In the case of the Italian Committee, provision had been made for a sum of $60,000 as a loan repayable within three years, but, as the Centre had not started operations, the relevant authorization had lapsed. What was henceforth proposed was merely the conclusion of an ordinary contract of $1,500 per year.

(74) The CHAIRMAN asked how many countries had signed the agreement and how many ratifications might be expected in the near future, bearing in mind legislative procedures in the respective countries.

(75) Mr. AUGER (Director, Department of Natural Sciences) replied that eleven signatures had been received, which was one more than the number of ratifications required to bring the Convention into force.

(76) Mr. BOW (Canada) asked whether the Committee or the Secretariat had the right to amend a governmental resolution in respect of the form or the amount of the money involved. He also wished to know how long the Convention had been open for ratification and how many instruments had been deposited within the past year.

(77) The CHAIRMAN stated that the Committee had the power to recommend modifications and had in fact done so with regard to a previous project.

(78) Mr. BOW (Canada) pointed out that in that instance a representative of the proposing government had been present. There was no Italian representative at the present discussions.

(79) The CHAIRMAN said that the Italian delegate to the Programme and Budget Commission would have an opportunity to express his views.

(80) Mr. AUGER (Director, Department of Natural Sciences) explained that the Convention had been open to ratification since 1952; the Italian ratification - which was essential - had not been secured until 1954 and there were grounds for hoping that it would lead to other ratifications, though it had to be remembered that a somewhat lengthy procedure was always involved.

(81) Mr. MAHEU (Assistant Director-General)stated that the eleven signatories were Belgium, Egypt, Iraq, Israel, Italy, Japan, Liberia, Mexico, Turkey, Netherlands and Ceylon.

(82) Mr. CABOUAT (France) moved that the Committee recommend adoption of the project in contract form, with appropriations reduced to a total sum of $3,000 for the two years.

(83) Mr. COWELL (United Kingdom) proposed that the application be rejected. If his motion were defeated, he would propose that a grant be made in the form of a recoverable loan.

(84) The proposal of the United Kingdom delegate, seconded by the delegate of Norway, was rejected by 3 votes to 5 with 3 abstentions.

(85) Mr. COWELL (United Kingdom) submitted his alternative proposal as an amendment to the proposal of the delegate of France, agreeing to the reduction of the figure to $3,000.

(86) The delegate of France accepted the amendment.

(87) In reply to a question from Mr. AVIDOR(Israel) the CHAIRMAN said that the loan would be made to the Interim Committee.

(88) Mr. MAHEU (Assistant Director-General) drew attention to a legal difficulty, namely, that the advance would be made to one body - the Preparatory Committee - but would be repayable by another, the Computation Centre, when and if it came into existence.

(89) Mr. SILLER (Mexico) asked whether, should the Convention not be ratified, the Preparatory Committee would be in a position to repay the loan.

(90) Mr. MAHEU (Assistant Director-General) replied that he would find it difficult to answer that question.

(91) The proposal of the delegate of France, amended and seconded by the delegate of the United Kingdom, was adopted by 9 votes to nil, with 1 abstention.

(92) Mr. COWELL (United Kingdom) asked how the loan would be recovered if, through lack of ratifications, the Interim Committee ceased to function.

(93) Mr. MAHEU (Assistant Director-General) proposed to make a statement on this point at a later stage.

DR/35: Conservation of Natural Resources

(94) Mr. AUGER (Director, Department of Natural Sciences) introduced draft resolutions DR/35, DR/54 and DR/60, which the Executive Board had dealt with together because all three related to the same problem. In very many countries, dam building, irrigation and other work were undertaken for commercial ends without regard to the wider considerations of their possible long-term effects on hydrology, flora and fauna. It was suggested(DR/35) that a committee composed of engineers, public works contractors and naturalists be convened to draw up a scheme for the requisite research, which would be handled by contract. The proposal in DR/54 was connected with that project and DR/60 concerned the publication of a book. The Executive Board had suggested that the project be executed in three stages: (1) preparatory stage (bibliographical research and a brief report on work already carried out); (2) meeting of an expert committee to draw the inferences from the preliminary investigations; (3) publication of results in a book suitable for the general public. The Executive Board's idea was that only the first two stages could be attacked in 1955 and 1956 and that the appropriations would be for the preparatory work and the meeting of the committee. The Secretariat had suggested reducing the appropriations requested by concluding a contract of $2,000 for the first item and allocating $4,000 for the meeting of experts, i.e. a total of $6,000 for the two years.

(95) The CHAIRMAN asked whether it was a fact that the Executive Board had decided in favour of draft resolution DR/35 and against draft resolution DR/54.

(96) Mr. AUGER (Director, Department of Natural Sciences) believed that the Executive Board had approved DR/35 and DR/60, which related to the effects of catchment works on flora and fauna, but without approving the figures suggested and with postponement of the third stage of the work until 1957-58. Document DR/54 had not been considered by the Executive Board.

(97) Mrs. PECSON (Executive Board) confirmed the statement of the Director of the Department of Natural Sciences. The Executive Board had recommended that the resolution contained in document 8C/DR/60 be postponed until the ninth session of the General Conference.

(98) The CHAIRMAN said that three stages were envisaged: initial bibliographical work, establishing a committee of experts, and publication of the results for inclusion in the 1957-58 programme.

(99) Mr. COWELL (United Kingdom) asked whether, in so far as the project related to the construction of hydroelectric dams, Unesco had approached non-governmental organizations or the industries concerned with a view to obtaining financial and other assistance.

(100) Mr. AUGER (Director, Department of Natural Sciences) was under the impression that what the delegate of the United Kingdom had in mind was not so much the International Union for the Protection of Nature as the International Commission on Large Dams and the World Power Conference, which were concerned exclusively with the technical aspect of hydraulic works without regard to their biological implications. What was proposed was a joint committee consisting of representatives of the three organizations he had just mentioned. The proposed appropriations were very modest ($2,000 and $4,000), as the Secretariat was counting on a financial contribution from those organizations, which could not but be interested in the question.

(101) Mr. LEE (United States of America) said that the resolutions concerned a very important subject, on which there had been much investigation, both nationally and internationally. He proposed that, as with earlier resolutions, the Secretariat be authorized to draw up plans during 1955-56 and prepare proposals for the 1957-58 period.

(102) The CHAIRMAN defined the proposal of the delegate of the United States of America as recommending the acceptance of the tenor of the projects and authorizing the Director-General to make a study in 1955-56 with a view to possible proposals in the 1957-58 programme.

(103) Mr. LEE (United States of America) said that it had already been agreed to give priority to arid zone research and he assumed that the Secretariat would bear that in mind if any additional funds should be available.

(104) Mr. AUGER (Director, Department of Natural Sciences) reminded the Committee that arid zone matters were the responsibility of an Advisory Committee which commended specific tasks to the Secretariat. The suggestion of the United States delegate to include the problem of dams in the Committee's responsibilities would have to go before the Executive Board and the Committee itself.

(105) The CHAIRMAN, referring to the proposal of the delegate of the United States of America (paragraph 101) said that the Director-General would be authorized in 1955-56 to study the question in consultation with the Advisory Committee on Arid Zones and, if the results were satisfactory, to include proposals for further work in 1957-58.

(106) Mr. SILLER (Mexico) suggested that the proposed survey be combined with the studies advocated by the delegation of Uruguay (document DR/42), which appeared to have a connexion with the subject under discussion.

(107) Mr. AUGER (Director, Department of Natural Sciences) did not see how the proposal in DR/42 could be combined with the other three (DR/35, DR/54 and DR/60), which embodied purely technical proposals, whereas the suggestion of the delegation of Uruguay was only to awaken the public to the question of the conservation of natural resources in general.

(108) Mr. RANIERI (Uruguay) thanked the representative of Mexico for his kind thought, but agreed with Mr. Auger that the draft resolution submitted by Uruguay differed fundamentally from that of France in document DR/35. The Uruguayan proposal related rather to the preservation of flora and fauna and the soil, and should be studied separately.

(109) The CHAIRMAN thanked the delegate of Uruguay and said that, if there were no objection, DR/42 would be dealt with separately.

(110) In the hope of soon reaching a solution, Mr. CABOUAT (France) asked Mr. Auger what the Secretariat's budget estimates would be if the Committee advised the Programme and Budget Commission to combine the three draft resolutions.

(111) Mr. AUGER (Director, Department of Natural Sciences) replied that, as he had already indicated, the budget estimates for the three resolutions together, excluding the publication of the book were $6,000, i.e. $2,000 for the preparatory study and $4,000 for the meeting of the proposed Committee. That meeting would be possible only if the organizations concerned also made a financial contribution. The book suggested might be published in 1957-58.

(112) Mr. BOW (Canada) seconded the United States delegate's proposal, in the interest of concentration of the programme, and on the understanding that the project would be considered in direct relation to arid zone research.

(113) Mr. CABOUAT (France) pointed out that the proposed activities transcended the scope of arid zone research and involved other types of regions as well. He therefore formally moved that the Director-General be authorized to undertake such activities with a total appropriation of $6,000 for the next two years, and that the whole project be given a lower priority.

(114) The above proposal was seconded by Mr. AVIDOR (Israel).

(115) The proposal of the delegate of the United States of America was put to the vote and adopted by 6 votes to 3, with 2 abstentions.

(116) Mr. MAHEU (Assistant Director-General) observed that the Committee's decision meant that the project would be included in the second list of suggestions, the list of pointers for the preparation of the programme for 1957-58.

DRs 42 and 58

(117) Mr. AUGER (Director, Department of Natural Sciences) outlined the substance of DR/42 and DR/58, and gave additional details. For the special case to which DR/58 related, he quoted an estimate of $6,000. The Executive Board had approved all those suggestions, together with the appropriation of $6,000 for the special purpose of publishing a book.

(118) In reply to a question from Mr. AVIDOR(Israel), the CHAIRMAN said that the Executive Board's attitude had been favourable to both resolutions, the total budget for which was $6,000.

(119) Mr. LEE (United States of America) proposed that the resolutions be dealt with in the way he had suggested for previous projects.

(120) The proposal, seconded by the delegates of the United Kingdom and Germany, was adopted by 8 votes to 1 with 2 abstentions.

(121) Mr. CABOUAT (France) remarked that the whole position needed clarifying; as a result of the voting on the two resolutions, the Director-General was authorized to undertake in 1955-56, with the funds provided in the draft programme and budget, studies relating to the conservation of natural resources and teaching on that subject. Yet the Assistant Director-General seemed to think that the result of the voting was merely to provide directives for the preparation of the programme for 1957-58.

(122) Mr. LEE (United States of America) said that he had not intended to bring in new issues.

(123) The CHAIRMAN said that his understanding was that the Director-General would study the proposals themselves and not the studies which they provided for, with a view to possible inclusion of precise proposals in the 1957-58 programme.

(124) Mr. AUGER (Director, Department of Natural Sciences) explained that no action by the Secretariat was planned in 1955-56, beyond preparatory studies

with a view to the inclusion in the programme for 1957-58 of resolutions defining specific tasks.

(125) Mr. MAHEU (Assistant Director-General) reminded the meeting that no funds were available, so that the Secretariat could not even put preliminary studies in hand; all it could do was to consider the possibility of including the project in the future programme.

(126) Mr. CABOUAT (France) explained that he had raised the question because the delegate of the United States of America apparently anticipated that the actual work would be begun in 1955-56.

(127) The CHAIRMAN said that the Advisory Committee on Arid Zone Research would be called on to advise the Director-General in his study.

(128) Mr. MAHEU (Assistant Director-General) repeated that there was no money available.

(129) Mr. AUGER (Director, Department of Natural Sciences) said that, as the project was not included in the programme for 1955-56, the Secretariat could not take action on it.

DR/44: Establishment in Spain of a Pilot Centre for the Study of Methods of Teaching Science in Secondary Schools

(130) Mrs. PECSON (Executive Board) said that the Executive Board had studied documents 8C/DR/44 and 8C/DR/51 together and was not in favour of the latter. With regard to the former, the Board recommended that the proposal be carried out under the technical assistance programme.

(131) Mr. AUGER (Director, Department of Natural Sciences) pointed out that DR/51 was not identical with DR/44. The latter provided for the establishment of "a Latin American Pilot Centre for the study of methods of teaching science in secondary schools and for the training of teachers of scientific and technical subjects for such schools", whereas DR/51 provided explicitly for the establishment of such a centre in Spain. Was DR/51, therefore, an amplification of DR/44?

(132) Mr. MAHEU (Assistant Director-General) remarked that, offhand, such appeared to be the case.

(133) Mr. SILLER (Mexico) suggested that, as the representative of Spain was present, perhaps he could say whether that interpretation of the draft resolution was correct.

(134) The CHAIRMAN, in reply to a question from the delegate of Israel, confirmed that the Executive Board had recommended that the Government of Spain be advised to apply for technical assistance, and the proposal would accordingly not be submitted to the General Conference.

(135) A proposal by the delegate of Israel, seconded by the delegate of the United Kingdom, that the Executive Board's recommendation be followed, was adopted unanimously.

(136) The CHAIRMAN pointed out that the delegate of Spain would have an opportunity of stating his point of view at a later stage.

DR/47: Scientific Exchanges

(137) Mrs. PECSON (Executive Board) said that the Executive Board was interested in the proposal but, in the light of information from the Director, Department of Natural Sciences and the Director, Department of Cultural Activities, had decided to refer it to the International Council of Museums.

(138) Acceptance of the Executive Board's recommendation was proposed by the delegate of Canada, seconded by the delegate of the United Kingdom and adopted unanimously.

(139) Mr. RANIERI (Uruguay) wished to hear from Mrs. Pecson what the Executive Board's views were on the subject.

(140) Mrs. PECSON (Executive Board) explained that the Board regarded the activity proposed by the Uruguayan delegation as extremely important;however, a body responsible for carrying out such work was already in existence. That did not mean that the Board rejected the Uruguayan proposal.

(141) Mr. MAHEU (Assistant Director-General)asked whether the Executive Board intended that the meeting of directors of zoological gardens, referred to in DR/47, should be financed out of ICOM's budget, or whether it felt that, since an additional task was to be imposed on the Council, a special contract should be concluded with it.

(142) The CHAIRMAN interpreted the vote as recommending the transfer to ICOM, which would be free to take it up or not, within the limits of its own budgetary resources. Replying to a question from the delegate of Israel, he said that ICOM might possibly ask for a subvention.

DR/56: Dissemination of Science

(143) Mrs. PECSON (Executive Board) said that the Board had postponed a decision pending further information.

(144) Mr. AUGER (Director, Department of Natural Sciences) thought that it would be difficult to throw any further light on the question. As he did not know the Scientific Information Centre of the Municipality of Montevideo, it was difficult for him to form an idea of what its use would mean. It was impossible to give any figures for the project until a thorough preparatory study had been made.

(145) Mr. SILLER (Mexico) asked whether it would be possible to carry out the study to which Mr. Auger had referred before the Committee took a decision in the matter and, if not, whether the draft resolution of Uruguay would have to be rejected.

(146) The CHAIRMAN said that the procedure would be first a clarification from the delegate of Uruguay, then comments by the Executive Board, after which the Secretariat would fix budgetary limitations and the Advisory Committee would consider action before the proposal was submitted to the Programme Commission.

(147) Mr. LEE (United States of America) objected that action could not be taken in time for the matter to be dealt with by the present Conference. There was considerable merit in the project, but there was need for much investigation before the Scientific Information Centre in Montevideo could be accepted as a pilot project. He proposed that, as with earlier resolutions, the matter be referred to the Secretariat for study.

(148) Mr. AVIDOR (Israel) proposed that the possibility of action under the technical assistance programme should be considered.

(149) Mr. AUGER (Director, Department of Natural Sciences) said that a study should be made in 1955-56 and the project be included in the proposals for 1957-58 either under the regular programme or under the technical assistance programme.

(150) Mr. RANIERI (Uruguay) found the proposed dates satisfactory and stated that the Uruguayan authorities would gladly provide whoever was responsible for the initial study with all the data and information he might require.

(151) The proposal was adopted by 9 votes to 1 with 1 abstention.

DR/59: Arid Zone

(152) Mrs. PECSON (Executive Board) said that the Executive Board had considered it unnecessary to endorse the proposal since the project already appeared in the programme.

(153) It was agreed that no action was necessary.

DR/61: Physical Oceanography and Marine Biology

(154) Mrs. PECSON (Executive Board) said that the Executive Board, after an explanation by the Director, Department of Natural Sciences, had agreed to support the Secretariat's proposal to set up an advisory committee on marine biology.

(155) Mr. AUGER (Director, Department of Natural Sciences) recalled that, when the question of oceanography had been raised, he had made a statement proposing certain modifications of the programme. The proposal in DR/61, of which he had been unaware at that time, put the Secretariat's proposals in a rather more legal form. Accordingly, acceptance of this Japanese proposal would amount, for the Secretariat, to acceptance of its own proposals, involving transfers within the budget with no additional funds.

(156) Document DR/61 was approved.

The meeting rose at 12.50 p.m.

# EIGHTEENTH MEETING

*11 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.3 OF THE AGENDA: DISCUSSION OF DRAFT RESOLUTIONS SUBMITTED BY MEMBER STATES** (continued)

Draft resolutions affecting the Department of Social Sciences

DR/5: Peaceful Co-operation

(1) Mrs. PECSON (Executive Board) said that the Executive Board had not recommended this resolution because it felt that the proposed study would not produce practical results for Unesco's work.

(2) Mrs. MYRDAL (Director, Department of Social Sciences) said that the major part of this resolution consisted of an appeal to the General Conference for an expression of faith in the possibilities of resolving all tensions through the exercise of restraint, tolerance, understanding and goodwill. The last sentence proposed a study. The Secretariat thought that it would be difficult to propose a work plan for such a study; more information was required. Preliminary work was necessary, which could be undertaken in 1955 and 1956 and could be used to clarify the issue. It would consist of asking international congresses to include the subject on their agendas. Unesco would then give contracts for undertaking the study and, finally, the services of a consultant would be required to make an inventory of all research work being done in this connexion. In future years, the work could

be digested and channelled to give the best results. The budgetary implications for the preliminary work in 1955-56 would amount to $14,000.

(3) Mr. JUNANKAR (India) added an amendment to the text of the resolution. The Indian Government had written to the Secretariat and asked that the word "coexistence" in the title should be changed to the word "co-operation".
(4) With regard to the resolution, he said that the Indian Government had felt the necessity of finding a modus vivendi in the interests of peace. The United Nations were primarily interested in the political aspects, but there was no reason why Unesco should not interest itself in other aspects, especially the social aspect. In the interests of peace the matter was urgent. It might not be possible for Unesco to undertake the complete study at once, but he saw no reason why it should not make an impact in slow and steady stages. He suggested that, by engaging in this project, Unesco could promote an atmosphere of peace, sanity and goodwill.

(5) Mr. LEE (United States of America) said that, at the meeting of the Executive Board when this resolution had been discussed, the feeling had been that, as unfortunately the idea of peaceful co-operation had a political connotation, Unesco would be advised not to embark on any work connected with it, in case it became embroiled in political matters which would yield no useful practical results. He reminded the meeting that, at its seventh session, the General Conference had appointed a Committee which was seeking a means of approach by Unesco in the field of co-operation. The basic purpose of co-operation was expressed in Unesco's programme as a whole.
(6) He proposed that the Committee should abide by the decision of the Executive Board and not recommend this resolution to the General Conference.

(7) Mr. COWELL (United Kingdom) said that everyone sympathized with the idea behind the resolution, as it would encourage the belief that a time would come when there would no longer be racial discrimination. However, he supported the United States delegate for the reasons which Mr. Lee had given. Research in this field went beyond technical problems and extended into the domestic and foreign policies of countries. Unesco could not undertake a study without examining all the United Nations and Member States in the light of the United Nations Charter, a formidable task. He hoped that resolution 3.4 in the programme of the Department of Social Sciences would be sufficient to take care of the main activities in the field.

(8) Mr. ABDEL-RAHMAN (Egypt) pointed out that the resolution was in two parts and asked for an explanation of the difference between the second part of this resolution and resolution 3.4 in the programme of the Department of Social Sciences.

(9) Mrs. MYRDAL (Director, Department of Social Sciences) replied that resolution 3.4 proposed that work begun on certain projects should be continued. Other more specific activities were being proposed for 1955-56, which, if approved by the General Conference, would gradually help to throw light on the elements of the very complicated problem. There was no proposal to embark on a study of the problem itself.

(10) Mr. SILLER (Mexico) would vote in favour of the proposal of the delegate of the United States of America on technical grounds and because he felt that the draft resolution proposed by the delegation of India was outside the compass of Unesco's current programme. He recalled that the preamble to Unesco's Constitution referred explicitly to the wish of Member States to find peaceful means of resolving tensions, and that had been the spirit to which the Mexican Government's delegations to organs and agencies of the United Nations had consistently conformed. Nevertheless, he felt that Unesco had no adequate means at its disposal to implement the draft resolution of the delegation of India.

(11) The CHAIRMAN put to the vote the proposal that the Committee should abide by the decision of the Executive Board and not recommend the resolution contained in document 8C/DR/5 to the General Conference.

(12) The proposal was adopted by 9 votes in favour, 1 against and 2 abstentions.

DR/8: Race Relations

(13) Mrs. PECSON (Executive Board) said that the Executive Board had strongly recommended this resolution to the General Conference.

(14) Mrs. MYRDAL (Director, Department of Social Sciences) remarked that the resolution fitted in with the projects included in paragraphs 174-180 of the programme of the Department of Social Sciences. The Committee had already discussed these projects and had recommended that they be given a high priority. The Secretariat considered that the formulation of a work plan was possible over a wide field, but, as it had already embarked on its programme, did not want to include projects having budgetary implications. In the past, pamphlets had been produced which had now reached a circulation of a quarter of a million copies in various languages. The work of translating these pamphlets into yet more languages could be increased and, if the necessary sums were pooled with those for other translation work, it would only be necessary to ask for a further $8,000 for the period 1955-56.
(15) Further, work in schools could be extended. For that purpose, the Departments of Education and Social Sciences would have to convene a conference of educators, social scientists and educational administrators to consider at what age it would be best to introduce teaching directed against racial discrimination and prejudice. The budget estimate for this work amounted to $11,192.

(16) Mr. LEE (United States of America) thought that, as this subject had been of continuous concern to Unesco from the first, it was fitting that work should be continued. After an examination of the practical application of the efforts made in this area,

he recommended slight changes to the wording of the resolution.

(17) The new wording would be as follows:

"Bearing in mind that discrimination, as defined in Article II of the Universal Declaration of Human Rights, on the basis of race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status is one of the greatest dangers to peace and to human dignity, noting that Unesco has already taken some commendable steps in producing helpful publications on the subject of race and race relations, regretting that discrimination in very ugly forms continues to vitiate relations between human beings in certain areas of the world, the General Conference calls upon all Member States and National Commissions of Unesco to eradicate in all possible ways the evil of discrimination and authorizes the Director-General, in carrying out Unesco's programme, to give special attention to measures designed to eliminate such discrimination".

(18) Mr. JUNANKAR (India) remarked that the Indian proposal contained in document 8C/DR/8 had a definite purpose, which was to give particular emphasis to the racial aspect of discrimination, and he proposed that the resolution should be left as it stood.

(19) The CHAIRMAN put the United States proposal to the vote. The proposal is rejected by 2 votes in favour, 7 against and 2 abstentions.

(20) Mr. MAHEU (Assistant Director-General) felt it essential to seek further enlightenment from the Committee. A work plan had been proposed; it was not final and was liable to readjustment. But it would be illogical to adopt a programme as it stood and then to refuse approval of the appropriations necessary to carry it out.

(21) Mr. SILLER (Mexico) concurred in the remarks of the Assistant Director-General. If publications on racial questions had been given a high priority, it would be illogical to cut the appropriations requested. Those publications were of great help in combating racial prejudice.

(22) Mr. ABDEL-RAHMAN (Egypt) wondered whether, as the contents of the resolution were approved by the Committee, the project could be fitted into the programme of the Department of Social Sciences without further budgetary expense. It was certain that these projects had a high priority.

(23) Mrs. MYRDAL (Director, Department of Social Sciences) agreed that the proposed project could be fitted into the Department's programme and that it would have a high priority but reminded the Committee that it would be necessary to increase the budget estimates if this were done.

(24) In answer to a question from Mr. ABDEL-RAHMAN (Egypt) who asked what the present total budget was, Mrs. MYRDAL replied that the contracts for two new pamphlets with cost of printing would amount to between $3,000 and $4,000. Personnel costs would amount to a total of approximately $37,000 for each of the years 1955 and 1956 over the whole project, while programme costs would amount to $35,000 in 1955 and $30,000 in 1956.

(25) Mr. MAHEU (Assistant Director-General) pointed out that the project on race relations was only part of a whole. To finance the whole would require the sum indicated in paragraph 180, plus the cost of printing the two booklets.

(26) Mr. RAO (Acting Chief, Bureau of Programme and Budget) gave details of the budget for this project: 2 manuals $2,820, information on the campaign $1,000, 2 brochures $2,940, comparative research approximately $1,000. Total: $7,760. To which would have to be added personnel costs, which took up half the total amount (27% of the Social Sciences budget) allocated to the whole project (3.5) = $26,000 for the two years.

(27) Mr. ABDEL-RAHMAN (Egypt) hoped that the Committee would be prepared to vote an adequate sum.

(28) The Executive Board's proposal to allocate $19,192 for the two years to the Resolution on Race Relations contained in document 8C/DR/8 was put to the vote and adopted by 9 in favour, 1 against and 2 abstentions.

DR/13: Continuation of subsidy to the International Society of Criminology

(29) Mrs. PECSON (Executive Board) said that the Executive Board had considered the activities outlined in this resolution not sufficiently close to those of Unesco, and therefore did not recommend adoption of the proposal.

(30) Mrs. MYRDAL (Director, Department of Social Sciences) added that the proposal implied a subvention of $1,000 a year.

(31) The recommendation of the Executive Board was put to the vote and adopted by 8 in favour, 1 against and 2 abstentions.

DR/21: Resolutions on International Understanding

(32) Mrs. PECSON (Executive Board) informed the Committee that the Executive Board had taken this draft resolution in four parts. The first part was made up of the proposal to hold two seminars in 1955-56 and to disseminate Gandhian ideas and techniques. The Board had asked that this resolution should be resubmitted at the ninth session of the General Conference.

(33) Mrs. MYRDAL (Director, Department of Social Sciences) explained that this part fitted in with project 3.4, Social Sciences, paragraphs 148-150 which had been worked out on the basis of a previous resolution submitted by the Indian National Commission. Gandhian techniques were one of the methods to be studied. The new resolution went further in proposing seminars that would cost $20,000 to $30,000 each or, if run on the lines of regional seminars, $8,000 each.

(34) Mr. LEE (United States of America) proposed that the recommendation of the Executive Board be accepted.

(35) The proposal seconded by Mr. COWELL(United Kingdom) was put to the vote and adopted by 9 in favour, 1 against and 2 abstentions.

(36) Mrs. PECSON (Executive Board) said that the Executive Board had asked that the second part - paragraph 2 of the draft resolution - on exploring the possibilities of translation of Gandhian literature, could be recommended, on the understanding that there would be no financial implications.

(37) At the suggestion of the delegate of the United Kingdom, seconded by the delegates of Norway and Belgium, that this recommendation be accepted, it was put to the vote and carried by 9 in favour, none against and 1 abstention.

(38) Mrs. PECSON (Executive Board) said that the third part of the resolution (page 2), authorizing the Director-General to bring out a publication embodying the views of leading statesmen of the world, entitled "War and Peace", had not been recommended by the Board.

(39) Mrs. MYRDAL (Director, Department of Social Sciences) said that this proposal had no relation to any of the special projects included in the 1955-56 programme. A suggestion along the same lines had been made by a working party at the previous session of the General Conference. A circular letter sent round afterwards had received only 10 answers, of which 3 were in the negative. She considered that the views of Member States would have to be taken into account, with printed statements by leading statesmen, involving much work of analysis and comparison. The total estimate for this wider proposal would be $17,000.

(40) Mr. JUNANKAR (India) said that the resolution was not meant to refer to printed statements. It was proposed to invite living statesmen to make their confession of faith on the most vital problems of the day.

(41) The proposal by the delegate of the United States of America, supported by the delegate of the United Kingdom, to accept the recommendation of the Executive Board was put to the vote and adopted by 8 in favour, 1 against and 3 abstentions.

(42) Mrs. PECSON (Executive Board) said that the last part of resolution No. 21, referring to a subvention of $3,000 for library and other equipment for a Delhi School of International Relations, had been found by the Executive Board to be inadmissible under existing regulations.

(43) Mrs. MYRDAL (Director, Department of Social Sciences) agreed with the Executive Board's decision. She suggested that the Government of India might obtain technical aid for this school under the new resolution in the programme, paragraphs 135-139.

(44) Mr. JUNANKAR (India) reminded the meeting that it had agreed to the assistance of three Institutes in the German Federal Republic, and had that morning considered a subvention, contract or loan to the interim committee of the International Computation Centre. There was therefore surely no reason to exclude a subvention to the Delhi school.

(45) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that Unesco was empowered to grant subventions only to (1) international non-governmental organizations; (2) intergovernmental organizations; (3) organizations or preparatory committees set up in implementation of a specific resolution passed by the General Conference.

(46) Mr. LEE (United States of America) proposed the acceptance of the recommendation of the Executive Board.

(47) Mr. AVIDOR (Israel) seconded the proposal, which was put to the vote and adopted by 10 in favour, 1 against and 1 abstention.

Draft resolutions affecting the Department of Cultural Activities

DR/6 and DR/17: Dissemination of Asian and African culture in the West

(48) Mr. THOMAS (Director, Department of Cultural Activities) said that the Executive Board had taken the Indian delegation's draft resolutions contained in documents 8C/DR/6 and 8C/DR/17 together. The Board's view had been that the second of the documents tended more to specific action, whereas the first might be regarded as a general recommendation. The Board had concentrated on the second document.

(49) Mr. JUNANKAR (India) said that the several items in the two documents were part of Unesco's normal commitments.

(50) Mr. THOMAS (Director, Department of Cultural Activities) explained that the Board's decisions on the various items in the draft resolutions had differed. It had approved the first item in DR/17, which in fact contained two distinct proposals: (1) the reproduction of works of art, which came under the regular programme and thus involved no new expenditure; and (2) the publication of "popular series of various arts" of the countries of Asia and Africa, about which it was rather difficult to reach any conclusion. On the budgetary side, an appropriation of $8,000 was suggested for 1956 and nothing for 1955.

(51) Mr. CABOUAT (France), seconded by Mr. LEE (United States of America), asked that the item be transferred to the general resolution on the 1957-58 programme.

(52) The proposal was adopted by 9 votes to 2 with one abstention.

(53) Mr. THOMAS (Director, Department of Cultural Activities) then commented on the second item in DR/17, dealing with art films and children's films,

referring the meeting to document 8C/5 Corrigendum on art films (paragraphs 162 a - 162 h, Mass Communication) and to document 8C/5 paragraphs 143-145 on children's films. It would be apparent from the passages he had indicated that the adoption of the resolution by the Conference would have no budgetary implications.

(54) This item in the Indian resolution (document 8C/DR/17) was referred back for further consideration.

(55) Mr. Thomas said that the third item in the Indian draft resolution was not recommended by the Executive Board. The type of activity involved was the business of the International Music Council. As far as oriental music was concerned, estimates for arrangement, annotating and distribution alone would account for $8,000 a year.

(56) It was decided to accept the view of the Executive Board.

(57) With regard to the fourth item - the establishment of a science museum in India - Mr. THOMAS (Director, Department of Cultural Activities) noted that detailed estimates were given, reaching a total of $42,000 a year plus the cost of a fellowship payable by the Exchange of Persons Service. The project was not recommended by the Executive Board.

(58) Mr. CABOUAT (France) asked whether there was no possibility of including the project in the existing programme.

(59) Mr. THOMAS (Director, Department of Cultural Activities) replied that this was not impossible as regards the fellowship, but no provision had been made for the despatch of an expert and the provision of equipment worth $30,000.

(60) Mr. JUNANKAR (India) stressed the importance of the project and the value of any assistance given to it in the programme.

(61) Mr. ABDEL-RAHMAN (Egypt) suggested that the Director-General should be recommended to give all the assistance possible within the existing programme and budget.

(62) Mr. THOMAS (Director, Department of Cultural Activities) thought the intention of the Egyptian delegate was that all the possibilities of the existing budget be first exhausted, and recourse be had thereafter to the Government of India for the balance. Within the existing budget ceiling the sole possibility open was the provision of a fellowship. It was not possible to purchase and supply equipment. It might be possible to second an expert on museums for service in India but science museums were a very specialized field of museum work, which made the prospects of carrying out such a mission under the existing budget problematical.

(63) Mr. FLORKIN (Belgium) pointed out that there was little in common between experts on science museums and on ordinary museums.

(64) Mr. LEE (United States of America) proposed that the recommendation of the Executive Board be accepted.

(65) Mr. SOMMERFELT (Norway) seconded the proposal.

(66) Mr. CABOUAT (France) enquired the cost of an expert mission on museums not forming part of the regular staff of the Secretariat.

(67) Mr. THOMAS (Director, Department of Cultural Activities) explained that, on average, the cost of sending one expert on a year's mission to a particular country was $12,000. He agreed with the delegate of Belgium that the minimum length for a mission of science museum experts was six months.

(68) The motion of the delegates of the United States of America and Norway that the recommendation of the Executive Board be followed was adopted by 5 votes to 3, with 2 abstentions.

(69) On the fifth item in the Indian draft resolution, Mr. THOMAS (Director, Department of Cultural Activities) said that the proposed work was one of the normal activities of the International Theatre Institute, a non-governmental organization recognized by Unesco. Accordingly, in his view, no budgetary implications were likely to arise. The Executive Board had felt that the activity was desirable but outside the normal programme of Unesco and on that account it was not recommended.

(70) Mr. FLORKIN (Belgium) moved that the Committee accept the recommendation of the Executive Board.

(71) This proposal was adopted by 8 votes to 1, with 1 abstention.

(72) The sixth item in the draft resolution, said Mr. THOMAS (Director, Department of Cultural Activities), had been recommended for adoption by the Executive Board. The Secretariat proposed to refer the project to the International Council for Philosophy and Humanistic Studies, a non-governmental organization recognized by Unesco. A contract for $2,000 with the Council would, however, be necessary.

(73) Mr. SOMMERFELT (Norway) enquired whether the proposed institute would be an international one.

(74) Mr. JUNANKAR (India) replied that it would be open to any countries interested, but that the study it would be set up for was a specific one.

(75) Mr. SOMMERFELT (Norway) reminded the meeting that the cost of such an institute would be high. Would it be run on the lines of the Institute of African Studies in London?

(76) Mr. COWELL (United Kingdom) asked where it was proposed to establish the institute. Similar institutes already in existence should be taken into account. Were they inadequate?

(77) Mr. THOMAS (Director, Department of Cultural

Activities) pointed out that the sixth item in the Indian draft resolution provided for an investigation and report.

(78) After a discussion whether it was possible to consider the location of the institute at that stage, Mr. ABDEL-RAHMAN (Egypt) said that Unesco was merely asked to take the first steps in promoting a study of the need for such an institute.

(79) The delegate of India proposed that the recommendation of the Executive Board be adopted. The delegates of Egypt and France seconded the proposal, which was adopted by 6 in favour, none against and 4 abstentions.

(80) Mrs. PECSON (Executive Board) said that the Executive Board was interested in item 7 of the draft resolution, on exploring the possibilities of establishing a regional laboratory of research into preservation of monuments and works of art, but would like to see the outcome of the proposal at present in the programme for an international research centre, before considering this new suggestion.

(81) Mr. THOMAS (Director, Department of Cultural Activities), dealing with item 7 of the Indian draft resolution, said that there was a scheme for an institute for the conservation of monuments and works of art, but not for a regional laboratory in South East Asia. The expert mission could be provided under the heading of aid to Member States (paragraphs 145-147, Cultural Activities).

(82) Mr. JUNANKAR (India) said that his delegation did not feel that the proposal as it stood in the programme met the requirements they had in view, and had therefore submitted this draft resolution.

(83) Mr. LEE (United States of America) proposed that the recommendation of the Executive Board be adopted.

(84) Mr. COWELL (United Kingdom) seconded the motion, which was put to the vote and adopted by 8 in favour, 1 against and 1 abstention.

DR/25: Cultural Activities

(85) Mr. THOMAS (Director, Department of Cultural Activities) said that the Executive Board had recommended the adoption of the proposal, which involved little or no expenditure and was calculated to foster agreements among art publishers for the exchange of photographic blocks.

(86) A motion, proposed by the delegations of Belgium and the United States of America, that the conclusions of the Executive Board be accepted, was adopted by 10 votes to nil, with 1 abstention.

DR/26: Index Translationum

(87) Mr. THOMAS (Director, Department of Cultural Activities) said that the resolution was recommended by the Executive Board, its object being to continue the annual publication of the Index Translationum beyond 1955. In the Corrigendum to the proposed programme and budget (document 8C/5) (paragraphs 83 a - 83 c, Cultural Activities) an appropriation of $10,000 was shown for 1955. The budgetary implications of the Italian proposal for 1956 would be a sum of $10,000, plus one new P.1 post, or a total of approximately $16,500, including indirect and incidental expenses.

(88) Mr. FLORKIN (Belgium) spoke in favour of the Italian resolution.

(89) Mr. CABOUAT (France) having moved that the recommendation of the Executive Board be followed, the motion was adopted by 3 votes to nil, with 3 abstentions.

DR/27: The Venetian School of Palladian Architecture

(90) Mr. THOMAS (Director, Department of Cultural Activities) reported that the Executive Board had not been in favour of the proposal.

(91) Mr. CABOUAT (France), seconded by Mr. FLORKIN (Belgium), endorsed the Executive Board's decision, with the proviso that the draft resolution should figure among the projects on which the decision was to be left to the Director-General.

(92) Mr. LEE (United States of America) thought it would be more appropriate for the Italian Government or National Commission to ask Unesco to hold this meeting. He approved the recommendation of the Executive Board.

(93) The delegate of Israel seconded that proposal and it was adopted unanimously.

DR/30: International Association of the Plastic Arts

(94) Mrs. PECSON (Executive Board) said that the Executive Board considered that this draft resolution, which was without budgetary implications, merely strengthened provisions already included in the programme, and could therefore be passed on to the General Conference.

(95) Mr. COWELL (United Kingdom) proposed that the draft resolution should be rejected. A proposal that had been adopted did not need strengthening.

(96) The delegate of the United States of America seconded the proposal, which was adopted.

DR/31: Manuscripts in Europe relating to the Histories of Latin America and Asia

(97) The Executive Board, said Mrs. PECSON (Executive Board), recommended that this proposal should be referred for examination to the International Council for Philosophy and Humanistic Studies so that a concrete and detailed programme could be presented to the General Conference at its ninth session.

(98) Mr. THOMAS (Director, Department of Cultural Activities) explained that the object of the Japanese draft resolution was to extend to Asia the arrangements

already made for Latin America. The cost of the project for the two-year period 1955-56 would be $8,000 a year, making $16,000 in all.
(99) A point emerging from the discussion that followed was that the Latin American project had been given a lower priority.

(100) Mr. SILLER (Mexico) proposed the inclusion of an explicit statement that the Executive Board's suggestion did not modify the Japanese proposal.

(101) Mr. THOMAS (Director, Department of Cultural Activities) added that the adoption of the project would not affect the remainder of the programme and budget.

(102) The draft resolution was approved.

DR/41: Measures for the Development of Drama and the Spread of Popular Interest in the Theatre

(103) Mr. THOMAS (Director, Department of Cultural Activities) said that the Executive Board had approved the draft resolution, which merely proposed an invitation to Member States and had no budgetary implications.

(104) Mr. FLORKIN (Belgium) moved the adoption of the Board's conclusions.

(105) Adopted by 8 votes to nil, with 2 abstentions.

DR/45: Publication of a Compilation of Copyright Laws in Spanish

(106) Mr. THOMAS (Director, Department of Cultural Activities) said that what had originally been contemplated had been the publication in extenso of an English edition. The cost would be $4,000. and the French version would probably require another $3,950. The original intention had been to issue an abridged version in Spanish. The draft resolution proposed by Spain amounted to a request for the publication of a Spanish version of the work in extenso, which would require $4,000.

(107) Mr. COWELL (United Kingdom) remarked that this was a highly technical matter. What would be the legal validity of a Spanish translation?

(108) The CHAIRMAN replied that the International Copyright Convention existed in Spanish and was of equal standing in all three languages.

(109) Mr. SILLER (Mexico) recalled that the publication of the compendium in all three languages had already been approved in the programme; he objected to the suggestion that the full collection should not be published in Spanish. A Spanish version of the complete corpus of legislation would greatly assist governments in adapting the copyright laws of their respective countries to the provisions of the Convention, and would furnish them with useful references.

(110) The delegate of the United States of America seconded the draft resolution contained in document 8C/DR/45, which was adopted by 9 votes to nil, with 2 abstentions.

DR/46 Exchanges between Museums

(111) Mr. THOMAS (Director, Department of Cultural Activities) indicated that the Executive Board had recommended that this resolution be passed to the International Council of Museums (ICOM).

(112) On the motion of the delegate of the United States of America, seconded by the delegate of the United Kingdom, the Executive Board's recommendation was approved by 9 votes to 1, with 1 abstention.

DR/3: World Culture, Science and Education Week and Unesco Awards

(113) As the Executive Board had not approved the first part of the project, Mr. THOMAS (Director, Department of Cultural Activities) explained that the cost of the meeting would be $6,000. That would lay a fairly heavy burden upon Member States.

(114) Mr. COWELL (United Kingdom) opposed the proposal contained in document 8C/DR/3. If there were to be a culture week, there might be some danger lest culture were not regarded as necessary during the rest of the year. Nothing would be gained by the proposal.

(115) The proposal was rejected by none in favour, 10 against and 1 abstention.

(116) Regarding the Unesco awards (second part of the proposal in document 8C/DR/3), which had also not been approved by the Executive Board, Mr. THOMAS (Director, Department of Cultural Activities) pointed out that the project was perfectly within the scope of the Department of Cultural Activities. Unesco would be required to select the panel of judges but the provision of the prizes would be the business of Member States or even of private individuals. Unesco would only have to supply the medals and diplomas. On the analogy of experience with the Kalinga Prize, it was probable that the budget for the project would be in the neighbourhood of $4,540 a year.

(117) Mr. COWELL (United Kingdom) said that prizes were not in favour in his country. The field was rather large and Unesco prizes might soon debase the currency. Genius should shine with its own brilliance. The proposal should be postponed for further consideration.

(118) Mr. LEE (United States of America) said that, although prizes were appreciated in the United States, he seconded the proposal of the delegate of the United Kingdom, because Unesco had work of higher priority on hand.

(119) The proposal to defer consideration of the second part of draft resolution No.3 was put to the vote and adopted by 10 in favour, none against and 1 abstention.

Draft Resolutions affecting the Department of Mass Communication

DR/10 International Students Correspondence

(120) The Executive Board could not recommend this proposal in its present form.

(121) Mr. DESJARDINS (Department of Mass Communication) recalled that, at its last Congress, the Universal Postal Union had rejected the same proposal by 35 votes to 21. Unesco had no competence to make recommendations to UPU but could approach its own Member States to secure their support for the project at the UPU Congress in 1957.

(122) The meeting agreed unanimously with the suggestion, made by the delegate of the United States of America, that the recommendation of the Executive Board be accepted.

DR/11: United Nations Stamps honouring Unesco

(123) Mrs. PECSON (Executive Board) said that the Executive Board had not been able to accept paragraph 1, as the postage stamp in question was already in preparation. With regard to paragraph 2, the United Nations Postal Administration could not return the proceeds of the issue to Unesco.

(124) Mr. DESJARDINS (Department of Mass Communication) said that the Director-General had already approved the design of the proposed Unesco stamp to be put on sale, but the scheme outlined in the Austrian resolution could not be put into effect, although the stamp sold bore Unesco's name, no part of the proceeds could be passed to the Organization.

(125) The delegate of the United Kingdom proposed that the recommendation of the Executive Board be accepted.

(126) Agreed.

DR/16: Encouragement of International Co-operation in the Field of Educational Films

(127) Mrs. PECSON (Executive Board) said that the Executive Board recommended the appropriation asked for.

(128) Mr. DESJARDINS (Department of Mass Communication) explained that the International Council for Educational Films had in hand the compilation of a dictionary of technical terms which the Secretariat was to reproduce in mimeograph form. To complete the preparation of the dictionary, an appropriation of $1,000 was advisable.

(129) Count von HARDENBERG (German Federal Republic) proposed that the recommendation of the Executive Board be followed.

(130) Mr. BOW (Canada) questioned the word "apportion", in the last paragraph. Was the money to be given by subvention, contract, or in what form?

(131) Mr. DESJARDINS (Department of Mass Communication) said that the sum was for miscellaneous expenses which were to be covered by a contract.

(132) Mr. COWELL (United Kingdom) enquired whether the Director-General had received an independent application from the International Council for Educational Films before this resolution was submitted, whether it had been rejected, and, if so, why?

(133) Mr. DESJARDINS (Department of Mass Communication) explained that the Secretariat had given the International Council for Educational Films certain assurances but, as the proposed programme and budget had already been drawn up, the request for the requisite appropriations could not at that stage be made by the Secretariat.

(134) On the motion of the delegates of the German Federal Republic and Belgium that the decision of the Executive Board be accepted, the draft resolution was rejected. The voting being 4 in favour to 4 against, with 3 abstentions, the Chairman exercised his casting vote in favour of rejection in view of the number of abstentions.

DR/19: Mass Communication

(135) Mr. DESJARDINS (Department of Mass Communication) asked that the draft resolution be taken paragraph by paragraph, as it covered three matters on which the Executive Board had given three different decisions

(136) First item The establishment of an international film lending library, which the Board had felt it impossible to incorporate in the programme, was an important project but required very large funds. At Unesco headquarters, a small sample film library was maintained and an extremely comprehensive card index. International exchanges of educational films could be facilitated, which would be an excellent thing, but if it were a matter of establishing a full-scale film library, the cost would be $14,249 in 1955 and $14,373 in 1956.

(137) On the motion of the delegate of the United Kingdom that the Executive Board's conclusions be adopted, the first item in the Indian draft resolution was rejected by 9 votes to 1.

(138) Second item: The proposal to establish a research centre "for adaptation of scripts to modern methods of printing", Mr. DESJARDINS (Department of Mass Communication) continued, had been rejected by the Executive Board. The Secretariat had taken the wording of that part of the resolution to mean the adaptation of ancient written characters to modern printing methods, but might have mistaken the matter. It would be possible to make world-wide contracts with the Graphic Arts Foundation, the cost of which would total $6,000.

(139) On the motion of the delegate of Norway, the Committee, by 10 votes to 1, followed the Executive Board in rejecting the proposal.

(140) Third item: Mr. DESJARDINS (Department of

Mass Communication) said that this item had been adequately handled for years past by the Department of Mass Communication. At the moment the Radio Division had arrangements with 115 countries for exchanges of programmes. There was a clearing house system for educational, scientific and cultural programmes and a description of these facilities was to be found in paragraph 137 of the chapter on Mass Communication. It could therefore be claimed that the recommendation was already covered by the provisions of the programme and, in any case the Executive Board had decided that nothing ought to be done about it.

(141) On the motion of the delegate of the United States of America that the conclusions of the Executive Board be accepted, item 3 was rejected by 7 votes to 1, with 1 abstention.

The meeting rose at 7 p.m.

# NINETEENTH MEETING

*12 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.3 OF THE AGENDA: DISCUSSION OF DRAFT RESOLUTIONS SUBMITTED BY MEMBER STATES** (continued)

DR/20: Education

(1) The CHAIRMAN called upon Mr. Desjardins to explain the effect this resolution would have on the programme of the Department of Mass Communication and whether there would be any budgetary implications.

(2) Mr. DESJARDINS (Department of Mass Communication) said that the Executive Board had accepted the draft resolution proposed by the delegation of India. He considered that it made a contribution to the work of Unesco and came within the scope of its programme for the coming period; it had no budgetary implications.

(3) Mr. COWELL (United Kingdom) did not think that anyone would oppose the resolution but wondered what effect it would have. As it was worded, it gave the impression that the Director-General had overlooked the contributions of the Asian and African countries. In addition, he wondered whether the resolution would prove useful, as the Director-General was already doing work in that field.

(4) Mr. JUNANKAR (India) wished to remove any feeling of apprehension with regard to the resolution, which had not been intended to convey that the Director-General had neglected certain parts of the world. The Government of India had confidence in the Director-General as custodian of the interests of all countries. With regard to the evolution of human rights, he thought that insufficient emphasis had been put on the efforts made by the Asian and African countries and was suggesting that an addition should be made to the existing material emphasizing the work being done in those parts of the world.

(5) Mr. AVIDOR (Israel) proposed amending the wording of the resolution by adding the words "as well as other countries" after the words "the Asian and African countries".

(6) The CHAIRMAN thought that, if that addition were made, the resolution would lose its purpose.

(7) There being no further comments, he put to the vote the proposal that a decision be taken to recommend to the Programme and Budget Commission the amendment proposed by the delegate of Israel. The proposal was adopted by 7 votes in favour, 1 against and 2 abstentions.

(8) The CHAIRMAN then asked whether the Committee was prepared to forward the resolution to the Programme and Budget Commission in view of the recommendation made by the Executive Board.

(9) Mr. FLORKIN (Belgium) was surprised at the wording: "Authorizes the Director-General...".

(10) Mr. MAHEU (Assistant Director-General) thought that the Indian resolution could be regarded as a general direction for special consideration by the Director-General in the execution of the 1955-56 programme.

(11) The Committee agreed to signify its approval of the spirit of the resolution and to suggest that the Director-General should use it as a guide when considering the programme for 1955-56.

DR/22: Mass Communication

(12) Mrs. PECSON (Executive Board) stated that the Executive Board did not recommend this resolution.

(13) Mr. DESJARDINS (Department of Mass Communication) considered the resolution was not very

clear. In any case, it simply asked for an extension of the work already undertaken by the Secretariat (Mass Communication, paragraphs 143-145). The Secretariat had provided for $6,000 a year; the Italian delegation was asking for $10,000 in 1955 and for $20,000 in 1956.

(14) The CHAIRMAN reminded the Committee that, when considering paragraph 143 of the programme of the Department of Mass Communication, it had decided to give the project a low priority.

(15) Mr. AVIDOR (Israel) proposed that the Committee should endorse the decision of the Executive Board and not recommend the resolution to the General Conference.

(16) Mr. CABOUAT (France) said that the French Government departments which dealt with children's papers, radio and films had always been interested in Unesco's work in that field. His delegation was prepared to approve the Italian draft resolution, but with an additional appropriation of $6,000 in all, instead of the $30,000 proposed in document 8C/DR/22. Mr. Cabouat asked that the body of the resolution be treated as a directive to the Director-General and that the total appropriation be increased by $6,000 over the sums mentioned in paragraph 145.

(17) The CHAIRMAN put to the vote the proposal of the delegate of Israel, which was adopted by 8 votes in favour, 3 against and 0 abstentions.

DR/33: Discounts for Administrative Expenses in connexion with Unesco Coupons

(18) Mrs. PECSON (Executive Board) indicated that the Executive Board did not recommend this resolution to the General Conference.

(19) Mr. ZUCKERMAN (Department of Mass Communication) read resolution 5.422 and explained that the draft resolution proposed introducing a new element by asking that the Director-General should refrain from making participation of suppliers in the Unesco Coupon Scheme conditional upon their willingness to grant a discount. Up to the present, the Director-General had been able to decide whether or not to insist on a discount. If such a change were introduced, it was obvious that all suppliers would decide not to give a discount, which would be a great financial loss to Unesco. The amounts which Unesco had received in discount in 1953-54 were $30,000 and $40,000 respectively, and it was expected that the sum of $50,000 would be received in 1955-56. Those amounts would cover the overhead costs of the project.

(20) Mr. CABOUAT (France) explained that the draft resolution had been submitted at the request of the French authorities, which had noticed price increases or the refusal of suppliers to accept Unesco coupons.

(21) Mr. ZUCKERMAN (Department of Mass Communication) said that there had been a few cases at the beginning of the Scheme where no discounts had been given. The issue had been settled since then and 700 suppliers had now agreed in writing to grant a discount and had given an undertaking not to charge the discount back to the purchasers.

(22) Mr. JUNANKAR (India) proposed that the Committee should adopt the recommendation of the Executive Board not to consider the resolution contained in document 8C/DR/33.

(23) The CHAIRMAN put the proposal to the vote. It was adopted by 9 votes in favour, 1 against and 0 abstentions.

DR/34: Educational Television Broadcasts

(24) Mrs. PECSON (Executive Board) said that the Executive Board had agreed to recommend this proposal to the General Conference.

(25) Mr. DESJARDINS (Department of Mass Communication) noted that the resolution was divided into two parts. The first was an invitation to Member States and had no budgetary implications. The effect of the second would be to accord a higher priority to existing appropriations, half of which had been given a lower priority, while the other half stood as it was, under the decisions taken by the Committee.

(26) Mr. FLORKIN (Belgium), seconded by Mr. ABDEL-RAHMAN (Egypt), moved that the first part of the resolution be adopted.

(27) On being put to the vote, that proposal was adopted by 8 votes to nil, with 1 abstention.

(28) Mr. CABOUAT (France) said he would agree to consider the second part of the resolution as a general directive, designed simply to draw the attention of the Director-General to that item in the programme.

(29) Mr. COWELL (United Kingdom) asked whether the seminar mentioned in sub-paragraph (a) was one which had already been started and whether the work proposed in sub-paragraph (b) was not one of the functions of the Unesco clearing house.

(30) Mr. DESJARDINS (Department of Mass Communication) remarked that the French resolution alluded to the arrangements for co-operation between Unesco and the French Broadcasting and Television Service, which had conducted an enquiry into the effects of its broadcasts in rural areas.

(31) The CHAIRMAN suggested that the resolution could be forwarded to the Director-General as a directive to guide him in work on the programme for 1955-56.

(32) The Committee agreed to this suggestion by 8 votes in favour, 0 against and 2 abstentions.

(33) The CHAIRMAN announced that the two related resolutions contained in documents 8C/DR/43 and 8C/DR/52 submitted by Spain had been withdrawn.

DR/47: Free Movement of Persons

(34) Mrs. PECSON (Executive Board) intimated that

the Executive Board did not recommend this resolution to the General Conference.

(35) Mr. DESJARDINS (Department of Mass Communication) said that the draft resolution proposed by the Uruguayan delegation sprang from considerations similar to those behind document 8C/PRG/8 (Report of the Director-General on the draft international instrument to reduce obstacles to the free movement of persons engaged in educational, scientific and cultural activities and wishing to travel for purposes connected with those activities).

(36) Mr. CABOUAT (France) considered that the question should be referred to a working party.

(37) Mr. DESJARDINS (Department of Mass Communication) stated that the relevant documents were under consideration by the working party on international agreements.

(38) Mr. FLORKIN (Belgium) moved the endorsement of the conclusions of the Executive Board on the draft resolution.

(39) A vote was taken and Mr. Florkin's proposal was adopted unanimously.

DR/57: Circulation of Educational, Scientific and Cultural Publications

(40) Mrs. PECSON (Executive Board) intimated that the Executive Board did not recommend this resolution to the General Conference.

(41) Mr. DESJARDINS (Department of Mass Communication) informed the Committee that the issue of a universally recognized stamp was a matter for the Universal Postal Union.

(42) Mr. MAHEU (Assistant Director-General) gave it as his opinion that there was very little chance of the Director-General's being able to persuade UPU.

(43) Mr. FLORKIN (Belgium) proposed that the recommendation of the Executive Board be approved.

(44) Adopted unanimously.

DR/23: Exchange of Persons

(45) Mrs. PECSON (Executive Board) intimated that this resolution had been recommended to the General Conference by the Executive Board.

(46) Mr. W. CARTER (Chief, Exchange of Persons Service) said that, in paragraphs 101 and 102 in the programme for the Exchange of Persons Service, it was recommended, as part of Unesco's programme, to grant a contract of $1,000 in 1955 and 1956 to the International Association of University Professors and Lecturers for the purpose of completing studies of the conditions relating to the movement of teaching personnel and educational administrators. The substance of the draft resolution would increase those contracts to $2,000 each year.

(47) In answer to a question from Mr. ABDEL-RAHMAN (Egypt) as to the purpose of the contract, he replied that it was preferable to undertake those studies under contract rather than to have studies made by the Secretariat.

(48) The CHAIRMAN said that it would be difficult to recommend the contract unless fuller information were available.

(49) Mr. W. CARTER (Chief, Exchange of Persons Service) said that in 1953 the International Association of University Professors and Lecturers had made studies of equivalences and of the main factors operative in the exchange of teachers. It was proposed that these studies should be continued and extended in 1955-56 in order to build up documentation on problems facing teachers in exchange schemes.

(50) Mr. LEE (United States of America) said that use could be made of that information, but proposed, in view of the other projects, postponing a decision on the resolution and sending it to the Secretariat for study in preparation for the 1957-58 programme.

(51) Mr. BOW (Canada) supported the United States proposal. He hoped that, by referring the resolutions to the Director-General for the purpose of developing the programme for 1957-58, the Committee was not drafting the programme for 1957-58.

(52) Mr. W. CARTER (Chief, Exchange of Persons Service) replied that that was by no means the case.

(53) Mr. CABOUAT (France) said that, if he had understood Mr. Carter correctly, the question would arise of increasing the annual appropriations by $2,000. If there were no such increase the Committee would have the option of referring the resolution to the Director-General as a guide, for the inclusion of specific proposals in the programme and budget for 1957-58.

(54) The CHAIRMAN pointed out that the Director-General would not be in a position to find the $4,000 concerned.

(55) Mr. LEE (United States of America) proposed that the resolution be considered by the Director-General for the 1957-58 programme.

(56) The CHAIRMAN put to the vote the proposal that the Committee should agree to forward the contents of the resolution to the Director-General with a request that it should receive his consideration when formulating the programme for 1957-58.

(57) That proposal was adopted by 7 votes in favour, 2 against, 1 abstention.

(58) Mr. ABDEL-RAHMAN (Egypt) still wished to ask whether any contracts had been granted previously, and whether there was any document on the subject.

(59) Mr. ELVIN (Director, Department of Education) said that a contract had been concluded in 1953 with the International Association of University Professors

and Lecturers, in co-operation with the International Association of Universities, to make a study of the equivalence of degrees between different universities. Nothing had been printed, but information was available for consultation, either through Unesco or the International Association of Universities, which had arranged for its publication.

DR/24: Exchange of Persons

(60) The Committee was informed that, in the opinion of the Executive Board, it would disturb the balance of the programme and the Board therefore did not recommend the resolution.

(61) Mr. W. CARTER (Chief, Exchange of Persons Service) explained that this resolution would require a total budget of $21,000.

(62) The suggestion of the delegate of the United Kingdom, seconded by the delegate of the United States of America, that the recommendation of the Executive Board be accepted, was put to the vote and adopted by 8 in favour, none against and 2 abstentions.

DR/2: Use of Russian as a Working Language of Unesco

(63) This was not a programme resolution, and the Executive Board was not in a position to recommend it.

(64) Mr. MAHEU (Assistant Director-General) said the draft resolution submitted by the Soviet Union contained an ambiguity in the preamble, where it spoke of adopting Russian as one of Unesco's working languages "on the same footing as English, French and Spanish". Unesco had only two working languages, English and French. Spanish was not a working language except at the General Conference.
(65) On the assumption that Russian were adopted on the same footing as French and English, Mr. Maheu presented the following table of estimated costs:

| | 1955 | 1956 |
|---|---|---|
| General Conference. . . . . | - | 100,750 |
| Sessions of Executive Board | 23,296 | 25,743 |
| Other conferences and meetings . . . . . | 168,374 | 150,355 |
| Publications . . . . . | 499,885 | 541,912 |
| Total . . . . . | $691,555 | 818,760 |
| Total for 1955-56 . . . . . | | $1,510,315 |

(66) Mr. DUERING (Sweden) (Chairman of the Budget Committee at the seventh session) stressed the importance of the draft resolution under discussion, and the need for the fullest possible information from the Secretariat on the subject. One and a half million dollars were required to place Russian on the same footing as English and French as working languages. What would be the budgetary implications if it were adopted on the same basis as Spanish?

(67) Mr. MAHEU (Assistant Director-General) stated that the expenditure would then be that arising at the General Conference, or £100,750 in 1956, plus the cost of publications on the basis adopted for Spanish.

(68) Mr. DELAVENAY (Chief, Documents and Publications Service) said that the estimated cost of publications in Spanish for 1955 was $150,804 and for 1956, $152,814.

(69) Mr. MAHEU (Assistant Director-General) mentioned that it would be necessary not only to employ additional staff (salaries and miscellaneous staff costs were included in the figures he had just given), but also to find additional office space for them. He doubted whether the additional staff could be housed in the present headquarters premises.

(70) Mr. DELAVENAY (Chief, Documents and Publications Service) stated that in some departments office space had reached saturation point; for example, the only means of increasing the output of the printing presses would be to work in two shifts, one by day and one by night, a system which would have financial repercussions. With regard to offices for the remainder of the staff, the possibilities varied in the different services. In any event, the permanent headquarters itself would not permit of a possible increase of 30% in the requirements, which the adoption of Russian as a general working language would entail for certain sections of the Service.

(71) Mr. LEGUEN (Bureau of Conference Planning and General Services) quoted, for purposes of comparison, the approximate cost to Unesco of renting the annex in the Rue de Lapérouse on a commercial basis. The figure was 8 or 10 thousand dollars.

(72) In reply to a question by Mr. FLORKIN (Belgium), it was stated that premises equivalent to those in the annex would suffice if Russian were used to the same extent as Spanish at the present time.

(73) The CHAIRMAN suggested that it might be necessary to obtain a clarification of the resolution. It was not certain whether the delegation which had submitted it wanted Russian on the same basis as English and French, or not.

(74) Mr. JUNANKAR (India) enquired whether in the proposed new headquarters building there was no room for possible additional staff.

(75) The CHAIRMAN thought an increase of about 15% had been provided for.

(76) Mr. LEGUEN (Bureau of Conference Planning and General Services) said that it was difficult to give a final answer on that subject, but that it would appear essential to make a fresh distribution of offices and to modify the plans of the new headquarters building.

(77) Mr. CABOUAT (France) asked Mr. Leguen whether a rearrangement of the premises in the new building would have budgetary implications.

(78) Mr. LEGUEN (Bureau of Conference Planning and General Services) explained that the architects had already prepared their final plans and that budgetary implications were to be expected if the distribution of the premises were changed.

(79) Mr. JUNANKAR (India) said that the Headquarters

Committee should envisage possibilities of the kind, in making its plans. It should not be forgotten that Unesco aimed at universal membership.

(80) The CHAIRMAN replied that the Committee was mindful of future needs, but could not at any particular moment foresee the possibilities of expansion in their entirety.

(81) Mr. COWELL (United Kingdom) asked whether a document similar to 8C/ADM/7 on Spanish as a working language, could not be provided with regard to the Russian proposal, with budgetary details and an estimate of the new work entailed. The problem could then be approached in stages, as it had been in the case of Spanish, beginning with simultaneous interpretation and the circulation of certain documents, and full adoption might be deferred to a subsequent General Conference.

(82) Mr. MAHEU (Assistant Director-General) did not think it possible to comply with the request of the United Kingdom delegate, since, without detailed information about the wishes of the Soviet delegation, the Secretariat would have to fall back on mere conjecture. It seemed wiser to pursue the present practice of distinguishing several stages and to provide the maximum figure for each stage.
(83) In reply to a question from the delegate of Canada, Mr. Maheu said that it was possible, for purposes of comparison, to obtain figures from those Specialized Agencies which used Russian as a working language; but he thought that such comparisons would be less exact than budget estimates by stages.

(84) The CHAIRMAN suggested that, as new elements were bound to arise in connexion with the draft resolution under discussion - for instance, it could not be known yet whether simultaneous interpretation would be required at the Executive Board - the Committee should ask the Director-General for further clarification of the resolution, and recommend it to the General Committee for consideration throughout the Conference as new elements were brought to bear on it.

(85) Mr. ABDEL-RAHMAN (Egypt) wondered whether the Programme and Budget Commission was competent to make any remarks on the resolution at all.

(86) Mr. MAHEU (Assistant Director-General) considered that the use of any particular language raised not only a budgetary but also a programme question. For instance, the publication of certain documents and books in Spanish was decided upon in order to reach people who could not be reached by the same publications in French or English.

(87) Mr. JUNANKAR (India), on a point of order, asked whether in view of the explanation given by the Secretariat the draft resolution should not be referred back to the Executive Board for its further comments.

(88) The CHAIRMAN remarked that the Board was free to provide comments or not as it thought fit.

(89) Mr. AVIDOR (Israel) reminded the meeting of the decision taken by the Executive Board, contained in 39 EX/DIV/2, by which $50,000 had been set aside for the use of Russian during the eighth session of the Conference.

(90) Mr. MAHEU (Assistant Director-General) recalled that the United Kingdom delegate, at an earlier meeting, had asked on what authority the Secretariat had undertaken to translate Conference documents into Russian. The authority came from a decision adopted by the Executive Board at its thirty-eighth session. The Assistant Director-General read out document 39 EX/DIV/2 which contained the text of that decision. He added that the actual expenditure amounted to about $25,000 out of a total of $50,000.

(91) Mrs. PECSON (Executive Board) pointed out that that had been a conditional resolution.

(92) Mr. ABDEL-RAHMAN (Egypt) considered that the translation of publications attached to the programme were programme matters. The use of Russian in General Conferences, etc. was a matter of general policy, but it still had a budgetary aspect which should be studied.

(93) Mr. LEE (United States of America) asked whether the Secretariat could prepare a breakdown of the various categories of expenditure involved (interpretation, the different kinds of records and publications, etc.) in order that the proposal could be studied at each stage.

(94) Mr. MAHEU (Assistant Director-General) promised the Committee that the Secretariat would prepare an analysis of each category of expenditure. It was understood, for the reasons already stated, that only maximum figures could be given for each category and each stage.

(95) Miss LAISE (United States of America) said that if, as a working language, Russian were limited to interpretation, mimeographed records and printed summary and official records, it might be possible to carry out the necessary work on a contract basis, without the additional problems of space and personnel.

(96) In reply to the supposition put forward by the delegate of the United States of America, Mr. MAHEU (Assistant Director-General) said that the Secretariat could accurately calculate the budgetary implications for restricted objectives, whenever such objectives were fixed.

(97) Mr. DELAVENAY (Chief, Documents and Publications Service) wished to clarify the notion of "contract" mentioned by the delegate of the United States of America. A contract could be concluded either with another international organization, or with staff engaged on a temporary basis, since, in the case under consideration, there was no private agency able to take over the work.
(98) Experience had shown that, when urgent and important work was involved, it was not possible to conclude contracts with the United Nations, whose peak periods frequently coincided with those of Unesco. As regarded temporary staff, of whom the Secretariat

had wide experience, since it constantly engaged such staff for sessions of the General Conference and the Executive Board, they always needed a stiffening of permanent staff well acquainted with the requirements and terminology of Unesco.

(99) The meeting agreed to defer the consideration of draft resolution No.2 until further information on it had been obtained.

DR/4: Need for Making Unesco a Global Organization

(100) Mrs. PECSON (Executive Board) explained why the Executive Board had not been able to recommend this resolution. It was in accordance with the spirit and goal of Unesco, but any application by a State to join the Organization was obliged to go through the Economic and Social Council. As some States might not be considered favourably by that body, it would not be wise to extend a general invitation.

(101) Mr. AVIDOR (Israel) having enquired whether there were still any Member States in the United Nations that were not members of Unesco, he was informed by the Secretariat that Ethiopia and Iceland were in that category.

(102) A motion by the delegate of the United States of America to accept the recommendation of the Executive Board was adopted by 9 in favour, 2 against and 1 abstention.

(103) Mr. CABOUAT (France), speaking as Rapporteur of the Committee, said that in his report he would give the reasons why the Committee had not recommended the adoption of draft resolution DR/4.

(104) Mr. ABDEL-RAHMAN (Egypt) asked whether the delegate of India did not intend the word "invite" to mean: "take steps that would lead to admittance to Unesco"?

(105) The CHAIRMAN said that the Board had appreciated that point of view, but had considered it would be awkward to issue such an invitation, in view of the possibly adverse recommendation of the Economic and Social Council.

(106) Mr. ABDEL-RAHMAN (Egypt) did not see that the recommendation of the Council had any bearing on the value of the actual invitation.

(107) Mr. JUNANKAR (India) was glad the delegate of Egypt had raised the point. The resolution was not intended to imply that the Director-General should depart from any established constitutional practice.

(108) Mr FLORKIN (Belgium) suggested that the essential function of the Director-General was to carry out the programme as agreed by the General Conference of Unesco. It could hardly be expected that the Director-General should make any move to amend the latter's decisions.

(109) Mr. LEE (United States of America) did not wish to give the impression that his delegation believed in the principle of exclusivity. He would be glad to accept any rephrasing of the Indian resolution that might overcome the objections of the Executive Board.

(110) Mr. COWELL (United Kingdom) shared the view of the Executive Board that embarrassment might arise if a direct invitation were extended. More success might be obtained through the strategy of indirect approach. There was another consideration: at every General Conference, the Director-General addressed an invitation to all States to join Unesco. Therefore the method of direct approach was already in force.

(111) The CHAIRMAN said that the question should be reopened, although it had already been voted on. The vote had been taken accidentally while the delegate of Egypt had been asking to speak.

(112) Mr. LEE (United States of America) proposed an amended alternative resolution:

"Realizing that Unesco cannot fulfil effectively its great tasks of establishing the foundations of peace upon the intellectual and moral solidarity of mankind without becoming truly global in its membership, character and scope, the General Conference would welcome the admission of all States not yet members of Unesco which have demonstrated that they are willing and able to abide by the obligations of the Unesco Constitution."

This formula, Mr. Lee suggested, would express the desire of the Conference while avoiding an embarrassing situation.

(113) Mr. JUNANKAR (India) thought that there could be no legal bar to the Director-General's extending an invitation. Embarrassments that might subsequently arise were quite unrelated to it.

(114) The amendment submitted by the delegate of the United States of America was put to the vote and adopted by 6 in favour, 2 against and 3 abstentions.

DR/7: Decentralization

(115) Mrs. PECSON (Executive Board) said that the Executive Board had not recommended this resolution. A working party set up during the Conference would, not be able to cope with so complex a study.

(116) The CHAIRMAN reminded the meeting that, on the question of decentralization, it had already decided to recommend the setting up of a working party to the Programme and Budget Commission. Apparently that was contrary to the views of the Executive Board. The draft resolution added nothing to what was already being done.

(117) After a brief discussion, the meeting decided to leave its decision on the question of decentralization as it stood, and refer it to the Commission.

DR/14: Establishment of a Regional Office for South and South East Asia

(118) The Committee was informed that the Executive Board did not recommend this resolution.

(119) Mr. JUNANKAR (India) said that the proposal had not been understood. It was aimed at stimulating co-operation with Member States and National Commissions in the working out of programmes. A need for such support was felt by Unesco, as had been recognized in the remodelling document. Facilities were provided and obligations undertaken by the Government of India. The ingredients of international understanding were sometimes forgotten. The proposal should not be rejected in the name of a slogan.

(120) Mr. AVIDOR (Israel) said that about 10 offices would be needed to carry out such work all over the world. That involved the decentralization of Unesco. He therefore recommended that the draft resolution be referred to the working party to be set up by the Programme and Budget Commission.

(121) Mr. SOMMERFELT (Norway) seconded the proposal.

(122) Mr. SOEBROTO (Indonesia) supported the delegate of India.

(123) Mr. JUNANKAR (India) made no objection to the proposal of the delegate of Israel, but did not want it linked with a high-sounding word like decentralization, over which misunderstandings might arise.

(124) The proposal was adopted.

DR/12: Translation of Unesco Documents into German

(125) Mrs. PECSON (Executive Board) said that the Executive Board had not recommended this resolution, because it was already covered by project 5.1 in the proposed programme and budget (Mass Communication, paragraphs 19 and 20).

(126) Mr. MAHEU (Assistant Director-General) drew the Committee's attention to the fact that it was a matter of degree. If it were thought desirable to translate only a few documents into German, the present budget might suffice, but beyond a certain limit additional appropriations would be necessary.

(127) Count von HARDENBERG (German Federal Republic) thought the meeting might be interested to hear that the National Commissions of Austria, Switzerland and Germany had begun discussions with a view to co-operating in the issue of Unesco publications in German through normal channels. He had not been able to contact the Austrian delegation before the draft resolution had come up, but, if he understood it rightly, the proposal went a good deal farther than the existing project 5.1. He did not wish to make it a question of prestige, but there was a difference between publications produced by the National Commissions, and those published by Unesco itself, such as the pamphlets on race questions. It was always being asked what Unesco was doing, and these publications were valuable in supplying an answer. Count von Hardenberg therefore proposed that the resolution should be recommended to the Secretariat for further study, with a view to introducing into the 1957-58 programme an allocation for Unesco publications in German. He added that there might be some change in the point of view of his delegation, after the Conference had discussed draft resolution No. 2.

(128) Mr. JUNANKAR (India) supported the delegate of the German Federal Republic. It would be worth considering whether the 1957-58 budget could not provide for the publication of Unesco works in many more languages than were at present used.

(129) The proposal of the delegate of the German Federal Republic was carried unanimously.

DR/15: "Friends of Unesco" Clubs

(130) This resolution, said Mrs. PECSON (Executive Board), was recommended by the Executive Board.

(131) Mr. MAHEU (Assistant Director-General) considered the draft resolution interesting and thought that, if adopted, the necessary appropriations would not exceed $500.

(132) Mr. COWELL (United Kingdom) pointed out that some countries might not like specific ways of publicizing the work of Unesco.

(133) Mr. MAHEU (Assistant Director-General) said that Unesco could encourage action by the National Commissions. For example, the Secretariat could draw up a kind of model constitution for the formation of new clubs, supply existing clubs with material for information and exhibition purposes and could pass on information about the activities of those clubs to National Commissions inclined to experiment with them.

(134) Mr. CABOUAT (France) announced that, in France, there were some scores of "Friends of Unesco" clubs which were organized by educational bodies. They arranged exhibitions and lectures. If a handbook were brought out, it might stimulate the work of those clubs and enable them to arrange international exchanges.

(135) Mr. AVIDOR (Israel), after one or two minor drafting amendments had been suggested, proposed that the spirit of the resolution be adopted.

(136) The proposal was adopted by 10 in favour, none against and 1 abstention.

Document 8C/ADM/7: Adoption of Spanish as a working language of the Executive Board

(137) Mr. COWELL (United Kingdom) said that the Executive Board had managed without Spanish so far and, in view of budgetary stringency, he appealed to the meeting not to press the proposal at that stage.

(138) Adopted by 5 in favour, 1 against and 4 abstentions.

(139) Speaking as Rapporteur, Mr. CABOUAT (France) asked whether the Director-General would have the

option of transferring the appropriations to the Patzcuaro Centre.

(140) The CHAIRMAN said no.

Document 39 EX/5: Place and date of the ninth session of the General Conference

(141) Mrs. PECSON (Executive Board) said that the Executive Board had discussed this document in two parts: (1) Could the new headquarters building be finished in time for the next General Conference? The answer was that one-third of it would be ready. (2) Should the Organization hold its ninth General Conference at its own headquarters, since it would be celebrating its tenth anniversary?

(142) Mr. JUNANKAR (India) requested that the discussion of the document be deferred until the next meeting.

(143) Agreed.

The meeting rose at 6.50 p.m.

# TWENTIETH MEETING

*13 November 1954 at 10 a.m.*

*Chairman*: Mr. GARDNER DAVIES (Australia)

**PLACE AND DATE OF THE MEETING OF THE NINTH SESSION OF THE GENERAL CONFERENCE** (document 39 EX/5)

(1) Mr. JUNANKAR (India) informed the Committee, on behalf of the Indian delegation, that his country would accept full responsibility for providing the facilities for holding the ninth session of the General Conference in New Delhi if the General Conference accepted India's invitation. Adequate office accommodation was available in Parliament House and sufficient accommodation would be available in commercial hotels and government hostels for the delegations and members of the Conference staff. India had extended the invitation to Unesco because it had been felt that the time had come for international organizations to carry their activities beyond their habitual frontiers. The strength of an international organization could not be measured in terms of money but rather in the inspiration it invoked in the minds of the masses. He could see no point in holding a conference in a half-completed building, and reminded the Committee that Unesco was not made of bricks and mortar but was in the hearts of the people. It was important to carry Unesco as far afield as possible. He proposed the acceptance of India's invitation.

(2) Mrs. PECSON (Executive Board) recalled that she had already given the Committee the results of the first stages of the discussion of this matter in the Executive Board. Continuing its discussion, the Board had taken cognizance of the additional sum which would be necessary if it were decided to accept the Indian invitation, and had considered the advantages accruing to Unesco in the promotion of its programme if the ninth session were held in New Delhi. It was clear that, if the General Conference met in New Delhi, direct contact would be made with the vast area of East and South East Asia. As that area was particularly in need of the work provided for in the programme, it would give an opportunity to more leaders to make contact with Unesco. Further, it had been agreed that, in the past, the holding of General Conferences away from headquarters had proved a stimulus for action in the countries where they had been held; the additional expense was worth while. The Executive Board, appreciating the generous invitation of India and in consideration of its loyalty to Unesco and faith in its programme, had agreed to recommend the acceptance of the invitation by the General Conference.

(3) The CHAIRMAN said that he had understood the representative of the Director-General to say that no extra expense would be incurred in ensuring that the conference block of the new headquarters would be ready on time in 1956, and asked if that was the case.

(4) Mr. MAHEU (Assistant Director-General) stated that the question where to hold the next session of the General Conference went beyond the competence of the Secretariat, which could do no more than give technical explanations. The views of the Director-General were the following: (1) the construction of the new headquarters building could not be completed by November-December 1956; (2) it would, however, be possible by that time to use the conference building and the wing of the main building nearest to the conference rooms; (3) those premises could be completed in time without additional expense. (5) It was therefore technically possible to hold the next session of the General Conference in Paris, without exceeding the estimates quoted in the Proposed Programme and Budget for 1955-56, and without increasing the budget for the construction of the new buildings.

(6) Mr. SOEBROTO (Indonesia) pointed out that

the General Conferences had been held five times in Europe, once in the Middle East, once in Central America, and once in Latin America. In his opinion, a General Conference should be held in Asia in order that more could be learned about it in that part of the world. He seconded the proposal by the delegate of India.

(7) Miss LAISE (United States of America) said that the United States delegation was, in principle, not in favour of holding General Conferences away from headquarters. The General Conference was a business meeting, at which matters of policy and finance were discussed and, if considered as such, the only factors to be taken into account when discussing the place of meeting should be the advantages to the interests of Unesco and to the area in which it was proposed to meet. If the Committee felt that it was preferable, in the interests of Unesco, to hold a General Conference away from headquarters rather than use the additional money required for such a conference for implementing the programme, she was perfectly willing to give the matter further consideration. She hoped that her remarks would in no way be interpreted as showing a lack of appreciation for the very gracious invitation extended by India, but she could not support the proposal to accept the invitation.

(8) Mr. FLORKIN (Belgium) drew attention to the considerable advantages of holding sessions of the General Conference at Unesco headquarters. If he remembered rightly, it had been decided to hold every other session at headquarters, and he could see no reason why that principle should not prevail. He wished to make it clear, however, that he fully recognized the desirability of holding the General Conference in India, as no session had hitherto been held in Asia. Since, however, the extra expense was liable to upset the balance of the budget for the financial period 1955-56, he would prefer the 1956 session to be held at headquarters.

(9) Mr. COWELL (United Kingdom) said that in the past the British delegation had opposed the holding of General Conferences outside headquarters. In the present case, however, he thought that the invitation should be accepted because there were doubts about the readiness of the new headquarters building. Sooner or later a General Conference would have to be held in Asia and, in the circumstances, he thought that the General Conference would be justified in accepting with a clear conscience.

(10) Mr. SILLER (Mexico) was in favour of accepting the Indian Government's invitation, since it was desirable to make the general public everywhere familiar with Unesco's work and that aim would become more attainable if sessions of the General Conference were held in various parts of the world. Mexico was one of the countries where the work of Unesco was best known to the people, and that was unquestionably due to the fact that the General Conference had met in 1947 in Mexico City. Only the day before, in Montevideo, he had been impressed by the public's enthusiastic participation in the solemn opening ceremony of the present Conference.

(11) Mr. JUNANKAR (India) said that the present invitation had been extended with the full support of the Government and people of India. It was not certain that the invitation would be renewed after the next general election in India.

(12) He did not agree with the United States delegate that the General Conference was merely a business meeting. Its real function was to be the nerve centre of international life.

(13) He stressed the point made by the Indonesian delegate that more should be learned about Asia, pointing out that in that area a vast section of humanity lived under conditions which needed rapid improvement. By holding its next session in Asia, the General Conference would have a better view of the problems confronting Asia. Unesco would have the opportunity of stimulating interest and of obtaining the support of governments, National Commissions and the peoples of the world.

(14) Mr. SOEBROTO (Indonesia), in answer to the remarks made by the Belgian delegate, remarked that the General Conferences of 1951 and 1952 had been held in Paris. If the policy of holding alternative conferences in Paris was being adhered to, the balance could be rectified by accepting the invitation of India even though it meant holding two consecutive conferences outside headquarters. Secondly, he did not see that the distance to be travelled to conferences was of much consequence. Wherever conferences were held, some delegations would have to travel great distances. Thirdly, he asked how much money would be saved by the cutting down and deferring of projects until 1957-58.

(15) Mr. FLORKIN (Belgium) explained that he had not been referring to the expenses borne by the various delegations, but only to the costs chargeable to the Unesco budget. The new premises had been constructed in Paris with the specific aim of holding sessions of the General Conference regularly in that city, while respecting the principle of "alternation" and ensuring that the balance of the budget was maintained.

(16) Mr. CABOUAT (France) stated that his delegation also approved the principle of holding sessions away from headquarters at regular intervals, and fully agreed that one of the next sessions of the General Conference should be held in an Asian country. He could not, however, subscribe to the view that, if the next session were held in Paris, additional expenses would inevitably be incurred. The statement of the Assistant Director-General had been extremely precise, and Mr. Cabouat, for one, had no reason to doubt it in any way. Given the fact that large amounts were being spent in order to build the new premises in Paris, and that the next session of the General Conference could be held at headquarters without exceeding the present budget estimates, nothing seemed to justify abandonment of the principle of alternation on which there had so far been tacit agreement. In his opinion, every other session of the General Conference should be held at headquarters, unless some overriding factor made it necessary to depart from that rule.

(17) Miss LAISE (United States of America) asked what the additional cost of holding the General Conference in India would be, if Russian were adopted as a working language.

(18) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that the additional cost of the General Conference, if held in India and if Russian were adopted as a working language, would be $141,350, whereas, if the Conference were held in Paris with Russian as a working language, the additional cost would be $100,750. If Unesco did not move to its new headquarters in 1956, there would be a saving of $30,000 on the estimate for 1956.

(19) Miss LAISE (United States of America) asked for the Secretariat's comment on whether the change in time for holding the General Conference from the spring to November had created difficulties in matters of co-ordination.

(20) Mr. MAHEU (Assistant Director-General) stated that the matter was entirely unrelated to the question of where to hold the ninth session of the General Conference. On the problem of co-ordinating Unesco Conferences with meetings of other United Nations agencies, the advantage of holding the General Conference in the spring would be that delegates would be informed of the results of the United Nations General Assembly held at the end of each year. On the other hand, if that were decided, it would mean that Unesco Conferences would coincide with those of the other Specialized Agencies, and their programmes and that of Unesco had several items in common. The Secretariat would therefore leave it to the General Conference to decide whether it was better for Unesco to follow its mother or its sisters.

(21) In view of the fact that it would be possible to hold the following session of the Conference at headquarters without additional expense, Mr. FLORKIN (Belgium) moved that the Committee recommend that the ninth session meet in Paris, at the same time expressing the hope that the subsequent session would be held in New Delhi.

(22) Mr. CABOUAT (France) seconded that proposal.

(23) Mr. COWELL (United Kingdom) reminded the Committee that, according to what the Indian delegate had said, it was not certain that the Indian Government would renew its invitation to Unesco.

(24) Mr. JUNANKAR (India) drew attention to the fact that the Indian delegation's proposal was in fact an amendment to that included in the Proposed Programme and Budget for 1955-56. It should therefore be put to the vote before the Belgian proposal, which did not alter the proposed programme and budget at all.

(25) The CHAIRMAN took a vote on the proposal of the Indian delegation, seconded by Messrs. SOEBROTO (Indonesia) and SILLER (Mexico).

(26) The proposal was adopted by 7 votes to 3, with 3 abstentions.

(27) It was therefore agreed to insert in the Committee's report a recommendation that the Indian Government's invitation be accepted.

(28) Miss LAISE (United States of America) said that, if the invitation were accepted by the General Conference, she would like to propose that the Committee recommend that, in the future, Unesco should adopt the policy of the World Health and Food and Agriculture Organizations and only agree to holding General Conferences outside headquarters if the host country were prepared to pay for the additional cost.

(29) Mr. ABDEL-RAHMAN (Egypt) pointed out that it was important to remember, when comparing Unesco to the World Health Organization or the Food and Agriculture Organization, that the latter organizations followed a policy of regionalism. The effect for these two organizations of following that policy was the same as that which Unesco would procure by holding its General Conference in different parts of the world.

(30) Mr. COWELL (United Kingdom) supported the United States proposal. He thought that the delegate of Egypt had made a very important point and suggested that, as a working party had been set up on decentralization, the Committee could refer the question of the site of the General Conferences to it and draw its attention to the possibility of developing the idea expressed by Mr. Abdel-Rahman. He did not think that it was essential to discuss the United States proposal at that stage and proposed that discussion should be deferred.

(31) The CHAIRMAN having asked whether the proposal was to allow the working party to study the matter and report directly to the Administrative Commission, Mr. COWELL (United Kingdom) replied in the affirmative.

(32) Mr. AVIDOR (Israel) said that the United States proposal amounted to a proposal to change Rule 2 of the Rules of Procedure of the General Conference.

(33) Miss LAISE (United States of America) replied that it was not against the Rules of Procedure to establish policy.

(34) Mr. MAHEU (Assistant Director-General) stated that he entirely shared the views of the United States delegate. It would be a question of taking a general policy decision, within the terms of which the Executive Board would continue to exercise the powers granted to it under Rule 2 of the Rules of Procedure.

(35) The Committee agreed to forward the United States proposal to the working party on decentralization with a request that it should study the question and report its conclusions direct to the Administrative Commission.

(36) Mr. JUNANKAR (India) feared that the United States proposal amounted to an amendment to the Rules of Procedure and that the Administrative Commission would not be competent to make recommendations concerning it.

(37) The CHAIRMAN considered that it was clear that, even if the proposal were adopted by the Administrative Commission, it would be given the status of a policy directive to the Director-General. The Executive Board could then make recommendations in the light of that directive. In his opinion, it did not constitute a change in the Rules of Procedure. In any case, the General Conference had the power to amend the Rules of Procedure at its present session.

**ITEM 7.2 OF THE AGENDA PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56** (continued)

**EDUCATION** (continued)

International Educational Development Fund (document 8C/5, paragraphs 143-146)

(38) In reply to a question from the CHAIRMAN, Mr. MAHEU (Assistant Director-General) explained that a draft resolution had been prepared by the Secretariat on the lines requested by the United States delegation. The Secretariat had nevertheless felt that it could submit a fresh text to the Committee. During the last meeting of the Administrative Committee on Co-ordination, held in New York in October, the Director-General had succeeded in securing his colleagues' approval of the statement contained in the Committee's report to the Economic and Social Council. If the General Conference felt able to endorse the statement, it would certainly enhance the latter's value in the eyes of members of the Economic and Social Council. The statement contained the following points:

(1) It was recalled that both the Economic and Social Council and Unesco recognized the development of free and compulsory primary education as a priority field of action.

(2) The guiding principles of Unesco's programme in that field were set forth.

(3) Emphasis was laid on the great financial difficulties hindering the extension of free and compulsory education, and on the urgent need for international financial assistance. Such assistance presupposed concerted action by the United Nations and Specialized Agencies. It was only if such action failed to be taken that Unesco might act independently.

(39) By approving that statement, the General Conference would be defining Unesco's general policy in that field for several years to come. It would strengthen the Director-General's position in his relations with the other Specialized Agencies. Finally it would explain clearly to the general public what Unesco's opinion was on that subject.

(40) Mr. FLORKIN (Belgium) asked if the Secretariat would arrange for the document mentioned by the Assistant Director-General to be distributed.

(41) Mr. LEE (United States of America) wished to know if the text to which the Assistant Director-General had referred was a work plan or a draft resolution. In his opinion, it should be either a work plan or an amendment to a draft resolution, since the Secretariat could not propose new draft resolutions.

(42) Mr. ELVIN (Director, Department of Education) said that it would be more appropriate to keep that question in the form of a resolution to guide the Director-General and that no further work plan would be needed. The proposed project could be limited to the total of $2,900 foreseen in the Department's programme.

(43) The Committee agreed to ask the Secretariat to prepare a draft for consideration by the Committee at its afternoon meeting.

DR/63: Unesco Publication on Mickiewicz

(44) Mr. MAHEU (Assistant Director-General) explained that the Executive Board had not had time to study the proposal and he did not think that it anticipated being able to do so within the next day or so. Moreover, the General Committee had taken no decision in regard to it. The proposal was to issue a publication in commemoration of the Polish poet Adam Mickiewicz; the Secretariat, however, had not yet been able to study the proposal or to draw up the necessary budget estimates.

(45) Mr. LEE (United States of America) asked whether, under the Rules of Procedure, resolutions received after the deadline date could be considered

(46) The CHAIRMAN said that technically it was not possible under the Rules of Procedure. The General Committee, however, had allowed those in question to be accepted for consideration as an exception.

(47) Mr. MAHEU (Assistant Director-General) emphasized the fact that the General Committee could not take any decision in the matter; it could only make recommendations to the appropriate organs of the Conference.

(48) Mr. FLORKIN (Belgium) recalled that it was always possible, during the first seven days of the session, to submit proposals unlikely to involve any large increase in the budget estimates. The point was whether the proposal concerned would involve such an increase.

(49) Mr. MAHEU (Assistant Director-General) replied that the time-limit for the submission of draft resolutions with important budgetary implications had expired on 3 November. Document 8C/DR/63 appeared to come into that category.

(50) At the CHAIRMAN's request, Mr. SKENAZI (Secretary) read out paragraphs 2 and 3 of Rule 78 of the Rules of Procedure.

(51) The Committee agreed to a proposal of the Chairman that the resolutions be considered with the second category of resolutions, namely, those having no or slight budgetary implications.

(52) The CHAIRMAN reminded the Committee that it had reached certain conclusions with regard to the programme and had allocated high priority or low priority to some projects, left others without priority and suppressed some. In addition, it had recommended

the retention of certain proposed resolutions and their budgetary implications. He called upon the Assistant Director-General to inform the Committee what the total budgetary implications were under the various categories.

(53) Mr. MAHEU (Assistant Director-General) drew up the following table of the budgetary implications of the decisions hitherto adopted by the Committee:

1. Projects given lower priority:

| | |
|---|---|
| 1955 | $206,314.-- |
| 1956 | $114,438.-- |
| Total: | $320,752.-- |

2. Activities proposed for deletion or postponement to the financial period 1957-58:

| | |
|---|---|
| 1955 | $ 99,802.-- |
| 1956 | $118,867.-- |
| Total: | $218,669.-- |

3. Activities granted high priority:

| | |
|---|---|
| 1955 | $241,059.-- |
| 1956 | $292,320.-- |
| Total: | $533,379.-- |

4. Projects recommended for implementation if sufficient funds became available. (Two such cases appeared in the minutes, but the Secretariat was not certain what the Committee's intentions really were):

| | |
|---|---|
| 1955 | $ 25,000.-- |
| 1956 | $ 26,000.-- |
| Total: | $ 51,000.-- |

5. New projects to be added to the 1955-56 programme:

| | |
|---|---|
| 1955 | $ 35,700.-- |
| 1956 | $ 63,517.-- |
| Total: | $ 99,217.-- |

6. Organization of the ninth session of the General Conference in New Delhi: $314,042.--

From that amount was to be deducted the $ 30,000 mentioned at the beginning of the meeting, leaving: $284,042.

(54) Two items were still outstanding, namely, the adoption of Russian as a working language (8C/DR/2) and the establishment of a regional office for Asia (8C/DR/14). The latter document would be referred to the working party on decentralization.

(55) Miss LAISE (United States of America) asked whether the sum of $30,000 which would be saved if Unesco did not move to its new headquarters in 1956 should be deducted from the estimate for holding the ninth session of the General Conference in New Delhi. In her opinion, that was not the correct place to make the deduction as the sum referred to the programme of the Headquarters Committee.

(56) Mr. MAHEU (Assistant Director-General) was entirely of Miss Laise's opinion. The $30,000 had nothing to do with the budget of the General Conference. The amount represented a saving made on the total budget.

(57) Mr. CABOUAT (France) pointed out that the sum would in any case eventually be spent. There was no question of any final saving.

(58) Miss LAISE (United States of America) asked whether the sum of $30,000 represented a net figure. There would be a sloping off of expenses in connexion with the withdrawal from the old premises but it could not be assumed that the move to the new headquarters would not take place at the end of 1956.

(59) Mr. RAO (Acting Chief, Bureau of Programme and Budget) replied that the $30,000 represented a net figure.

(60) Mr. CABOUAT (France) recalled that the Committee had taken note of the request of the Director of UNRWA reported to it by the Director-General. It had been proposed, if budgetary reductions permitted, to allocate a sum of $25,000 in 1955 and $26,000 in 1956 for the recruitment of the three specialists requested.

(61) The CHAIRMAN suggested that the Committee consider that proposal at the present meeting. Funds were available from cuts in the budget and it was therefore appropriate to include those projects in the programme without an allocation of priority. The amounts allocated to the two projects would be deducted from the total amounts available from the projects which had been suppressed.

(62) Mr. CABOUAT (France) thought that the Committee might recommend the insertion of the two amounts in the category of new proposals, among those made by the Director-General.

(63) The CHAIRMAN said that it was not really a proposal from the Director-General, but rather a proposal from the Committee. He suggested that it should be treated in the same way as the proposal concerning the Educational Development Fund.

(64) Mr. LEE (United States of America) thought that the action taken by the Committee indicated their belief that the project should be given a low priority. He proposed its transfer to the lower priority category.

(65) Mr. MAHEU (Assistant Director-General) explained that in fact the Director-General was not at present making any new proposals, although he reserved the right to do so subsequently. However, he could not overlook the fact that the Committee had recommended certain cuts.

(66) The CHAIRMAN said that the Committee could not consider proposals not yet made. He thought that it would be in order to the Committee to delete the amounts of $25,000 for 1955 and $26,000 for 1956 from the totals given by Mr. Maheu.

(67) Mr. MAHEU (Assistant Director-General) suggested that the Committee should not discuss the proposal at the present stage and agreed that the amounts of $25,000 and $26,000 could be deleted from the totals he had quoted to the Committee.

(68) The Committee agreed to return to the question at its afternoon meeting.

(69) Mr. CABOUAT (France) said that, even so, he intended to mention the matter in his draft report, in order to avoid a further discussion when the report came up for study. He would use the following wording

"The Director-General has stated that, if funds become available as a result of reductions in the budget estimates, he reserves the right to request the General Conference to approve an appropriation of $25,000 in 1955 and of $26,000 in 1956 for the recruitment of these three specialists".

(70) Mr. COWELL (United Kingdom) raised the question of the proposed subvention to the World Council for the Welfare of the Blind (cf. 8C/BUD/SR.12). The Council would require help for a period after taking over from the World Braille Council, but no information had been available as to how much assistance would be required.

(71) Mr. MAHEU (Assistant Director-General) said that the Secretariat had indeed received a request from the Council concerned. It was not owing to lack of information that no contract had been proposed.

(72) Mr. COWELL (United Kingdom) asked if the Secretariat could tell the Committee the amount being requested by the World Council for the Welfare of the Blind.

(73) Mr. DESJARDINS (Department of Mass Communication) replied that the Council had asked for a sum of $5,000 in 1955 and $5,000 to be given in the form of contracts for the following year.

(74) Mr. COWELL (United Kingdom) proposed that the sum of $2,500 be allocated for the purpose of granting a subvention to the World Council for the Welfare of the Blind.

(75) Agreed.

The meeting rose at 12.45 p.m.

# TWENTY-FIRST MEETING

*13 November 1954 at 3.30 p.m.*

*Chairman*: Mr. GARDNER DAVIES (Australia)

**PROPOSED PROGRAMME AND BUDGET FOR 1955-56 PART IV: COMMON SERVICE COSTS – 6. STAFF WELFARE AND TRAINING PROGRAMME**

(1) Mr. FARR (Chief, Bureau of Personnel and Management), invited to explain what the practice was in other Specialized Agencies with regard to the payment of salaries to the secretaries of staff associations, said that, as far as he knew, only the United Nations and Unesco paid such salaries, the United Nations providing a secretary at a senior level in the General Service category (Grade F in Unesco terminology), while Unesco provided one in Grade E. In Unesco, that had been the practice since 1948. Hitherto, the same person had acted as secretary to the Staff Association and also to the Appeals Board, since in the latter capacity she was not likely to be occupied for more than about two months in the year. In (c) on page 227 provision was made for someone to replace her as secretary to the Staff Association when she was so engaged. The Director-General was dissatisfied with the arrangement and intended to allot responsibility for the Appeals Board to a separate secretary from within the Secretariat.

(2) Mr. COWELL (United Kingdom) felt that, since Unesco was the only Specialized Agency to pay such salaries, it was difficult for the Committee wholeheartedly to endorse the practice. All it could do was to say in its report that, since such salaries had been paid over a period of several years, the Committee felt unable to recommend a change.

(3) Mr. SOMMERFELT (Norway) said that the payment of such salaries was not in accordance with the traditions of the northern countries; the Committee should state in its report that it found the practice unusual.

(4) The CHAIRMAN suggested that, in its report, the Committee should draw attention to the fact that Unesco was the only Specialized Agency to pay such salaries, but that, since those salaries had been paid over a period of years, the Committee felt that no comments were appropriate.

(5) Miss LAISE (United States of America), agreeing with the delegate of Norway, thought that it was difficult to draw an analogy between the United Nations Staff Association and that of Unesco, and proposed that the Committee recommend deletion of the item in question.

(6) This proposal, seconded by the delegates of the German Federal Republic and of Canada, was put to the vote and adopted by 6 votes to 3, with 2 abstentions.

Education, paragraphs 143-146: International Educational Development Fund

(7) Mr. MAHEU (Assistant Director-General) read out two draft resolutions which he submitted for the consideration of the Committee.

(8) The first related to the possible establishment of a United Nations Fund for Economic Development, from

which loans or subventions could be granted for building and equipping schools and teachers training colleges. The resolution would authorize the Director-General, if the fund were not established, to consider the possibility of Unesco's setting up a special international fund for educational development, and to that end to submit proposals to the General Conference at its ninth session.

(9) The second resolution was more general. Stating that the development of free and compulsory education had been recognized as a priority aim both by the General Conference and by the Economic and Social Council, it emphasized the need for considerable efforts at national as well as international level in order to give effect to that priority. It outlined the guiding principles which should underlie such efforts: (1) States should take all administrative and financial steps in their power to provide children with free and compulsory schooling, and should study: (a) their financial resources and means of increasing the funds allotted to education; (b) their educational theories, curricula and methods, with a view to adapting them to national requirements and cultural traditions, as well as to the development of international understanding; (c) means of using the school to help in economic and social development and in securing a higher standard of living. (2) Unesco should solicit the co-operation of the United Nations and of certain Specialized Agencies in helping States to take all necessary measures to expand free and compulsory education. (3) Assistance provided in that field should, as far as possible, be co-ordinated with that supplied by the United Nations agencies. The object of the resolution was to provide international financial aid to Member States in overcoming the main obstacle to the development of free and compulsory education, namely shortage of funds.

(10) Mr. COWELL (United Kingdom) doubted whether the Committee could "welcome the possibility of a special United Nations Fund for Economic Development" as stated in the first draft resolution. What likelihood was there of such a fund being created?

(11) It was agreed to resume discussion of the matter when the two draft resolutions were both available in written form.

General considerations and guiding lines on the report of the Committee

(12) Miss LAISE (United States of America), referring to a point made earlier by the delegate of Egypt, considered that the Committee's report should clear up a widespread misconception in connexion with the priority to be accorded to projects at the higher and lower budget levels. In addition, the report should emphasize that the Committee had tried to decide on the activities which would require priority in 1955-56. The Committee should express its concern at the excessively rigid structure of the Secretariat, leading to a certain top-heaviness, and at the reclassification policy. That was a matter which the Director-General had agreed to study over the next two years.

(13) The report should mention that the Committee was anxious for some reduction to be made in staff cost and overheads. In 1952, a definite proposal had been made for the size of the staff. It was not yet possible to determine what specific figure should be recommended for 1955-56, since staff numbers would depend on the decision still to be taken with regard to decentralization of activities.

(14) Mr. COWELL (United Kingdom) emphasized that the Committee must do its utmost to assist the Programme and Administrative Commissions. He feared that the Conference would raise the question of a limit on the budget below the high budget level in the Director-General's programme.

(15) The Committee had examined the programme and budget and had been able to recommend the saving of half a million dollars over the next two years, but that sum was very nearly offset by additional costs.

(16) Annex V to the budget document contained a table which might cause considerable concern to national treasuries. The figures given for established posts and salaries confirmed the need for a most careful scrutiny of staff costs, and items such as travel by staff and delegates, printing, communication services and subventions also required close examination. It might be well if the Committee, in its report, were to summarize that table for the benefit of the Conference.

(17) There had been some criticism of Unesco in the United Kingdom, and the Committee had to do its utmost to ensure that Unesco should not be open to attack on the score of excessive expenditure.

(18) Mr. AVIDOR (Israel) said that Unesco was criticized not because of its budget, but because the money spent was not used to the best effect.

(19) Mr. JUNANKAR (India) agreed; it would be difficult for the Committee, at the stage now reached, to recommend any further reductions in expenditure. It was true that staff costs had given rise to much misunderstanding; possibly more caution might be shown in the classification of posts. It would be desirable for larger amounts to be devoted to programme activities.

(20) Mr. LEE (United States of America) felt that, besides providing facts and figures, the Committee had to offer certain general remarks to help the Conference. An attempt should be made to define what the Committee hoped to achieve. The report should indicate that certain activities (extension of elementary education, fundamental education, arid zone research, and perhaps the strengthening of National Commissions) deserved high priority. Although it was not possible to go very far in expressing the wishes of the Committee with regard to the activities of the Secretariat in each of those fields, the Committee might reaffirm its hope that some of those activities would be completed with all possible despatch. Stress should be laid on the Committee's desire to improve the effectiveness of the programme.

(21) Mr. SOMMERFELT (Norway) agreed with the suggestions by the previous speaker. His country thought there was some justification for a cautious expansion of the programme, but was not prepared to accept any large increase in its contribution. Caution was required if Unesco was to escape criticism.

(22) Mr. COWELL (United Kingdom) thought it would be only too easy to obtain general agreement on the importance of the various fields of activity enumerated by the delegate of the United States of America; it was doubtful if much was to be gained that way. The report should bring out the responsibilities of individual Member States, of the National Commissions, and of the international non-governmental organizations in furthering the work of Unesco.

(23) Mr. BOW (Canada), while understanding the attitude of the delegate of India, was disappointed that more progress had not been made in the direction of further savings. The $500,000 saved were almost counterbalanced by the cost of implementing the new resolutions and of holding the next session of the General Conference in India. Nevertheless, although it might be too late to make really substantial changes, he still hoped that the Committee would succeed in submitting a helpful programme and budget to the Conference. More work was required on the question of which activities should be given the greater emphasis, as suggested by the United States delegation. It was probably too late to embark on a detailed discussion of the methods whereby Unesco set out to achieve its aims, such as the Unesco Coupon Scheme. He would suggest an additional field which urgently required priority treatment - that of cultural exchanges between East and West.

(24) The CHAIRMAN observed that the task of the Committee was to analyse the programme proposals and to check the accuracy of the estimates made. The Committee had already divided projects into three classes: high priority projects, projects on which no particular comment seemed called for, and low priority projects. That in itself was an achievement.

(25) Mr. CABOUAT (Rapporteur) noted that observations by members of the Committee referred (1) to the main types of activities on which stress should be laid, and (2) to the methods by which the Organization should implement the programme. Such considerations, arising out of the general discussion, were more suitable for insertion in the introduction and would not form the substance of the report. The Rapporteur wondered whether the Committee, instead of continuing along those lines, would not be better advised to turn its attention to two essential questions, the general balance of the programme as between the several departments, and the remodelling of the future programme. Once it had completed its study of those two points, the Committee might come back to the question of the form of its report.

(26) Mr. JUNANKAR (India) suggested that, within each main field of Unesco activities, the Committee might indicate certain priorities. Thus, in the field of the natural sciences, first priority should be given to the use of nuclear energy for peaceful ends, and a secondary priority to the popularization of science. In the field of culture, emphasis might be laid on making the cultural heritage of both East and West available to all. In the social sciences, an attempt might be made to use knowledge not just for academic ends, but for the elimination of international tensions.

(27) The delegate of the United Kingdom had alluded to the responsibilities incumbent on Member States. It was fashionable to say that States must pull their weight, but he doubted whether that really helped to solve the concrete problems with which the world was faced. The fact was that the world's resources were unevenly distributed, and it was inevitable that they should be to some extent redistributed by the international agencies. He was not in favour, at that stage, of reopening the entire question with a view to obtaining some definite budget ceiling.

(28) The CHAIRMAN, summing up, said that the report would have to be a record of the work done during the previous ten days. The introduction might contain a preamble together with the conclusions reached. It might suitably contain an exposition of the Committee's views on the higher or lower budget levels, of its decision not to take account of levels in examining original proposals, and of how the Director-General had arrived at the total budget figure. The report might go on to describe how the Committee had endeavoured to allot priorities to programmes on which the Director-General had laid no particular emphasis, and to outline the various categories of priority. It was not, in his view, within the Committee's terms of reference to recommend a budget figure.

(29) Mr. CABOUAT (Rapporteur) said that the plan suggested by the United States delegate for the introduction followed the same lines as he had himself proposed to adopt. He considered that, after ten days' discussion, it would be simple to seize upon the broad principles which had guided the work of the Committee and to summarize them in the introduction. As he had already drafted a large part of the report, leaving space for the question of the remodelling of future programmes and that of the balance of the budget, he hoped the Committee would proceed to discuss the next two items on its agenda.

(30) Requested by the CHAIRMAN for his views on the discussions, Mr. MAHEU (Assistant Director-General) thought that everything that had been done was reasonable. He felt that the introduction should serve simply as an aid to the better understanding of the body of the report; and it would seem logical to place the conclusions at the end of the report. The remarks of the United States delegate concerning the structure of the Secretariat were entirely new, and that matter did not seem to have been closely studied by the Committee. The Assistant Director-General said he would like to speak when the Committee came to take a decision on that point.

(31) Mr. ABDEL-RAHMAN (Egypt) suggested that the main body of the report might be forwarded to the Programme and Budget Commission so that the latter could start work at once. Since the Committee had examined the programme project by project, it was difficult to discuss the question of the balance of the programme. A report on remodelling of the programme might be submitted later.

(32) Mr. COWELL (United Kingdom) agreed and suggested that the first report to be submitted be

called the "First Report by the Advisory Committee". As regarded the suggestions made by the United States delegation concerning priorities, an attempt had been made at the Florence Conference in 1950 to evolve a basic Unesco programme, but it had proved exceedingly difficult to define priority projects except in the most general terms. No General Conference would agree to restrict the programme to high priority items only. A more hopeful way might be to examine the main sub-sections of the programme and decide what items could be deleted.

(33) Mr. FLORKIN (Belgium) considered that the Committee had accomplished its task by dividing the various projects into three categories, with different priorities, and that it had no more to do in that field. He wondered whether it was really the province of the Committee to intervene in regard to the determination of the total budget figure.

(34) Mr. BOW (Canada) thought that, while the Committee had been highly successful in its examination of the programme, it had been less successful with the budget. He could not agree that the Committee should not make budgetary recommendations. It was, after all, the Advisory Committee on Programme and Budget.

(35) The CHAIRMAN observed that it was not the task of the Committee to decide on a total figure for the budget. That could only be fixed in terms of the money which Member States were prepared to provide. The Committee had gone through the estimates and tried to establish priorities which would enable the Conference to fit the programme into whatever budget was decided on. It was not the Committee's task to decide on how many projects there should be in 1955-56.

(36) Miss LAISE (United States of America) thought that enough had been said to guide the Rapporteur. As regarded the layout of the report, the conclusions were apt to escape attention if appended at the end. Better a short general discussion, followed by the conclusions reached by the Committee, with the more detailed consideration of the various items appended.

(37) Mr. SOMMERFELT (Norway) differed from the Chairman in feeling that the Committee ought to discuss budget totals, in order to facilitate the work of the Programme and Budget Commission.

(38) The DIRECTOR-GENERAL said that, while he had not been able to follow the work of the Committee in great detail, it was his feeling that, although the Committee was not a budget committee in the sense that it ought to recommend a level of expenditure, it had to inform the Programme and Budget Commission of the cost of implementing the recommended programme. He could promise the Committee every assistance from the Secretariat in determining the cost of carrying out the projects which the Committee considered Unesco should undertake.

(39) Mr. AVIDOR (Israel) suggested that the Committee issue its report, supplementing it with an additional report if required.

(40) Mr. ABDEL-RAHMAN (Egypt), seconded by Mr. JUNANKAR (India), proposed that the question of remodelling should not be discussed at that stage, but be dealt with in a later report.

(41) This proposal was put to the vote and adopted by 9 votes to 2, with 1 abstention.

The meeting rose at 7 p.m.

# TWENTY - SECOND MEETING

*15 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**REMODELLING OF THE FUTURE PROGRAMME OF UNESCO** (document 8C/PRG/13)

(1) The CHAIRMAN said that, in the last two meetings, the Committee had been able to deal with this matter only in the most general terms. It was important that the Programme and Budget Commission should have the benefit of its views.

(2) Sir Ronald ADAM (Chairman of the Executive Board) said that, in November 1953, the Executive Board had reviewed the progress made by Unesco. There had been general agreement that Unesco had not succeeded in securing the interest of Member States, nor, in some cases, of intellectuals, to an adequate degree. Nor had it made much impact on the masses. It had been agreed that Unesco could go further in regionalizing its work, not in any geographical sense, but by common treatment of countries with similar problems,

and that its projects were spread over too wide a field.

(3) At its next session (March 1954), there had been further discussion on those lines, and he had produced a short statement which had been taken into account by the Director-General in reshaping the programme for 1955-56. Thus, if the Conference rejected remodelling, it would be logical for it to reject the 1955-56 programme also.

(4) At Venice, Sir Ronald had, with the assistance of the Secretariat, produced the document now before the Committee. That document, he believed he was right in saying, had enjoyed the support of all but one of the members of the Executive Board.

(5) The first part of the document dealt with the weaknesses of Unesco and the reasons for the criticism levelled against it. The second part dealt with the structure of the programme, and there was a most important section on division of special activities into those initiated by the Organization and those undertaken at the request of Member States. Particular stress was laid on the need for concentrating on major projects. It was suggested (paragraph 58) that, to be really effective, projects should be evolved in co-ordinated fashion by all the Unesco programme departments. Fundamental education was the easiest example to take, since it was of concern to all Unesco departments. In that respect, it was to be hoped that the Conference would provide the Director-General with guidance in his task of drawing up requirements for the 1957-58 programme.

(6) The provision of technical aid to Member States, discussed in the section on activities undertaken at the request of Member States, ought not to be confused with technical assistance, for which Unesco was responsible to a limited degree only. Technical aid was of extreme importance in gaining the confidence of Member States - a fact with which he had been particularly impressed in the course of the world tour he had undertaken with the Director-General. Although such aid was available to all Member States without exception, and was not restricted to economic or social development, it would of course largely take the form of assistance to underdeveloped countries. He hoped that Member States would pay a good proportion of the funds required, so that Unesco could do more and do it more thoroughly.

(7) The CHAIRMAN thought it important to stress that the type of major project envisaged by the Board was that which would require a contribution by all the programme departments, as in the case of fundamental education. It was not possible or appropriate at that stage for the Committee to try to define precise projects, but in its report it might say that it was prepared to devote time to the matter later, with a view to submitting some general projects of the kind envisaged.

(8) Mr. MAHEU (Assistant Director-General) thought there was little he could add to Sir Ronald Adam's remarks. Although document 8C/PRG/13 was submitted in the name of the Executive Board, which took the responsibility for it, the Secretariat had actively helped in preparing it. Accordingly, he was able, in the Director-General's name, to endorse Sir Ronald Adam's conclusions.

(9) There were, however, two points he was anxious to make.

Firstly, the document as it stood was a compromise production, for certain sections had had to be recast to secure the approval of all members. One section dealt with the need for progressive concentration on major projects; the Secretariat was most anxious for precise instructions on that point. The Conference had always called for concentration but without specifying the exact form it should take. The notion of large-scale projects in which several departments took part was most attractive but it would be dangerous to embark on that course without having considered what its effect would be on the organization of the Secretariat and the balance of the programme and budget.

Secondly, consideration should be given to how far the Secretariat could act on the ideas expressed in the document - if approved - when carrying out the programme for 1955-56. The Director-General was of the opinion that something could be done, but that it would be desirable to establish a working fund for the purpose; a sum of $300,000, for instance, might enable him to accelerate the execution of certain major projects and to study a number of new projects which he would submit to the Conference at its next session. To that end the Conference might designate the matters on which the Director-General would be asked to submit major schemes and authorize him to set aside a certain sum from the 1955-56 budget towards the preparation of those schemes. The Director-General was ready to consider any means which would assist the transition from the 1955-56 programme to the 1957-58 programme in certain priority areas.

(10) Sir Ronald ADAM (Chairman of the Executive Board) was glad that, in preparing its document, the Board had enjoyed the assistance of the Director-General and Assistant Director-General, to whom, in fact, the Board owed much.

(11) Mr. ABDEL-RAHMAN (Egypt) said that in the last few years the work of Unesco had been an inspiration to countries far removed from the main centres of civilization, and he had every confidence in the future of the Organization. There was a sense in which the document before the Committee was an act of self-criticism by the General Conference, which was responsible for electing the members of the Executive Board.

(12) A point that required special attention was the question of transition between the programme in its present form and the remodelled programme. Some secretarial reorganization might be necessary, and there might have to be a change in the relationship between Unesco and the National Commissions and between Unesco and the general public.

(13) A type of work on which he would lay great stress was what he would call "clearing house" activities. Unesco was called upon to act as a clearing house for information, to be studied and made available to the world at large. Then there were what he would call "promotional" activities, i.e. activities directed to some specific end. A division of Unesco activities into those two categories would, he felt, be helpful.

(14) As regarded B, in the section on general activities, he was worried by the possibility of continuous Unesco subsidies designed to secure intellectual collaboration between specialists. Non-governmental organizations, after an initial period, should surely stand on their own feet.

(15) Mr. FLORKIN (Belgium) said that his delegation was in favour of the idea of Member States' taking a larger share in the preparation of Unesco's programme but was a little disturbed at the prominence given to meeting requests for assistance from those States, and was afraid that the general activities might suffer as a result. A proper balance had to be preserved within the programme. While it was important to aid the masses and win them to Unesco's cause, the more highly educated minority who, wherever they lived, took an interest in Unesco, could not be neglected.
(16) Mr. Florkin was also disturbed by the remarks of the delegate of Egypt. The co-ordination of the work of specialists was a permanent activity and should be continued, experience had shown that appreciable results were obtainable in that domain. It would be unwise to neglect activities of that kind in favour of the provision of aid which, while undeniably useful, might come to absorb the bulk of the energies and funds available.
(17) With regard to the Assistant Director-General's suggestion that provision be made for new projects involving more than one department, the delegate of Belgium wondered whether its adoption would not lead to the creation of new departments which would be superimposed on the others and make the structure of the Secretariat more complicated; in his view, it would not be possible to plan new projects without the assistance of new specialists.

(18) Mr. JUNANKAR (India) welcomed the document as a frank recognition of past failures and as an attempt to think along new lines. The great question was whether Unesco was to be merely an agency for the exchange of information, or whether it was to give practical assistance to Member States in so far as its resources would permit. In fact, the document itself recognized that Unesco could not limit itself to activities of the former type. There must be greater activity (and the fact should be given more emphasis) by Unesco itself, by its Member States, and by the National Commissions.
(19) He himself was speaking for the underdeveloped areas of the world in affirming that the crucial task before Unesco was to ensure equal opportunities for all in the fields of science, education and culture. If Unesco failed to do that, it would fail to command confidence and respect.
(20) Concentration of resources and effort was not incompatible with the setting of definite targets. Thus, in the field of education, it was not enough to affirm that education must be free and compulsory. Special priority should be given to the introduction of free and compulsory education, with secondary priority being given to education for better international understanding. In the natural sciences, priority should be given to the use of nuclear energy for peaceful purposes; in the social sciences, to the removal of current tensions and discrimination in its various forms. In the field of culture, special attention should be given to making generally available the cultural heritage of East and West. Increased resources would be required (so much was acknowledged in the document) and should be devoted to the carrying out of specific projects designed to meet the vital needs of specific areas. Such a programme might of course involve structural changes in Unesco, but only so, he felt, could Unesco command world-wide loyalty and enthusiasm. In short, future programmes should be so devised as to meet the needs of the underdeveloped areas, and a recommendation should be made to the effect that resources be made available for specific purposes in specific parts of the world until such time as definite results had been achieved.

(21) Mr. COWELL (United Kingdom), welcoming the document, said it was not easy to achieve a proper balance between emphasis on resources and emphasis on activities, and he feared that the previous speaker had laid undue stress on the latter.
(22) The idea of help for the underdeveloped areas was by no means new; Unesco had launched its pilot project in Haiti long ago. In 1951, a most ambitious scheme had been proposed by the then Director-General for the eradication of world illiteracy, to cost twenty million dollars over a period of twelve years. What was new was the emphasis on concentration on particular activities, but, while concentration was an ideal to which all paid lip service, it was in practice exceedingly hard to decide what activities should be eliminated.
(23) He was not for a moment suggesting that enough had already been done, but he did feel that there was a real danger of raising excessive hopes. Problems such as the eradication of illiteracy were tremendous and the full implications of the efforts needed to solve them were not always fully grasped. It was a fallacy to think that, if Unesco did nothing, nobody else would do anything. It was also a fallacy to think that these stupendous problems would be solved if only certain people, certain privileged countries, could be prevailed upon to exert themselves a little more.
(24) Besides, it was wrong to say that the more privileged peoples had done nothing. In all history, no greater effort had been made to help the rest of the world than was being made by the United States of America. That great people deserved recognition and gratitude. The United Kingdom was a much smaller and less populous country, and had suffered severely in two world wars, but had contrived to find, the year before, some three hundred and fifty million dollars for economic development in the British Commonwealth.
(25) While economic assistance to the underdeveloped areas was vitally important, there were other forms of co-operation, not connected with economic development, which could not be covered by the Expanded Programme of Technical Assistance. Another point had to be borne in mind, namely, that technical assistance was a scheme which concerned other agencies besides Unesco. A really ambitious project by Unesco, such as a large-scale education drive, might well throw the whole thing out of gear.
(26) The delegate of Egypt had said how important it was that specialized organizations of experts should

not indefinitely be subsidized by Unesco. But the work done by such organizations was often of extreme value, especially to the underdeveloped areas (he was thinking of the invention and provision of antibiotics), and therefore it was not quite accurate to suggest that intellectual co-operation was carried on at the expense of actual technical aid.

(27) Mr. SILLER (Mexico) admitted to doubts about the work to be done. He thought that Sir Ronald Adam's remarks on the importance attached by the countries which the latter had visited to Unesco's technical aid programme supported the Indian delegate's argument that in the years to come the Organization should strive to meet the urgent requests of Member States.
(28) He likewise appreciated the soundness of the Belgian delegate's views on the importance of permanent and enduring co-operation between groups of intellectuals throughout the world, scientific organizations and other bodies.
(29) What previous speakers had said showed the importance of achieving an effective balance, and as logical as possible a balance, between activities designed to promote co-operation and special activities in individual countries. The difficulty lay in finding that balance, and for that reason he felt that commonsense was needed and a realistic approach to such problems as the economic limitations of Member States, legal or customs restrictions, and restrictions on movement, etc.
(30) He felt that there were also prejudices against which the Organization would have to fight. For instance, as he saw it, campaigns against racial discrimination could not be prosecuted, when, as was frequent, racial prejudice subsisted at the back of the promoters' own minds.
(31) Nor should the present psychological state of the various countries be overlooked: the cold war and international tension were positive trammels on Unesco's activities.
(32) Mr. Siller was not stressing such obstacles because he felt that Unesco should fold its arms and do nothing; on the contrary, he felt that Unesco ought to struggle against those obstacles to preserve the Organization's labours from impracticality. It was his belief, too, that, in pursuing the rationalization of Unesco's activities to achieve a proper balance in its future programme, delegates should avoid undue optimism about the support likely to be forthcoming from individual countries or other organizations.
(33) In conclusion, Unesco should act with its eyes open, calculating its means with precision and estimating the support likely to be received from the various regions, so that its efforts would not have to be wasted on the obstacles mentioned but would go directly to meeting the needs of Member States.

(34) Mr. BRICHET (France) thought document 8C/PRG/13 an excellent piece of self-criticism and hoped the Conference would take it into consideration. He wished, however, to make it clear that the French delegation did not subscribe to the recommendations in paragraphs 62 and 68 for the allocation of a larger proportion of the Organization's energies and resources to special assistance activities. In his delegation's view, it was undesirable to contrast general and special activities: the stress should, on the contrary, be put on the principle of unity which should inform both, and a balance should be established between the departments of Unesco and the activities involving Member States.
(35) Secondly, it would be dangerous to awaken hopes which might not be fulfilled; such a course might well have consequences of the utmost seriousness for Unesco's future.
(36) Lastly, the Organization should not be transformed either into a technical assistance agency or into a supra-national Ministry of Education. The part it had to play had been clearly defined at the Florence Conference: it was to co-ordinate and promote activities consonant with its programme, to develop international co-operation, to foster the growth of non-governmental organizations, and to facilitate exchanges of information and documentation. As the delegate of Belgium had pointed out, any large increase in the sums allotted to technical aid might necessitate the termination of certain of the Organization's permanent activities. The two parts of the programme were interdependent and one should not be neglected in favour of the other.
(37) Mr. Brichet also shared the uneasiness expressed by the delegate of Belgium over the plans for progressive concentration on certain major projects, which, it seemed to him, would necessarily involve the creation of new services in the Secretariat.

(38) Mr. AVIDOR (Israel) could not altogether share the pessimism with which the Executive Board appeared to view the situation. Too much had been made of the fact that Unesco was not a very familiar name to the masses. Education, science and culture had never been popular with the masses, even in the highly developed countries. In fact, considering its budget, Unesco had considerable achievements to its credit.
(39) Statements had been made implying that National Commissions ought to be more effective, but at least 62 Member States had such Commissions, and the lists of membership were often very impressive. If Unesco were more active, the National Commissions would be more active too.
(40) Unesco, after all, was still a young organization, and in the fields of education, science and culture, progress was necessarily tentative and slow.
(41) He did not consider that the General Conference would be able to provide the Director-General with precise instructions. All it could do would be to define the goals to be attained, leaving the Secretariat free to devise the requisite methods of attaining them.
(42) He would suggest that, in future, three main principles be adopted. Firstly, there should be a concentration of activities in the light of the experience acquired and the resources available. Secondly, there should be increased aid to Member States. And, thirdly, co-operation between Member States at the regional level should be encouraged, by which he meant that there should be co-operation between Member States having similar problems, not necessarily between States speaking the same languages or in the same region geographically.

(43) Mr. SOMMERFELT (Norway) said that, in the

opinion of his Government, Unesco was bound to devote part of its resources to assisting underdeveloped countries. But international co-operation in the various branches of knowledge must not be sacrificed to increased tec ical aid. A balance must be maintained between the various activities of Unesco, and increased technical aid should be dependent on whether additional resources were made available. Perhaps the cost of Unesco's general activities could be reduced by getting greater assistance from the non-governmental organizations.

(44) Mr. LEE (United States of America) found it possible to agree with what many of the previous speakers had said. The difficulty was that the Committee was discussing ill-defined notions such as "concentration" and "balance", on which agreement was easy as long as no attempt was made to come down to earth.

(45) The United States of America welcomed the document on remodelling, most of which it could endorse. Its National Commission had studied the matter and approved the drive for greater concentration, the strengthening of National Commissions, and increased emphasis on aid to Member States in response to their expressed needs.

(46) He was grateful to the delegate of the United Kingdom for the generous tribute paid to his country. While less pessimistic than the delegate of the United Kingdom, he was less optimistic than the delegate of Israel. There was a large area of agreement. But could they hope to evolve instructions which would assist the Director-General? Surely the Conference ought to do more than just lay down policy. The Director-General should be given guidance as regards the organization of the staff and preparation of the ground for the 1957-58 programme. The Committee might adopt a tentative recommendation for the Programme and Budget Commission, which could debate the matter and either refer it back or set up a working party to study it.

(47) Mr. ABDEL-RAHMAN (Egypt) said that he had not meant that international collaboration between specialists should be neglected, but that there should be definite agreement between Unesco and the non-governmental agencies concerned as to the aims to be achieved, and the necessary resources should be made available to such agencies for limited periods only. The furtherance of such collaboration came within what he had called the "promotional" activities of Unesco, its "clearing house" activities remaining fundamental.

(48) The CHAIRMAN said that there was no necessary incompatibility between the views expressed about international collaboration between experts, especially as far as Unesco was concerned. Unesco would have to foster its relations with the non-governmental agencies - that was essential for what the delegate of Egypt had called its "promotional" activities. The Committee would have to decide whether the document would enable it to assist the Conference by recommending broad projects for the 1957-58 programme. It might conceivably take up the Director-General's suggestion that machinery be devised in 1955-56 whereby, at the ninth session of the Conference, he could take immediate energetic action on a small number of main projects.

(49) Mr. PANNETON (Canada) said that document 8C/PRG/13 entirely satisfied him. He emphasized that, if improvements were asked for, it was because only what was good could be improved and because every living thing must evolve.

(50) He would, however, like the wording of paragraph 37 to be amended by the addition of the words "limited in numbers and, so far as practicable, in duration", immediately after the word "delimited".

(51) Mr. FREY (German Federal Republic), while welcoming the document, spoke with some little diffidence as the representative of a country which had but lately joined Unesco. He attached particular importance to close co-operation between the Secretariat, the Executive Board and Member States, and was glad to hear that the Executive Board had received much assistance from the Assistant Director-General in producing its document. It was of great importance, he considered, to develop the National Commissions and to bring them into closer contact with the Organization over the next two years.

The meeting rose at 1 p.m.

# TWENTY - THIRD MEETING

*15 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**REMODELLING OF THE FUTURE PROGRAMME OF UNESCO**
(document 8C/PRG/13) (continued)

(1) Sir Ronald ADAM (Chairman of the Executive Board) said that he had been very interested in the discussion at the morning meeting, and would like to reply to some points which had been made. The Executive Board, in proposing the division of the programme into two parts, had realized the importance of general activities. Paragraph 19 mentioned their intrinsic value as providing a framework and structure for international co-operation throughout the world. Taking the programme for 1955-56, 32.54% of the budget was to be used for general activities and 67.46% for other activities. That meant that two-thirds of the budget would be used for special activities. Aid to Member States accounted for 10% of the total budget.
(2) With regard to the question of regionalization, the Executive Board was of the same opinion as the delegates of India and Israel. Sir Ronald suggested that to bring Unesco to the regions, members of the Secretariat should be sent there for long periods and help to set up projects and inspect the progress made. That would be a good way of getting members of the Secretariat into the field, enabling them to get to know a Member State or a group of Member States.
(3) The Executive Board did not think of Unesco as a super-educational agency, as had been feared by the delegate of the United Kingdom, but thought of it rather as a body to stimulate interest in education.
(4) In Thailand the project for school reform was being carried out with the co-operation of Unesco. In addition, representatives of the International Labour Office, the Food and Agriculture Organization and the World Health Organization were working with Unesco staff in the field. That was a hopeful sign of co-operation with other agencies. It was to be hoped that each year would bring about closer co-operation with other agencies in every project.
(5) The Executive Board had carefully studied the problem of the National Commissions and had come to the conclusion that only one-third of those in existence were effective. The Board was convinced that there was only one way of carrying out the programme of Unesco and that was through governments. The governments would have to find out that they could not do the work without National Commissions.
(6) Concerning the division of the programme into two parts, the Board considered that that was the best method from an administrative point of view. Section I applied to the continuing work of Unesco and Section II to the changing work. It seemed to be the only logical division.
(7) Mr. MAHEU (Assistant Director-General) thought that the real intention of the Executive Board, in drawing up its report on the remodelling of Unesco's future programme, had been to raise questions, define problems, and point to possible solutions. The Board had sought above all to provoke thought amongst the delegates, leading perhaps to positive conclusions. Whatever the outcome of the debate, Mr. Maheu believed that the changes in ideas and policy desired by the Board were already coming about.
(8) The Egyptian delegate had been right in saying that the new structure of the programme was only a beginning. In the eyes of the Director-General and the Executive Board, the change in presentation was certainly not the most important aspect of the remodelling of the programme. It had been adopted merely as the best approach to the problem.
(9) On the other hand, Mr. Maheu agreed with the Canadian delegate that it might prove desirable to adopt a different plan, and above all, different wording. The terms used were the outcome of lengthy discussions in theBoard, but they were certainly not the only possible ones, nor necessarily the best. He thought, however, that the Committee should not, in its turn, become involved in a long debate on a question of secondary importance. Nor was the Canadian delegate wrong in thinking that there was no basic difference between planned activities and activities undertaken at the request of Member States. Mr. Maheu again hoped that problems of mere presentation would not blind the delegates to basic questions of substance.
(10) The ideas set out in the document under consideration were not perhaps entirely original, but they nevertheless raised new problems. Carried to extremes, they might involve considerable, even radical transformations for Unesco. Mr. Maheu did not believe, however, that the Executive Board wanted such basic changes introduced immediately.
(11) The document drawn up by the Executive Board raised three problems of prime importance: the structure of the programme, administrative reorganization, and Unesco's relations with Member States.
(12) Several delegates had spoken on the structure of the programme, giving their views on its balance and the relations that should exist between its different parts. Mr. Maheu considered that the two major sections of the programme should be balanced. Nothing would be more risky than to try to develop one at the expense of the other. The Chairman of the Executive Board had given details regarding the division of appropriations between the two halves of the programme in the budget for 1955-56. Henceforth, it was for the Conference to decide whether it intended to change those percentages or leave them as they were.

But it would be a catastrophe if that division took on political significance and if the point of balance were determined by the relative importance of votes of any given group of States. Mr. Maheu, therefore, felt bound to ask each delegation to rise above its particular national interests and ways of thought and to consider the balance of the programme from an international and universal point of view.

(13) In the opinion of the Director-General, it was not true that the first part of the programme concerned only the industrialized countries, and the second part only the underdeveloped countries.

(14) The underdeveloped countries had as much need as the others of international intellectual co-operation. It was in their interests to watch it expand through Unesco's efforts and to take an increasingly active part in it. Nor, on the other hand, was any country so advanced that it could not profit from the collaboration of all Unesco's Member States. The idea of assistance to Member States included all the countries belonging to Unesco, whatever their degree of development. Therefore, no political significance should be attached to the division of the programme into two parts. They were inseparable, and the second could not operate unless it mobilized systematic co-operation in the efforts made under the first part. Similarly, that first part would be useless if it were to benefit only a few specialists and international intellectual co-operation were not employed for the execution of practical projects.

(15) Unesco's action could, moreover, take different forms. For the carrying out of some projects a whole series of methods of action might be employed from international intellectual co-operation via planned activities to technical aid to Member States.

(16) If a revised programme were to be prepared for 1957-58, the Director-General would certainly have to face a problem of administrative reorganization. It was important for the Conference to realize what administrative repercussions its decisions might have. The Director-General considered, however, that the Conference could not expect him as yet to give it a definite answer as to the nature of those repercussions. He could not study them until he had received general directives from the Conference, but he thought that it would be illogical to allow them to become a determining factor in taking decisions on future programmes.

(17) That being the case, Mr. Maheu could not answer the questions put by the delegates of Belgium and France. He could, however, foresee two possibilities. The concentration of the programme might be operated in respect of one particular field, such as fundamental education, for instance. Fundamental education was a field, not a project, and the two concepts should not be confused. The Committee itself had singled out the various fundamental education projects in order to obtain an overall view of them. It was a conception of concentration according to which it would simply be a question of co-ordinating the activities of the various departments within one field - and that could be done by the Office of the Director-General. That was the type of concentration foreseen in the draft programme and budget for 1955-56. In it there were specialized departments, separate but not isolated, and a system of co-ordinating their activities administratively in given fields.

(18) The Conference might, however, wish to go a step further and consider that the concentration of the programme should take the form of joint projects in which different disciplines co-operated. In that case, the problem would be how to devise a suitable system of administration. If, for example, it were decided to carry out a fundamental education project in a certain place for a certain length of time, it would mean forming a team of specialists of several disciplines. That was not an entirely new idea and the Director-General was quite ready to put it into practice, but he would not venture on that course unless the Conference made it clear that in some cases at least it adopted that stricter conception of concentration - a concentration by integration and not merely by co-ordination.

(19) There was no reason to suppose that such a system would raise major difficulties. There was some mistaken fear that new administrative functions, grafted on to the present administrative structure, would result in a complicated and top heavy system. On the contrary, if new functions were introduced, the existing structure might well be lightened. The Director-General thought that the administration should be subordinate to the programme and modelled upon it. In consequence, administrative problems should not constitute essential factors in discussing the remodelling of the programme.

(20) The big projects already mentioned should relate to problems and not to fields. An attempt would be made, for example, to carry out some practical project in fundamental education, rather than to improve fundamental education in general. There was nothing to prevent such planned activities from being undertaken. In several countries, in addition to ministries specializing in given disciplines, administrative bodies had been set up to implement co-ordinated plans calling for inter-ministerial co-operation. Nothing prevented the same system in an international agency.

(21) The aim of such projects was to achieve practical results, that is, to change the situation of a Member State in one particular respect. Here the third big problem arose, namely that of Unesco's relations with Member States. More concrete action by Unesco was necessary if such results were to be achieved. At present, Unesco acted largely in an indirect way, through the general progress of education, science and culture.

(22) True, several delegates had rightly warned the Committee against expecting too much from direct aid. The Organization should aim at making well-considered and realistic decisions, taking account of the wishes and means of Member States. It would be wrong to think that the practical problems of Member States could be solved by big projects undertaken by Unesco alone. The Organization had neither the constitutional authority nor the necessary resources. The Conference's faith in voluntary contributions, expressed at an earlier session, had turned out to be misplaced, and Unesco's budget would never be large enough to allow for the implementation of big projects financed solely by the Organization.

(23) However, as certain delegates had already pointed out, some Member States were carrying out

assistance programmes on a very substantial scale. If they decided to co-ordinate those programmes with Unesco's activities, enormous progress would be achieved. Thus, Unesco's programme would affect not only experts and intellectual leaders, but would combine with action taken by governments, and Unesco would be able to mobilize available resources for specific purposes and achieve practical results. Such a change in Unesco's methods of work seemed as necessary as the revision of the programme and the reorganization of the Secretariat.

(24) The CHAIRMAN thanked the Assistant Director-General for his admirable statement, which he thought provided a transition from the morning's debate to the reaching of conclusions. He suggested that the Committee should proceed to an examination, section by section, of document 8C/PRG/13 and, when that had been completed, consider the elements for inclusion in its report.

(25) Mr. FLORKIN (Belgium) pointed out that, when he had voiced certain objections on behalf of his delegation, he had had no intention of denying that it was important to meet the needs of Member States. If the Chairman of the Executive Board estimated that special activities already took up the major part of the budget (67.5%), it seemed rash to recommend in paragraph 62 of document 8C/PRG/13 "that, in future, a greater part of the ordinary budget be set aside to provide such services to Member States", and in paragraph 68 to hope "that the major part of the Organization's resources and energies will be devoted to the special activities".

(26) The CHAIRMAN then opened discussion of the different paragraphs of document 8C/PRG/13.

Structure of the programme: paragraphs 11-15

(27) Mr. ABDEL-RAHMAN (Egypt) referred to the remarks he had made earlier on this section (cf. 8C/BUD/SR.22).

(28) No further comments.

Order of the programme: paragraphs 16-22

(29) No comments.

General Activities: paragraphs 23-36

(30) Mr. ABDEL-RAHMAN (Egypt) referred to the remarks he had made earlier with regard to sub-section B of this section (cf. 8C/BUD/SR.22).

(31) No further comments.

Special activities: paragraphs 37-43

(32) Mr. ABDEL-RAHMAN (Egypt) asked how the criteria were to be settled for the division of the programme into two parts.

(33) Sir Ronald ADAM (Chairman of the Executive Board) replied that the General Conference would decide the first category of special activities, and plans of work would be arranged with the Member States involved. With regard to the second category of special activities, Member States would ask for an activity to be undertaken and the General Conference would decide on the allocation of funds.

(34) Mr. SILLER (Mexico) thought that the special activities should be planned and carried out on a regional basis, so that they would benefit, not one country alone, but a whole region; that remark applied alike to activities requested by Member States and to those initiated by the Secretariat. The regional offices could play an important part in that respect. Technical aid should not be the responsibility of Unesco alone; for every sum contributed by the Organization, a corresponding amount should be paid by the Member States or States benefiting from the project. Thus, if such activities were organized on a regional basis, it would be much easier to finance them, because many Member States would be helping to carry them out.

(35) Mr. JUNANKAR (India), referring to the emphasis which the delegate of Mexico had put on the fact that the programme should serve the general needs of the various regions, thought that it was desirable to mention that special activities were directed to broad targets. Unesco should concentrate on reaching those targets.

(36) Mr COWELL (United Kingdom) thought that this section was weak, because no examples were given as to the nature of the special activities referred to. The Executive Board had left the decisions to the General Conference and, in his opinion, it would be extremely difficult for the General Conference to make those decisions. He thought the matter of sufficient importance to suggest the setting up of a working party to study the problem more carefully. Unless a careful study were made, the General Conference would make vague decisions which would not provide sufficient guidance to the Director-General in planning the programme for 1957-58.

(37) Mr. LEE (United States of America) agreed with the remarks made by the delegate of the United Kingdom. He doubted whether the General Conference was competent to provide sufficiently concrete guidance for the Director-General. Referring to the problem of regionalism, he recalled that a working party had been set up to study the problems arising out of decentralization. The Committee should decide what it wanted. Regionalism covered some of the problems which had arisen but not all of them. The arid zone scheme, for example, was a special project which dealt with problems met in many areas. Flexibility was essential. He asked whether the Committee was prepared to set up a procedure for selecting the activities for Section II of the programme and to set up a time-table for carrying out those activities.

(38) Mr. MAHEU (Assistant Director-General) said that the difference between activities undertaken on Unesco's initiative and those undertaken at the request of Member States might be illustrated by an example. For five years Unesco had been carrying out a pilot project concerning the Delhi Public Library,

with the consent and co-operation of the Indian Government. That experiment had been undertaken at Unesco's proposal, while the Organization had received requests from several Member States for help in developing their public libraries.

(39) With regard to the Mexican delegate's suggestions, Mr. Maheu did not think it essential to take the criterion of regionalism as a basis in defining activities undertaken on Unesco's initiative. It would even be regrettable if that were the sole criterion. Sometimes Unesco attacked universal problems - cancer, for example - and if regional projects only were to be retained, many activities would have to be eliminated, especially in the scientific field. Besides, certain Member States were as large as whole regions so that a project undertaken there on a national scale would be typical enough to have a regional interest and to be transposed to other countries of the same category.

(40) The Secretariat preferred the idea of category of country rather than of region. There were problems common to countries of different regions - arid zone problems, for instance. It might happen that countries belonging to a certain category from the point of view of a particular problem were situated in the same region, but that was not a general or necessary rule.

(41) Mr. JUNANKAR (India) thought there was some misunderstanding of the meaning of "regional approach". No universal problem could be localized and no local problem could be made universal. It was impossible to deal with all problems on a regional basis. Unesco's programme emphasized the activities suitable for and important to particular regions, and should secure a balance between the special activities and a suitable programme in the various parts of the world. A regional programme need not necessarily meet the requirements of the region as such, as long as it implemented the overall aspirations of the region. The implementation of a project in any region should not detract from the universality of the problem which had necessitated its undertaking.

(42) Mr. PANNETON (Canada) had been keenly interested by the remarks of the delegate of India, but he thought it best not to generalize too much. Even examples might be misleading; cancer was perhaps an unfortunate choice. It was obvious that a problem like that of the arid zones was of no interest whatever to certain countries and regions. On the other hand, Mr. Panneton noticed that fairly detailed explanations were given on the subject of general activities (paragraphs 23 et seq.), whereas there was very little information on special activities. He was afraid that the Conference might blame the Committee for having failed to give the necessary details on that point.

(43) Mr. SILLER (Mexico) wished to clarify his earlier remarks. As far as activities requested by Member States were concerned, he was of opinion that priority should be given to those of benefit to several Member States. He agreed with the remarks made by the Assistant Director-General, because it was obvious that there were projects, such as those relating to cancer and oceanography, which could not considered regional ones. Unesco's funds were limited and they should be spent, as far as possible, on projects from which several Member States would benefit. Moreover, in that way, international co-operation would be advanced.

(44) The CHAIRMAN wondered whether it would be proper to include examples in the report. The draft had originally included examples and the Executive Board had decided to delete them. If the Committee thought that it was advisable to include examples, now was the time to do so.

(45) Mr. COWELL (United Kingdom) thought that only a body representative of all the Member States was competent to deal with the plan contemplated in document 8C/PRG/13. He proposed that the Committee should in its report to the Programme Commission express its opinion that the General Conference should indicate to the Director-General, with a model, how the programme should work and suggest activities which should be undertaken. The Committee should point out to the Programme Commission the need for amplification of its discussion.

(46) Mr. ABDEL-RAHMAN (Egypt) thought that the guiding principle for clarification by the General Conference should be to see what was meant by the two categories of special activities. Once that was clarified, it would be easier to settle on criteria.

(47) Mr. MAHEU (Assistant Director-General) pointed out that there was in each chapter of the draft programme a clear distinction between the two main sections. In Section II, moreover, activities under the heading of "Technical Aid to Member States" were always covered by a special resolution.

Special activities initiated by the Organization: paragraphs 44-47

(48) No comments.

Need for progressive concentration on major projects: paragraphs 48-60

(49) No comments.

(50) The CHAIRMAN thought that, if the Committee agreed to recommend this document to the General Conference, it would be appropriate to mention various points brought out in the discussion. In the first place, the Committee conceived the projects, not as specialized, but as continuing through the programme. Secondly, such projects should allow for specific planning by the Secretariat with regard to timing, place and results. Thirdly, such projects should be of a nature to permit the achieving of practical results within a given time in a given area. The Committee would have to decide to what extent it should help the Programme Commission in outlining the procedure whereby the contemplated subjects were to be included in the programme for 1957-58. The Committee could not do that itself, but could suggest that the Programme Commission undertake the work or refer it back to the Committee after discussion or that a special

working party be set up to study the problems involved.

(51) Mr. CABOUAT (France) thought it would be worth mentioning in the Committee's report that attention had been paid to the choice of big projects. He did not think it necessary, however, for the Committee to make any definite suggestion to the General Conference on that point. The Committee was too small a body, and its proposals might incur the disapproval of delegations not represented on it.
(52) With regard to paragraphs 53, 57 and 60 of the document, it would perhaps be good to emphasize the Committee's interest in the possibility of establishing a United Nations Educational Development Fund. The existence of such a fund would certainly solve many problems. The financial limits imposed on the Organization should, however, be made perfectly clear.

(53) The CHAIRMAN reminded the meeting that no decision had been taken on that subject (see 8C/BUD/SR.21).

(54) Mr. JUNANKAR (India) thought that the suggestion made by the French delegate - that the attention of the Programme Commission should be drawn to the United Nations Education Fund and other funds - was interesting and he thought that reference might also be made to the assistance some Member States had extended to other countries. In his opinion, while such assistance was useful, assistance through the United Nations was preferable, as no conditions would be attached, and there would be no political issues raised. He hoped that, in the future, international organizations would take over increasingly the task of channelling international assistance and that Unesco would be able to draw on international funds for its requirements.

(55) Mr. LEE (United States of America) had hoped that the question of financing would not be raised because the Committee was not in a position to do much about it. He suggested that the Committee could approve the report as contained in document 8C/PRG/13 irrespective of whether there was an increase in funds or not and could make a decision on what to report to the Programme and Administrative Commissions. He disagreed with the delegate of France that recommendations should be made as to how the Commissions should proceed. He proposed that the Committee report on the following lines:

"The Advisory Committee has examined the report of the Executive Board on the remodelling of the future programme (document 8C/PRG/13). The Committee wishes to commend the spirit of the report, approve the direction of the changes there proposed, and recommend to the Commissions of the Conference that they formulate and adopt the necessary measures to implement the principles of the report at the earliest possible date. The Committee recommends that the Commissions, either through working parties of their own or through the Advisory Committee, establish procedures, criteria and schedules whereby major projects can be selected. The Committee further recommends that,using the same mechanism, the Commissions formulate appropriate instructions to the Director-General in order that he may draw up definite plans in 1955-56. Finally, in the same way, the Commissions should prepare budget and programme instructions which will authorize the Director-General to present a remodelled programme for 1957-58".
(56) He thought that, by making such a recommendation, the Committee would not only express the fact that the report had been examined and approved in general terms, but would indicate that it was aware of problems with regard to the selection and planning of projects which it was not competent to decide.

(57) The CHAIRMAN thanked the delegate of the United States of America for his helpful suggestion and suggested that, in its report, the Committee could perhaps reproduce the general discussion which had taken place, giving an indication of what it considered should be the criteria for selecting projects and ending up along the lines proposed by the delegate of the United States of America.

(58) Mr. COWELL (United Kingdom) supported the plan of action proposed by the Chairman. The Committee was endorsing the main principles of the document without endorsing every detail it contained. He asked whether it would be possible for the Committee to hold another meeting to consider its report.

Paragraphs 62 and 68

(59) Mr. CABOUAT (France) wanted particularly to to back to paragraphs 62 and 68, on which several delegates had spoken. He recalled that Mr. Maheu had insisted on the fundamental unity of the two broad categories of activities, while pointing out the danger of setting one up against the other. The two paragraphs in question might, however, cause some confusion. Mr. Cabouat thought that it would be difficult to recommend a priori that the funds reserved for the second category should always be appreciably larger than those reserved for the first. The percentages given were valid for the budget as a whole, but, when examining the programme in detail,projects might be found requiring more than one-third of the funds for permanent services. It was, therefore, impossible to recommend "that, in future, a greater part of the ordinary budget be set aside" for activities of the second category. It would be better to leave it to the Director-General to decide what proportion to allow in each particular case.

(60) Mr. FLORKIN (Belgium) suggested that the last sentence of paragraph 62 be amended as follows: "..... recommends that, in future, larger sums be set aside to provide such services to Member States".

(61) Mr. ABDEL-RAHMAN (Egypt) thought that the Committee should endorse the contents of the document in general terms. It was not competent to discuss it in detail.

(62) Sir Ronald ADAM (Chairman of the Executive Board) said that the Executive Board had been of the same opinion. He pointed out that the proportional sum was not definite. He hoped, however, that the continuing activities would not require more money,

and that the special activities would benefit from any money left over. If the proportion were altered, the effect would be to take away money from the special activities.

(63) Mr. LEE (United States of America) remarked that the figures in the report reflected the situation in 1955-56. If that proportion were accepted, the figures would guide the Director-General in planning the programme for 1957-58. In his opinion, the continuing activities would not suffer much unless more stringent proportions were adopted. He would agree to recommend the report to the General Conference in general terms.

(64) Mr. SOMMERFELT (Norway) supported the Belgian proposal. By inserting a condition, it would mean that, if the budget were increased, then the greater part of the increase would be used for special activities.

(65) Mr. AVIDOR (Israel) pointed out that special activities did not necessarily mean aid to Member States. The Chairman of the Executive Board had said that only 10% of the total budget was used for that purpose. He thought that the paragraphs were mild and would involve no change.

(66) Mr. MAHEU (Assistant Director-General) stated that the Director-General at present interpreted the sentence to mean that the budget of Section I would be stabilized at the existing level, if the budget could be increased, any additional funds would be allotted to Section II, whether for activities undertaken on Unesco's initiative, or for technical aid to Member States.

(67) Mr. ABDEL-RAHMAN (Egypt) asked whether the Committee foresaw no changes in continuing activities, but only for special activities. Had the Committee decided that this division should be made?

(68) The CHAIRMAN replied that the Committee agreed that Unesco's programme for special activities should have augmented resources.

(69) Mr. ABDEL-RAHMAN (Egypt) did not think that the Committee was implying that Section I of the programme should be fixed. If there were a cut in the budget, did the Committee intend that the cut should be spread over the two Sections?

(70) Sir Ronald ADAM (Chairman of the Executive Board) said that the Board had been anxious that as little money as possible should be spent inside Unesco and as much as possible on outside activities in the future.

(71) Mr. COWELL (United Kingdom) pointed out that, if continuing activities diminished, money would be set free. If the Belgian proposal were adopted, Unesco would be forced to spend that money on similar activities, and not on special activities.

(72) Mr. FLORKIN (Belgium) explained that the purpose of his amendment, which applied to the programme for 1957-58, was to avoid a reduction in general activities in favour of special activities, and at the same time to clarify the remarks made by the Chairman of the Executive Board.

(73) Mr. JUNANKAR (India) pointed out that the Committee was considering remodelling the programme, and it must, therefore, decide to devote more money to Section II. At the present stage, 10% of the total budget was being used in direct aid to Member States and it had been felt that Unesco should spend more, directly and indirectly, on Member States. The Belgian amendment would destroy the purpose for which the programme was being remodelled.

(74) Mr. MAHEU (Assistant Director-General) wished to point out that the whole purpose of Section II of the programme, which represented 67.5% of the budget, was to provide services to Member States. To take an example, it was obvious that the Delhi Public Library project, though initiated by Unesco, was nevertheless to India's advantage. The aforesaid 10% merely represented activities undertaken at the request of Member States.

(75) Mr. LEE (United States of America) remarked that the Committee was not discussing a constitutional document but a report, and suggested that the spirit of the report was such that no one would wish to cripple the continuing activities in such a way that aid to Member States would be affected. He was prepared to leave the text as it stood.

(76) Mr. ABDEL-RAHMAN (Egypt) supported the United States delegate. He thought that, once the Belgian amendment was accepted, the figures contained in the report would be fixed. It was important to leave those figures flexible in order to have freedom of action.

(77) Mr. PANNETON (Canada) thought that the text under discussion merely drew attention to the present state of affairs.

(78) Mr. CABOUAT (France) observed that, according to a previous statement by the Director-General, the present continuing services were in a position to develop special activities without being expanded. The French delegation was against including any idea of stabilizing the permanent services in the directives which the Conference was to give the Director-General; his hands should not be tied by placing, in advance, a limit on the funds to be expended for the permanent services.

(79) With regard to paragraph 62, the French delegation hoped that the distinction between appropriations for Section I of the programme and those for Section II would not be drawn too sharply.

(80) The CHAIRMAN put the amendment of the delegate of Belgium, seconded by Mr. SOMMERFELT (Norway), to the vote.

(81) The motion was rejected by 8 votes to 3, with 1 abstention.

(82) Mr. ABDEL-RAHMAN (Egypt) suggested that, after the Director-General had remodelled the programme, improvements in the methods of implementing it should be studied.

(83) The CHAIRMAN asked whether Mr. Abdel-Rahman would raise this matter in the Programme Commission, as that Commission was in a position to give directives.

The meeting rose at 6.10 p.m.

# TWENTY - FOURTH MEETING

*15 November 1954 at 9 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**DRAFT REPORT OF THE ADVISORY COMMITTEE ON PROGRAMME AND BUDGET** (document 8C/BUD/1 (prov.))

(1) Mr. SOMMERFELT (Norway) referred to the final report of the Expert Committee on Education for International Understanding (document 8C/DIV/80) and regretted that it had not been available to the Committee during its examination of the programme and budget. The Expert Committee, which had been attended by important Unesco officials, had discussed the programme in detail and made valuable suggestions, and it would be unfortunate if no use were made of its work.

(2) The CHAIRMAN said that the Secretariat had explained that it had not been possible to issue the report in time for submission to the Committee. It would be difficult at the present juncture to examine the report in detail, but the Norwegian delegate could propose that it be mentioned under the section on education.

(3) Mr. SOMMERFELT (Norway) pointed out that the report had a bearing on other departments as well as the Department of Education.

(4) It was agreed that appropriate references should be made under the relevant sections of the Committee's report.

(5) Mr. MAHEU (Assistant Director-General) explained that the document just referred to by the Norwegian delegate was being translated and reproduced at the moment; without expressing a definite opinion the Committee might, in the introduction to the report, draw the Commission's attention to it after the paragraph dealing with fundamental education; he assured Mr. Sommerfelt that the excellent work that had been done in Paris would not be shelved.

(6) Mr. CABOUAT (Rapporteur), submitting the draft report, pointed out that it had been drawn up in great haste, and that, owing to lack of time, it had not been revised as thoroughly and attentively as could be desired. He craved the Committee's indulgence for a number of mistakes which had occurred as a result. He wished to thank the Secretariat publicly for their invaluable help in completing his work.

(7) Mr. Cabouat had sought to produce a comprehensive report, including all the Committee's recommendations and comments. In the introduction, he had explained the Committee's working methods, and its interpretation of priorities, the higher budgetary level, and the present budgetary level. A definition of the four categories into which the projects had been grouped was given on page 3. The Committee's recommendations regarding the draft resolutions put forward by Member States were shown at the end of the relevant chapters. The Chairman of the Committee intended to suggest to the Programme Commission that it might be advisable to adopt a similar method when discussing those draft resolutions. The recommendations concerning fundamental education had been placed immediately after the chapter on education. Chapter 7 contained the general resolutions, and was followed by a chapter on the Documents and Publications Service. General Administration was dealt with in Part III and Common Service Costs in Part IV. The Conclusion contained general comments and the results of the Committee's proceedings, together with the figures that its recommendations would represent. The Report then stated that the Committee felt that the proposed programme and budget submitted by the Director-General formed, as a whole, a well-balanced body of activities, and fulfilled the double requisite of maintaining the continuity of the Organization's activities and satisfying the wish, repeatedly expressed by the General Conference, for a gradual concentration of those activities. There followed a number of comments on the administrative organization of the Secretariat and, finally, two recommendations to the Programme and Budget Commission, suggesting that the Commission, at the outset of its work, set up two working parties, to consider the administrative structure of the Department of Mass Communication and all problems connected with the decentralization of the Organization's activities.

(8) The CHAIRMAN invited comment on the Introduction.

(9) Mr. ABDEL-RAHMAN (Egypt), referring to page 3, suggested that it would be simpler to refer to the projects in category 3 as being of low priority.

(10) The CHAIRMAN explained that in formulating category 3 it had been necessary to find a phrase suitable for both the French and English texts. It was difficult to find a French equivalent for "low priority".

(11) Mr. ABDEL-RAHMAN (Egypt) maintained his suggestion, which applied also to other parts of both the Introduction and the Conclusion.

(12) It was agreed that the Committee should take note of the Egyptian delegate's remarks.

(13) Mr. COWELL (United Kingdom) said that category 3 evidently referred to items which would have been excluded from the normal programme, if the budget had been divided into an ordinary and a higher level, as had originally been intended. He agreed with the views of the Egyptian delegate.
(14) With regard to category 4, he proposed that projects should be sub-divided into two categories: those to be rejected and those that were referred to the Director-General to be considered for the 1957-58 programme.

(15) Mr. CABOUAT (Rapporteur), referring to the Egyptian delegate's first remark, said he had difficulty in grasping the distinction between the idea of "low priority", and that contained in the explanation of category 3, covering projects which could be approved only in so far as the funds made available to the Organization exceeded the appropriations required to operate the first two categories of projects.
(16) With reference to the United Kingdom delegate's comment on category 4, provision had been made for the Committee to recommend that the Director-General consider certain projects for the 1957-58 programme.

(17) The CHAIRMAN said that, if he interpreted correctly the remarks of the United Kingdom delegate, they implied that, had the Director-General divided projects into present and higher level, those under category 3 would have appeared in the higher level, and the existing description of category 3 projects covered the situation adequately.

(18) Mr. PANNETON (Canada) understood that the Committee's work had been complicated by the fact that no tentative priorities had been assigned in the documents which it had to examine. In accordance with views expressed by his own and other delegations, he proposed that the following statement should be included in the Committee's report:

"The Committee recommends that, when the 1957-58 programme and budget is prepared, tentative priorities should be allocated to each project and each activity in the programme in order that the next General Conference may be in a better position to evaluate the programme in terms of the funds available for its implementation".

(19) Mr. COWELL (United Kingdom) seconded the proposal.

(20) Mr. MAHEU (Assistant Director-General) felt that the proposal was so important that he wondered whether the Introduction to the report was really the place for it. He considered that it would be better placed in a special document, for adoption by the General Conference, dealing with the preparation of the 1957-58 programme, or at least in the Conclusion to the report, so as to draw the Commission's attention to its importance. He also thought that the Director-General would find some difficulty in acting on the substance of the proposal, since the term "priority" had no meaning except in a budgetary context. In view of the extent of Unesco's responsibilities and the order of priorities adopted by the Economic and Social Council and the General Conference itself, the Director-General might, thinking purely in terms of the programme, devise an entirely "priority" programme. If the . the General Conference wished to act on that proposal, it should give some indication of the budgetary framework it wanted; it was because the notion of higher and present budgetary levels had not been defined that the Director-General had been unable to work out a system of priorities in the present draft programme.

(21) The CHAIRMAN assumed that the delegate of Canada did not share the views of the Assistant Director-General, but was proposing that the Director-General should start by setting up projects which he considered desirable under the existing budgetary level, and then list in decreasing grades of priority projects whose implementation would be within Unesco's programme policy at various potential levels of increased budget. There would thus be high priority projects under the present budget level and projects of decreasing priority at progressively higher budget levels.

(22) Mr. PANNETON (Canada) said that the Chairman had correctly interpreted his proposal. He did not see how the Committee, with only ten days in which to accomplish its work, could assign priorities where the Secretariat had been unable to do so in a period of six months or a year.

(23) Mr. AVIDOR (Israel) opposed the Canadian delegate's proposal. In his view, the Secretariat, when preparing the programme, ought only to include the important items; lower priorities should not appear at all. Instead of presenting the Conference with a programme divided into a part which could be implemented under the anticipated budget and a part, equally important, which could be implemented if additional funds were provided, the Secretariat should submit a complete programme of important projects and leave it to the Conference to assign priorities if the budget voted were not adequate for the whole.

(24) Mr. LEE (United States of America) proposed that the Committee should concentrate on preparing a satisfactory report of its work during the past two weeks and avoid as far as possible reopening questions which had already been settled. There had been much discussion of priorities and dissatisfaction about the presentation of high and low levels. It would be reasonable to indicate in the report that there had been considerable dissatisfaction over the lack of a system of priorities: that, he understood, was the gist of the Canadian delegate's proposal.

(25) Mr. PANNETON (Canada), in reply to a question from the CHAIRMAN, said that he maintained his proposal but would not object to it being modified.

(26) Mr. COWELL (United Kingdom) said that,

unless there were a distinction between projects, there would be no point in having a budget at two levels.

(27) The CHAIRMAN said that such a comment could only be addressed to the Director-General.

(28) Mr. MAHEU (Assistant Director-General) stated that the Israeli delegate's remark was in line with his own ideas. The Director-General's attitude might not be the only one possible, but it was perfectly justifiable: with ten million dollars, he could draw up a good programme, but the same held good for a fourteen-million dollar programme, without implying that whatever was added in the second case would necessarily be less good. Equally well-devised programmes might be based on different budgets. The Assistant Director-General thought, however, that there was no point in reopening a question which the Committee had discussed at great length when it had first set to work, and he asked the Canadian delegate if his purpose would not be better served by a resolution looking forward to the future, and giving the Director-General clear directives, rather than by one deprecating the past, which might very possibly create an atmosphere inimical to constructive debate.

(29) The CHAIRMAN agreed with the Assistant Director-General that the report should be directed to the future rather than to the past, but did not understand the suggestion that projects under the higher budgetary level were of less value than those under the normal level.

(30) Mr. PANNETON (Canada) said that his proposal did refer to the future. Its object was to facilitate the work of the Committee at future conferences.

(31) Mr. AVIDOR (Israel) said that the Canadian delegate's proposal assumed that there would be two budgetary levels, whereas the Committee had rejected that procedure. The Committee had to decide on the priorities of projects presented to it and, judging from experience over the past ten days, the proposal would not help the Committee in its work.

(32) The CHAIRMAN asked whether the Committee would agree to discuss the proposal when the Appropriation Resolution came up for consideration. It would be a suitable time, since approval of that resolution involved a decision on the form of the future budget.

(33) Mr. FLORKIN (Belgium) supported the suggestion.

(34) Agreeing with that suggestion, Mr. MAHEU (Assistant Director-General) thought that the Canadian delegate's proposal might even appear in the Conclusion to the report, as a recommendation that the Commission give some indication of priorities when deciding on the form of the draft programme and budget for 1957-58.

(35) Mr. COWELL (United Kingdom) pointed out that, unless action of the kind proposed by the delegate of Canada were taken, future conferences would be faced with the same difficulty as past ones, namely the task of rearranging the budget at the last minute to meet a reduced budgetary ceiling. The Canadian delegate's proposal was intended to avoid such a situation, but there were other methods of achieving the same end. Governmental representation on the Executive Board, for example, would no doubt go a long way towards solving difficulties. A decision would have to be taken on the form of the budget, but he was willing to see it postponed to a later stage in the discussion.

(36) The CHAIRMAN asked for a decision at the present juncture: either to vote on the Canadian delegate's proposal or to accept the Assistant Director-General's suggestion that an additional paragraph be inserted in the report giving the substance of that proposal and asking the Programme and Budget Commission to bear it in mind when preparing the Appropriation Resolution for 1955-56 on the form of the future programme and budget.

(37) The proposal of the delegate of Canada was put to the vote and rejected by 4 votes to 6 with no abstentions.

(38) In reply to the delegate of the United Kingdom, who wished to see the vote included in the report, the CHAIRMAN said that it could only be included with the Committee's approval.

(39) Miss LAISE (United States of America) said that paragraphs 7, 8 and 9 of the Introduction did not, to her understanding, correctly describe what had taken place in the Committee. They implied that the Committee had accepted the Director-General's interpretation of "higher budgetary level" and "present budgetary level" and they made no mention of the divergence of opinion among delegates.

(40) The CHAIRMAN asked whether the United States delegate would agree to the addition, possibly after paragraph 9, of a statement to the effect that the Committee had considered the question of interpretation in relation to future programmes and budgets and of a record of the vote on the Canadian delegate's proposal.

(41) Miss LAISE (United States of America) said that mention should be made of the difference of opinion regarding the presentation of the programme and budget.

(42) Mr. MAHEU (Assistant Director-General) thought that the United States delegate's request that mention be made, in paragraph 9, of the divergence of opinion among the members of the Committee, was justified, providing that it was added that, as the views of the dissentient members were not shared by the majority, the Committee had not felt obliged to set out any views other than the majority views.

(43) Mr. CABOUAT (Rapporteur) remarked that it was not customary to mention in a Committee's report views which had not been accepted by the majority; it would, however, be possible to insert a paragraph covering the point in the supplementary report on the remodelling of the Organization's future programme, mentioned in the last paragraph of the Conclusion.

(44) Mr. AVIDOR (Israel) pointed out that paragraphs 7, 8 and 9 referred to the examination of the programme and budget for 1955-56, which involved the question of priorities, whereas the Canadian delegate's proposal related to the period 1957-58, for which priorities had been rejected. A record of the proposal under paragraph 9 would therefore be inappropriate.

(45) Following an explanatory remark by the CHAIRMAN, Miss LAISE (United States of America) said that her delegation was not concerned with the discussion of the interpretation of higher and present budgetary levels. What she wished to see in the report was an indication that, since the Director-General saw the programme as a whole, attaching equal importance to projects under both levels, the Committee considered that it had the responsibility of reviewing the programme and, in order to facilitate the work of the Conference, of expressing an opinion on priorities wherever possible.

(46) The CHAIRMAN proposed in order to meet the wishes of the United States delegate, to place paragraphs 7 and 8 after paragraph 9.

(47) It was so agreed.

(48) Mr. CABOUAT (Rapporteur) suggested inserting a brief reference to budgetary standards in paragraph 4, since the Committee had observed improvement in that respect and thought that, as a whole, budgetary implications had been much better calculated than in the past.

(49) The suggestion was approved.

(50) Mr. COWELL (United Kingdom) proposed the deletion of the words: "but without, in most cases, making any definite suggestion for amendment" in paragraph 10.

(51) The CHAIRMAN read out the French text, which was clearer than the English. He recalled that the Committee had tried to avoid redrafting proposals submitted by Member States.

(52) Mr. COWELL (United Kingdom) gave several instances where the Committee had recommended the non-adoption of proposals and said that rejection of a proposal was a drastic form of amendment.

(53) Mr. CABOUAT (Rapporteur) explained that, in his view, the phrase should be taken to mean that the Committee had concentrated on the substance rather than the form of projects; he added that there had been few amendments to proposals put forward, since as a rule the Committee had proposed either that the projects submitted be adopted or that they be rejected or inserted in future programmes.

(54) The CHAIRMAN proposed that the phrase in question be amended to read: "without in most cases attempting to modify the substance of or redraft the proposals".

(55) Mr. COWELL (United Kingdom) said that some change in the phraseology was necessary. He was also dissatisfied with the words "accompanied by an explanatory statement" in the same paragraph as being too vague.

(56) The CHAIRMAN pointed out that the difficulty was due to translation, which had been done under great pressure of time.

(57) It was agreed that the words would be redrafted by the Rapporteur.

(58) Mr. COWELL (United Kingdom), referring to paragraph 13, said that according to his recollection the Committee had made a specific recommendation on the time limit for receipt of proposals from Member Governments for presentation to the General Conference.

(59) The CHAIRMAN recalled that the suggestion had been his own, and he had had in mind a time limit of not less than six weeks in advance of the opening of the General Conference.

(60) It was agreed that the paragraph should be amended.

(61) Miss LAISE (United States of America) thought that paragraph 4 should be drafted in more restrained terms, and proposed that the second half of the second sentence should be amended to read: ".... document 8C/5 was an improvement on reports of previous years because of the concise and lucid way in which it had been drafted", and omit the last sentence.

(62) With regard to paragraph 5, a substantive point had been omitted and she proposed that the following phrase should be added to the end: "but taking into account the Executive Board's recommendation for a remodelled programme and the fact that the proposals of the Director-General constitute a transition towards such a programme".

(63) Mr. MAHEU (Assistant Director-General) said that the Secretariat agreed that all superlatives should be deleted, especially any unsolicited testimonials to its work.

(64) Mr. Maheu asked whether the delegate of the United States of America desired an addition to paragraph 5 or an additional separate paragraph.

(65) On the proposal of the CHAIRMAN it was agreed to include the substance of the United States delegate's proposal in an additional paragraph.

(66) Mr. MAHEU (Assistant Director-General) thought that, from the drafting point of view, it would be better to embody the United States delegate's proposal in a separate paragraph. Paragraph 5 was strictly concerned with the budget, whereas her suggestion concerned the preparation of the future programme, which was to be dealt with by the Committee in a supplementary report; a new paragraph should accordingly be inserted.

(67) Mr. CABOUAT (Rapporteur) referred to the first remark of the delegate of the United States of America, recalling that the Committee had unanimously agreed that the new arrangement of the programme was a substantial improvement. He did not think that he had gone further than what had been said in the meeting, but was quite prepared to delete the superlatives.

(68) With regard to paragraph 5, he considered that a further sentence might more appropriately be added to paragraph 7 of the Conclusion, which mentioned the trend towards a better balance and concentration of the programme. Miss Laise's comment might also be inserted in the Committee's supplementary report, instead of after paragraph 5 in the Introduction.

(69) Miss LAISE (United States of America) said that the words which she wished inserted represented not a conclusion of the Committee, but the underlying assumption on which it had undertaken the review of the programme and budget. She would therefore prefer to see them in the Introduction.

(70) The proposal was seconded by the United Kingdom delegate and adopted.

(71) Mr. MAHEU (Assistant Director-General) proposed that the reference to the Final Report of the Expert Committee on Education for International Understanding and Co-operation, requested by the delegate of Norway, should be included after paragraph 6.

(72) Agreed.

PART I – GENERAL POLICY

CHAPTER 1 – GENERAL CONFERENCE

(73) Mr. AVIDOR (Israel) pointed out that, although it was stated in Chapter I that the Committee had taken no decision on the seat of the ninth session of the Conference, a decision was recorded in the Conclusion.

(74) It was agreed that the report would be suitably amended.

(75) Mr. CABOUAT (Rapporteur) pointed out that two different questions were involved. There was a recommendation that the General Conference accept India's invitation to hold its ninth session at New Delhi (a question of principle), but the reference in Chapter I was simply to a detailed examination of the budget estimates, which the Committee had felt to be useless until the General Conference had decided on the principle.

(76) Mr. AVIDOR (Israel) proposed a reference in the report to the effect that, while the Committee had decided to recommend in principle that the seat of the next General Conference should be New Delhi, it had not been possible, for the reasons stated, to examine the details.

(77) Mr. MAHEU (Assistant Director-General) remarked that paragraph 6 of the Conclusion contained a recommendation by the Committee that the General Conference accept the Indian Government's invitation, coupled with a statement of the financial implications. He thought the Israeli delegate's proposal was justified and it might be advisable to transfer those remarks to Part I, Chapter 1 (General Conference), since, although the appropriations proposed by the Director-General had not been examined in detail, the proposal that the ninth session be held in India would involve considerably more expenditure.

(78) Mr. CABOUAT (Rapporteur) concurred, provided that the statements in paragraph 6 of the Conclusion were allowed to stand as part of the general summing up.

PART II – PROGRAMME OPERATIONS AND SERVICES

CHAPTER 1 – EDUCATION

(79) Miss LAISE (United States of America) said that there should be a reference to the emphasis on the extension of education which had emerged from the discussions.

(80) Mr. ELVIN (Director, Department of Education) said that he had had the same thought. He proposed that the second paragraph should be amended to read:

"Projects concerning fundamental education and the extension of school education are and should remain at the very core of the Organization's work in connexion with education and should be oriented towards improving international understanding".

(81) It was so agreed.

(82) On the proposal of Mr. AVIDOR (Israel), it was agreed to change the word "teachers" in paragraph (137), line 4, to "educators".

(83) Mr. COWELL (United Kingdom) said that paragraph (137) gave the impression that the major part of the Conference on Public Education had been devoted to reports, whereas the Committee's criticism had been that reports took a long time to deal with. It had been explained that much time would be saved in future by the use of simultaneous interpretation.

(84) Mr. ELVIN (Director, Department of Education) said that his understanding of the Committee's views

was that, although the major part of the time in the past had been devoted to reports, it was hoped that in future any increase in time would be given to educational problems rather than to reports.

(85) Mr. LEE (United States of America) asked for an explanation of paragraph (143): International Educational Development Fund.

(86) The CHAIRMAN recalled that it had been agreed to postpone the item until two recommendations had been prepared and distributed by the Director-General. The proposals were now before the Committee and a substantive discussion was necessary before the paragraph could be approved.

(87) Mr. MAHEU (Assistant Director-General) stated that the Secretariat had prepared two draft resolutions, one of a restricted, the other of a more general character, defining the Organization's policy on the question. In the third section of the draft resolution, the Secretariat had endeavoured to draw the attention of the General Conference to the financial difficulties confronting certain Member States in the promotion of free and compulsory primary education. The Secretariat was asking for authority to take up the problem for later consideration, if certain projects submitted to the United Nations failed to materialize. The last part of the draft resolution easily gives rise to protracted discussions and, in any case, the question would be very fully covered by the Programme Commission. Moreover, the proposal referred to in the third section was at the moment under discussion by the United Nations General Assembly; after two weeks of debate, a number of delegations had agreed on a comprehensive text, which was just about to be put to the vote by the General Assembly. For all those reasons, although it was not withdrawing its draft, the Secretariat thought it would be better for the delegations to take the initiative of presenting it, and that the Committee would accordingly deem it advisable not to take a decision on the third section, but merely to point out to the Conference how important the problem was. In conclusion, the Assistant Director-General proposed that the third section of the draft resolution be separated from the rest; the Committee might, if necessary, adopt the first two sections.

(88) The CHAIRMAN asked whether the Committee would agree to limit discussion to the first and second paragraphs in an effort to approve them for transmission to the Programme and Budget Commission.

(89) Mr. JUNANKAR (India) supported the Chairman's proposal but asked for the inclusion of a statement to the effect that the Committee suggested that the Programme and Budget Commission should adopt a suitable resolution on the subject.

(90) The CHAIRMAN said that the Committee could, if it desired, recommend the adoption of the resolution (paragraph 2 of (143)) by the Programme and Budget Commission, but it would be unwise to do so without first studying the resolution.

(91) Mr. AVIDOR (Israel) proposed substituting the following phrase for the first three words of line 3 of the second paragraph: "a suitable resolution".

(92) The CHAIRMAN insisted that there must be a substantive discussion if the Committee wished to make any recommendation.

(93) Mr. COWELL (United Kingdom) agreed with the Chairman and proposed that discussion be deferred.

(94) Mr. PANNETON (Canada) supported the two previous speakers.

(95) Mr. SILLER (Mexico) agreed with the views of the United Kingdom delegate, but suggested that the phrase "in underdeveloped areas" be deleted from paragraph (143); the rest should stand, as it summed up the idea which had suggested the creation of the Fund.

(96) Mr. JUNANKAR (India) said that his proposal was not substantive. A decision would have to be taken, but it could be left to the Programme and Budget Commission.

(97) It was agreed to refer the item to the Programme and Budget Commission for appropriate action.

(98) Mr. ELVIN (Director, Department of Education) could not understand the connexion between the two parts of the second sentence of paragraph (147) or the significance of the initial word "Although".

(99) Mr. CABOUAT (Rapporteur) said that the idea behind the second sentence in that paragraph was that, after discussing the advisability of holding a regional Conference on free and compulsory education, the Committee had decided to let the Director-General's proposal for a Conference in 1956 stand, while at the same time emphasizing the need to bear in mind the financial difficulties facing the Member States in question, and consequently not to divorce the study of the technical aspects of the problem from that of the financial aspects.

(100) Mr. ELVIN (Director, Department of Education), after an explanation by the CHAIRMAN, still considered the sentence confusing and proposed that it be divided into two.

(101) Mr. LEE (United States of America) asked for a clarification of the action which had been decided in respect of paragraph (143).

(102) The CHAIRMAN explained that the Committee, realizing that paragraph (143) had wider implications than the establishment of an International Educational Development Fund, had asked the Director-General to draft an appropriate

resolution. That resolution was now being referred to the Programme and Budget Commission with a recommendation that the Commission should take appropriate action.

(103) Mr. MAHEU (Assistant Director-General) suggested preceding the title of project (143) (International Educational Development Fund) by a more general title, such as "Policy for the development of free and compulsory education"; that could be followed by the first two sections of the draft resolution, then by the first paragraph appearing in the report under (143), followed again by a further paragraph to the effect that, in view of the importance of the question, the Committee referred it to the Programme Commission for such action as the latter might deem fit.

(104) Mr. COWELL (United Kingdom) thought that a reference should be made to the Director-General's statement to the United Nations.

(105) The CHAIRMAN said that the point would be included in the Committee's report.

(106) Mr. LEE (United States of America) expressed himself satisfied with the Assistant Director-General's explanation.
(107) He said that paragraph (147) did not adequately cover the discussions that had taken place in the Committee, in particular the need for activities by Unesco to enable Member States to help themselves.

(108) It was agreed that a suitable reference would be included in the report.

(109) Mr. COWELL (United Kingdom) considered that paragraph (147) did not summarize the discussions in 8C/BUD/SR.3, in which mention was made of his own suggestion that Regional Conferences should not be held at such short intervals: it had been agreed that reference should be made in the Committee's report to the views of the delegates of the United Kingdom and the United States of America on the type of conference to be held, and also to the United Kingdom proposal.

(110) Mr. ELVIN (Director, Department of Education) said that the Summary Record did not contain a decision to postpone the 1956 Regional Conference.

(111) After further discussion between the Chairman and the delegates of the United Kingdom and the United States of America, it was agreed to draw the attention of the Programme and Budget Commission to the United Kingdom delegate's reservation that no further Regional Meetings should be held until the results of the previous ones were fully known. The action was in accordance with the summary record.

(112) The CHAIRMAN invited discussion on paragraph (217): Project 1.22 - Emergency educational assistance.

(113) No comment.

Draft Resolutions

(114) Mr. COWELL (United Kingdom) asked that the wording of the last sentence under DR/28 should be modified to conform to the customary wording.

(115) Agreed.

CHAPTER 2 – NATURAL SCIENCES

(116) In reply to a question from the United Kingdom delegate, the CHAIRMAN confirmed that the omission of any reference to the General Assembly of the International Union of Biochemistry (paragraph 33 of the Natural Sciences Chapter) implied that the project was left at the present budgetary level.

(117) Mr. AUGER (Director, Department of Natural Sciences) stated that priority had been accorded only to the International Geophysical Year.
(118) Referring to the draft resolution in document DR/18, Mr. Auger pointed out that there appeared to be a mistake in the report; special attention should have been drawn to the sixth paragraph, which had nothing to do with the preceding paragraph, and should have its own sub-heading; his impression was, moreover, that the Committee had recommended its adoption.

(119) The CHAIRMAN, referring to paragraph (101), recalled that it had been agreed to alter the title of the project on Cancer and to omit the word "campaign".

(120) Mr. LEE (United States of America) saw no need to alter the title, which was only intended to facilitate reference. He proposed the addition of an explanatory sentence.

(121) It was agreed to adopt the United States delegate's suggestion.

(122) Mr. MAHEU (Assistant Director-General) informed the Committee that the Secretariat had received a letter from the Director-General of WHO, which was reproduced in document 8C/PRG/20, Add.1. He considered that it would be courteous for the Committee to refer to it in its report, and that such a gesture would be appreciated; he also thought the title already adopted should be retained. Reverting to the passage in the report dealing with the arid zone, he proposed to omit the word "highest" in the expression "highest priority".

Draft Resolutions

(123) At the Chairman's request, Mr. RAO (Acting Chief, Bureau of Programme and Budget) read the Summary Record concerning paragraph 6 of DR/18. He recalled his statement that a loan to the Preparatory Committee of the International Computation Centre could only be made out of the Working Capital Fund, and Mr. Auger's explanation on the preferability of a contract to a loan.

(124) Referring to draft resolution DR/29, Mr. AUGER (Director, Department of Natural

Sciences) made the point that it was extremely difficult to grant a loan to a temporary organization which would cease to exist once the Centre was set up and could hardly pass on its liabilities; he saw no point in entering into legal complications for such a small sum ($3,000).

(125) Mr. COWELL (United Kingdom) saw no objection to a loan being given: since it was an intergovernmental agency, recovery of the loan would be assured. Unesco itself had received advances from the United Kingdom Government in its initial stages.

(126) After further discussion, it was agreed to insert the words "from the Working Capital Fund" after the word "loan" in the last paragraph under DR/29.

(127) Mr. AUGER (Director, Department of Natural Sciences) pointed out that DRs 35, 54 and 60 were missing.

(128) Mr. CABOUAT (Rapporteur) said that they had received the same commentary as DRs 42 and 58.

(129) It was agreed that the three resolutions should be included in the report.

(130) Mr. COWELL (United Kingdom) recalled the discussion on Impact and said that a definite proposal on a lower priority had been made.

(131) It was pointed out by Mr. AUGER (Director, Department of Natural Sciences) and the CHAIRMAN that no definite conclusion had been reached on the proposal.

### CHAPTER 3 – SOCIAL SCIENCES DRAFT RESOLUTIONS

(132) Mr. AVIDOR (Israel) pointed to the use of the words "high", "higher" and "highest" in respect of priority.

(133) It was agreed that the Rapporteur should standardize the terminology.

(134) Mrs. MYRDAL (Director, Department of Social Sciences) asked if the last sentence of DR/55 could be redrafted since it referred to programme as well as budgetary considerations.

(135) On the proposal of the delegate of Israel, it was agreed to amend the words after "deferred" to read: "until a later period".

(136) Mr. COWELL (United Kingdom) asked if a more precise wording could be provided for DR/13.

(137) Agreed.

(138) It was also agreed to improve the wording under DR/21 (b) and to delete the words "very much" in the first line under DR/21.

### CHAPTER 4 – CULTURAL ACTIVITIES: DRAFT RESOLUTIONS

(139) Mr. KIRPAL (Department of Cultural Activities) suggested that the word "unnecessary" would be preferable to the word "pointless" at the end of DR/30.

(140) Mr. COWELL (United Kingdom) said that his recollection was that both the World Culture Week and the Unesco Award had been rejected.

(141) Mr. CABOUAT (Rapporteur) explained that different decisions had been taken on the two items. The Committee had, by 10 votes with one abstention, rejected the motion to recommend adopting the first part of the resolution (World Culture Week), but it had, by the same number of votes, suggested that the item referred to in the second part of the resolution (Unesco Awards) merely be postponed. That difference in attitude was made clear in the report.

(142) Mr. LEE (United States of America) asked why there was no decision under DR/49.

(143) The CHAIRMAN recalled that the Committee had been unable to take any action and had decided to refer the item to the delegation which had submitted it.

### CHAPTER 5 – MASS COMMUNICATION

(144) The CHAIRMAN asked the reason for the heading "Higher Budgetary Level" before paragraph (72).

(145) Mr. CABOUAT (Rapporteur) explained that it had been thought well to draw attention to paragraph 72 in the typescript; any other heading, such as "Production of a Film", would serve the purpose.

(146) The suggestion was approved.

(147) Mr. DESJARDINS (Department of Mass Communication) thought that the information given under paragraph (154) should be more precise; the reader was referred to the chapter on Cultural Activities, in which the joint project was not even mentioned. It should appear between paragraphs (148) and (312), under Cultural Activities.

Draft Resolutions

(148) With regard to DR/16, Mr. Desjardins thought the report contained a mistake; he was under the impression that the Committee had accepted the Executive Board's recommendation and the corresponding appropriation; further, he pointed out that DR/22 called for an appropriation of $30,000; the sum of $6,000 had already been granted so that the amount involved was $24,000.

(149) The CHAIRMAN asked Mr. Rao to explain the budgetary considerations concerning DR/22.

(150) Mr. RAO (Acting Chief, Bureau of Programme and Budget) read the relative section of the Summary Records, and it was recalled that DR/16 had been rejected by a casting vote from the Chairman.

(151) Mr. COWELL (United Kingdom) requested that the drafting of the comment on DR/22 should be amended to conform with the customary wording.

CHAPTER 6 – EXCHANGE OF PERSONS: DRAFT RESOLUTIONS

(152) Mr. CABOUAT (Rapporteur) drew attention to two typing mistakes in the French text under DR/24: the word "devrait" should read "devant" and the semi-colon after "ensemble" should be changed to a comma.

CHAPTER 7 – GENERAL RESOLUTIONS

(153) On the suggestion of the CHAIRMAN, it was agreed to insert the words "by the Programme and Budget Commission" after the words "set up" in the third line under paragraph (22).

CHAPTER 8 – DOCUMENTS AND PUBLICATIONS SERVICE

(154) Miss LAISE (United States of America) introduced a resolution submitted by her delegation, which had already been distributed in typewritten form. She would welcome any comments or amendments to the language.

(155) Mr. MAHEU (Assistant Director-General) expressed his appreciation of the United States delegate's purpose; her draft resolution dealt with an important question and would receive careful attention from the Secretariat; it might perhaps be well to revise the wording, which should leave no room for ambiguity. In the first paragraph of the resolution, it would be better to speak of "documents", instead of "documentation". With regard to paragraph 2, it would be normal to follow the customs of Unesco procedure.

(156) The CHAIRMAN proposed that the word "Organization" in the third line of paragraph (1) should be changed to "Secretariat", since Member Governments were in fact the Organization.

(157) Mr. MAHEU (Assistant Director-General) thought the last paragraph would be improved if it were more precise. Either it was addressed to Member States collectively, i.e. to the General Conference, or it was addressed to Member States individually, in which case it was hard to see what action they could take; the most they could do would be to reduce the number of copies of Unesco documents they requested.

(158) Mr. AVIDOR (Israel) said that the objects of the resolution were commendable, but he was not sure that it was correct to present it in the form of a Conference resolution. He proposed that it should be submitted for the attention of the Director-General.

(159) The CHAIRMAN suggested that, in order to avoid the form of a draft resolution, the Committee could draw the attention of the Programme and Budget Commission to the need for examining the problem with a view to action which would reduce the volume of documents.

(160) Mr. JUNANKAR (India) supported the proposal.

(161) Mr. COWELL (United Kingdom) recalled the Director-General's statement on the internal publications Board, which was already exercising some control. It might be useful to indicate specific documents which were considered unnecessary, and to keep the quality of documents under review. Member States and the Director-General were equally victims of excessive documentation. He asked whether roneographed documents were subject to internal review.

(162) Mr. MAHEU (Assistant Director-General) proposed the insertion of a fresh paragraph after the first paragraph, in which the Committee would ask the Programme Commission to recommend that the Director-General introduce measures with regard to documents similar to those already provided for in the case of publications, so as to reduce their numbers and make them shorter; and that, if necessary, he seek instructions from the higher authorities of the Organization.

(163) Miss LAISE (United States of America) said that she would have no objection to calling the attention of Member Governments to the need to restrict their requests for numbers of certain types of documents. She asked whether the proposal would be submitted to the Administrative or to the Programme and Budget Commission.

(164) The CHAIRMAN said that the question would not arise at the present juncture, since the Committee's report was submitted to both Commissions.

(165) Mr. CABOUAT (Rapporteur) asked whether the second draft resolution submitted by the Secretariat was also being dropped. He remarked, further, that the draft resolutions appearing on the next page in the draft programme should come after Chapter 7 (General Resolutions). Lastly, Part IV should include some mention of the Committee's recommendation that the salary of the Secretary of the Staff Association cease to be paid by the Organization.

(166) Mr. RAO (Acting Chief, Bureau of Programme and Budget) recalled that, in reply to a question by the United States delegate, the Director-General had promised to prepare a paper for submission to the Administrative Commission.

(167) Miss LAISE (United States of America) said that mention ought to be made that the Committee had approved the proposal of the Director-General

to eliminate the post of Deputy Director-General and to create two posts of Assistant Director-General.

(168) With regard to the Bureau of Personnel and Management, she would like some mention of the discussions on reclassifications and the proposal of the United States delegation that the budgetary provision under staff costs should be reduced by $23,000.

(169) The CHAIRMAN asked whether the situation regarding the Director-General's Office could not be made clearer in the report.

(170) It was agreed that it should be.

(171) With regard to the reference to reclassifications, the CHAIRMAN asked whether a reference in the conclusion would meet the wishes of the United States delegate.

(172) Miss LAISE (United States of America), while agreeing that a reference might appropriately be made in the Conclusion, regretted that the recommendation for a reduction of $23,000 was still not dealt with. It was essential for a reference to the decision on reclassifications to be included in the body of the report.

(173) It was agreed that the Rapporteur should include a suitable reference under Chapter 3.

PART IV – COMMON SERVICE COSTS

(174) Mr. SOMMERFELT (Norway) asked why no reference was included to the decision to delete the budgetary provisions in 1955 and 1956 for the salary and allowances for a Secretary to the Staff Association.

(175) The CHAIRMAN asked for inclusion of a reference to the amount of $14,000 in respect of failure to move the Secretariat to the new Headquarters before the end of 1956.

(176) Mr. RAO (Acting Chief, Bureau of Programme and Budget) proposed that the following statement be included: "The Committee noted that, if the Secretariat did not move to the new Headquarters building during 1956, certain savings would be possible in the budget for 1956".

(177) Miss LAISE (United States of America) proposed the following alternative wording: "The Committee was informed that it would not be possible to move the Secretariat before the end of 1956 and as a consequence there would be suppression of certain sums connected with the move". The approximate amount should be stated.

Miscellaneous draft resolutions submitted by Member States

(178) The CHAIRMAN read the amended text of the recommendation on DR/4, which was approved subject to a minor drafting alteration.

(179) With regard to DR/50, Mr. AVIDOR (Israel) pointed out that the word "Deputy" in the title should be "Assistant".

(180) Mr. COWELL (United Kingdom), referring to 39 EX/5, asked whether an estimate of the cost should be given.

(181) Mr. MAHEU (Assistant Director-General) reminded the Committee that it had already been decided to deal with the subject in the section entitled "General Conference", and to refer the reader to the Conclusion (paragraph 6).

(182) The CHAIRMAN could not understand why the final draft resolutions gave no indications of budgetary implications. Inclusion of such information would help the work of the Programme and Budget Commission.

(183) The CHAIRMAN asked whether a statement had been included with regard to DR/2 (Adoption of Russian as a working language of Unesco).

(184) Mr. MAHEU (Assistant Director-General) referred to paragraph 14 of the Introduction.

(185) The CHAIRMAN proposed that reference should be made to the fact that clarification was still awaited from the Soviet delegate on one point.

(186) A discussion ensued on the wording of paragraph 14, the CHAIRMAN pointing out that the impression should not be given that the Committee had been prevented from completing its study merely through lack of time.

(187) It was finally agreed to amend the end of line 3 of paragraph 14 to read: "on which the Secretariat was requested to supply".

Conclusion

(188) Mr. AVIDOR (Israel) proposed the inclusion of the following words after "activities" in the sixth line of paragraph (11): "and administration".

(189) Agreed.

(190) Miss LAISE (United States of America), referring to the last page of the Conclusion, proposed that the language should be more concise and factual.

(191) At the request of Mr. AVIDOR (Israel) it was agreed to insert "the period 1954-55" in paragraph 7 in connexion with the reduction of the number of projects.

(192) Mr. FREY (German Federal Republic) asked whether paragraph (11) should include a reference to the non-governmental organizations.

(193) Mr. MAHEU (Assistant Director-General) felt that, at a time when the General Conference, at every session, urged the desirability of broadening the membership of international

non-governmental organizations, it would be inconsistent to treat them as regional units. He proposed, moreover, that the suggestions of the United States delegate be put into practice immediately, and that, in order to help in reducing the volume of Unesco documents, the Committee's supplementary report be dropped.

The meeting rose at 12.20 a.m.

# TWENTY-FIFTH MEETING

*17 November 1954 at 10.30 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**DRAFT REPORT OF THE ADVISORY COMMITTEE ON PROGRAMME AND BUDGET (PART II)**

**REMODELLING OF THE FUTURE PROGRAMME OF UNESCO**
(unnumbered document)

(1) Mr. JUNANKAR (India) asked that mention should be made in the document of the following three points, all of which had received support during the Committee's discussions: targets for the concentration of the programme in different fields; the need for decentralization of the programme and activities to meet the needs of different regions; the provision of funds for action programmes in Member States.

(2) Mr. ABDEL-RAHMAN (Egypt) proposed deletion of the last sentence of paragraph 9 on the grounds that the Committee's decision and the explanations given by the Chairman of the Executive Board rendered it superfluous.

(3) Mr. COWELL (United Kingdom) drew attention to a contradiction between paragraphs 7 and 9. In the first, the Committee was opposed to apportioning funds between the two parts of the programme, and in the second it advised that a decision should be taken on the balance to be established in the programme. He assumed that the word balance referred to the division of funds.

(4) Mr. LEE (United States of America) agreed with the United Kingdom delegate: paragraph 7 explained the difficulties in reaching a decision on the balance between continued and special activities, while paragraph 9 said that a decision should be taken. While appreciating that there were difficulties in apportioning the programme between the two types of activity, it was his recollection that the Committee had approved the directive in the report on remodelling of the future programme of Unesco (document 8C/PRG/13) to the effect that the major portion should apply to special activities.

(5) Mr. FLORKIN (Belgium) pointed out that, in the report under discussion, it was recommended that a larger proportion of the ordinary budget be in future reserved for the special activities requested by Member States.

(6) The CHAIRMAN, referring to the Belgian delegate's remark, said that the sentence in paragraph 68 referring to the greater part of the budget did not concern only Member States. In reply to a further question from the delegate of Belgium, he confirmed that paragraph 68 referred to Member States.

(7) Mr. MAHEU (Assistant Director-General) pointed out that the second sentence of paragraph 68 contained an idea similar to that in paragraph 62, mentioned by Mr. Florkin. However, paragraph 68 referred to special activities as a whole and was therefore wider in scope.

(8) Mr. FLORKIN (Belgium) entirely agreed with the Assistant Director-General's interpretation, but recalled that, according to the information previously supplied by the Chairman of the Executive Board, the proportion of the budget reserved for special activities was already greater than that allowed for general activites.

(9) Mr. LEE (United States of America) said that, although in the document paragraphs 62 and 68 both came under the heading "Activities undertaken at the request of Member States", paragraph 68 referred to the whole programme.

(10) Mr. FLORKIN (Belgium) agreed with the United States delegate, but wished to emphasize that the hope expressed in paragraph 68 had already been fulfilled. In any case the paragraph in question could only mean that the percentage of the budget allotted to special activities should be further increased.

(11) Mr. MAHEU (Assistant Director-General) realized that a problem of interpretation might arise, and that there might be uncertainty whether a larger proportion was to be devoted to special activities than to other activities, or a larger

proportion than was at present allocated to them.

(12) Mr. FLORKIN (Belgium) thought that the wording meant the major portion of the budget and not a larger part of the budget.

(13) Mr. JUNANKAR (India) said that the gist of the discussion was that, if any additional funds should become available, they should be applied first to the part of the programme concerning projects in Member States. The Committee had also discussed the Director-General's suggestion that part of future budgets should be earmarked for those activities.

(14) The CHAIRMAN recalled that the Committee had approved the suggestion, after hearing statements by the Director-General and the representative of the Executive Board to the effect that at the present time the greater part of the budget was devoted to special activities. The object of the paragraph in question was to apply that practice to future years and to stress the desirability of more funds being provided for such activities. It was also agreed that there would be no diminution of funds for normal activities.

(15) Mr. ABDEL-RAHMAN (Egypt), referring to the Chairman's last point, said that it had been agreed as a policy directive that, whenever it was possible, through concentration of the programme, more funds should be applied to special activities, provided it were not at the expense of normal activities.

(16) Mr. COWELL (United Kingdom) said that the discussions had been useful and would be of value to the Programme and Budget Commission. He proposed that a reference should be made in the report to the difficulty of interpreting the two paragraphs, with possible quotations from them, and the Committee's comments. The Chairman of the Executive Board might assist in the wording.

(17) Sir Ronald ADAM (Chairman of the Executive Board) was anxious for the Board not to intervene in the drafting of the report. He would, however, deal with the matter fully when presenting the Executive Board's report to the Programme and Budget Commission. He agreed that the wording might be considered ambiguous.

(18) Mr. LEE (United States of America) proposed a statement on the following lines: "It is the opinion of the Advisory Committee that the general or continuing activities in 1956-57 should not be raised above the level envisaged in our review of the programme and planning for 1957-58. A major part of the Organization's resources and funds should be devoted to special activities and greater emphasis in this area should be given to the needs of Member States".

(19) Mr. ABDEL-RAHMAN (Egypt) drew attention to the reference in paragraph 7 to the interdependence between the permanent services and the services supplying direct aid to Member States, and also to the request for a decision on balance contained in paragraph 9. Recalling the comments at the beginning of the meeting on a contradiction between the two paragraphs, if paragraph 7 were considered as referring to the organic interdependence between parts of the whole programme, and paragraph 9 as referring to the balance from an executive or administrative point of view, the second paragraph would follow logically from the first and there would be no contradiction.

(20) Mr. SEDES (France) considered it impossible to speak of a budgetary balance between one part of the programme and another if the programme had no unity. The Egyptian delegate was perfectly right in that respect.

(21) There was also the question of what would happen if the expansion of special activities entailed an increase in general activities. Such a possibility could not be excluded automatically.

(22) With regard to the comments by the United Kingdom delegate Mr. Sedes thought that the word "balance" could equally well apply to the apportionment of activities or of funds. It was essential to preserve some unity throughout the programme and to draw up a balanced budget for such a consolidated programme.

(23) The CHAIRMAN agreed with the interpretation given by the delegate of Egypt and supported by the delegate of France.

(24) He considered the United States delegate's proposal out of order as it went beyond the Committee's decisions. He assumed that it was intended to refer to 1955-56 and not 1956-57.

(25) Mr. LEE (United States of America) accepted the Chairman's view, but pointed out that he had made his proposal in the interests of clarifying the draft report. The Committee had reached a clear decision to endorse the report on remodelling.

(26) The CHAIRMAN asked the United Kingdom delegate to restate his proposal in the light of that of the United States delegate.

(27) Mr. COWELL (United Kingdom) thanked the delegate of Egypt for his clarification. In the interests of removing ambiguities before presenting the report to the Programme and Budget Commission, he proposed that paragraphs 7 and 9 should be redrafted to express the distinction made by the delegate of Egypt, and that there should be a reference to, or a quotation from, the paragraphs in the Executive Board's report giving the reasons for rejecting the artificial distinction between the two categories of activity.

(28) With regard to the proposal of the United States delegate, while he too did not wish to see activities raised above the 1955-56 level, it was possible that it touched on the prohibited question of the budget ceiling. He did not see how it could be related to his own proposal.

(29) The CHAIRMAN explained that the United Kingdom delegate's proposal was an endeavour to clarify the apparent contradiction between paragraphs 7 and 9.

(30) Mr. CABOUAT (France) saw nothing contradictory between the two paragraphs. He even thought that the two main ideas which they contained could be combined in a single sentence: "The Committee therefore considers that the General Conference should decide upon the balance which it wishes to see maintained in the programme, it being understood that the apportionment of funds between the two parts of the programme should not be based on an artificial distinction between the two types of Member States". The idea was to prevent the programme from being given a dangerous political slant and to emphasize its fundamental unity. He did not believe that there was any ambiguity in the wording which he had proposed.

(31) The CHAIRMAN said that the delegate of the United Kingdom was aware that there was no real contradiction between the two paragraphs. He proposed that a new draft should be prepared by the delegates of the United Kingdom and Egypt and the Rapporteur and submitted to the next meeting.

(32) It was so agreed.

(33) In reply to a question from the CHAIRMAN, Mr. LEE (United States of America) said that he would prefer to see the new draft before reformulating his earlier proposal. His remarks had not concerned the relationship between continued and special activities, but the fact that certain directives to the Director-General agreed on by the Committee had not been included in the report.

(34) Turning to paragraph 6, he said that, in guiding the Director-General, attention had to be given to the time schedule as well as to criteria and methods in securing concentration of activities. He proposed that the word "timing" be inserted after "methods" in the first line of paragraph 6.

(35) Mr. AVIDOR (Israel) objected to the addition. It was difficult to stipulate dates in a process that was continuous.

(36) Mr. LEE (United States of America) said that he would not insist on the word "timing" as long as guidance were given to the Director-General on the timing for achieving certain goals.

(37) Mr. ABDEL-RAHMAN (Egypt) supported the proposal.

(38) Mr. SEDES (France) enquired the exact meaning of the proposal of the delegate of the United States of America.

(39) The CHAIRMAN understood that the proposal was to add the idea of timing to those of criteria and procedures which were already included in the paragraph.

(40) If it were a question of introducing the idea of concentration by stages into paragraph 6, Mr. SEDES (France) had no objection to the proposal.

(41) The CHAIRMAN put the proposal of the United States delegate to the vote and it was adopted by 12 votes to 1.

(42) Mr. CABOUAT (France) pointed out that the word "balance", which appeared several times in the draft report, was not very apt as it generally implied some idea of equality, whereas, in the present case, it was more a question of proportion. Also, any change in the "balance" might be considered as a step towards an "unbalanced" programme, a somewhat detrimental idea. He therefore wondered whether the French text should not be revised with a view to improving the wording.

(43) That suggestion was unanimously approved.

(44) Mr. ABDEL-RAHMAN (Egypt), after receiving an assurance from the Chairman that funds for general activities would not be blocked under paragraph 9, restated his proposal to delete the last sentence of the paragraph.

(45) The proposal was adopted by 6 votes to 1 with 2 abstentions.

(46) Mr. SEDES (France) expressed surprise at the decision to delete the sentence concerned since the whole Committee was agreed on its substance. He would have expected members to vote for, rather than against, its retention.

(47) The CHAIRMAN thought that, if the Committee agreed with the French delegate, it would be impossible to keep the words "certain delegations" at the beginning of the sentence.

(48) Mr. SEDES (France) considered that the last sentence of paragraph 9 should be retained. The words "certain delegations" accorded with the facts; but he attached most importance to the words "have clearly indicated", which emphasized a certain aspect of the Committee's work.

(49) Mr. PANNETON (Canada) wished to delete the sentence precisely because of the words "Certain delegations have clearly indicated". In point of fact nobody knew whether that was a minority or majority opinion.

(50) Mr. COWELL (United Kingdom) said that he had not voted on the proposal because he had not understood the reasons for it. It was clear from paragraph 7 that neither part of the programme was stabilized.

(51) Mr. ABDEL-RAHMAN (Egypt) said that he had made his proposal because it was not correct to include individual points of view in a report.

(52) Speaking as Rapporteur, Mr. CABOUAT (France) reminded the Committee that in the first part of its report it had several times mentioned opinions expressed by one or more delegations. Those were minority opinions which had not been the subject of a vote, had raised no opposition and had seemed worth mentioning because of their particular interest.

(53) The CHAIRMAN took a vote on the proposal by the delegate of Egypt, seconded by the delegate of Canada, that the last sentence of paragraph 9 be deleted. The proposal was adopted by 11 votes to 2.

(54) Mr. PANNETON (Canada) wished to know whether the words "these funds will have to be raised by appealing to Member States", which appeared in the third sentence of paragraph 11, should be interpreted as a hope that Unesco's budget would be increased.

(55) The CHAIRMAN did not consider that the sentence under discussion implied an increase in the Organization's budget, but rather that expenditure of the Organization's funds should be co-ordinated with Members' activities.

(56) Mr. JUNANKAR (India) said that the idea underlying the Executive Board's report was that more funds would be needed; where they would come from was a separate question.

(57) Mr. LEE (United States of America) said that the Executive Board's report indicated that additional funds were desirable, but that some remodelling could be effected without them; the Committee felt that approval of a higher budget was necessary for a remodelled programme. The Committee must either approve the Executive Board's report or state that "such activities will doubtless be enhanced if considerably greater funds are available".

(58) Mr. COWELL (United Kingdom) supported the views of the United States delegate but considered that his suggestion went beyond what was required of the Committee. The programme under consideration was that for 1955-56 and it was not necessary to comment on future funds. If, however, the Committee wished to do so, it must be made clear that the paragraph calling on Member States to provide more funds was not being endorsed. He proposed the revision of the paragraph to remove any forecast of future needs.

(59) Mr. LEE (United States of America) was willing to accept the proposal provided his own amendment were included.

(60) Mr. JUNANKAR (India) said that the Committee had previously agreed that such activities would need more funds, but not from what source those funds might be forthcoming.

(61) Mr. ABDEL-RAHMAN (Egypt) said that there were two levels of funds; those for the fixed budget and those for additional activities. He proposed the following addition to the paragraph after the first sentence: "Such activities will doubtless require funds considerably greater than those that can be provided within the budget of the Organization".

(62) The proposal was seconded by Mr. FLORKIN (Belgium).

(63) Mr. JUNANKAR (India) objected to any implied fixing of future budgets: the budget for any period was fixed by the Conference immediately preceding it.

(64) Mr. COWELL (United Kingdom) reiterated his opinion that the Committee was exceeding its terms of reference.

(65) Mr. SEDES (France) pointed out that Member States had given such financial support to some of Unesco's undertakings, for instance, the Institutes in the German Federal Republic. He proposed that the sentence be amended to read: "these funds will have to be raised by appealing to Member States, as in the case of previous undertakings". It was important to make it clear that Unesco already had some experience in the matter.

(66) Mr. ABDEL-RAHMAN (Egypt) said that his amendment provided clarification. It would not be binding on future budgets, since funds from other sources did not relate to future budgets.

(67) The CHAIRMAN asked for comment on the proposal of the United Kingdom delegate.

(68) Mr. JUNANKAR (India) objected to the proposal on the grounds that the Committee had already agreed that additional funds would be needed.

(69) Mr. AVIDOR (Israel) proposed that the two sentences should be retained.

(70) Mr. COWELL (United Kingdom) agreed with the delegate of India, but nevertheless considered that it was often necessary to refresh the memory of the Conference.

(71) The CHAIRMAN pointed out that no vote had ever been taken on the subject; it was only a question of reporting the Committee's opinion.

(72) Mr. LEE (United States of America) said that no decision had been reached on the need for additional funds. He did not wish to tie remodelling of the programme to a budget level.

(73) Mr. CABOUAT (France) pointed out that it was mainly a question of defining the large projects mentioned in the Executive Board's report. The Committee had not anticipated that such projects would be carried out entirely at the Organization's expense. If Unesco were to be required to initiate large, planned projects, the Conference's attention should be drawn to the consequences of such a policy.

(74) Mr. SEDES (France) thought that, if the end of paragraph 11 were deleted, the first sentence would have little weight. The Director-General would be greatly hampered in drawing up the future programme unless the Conference agreed on the principle of seeking additional funds. Such a policy fully deserved the Committee's approval; it was right that Member States should be able to make special contributions to Unesco's activities and

that policy in no way involved the idea of a budget level.

(75) The CHAIRMAN took a vote on the proposal of the delegate of the United Kingdom, seconded by the delegate of the United States of America; it was rejected by 6 votes to 5, with 1 abstention.

(76) Mr. COWELL (United Kingdom) referred to paragraphs 57 and 70 of the Executive Board's report, which implied that larger funds must come from Unesco's budget and proposed that a reference should be made to them in the report.

(77) It was agreed to insert the following words at the beginning of the sentence proposed by the Egyptian delegate: "As indicated by the Executive Board".

(78) The proposal of the delegate of Egypt, seconded by the delegate of Belgium, was adopted by 10 votes to nil with no abstentions.

DR/2 - Draft resolution submitted by the delegation of the USSR

8C/DIV/78 - Note by the Secretariat on budget estimates and related information for use of Russian as a working language of Unesco, as proposed by the USSR

(79) Mr. MAHEU (Assistant Director-General) recalled that the Committee had asked the Secretariat to get in touch with the USSR delegation, in order to obtain some additional information about its proposal. The USSR delegation had stated that the main point of its draft resolution was contained in paragraph 2 of document 8C/DR/2. It hoped that Russian would be adopted by Unesco as a working language on the same footing as English and French, and asked that the reference to Spanish in the first paragraph be ignored. The USSR delegation did not intend to request that Russian be used for every class of document listed in Note 8C/DIV/78. The delegation's main concern for the time being was to have Russian accepted as a working language of the General Conference and the Executive Board. All the possible financial implications of the draft resolution were set out in document 8C/DIV/78. Members of the Committee would also find therein information about the practice followed with regard to Russian in the United Nations and the Specialized Agencies.

(80) The CHAIRMAN reminded the Committee that the Executive Board's recommendation on document 8C/ADM/7 on the adoption of Spanish as a working language had not been approved by the Committee owing to its budgetary implications.

(81) Mr. SILLER (Mexico) said that, as the proposal not to accept Spanish as a working language of the Executive Board had been adopted at a meeting which he had been unable to attend, he wished to reserve his vote on that point in order to return to it when it was dealt with by the appropriate organ of the Conference.

(82) The CHAIRMAN and Mr. MAHEU (Assistant Director-General) explained that the adoption of Spanish as a working language would come up for discussion when the Executive Board's report was presented to the Administrative Commission that afternoon.

(83) Mr. SOMMERFELT (Norway) asked whether, in view of the Soviet delegation's communication to the Assistant Director-General, discussion could be limited to the use of Russian for the Conference and the Executive Board. He proposed that a separate vote be taken in each case and opposed its use at the Executive Board for the time being, for reasons of economy.

(84) Replying to a question from Mr. ABDEL-RAHMAN (Egypt), Mr. DELAVENAY (Chief, Documents and Publications Service) explained that the expression "official language" (document 8C/DIV/78) had not the same meaning in all the United Nations Agencies. A list of the official languages of Unesco was given in Rule 54 of the Rules of Procedure of the General Conference. Rule 56 explained how those official languages were to be used. With regard to working languages, a distinction should be drawn between those used for all Unesco documents and those used by the General Conference. Since the Florence session of the General Conference, Spanish had been added to the working languages of the Conference, which had previously consisted of English and French only.

(85) Mr. LEE (United States of America) asked if the Secretariat could make a more detailed statement on the implications under Item 1 of document 8C/DIV/78. It would be useful to know to what extent Russian would be used, for example, in simultaneous interpretation, and in verbatim and summary records, as a guide to voting.

(86) Mr. LEGUEN (Bureau of Conference Planning and General Services) replied that the funds provided for interpretation covered simultaneous interpretation for all meetings where that system was used, and consecutive interpretation for working parties. Verbatim records were made only of plenary meetings. Speeches in Russian would be recorded and then transcribed, so that the verbatim records would be in four languages.

(87) With regard to summary records, the figures allowed for three meetings every morning and afternoon. Henceforth, those records would be drawn up in four languages.

(88) Preparatory documents were all those sent to delegations before the Conference opened, while publications included the Report of the Director-General, the Draft Programme and Budget, Reports of Member States, the Conference Handbook and Journal, and its resolutions and proceedings. Information on that subject would be found in paragraph 10 of the chapter on the General Conference in the Draft Programme and Budget for 1955-56.

(89) Mr. PANNETON (Canada) asked whether it would be possible to consider items separately

or whether a vote would have to be taken on the subject as a whole.

(90) The CHAIRMAN confirmed that proposals could be made on individual categories in document 8C/DIV/78.

(91) Mr. SILLER (Mexico) asked which resolution authorized the use of Russian at plenary meetings.

(92) Mr. LEGUEN (Bureau of Conference Planning and General Services) explained that the use of Russian as an auxiliary language had been approved by the General Conference in plenary meeting on the recommendation of the General Committee. That was a temporary measure.

(93) The CHAIRMAN pointed out that an amount of $40,596 appearing in note (1) of 8C/DIV/78 would now have to be added to the total of $100,754 for the Conference, since it had been recommended to hold the next Conference in India.

(94) Mr. LEE (United States of America) said that the implications of item 1 of the document were not reflected in the wording of the resolution.

(95) In reply to a question from Mr. COWELL (United Kingdom), Mr. MAHEU (Assistant Director-General) stated that the expenditure entailed by the use of Russian at the Conference had been estimated as exactly equal to that entailed by the use of Spanish.

(96) Mr. SEDES (France) asked for information on the steps actually taken with regard to Russian.

(97) Mr. LEGUEN (Bureau of Conference Planning and General Services) replied that partial measures only had been taken, providing for interpretation during the debates and for the recording and transcribing of Russian speeches in the verbatim records.

(98) Mr. SILLER (Mexico) did not remember any clause limiting the working languages of Unesco's Secretariat to French and English. He hoped that the Director-General would enlighten him if such limitations existed in the Constitution.

(99) Mr. MAHEU (Assistant Director-General) explained that the Constitution was drawn up in French and English, both languages being equally authoritative. Section X of the Rules of Procedure of the General Conference contained the Rules governing the use of languages. Rule 52 stipulated that: "English, French and Spanish are the working languages of the General Conference".

(100) The CHAIRMAN said that that would exclude use of the Russian language anywhere else than in the General Conference.

(101) Mr. SOMMERFELT (Norway) said that he had proposed that discussion be limited to its use at the Conference.

(102) Mr. SILLER (Mexico) pointed out that some of Unesco's work was done in a language which might to a certain extent be a working language, like Spanish. Thus it frequently happened that Unesco replied in Spanish to letters addressed to it in that language. Therefore, if the General Conference adopted Russian as a working language, certain activities or work would inevitably be carried out in that new language. His proposal would be that Russian be adopted as a working language of the General Conference, but, as the Norwegian delegate had said, its use as a working language would be limited to sessions of the General Conference and so, like Spanish, it would not affect the ordinary work of the Secretariat to any great extent.

(103) Mr. FLORKIN (Belgium) seconded the Mexican delegate's proposal.

(104) Mr. SEDES (France) thought that, after the decisions taken in plenary session, it would be difficult for the Committee to oppose the adoption of Russian as a working language of the General Conference. From the financial angle, however, it might perhaps be better to limit the number of documents for translation into Russian.

(105) In reply to a question from the Chairman, he explained that his suggestion was not an amendment to the Mexican delegate's proposal. In his opinion, Russian should be placed on the same footing as Spanish, but it was wise to bear in mind the sum available for the next Conference and to make recommendations in keeping with it.

(106) It was agreed that a separate vote should be taken on each item of expenditure.

Interpretation

(107) The budget estimates for interpretation were approved by 11 votes to 1, with 1 abstention.

(108) Mr. LEE (United States of America) assumed that the foregoing vote had been for the purpose of clarifying views on the individual items, but that a substantive vote would be taken on the question of principle.

Verbatim Records

(109) Mr. DELAVENAY (Chief, Documents and Publications Service) explained that the verbatim records were obtained by transcribing recordings made during plenary meetings. They therefore reproduced the original speeches in each language, and if Russian were adopted as a working language from the point of view of interpretation, it would be difficult to imagine the absence of speeches in Russian in the verbatim records.

(110) The estimates for verbatim records were approved by 11 votes to 1, with 1 abstention.

Summary Records and Reports

(111) The relevant estimates were approved by 11 votes to 1, with 1 abstention.

Preparatory Documents

(112) The estimates were approved by 11 votes to 1, with 1 abstention.

Publications

(113) The estimates were approved by 10 votes to 2, with 1 abstention.

(114) Finally, the Committee agreed, by 11 votes to 1, with 1 abstention, to recommend the adoption of Russian as a working language of the General Conference, having due regard to the budget estimates contained in document 8C/DIV/78, together with the additional estimates for organizing the next session of the Conference in New Delhi.

(115) Mr. SOMMERFELT (Norway) proposed that for the time being the Committee should not recommend the use of Russian for the Executive Board.

(116) The proposal was seconded by the delegate of France and adopted by 10 votes to 1 with 2 abstentions.

(117) The CHAIRMAN asked whether the preceding vote implied that the Committee should proceed no further.

(118) Mr. ABDEL-RAHMAN (Egypt) suggested that one reason for the vote was that the Soviet Union was not at present represented on the Executive Board.

(119) Mr. MAHEU (Assistant Director-General) pointed out that present decisions regarding Russian were being taken on the basis of the existing situation and of information so far available and that, if new facts should be brought to their notice, delegates would naturally be free to take those facts into account.

(120) Mr. SILLER (Mexico) pointed out that the Committee should not exclude the possibility that in future Unesco might publish some periodicals in Russian, for one of the services which Unesco should render to a country which had joined it was to issue some publications in the language of that country.

(121) The CHAIRMAN said that the appropriate place for the Soviet delegation to raise the question of publications and periodicals would be in the Programme and Budget Commission.

The meeting rose at 1.10 p.m.

# TWENTY-SIXTH MEETING

*17 November 1954 at 4 p.m.*

*Chairman:* Mr. SOMMERFELT (Norway)

**DRAFT REPORT OF THE ADVISORY COMMITTEE ON PROGRAMME AND BUDGET (PART II)**

**REMODELLING OF THE FUTURE PROGRAMME OF UNESCO**
(continued)

(1) Mr. CABOUAT (Rapporteur) read out paragraphs 6, 7 and 9 of Part II of the draft report of the Advisory Committee on Programme and Budget, dealing with the remodelling of the future programme of Unesco, as amended by the Drafting Committee.

(2) Paragraphs 6, 7 and 9 were adopted without discussion.

(3) The Rapporteur added that paragraph 12 in the draft report would be followed immediately by paragraph 15, and that the transferred paragraphs 13 and 14 would be replaced by the text of the motion submitted on 15 November by the delegate of the United States of America, omitting the first sentence of that motion, which was already included in the draft report (cf. document 8C/BUD/SR.23).

(4) The proposed drafting was adopted without discussion.

(5) Mr. AVIDOR (Israel) thought the word "precise" in the last sentence of paragraph 10 laid too heavy a burden on the General Conference and proposed, in the interests of greater flexibility, that it be deleted.

(6) Mr. COWELL (United Kingdom) pointed to an anomaly in the words: "For several years" at the beginning of the paragraph and the words: "It is now becoming necessary..." in the last sentence of the paragraph.

(7) Mr. LEE (United States of America) proposed, in order to meet those objections, that the beginning of the last sentence of the paragraph be altered to

read: "It is necessary that the Director-General receive instructions which will enable him..."

(8) Mr. SEDES (France), also referring to paragraph 10, did not think the Director-General could be given "precise instructions" for the concentration of Unesco's activities in drawing up the 1957-58 programme. He asked what precise instructions the Committee or the General Conference could give without first knowing what proposals the Director-General intended to put forward for the 1957-58 programme. The French delegate would rather go back to the original wording of paragraph 10.

(9) Mr. COWELL (United Kingdom), while fully appreciating the point of view of the French delegate, thought it was difficult to give more than a very general recommendation in the Advisory Committee's report. He would oppose the retention of the original text on account of the drafting anomalies it contained and proposed that the paragraph be adopted as amended by the delegate of the United States of America.

(10) It was so agreed.

(11) Turning to paragraph 11 of the draft report, Mr. COWELL (United Kingdom) thought it should contain a reference to the principle of concentration of activities and proposed that the first two sentences of the paragraph should be altered to read as follows:

"The Conference should in particular, decide whether, as has been proposed by the Executive Board, the future programme should be concentrated by giving priority to a small number of major activities carried out for the purpose of contributing towards a practical solution of specific problems. Such activities will doubtless require funds considerably greater than those normally at the Organization's disposal".

(12) Paragraph 11 as amended was adopted.
(13) Part II of the Draft Report of the Advisory Committee on Programme and Budget as a whole was adopted.

DR/62: Study preliminary to the establishment of a training centre for international civil servants

(14) Called upon by the CHAIRMAN, Mr. MAHEU (Assistant Director-General) thought that the draft resolution submitted by the Iranian delegation showed a just appreciation of the importance of training international civil servants. He interpreted it as a request to the Director-General to undertake a preliminary study of the possibility of setting up a training centre for such officials, with the object of submitting proposals to the General Conference at its ninth session.
(15) He would rather that the term "report" were not used; so that the Director-General might be at liberty not to prepare a formal report if he considered that the question was not yet ripe.

(16) Mr. PANNETON (Canada) asked whether the draft resolution was not affected by Rule 78(2) of the Rules of Procedure of the General Conference: "Proposals containing new programme resolutions or amendments to the draft programme involving new activities or increasing substantially the budget estimates shall reach the Director-General in writing at least ten days before the opening of the session".
(17) The Canadian delegate wondered whether the draft resolution did not involve a new activity which, even though it had no budgetary implications, should be closely examined before any decision was taken.

(18) Mr. MAHEU (Assistant Director-General) explained that the General Committee had taken the view that the draft resolution could be examined under the terms of Rule 78 (3) of the Rules of Procedure. In his opinion, the proposal did not, properly speaking, involve a new activity and had no appreciable budgetary implications.

(19) Mr. COWELL (United Kingdom) believed that centres already existed where such training was provided, and wondered if the studies proposed by the delegation of Iran were justified.

(20) Mr. LEE (United States of America) thought that the Director-General did not require any special authority to investigate the matter, but that the Advisory Committee would need to have more information about the project before it could authorize him to do more than investigate it. He proposed that the question be referred to the Secretariat, which would decide on the desirability of incorporating it in the programme of activities for 1957.

(21) Mr. SEDES (France) seconded the proposal of the delegate of the United States of America. He thought it behoved the Committee to recognize the importance of training international civil servants, but that did not necessarily entail a formal resolution; a general instruction to the Secretariat would be enough.

(22) Mr. SOEBROTO (Indonesia) said the question raised by the delegation of Iran was of considerable importance to many countries and he would support the proposal contained in the draft resolution.

(23) Mr. PANNETON (Canada) was anxious to see the ten-day rule applied so that delegations had an opportunity of studying the draft resolutions submitted to the General Conference. He also wondered whether there was in fact a link between the draft resolution proposed by Iran and an activity already mentioned in the draft programme.

(24) Mr. COWELL (United Kingdom) thought the points of view of the Indonesian and United States delegations were not incompatible and both might be satisfied if the matter were referred to the Secretariat for submission of a proposal at the next session of the General Conference.

(25) It was so agreed.

DR/63: Unesco publication on Mickiewicz

(26) Mr. MAHEU (Assistant Director-General) pointed out that the draft resolution had budgetary implications, and accordingly came under the ten-day rule. Nevertheless, the General Committee had thought fit to make an exception and had accordingly requested the Committee to consider it.

(27) Mr. KIRPAL (Deputy Director, Department of Cultural Activities) said that the cost of the project would amount to $6,400 for 1955. That sum would cover the publication of 10 contributions by interested persons in book form (250 pp., 2,000 copies) on the lines of those already published by Unesco in homage to Goethe and Balzac.

(28) Mr. LEE (United States of America) requested that the draft resolution be considered out of order as it had not been submitted in accordance with the Rules of Procedure.

(29) Mr. COWELL (United Kingdom) said that, since the works of the great Polish poet were still insufficiently known outside Poland, it would be more valuable to secure interest in their translation under the auspices of Unesco, rather than issue a separate publication to commemorate his death. If the latter course were followed, many more countries might be induced to submit similar requests for publications.

(30) Mr. SEDES (France) asked whether the works of the Polish poet did not include passages particularly in keeping with the work and aims of Unesco. Such excerpts should be chosen for publication in preference to others, more general in character. He further suggested that, instead of embarking on a special publication, Unesco might publish some of Mickiewicz' work in the Courier so as to bring it to the notice of the regular readers of that paper. In his opinion, $6,400 should not be spent on a project which was not directly connected with Unesco's programme activities until all other possibilities had been exhausted, or at least explored.

(31) Mr. KIRPAL (Deputy Director, Department of Cultural Activities) feared that the adoption of the United Kingdom proposal might jeopardize the Organization's present translation programme, where emphasis was laid primarily on the translation of the literature of Asian countries.

(32) Mr. LEE (United States of America) proposed that no action be recommended on the draft resolution under consideration, just as it had been agreed to recommend no action on the draft resolution of the Italian delegation requesting Unesco to convene a conference to study the work and influence of the architect Palladio (document 8C/DR/27).

(33) Mr. COWELL (United Kingdom) suggested that an adequate tribute might be paid to Poland without undue additional expense if a feature were devoted to the poet Mickiewicz in the Unesco Courier or in any other of the Organization's current publications.

(34) Mr. SEDES (France) put forward, as a formal proposal, his previous suggestion that a number of poems by Adam Mickiewicz, preceded by a biography of the poet, be published in the Unesco Courier.

(35) The French delegation's proposal was put to the vote, and adopted by 6 votes, with 1 abstention.

DR/64: The social sciences and problems of social development

(36) Mr. MAHEU (Assistant Director-General) submitted the proposal by virtue of another exception allowed by the General Committee. The French proposal entailed expenditure to the extent of $4,000 in 1955; on the other hand it fitted logically into the Unesco programme, without either necessitating any fundamental change, or constituting a "new activity".

(37) With the tacit approval of the Chairman, the Assistant Director-General asked the French delegation whether it wished to maintain its draft resolution, since it would not be impossible to combine it with the draft resolution of the Uruguayan delegation on "Teaching about human rights" (document 8C/DR/55), which seemed to stem from the same considerations, and which the Committee had recommended to the General Conference; it had also recommended approval of a contract with the International Political Science Association.

(38) Mr. SEDES (France), feeling that there had been repeated evidence of the failure of democratic political development to keep pace with economic and social development in the world, wished to maintain his proposal, and hoped that it would be adopted by the Committee. He did not know how the Uruguayan proposal would fare.

(39) Mr. AVIDOR (Israel) was in favour of requesting the International Political Science Association to discuss the matter at its Congress in Stockholm in 1955, or, if that did not prove possible, later - in 1957.

(40) Mr. PANNETON (Canada) stated that he had two reasons for invoking Rule 78 (2) of the Rules of Procedure. In the first place, the French draft resolution did, in his opinion, involve a "new activity". Secondly, in his view, it should be regarded as "increasing substantially the budget estimates". The Canadian delegate considered that any expenditure of over one thousand dollars entailed by a project should be regarded as a substantial increase.

(41) Mrs. MYRDAL (Director, Department of Social Sciences) pointed out that it was not merely a question of adding an item to the agenda of IPSA. A round-table conference could be organized, but a certain amount of expenditure, entailing a subvention from Unesco, would be inevitable.

(42) The CHAIRMAN, supported by the representative

of the United Kingdom, proposed that the Committee adopt the suggestion of the representative of Israel that IPSA should be requested to study the matter in 1957.

(43) The proposal was put to the vote and adopted by 7 votes to 1, with 2 abstentions.

EXPANDED PROGRAMME OF TECHNICAL ASSISTANCE
(document 8C/5, Annex VIII)

(44) Mr. ADISESHIAH (Director, Department of Technical Assistance) outlined the salient points of the Expanded Programme of Technical Assistance and said that the Advisory Committee had to assist the General Conference to review technical assistance activities over the past two years as well as the technical aspects of the programmes.
(45) For the programme of 1955 the Director-General had submitted to the Technical Assistance Board allocations of 2.7 and 3.2 million dollars for the first and second categories respectively. Those minimum and maximum figures included a sum of 390,000 dollars to cover Headquarters costs. It was interesting to note that in the new programme two-thirds of the budgetary allocations were intended for education, while only one-third was earmarked for scientific development; that proportion reflected the flow and the nature of the requests for assistance which had been received. On the whole the new programme showed a strong element of continuity, since 72 per cent of the activities it embodied were already under way and had been for some time, while only 28 per cent were entirely new. That was due to the fact that the limited financial resources of the Organization had made it necessary to give priority to long-term, continuing projects and also to the fact that the very nature of work in science and education required patience and continuity of effort. In the course of 1955 completely new ground would be broken in Nicaragua, Chile and Paraguay. On the whole, technical assistance would continue to operate in the same major fields as before: primary and secondary education, for which the largest funds had been allocated; fundamental education, which had dropped to second place; technical education, which retained the same degree of priority as before, and special documentation. In all those aspects the Expanded Technical Assistance Programme was closely related to the regular programme. Moreover, all departments of the Organization played an important part in the development of the technical assistance projects, and close collaboration had been ensured between Unesco and the other Specialized Agencies. Important work was being done on a regional basis, particularly in Latin America, where three educational and training centres had been opened, and it was expected that 28 more projects would be completed before the end of the year.
(46) The technical assistance given by Unesco was of three types: experts, scholarships and equipment, and the need for one or the other varied considerably according to countries.

(47) With regard to Headquarters staff, allocations for 1955 totalled 390,000 dollars. The strictest economy had been advocated in that sphere by the Economic and Social Council, and the Director-General, who had been compelled to reduce Headquarters staff in 1954 by 20 per cent compared with 1953, had serious doubts about his being able to carry on technical assistance work in those conditions. He hoped that the Advisory Committee would give that problem its most careful consideration.

(48) Mr. COWELL (United Kingdom) said that the United Kingdom was most satisfied with the information contained in the report. He thought, however that the latter was perhaps not in all cases sufficiently critical of shortcomings. There was also insufficient information about the work of teams engaged in the evaluation of projects. His delegation was satisfied with the draft resolutions contained on pages 5 and 6 of the report (8C/5, Annex VIII), subject to deletion in the preamble of part D of the word "reduced", which added little to the meaning and could be misunderstood.

(49) Mr. ABDEL-RAHMAN (Egypt) thought that there was still room for closer collaboration between the Technical Assistance Department and the other departments of Unesco. Methods of evaluating projects needed to be improved, as they could lead to greater efficiency and more economy. Consultations with the interested parties should precede any attempt to modify the methods of allocating technical assistance to various countries and, finally, more information should be made available about the experts employed on technical assistance projects, their nationality and the type of work they did.

(50) Mr. PANNETON (Canada) paid tribute to the way in which Mr. Adiseshiah had presented the report, and in which the United Kingdom and Egyptian delegates had commented on it. He thought that in no other field was the Unesco budget better allocated.
(51) He recalled, however, that the Technical Assistance Board had asked organizations to reduce their expenditure; the equipment made available for technical assistance projects was used only for demonstration purposes, but he had read that, in one case, the cost of equipment amounted to 40% and in another to 57% of the total cost of the projects.
(52) While he was satisfied with the expenditure as a whole, and would not ask for details, the Canadian delegate found that fact surprising, and wondered whether it would not be possible to economize to some extent, and to use the sums thus made available for objects more in keeping with the Constitution and the spirit of Unesco.

(53) Mr. SEDES (France) joined in congratulating Unesco's Technical Assistance Department, and was glad to note that the technical assistance programme had been expanded. He stressed the degree of co-operation established between the various Specialized Agencies, and added a number of general remarks.

(54) i. With regard to the experts whom governments and National Commissions were entitled to appoint, he thought that Unesco should give those authorities earlier information about proposed missions and their destination. Such missions were generally composed of teachers and research workers, who could not always get away easily.
(55) ii. There should be continuity in the efforts of Unesco and the other Specialized Agencies in such matters as fundamental education. So far as fundamental education was concerned, the experimental period was over, and the time had come to launch, not experiments, but genuine campaigns for its promotion. Continuity of effort was essential to success.
(56) iii. Thirdly, in order to establish continuity at least in certain fields of technical assistance, a period of assessment was necessary. It was clear that such assessment could not be made without due consideration and that often it took a very long time. Evaluation of results was, however, essential for the success of technical assistance, and, in particular, for fundamental education.
(57) Mr. Sedes said he would be happy to support the proposal of the United Kingdom delegate, if the latter would agree not to delete the word "reduced" in the preamble to draft resolution 8.52 (Resolutions, part D). As the funds available for technical assistance were "reduced", Unesco was seeking means of replacing them by asking for help from Member States and for voluntary contributions. It would be very harsh to say to Member States: "Unesco helps those who help themselves", as if the Organization were applying the hard rule of "God helps those who help themselves". To delete "reduced" was to do violence to the sense of the passage.

(58) Mr. COWELL (United Kingdom) proposed that the following paragraph be inserted in the report:

"The Advisory Committee on Programme and Budget, having considered Annex VIII of the proposed programme and budget and having taken into account the oral commentary and explanations provided on behalf of the Director-General, commends the document to the General Conference as a useful and lucid summary of Unesco's technical assistance activities, whose main trends appear to the Committee to be satisfactory.

The Committee approves the draft resolutions contained in the report and recommends their adoption by the General Conference with the slight reservation that the word 'reduced' be replaced by 'limited' in the preamble to draft resolution 8.52".

(59) No objections having been raised, the proposal of the delegate of the United Kingdom was adopted.

The meeting rose at 7.30 p.m.

# TWENTY - SEVENTH MEETING

*23 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**CONSIDERATION OF REPORT OF THE EXPERT COMMITTEE ON INTERNATIONAL UNDERSTANDING AND CO-OPERATION** (document 8C/DIV/80)

(1) Mr. CABOUAT (Rapporteur) asked the Committee to release him from his duties as rapporteur. When he had agreed to assume those duties he had thought that the meetings of the Advisory Committee on Programme and Budget would be about over when the General Conference opened. Contrary to expectations, however, the Committee still had to consider the important question of priorities, referred to it by the Programme Commission. He could not combine his functions as rapporteur with those he was called upon to exercise for his delegation.

(2) After some discussion, it was decided that the French delegation would supply a new rapporteur for the Committee. Mr. Caboiat was accordingly replaced by Mr. Sedes.

(3) Mr. DUERING (Vice-Chairman of the Expert Committee on Education for International Understanding and Co-operation) introduced the report prepared by that Committee (document 8C/DIV/80).
(4) The document, he explained, began with a history of the Committee, which had been invited to give its views on the draft programme for 1955-56, as it related to education for international understanding and co-operation. On page 2 an index of the contents of the document was given. Mr. Duering drew attention to the first point dealt with, terminology. The Committee had not been satisfied with the expression education for living in a world community" which gave the impression of rosy dreams, and preferred the more modest title: "education for international understanding and co-operation".
(5) The first chapter of the report dealt with general principles. It was an attempt to formulate precise criteria for particular fields of action, which it hoped the present Committee could now examine and recommend. The criteria, Mr. Duering said, were no more than a selection.
(6) Chapter II contained detailed recommendations on projects related to international understanding, including some budgetary recommendations.
Chapter III dealt with future programmes.
Mr. Duering drew attention to Section A of that Chapter, on Administration, which the experts had considered to be particularly important. Two ways had been proposed of dealing with the lack of co-ordination that had been found in the Secretariat in that field: a panel of experts from outside the Organization, or a co-ordinating committee within it. The speaker concluded with a brief description of the Annexes.

(7) At the suggestion of the delegate of Canada, the meeting was adjourned for twenty minutes, to allow for study and informal discussion of the document.

(8) The CHAIRMAN then thanked the Committee of Experts for their excellent and rapidly produced report, and opened the discussion on 8C/DIV/80).

(9) Mr. AVIDOR (Israel) said that the introduction and first chapter had taken as much as two years' thinking over, and it would be difficult to analyse it in detail. He proposed that the Committee pass immediately to the consideration of Chapters II and III, as the recommendations contained in them could be compared to those already put forward by the Advisory Committee and necessary adjustments made at once.

(10) The CHAIRMAN thought that the Programme Commission expected a general recommendation from the Advisory Committee on the whole report.

(11) Mr. FRANCOIS (France)said that in his opinion the Committee would be acting irresponsibly if it attempted to pass a final judgment on the work of the Committee of Experts, which had been sitting for two years and had been meeting for several days past in order to draw up its final report. He recalled that members of the Advisory Committee had had approximately twenty minutes in which to read this final report.
(12) He thought therefore that the Committee's rôle should be more restricted. It should be confined to considering whether, in the light of its present discussions, the Committee ought to forward to the Programme Commission new recommendations, different from those contained in its report on the programme and budget.

(13) That view was shared by the Canadian delegate.

(14) The delegate of the German Federal Republic supported the Israeli delegate's proposal, which was then adopted without further discussion.

CHAPTER II: EDUCATION

Paragraphs 55-62

(15) The Advisory Committee had previously recommended that the Director-General should be asked to submit a report to the next session containing a detailed study of the work done by the Unesco Institutes in Germany.

(16) Mr. ELVIN (Director, Department of Education) pointed out that sub-paragraph (a) involved a decision on whether the word international should be interpreted here as extending to the whole world or as meaning increasingly European. With sub-paragraphs (b) and (c) the Director-General could agree in principle.

(17) Mr. DUERING (Vice-Chairman of the Expert Committee) said that the criterion his Committee had had in mind was that which was used for Unesco subventions, namely, that the institute should be "truly international in character". It was better not to be too rigid over the interpretation of the word international.

(18) Mr. SHAHANE (India) said that an institute of that character could not be international in the sense in which the word was generally used in international organizations. That applied to both sub-paragraphs (a) and (b). It was not easy to make the staff fully international. He suggested to the Committee to recommend bringing it to the notice of the Director of the Institute that it was desirable to pay more attention to making the institute really significant in non-Western parts of the world. Sub-paragraph (c) probably had that point in view.

(19) Mr. FREY (German Federal Republic) referred to his comments in that direction made at the time when the institutes were being discussed by the Advisory Committee. He had been disappointed to find that the emphasis he had wished for was lacking in the report of the Advisory Committee. He supported the Indian delegate's remarks.

(20) Mr. PANNETON (Canada) agreed with the delegate of India. He considered also that the comment on the institutes in the report of the Advisory Committee (document 8C/BUD/1) covered the proposed recommendation.

(21) Mr. FRANCOIS (France) thought that, as soon as an institute like those of Unesco in Germany showed itself to be European, it could be regarded as international. He recalled the view, often put forward by the French delegation, that even those West European countries which were normally considered the most advanced could with advantage refresh their knowledge of the principles and methods of education and international co-operation.

(22) Mr. AL-KOUSSI (Egypt) said that in actual fact the attitude of the Advisory Committee, which had expressed doubt of the value of the work carried out by the institute, was the same as that of the Expert Committee, although it might be differently expressed. He thought the proposal should be reconsidered in order to put the point more clearly, and supported the proposal of the Indian delegate.

(23) Mr. SHAHANE (India) explained that his delegation was satisfied by the international character of the institute, which was needed in the area where it had been placed. He suggested that a mere indication should be given to its Director that his responsibilities extended beyond a particular area.

(24) Mr. LEE (United States of America) said that the Committee should be conservative about the details with which it would burden the Programme Commission. He moved that no change be made to the Advisory Committee's report on that point.

(25) Mr. FLORKIN (Belgium) said that, in considering the report of the Committee of Experts, the Advisory Committee should take note of what, in the report, agreed with its previous conclusions, and should not hesitate to pass judgment on what did not.

(26) The CHAIRMAN, summing up, said that there were two proposals before the Committee. If the first, made by the delegate of the German Federal Republic, to include the comments of the Expert Committee in the Advisory Committee's new report, were adopted, the proposal by the United States of America that the report should stand as it was would automatically fall.

(27) The proposal of the German delegate was then put to the vote and carried by 7 in favour 3 against and 2 abstentions.

(28) The Chairman asked the Rapporteur to formulate the addition in his report.

Paragraphs 176-178:

(29) No comments.

Paragraphs 179-185:

(30) Mr. COWELL (United Kingdom) asked for the comments of the Director-General on the necessity for holding two conferences, which was questioned by the Expert Committee.

(31) The meeting, the CHAIRMAN said, had rejected a proposal to alter that item in the draft programme.

(32) Mr. DUERING (Vice-Chairman of the Expert Committee) gave the reason for the Expert Committee's recommendation: his country had a good deal of experience of work on textbooks. It was very slow. The purpose of the remark was to slow down the activities under that heading.

(33) Mr. ELVIN (Director, Department of Education) pointed out that the difficulty in discussing the question earlier had been over which of the two conferences would be rejected.

(34) Mr. DUERING (Vice-Chairman of the Expert Committee) replied that the Committee had considered it would be premature to hold the conference in the Far East.

(35) Mr. LEE (United States of America) proposed that the Advisory Committee heed the judgment of the experts and slow down the work on the project by eliminating one of the conferences, without specifying which.

(36) Supported by the delegate of the United Kingdom.

(37) Mr. SHAHANE (India) also supported the proposal, adding his appreciation of the work done in East and Central Africa by the companies which had created textbooks in the African language and had tried to spread knowledge of other territories outside the British Empire.

(38) Mr. ELVIN (Director, Department of Education) remarked that the Secretariat would certainly propose dropping the Asian conference, if either.

(39) The proposal formulated by the delegate of the United States of America was put to the vote and adopted by 12 in favour, none against and 1 abstention.

Paragraphs 186-192 (No previous comment by the Advisory Committee)

(40) Mr. SOMMERFELT (Norway) proposed that the advice of the Expert Committee should be followed, and that paragraph 189 be deleted.

(41) Mr. ELVIN (Director, Department of Education) explained that since the fifth session of the General Conference, Unesco had had an unfulfilled obligation to encourage teaching about the United Nations and Human Rights in universities as well as in schools. An effort had been made to do that here. The Expert Committee's objection was that the sum proposed was too small, but it was felt that sometimes a pilot course of lectures that caught the interest of a university might have a considerably wider influence eventually.

(42) Mr. COWELL (United Kingdom) supported the proposal by the delegate of Norway that the project be abandoned but without comment on the destination of the amount to be left unused.

(43) Mr. FRANCOIS (France) thought that, in the course of the detailed study of the budget, it would be possible to work out the amounts which might be devoted to the project, which he considered particularly worth while. What section of the population counted for more in Unesco's work than the younger generation? It was between the ages of 18 and 23 that people realized what they wished to devote their lives to and took their most important decisions. As the Director of the Education Department had said, Unesco had over a period of years accumulated unfulfilled obligations which constituted a virtual contract in respect of university teaching, and a pilot course of lectures sometimes yielded remarkable results. Unesco should take the initiative and do pioneer work, for otherwise no other quarter would undertake to show the way.

(44) The proposal made by the delegate of Norway and seconded by the delegate of the United Kingdom was put to the vote. There were 4 votes in favour, 4 against and 4 abstentions. The Chairman therefore cast his vote, which was that there should be no change in the Committee's previous report.

Paragraphs 193-6

(45) Mr. ELVIN (Director, Department of Education) informed the meeting that the scheme had developed considerably since the draft had been prepared. If there were more funds, there would be a case for recommending the expansion of an existing activity.

(46) It was agreed to make no change in the report of the Advisory Committee.

Paragraphs 214-6

(47) It was agreed to refer the comments of the Expert Committee to the Director-General, as there was no difficulty in their acceptance.

Paragraphs 323-331, 337 and 338, 340-350, 372-378, 379 and 380 were adopted without comments.

(48) It was suggested at this stage that examination be made of the comments of the Expert Committee on page 19 on the establishment of an international school in Paris.

(49) The CHAIRMAN drew attention to document 8C/PRG/1, where the proposal to establish an international school in Paris was explained in detail by Mr. Elvin.

(50) Page 3 of the document, he pointed out, contained the comments of experts whose opinions had been collected. It was thought possible that the school might be made self-supporting, if two or three of the relevant countries made the services of teachers available for a certain period. The voting on that question by the Executive Board had been complicated. The motion to send the proposal forward to the Conference with a favourable comment had been defeated. On sending it forward with an unfavourable comment, the voting had been equal.

(51) Mr. AVIDOR (Israel) proposed the adoption of the view expressed on the question by the Expert Committee.

(52) Mr. SHAHANE (India) seconded the proposal. Many civil servants were content to place their children in schools that were not specially created for them, and the delegate of India saw no necessity for the project.

(53) Mr. ELVIN (Director, Department of Education) said that many Unesco parents would be glad of the opportunity of sending their children to a school

that was free of nationalist and sectarian prejudices. Neither French nor American parents (the United States of America had a school of their own) would be much concerned, and England was not too far away, but difficulties existed for other language groups. A realistic estimate, however, of the degree to which parents could feel the need of such a school would be difficult to give.

(54) Mr. PANNETON (Canada) was surprised at the proposal to set up an international school in Paris. It was not for Unesco to establish a school, even if such a school were essential to international civil servants. In what language would the pupils be taught? Might not the problem equally well arise in Montevideo, Brussels or, for that matter, Ottawa? After that the Organization could go on to found an international hospital, and so forth; it would be difficult to set a limit, once the principle had been agreed to. The Canadian delegate moved that the project be abandoned.

(55) Mr. AVIDOR (Israel) repeated his proposal that the Advisory Committee adopt the recommendation made by the Expert Committee as it stood.

(56) Mr. SILLER (Mexico) thought that the only way of combating the prejudices Mr. Elvin had mentioned was by arranging for the children of foreigners to live a school life together with those of nationals. He therefore considered that the view expressed by the experts should be accepted unchanged.

(57) The proposal of the Israeli delegate was adopted by 11 votes, with one abstention.

NATURAL SCIENCES

Paragraph 34

(58) Mr. AUGER (Director, Department of Natural Sciences) pointed out that the announcement of the International Geophysical Year had aroused considerable interest throughout the world. The best way for science to contribute to international co-operation was by organizing work in which scientists from all over the world could share.
(59) He recalled that, under existing projects, Unesco was to provide a permanent secretariat for the Geophysical Year (document 8C/5, Natural Sciences, paragraphs 34-36). A subvention of $8,000 was planned for 1955 and of $12,000 for 1956. Those amounts were insufficient. The International Council of Scientific Unions had asked for an extra $15,000, to be spread over the two years, while the Expert Committee had recommended a 20% increase in the subventions contemplated. Mr. Auger considered that it would be well to recommend an increase in the present estimates, even if the Advisory Committee did not feel able to sanction the maximum requested.

(60) The CHAIRMAN reminded the Committee that it was in a position to make any recommendation it wished, although, beyond attaching priority to specific items, no actual budgetary recommendations had been made.

(61) Mr. DUERING (Vice-Chairman of the Expert Committee), in reply to a question by the delegate of Israel, explained that the figure 20% was an arbitrary one and that the intention of the Expert Committee, in mentioning it, had been merely to express its desire that the subventions should be increased.

(62) Mr. LEE (United States of America) moved that the Committee make no change in its decision but merely draw the attention of the Programme Commission to the fact that a figure had been mentioned in the Expert Committee's report.

(63) Mr. COWELL (United Kingdom), on the understanding that 20% was not a binding figure, seconded the proposal, which was adopted.

Paragraphs 107 and 108 and 112

(64) No comments.

Paragraphs 116 and 117

(65) Mr. AUGER (Director, Department of Natural Sciences) said that in his view the Expert Committee's comment on Travelling Science Exhibitions was very apposite. Such exhibitions were a very good way of bringing home to the public the international character of modern science, for today no important discovery could be regarded as national; it represented the sum total of research carried out in different countries.

(66) It was decided, without discussion, that the recommendation be referred to the Director-General as a directive on which to base subsequent projects.

Paragraph 119

(67) Mr. AUGER (Director, Department of Natural Sciences) reminded the Committee that it had accepted this project. The Expert Committee had further recommended that a conference be shortly arranged in Asia to spread a public understanding of science. The recommendation could be referred to the Director-General as a directive to be used in drawing up the proposed programme and budget for 1957-58.

(68) Mr. DUERING (Vice-Chairman of the Expert Committee) pointed out that the conference mentioned in paragraphs 132-4 had been discussed at the same time as that proposed in paragraph 119 of the draft programme and budget. The Expert Committee had thought it possible that the Conference on the Public Understanding of Science might take place in Asia and the one on Science Teaching in Latin America. But that was a question for the Programme Commission to settle.

(69) Mr. COWELL (United Kingdom) thought that the activity should be linked with that of other

Specialized Agencies concerned with bringing the results of science into the lives of millions of people. The Expert Committee had recommended co-ordination between the various departments of the Secretariat. Should a reference to that aspect of co-ordination be made in the report?

(70) In reply to Mr. Cowell, Mr. AUGER (Director, Department of Natural Sciences) stated that the non-governmental organizations and Specialized Agencies relied on Unesco to collaborate with them in spreading scientific knowledge connected with their own particular fields of interest. Unesco worked in permanent collaboration with WHO and FAO.

(71) The Committee decided, without discussion, to refer the recommendation to the Director-General as it stood.

SOCIAL SCIENCES

Paragraphs 148-160

(72) The Committee recommended assigning the whole of this project to Category 2, with the exception of paragraphs 152-156, for which Category 3 was recommended.

(73) Mr. FLORKIN (Belgium) suggested that the Advisory Committee maintain the view it had already expressed with regard to the Study of factors which hinder and which encourage international understanding.

(74) It was decided accordingly, without discussion.

Paragraphs 174-180

(75) This proposal had been recommended for Category 1 by the Advisory Committee and, relative to it, draft resolution No. 8 was approved with a budget of $19,192.

(76) Mr. COWELL (United Kingdom) proposed that, as the two committees had concurred without consulting each other, no change should be made in the Advisory Committee's report.

(77) Mr. SOMMERFELT (Norway) supported that proposal, which was adopted.

CULTURAL ACTIVITIES

Paragraphs 153-160

(78) The Expert Committee commented favourably on these paragraphs. The Advisory Committee, on the other hand, with the exception of Section D, paragraphs 165-171, had classed these activities in Category 3.

(79) Mr. SEDES (Rapporteur) was of opinion that the Committee should use the expression "contemporary cultures", instead of "contemporary culture"; the latter term he failed to understand.

(80) Mr. THOMAS (Director, Department of Cultural Activities) confessed that this was a branch of his Department's activity which he had been sorry to see classed in a lower category. He stressed the ever important rôle of the classical humanities, from whatever country they stemmed.
(81) He had been somewhat surprised at the Committee's decision, and urged that the subject be given at least the same priority as the rest of the project. Unesco's decisions in the matter had a great effect in cultural congresses which could give Unesco voluntary assistance, and it was important not to discourage potential co-operation of that kind.

(82) Mr. DUERING (Vice-Chairman of the Expert Committee) shared the views of Mr. Thomas. The project as it had stood at first was a more equitable distribution of the sum available for activities referring to different parts of the world.

(83) Mr. AVIDOR (Israel) pointed out that the discussion was only on Sections A and B, since D had been recommended by both committees and C left out by both.

(84) Mr. COWELL (United Kingdom) moved that the Advisory Committee should maintain its attitude in respect of Sections A and B.

(85) The proposal was supported by the delegate of the United States of America, and adopted by 6 in favour, 4 against and no abstentions.

(86) Paragraphs 186-201, 212-232, 244-262, 287-300, 304-311, 302 and 303, 319-325, 327-336 and 346-350 were referred to the Director-General without comments.

Paragraphs 376-392

(87) The Advisory Committee had recommended adoption of the paragraph on Index Translationum in the corrigendum to document 8C/5 and also the adoption of draft resolution DR/26 on the same subject. That met with the Expert Committee's recommendation. Other remarks made by that Committee were of a general character and could be referred to the Director-General for his guidance.

(88) Mr. SOMMERFELT (Norway) was sceptical of the need for including not too widely spoken European languages. The task was a vast one, and ought to be limited.

(89) Mr. THOMAS (Director, Department of Cultural Activities) stated that the remark made at point 3 referred in particular to paragraph 390 (document 8C/5, Chapter on Cultural Activities). It was hoped moreover that the establishment of an International Federation of Translators would have the effect of improving the quality of translations.

(90) Mr. PANNETON (Canada) favoured the principle of economy. In his view, Member States' money could often be better employed otherwise

than in issuing publications. That did not however apply to the Index Translationum, which was of undoubted value.

(91) Mr. FLORKIN (Belgium) supported the proposal of the Norwegian delegate that the Advisory Committee should draw attention, in its report to the Programme Commission, to the fact that it doubted the value of issuing translations in other European languages.

(92) It was decided accordingly by 9 votes, with 3 abstentions.

(93) Mr. AVIDOR (Israel) added that he would have liked the proposal in sub-paragraph 3 of the Expert Committee's comments on paragraphs 376-392 recommended, with the suppression of the last words "by raising the status of translators".

(94) The Advisory Committee's report was, however, left as it stood.

MASS COMMUNICATION

Paragraphs 25-28

(95) The recommendation of the Advisory Committee on this project (that the appropriation be reduced to $10,000 for the two years, and that the entire project be placed in Category 3) was in direct contradiction to that of the Expert Committee.

(96) Mr. DUERING (Vice-Chairman of the Expert Committee) explained that the Expert Committee had been divided but, on the whole, favourable.

(97) Mr. COWELL (United Kingdom) was sympathetic to the proposal but proposed that no change be made in the report of the Advisory Committee.

(98) Agreed.

Paragraphs 37-76

(99) There was some disagreement on these activities between the two committees. At the suggestion of the delegate of the United States of America, the Advisory Committee made no change in its previous report on the subject.

Paragraphs 137-159

(100) The Advisory Committee had felt there was some duplication here with the activities carried out by Member States at a national level, and had accordingly voted a lower priority to the project contained in paragraphs 143 and 144, as well as 154. The Expert Committee had recommended those activities.

(101) Mr. DESJARDINS (Department of Mass Communication) drew attention to a new document (8C/5 Corr. 3), which gave complementary information on those activities.

(102) The fact was noted and the project referred to the Programme and Budget Commission.

Paragraphs 205-221

(103) The Advisory Committee's comment on this subject came under the general remarks made on voluntary international assistance. It had expressed the hope that emphasis would be laid on the educational aspects of project 5.7.

(104) Mr. ZUCKERMAN (Department of Mass Communication) explained that the difficulties over supplies had all been settled. The recommendation of the Expert Committee would entail the loss of $40,000 in the first year and $50,000 a year after that.

(105) It was agreed to draw the attention of the Programme and Budget Commission to the whole question.

Paragraphs 219 and 220

(106) No comment.

The meeting rose at 7.5 p.m.

# TWENTY - EIGHTH MEETING

*24 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**CONSIDERATION OF THE REPORT OF THE EXPERT COMMITTEE ON EDUCATION FOR INTERNATIONAL UNDERSTANDING AND CO-OPERATION** (document 8C/DIV/80) (continued)

**CHAPTER III (GENERAL RECOMMENDATIONS ON FUTURE PROGRAMMES)** (page 19):

(1) The CHAIRMAN stated that in Section A, the Expert Committee had suggested two procedures for co-ordination, namely, that it should either be effected by an inter-departmental committee or that the Director-General should be able to call on outside assistance.

(2) Mr. DUERING (Vice-Chairman of the Expert Committee) said that the two suggestions made in paragraphs (a) and (b) of Section A were not mutually exclusive. The idea in (b) was that, since the Executive Board was to become a body of government representatives, it would be useful if the Director-General could call on experts from outside. A committee of such experts might meet once a year to discuss general policy and advise the Director-General. That, of course, would have budgetary implications.

(3) The CHAIRMAN referred to the introductory remarks under Education, on page 13. There had been some question of making work in connexion with international understanding the responsibility of some definite division within the Secretariat.

(4) Mr. FRANCOIS (France) thought it obvious that the Department of Education had the chief part to play in all activities connected with education for international understanding and co-operation. It might be argued that that Department should provide the impetus for the work of co-ordination. He suggested, however, that such co-ordination should be initiated from above, and urged that an immediate representative of the Director-General would command greater authority. Mr. François thought that both procedures were defensible, since in fact everything would depend on the kind of person made responsible for the work. It would certainly be best to leave the Director-General and his assistants to choose that person.

(5) Mr. FLORKIN (Belgium) did not think that the remarks of the French delegate were at all incompatible with the paragraph in question, since the Director-General would in any case be responsible.

(6) Mr. ELVIN (Director, Department of Education) said that the Director-General fully understood the need for further steps to co-ordinate work on international understanding. No dogmatic statement about the machinery required was needed. The obvious method was to set up an inter-departmental committee, possibly with the Director-General in the Chair.

(7) The Director-General, he added, felt that experience with outside experts had been acquired during the previous two years, and that it would be better to rely on internal machinery to implement the suggestions in the report, leaving the possibility of reverting to outside assistance later

(8) Mr. COWELL (United Kingdom) had grave doubts about the need for the machinery suggested. The activities in question constituted the main work of Unesco, and some co-ordination was required in any case. He agreed that there was no call for committees of experts external to the Organization. Co-ordination could well be left to the existing machinery.

(9) Mr. FLORKIN (Belgium) agreed with the United Kingdom delegate. He reminded the meeting that one of the arguments in favour of the new structure of the Executive Board had been that it would enable the Organization to have broad contacts with a large number of experts. He therefore did not think that a new committee of experts was needed.

(10) Mr. LEE (United States of America) agreed with the delegate of France that a great deal depended on who was personally responsible for the co-ordination in question. At the same time, while education for international understanding was the main business of Unesco, the Secretariat was made up of people with varying interests and skills. The field was a new one, offering much opportunity for experiment, and some co-ordination at a high level was needed. The machinery in question might be associated with that which would be required to remodel the programme. For example, a small planning unit might be set up, responsible to the Director-General, and within that unit, one person might be made primarily responsible for education for international understanding.

(11) He was somewhat disappointed that more space had not been devoted in the report to major projects to be considered by the Secretariat in connexion with the remodelling envisaged by the Executive Board.

(12) Generally speaking, he felt that the Committee should recommend adoption of the suggestions made by the Expert Committee in paragraphs (a) and (b).

(13) Mr. AVIDOR (Israel) said that Section A on page 19 started off by stressing the need for concentration and co-ordination. Was not that enough? The Director-General should be left free to take such action as he saw fit over the next two years.
(14) Chapter III was entitled General Recommendations on Future Programmes. Would it not be better to head it simply General Recommendations?

(15) Mr. DUERING (Vice-Chairman of the Expert Committee) said that the Committee had made its recommendations with an eye to the 1957-58 programme, and had not intended paragraph (b) to apply to the programme for 1955-56.
(16) The Committee had been of opinion that, although steps had been taken to co-ordinate the 1955-56 programme, not enough had been done in that direction; hence paragraph (a).

(17) Mr. COWELL (United Kingdom) thought that paragraph (a) was merely stating the obvious, and, in so far as it might be taken to imply criticism of the Director-General, should be deleted.

(18) The United Kingdom proposal, supported by Belgium and Israel, to the effect that the Committee should not endorse Section A, (a) and (b), so that the Director-General should be free to take such action as he might see fit, was adopted by 8 votes to 4, with 1 abstention.

(19) It was agreed to consider Section B when discussing the future programme.

Chapter I - Unesco's methods of action

(20) Mr. AVIDOR (Israel) said that most of the comments under that heading held good for all Unesco departments. Perhaps it would be well to concentrate attention on the few specific suggestions bearing on education for international understanding.

(21) Mr. DUERING (Vice-Chairman of the Expert Committee) called attention to the second sentence in the second paragraph of the preamble: "While it (the Committee) directed its attention to those methods as they relate specifically to education for international understanding and co-operation, it believes that some of its recommendations and suggestions have or may have broader validity for Unesco." It was true that Sections I and II were very general in nature, stressing as they did the need for flexibility and empiricism.

(22) Mr. LEE (United States of America) said that it would be best to decide whether there were any points in the report likely to affect the Committee's recommendations on remodelling, or requiring consideration by the Conference, and to refer the report to the Programme and Budget Commission.
(23) Chapter I, as far as he could see, appeared entirely consistent with the Advisory Committee's previous recommendations.

(24) Mr. COWELL (United Kingdom) said that in Chapter I the Expert Committee seemed to have done more justice to certain methods of action (fellowships and exhibitions) than to others.
(25) At the fifth session of the General Conference, in Florence, a document had been evolved laying down the basic programme and suggesting methods of action. Had that document been used by the Expert Committee?
(26) Unesco as a whole needed a generally accepted statement of methods (perhaps a revised version of the fifth session document he had alluded to). In general, he felt that the report by the Expert Committee provided a valuable basis for a revision of methods.
(27) He welcomed Section II, paragraph (2), to the effect that the selection of methods must be based largely on empirical grounds.
(28) In general, he agreed with the delegate of the United States of America. Nothing in the report had any implications for the budget. Hence the document could merely be referred to the Programme and Budget Commission for study.

(29) Mr. SOMMERFELT (Norway) agreed with the previous speaker and with the delegate of the United States of America.

(30) Mr. DUERING (Vice-Chairman of the Expert Committee) said that the Committee had had the basic programme of Unesco as a working document in Paris.
(31) In connexion with three methods (international seminars, fellowships, and exhibitions), the Committee had made important recommendations. It had hoped that those recommendations would be endorsed by the Programme and Budget Commission and adopted, provisionally, for the next two years.

Section I: Direct and Indirect Action, and Annex on page 24

(32) Mr. COWELL (United Kingdom), referring to paragraph (d) on page 25, asked whether the Expert Committee's comments on the preparation of manuscripts implied any belief on the part of the Committee that the Secretariat would have to be strengthened to cope with that particular task.

(33) Mr. DUERING (Vice-Chairman of the Expert Committee) said that the section in question had been very cautiously worded.

(34) Mr. ELVIN (Director, Department of Education) said the point was a somewhat delicate one. A distinguished expert, called in to prepare a manuscript, might be insensitive to diplomatic requirements.
(35) There were staff members in the Secretariat with expert knowledge, although an expert called upon to write on a controversial subject on which he held strong views might tend to forget that he was also an international civil servant. Thus there were difficulties either way. The point which the Expert Committee was trying to make, as he understood it, was that while, in many cases, an expert member of the Secretariat could prepare a

manuscript more quickly and more economically than an outside expert, recourse to the Secretariat would necessarily have budgetary implications, since to prepare a difficult text a member of the Secretariat would have to be freed from his normal duties.

(36) Mr. FRANCOIS (France) thought that a writer's personality was bound to leave its mark on his writing, and, in some cases, readers in certain countries might be disconcerted thereby. Unesco could circumvent that obstacle, and prosecute its aim of offering the world a wide range of international opinion, if it were to entrust the drafting of manuscripts to a group instead of to a single expert. That method had already been tried by Unesco; certain publications on Western and Oriental ways of life and thought provided examples of its use.

(37) Mr. COWELL (United Kingdom) suggested that a reference might suitably be made to the possibility of having recourse to non-governmental organizations active in the fields concerned. Such organizations might well charge lower fees, and hence money would be saved.

(38) Mr. AVIDOR (Israel) thought that the point had been adequately covered in paragraph (b) on page 24 (Contracts with non-governmental organizations).

(39) The CHAIRMAN felt that the sense of the Committee was that expert knowledge existed in the Secretariat which could sometimes suitably be drawn upon for the preparation of manuscripts. The points made would be included in the report.

Section II - Methods in general

(40) Mr. FRANCOIS (France), referring to item (4), pointed out that great caution was needed.
(41) It sometimes took a long while for results to become apparent and they should not be expected to be sensational. The times were difficult and Unesco had in many instances to struggle against the tide; in such cases, the paucity of immediate results would not be a reason for giving up but on the contrary for persevering.
(42) Referring to item (5), Mr. François remarked that the last part of the paragraph in French frankly astonished him: "découvrir dans les diverses cultures les grands facteurs qui, pendant les cinq premières années de l'existence, contribuent essentiellement à l'adoption d'une saine attitude envers les peuples appartenant à d'autres cultures."
(43) Although some educational psychologists regarded even the pre-natal months as being of decisive importance in the formation of a child's mind, Mr. François was convinced that until the age of 5, and even after, culture meant very little to children. The most important years in a person's life were those from 11 to 18, as it was then that he moulded his personality, amidst the difficulties and stresses of the adult world he was entering. Were there not cases of children who had been brought up in an environment utterly unconcerned with moral considerations but, having passed their adolescence in a good educational atmosphere, had become outstanding men and women?

(44) The French delegate concluded by stating that the paragraph as it stood seemed to him unsuitable for inclusion in a Unesco document.

(45) The CHAIRMAN said that he, too, had been much worried about the point raised by the delegate of France. The Secretariat must not lose heart if the results of its surveys were negative. The work it did was necessarily long-term.
(46) As regarded the strong views expressed by the delegate of France in connexion with paragraph (5) on page 8, he had listened with sympathy. The English text seemed to bear very little resemblance to the French.

(47) Mr. DUERING (Vice-Chairman of the Expert Committee) explained that there were indeed discrepancies between the English and French texts. The section alluded to by the delegate of France in his statement on paragraph (5) had been transferred in a modified form to the Annex to Chapter III (page 29), under the heading: Research in Child Psychology.

(48) Mr. ELVIN (Director, Department of Education) said that the evaluation which the Expert Committee had had in mind was of the ordinary common-sense kind, and was not evaluation as used by sociologists in a technical sense. It was no more than common sense for the Secretariat to ask itself whether its activities had produced the results expected of them.

(49) It was agreed that the French text of Section V of the Annex to Chapter III (Research in Child Psychology) should be endorsed and that a statement should be included in the report for that purpose.

Section III (page 8) - Specific methods of action

Sub-section A

(50) No comments.

Sub-section B - International seminars

(51) Mr. SOEBROTO (Indonesia) thought that three weeks was quite long enough for a seminar, and proposed that the recommendation made in paragraph (3) (a) be altered accordingly.

(52) Mr. DUERING (Vice-Chairman of the Expert Committee) said that the paragraph represented a compromise. While agreeing that in some cases three weeks would be enough, the Committee had felt that the first week was always necessary for participants to get to know each other and discuss their problems.

(53) Mr. FRANCOIS (France) was very critical of the system of seminars, which, in the opinion of the French delegation, did not produce results commensurate with the very large sums spent on them. At their best, they benefited no more than a handful of educators, among the millions in the world; at the same time they monopolized the services of Unesco officials for weeks on end. He

himself had attended five seminars, and did not feel that Unesco had derived any appreciable advantage from any of them; they had not issued any worthwhile documents. The Organization had not the means to indulge in that kind of luxury at the present time and should give up the method in favour of that described in paragraph 4.

(54) Mr. ELVIN (Director, Department of Education) said that the Secretariat was grateful to the Expert Committee for setting out what seminars could be expected to do. Seminars were a means of higher education. They were not meant to do research or produce original documents. The most successful were those with clearly defined subjects of study. As an example, he would refer to a seminar held two years ago, in Ceylon, on the teaching of modern languages. If a seminar was to be successful, another essential condition was that the participants be most carefully chosen.
(55) There was a great deal to be said for the alternative mentioned in paragraph (4) (c), namely, that National Commissions should organize seminars for their own nations, who would all enjoy a common background, and that Unesco should add an international flavour by sending a few staff members or persons from other parts of the world.

(56) Mr. FLORKIN (Belgium) thought that the section of the report concerned was most constructive and that, in adopting it, emphasis should be laid on its special claims to attention.

(57) Mr. SOMMERFELT (Norway) wished to make a reservation about paragraph (4) (b). It would be difficult to find writers of the highest possible quality and their services would be costly.

(58) Mr. SILLER (Mexico) thought that the Secretariat should be most careful in choosing participants when such international seminars were organized. He asked for clarification of the last sentence in paragraph (4) (a) as he could not see why, if Unesco selected participants, it should necessarily have to pay their travelling expenses.

(59) Mr. ELVIN (Director, Department of Education) said that the Committee meant that, if the Director-General chose to invite participants from different States, he would presumably have to pay their travel costs.
(60) As regarded the point made by the delegate of Mexico, the practice was for the Secretariat to write to States asking them to nominate participants. It could not veto their choice. The only way it could help was to indicate clearly the type of qualifications such persons ought to possess.
(61) Some highly successful national seminars had been held of the kind mentioned in paragraph (4) (c) - for example, a seminar in Italy on adult education. He hoped there would be more.

(62) Mr. PANNETON (Canada) found a discrepancy between Mr. François' severe criticisms of the seminars and Mr. Elvin's opinion that some of them had been successful, and felt that further information was necessary.

(63) Mr. ELVIN (Director, Department of Education) said that some of the seminars organized by his Department had not justified the money spent on them. On the other hand, the seminar in Ceylon, although it might be considered more a meeting of experts than a meeting for the higher education of participants, had been outstandingly successful. Some seminars were good, some bad, and some indifferent. The seminar as a method should not be condemned outright.

(64) Mr. FRANCOIS (France) asked Mr. Elvin whether a seminar devoted to a single closely defined subject would be a study meeting or an educational meeting.
(65) He remarked that a number of seminars had failed to enhance Unesco's reputation even in the minds of some of those taking part, since all they felt they owed the Organization was an opportunity to travel - an attitude implying little real respect for Unesco's achievements.

(66) Mr. FLORKIN (Belgium) thought that paragraph (3) (a) should satisfy the Indonesian delegate, since it specified four weeks as the maximum length of a seminar.

(67) The CHAIRMAN observed that there was a grave discrepancy between the English and French texts of paragraph (3) (a). Perhaps, if the English text were brought into line with the French, which specified that seminars should not last more than four weeks, the point raised by the delegate of Indonesia would be taken care of.

(68) Mr. COWELL (United Kingdom) said that seminars seemed to be held chiefly by the Cultural Activities Department, and it might be well to hear from that Department before taking a decision. He was under the impression they had achieved some success, for example, in the organization of libraries in the underdeveloped countries.
(69) While recognizing that some seminars were valuable, he was inclined to share the doubts of the delegate of France whether their value was in proportion to their high cost.

(70) Mr. SILLER (Mexico) asked whether it was the general practice for Unesco to pay the travelling expenses of those attending international seminars or whether part of the cost was borne by the individual States.

(71) Mr. KIRPAL (Deputy Director, Department of Cultural Activities) confirmed what the delegate of the United Kingdom had said. His Department had much experience in organizing seminars on the rôle of museums and libraries, and of art in education.
(72) The seminars organized by his Department were more than educational meetings. Often they were meetings of experts and were followed by concrete action, such as the creation of an international association to continue work begun at the seminar.
(73) A seminar had been held in Tokyo only two months before, on the rôle of arts and crafts in

education, with particular reference to community development. It had been restricted to Southern Asia and the Far East. He understood that in general the seminar had proved a very great success.
(74) Replying to the point made by the delegate of Mexico, Mr. Kirpal said that Unesco did not pay travel costs. It merely paid the cost of providing interpreters, document services, etc. Board and lodging were paid for by Unesco in co-operation with the host country.

(75) The CHAIRMAN observed that an important point had been raised. If seminars were just a method of higher education, could Unesco appropriately organize them?

(76) Mr. FRANCOIS (France) was convinced that the seminar on museums and education, for instance, would have lasted a week instead of a month if it had not been held in Athens.
(77) He proposed the following resolution: "The Advisory Committee considers that, in view of the Organization's present limited resources, the expenditure on seminars is too high for the results obtained."

(78) Mr. PANNETON (Canada) feared, from the various statements he had heard, that the seminars were far more successful from the participants' point of view than from that of Unesco itself.
(79) Accordingly, considering the moderate terms of the resolution and the desire for economy behind it, he felt inclined to give it the support of the Canadian delegation, not in order to abolish the seminar system altogether but to emphasize the need for the most careful choice of subjects, participants and place of meeting.

(80) Mr. LEE (United States of America) said that the Committee was obviously very critical of seminars as an institution, and it was its duty to make that view known to the General Conference.

(81) The CHAIRMAN, agreeing, said that it would be a pity if the Committee were to condemn all seminars in all circumstances.

(82) Mr. AVIDOR (Israel) pointed out that the delegate of France had been criticizing seminars as they used to be held. But all would agree that expert meetings, as mentioned in paragraph (4) (a), were valuable.

(83) The CHAIRMAN observed that the Committee seemed to share the Expert Committee's doubts about the value of seminars for higher education. It could, he felt, endorse the Expert Committee's recommendations, subject to the comments already made about payment of travel costs and the engagement of writers.
(84) He asked whether the Expert Committee was advocating a change of policy in regard to travel costs.

(85) Mr. DUERING (Vice-Chairman of the Expert Committee) said that if, as suggested in paragraph (4) (a), Unesco made the final choice of participants, it would probably have to meet their travel costs.

(86) Mr. ELVIN (Director, Department of Education) said that the practice was to indicate to Member States the number of participants in the seminar and the qualifications expected of them. Then the Member States made their nominations. The Director-General had no right of veto.

(87) Mr. COWELL (United Kingdom) was in favour of keeping the present system, whereby the States sending participants were required to pay travel costs.
(88) It was most important that National Commissions should be consulted in the choice of participants.

(89) Mr. SILLER (Mexico) seconded the United Kingdom delegate's suggestion, as he considered that, if the individual States had to pay the travel expenses of the participants, the choice of those to attend international seminars was likely to be better.

(90) Mr. ELVIN (Director, Department of Education) said that the delegate of Mexico was not quite right. It did, unhappily, sometimes happen that distant States nominated persons with doubtful qualifications who for some reason happened to be in or near the country where the seminar was to be held.
(91) It was expressly stated in paragraph (4) that the suggestions made were to be regarded as experimental.

(92) Mr. AVIDOR (Israel) suggested the adoption of paragraph (4) (a) as it stood.

(93) Mr. FRANCOIS (France) agreed that the poor results of some seminars had been partly due to differences in the qualifications of the participants, which had been so great that, intellectually, they did not speak the same language and therefore could not combine to accomplish anything constructive.
(94) He therefore thought it essential that Unesco should have the final decision on the choice of members of the seminars, after consultation with National Commissions.

(95) Mr. SOEBROTO (Indonesia) thought it reasonable to suggest, as the delegate of the United Kingdom had done, that Member States should continue to pay travel costs, if the seminar were on a subject of regional interest only. But if the seminar were on a matter of universal significance and of general importance to Unesco as a whole, it would be unreasonable to expect a distant State to bear such expenses.

(96) Mr. SOMMERFELT (Norway) agreed with the delegate of the United Kingdom in attaching considerable importance to consultation with National Commissions before participants were chosen.

(97) Mr. JUNANKAR (India) agreed with the delegate of Indonesia. If a seminar were of genuinely international interest, the persons chosen by Unesco could not be asked to pay their travel costs.

(98) The CHAIRMAN put paragraph (4) (a) to the vote, it being understood to mean that the Expert Committee was recommending payment of travel costs by Unesco as an experiment, providing it could make the final choice of participants.

(99) Paragraph (4) (a) was endorsed by 12 votes to none, with 1 abstention.

Paragraph (4) (b):

(100) Mr. JUNANKAR (India) said that that recommendation was unnecessary, since in every seminar there were suitably qualified members of the Secretariat available.

(101) Mr. DUERING (Vice-Chairman of the Expert Committee) said that, in the view of the Expert Committee, there was a need for attractive publicity, and not just factual reports. It might be possible to engage a journalist of standing to produce the material the Committee had had in mind.

(102) Mr. ELVIN (Director, Department of Education) said that the experiment had been tried and proved a moderate success.

(103) Mr. AVIDOR (Israel) suggested that the Committee merely draw the attention of the Secretariat to the need for better publicity.

(104) Mr. LEE (United States of America) suggested that the Committee should merely call attention to the point in its report and refer the matter to the Working Party on Mass Media.

(105) This suggestion, put in the form of a motion, was adopted by 12 votes to none, with 1 abstention.

Sub-Section C: Fellowships (page 9):

(106) Mr. SOMMERFELT (Norway) thought that paragraph (5) (d) was too rigid. It was sometimes better to let a person stay a considerable time in his host country.

(107) Mr. W. CARTER (Chief, Exchange of Persons Service) said that the points made in the Expert Committee's report represented the significant facts of the experience acquired by Unesco. The problem had been given expert study.
(108) The problem mentioned by the delegate of Norway existed in the case of fellowships, administered by the United Nations and other Specialized Agencies, for older students sent abroad for intensive training. The application form to be filled in by the candidate was designed to ensure that only the right kind of person was successful. In the case of junior students the problem did not exist.

(109) Mr. FLORKIN (Belgium) agreed with Mr. Sommerfelt. Paragraph (5) (d) imposed needless restrictions, and might in certain instances preclude a highly desirable development - namely, a tour of several countries by the same fellowship-holder, or a long stay in one country.

(110) Mr. AVIDOR (Israel) agreed with paragraph (1) and the first line and a half of paragraph (2). What was meant by a fellowship completely failing to promote the growth of international understanding? He disagreed with the second half of paragraph (2) and with paragraphs (3) and (4). Nor could he agree with the recommendations made about study and evaluation. Ten or fifteen years would be required before the results of the measures outlined in paragraph (5) could be assessed.

(111) Mrs. DOUGLAS (Canada) said that all with experience of international fellowships would agree that it was a very important part of Unesco's activities. Great care was needed in selecting the fellows. She entirely agreed with paragraph (5) (a), urging care in so doing. It was particularly important that the fellow should have an adequate knowledge of the language of his host country.

(112) Mr. DUERING (Vice-Chairman of the Expert Committee) said that the point raised by the delegate of Israel, in connexion with the second part of paragraph (2), was more fully developed in paragraph (5) (a).

(113) Mr. SILLER (Mexico) thought the wording of paragraph (5) (f) was presumptuous, for there was no warrant for supposing that a fellowship-holder from an underdeveloped country who spent two or three months in a highly developed country would end by despising his own land. He added that in his view, paragraph (5) (g), which referred to the selection of members of groups of students, underlined still more the importance of the problems already raised in connexion with international seminars and committees of experts.

(114) Mr. ANGELL (United States of America) was familiar with research in that particular field, and could not agree with the delegate of Israel. In the United States of America much had been learnt from a close study of what had happened to fellows after their return home. The least Unesco could do would be to correlate such studies with an eye to a better selection of fellows.
(115) As regarded the point made by the delegate of Mexico, it had recently been found, on investigation, that in a certain case most of the fellows had returned to their host country. It was important to ensure that fellows did in fact return home and put their knowledge to good use there. Fellowships should not encourage emigration.

(116) Mr. AL-KOUSSI (Egypt) spoke as representative of a country which was greatly dependent on the more highly developed countries. He had been in close contact with many cases in which the fellow had not been made happier and had not proved useful to his country. He therefore agreed with the delegate of the United States of America.

(117) Mr. SEDES (Rapporteur) did not agree with the criticisms made by the delegate of Mexico. The paragraph in question had undoubtedly been difficult to draft, but thanks were due to the Expert Committee for having laid emphasis on a very

important aspect of the question, since it had been found that fellowship-holders very often lost contact with their own country. It would be better, however, not to use the term "denationalizing", which would be inappropriate in the case of citizens from countries which ranked as part of the metropolitan territory. He recommended that the paragraph be redrafted to make it more flexible and wider in scope.

(118) Mr. AVIDOR (Israel) was satisfied with the explanations given about paragraph (2). As regarded paragraphs (3) and (4), he still thought it was too early for Unesco to assess results.

(119) Mr. W. CARTER (Chief, Exchange of Persons Service) said that Unesco was always studying its working methods with a view to achieving better results. It was part of Unesco's routine duties to ascertain whether the knowledge acquired by fellowship-holders had been of advantage both to them and to their countries.

(120) The CHAIRMAN said that such studies were already going on and needed no particular emphasis.

(121) It was agreed that paragraph (5) (d) should be understood to refer exclusively to persons receiving technical training, and not to young people.

(122) Mr. LEE (United States of America) proposed that the Committee endorse paragraph (5) (f).

(123) Mr. SILLER (Mexico) again urged that the proposal in paragraph (5) (f) was too strongly worded and bore little relation to the facts; he suggested that the Committee should therefore state that there had been disagreement on the point.

(124) Mr. FREY (German Federal Republic) supported the United States proposal.

(125) Mr. AVIDOR (Israel) objected to the word "denationalizing" and suggested "alienating" instead.

(126) Mr. W. CARTER (Chief, Exchange of Persons Service) said that paragraphs (f), (h) and (i) all dealt with the same problem - the adjustment of the fellow to his host country and his readjustment on return home. They were simply a statement of the problem.

(127) The Committee then endorsed, by 10 votes to 1, the recommendations appearing under C. Fellowships, subject to the comments made in the course of the discussion.

The meeting rose at 1.10 p.m.

# TWENTY-NINTH MEETING

*24 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**CONSIDERATION OF THE REPORT OF THE EXPERT COMMITTEE ON EDUCATION FOR INTERNATIONAL UNDERSTANDING AND CO-OPERATION (document 8C/DIV/80) (continued)**

(1) The CHAIRMAN requested the Committee to continue its examination of document 8C/DIV/80 from Sub-Section D on page 11.

D. Advisory Committees

(2) No comments.

E. International Conferences

(3) No comments.

F. Pilot Projects

(4) No comments.

G. Exhibitions

(5) Mr. FLORKIN (Belgium), alluding to the second paragraph of Section G, where it was stated that, "For example, it might be shown how the same themes have been treated by artists or schools of artists in different countries", remarked that the proposal might be dangerous. What counted in such exhibitions was not so much the theme as the feeling behind its treatment: international affinities could be brought out by showing that the same type of feeling had informed work in different countries. Mr. Florkin would be very sorry to see Unesco arranging exhibitions on particular themes, such as The Last Judgment, etc.

(6) As delegate of Australia, the CHAIRMAN fully supported the remarks of the delegate of Belgium. He asked the Committee if it wished to refer to the point in its report.

(7) Mr. COWELL (United Kingdom) thought that some reference should indeed be made to the point in the Committee's report.

(8) On the general subject of exhibitions, he was of opinion that the three following points should be borne in mind:

(1) Exhibitions, as a technique, were normally very expensive;
(2) The results of exhibitions were usually very hard to evaluate;
(3) There was need for further research into the value of exhibitions and visual presentation generally.
(9) The last point might be more appropriately placed in the section on mass media of communication, but he would be sorry to see it confined to that section. Research should be undertaken, for example, on the value of attempts to give statistical material in pictorial form, and also on the wider use of diagrams. He hoped that reference would be made to the three points he had mentioned in the Committee's report.

(10) Mr. ELVIN (Director, Department of Education) assured the delegate of the United Kingdom that the value of visual aids had already been the subject of inter-departmental discussions within the Secretariat. It was true that an emotional aura of unreflecting approval surrounded visual aids in some circles. His own opinion was that a great deal depended upon the educational efforts which accompanied them. It was certainly a very important question, as, unless results were properly evaluated, Unesco would be in danger of wasting money.

(11) Mr. FRANCOIS (France), who had been much interested in the United Kingdom delegate's observations, recalled that when he was in Belgrade in 1952 he had had an opportunity of seeing for himself how interested workers and students were in the exhibition of colour reproductions arranged by Unesco. Such exhibitions were not only of educational value, but served as propaganda for Unesco. In France, museums and trade fairs frequently asked for exhibitions dealing with Unesco. Combined with films and lectures, they were of great help both in popular education and in spreading knowledge of Unesco's work.

(12) Mr. AVIDOR (Israel) observed that not all exhibitions were costly. Unesco's exhibitions of art reproductions, for example, were very reasonable.

(13) Mr. SILLER (Mexico) asked how many of the art reproductions had been sold.

(14) Mr. KIRPAL (Deputy Director, Department of Cultural Activities) replied that 8 Member States had bought 12 sets of reproductions as a result of travelling exhibitions of colour reproductions organized in 1949; as a result of further exhibitions, various sets of reproductions had been bought by 7 Member States in 1951 and by 10 Member States in 1952.

(15) Sub-Section G was approved, subject to the comments which had been made by members of the Advisory Committee.

H. Mass media of communication

(16) Referring to the first sentence of the second paragraph, Mr. COWELL (United Kingdom) proposed that the Committee mention in its report that it shared the views of the Expert Committee on the term mass media.

(17) Agreed.

(18) The CHAIRMAN requested the Committee to turn back to the introduction to document 8C/DIV/80 on page 4.

Terminology and Introduction

(19) Mr. AL-KOUSSI (Egypt) drew attention to the important statement contained in the fourth sentence of paragraph (2) - Principles of action - beginning: "Since tensions, and the attitudes which cause them. ...". That statement connected up with the last paragraph of the section entitled Terminology and raised a point which he wished to mention. He did not agree with the view expressed that morning by the delegate of France that education during the later years of childhood was more important than during the earlier years. In his opinion, the foundations of the main attitudes were really laid in early childhood. Instead, therefore, of extending co-ordinated experimental activities in education for international understanding and co-operation to teacher training institutions and making it a major project, as suggested on page 14 of document 8C/DIV/80, he would prefer to see more attention devoted in Unesco's programme to education for international understanding and co-operation in early childhood. He proposed that such a recommendation be included in the Committee's report.

(20) Mr. FLORKIN (Belgium) admitted that the Egyptian delegate's remarks were very pertinent, but reminded the Committee that it had already agreed to the point he had raised when considering Section V of the Annex to Chapter III (Research in Child Psychology).
(21) As for the Introduction, it expressed the philosophy of the Expert Committee, which had there set forth its views in general before particularizing in its study of the programme resolutions. If the Advisory Committee launched into a discussion of the philosophy of the Expert Committee, Mr. Florkin would be obliged to make reservations on almost every line; some of the views expressed in the Introduction seemed to him to be very much open to dispute, and he thought the entire responsibility for them should rest with the Expert Committee.

(22) While agreeing that it was not desirable to go into the philosophy of the Expert Committee's report, the CHAIRMAN reminded members that they had to give some sort of guidance to the Programme and Budget Commission.

(23) Mr. FRANCOIS (France), replying to the Egyptian delegate's remarks, did not think that children should be left without education for international understanding until the age of 10 or 12 - it was never too late or too early for education. He had simply wished to record a protest against the

undue importance attributed to the first five years of childhood, which, though they should not be neglected, did not seem to him to be decisive.
(24) With regard to the Introduction, he agreed with the Belgian delegate. The general tone seemed over-emphatic, and there was at once too much optimism and too much pessimism. A document issued by Unesco should have a more sober approach. The first sentence of the Introduction might raise a smile, and the philosophical statements of views on man's destiny might lead to endless discussions. Summing up, Mr. François recognized the practical value of the report of the Expert Committee, but thought that entire responsibility for its philosophy should be borne by its authors.

(25) Mr. AVIDOR (Israel) agreed with previous speakers that the Introduction left a great deal to be desired. Experts naturally had a tendency to see things from only one point of view and he thought it an exaggeration to say that it was Unesco's prime purpose to promote education for international understanding and co-operation. The fight against ignorance and illiteracy was undoubtedly equally important.

(26) Mr. COWELL (United Kingdom) had doubts regarding terminology: one educated people, but one did not educate them for things: when trying to produce specific attitudes, it would be more correct to use the word train. Education was the development of the human spirit.

(27) Mr. ELVIN (Director, Department of Education) reminded the Advisory Committee that the report was the outcome of a meeting of an expert committee convened to give the Director-General advice, so that there was no need to consider it as a Conference document, every word of which had to be approved or amended. The Director-General had asked the experts to consider the draft programme for 1955-56, but the rest of the report was for general interest. The Advisory Committee could therefore merely take note of the Introduction. If, however, it wished to consider the substance, it could select a few of the main ideas for discussion; it could then draw attention to those ideas in its report, adding, if it wished, that it did not entirely approve the general tone and emphasis.

(28) Mr. FRANCOIS agreed with the delegate of the United Kingdom that the prime purpose of education should be to develop the human spirit, and hoped that the last sentence of the section on terminology would be amended by introducing that idea. He moved the following amendment: "The word 'education' in the proposed formula is not limited to the schools, but should be broadly interpreted, to cover all that makes for men and women who will be free and responsible citizens".
(29) He thought it would be unwise to endorse the Israeli delegate's views unreservedly; Unesco might be drawn on to deal with all educational problems, whereas its main task should be to see that curricula in all countries made some allowance for developing international understanding and co-operation. That was Unesco's individual and unique contribution. It could never become a supernational Ministry of Education - no budget could possibly finance such a heavy task.

(30) The CHAIRMAN asked if the Committee would agree to denote general approval of the report, subject to the reservations expressed by members in respect of individual items; it could say that the Introduction embodied the attitude of the experts, but that the Advisory Committee had not felt it necessary to go into the philosophy of the report. He suggested that it be left to the Rapporteur to draft a statement on those lines for inclusion in the Advisory Committee's report.

(31) Agreed.

Annex to Chapter II (pages 26 and 27)

(32) Referring to the example of a Unesco Week programme, paragraph (f), Mr. COWELL (United Kingdom) remarked that the words suitable arrangements were somewhat vague. By way of guidance for the Director-General, he said that a model conference had been arranged by university students in the United Kingdom, with the aim of repeating in miniature what was going on at the present time in Montevideo.

(33) At the CHAIRMAN's suggestion, it was agreed to refer the proposals in the Annex to Chapter II to the Director-General, who would have an opportunity to study them during 1955 and 1956 and to include them either in the current work plans or in those for 1957-58.

Annex to Chapter III (pages 28-30)

(34) The CHAIRMAN proposed that the Committee follow the same procedure as for the Annex to Chapter II.

(35) Referring to materials for teachers, Mr. COWELL (United Kingdom) asked if someone in the Secretariat would be entrusted with the task of writing the small 100-page pamphlet on the great civilizations of the world.

(36) Mr. PANNETON (Canada) made some comments on the projects listed in the Annex to Chapter III. To condense the history of The Great Civilizations of the World into 100 pages would be a feat for which he would not care to be made responsible. It would be interesting to have some details about the size of the edition and the cost of such a publication. The idea of bringing out a small pamphlet on the great religions of the world also seemed dubious: it was an extremely delicate subject, and Unesco might provoke reactions which would be unfortunate for the Organization. It was questionable whether Unesco should properly engage in the preparation of such textbooks when libraries were full of adequate works. Unesco could make better use of its time and resources.

(37) The CHAIRMAN observed that those were ideas

put forward by individual members of the Expert Committee; the Committee as a whole had not had time to examine them in detail. He thought that it would be better for the Advisory Committee not to discuss them but to refer them to the Director-General for possible inclusion in the work plans for 1957-58.

(38) Mr. PANNETON (Canada) thought that that was a rather dangerous policy, for the usual tendency was to assume that silence on the part of a conference meant assent.

(39) Mr. LEE (United States of America) understood that the ideas under consideration had been put forward in connexion with the remodelling of Unesco's future programme. He therefore suggested that they be considered when that item was taken.

(40) The CHAIRMAN agreed, but hoped that the Committee would not go into their substance, as they did not concern the programme for 1955-56.

(41) Mr. AVIDOR (Israel) proposed that the various themes be referred to the Director-General for study during the next two years.

(42) Mr. COWELL (United Kingdom) thought that the Committee should at least give the Director-General some guidance. Personally, he would be in favour of discouraging the Director-General from undertaking some of the projects listed.

(43) Mr. ELVIN (Director, Department of Education) pointed out that the various projects would, in any case, go through the usual stern, critical process within the Secretariat.

(44) Mr. PANNETON (Canada) remarked that, if the Committee considered that it was too early to examine and discuss the report, it would also seem to have been too early to submit it. The Annex to Chapter III was part of the report and could not be separated from it.

(45) The CHAIRMAN observed that the introductory statement made it clear that the proposals in the Annex were of a different character from those in the report itself; the latter had been approved by the Expert Committee as a whole, but the former had not.

(46) Mr. LEE (United States of America) did not think that it was within the Committee's assignment or competence to discuss the substance of the proposals at the present time.

(47) Mr. COWELL (United Kingdom) asked how it was, then, that the Advisory Committee had been competent to discuss the substance of some seventy draft resolutions.

(48) The CHAIRMAN explained that the draft resolutions had been referred to the Advisory Committee for advice on whether or not they should be included in the draft programme and budget for 1955-56. The proposals at present under discussion only concerned the programme for 1957-58.

(49) Mr. COWELL (United Kingdom) nevertheless considered that the Committee was competent to say whether, in its opinion, the Director-General should study certain of the proposals or not.

(50) Mr. FLORKIN (Belgium) pointed out that the introductory paragraph in the Annex to Chapter III was quite clear in that respect. It stated, in fact, that "Time did not permit the Committee to make a detailed study of proposals put forward by several of its members during the meeting." The Annex therefore did not express the opinion of the Expert Committee and, in the circumstances, Mr. Florkin did not see any necessity for the Advisory Committee to take a decision on it.

(51) The CHAIRMAN regretted that he had not been able to convince the delegate of the United Kingdom.

(52) Mr. COWELL (United Kingdom) replied that he would accept the procedure suggested, provided that the Chairman's remarks were included in the Committee's report.

(53) It was agreed to refer the proposals in the Annex to Chapter III to the Director-General for study, and to include the explanations given by the Chairman in the Committee's report.

(54) The CHAIRMAN announced that the Committee had concluded its consideration of document 8C/DIV/80.

The meeting rose at 4.50 p.m.

# THIRTIETH MEETING

*25 November 1954 at 12 noon*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**REPORT OF THE ADVISORY COMMITTEE ON PROGRAMME AND BUDGET (PART IV): EXAMINATION OF THE FINAL REPORT OF THE EXPERT COMMITTEE ON EDUCATION FOR INTERNATIONAL UNDERSTANDING AND CO-OPERATION**
(document 8C/BUD/3 (prov.))

(1) The French text of document 8C/BUD/3 (prov.) being the only one available at the beginning of the meeting, the Committee agreed to begin by considering the French text, the English and Spanish-speaking members being free to submit their comments on the drafting of the English and Spanish translations later.

(2) Mr. SEDES (Rapporteur) mentioned that, in writing his report, he had been guided by two considerations: to give a faithful account of the Advisory Committee's deliberations, and to provide the Programme and Budget Commission with the reference document it expected.
(3) For the sake of clarity and logic, he had not repeated certain details of the discussion, which would appear in the minutes of the various meetings, and he had made a few changes in the order of items.

(4) The introductory remarks on page 1 were adopted without comment.

Education (page 2 of provisional English text)

(5) Referring to paragraphs 186-192, Teaching about the United Nations, Mr. GUITON (representing the Director-General) said that several contracts had been proposed.

(6) Mr. SEDES (Rapporteur) pointed out that the members of the Secretariat who had attended the meeting had mentioned only one - the contract with the International Association of Universities.

(7) The CHAIRMAN suggested that the very useful word "notamment" be included in the French text ("(notamment le contrat avec l'Association internationale des Universités)") English - "(for instance, a contract with the International Association of Universities)".

(8) Mr. COWELL (United Kingdom) said that it would be well if the Committee's previous attitude, mentioned in the last line, were to be briefly outlined.

(9) In answer to a question from Mr. PANNETON (Canada) concerning the previous paragraph, Mr. SEDES (Rapporteur) said that the words to leave it to rightly reflected the Committee's desire to leave the choice of the necessary measures to the discretion of the Director-General and his colleagues.

(10) The CHAIRMAN pointed out that the words Secrétariat général" in the second and third lines of the same paragraph headed Paragraphs 179-185: Textbooks and Teaching Materials (French text) should read simply "Secrétariat".

(11) Mr. COWELL (United Kingdom), referring to the same paragraph, said he had been under the impression that, by a vote of 12 in favour, with one abstention, the Committee had supported the idea of holding only one conference.

(12) The SECRETARY read out the experts' recommendation on the matter (document 8C/DIV/80, page 13): "The Committee strongly supports the plan for textbook studies which focuses attention on the problems of promoting understanding between peoples of widely different cultural traditions. It questions, however, whether two conferences should be held in successive years, 1955 and 1956, in view of the slow tempo of such studies".

(13) The CHAIRMAN said that, if he remembered rightly, the Committee had strongly endorsed the experts' view. Perhaps the Rapporteur would be able to convey that in his report.
(14) Mr. Duering had expressed the opinion that the vote taken would involve abandonment of the conference which would have been held in South East Asia.

Natural Sciences

Paragraph 34. International Geophysical Year

(15) Mr. COWELL (United Kingdom) asked whether the Committee had not decided, by vote, to reject the experts' recommendation for a 20% increase in subventions.

(16) The CHAIRMAN said that the Committee had agreed to include in its report a statement to the effect that 20% was a purely arbitrary figure.

(17) Mr. SEDES (Rapporteur) then explained that the Committee had noted that the 20% increase proposed by the experts was not based on any very exact estimates, and had wished to stress that the figure was merely a suggestion.

(18) Mr. COWELL (United Kingdom) suggested that the words a titre indicatif be inserted in the French text.

Social Sciences

Paragraphs 174-180: Information campaign on race problems

(19) The CHAIRMAN said that precise figures should be given instead of the $20,000 mentioned as the additional credit proposed for the wider distribution of Unesco publications.

Cultural Activities

(20) No comments.

Mass Communication

Paragraphs 205-221: Unesco Coupon Scheme

(21) The CHAIRMAN said it would be well if the former attitude of the Committee were to be briefly outlined.

Establishment of an international school in Paris

(22) Replying to a remark by Mr. AVIDOR (Israel), who was in favour of adding, at the end of the paragraph, "even if its establishment is admitted to be necessary", Mr. SEDES (Rapporteur) recalled that the Committee, with one exception, had decided to endorse the experts' views - as was in fact stated in the paragraph in question.

(23) Following a suggestion from Mr. PANNETON (Canada) for the deletion of the second half of paragraph 23 from "that: ....", the CHAIRMAN read out the experts' recommendation.

(24) The Committee then confirmed that it wished to keep the wording as it stood.

Unesco's Methods of Action

(25) The CHAIRMAN observed that, in the French text, the words "Commission générale du Programme et du Budget" should read "Commission du Programme et du Budget".

I. Direct and Indirect Action

(26) The CHAIRMAN questioned the words biased and not competent (French: partiellement incompétents) as applied to experts drawn from the Secretariat.

(27) Mr. SEDES (Rapporteur) said that the word biased had been used during the debates in the sense that experts outside the Organization would probably be more detached, and therefore more unbiased.

(28) Mr. FLORKIN (Belgium) wondered whether, on another point, the paragraph really reflected the opinion of the Expert Committee; would not the writing of a manuscript by a member of the Secretariat also have budgetary repercussions?

(29) Mr. COWELL (United Kingdom) suggested that the sentence in question should simply be redrafted to say that it could not be expected that expert knowledge in every field was to be found in the Secretariat.

(30) The CHAIRMAN thought that reference might suitably be made to the fact that members of the Secretariat could not prepare manuscripts and do their routine work at the same time.

(31) Mr. GUITON (representing the Director-General) hoped that, if the term biased were retained, it would be qualified by some words of explanation.

(32) Mr. SEDES (Rapporteur) said that it was quite clear from the context, where it was contrasted with the phrase "less likely to be biased in any way as regards Unesco itself" that the word applied to the attitude of outside experts.

(33) The CHAIRMAN said that the point could safely be left to the Rapporteur and himself.

II. Methods in general

(34) Approved without comment.

III. Specific methods of action

B. International Seminars

(35) Mr. PANNETON (Canada) reminded the Committee that it had been agreed, with regard to the duration of seminars, that the French text of the recommendations was the one to follow.

(36) It was decided that the report should be amended accordingly.

(37) Mr. COWELL (United Kingdom), referring to the third paragraph under B. International Seminars, enquired what was implied by the words "which would be given sound publicity by the methods suggested". The Committee, if he understood aright, had rejected a recommendation by the Expert Committee to the effect that writers of standing be engaged. A suggestion had also been made that the Director-General should co-operate with the Chief of the Mass Communication Department in the field covered by the paragraph.

(38) The CHAIRMAN said it had also been agreed to refer the matter to the working party on mass communication.

(39) Mr. AVIDOR (Israel) and the CHAIRMAN thought that the last paragraph could be deleted.

(40) Mr. FLORKIN (Belgium) thought it might be misleading.

(41) Mr. SEDES (Rapporteur), on the other hand, felt that the last paragraph did in fact convey a new

idea, namely, that apportionment of expenses would not be an automatic process, but would depend on the nature of the seminar.

(42) The CHAIRMAN, summing up, said that it had been stressed in the Committee that the experts were merely making suggestions for experiments by Unesco in the holding of seminars. Perhaps that point should be made somewhat clearer in the section under discussion. In the meantime the sense of the Committee seemed to be that the last paragraph should be omitted.

C. Fellowships

(43) Mr. JUNANKAR (India) said that exception had been taken in the Committee to the word 'denationalizing' used by the experts in paragraph (5) (f) of their recommendations (8C/DIV/80). The word was too strong.

(44) Mr. SILLER (Mexico) stated that, at the previous meeting, the Committee had approved a proposal by the delegate of the United States of America that the word 'denationalizing should not be used in the report.

(45) Mr. LEE (United States of America) said that, while the Committee had accepted the substance of paragraph (5) (f), it had agreed to include in its report a statement to the effect that it disliked that particular word.

(46) The CHAIRMAN observed that the point could be left to the Rapporteur.

G. Exhibitions

(47) Mr. FLORKIN (Belgium) doubted whether the last paragraph, which related solely to art exhibitions, was clear.

(48) The CHAIRMAN asked him to consult with Mr. Sedes about redrafting the passage.

(49) Mr. JUNANKAR (India) enquired what was meant by saying that an exhibition would be "treated as an item in a co-ordinated whole".

(50) The CHAIRMAN said that, while Unesco often had but a limited part to play in organizing any particular exhibition, it was frequently able to ensure that the organizers viewed the exhibition as an item in a complex whole.

(51) Mr. COWELL (United Kingdom) said that the Committee had agreed how hard it was to assess the results of exhibitions, and that more research was needed in that field.

(52) Mr. AVIDOR (Israel) doubted whether the Committee had in fact so decided. Surely the feeling had been that the results of any exhibition should be carefully considered.

(53) Mr. COWELL (United Kingdom) stressed the special need for consideration before an exhibition was launched.

(54) The CHAIRMAN said that the point might safely be left to the Rapporteur.

(55) Mr. JUNANKAR (India) asked what was meant by saying that the subjects chosen should develop aesthetic appreciation. Surely exhibitions were also held for educational purposes.

(56) It was agreed that Mr. Florkin (Belgium) should supply a draft for a new second paragraph under Section G.

H. Mass media of communication

(57) Mr. LEE (United States of America) thought that the section should be referred to the working party on mass communication.

(58) The CHAIRMAN said he would write to the Chairman of the working party, forwarding those parts of the report of concern to him.

(59) Mr. COWELL (United Kingdom) suggested that the words "be viewed independently, that is to say, as representing the experts' own ideas" should be changed to read: "be regarded as a personal statement of the experts' own ideas ...".

(60) Subject to the comments made and the amendments adopted, the report (document 8C/BUD/3 (prov.)) was adopted.

The meeting rose at 1.25 p.m.

# THIRTY-FIRST MEETING

*29 November 1954 at 3.30 p.m.*

*Chairman*: Mr. GARDNER DAVIES (Australia)

**ITEM 7.4 OF THE AGENDA: CONSIDERATION OF THE REPORT OF THE EXECUTIVE BOARD ON THE FUTURE PROGRAMME OF UNESCO (document 8C/PRG/13)**

(1) The CHAIRMAN announced that the Committee would deal first with the four questions referred to it by the Programme Commission (definition of general and special activities, criteria for the selection of major projects, schedule under which the Director-General and Executive Board could implement the remodelled programme, and suggestions proposed by the Brazilian delegation on the future programme, document 8C/DR/86). It would then discuss the Director-General's suggestions for adapting the proposed programme to the budget ceiling which had been voted, and make final recommendations to the Commission on the cuts necessary to fit the approved programme into the approved budget. It would then have to discuss the Appropriation Resolution.
(2) He opened the general discussion on the remodelling of the future programme.

(3) Mr. MAHEU (Assistant Director-General) said that the Committee would probably receive the final text of the programme and budget on 7 December 1954; an Appropriation Resolution would then be submitted to it. The Committee's main task for the time being was to clarify the principles which were to guide the Director-General in drawing up future programmes.
(4) In the first place, the Committee would have to define key terms such as general activities, special activities and major projects, as clearly as possible.
(5) In the second place, the Committee would have to pronounce upon two essential problems: the balance to be maintained between general activities and special activities, and selection of the fields in which the Director-General would be asked to submit major projects to the next session of the General Conference.
(6) In the third place, the Committee would have to deal with the provisions or methods to be adopted with a view to the gradual reorganization of Unesco's activities.

(7) Sir Ronald ADAM (Chairman of the Executive Board) hoped that a lead would be given by the Committee in defining major projects by means of examples. He also remarked that, although the subject had not yet been discussed by the Commission, technical aid, or preferably Aid to Member States should be considered, like technical assistance, as a broad system within which requests of all kinds might come.

(8) Mr. ABDEL-RAHMAN (Egypt) thought that the Brazilian proposal contained in draft resolution No. 86 should be considered in the light of the result of the discussion on general and special activities. Referring to the Assistant Director-General's remarks on the definition of terms, he said that the task before the meeting was not one of definition but of revision.

(9) Mr. LEE (United States of America) had talked to the Brazilian delegation and felt certain it had not intended to insist on the wording of the proposal, so long as the ideas contained in it were taken into account.

(10) Mr. FRANCOIS (France) considered that paragraphs 13-24 of the Executive Board document (8C/PRG/13) were sufficiently clear on the subject of the remodelled programme. Why seek farther?

(11) The CHAIRMAN replied that the Programme Commission had asked the Advisory Committee to translate that document into a more fully digested one which would make its task easier.

(12) Mr. JUNANKAR (India) disagreed with the basis on which the classification between general and special activities in the Executive Board document had been made. The question was not one of structure or of origin, but of what the programme sought to accomplish. General activities, the delegate of India maintained, should be all those that were of a universal character, including therefore some that were labelled as special in the Unesco programme, and special activities those which, wherever initiated, were designed to serve particular needs in the different areas. There should be no question of a balance between permanent and special activities, since the basic purpose of permanent activities was to serve special activities.

(13) Mr. PANNETON (Canada) had already drawn the attention of the Programme Commission to the division into general and special activities. He had objected that he did not understand the distinction between them, and had suggested the substitution of other terms. It would be advisable to emphasize the fact that general activities had a universal, or preferably world-wide character.

(14) Mr. LEE (United States of America) suggested

that it might be well to refer back to what the document was trying to accomplish: namely, the better use of limited resources. A special activity was by definition an activity with limits and, in preparing a special project, it was necessary to look first for its basic limitations from the point of view of objectives, time schedule and work methods. The delegate of the United States of America then presented a draft proposal, Suggestions for directive concerning future programme (8C/DIV/122), which the United States delegation proposed as a tentative basis for discussion. That document aimed at a procedure, he explained, that would be detailed enough to serve as a directive, while leaving a great deal of latitude to the Director-General and to the Executive Board.

(15) Mr. ABDEL-RAHMAN (Egypt) asked for an explanation: why divide the programme into general and special activities at all? It was usually understood that general activities were continuous, while special activities, though they were attributed a major part of the budget, were temporary, and suffered the good or bad fortunes of Unesco.
(16) In document 8C/BUD/2 the Advisory Committee had deemed it harmful to consider an artificial division. That division was perhaps the cause of many misunderstandings. However much the programme was referred to as integral, division had occurred naturally for many years, and had to be dealt with by the Committee as a serious matter.
(17) The delegate of Egypt recommended agreement in principle with the proposal submitted by the delegate of the United States of America of dividing activities into two sections, those Unesco ran on its own, continuously, and those it ran in collaboration with Member States, or other organizations, which were by nature limited. That division would eliminate a number of difficulties: (1) the matter of the balance between the types of activities, since the first category was strictly limited from the budgetary point of view. (2) The idea held by many delegates that one type of activity was directed towards certain countries while the other was directed towards another group of countries. It would also make evaluation easy, since each project would be definitely outlined from the start.

(18) The CHAIRMAN proposed an interval of ten minutes for the study of the United States proposal.

(The general discussion was then resumed.)

(19) Mr. FRANCOIS (France) thanked the United States delegate for having provided the Committee with clearer definitions. He thought it unnecessary, however, to try to make each definition exhaustive - that would be a dangerous course. Moreover, terms should be used which the general public could easily understand.

(20) The CHAIRMAN suggested that the delegate of the United States of America might look upon his specific indications as examples of a non-restrictive character, or as open to completion by the Committee.

(21) Mr. JUNANKAR (India), in reply to the remarks made by the delegate of France, proposed that general activities be defined as those which served Member States in accordance with the basic objectives of the Organization, while special activities were defined as those which served a Member State or a group of Member States in the solution of their specific problems. The characteristics mentioned after the definition in the United States document could be transferred to the description of a major project on page 2 of document 8C/DIV/122; nor did they apply only to a major project. The delegate of India quoted the proposed Educational Development Fund as a special activity which was wider in scope. He reminded the meeting that the Organization was not tied forever to a fixed budget ceiling and that it was not necessary to assume a permanent basis of scarcity in making these definitions.

(22) Mr. COWELL (United Kingdom) agreed with the delegate of India. A clear division was essential between those activities which the Director-General was planning for Member States, and the technical aid which they requested.

(23) Mr. ABDEL-RAHMAN (Egypt) reminded the meeting that his question still remained unanswered: what was the aim of the division between special and general activities? Was one section to be regarded more highly than the other? Or was remodelling a mere relabelling?

(24) Sir Ronald ADAM (Chairman of the Executive Board) stated that in his view the general activities built up the general fund of knowledge without which Unesco could not function at all, and the best title for those activities was general. He included in that category all work with non-governmental organizations, public information, international organizations, and the preparation of international conventions and regulations, although the latter were becoming more and more a matter for the United Nations. Two of those activities were not included in the United States resolution.
(25) For the rest of the programme it was essential to concentrate first on major projects, and secondly on technical aid. The reason for allocating a sum under technical aid to be used for special requests of Member States was that the latter would not be sufficiently interested to set up National Commissions until they felt that Unesco could help them at short notice in something they were particularly keen on.
(26) The programme, Sir Ronald concluded, in answer to the question of the Egyptian delegate, had been stated in the form of general and special activities. There did not seem to be any particular reason for changing it.

(27) Mr. HACQUAERT (Belgium) did not think that the problem was very clearly presented in the American document. It mentioned major projects and priority zones. The use of the latter term was limited to special activities, whereas it should also be applied to general activities.

(28) Mr. ABDEL-RAHMAN (Egypt) said that

subdivisions would be helpful both in explaining and in executing the work. He understood that the first section was aimed at forming a central pool of knowledge and the second at making use of it in specific sectors.

(29) Mr. FRANCOIS (France) considered that the Committee should retain the division of the programme into general activities and special activites, for they were terms which everyone understood - if only within Unesco.
(30) General activities were aimed at developing: (a) education, science and culture, and an international meeting of minds; and (b) a better mutual understanding between nations and cultures.
(31) Such activities were carried on continuously and were of general interest to all Member States.
(32) The special activities were aimed at: (1) obtaining quick and practical results in the fields defined in paragraph (a) of general activities; and (2) helping Member States.
(33) They included the investigation and tackling of special problems, or again they directly concerned a Member State or a group of Member States. Their duration was strictly limited.
(34) It was imperative to mark the close relation existing between the two kinds of activity; the French delegation was strongly opposed to any attempt to dissociate them.

General activities

(35) Mr. PANNETON (Canada) thought that there was no need to distinguish between the two types of activity. He drew the Committee's attention to the last words of the third paragraph in the English text submitted by the United States delegation.
(36) The fourth kind of general activity was: "(4) Programme planning and appraisal of a general nature". The Canadian delegate considered the French delegation's definition to be more satisfactory.

(37) Mr. LEE (United States of America) understood the difficulties of the Belgian delegate on questions of terminology, but pointed out that in all branches of activity it was necessary to establish a certain number of technical terms. Mr. Lee welcomed the French delegate's contribution to the discussion.

(38) Mr. MAHEU (Assistant Director-General) drew attention to two serious omissions in the American text, when compared with the Executive Board's report on the remodelling of the future programme of Unesco (document 8C/PRG/13). Paragraph 23 of the Executive Board's text read: "(B) Assistance to international collaboration between specialists", and "(D) The preparation of international conventions and regulations". There was no sign of those activities in the United States proposal.
(39) Moreover, it was important to know what the United States delegate meant by programme appraisal. Was it a question of a purely administrative appraisal, or was it a proposal similar to that of the Brazilian delegation in document 8C/DR/[illegible]? As a matter of fact, the Brazilian delegation had asked for another activity to be added to paragraph 23, namely: "F. The investigation and study of fresh subjects with a view to the preparation of future programmes of action".
(40) Mr. Maheu had always thought that appraisal should be the last stage in the carrying out of any project.
(41) As regarded international conventions, those with which Unesco dealt were highly specialized and did not come within the province of the United Nations.

(42) Sir Ronald ADAM (Chairman of the Executive Board) suggested that the following sentence should be incorporated in the text: "General activities are all those continuing activities which provide the basis of the programme and are generally of interest to Member States".

(43) Mr. LEE (United States of America) accepted the suggestions made. One of the two omissions referred to by the Assistant Director-General had been made on the perhaps erroneous assumption that international collaboration between specialists might be either a form of general information or a type of special activity.
(44) He did not object to the inclusion of the phrase proposed by Sir Ronald Adam, and agreed with the importance of paragraphs 19 and 20 of the Executive Board's document. He had no strong feelings as to where point 4 of General activities (United States text) was placed, but insisted that the Conference should recognize a continuing and not intermittent obligation of planning and appraisal of a general nature.

(45) Mr. ABDEL-RAHMAN (Egypt), comparing the United States and Executive Board texts in the light of the Assistant Director-General's remarks, thought that assistance to international collaboration between specialists was not unimportant but should not be placed in toto under general activities. A part of those activities were limited in time and scope. The same applied to the preparation of international conventions and regulations. The promotion of a convention, for instance, was a special activity. Those two types of activity ought to be subdivided into the two sections.

(46) Mr. MAHEU (Assistant Director-General) pointed out that anything in the programme could be described as special or general according to the viewpoint of the observer. He urged the Committee to try to reach a satisfactory agreement.
(47) Mr. Maheu feared that, by engaging in discussions of terminology, the Committee might "forsake the substance for the shadow", especially as its time was limited in comparison with that spent by the Executive Board on studying the question.
(48) As far as general activities were concerned, it was a question of continuing services: exchange of information, technical advice to the United Nations, etc.
(49) Special activities, on the other hand, related to concrete problems capable of delimitation in time and place. That was the main difference between the two sections. If a good many special activities were considered, some would be found to

stand out above others as mountains towered above their foothills. Those were the major projects in favour of which available funds would be concentrated.

(50) Mr. PANNETON (Canada) thought that the Committee should take the situation as it was and accept the division into general activities and special activities. Those terms were just as suitable as any others, as long as they were properly defined.

(51) Mr. FRANCOIS (France) preferred the list in paragraph 23 to the text of the United States delegate. The list in paragraph 23, however, should be completed by an additional item on Education for International Co-operation and Human Rights. The American document made constant reference to news; the thirst for news was a modern disease.
(52) Mr. François appreciated the ideas expressed in the amendments proposed by the Brazilian delegation (document 8C/DR/86), and particularly those in item F: Investigations and Studies.
(53) He proposed that the text which he himself had submitted should be examined at the following meeting.

(54) The CHAIRMAN suggested that, in line 1 of the definition of general activities in the United States text, the word activities on the second occasion of its use should be replaced by functions. The phrase proposed by the Chairman of the Executive Board should then be inserted, after which the text would run: "the following is a non-limitative list", with the list proposed by the Executive Board to follow. Point 4 of the United States draft could be revised in connexion with draft resolution No. 86 submitted by the Brazilian delegation.

(55) Mr. FRANCOIS (France) drew the Committee's attention to the wording of document 8C/PRG/13. Paragraph 23 B read: "Assistance to international collaboration between specialists". It would be better to say: "Assistance to international collaboration in the fields of science, art and literature".

(56) Mr. MAHEU (Assistant Director-General) considered it unwise to relate the idea behind the Brazilian amendment to the fourth item in the American list of general activities. The two ideas were not the same: the United States delegation had an administrative aim in view, as was apparent from the third paragraph from the end of its document: "The Director-General is authorized to establish in his immediate office a planning unit .....". The United States delegation evidently had in mind a unit responsible for supervising the preparation and implementation of projects.
(57) The Brazilian delegation's idea was quite different: every project implied preparatory stages and, even before the projects could be selected, there had to be a stage of general preparation. Mr. Maheu reminded the Committee that the text to be drafted was not intended for press or radio; it was a legal text and from that point of view the publicity value of the terms used mattered little. They only needed to be clear.

(58) Mr. SEDES (Rapporteur) observed that the Committee could not submit any amendment to document 8C/PRG/13, for it was an Executive Board report. It could, however, submit a draft resolution.

(59) Mr. HACQUAERT (Belgium) agreed with the delegate of France and suggested that special activities be described as particular. As an example of a project for general activities, he mentioned the conservation of natural resources, which, in his opinion, should be undertaken by Unesco in collaboration with FAO. He asked whether the Brazilian draft amendment had allowed for that possibility.

(60) Mr. MAHEU (Assistant Director-General) explained that Unesco arranged for preliminary investigations to be carried out by other international organizations, especially non-governmental ones. Even if Unesco decided, at that stage of its programme, to devote its attention to the conservation of natural resources, it would only be in the form of preliminary investigation, prior to action proper.
(61) He added that the example chosen was a good illustration of the difference between general, continuing activities, and activities of local interest.

(62) Mr. ABDEL-RAHMAN (Egypt) remarked that his interventions had all been made with the aim of showing that general and special activities should be integrated into a single programme. He stressed the point, made by the Chairman of the Executive Board, that a central pool of knowledge must exist first, whether divided into continuous activities or not, and which could be used later in a series of special activities.

(63) Mr. COWELL (United Kingdom) agreed with the Egyptian delegate's remarks. On the assistance to international collaboration between specialists (B of paragraph 23, document 8C/PRG/13) he suggested that what was actually wanted was the collaboration of the specialists with Unesco.

(64) Mr. MAHEU (Assistant Director-General) thought the word collaboration was too strong, since it covered contracts, which were exclusively special activities.

(65) The CHAIRMAN offered to prepare a draft, with the assistance of the Rapporteur and the Secretariat, for discussion the following morning.

(66) Agreed.

Special Activities

(67) There was already a proposal on this subject submitted by the French delegate.

(68) Mr. JUNANKAR (India) said that the characteristics given in paragraph 4 of document 8C/DIV/122 did not apply to special activities as a whole, but only to major projects within them. The United States definition of aid to Member States was excellent, as those might have long-range

programmes of their own with different budgets and time schedules. His objection to the Executive Board's definition was that special activities had to provide a solution of the problems of Member States. Special activities, Mr. Junankar concluded, should be divided into major projects and aid to Member States.

(69) The CHAIRMAN proposed the following alterations in the United States text, special activities: line 2, to run: "the solution of specific problems of Member States, and are made up of minor and major projects ..." etc.

(70) Mr. FRANCOIS (France) was against the trend towards multiplying special activities by limiting their geographical scope. Why should a special activity concern only one Member State, or at most a small group? Education for living in a world community, for instance, could be regarded as a special activity in so far as it was a special project in the wider field of education for international understanding. It was obvious that a subject likely to interest all Member States could be dealt with in a strictly limited way and therefore not be included under general activities.

(71) Mr. ABDEL-RAHMAN (Egypt) proposed the division according to certain themes, rather than general and special activities.

(72) Mr. LEE (United States of America) agreed with the French delegate that the meeting was becoming unnecessarily involved in a too detailed examination of the source of ideas or of geographical limitations. It would be better to consider a project as having various forms of limitation. A special project might have a wide scope but it might be the limited application of a special type of effort.

(73) Mr. MAHEU (Assistant Director-General) drew the Committee's attention to the desirability of making a clear distinction between projects initiated by Unesco and those undertaken at the request of Member States. Unesco projects were focused as time went on on a few subjects. Aid to Member States, on the contrary, was designed to become increasingly diversified.

(74) Education for living in a world community, referred to by the French delegate, was not a project or activity which yielded practical results. The same might be said of many similar activities: they were studies or propaganda campaigns of a general and permanent kind classifiable as general activities. The question of special activities arose when action was directed to specific and concrete ends.

(75) The CHAIRMAN, summing up, said there were two points to be included, his own proposal to include the words Member States, and the subdivision of projects initiated by Unesco or by the direct request of Member States into minor and major ones. He suggested that the Rapporteur should prepare another text on the subject for the next morning's discussion, and asked for further comments.

(76) Mr. ABDEL-RAHMAN (Egypt) queried the phrase "the solution of specific problems". Problems had to be stated before they could be solved.

(77) The CHAIRMAN proposed to replace the word solution by the word tackling.

(78) Mr. COWELL (United Kingdom) proposed the following phrase: "Special activities are those which are designed to meet the needs of a Member State or group of Member States and are concerned with specific problems".

(79) Mr. LEE (United States of America) insisted on the word solution because the whole idea behind that definition was one of action.

(80) The CHAIRMAN then suggested the word used by Mr. Lee, action towards.

(81) Sir Ronald ADAM (Chairman of the Executive Board) asked why the definition given in paragraph 37 of the Executive Board document could not be used.

(82) Mr. COWELL (United Kingdom) replied that that omitted the point made by the Indian delegate, with regard to the needs of Member States.

(83) Mr. JUNANKAR (India) endorsed that remark. The whole of the remodelling was aimed at meeting the needs of Member States, which were not always in the form of problems. Decentralization, for instance, had been studied by a working party to meet the needs of Member States.

(84) Mr. COWELL (United Kingdom) proposed another phrase: "Special activities are those which are designed to meet the specific needs of a Member State or group of Member States. They consist of problems, each of which is characterized by" etc. A special need, he said, was a problem.

(85) Sir Ronald ADAM (Chairman of the Executive Board) pointed out that the Board had taken seven paragraphs to define special activities. It had brought out the needs of Member States in separate paragraphs.

(86) The CHAIRMAN considered that the United Kingdom proposal was a fairly comprehensive one, and proposed to produce a further text for discussion the next morning.

The meeting rose at 6.35 p.m.

# THIRTY-SECOND MEETING

*30 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**PROPOSALS CONCERNING THE FUTURE PROGRAMME OF THE ORGANIZATION** (documents 8C/DIV/122, 8C/DIV/121, 8C/DIV/120, 8C/PRG/13)

(1) The CHAIRMAN recalled that at the previous meeting it had been decided to request the Rapporteur, the Assistant Director-General and himself to redraft paragraphs 3 and 4 of the United States proposal concerning the future programme (US Del. 8/PRG/46). The revised text of the two paragraphs was now before the Committee in document 8C/DIV/121.
(2) The Committee also had before it a proposal of the delegate of France concerning the future programme (document 8C/DIV/120). He proposed that it take the revised text of paragraphs 3 and 4 as a basis for discussion and attempt to co-ordinate with it the proposal of the French representative.

(3) Mr. MAHEU (Assistant Director-General) thought that it should be possible to work out a joint text, by taking document 8C/DIV/121 as a basis and introducing certain of the points in document 8C/DIV/120.
(4) Paragraph 3 (document 8C/DIV/121), for instance, might be drafted as follows: "General activities are those forming the basis of the programme and corresponding to the continuing functions of the Organization, which are generally of interest to all Member States".

(5) Mr. FRANCOIS (France) thought that general activities should be defined in relation to Unesco's two fundamental aims: (a) the co-operation of all men of culture in the establishment of an international community of minds; (b) mutual understanding between the different nations and cultures as the basis for a lasting peace.

(6) In order to define general activities more clearly, and also to illustrate that definition, Mr. MAHEU (Assistant Director-General) proposed that the paragraph concerned be worded in the following way: "Their purpose is, on the one hand ..... , and on the .... They include: (a) etc. ..".

(7) Mr. SILLER (Mexico) considered that sub-paragraph (6) of paragraph 3 in document 8C/DIV/121 was superfluous, as it simply expressed what was already stated in the preceding sub-paragraphs.

(8) Mr. MAHEU (Assistant Director-General) thought that the scope of sub-paragraph (6) might be extended by saying, for instance: "Any general investigation likely to be useful for special activities".

(9) Mr. HACQUAERT (Belgium) pointed out that, to introduce the idea of special activities, which had not yet been defined, into the definition of general activities, might easily confuse.

(10) Mr. FRANCOIS (France) drew attention to the fact that education for international co-operation and understanding, which was a slow process of conversion to a certain attitude of mind, should be included among the basic general activities, instead of simply appearing under public information (sub-paragraph (5)).

(11) Mr. MAHEU (Assistant Director-General) thought that the general idea was expressed in the words "promotion of human rights and a spirit of international co-operation" and that it would not be advisable to refer there to a specific field of Unesco's activities, such as education.
(12) Thus, it would be better to replace the words public information, which might lead to confusion, by the words action on public opinion.

(13) Mr. MAHEU (Assistant Director-General) then proposed the following text for sub-paragraph (5): "action on public opinion for the promotion of human rights and a spirit of international co-operation"; further, he emphasized the importance that should be attached to the different sub-paragraphs of paragraph 3, which corresponded to sections of the programme as a whole.

(14) The CHAIRMAN, supporting a suggestion by the Egyptian representative, proposed that the points under paragraph 3 be provisionally accepted and their final wording agreed at a later stage in the light of future discussion. He invited the Committee to consider paragraph 4 in its revised text.

(15) Mr. SILLER (Mexico), referring to sub-paragraph (3) of paragraph 4, asked why it was necessary to include budget and defined methods among the characteristics of special activities.

(16) Mr. MAHEU (Assistant Director-General) explained what the authors of the paragraph had had in mind; they had wished to make it clear that the Organization, in undertaking special activities, should make full use of all the ideas, experience and resources which the general activities, on which they were based, had made it possible to assemble.

(17) After criticism of certain points of detail, mainly concerning the wording of the French text, had been expressed by the CHAIRMAN, Mr. PANNETON (Canada) and Mr. MAHEU (Assistant Director-General), the latter, replying to a remark which had been made by the Mexican delegate regarding the words 'full use', pointed out that they were the key to all the rest, and that, if they were weakened, the whole structure of the text would be in danger of crumbling.
(18) If the Committee wished to avoid the words 'full use', it would at least have to say "requires the use of part or all of the technical resources", or "requires the full utilization of the technical resources".

(19) The CHAIRMAN favoured a wording which would in some way qualify the word 'use'; he regretted that the formula full utilization did not meet with the Committee's approval.

(20) Taking account of a remark made by Mr. FRANCOIS (France), Mr. MAHEU (Assistant Director-General) proposed that it be left to the Secretariat to redraft the paragraph, incorporating in it all or part of paragraph 20 of document 8C/PRG/13 and making it quite clear that special activities and general activities were indissolubly linked.

(21) Adopted.

(22) The CHAIRMAN recalled that the Committee had already expressed itself on those lines and suggested that a sentence reflecting that idea might be added when the Committee returned to the point later.
(23) With regard to the balance which should be maintained between general and special activities, he recalled that, when the question was referred to the Committee by the Commission on Programme and Budget, the problem of balance was specifically omitted from the terms of reference, and he did not therefore think the Committee should give it detailed consideration. He invited it to take up paragraphs 6 and 7 of the United States suggestions for a directive on the future programme (document 8C/DIV/122) which were more or less closely related, and then perhaps consider a general statement on the question of balance.

(24) Mr. ABDEL-RAHMAN (Egypt) requested some clarification of the difference between a major project and a high priority area.
(25) He hoped that some information might also be available as to the proportion of effort and money which was at the present time being allocated to the items under points 1 to 6 of the paragraph on high priority areas.

(26) Mr. JUNANKAR (India), dealing with the paragraph on high priority areas, suggested that the words 'especially racial' be added to point (4), and that point (6) be altered to read "utilization of scientific knowledge, research and discoveries for peaceful purposes and for the improvement of living conditions".

(27) During previous discussions in the Committee it had been agreed that efforts should be made to request Member States to provide information about what they wished the Organization to do. The report of the Working Party on Decentralization furthermore stressed the need for greater concentration of effort. In that connexion he hoped that the Director-General would consult Member States or groups of Member States with a view to finding out their needs and proposals for future activity by the Organization.

(28) In answer to the question raised by the delegate of Egypt, Mr. MAHEU (Assistant Director-General) stated that, as he did not recall the exact figures, he was unable at the moment to say exactly how much money it was proposed to allocate to each of the six fields of activity, which had been chosen by the United States delegation.
(29) Passing on to the question of the remodelling of the programme, the Assistant Director-General recalled the two basic aims underlying the proposals that had been made: (1) to adapt the programme to the needs of Member States within the framework of international co-operation and understanding; (2) to concentrate efforts and resources on certain specific points where international action seemed most urgent and necessary.
(30) When those two basic principles were combined, a practical definition of concentration emerged. That was to say, major projects.
(31) The Assistant Director-General then tried to make the meaning of that expression clearer by contrasting it with the more familiar concept of high priority areas.
(32) A high priority area was a field of activity, and not the activity itself. Fundamental education, for example, and the progressive extension of free and compulsory education were limited fields - a site as it were on which to undertake practical and constructive projects, planned with great care and worked out to the last detail.
(33) A considerable amount of thought had already been given to the delimitation of those high priority areas by Unesco and the Economic and Social Council.
(34) The General Conference, during its Florence session, had established a decalogue defining the high priority areas. At its last session, the General Conference had instructed a special working party to single out, among the fields defined by the Economic and Social Council and lying within Unesco's competence, those which deserved priority status.
(35) The working party's report had been forwarded to Member States for comments and, when the Executive Board had prepared document 8C/PRG/13, it had had before it the list of priorities established by the Economic and Social Council, those indicated by the working party and approved by the General Conference, and the comments received from Member States.
(36) Unfortunately, the latter had not answered exactly in the manner desired. They had spoken of projects and not of fields, so that any further consultation would only delay the work.

(37) What was really urgent was that the Member States represented at the present Conference should indicate immediately to which of the main fields already chosen (there were some twenty of them) they wished priority to be given.
(38) That was an important decision which the General Conference alone could take, and which should be taken as soon as possible.
(39) At the present time, Unesco had a programme of action which took the form of special activities in each of the high priority areas. Owing to the resulting dispersion of efforts and funds, such activities yielded only modest results. It was only by reducing their number, and thus enabling resources to be concentrated, that Unesco would be able to carry out the selected projects on an adequate scale.
(40) The Executive Board's idea was certainly to maintain, for some time yet, the policy of having many different projects; but although the transition from dispersion to concentration was bound to be a gradual one, the tendency towards concentration should be introduced into the programme forthwith.
(41) Lastly, while a reduction in the number of major projects was essential to the concentration of efforts and resources, the very nature of those projects would make it necessary to have recourse to different methods and branches of knowledge at one and the same time.
(42) The present programme contained special projects requiring the assistance of certain disciplines. No doubt, those various activities required to be co-ordinated; but the very idea of major projects implied progress in such co-ordination.
(43) The present system of co-ordination through co-operation would have to be replaced by co-ordination through integration. A general plan would have to be drawn up, enabling the problem to be tackled simultaneously from all angles. Only thus would Unesco be able to lay claim to practical achievements on a large scale, instead of being able to quote, as examples of constructive activities, only (with a few fortunate exceptions) the recommendations, advice or directives which it lavished on its Member States.

(44) The CHAIRMAN thanked the Assistant Director-General for his clear explanation and proposed that the Committee first study high priority areas and then major projects. A list of high priority areas had been drawn up by the Economic and Social Council; a second list had been drawn up by the General Conference in Florence, a third, though somewhat less comprehensive, was contained in the basic programme. The Committee might consider those documents and, from the number of high priority areas listed, choose those upon which the efforts of the Organization might be concentrated.

(45) Mr. FRANCOIS (France) had noted with some anxiety a remark by the Assistant Director-General that it would be useless to consult Member States again in order to ascertain which projects they wished to see implemented. Although delegations at the present session of the Conference were authorized to decide which were the most important high priority areas, they could not choose the major projects without previously consulting their respective governments and National Commissions, which had certainly not yet had time to study the Executive Board's report on the remodelling of the future programme, it being dated 30 August.
(46) A time-limit of six months would enable Member States to submit practical proposals, and the projects mentioned most frequently would automatically attract the Secretariat's attention.

(47) Mr. ABDEL-RAHMAN (Egypt) was still not clear about the exact meaning of the term major project. He wished to know if any of the Organization's present activities could be qualified as such and asked if a major project was to be defined by unity of content or approach. The Assistant Director-General had mentioned the notion of integration as a criterion. But such integration would not prevent the various aspects of a single project from being entrusted to a number of different departments.

(48) Mr. JUNANKAR (India) said his point had been a specific one. It would be very useful in regard to the Organization's future programmes to consult Member States on what they believed to be the areas of highest priority and what projects they wished to see undertaken there. Consultations with Member States would prevent the latter from flooding the Organization with a variety of projects when it was too late to do anything about them.

(49) Mr. MAHEU (Assistant Director-General) observed that the questions which he had just been asked clearly showed that the debate needed clarifying.
(50) Replying to the delegate of France, he pointed out that, although he did not think it necessary for Member States to be consulted on the choice of high priority areas, he had never believed nor said that major projects could be selected without prior consultation with governments. It was indeed inconceivable that the Executive Board or the Secretariat should take such steps except in close agreement with Member States.
(51) However, between the two steps of defining priority areas and consulting Member States on the choice of major projects, there was an indispensable intermediary step, namely, the selection, by the General Conference, of a limited number of such areas in order to have a definite basis for consultation with Member States.
(52) If the Secretariat was to submit to the General Conference, at its next session, projects likely to meet with its approval, there was no time to be lost, for the process - beginning with preliminary exchanges of views and ending, after thorough study and consultation with experts, with the drawing up of the draft projects - would be a long one.
(53) Replying to the next question: Which of the existing projects corresponds most closely to the new idea of major projects?, the Assistant Director-General quoted the world network of international fundamental education centres, as originally conceived. There, the object had been to solve, as quickly as possible, a practical problem,

namely, the lack of qualified staff to train fundamental education teachers, who, themselves, were too few in number. The very nature of that education made it necessary to try out various methods and apply them to the different disciplines. Lastly, there was direct co-operation with the Member States on whose territory those centres were established and who assisted in the scheme.
(54) According to the new policy the process would be the following. The Director-General would ask Member States to indicate their main and most urgent problems in a high priority area, such as fundamental education. For some, it would be the training of staff; for others the production of reading material, and for others the obtaining of audio-visual aids. Certain countries would explain that what interested them was how to build schools cheaply; others would reply that their main problem was the training of rural teachers. It would then be possible to draw up a world chart of the exact needs of Member States, and it would only be after consultation with experts, both outside and inside the Secretariat, on each of the problems raised that the Director-General would be able to submit constructive preliminary plans to those States.

(55) Sir Ronald ADAM (Chairman of the Executive Board) wished to stress the importance of the time factor. It was rare for Member States to answer letters for at least six months following the General Conference. Also the Executive Board would be meeting in November 1955 to study the programme for the year 1957-58. A further difficulty was that there were not at present enough National Commissions to advise governments. The General Conference therefore needed to urge Member States to begin work as soon as possible and instruct the Director-General to consult them on their needs.

(56) Mrs. HEFFELFINGER (United States of America) thought that some members of the Committee were unduly concerned because they did not realize the exact nature of major projects. More patience was needed in developing them. Not enough was known about Unesco activities because the programme of the Organization was too diffuse. However, in considering ideas and suggestions from Member States, it would probably be seen that many projects were already under way which might develop into major projects.
(57) It was important to promote concentration of effort, to strive for a greater impact upon public opinion, to achieve closer consultation with Member States and closer collaboration with other international organizations on major projects. It was therefore necessary to list a few objectives and give the Secretariat enough time to develop them.

(58) Mr. COWELL (United Kingdom) supported the views of the representative of the United States of America. He feared it would be difficult for one Member State to produce a blueprint for a project to be carried out in another Member State; it was clear that such plans could only be drawn up by the State in whose territory the project would be carried out. An alternative might be for the Director-General to make a number of proposals.
(59) A large number of requests for assistance had been made under the Expanded Programme of Technical Assistance, with which Unesco had been associated for years. He wondered if those requests from Member States did not constitute a valuable source of information as to possible projects. He also wished to know if the Palestine relief scheme for Arab refugees could be considered characteristic of a major project.

(60) Mr. JUNANKAR (India) agreed that there was no good reason for upsetting the Director-General's time-table and, if the Member States did not reply, the Secretariat would merely pursue its work in accordance with the decisions of the General Conference.

(61) Mr. MAHEU (Assistant Director-General) repeated that Member States would be consulted on the nature of the major projects which they wished to carry out and that they would be given sufficient time to send in answers, on which, as they knew, the programme for 1957-58 would largely depend.
(62) What the Director-General desired, however, was that the General Conference should choose, from among the ten or twenty high priority areas, those in which a start should be made; otherwise, the Secretariat itself would be obliged to make a somewhat arbitrary choice from among countless requests.
(63) In answer to the first question of the delegate of the United Kingdom, Mr. Maheu said that, although the Secretariat already possessed information on the needs of Member States, such information mainly concerned requests for technical assistance for economic development, and not requests relating to the social and cultural fields.
(64) With regard to the second question of the delegate of the United Kingdom concerning aid for Palestine refugees, the Assistant Director-General said that it might indeed have formed a major project to be conducted, for example, over a period of 10 years, had it been attacked in 1949 in the spirit that animated the remodelled programme.
(65) He added, however, that that project was of an urgent, but temporary and limited nature, whereas the major projects that the Committee was at present discussing should be long-term projects, although calling for urgent action.
(66) Nevertheless, the major projects which the General Conference authorized the Director-General to undertake each year could include a project which was merely urgent.

(67) The CHAIRMAN said that the matter of consultations was dealt with to a certain extent under paragraph 9 of 8C/DIV/122. At the present stage it was necessary to agree on a definition of priority areas, to select a certain number of them and only then would he ask the Committee to discuss major projects under paragraph 6.

(68) Mr. ABDEL-RAHMAN (Egypt) agreed that the

Palestine relief scheme could be considered a good major project. He wondered, however, what relationship there would be between such a major project and areas of high priority which the Committee was considering. He believed that in selecting high priority areas the Committee would by implication be choosing the major projects to be implemented there and vice versa. In his opinion the two elements were very closely connected.

(69) Mr. MAHEU (Assistant Director-General) agreed that it was difficult to choose a high priority area without having one or more practical projects in mind; but, if Member States were asked to supply a list of projects before fields had been strictly defined, the variety of projects proposed would be so great that it would be practically impossible to make a wise and effective choice.

(70) Mr. SILLER (Mexico) thought that the definition of high priority areas in document 8C/DIV/122 made them too transitory, as a two-year period only was mentioned.

(71) Mr. LEE (United States of America) agreed with the Mexican representative that most of the projects would in fact require more than two years to be completed. In that connexion he stressed the need for a system of periodical re-appraisal of the situation in the areas of activity concerned. The General Conference, it had to be assumed, was a responsible body which would not without warning withdraw the priority it had granted a certain area at its previous session.

(72) Mr. SILLER (Mexico) insisted that there should be no allusion to a time-limit for the high priority areas, which ought to be of a more lasting nature.

(73) Mr. ABDEL-RAHMAN (Egypt) said that agreement on a small number of high priority areas and the subsequent implementation in those areas of major projects provided no guarantee of increased effectiveness in the Organization's work.
(74) It was also possible that the concentration of the programme and the reduction to a small number of the high priority areas might estrange Member States from the Organization, since it would in the future be impossible to cater for the needs of as many countries as in the past.

(75) Sir Ronald ADAM (Chairman of the Executive Board) was convinced that the Board, which would henceforth represent 22 member governments, would work in close co-operation with the Director-General, and would be in a position to ensure the required effectiveness in the Organization's work.

(76) Mr. MAHEU (Assistant Director-General) observed that the Egyptian delegate's remarks concerned the very concept of concentration; the latter had been decided upon by the General Conference itself and Member States did not seem to have feared that it would lead to such a change in their relations with one another or with Unesco.
(77) It was true that certain Member States would benefit more directly than others from the programme in its new form; hence the need for a proper balance in the selection of projects; in attempting to maintain that balance, the Director-General would need the support of the Executive Board.
(78) Mr. Maheu added that, although only a few Member States would derive immediate benefit from the major projects, the latter would have been chosen by the General Conference because they were of universal importance and likely to contribute to world peace.
(79) Because activities were localized, it did not mean that the results obtained would not be of great importance; the programme of assistance to underdeveloped countries, for instance, had been drawn up with a view to such results.
(80) Further, it might be thought that even States which would not derive immediate benefit would not only have the satisfaction of knowing that they had done their duty but would also secure certain advantages.

(81) Mr. JUNANKAR (India) appreciated the safeguards referred to by the Chairman of the Executive Board and the Assistant Director-General, but thought the point raised by the Egyptian representative an important one. The smaller the number of major projects, the greater would be the need for co-operation. In his opinion the Organization needed to increase the number of major projects to cover the various areas of the world since its resources were drawn from all Member States.

(82) Mr. SOMMERFELT (Norway) said that a number of countries, among them Norway, would be interested only in the general activities of the Organization. The major projects were designed to a far greater degree for the so-called underdeveloped countries. He favoured the introduction of some principle of rotation which would make it possible for certain countries or groups of countries to obtain assistance at different periods.

(83) Mr. LEE (United States of America) did not entirely agree with that view. He did not think that major projects should be defined as applying exclusively to underdeveloped areas. He could well conceive of the United States of America being interested in certain major projects, touching upon cultural activities or international understanding, being implemented in its own territory.
(84) He believed that the Committee should stress the overall objectives of Unesco and not merely the immediate gains to any one party. The time had come to abandon parochialism and to endeavour to find a compromise between national or regional aspirations on the one hand and the overall ideals of the Organization on the other.

(85) Mr. ABDEL-RAHMAN (Egypt) said that the proposal to introduce a principle of rotation did little to allay his fears; furthermore he still thought there was a danger that concentration of effort on the basis of a small number of high priority areas might threaten the relationship between the Organization and the Member States.

(86) The CHAIRMAN replied that the Organization was in fact representative of the Member States and was therefore unlikely to take action that might estrange them.

The meeting rose at 12.30 p.m.

# THIRTY-THIRD MEETING

*30 November 1954 at 3.30 p.m.*

*Chairman*: Mr. GARDNER DAVIES (Australia)

**PROPOSALS CONCERNING THE FUTURE PROGRAMME OF THE ORGANIZATION** (documents 8C/DIV/122 – formerly United States deleg. 8C/PRG/46 – 8C/DIV/123, 8C/DIV/124 and 8C/DIV/125)

(1) The CHAIRMAN, opening the meeting, pointed to a slight change to be introduced in the text of document 8C/DIV/124. At the end of the third line of paragraph 3, the words "they include" should be replaced by "they are aimed at". Similarly, after sub-paragraph (b) in 3, the words "and cover" should be replaced by "these activities include".
(2) He then moved to the consideration of document 8C/DIV/123, which constituted a redrafting of the first sentence in paragraph 7 of 8C/DIV/122, based on the morning's discussions. He asked for comments on it.

(3) No comments having been made, the document was considered adopted and would be incorporated in the final document.

(4) Going on to examination of the areas of high priority enumerated in that paragraph 7, the CHAIRMAN referred to the mention which had been made at the morning meeting of the considerable work already done in the determination of priority areas both by the Economic and Social Council and by the General Conference itself. The Committee would have before it, in a few moments, a document summarizing that work.

(5) Mr. COWELL (United Kingdom) proposed that, in the meantime, the Committee move to the examination of paragraphs 9 and 10 of document 8C/DIV/122. The two paragraphs were fairly non-controversial, as they corresponded more or less to the views expressed at the morning meeting.

(6) It was however agreed to adjourn for ten minutes, to enable the Committee to be in possession of the documents before proceeding with the discussion.

(7) The meeting was resumed when document 8C/DIV/125, listing the Unesco and United Nations documents on programme priorities, was distributed, together with a copy of document 7C/Resolutions, where the report of the working party of the seventh session on the future programme and development of Unesco was reproduced in extenso.

(8) The CHAIRMAN said that the Committee had now before it a fairly wide list of areas to choose from.

(9) Mr. MAHEU (Assistant Director-General) thought that, in view of the great variety of proposals contained in the documents which had been distributed, the best practical basis for discussion would be to take from the table of contents in document 8C/5 (proposed programme and budget) the items relating to those of Unesco's activities whose importance the General Conference had never contested. In the chapter on education, for instance, he mentioned items 1.21, 1.31, 1.32 and 1.33 in Section II. With regard to document 8C/DIV/125, he noted that, among the priority programmes adopted by the United Nations, only paragraphs E and F related to Unesco's work.

(10) The CHAIRMAN said that, starting with the chapter on education, the Committee had a number of items to consider in 8C/DIV/125, those being items (a), (b), (c) and (d) under paragraph E, and (a) under paragraph F. Referring to the Florence Decalogue, there were the first three tasks to be considered. In document 8C/DIV/122, the first two areas mentioned in paragraph 7 were involved.
(11) Before going into a detailed discussion of those various recommendations, the Committee should formulate an answer to two fundamental questions: what was the extent of concentration aimed at and how many projects would be specifically mentioned?

(12) Mr. FRANCOIS (France) was disturbed and confused by the formidable number of documents and proposals from which a few priority areas and projects for recommendation to the General Conference had to be extracted. In his opinion, the document submitted by the United States delegation had certainly been drawn up with due regard to all the work already accomplished, either by the United Nations or by the General Conference itself. He therefore proposed that the United States document be taken as the basis

for discussion and amended in the light of observations made by members of the Committee.

(13) The CHAIRMAN expressed his agreement with the proposal of the delegate of France. It had been deemed desirable that the Committee be in possession of all relevant information. However, if the Committee agreed, the proposals put forward by the United States delegation could well form a basis for discussion. The Committee would therefore examine them, and adopt or modify each point contained in them.

(14) Mr. LEE (United States of America) stated that he had presented the list in the document without any assumption that it would be finally adopted. It was only put forward for the guidance of the Secretariat and of the Executive Board. There was no point in trying to enumerate all the fields where Unesco was active. On the other hand, it would not be convenient to make the list too restrictive. The Organization should aim at utilizing all skills and types of knowledge and, above all, avoid departmentalization.

(15) The CHAIRMAN said that the best way would be to take the United States list, and modify the points therein mentioned in the light of the discussion, but, nevertheless, to use it as a basis.

(16) Mr. FRANCOIS (France) agreed with the list of priority areas in paragraph 7 of document 8C/DIV/122, except for item (4). He proposed that the wording should be amended to read "social science research to reduce racial, social and international tensions", and that it should be mentioned at the end that the items were not listed in order of importance.

(17) Mr. LEE (United States of America) asked for an interpretation of the rewording proposed by his French colleague. Was it the intention to limit action to research in the social sciences, or was the definition to be broad enough to include media of mass communication?

(18) Mr. JUNANKAR (India) observed, regarding item (1) in the list, that that was an area where what was required was not so much a series of major projects, as aid to Member States. It would be useful therefore not to lay it down as a priority area, but to couple it with technical aid.
(19) On area (4) he wished to add something regarding peaceful co-operation, and in area (6) the utilization of scientific knowledge for peaceful purposes and the application of scientific discoveries and achievements to improvement of the living conditions of mankind should both be stressed.

(20) Mr. SOMMERFELT (Norway) asked whether item (2) should not include vocational training. He also found that item (5) was too vague and that the exchange of culture should be accompanied by research and study of the various cultural values existing in the world.

(21) Mr. MAHEU (Assistant Director-General) said that for eight years he had been listening to similar discussions, both in the United Nations and in the Specialized Agencies, and had found them all alike. Whenever the idea of working out a concentrated programme was mooted, everybody was at first full of enthusiasm: committees set out to be very strict, to retain none but genuine priority projects, very carefully chosen. They proposed ruthless cuts so that only what was really essential would remain. But as soon as they came to discuss specific projects, difficulties arose. Each delegation in turn put forward very strong arguments for retaining or re-inserting a particular project. Definitions became wider and wider and increasingly vague and indefinite. The final result was not very different from the original.
(22) He warned the Committee against that tendency, which was already evident in the amendments proposed by France and India in connexion with item (4).
(23) What the Director-General hoped to obtain from the General Conference was a series of definite directives on a few specific points connected with the future programme, and he trusted that the Committee's discussion would follow that line steadily.

(24) Mr. FRANCOIS (France) thought nobody could fail to realize that, when meetings were requested to suggest cuts or make savings in a programme, the result was the opposite of what was desired. Economies were effected only when the government suggested them, at the request of parliament. In the case in point, however, he did not think that any attempt was being made to go back to Unesco's past programmes.
(25) He maintained that it was most important for Unesco to give attention to the problem of racial tensions. Not long ago the world had gone through terrible suffering because of such tensions, and even at the present time they were an acute problem in several parts of the globe. He therefore did not think he was overstating the truth in saying that Unesco should take action in that field as soon as possible.

(26) Mr. MAHEU (Assistant Director-General) said that where he disagreed with the French delegate was on the expression the problem of tensions. In his opinion, that was more than an area; the whole of Unesco's work was directed towards the solution of the problem of tensions in the world.

(27) The CHAIRMAN agreed that it was a matter of how much the Conference wished to place limits on the activities now being defined.

(28) Mr. ABDEL-RAHMAN (Egypt) suggested that this was a first reading of the document, during which it would be difficult to arrive at a final decision. The Committee would be in a better position to appreciate it when it reached a second reading.

(29) The CHAIRMAN agreed with the delegate of Egypt. Nevertheless he could see the point made by the delegate of France, and would like

an agreement to be reached on principles.

(30) Mr. JUNANKAR (India) thought it would be difficult to avoid mentioning a particular field when defining priority areas. The two notions were much too closely tied together for a separation to be made easily. On the other hand, he feared that fields not mentioned would be considered as not being of high priority.

(31) Mr. MAHEU (Assistant Director-General) proposed that a preliminary selection of priority areas for discussion be made immediately. In the light of the discussion, the Director-General could then submit specific proposals for delimiting the work more exactly within each of the accepted areas.

(32) The CHAIRMAN accepted the suggestion by the Assistant Director-General. The tensions problem would be placed among the high priority areas, and the next day further study would be made of that point, taking into consideration specific ideas put forward by the Director-General.

(33) Mr. PANNETON (Canada) was always pleased to hear any reference to concentration of the programme because in his opinion that was the best way of making Unesco more efficient. It seemed to him that items (1), (2), (3) and (4) in paragraph 7 should have very high priority, while the last two depended upon the first four and should give way to them.

(34) Mr. ABDEL-RAHMAN (Egypt) reminded the Assistant Director-General of the question he had put forward, and wondered if an answer were now available.

(35) Mr. MAHEU (Assistant Director-General) said that he had the replies which he had promised the Egyptian delegate that morning. He pointed out that the figures in the reply were expressed as percentages of the whole of Part II of the programme, with the exception of the Documents and Publications Service. He warned the meeting not to interpret the figures too strictly.
(36) For item (1) the appropriations for 1955 to 1956 were 7.84% of the total. For item (2) the appropriations were 14.70%, for item (3) 18.56%, and for item (4) 1.17%.
(37) He mentioned that the last figure referred only to appropriations in the Social Sciences chapter and did not include any Education or Mass Communication projects.
(38) For item (5) the appropriations for 1955 to 1956 were 3.69% of the total and for item (6) 3.12%.
(39) Mr. Maheu pointed out that the last figure referred only to Natural Science projects. If certain Social Science projects were included, the figure became 4.58%.

(40) Mr. ABDEL-RAHMAN (Egypt) agreed with the delegate of India that, when choosing high priority areas, one had always in view what type of projects would come under them. He noted, from the figures given by the Assistant Director-General, that the six areas mentioned under paragraph 7 accounted for about 50% of the programme for 1955-56. With concentration of the programme, that would become 100%. He therefore proposed that, within each area, an appropriate sub-title be agreed upon, in order to obtain the best results.

(41) Mr. LEE (United States of America) understood that the Director-General would present a list of such possible choices at the next meeting.

(42) The CHAIRMAN suggested that the Committee agree on a list of about half a dozen high priority areas, to be defined in fairly wide terms. He would then propose within each area a series of three possible breakdowns, on which the Committee would make a choice.

(43) Mr. LEE (United States of America) preferred a list of about 15 such priority areas, out of which the Committee would choose only 8 by selective voting. He particularly had in mind the objections raised by the delegates of France, Norway and India, and did not find it practicable to start on such a narrow basis as 6 areas.

(44) Mr. FRANCOIS (France) was pleased that priority areas already accounted for 50% of the programme. He did not favour the procedure of successive votes on a longer list.

(45) The CHAIRMAN asked if the Committee agreed on items (1) and (2) in paragraph 7.

(46) Items (1) and (2) were agreed upon by the Committee.

(47) The CHAIRMAN then opened discussion of item (3).

(48) Mr. LEE (United States of America), keeping in mind the remarks of the delegate of France, suggested that action to remove tensions might well be included under that item.

(49) Mr. MAHEU (Assistant Director-General) doubted whether item (3) should be included in the paragraph, as the Committee had classified action for the promotion of international understanding among the general activities. He personally felt that item (3) was not a project but a permanent activity and proposed that it be deleted from the paragraph.

(50) Mr. COWELL (United Kingdom) agreed with that view. The Committee, instead of working on concentration of the programme, was merely relabelling activities.

(51) The CHAIRMAN asked whether the Committee agreed with what the Assistant Director-General had just said.

(52) Mr. LEE (United States of America) could not agree. If that item was a permanent function of Unesco, the same could be said of fundamental education, and of the development of scientific research.

(53) Mr. COWELL (United Kingdom) found the sentence too vague, it contained a whole programme. The Committee should try to be more specific, and recommend some concrete subject.

(54) Mr. FRANCOIS (France) proposed that items (3) and (4) be combined so as to cover both international understanding and action to remove tensions of any kind.

(55) It was agreed to eliminate item (3) on the understanding that it would be covered by the next item.

(56) The CHAIRMAN opened discussion on item (4).

(57) Mr. FRANCOIS (France), in the course of a general discussion on this item, repeated his proposal, made earlier, that the item be modified to include the reduction of racial, social and international tensions.

(58) The CHAIRMAN reminded the Assistant Director-General of his offer to put to the Committee suggestions for possible specifications of each area, once that area had been accepted in principle by the Committee.
(59) He asked whether the Assistant Director-General would present such specifications for items (1) and (2) as well as for item (3).

(60) Mr. MAHEU (Assistant Director-General) said that, in his opinion, it was unnecessary to be more specific with regard to items (1) and (2), which seemed to him sufficiently precise. He would make suggestions only on item (4), which was vaguer.

(61) The CHAIRMAN proposed, in that case, that the Committee should do that now, and he thought that it would be easy.

(62) Mr. JUNANKAR (India) said that, in his opinion, the whole theme was important, and to try and narrow it down would leave aside a number of problems where Unesco's action was absolutely essential.

(63) The CHAIRMAN agreed with the delegate of India that all problems coming under that item were important. However, it was the Committee's task to indicate to the Director-General those projects upon which it was necessary to concentrate Unesco's action.

(64) Mr. MAHEU (Assistant Director-General) reminded the Committee of three important considerations which should guide it in its choice of priority areas: first, the importance of the subject; next, the urgency of the problem, and lastly the effectiveness of Unesco's action in this area. It should not be forgotten that Unesco was a young organization which was only just beginning to make itself heard in the world. It would be a mistake to commit the Organization without due consideration to action in an area where it could not make its influence felt. He asked the Committee to reflect what would happen to Unesco's prestige, and to the confidence which the peoples of different countries placed in the Organization, if, after raising great hopes, it failed in its attack on a problem that proved beyond its solution.

(65) Mr. LEE (United States of America), referring to paragraph E (c) of the Economic and Social Council list of priorities (document 8C/DIV/125), proposed adoption of the sentence without the words "Education for", and suggested the addition of "education for the removal of discrimination".

(66) Mr. FRANCOIS (France) thought that would be a very suitable problem for Unesco's attention: the analysis of the conditions for coexistence.

(67) Mr. COWELL (United Kingdom), referring to project 3.4 of the Social Sciences programme, wondered if the resolution did not cover the point now being considered.

(68) The CHAIRMAN pointed out that, if the Committee could not reach agreement on a narrow area, then, it would have to be extended until some point of common agreement was found.

(69) It was agreed that the proposal of the delegate of France would be used as a basis for the point, leaving the Chairman and the Rapporteur the final drafting of it.

(70) The CHAIRMAN then moved to discussion of item (5) of paragraph 7.

(71) Mr. MAHEU (Assistant Director-General) doubted whether the word 'exchange was correct. In his opinion, the term was too vague.

(72) Mr. FRANCOIS (France) proposed "knowledge and mutual understanding of different cultures".

(73) Mr. MAHEU (Assistant Director-General) thought that the text should be more precise.

(74) The CHAIRMAN reminded the Committee of its earlier decision to give priority to the exchange of culture between the East and the West, and proposed the following draft "mutual appreciation and understanding of Eastern and Western cultural values".

(75) Mr. FREY (German Federal Republic) seconded the Chairman's proposal.

(76) Mr. SOMMERFELT (Norway) proposed "comparative study of Eastern and Western cultures".

(77) The CHAIRMAN would not agree. It did not seem that the study would correspond to an area where priority ought to be considered essential.

(78) Mr. LEE (United States of America) suggested "promotion of East and West inter-cultural exchanges for international understanding".

(79) Mr. MAHEU (Assistant Director-General)

thought that, in French, the sentence might read "connaissance et compréhension mutuelle des cultures de l'Orient et de l'Occident". The delegate of the United States of America wished to add "for international understanding", but that would be anticipating the results. Mr. Maheu asked him if he insisted on the last phrase.

(80) Mr. LEE (United States of America) agreed to the deletion of the words "for international understanding" from his proposal.

(81) Mr. COWELL (United Kingdom) suggested instead "the enrichment of cultural life".

(82) The CHAIRMAN, summing up, said that there were two proposals before the Committee, one from the delegate of Norway and the other from the United States delegate, modified in the light of the ensuing discussion. He called for support of the proposal of the delegate of Norway.

(83) No support being given, that proposal was dropped.

(84) The CHAIRMAN then read the proposal of the Assistant Director-General.

(85) This last proposal was adopted.

(86) The Committee moved to discussion of item (6) of paragraph 7.

(87) Mr. MAHEU (Assistant Director-General) asked whether the United States delegate wished to retain the word 'natural'. It seemed to him that the Social Sciences were also concerned.

(88) Mr. LEE (United States of America) agreed to deletion of the word 'natural' although, for American audiences, he would have both words 'natural and social'.

(89) Mr. JUNANKAR (India) referred to his earlier proposal for additions to this point. He also proposed to include research into the application of atomic energy to peaceful purposes.

(90) The CHAIRMAN accepted the first point of the delegate of India, leaving the Committee to take the final decision. The second point, however, seemed to be too restrictive, and contrary to the accepted definition of an area.

(91) Mr. MAHEU (Assistant Director-General) agreed with regard to the second point proposed by the Indian delegate that it was really too restrictive. It would mean including applied science, but he reminded the meeting that, although scientific research was a matter for Unesco alone, several other Specialized Agencies, such as WHO and FAO, were concerned with the applied forms of certain sciences.
(92) Reverting to the first point, he proposed that the words for peaceful purposes be deleted.

(93) Mr. JUNANKAR (India) remarked that the applications of science were also important for the improvement of the living conditions of mankind.
(94) He also wished to maintain the words for peaceful purposes. Scientific research could be directed both towards war and towards peace, and it was Unesco's task to encourage only such research as would tend to the promotion of international peace.

(95) Mr. COWELL (United Kingdom) preferred not to add the words for peaceful purposes.

(96) Mr. LEE (United States of America) remarked that action to promote peace was implied in all Unesco action and was in fact the very reason for Unesco's existence.

(97) Mr. JUNANKAR (India) added that the diffusion of scientific knowledge was also important, and that it would be eliminated from Unesco's action, if the present draft were adopted.

(98) The CHAIRMAN remarked that, since the Committee was aiming at concentrating activity on a small group of high priority areas, some of them would naturally be left out.
(99) He asked whether the Committee wished to retain 'for peaceful purposes'.

(100) Mr. ABDEL-RAHMAN (Egypt) stated that he considered the second point to be important, and proposed that it should appear in the recommendations of the Committee. To his mind, the mention of peaceful purposes was a specific recommendation, without which the interpretation of item (6) would not be satisfactory.

(101) Mr. MAHEU (Assistant Director-General) thought the fact of adding for the improvement of living conditions in itself indicated a utilitarian purpose. If the Committee wished to include the practical application of science in its recommendations, it should be inserted as an additional item.

(102) Mr. LEE (United States of America) proposed that item (6) be adopted as suggested by the Assistant Director-General.

(103) This was agreed.

(104) The CHAIRMAN then moved to consideration of paragraphs 8 and 9.

(105) Mr. PANNETON (Canada) proposed to make the French and English texts of paragraph 8 agree. He suggested replacing "not less than 3 and not more than 6" by "a small number", which seemed to him less restrictive.

(106) Mr. COWELL (United Kingdom) proposed to delete the last sentence in paragraph 9.

(107) The two paragraphs, as amended, were adopted.

(108) Mr. MAHEU (Assistant Director-General) proposed to delete the word 'truly' from

paragraph 10 and also suggested that the expression "task force" be altered.

(109) Mr. LEE (United States of America) agreed to the dropping of "task force."

(110) Mr. COWELL (United Kingdom) suggested merging paragraphs 10 and 11 which formed one directive.

(111) Mr. LEE (United States of America) favoured separate paragraphs. In paragraph 11, there was a specific authorization to the Director-General to establish a planning unit.

(112) Mr. COWELL (United Kingdom) recommended therefore changing the order, and making paragraph 11 become 10, as the sequence would then be more logical. He also favoured suppression of the words in his immediate office in that paragraph.

(113) Mr. FRANCOIS (France) doubted whether paragraph 11, which in no way increased the powers of the Director-General, served any useful purpose, as he could already introduce changes in the administrative structure of the Organization without the authorization of the General Conference, and had in fact done so.

(114) Mr. MAHEU (Assistant Director-General) confirmed that the Director-General was competent to alter the administrative structure of the Organization.
(115) Nevertheless, he hoped that paragraph 10 would be retained in an amended form, in order to give a more concrete basis for the Director-General's action in introducing the changes made necessary by the remodelling of the programme. He suggested the following wording:
"The Director-General is authorized to study the methods for administering major projects and to give special consideration to the organizational pattern calculated to ensure full use of all relevant disciplines, as each project may require".
(116) He agreed that the order of paragraphs 10 and 11 should be changed as suggested by the United Kingdom delegate, but doubted whether paragraph 11 was really necessary. It seemed to him even dangerous.

(117) Mr. COWELL (United Kingdom) agreed to the suppression of paragraph 11 and suggested further that paragraph 10 might be deleted.

(118) Mr. LEE (United States of America) agreed to deletion of paragraph 10.

(119) Mr. COWELL (United Kingdom) wished to know what additional authority paragraph 10 gave to the Director-General.

(120) Mr. MAHEU (Assistant Director-General) admitted that paragraph 10 in no way increased the existing powers of the Director-General. He thought, however, that, for psychological reasons, it would be wiser to reassert the principle.

(121) It was decided by 5 votes to 1, without abstention, that paragraph 10, in its new form, should be retained.

The meeting rose at 6.55 p.m.

# THIRTY-FOURTH MEETING

*1 December 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**DRAFT RESOLUTION CONCERNING THE FUTURE PROGRAMME** (document 8C/DIV/127)

(1) The CHAIRMAN, opening the discussion, said that he did not understand paragraph 10.

(2) Mr. LEE (United States of America) said it was not known whether money and staff would be required for planning. The paragraph had been included to ensure that the proposals made in the resolution did not fall through if the Director-General and his staff felt unable to devote the necessary time to the important planning required for the high priority activities.

(3) Mr. MAHEU (Assistant Director-General) stated that he now understood more clearly the sense which the United States delegate attributed to paragraph 10. Even so, he thought that it might with advantage be moved elsewhere, and that the wording might be altered.
(4) The point of the paragraph was to ask the Director-General to pay particular attention to the planning referred to in paragraph 7. It gave the Director-General increased authority by emphasizing that the work in question was no mere routine matter, but creative and imaginative work which should accompany the implementation of the programme for 1955-56. It would therefore be better for that paragraph 10 to come at the end of paragraph 7, or to be inserted between the

existing paragraphs 7 and 8, with a number of its own.
(5) He also thought that the wording of paragraph 10 was not clear, particularly in its reference to evaluation. Apparently what was meant was the planning of future activities. The Assistant Director-General accordingly proposed the following text, subject to subsequent rewording:

"In carrying out activities in the 1955-56 programme which fall within priority areas, the Director-General shall attach special importance to making a critical review of those activities with a view to preparing major projects for execution in 1957-58".

(6) The CHAIRMAN observed that an additional sentence in paragraph 7 would cover the point.

(7) Mr. COWELL (United Kingdom) agreed with the Assistant Director-General, namely, that paragraph 7 could be suitably enlarged and that paragraph 10 could be deleted.
(8) He would like to see the words 'is authorized to' replaced, throughout the resolution, by shall.

(9) Mr. AVIDOR (Israel) agreed with the Assistant Director-General as regarded paragraph 10, but, if the paragraph were retained, 'evaluation and planning aspects should read planning and evaluation aspects, since evaluation of results normally followed the implementation of action proposed.
(10) In addition, there was a certain abuse of the term high priority, used adjectivally throughout the document.

(11) The CHAIRMAN, referring to the first point made by the delegate of Israel, said that evaluation was put before planning because the evaluation was evaluation of past work, while the planning was the planning of future work.

(12) Mr. LEE (United States of America) said that, in planning future work, it would be desirable to have some idea of what methods had been most successful in the past. Perhaps a small-scale evaluation project should be organized to assist planning.

(13) Mr. ABDEL-RAHMAN (Egypt) asked about the funds for such work.

(14) Mr. MAHEU (Assistant Director-General) observed that such planning, to be conducted on the basis of a critical review of past work, was regarded by the Director-General as a task of the greatest importance. Emphasis would, however, be laid on quality rather than quantity in reviewing past achievements.
(15) The Director-General already had the necessary staff available. There was no advantage in creating a special office, since such work should be regarded as a combined effort on the part of the Secretariat as a whole. The Planning Group which had occasionally been mentioned already existed. It consisted of the Director-General, the Assistant Directors-General and their immediate assistants.

(16) It might be necessary, in organizing the work, to engage some temporary lower ranking officials. In addition, the help of certain consultants and specialists might be needed. That did not mean, however, that it would be necessary to provide extra funds and posts. The Director-General could meet requirements by exercising his right to transfer funds during the year. That flexible procedure seemed better from every point of view. The work planned might accordingly be carried out by the staff and with the funds already available, subject to transfers to be arranged later.

(17) Mr. ABDEL-RAHMAN (Egypt), referring to paragraph 10, said that, if evaluation were limited to high priority areas, and did not extend to the programme as a whole, it was hard to see how any general planning was possible.

(18) Mr. MAHEU (Assistant Director-General) replied that such an idea was rather a long way from the original intention of the United States delegate, who regarded evaluation as the starting point for planning. The major projects belonged to the limited priority areas, and the evaluation in question only concerned those areas. If evaluation were to apply to the whole programme, the proposition would be quite a different one.

(19) Mr. LEE (United States of America) agreed that evaluation should extend to as much of the programme as possible. But the point of the paragraph was to stress that planning and evaluation were particularly important in the high priority areas.

(20) Mr. JUNANKAR (India) said that, with all deference towards the social scientists, it was over-optimistic to believe that evaluation could be applied to the whole range of Unesco's activities. If evaluation were to apply to the whole programme, there was a danger that a special organ might be required. That, of course, would have budgetary implications.
(21) The Director-General, he added, was given authority to implement the programme decided on by the Conference. Paragraph 11 implied that he was being given latitude to tamper with it, which was surely improper.

(22) The CHAIRMAN said that evaluation as used in the document did not have the technical meaning it bore for the social scientists.

(23) Mr. MAHEU (Assistant Director-General) suggested placing paragraph 11 before paragraph 7, at the same time broadening its scope as suggested by the delegate of Egypt. The purpose of the paragraph was to ask the Director-General to keep constantly in mind the need for a critical review, but not for a scientific evaluation of the programme. As the programme was to be scrutinized with an eye to the future, the Director-General would endeavour to complete certain projects in 1956 and, where appropriate, to cut down those appearing unlikely to yield results.

(24) Paragraph 11 thus pointed to a critical review of the whole programme by the Director-General, with the aim of ensuring a certain amount of flexibility in carrying it out.
(25) Paragraph 7 as it stood would be followed by a modified version of paragraph 10; paragraph 8, providing for consultation with Member States and the bodies concerned, and paragraph 9, dealing with the possible administrative repercussions of remodelling the programme, would then follow logically.

(26) Mr. ABDEL-RAHMAN (Egypt), referring to the point raised by the delegate of India, said that Unesco, in its Social Sciences Department, was continually using the word 'evaluation' in the scientific sense.

(27) Mr. MAHEU (Assistant Director-General) pointed out that, for the time being, the evaluation on which the Department of Social Sciences was engaged was more limited in scope. What it was principally concerned with was trying out different evaluation techniques. No really certain methods yet existed in that field. For the time being, plain common sense and some critical thinking were all that were needed.

(28) Mr. COWELL (United Kingdom) suspected that the word 'evaluation' as used by the United States delegation in its draft resolution, simply meant a critical review.
(29) As a matter of drafting, he felt that it would be well to reverse the order of the existing paragraphs (5) and (6), so that the definition of priority area came before the definition of major project.

(30) Mr. FRANCOIS (France) noted, in paragraph 3 (v), that the term 'action sur les esprits' had been replaced by 'action sur l'opinion publique'. The French delegation very much preferred the previous version, which had the advantage of covering educational activities concerned with human rights and international co-operation.

(31) Mr. MAHEU (Assistant Director-General) believed that the original French text had been translated by action on public opinion, and that the expression had been translated back word for word when the present resolution was being drafted. He proposed readopting the original French text, and leaving the English as it stood.

(32) Approved.

(33) Referring to the French text, Mr. FRANCOIS (France) thought that paragraphs 4 and 5 needed to be brought into line. They contained the expressions 'activités spéciales', 'projets' and 'entreprises', all of which appeared to represent the same idea.

(34) Mr. MAHEU (Assistant Director-General) suggested that "projets d'importance majeure" be substituted for "entreprises d'importance majeure". The amendment did not affect the English text.

(35) Approved.

(36) Mr. FRANCOIS (France) was glad to accept Mr. Cowell's suggestion that the order of paragraphs 5 and 6 be reversed, but he thought that the definition of priority areas in paragraph 6 should be reworded.

(37) As proposed by Mr. François, it was agreed to amend the beginning of paragraph 6 to read:
"Priority areas are those subject fields to which the General Conference decides to attach particular importance within the framework of special activities, and in which major projects should be worked out and organized".

(38) Mr. JUNANKAR (India), referring to paragraph 3 (v), said that public opinion, therein mentioned, was a vague concept. It would be better to say action to promote human rights and international co-operation.

(39) Mr. MAHEU (Assistant Director-General) wondered whether it would be possible to satisfy the delegate for India without arousing objections on the part of the delegate of France, who had made a special request for the reintroduction in the French text of the expression 'action sur les esprits'.

(40) Mr. AVIDOR (Israel) said that in paragraph 3, 'general activities' were defined as the permanent functions of the Organization of interest to all Member States. Would it not be better to say 'continuous' rather than 'permanent'?

(41) The CHAIRMAN said it had originally been agreed to use the expression 'continuous functions'. The words 'permanent functions' might be a translation back from the French.

(42) Mr. AVIDOR (Israel) said that there were some activities, such as the furthering of co-operation between National Commissions faced with similar problems, that were difficult to class either as general or as special activities, as defined in the document.

(43) Mr. MAHEU (Assistant Director-General) recalled that the Chairman of the Executive Board had on several occasions emphasized the fact that Unesco's tenth anniversary would mark a new starting point in the Organization's career. The remodelling of the programme was the first stage in the new phase. The request for the collaboration of Member States and the choice of methods to be employed in order that such collaboration might be effective was another stage.

(44) Mr. PANNETON (Canada) suggested substituting 'long-term functions' for 'permanent functions'.

(45) Mr. MAHEU (Assistant Director-General) suggested the following reading for paragraph 3: "those functions of the Organization which concern all Member States".

(46) Mr. FRANCOIS (France) would prefer to retain "permanent functions".

(47) Mr. ABDEL-RAHMAN (Egypt) said that in previous discussions much stress had been laid on the fact that the two parts of the programme, i.e. general and special activities, were really parts of a whole, and that the full use of knowledge gained as a result of general activities could be applied with advantage to the special activities. But the reverse was also true, and perhaps the point should be made in the resolution.
(48) In paragraphs (a) and (b) of paragraph 3, it was stated that general activities were designed to develop education, science and culture and to improve international understanding. But that could be said of the special activities too.

(49) Mr. MAHEU (Assistant Director-General) acknowledged the cogency of the Egyptian delegate's remarks, and hoped that Mr. Abdel-Rahman would be able to suggest ways of solving the difficulties to which he had referred.
(50) Mr. Maheu also recalled that sub-paragraphs (a) and (b) had been inserted at the request of the French delegation. He agreed that they referred to general aims, which were equally applicable to special projects and technical aid.
(51) Further, point (3) of paragraph 4 on page 2 had been inserted at the proposal of the United States delegate. It was true that general activities also were covered by budget estimates and carried out in accordance with clearly defined methods. The United States delegation, however, must have meant that the Conference should know exactly what it was undertaking when it agreed to the implementation of a long-term project. If a project were spread over several financial years, provision should be made for the necessary funds in the budget for each of the years concerned.
(52) Mr. Maheu went on to emphasize the fact that the unity of the programme had two equally valid meanings. General activities were essential to special activities; conversely, general activities increased in effectiveness as the Organization developed its special activities and technical aid. It would accordingly be advisable to draw attention in paragraph 2 to the complete interdependence of the two parts of the programme.

(53) Mr. ABDEL-RAHMAN (Egypt) understood that the problem of the balance between general and special activities lay outside the terms of reference of the Committee. But it would inevitably arise once the resolution was forwarded to the Programme and Budget Commission. Should the Committee recommend that it be considered? If a mathematical balance between the two activities was not necessary, should not the Committee say so?

(54) Mr. MAHEU (Assistant Director-General) did not see any difficulty there. The Programme and Budget Commission had announced that it intended to return to the matter, and the Committee had already expressed its opinion in document 8C/BUD/2.

(55) Mr. COWELL (United Kingdom) pointed out that the point raised by the delegate of Egypt was clearly dealt with in paragraph 18 of the report by the Executive Board on remodelling of the future programme (document 8C/PRG/13). To remove all misunderstanding, it might be well to include, at the beginning of the draft resolution, a statement recording the Committee's approval of the general policy set forth in document 8C/PRG/13.

(56) Mr. MAHEU (Assistant Director-General) said that, in its own report on document 8C/PRG/13 (document 8C/BUD/2, paragraph 7), the Committee had already recorded its agreement with the views of the Executive Board "that, in considering each of the proposed activities, the need for integration should be constantly borne in mind". That same paragraph went on to say that "it would therefore be harmful to seek to determine in advance the apportionment of funds between the general aspect and the special aspect of these activities". Hence it would be sufficient to say that the Committee agreed with the views of the Board, as set forth in document 8C/PRG/13.

(57) In reply to a question from the CHAIRMAN, Mr. FRANCOIS (France) stated that he maintained his position in favour of retaining sub-paragraphs (a) and (b) of paragraph 3 (DIV/127). He had however noted the comments of the Egyptian delegate with keen interest, and would suggest the following wording for sub-paragraph (a): "The development, in all Member States, of education..."; further, the beginning of paragraph 4 might read: "Special activities are those of the general activities designed to meet ...".

(58) Mr. MAHEU (Assistant Director-General) thought that the second amendment might lead to confusion between two quite separate ideas.

(59) Mr. LEE (United States of America) agreed with the Assistant Director-General that paragraphs (a) and (b) might not be logically necessary. They had been introduced merely in order to emphasize the purpose of all Unesco activity. It would be better to include them under paragraph 2, with a sentence stressing the essential solidarity of both parts of the programme, and then to say that both types of activity were designed to achieve the aims set forth in paragraphs (a) and (b).

(60) It was decided by vote not to delete paragraphs (a) and (b) of paragraph 3, but to include them under paragraph 2.

(61) Mr. SOMMERFELT (Norway) thought that some reference ought perhaps to be made to the Constitution at that point in the resolution.

(62) The CHAIRMAN, personally, would prefer to omit such a reference.

(63) Mr. COWELL (United Kingdom) agreed with the delegate of Norway. Perhaps the existing paragraph 3 (v) might suitably become (c) under paragraph 2.

(64) Mr. MAHEU (Assistant Director-General) saw no reason for altering the position of sub-paragraph 3 (v), which would lose much of its

point if it merely drew attention to a very general aim. On the contrary, it referred to very definite and practical action with a view to teaching adults and young people the principles of human rights and international co-operation.

(65) It was finally agreed not to move sub-paragraph 3 (v).

(66) In paragraph 3 (v) it was agreed that the English words "action on public opinion" should be revised with a view to finding an exact translation of the French expression "action sur les esprits".

(67) Mr. LEE (United States of America) and Mr. ABDEL-RAHMAN (Egypt) supported the idea advanced by the delegate of the United Kingdom, namely, that the Committee and its resolution should record approval of document 8C/PRG/13, and the latter thought that there should also be a reference to document 8C/BUD/2.

(68) Mr. FRANCOIS (France) stated that the French delegation was fundamentally opposed to paragraphs 62 and 68 of document 8C/PRG/13. On the other hand, it approved document 8C/BUD/2, in which the Committee had expressed quite a different opinion on the problem dealt with in those two paragraphs.

(69) The CHAIRMAN said that, because of the views held by the delegate of France, the question would have to be decided by vote.

(70) Mr. AVIDOR (Israel) said that reference ought perhaps to be made to the report by the Expert Committee on remodelling of the programme (8C/DIV/80).

(71) The CHAIRMAN and Mr. MAHEU (Assistant Director-General) both agreed that the report referred to was not a report by an organ of the Conference. It was a report to the Director-General, referred to the Committee in order that the Committee might submit its views on it to the Programme Commission. In submitting the resolution, reference might be made to the fact that the report had been so used, but the Conference should not be asked to take note of the document.

(72) Sir Ronald ADAM (Chairman of the Executive Board) asked whether the Committee would agree to add a paragraph at the end on the procedure to be followed for aid to Member States.

(73) In paragraph 63 of document 8C/PRG/13, the Board had recommended the methods and procedures successfully used in implementing the Expanded Programme of Technical Assistance. The view of the Board had been that the period 1955-56 should be considered a trial period as regards the allotment of funds for such purposes, and that, in the light of the experience gathered, the Director-General should include in the draft programme for 1957-58 a statement of the conditions proposed for the grant of aid to Member States, together with an apportionment of funds under that heading, in the light of the requests received from Member States during the preceding period.

(74) The CHAIRMAN said that, if a member cared to move something on those lines, a paragraph might be added, under the heading Aid to Member States.

(75) Mr. ABDEL-RAHMAN (Egypt) assumed that in any major project, such as fundamental education, there might be activities which would be classed as aid to Member States. The two would not be mutually exclusive. He would prepare an amendment to the resolution designed to make his point clear.

(76) It was agreed that the Secretariat should prepare a final draft of the resolution to take into account the comments and amendments made during the meeting.

(77) Mr. JUNANKAR (India) called attention to a point of drafting in the last paragraph of paragraph 4. It was stated that some projects required only small resources, while others called for concentration of efforts and resources, i.e., a contrast was presumably intended. If so, was the word concentration not misleading?

(78) Mr. LEE (United States of America) said that paragraph 4 began as follows: "Special activities are those designed to meet the individual needs of Member States". It would be better to say: "... to meet the needs of individual Member States or groups of Member States".

(79) The CHAIRMAN said that the above points would be duly considered in preparing the second draft.

The meeting rose at 12.15 p.m.

# THIRTY-FIFTH MEETING

*2 December 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**DRAFT RESOLUTION CONCERNING THE FUTURE PROGRAMME** (document 8C/DIV/137)

(1) The CHAIRMAN said that document 8C/DIV/137 contained the draft resolution appearing in document 8C/DIV/127, as amended at the previous day's meeting.

Paragraph 1

(2) Mr. MAHEU (Assistant Director-General) suggested that the paragraph should be rearranged, in conformity with the practice adopted for resolutions; as follows:

"The General Conference
Approves the report ... and
Authorizes the Director-General ....".

(3) Adopted.

(4) He also suggested that, in order to avoid any ambiguity, the last line but one of paragraph 1 should read: "in the light of the principles laid down in the aforementioned documents ...".

Definitions

Paragraph 2

(5) The CHAIRMAN observed that the English text of the last three lines, together with the final line of the second sub-paragraph, needed improvement. The Secretariat could be entrusted with the task of seeing that they corresponded to the French.

(6) Mr. ABDEL-RAHMAN (Egypt) wanted the word 'compromise' in the second line replaced by something stronger.

(7) The CHAIRMAN suggested the word 'endanger'.

(8) Thus amended, paragraph 2 was adopted.

Paragraph 3

(9) The CHAIRMAN observed that the first line should be brought into line with the French.

(10) After some discussion it was agreed that sub-paragraph (c) should read: "(c) to develop better mutual understanding among the peoples of the world."

(11) Thus amended, paragraph 3 was adopted.

Paragraph 4

(12) Mr. AVIDOR (Israel) suggested that the words 'as such' in the second line should be deleted.

(13) This amendment was adopted.

(14) Mr. AVIDOR (Israel) suggested that the words 'in preparation for' in paragraph 4 (vi) be deleted.

(15) Mr. MAHEU (Assistant Director-General) said that the paragraph had been included to meet the concerns of the Brazilian delegation. Special activities, and major projects in particular, of course, always necessitated preliminary studies, the first stage, as it were, of implementation. But the studies in question were of a different kind: they were preliminary enquiries preceding the working out of defined projects into possibilities, undertaken even before deciding which of such possibilities should be retained as a basis for projects. Such preliminary enquiries were to enable the Secretariat to keep abreast of a large number of problems which might occasion action on the part of Unesco.

(16) The CHAIRMAN suggested that the paragraph should run: "such enquiries, studies and research as are necessary as a basis for special activities".

(17) This amendment was adopted.

(18) Paragraph 4, as amended, was adopted.

Paragraph 5

(19) Mr. ABDEL-RAHMAN (Egypt), referring to the last sub-paragraph, said that the projects mentioned as requiring only small resources for a limited time were presumably the activities mentioned under 5 (i). The sentence should therefore read: "Some of the projects mentioned under (i) above ...".

(20) Mr. COWELL (United Kingdom) said that 'will require' in the first line of the last sub-paragraph should read 'may require'.

(21) In (b) of the second sub-paragraph, the words 'in carrying them out' (English text) should read 'of their execution'.

(22) Mr. SILLER (Mexico) asked whether the phrase: "in accordance with such procedures as may be established" meant that the procedures would be altered and whether

a special procedure would be established.

(23) The CHAIRMAN referred the speaker to paragraph 13.

(24) Mr. ABDEL-RAHMAN (Egypt) suggested that the transition from paragraph 5 to paragraph 6 would be smoother if the following were added at the end of paragraph 5: "Such major projects would be selected in the light of the following considerations".

(25) Mr. MAHEU (Assistant Director-General) appreciated the Egyptian delegate's point, but did not consider the addition necessary. The chain of ideas carrying on from paragraph 5 to paragraph 6 seemed to him to be clear enough.
(26) With regard to the wording of paragraph 5, Mr. Maheu proposed that in sub-paragraph (i) of the French text 'activités' be substituted for 'projets' and that after sub-paragraph (ii), "Ces projets tendent..." should be replaced by "Les activités spéciales tendent à apporter une solution pratique ..."

(27) Mr. SEDES (France) proposed that the last paragraph of 5 be amended as follows: "In the case of activities initiated by the Organization, some of the projects will require only ..."

(28) Mr. MAHEU (Assistant Director-General) suggested that the sentence: "They are calculated to provide a practical solution ..." might follow immediately after the first sentence of paragraph 5.

(29) Adopted, subject to drafting changes.

Paragraph 6

(30) It was decided that the sentence beginning "These priority areas..." should form a new paragraph, and that the description of the areas themselves should be set out according to the French text.

Paragraph 7

(31) Mr. MAHEU (Assistant Director-General) suggested that in line 2 of paragraph 7 (French version) the word 'ampleur' be substituted for 'importance'.

(32) Adopted.

(33) Mr. COWELL (United Kingdom) asked what was meant by "While no specification is placed upon the size of the major projects ..." It might be better to say "While there is no specific limit on the size..."

(34) The CHAIRMAN observed that the idea behind the paragraph was that no specific recommendation was made about the size of projects, rather than that their size should be restricted.

(35) It was agreed to amend the beginning of the sentence to read: "Major projects must be of sufficient magnitude to ensure..."

(36) Mr. MAHEU (Assistant Director-General) thought that the French text might be amended to read: "L'ampleur de ces projets doit être suffisante pour permettre d'obtenir...", the beginning of the sentence being deleted.

(37) The proposed amendments were adopted.

(38) As the result of a point raised by Mr. SILLER (Mexico), it was agreed to delete the words and early (fourth line), by 8 votes to 3, with 1 abstention.

(39) Mr. ABDEL-RAHMAN (Egypt) pointed out that a reference was nevertheless made to time-limits in paragraph 5.

(40) The CHAIRMAN suggested (and it was so decided) that the sentence be amended to read: "... must be of sufficient magnitude to ensure, within a given time, substantial practical results..."

(41) Mr. MAHEU (Assistant Director-General) asked whether the French-speaking delegates would be willing to substitute 'projets majeurs' for 'projets d'importance majeure', for the sake of concision and conformity with the English text.

(42) Agreed.

(43) Thus amended paragraph 7 was adopted.

Paragraph 8

(44) Mr. AVIDOR (Israel), referring to the second line, said that the activities referred to were both special and general. That should be made clear.
(45) He was also in favour of including paragraph 8 after paragraph 10, on the grounds that it merely constituted advice to the Director-General.

(46) Mr. MAHEU (Assistant Director-General) suggested that 'Directives d'exécution' be substituted for 'Règles d'exécution', at the top of page 3 (French text). He also considered that the two sub-headings - Major Projects and Aid to Member States might be deleted.
(47) Mr. Maheu did not agree with the Israeli delegate with regard to the position of paragraph 8. It seemed logical to him to mention the financial conditions for the planning of the future programme in that paragraph; to make provision for a preliminary critical study in paragraph 9; and, in paragraph 10, to invite the Director-General to draw up the necessary plans. He also suggested that the second line of the English text of paragraph 8 read: "which special activities can be completed..", and of the French text: "à déterminer les activités spéciales qui peuvent être conduites à leur terme..."

(48) Mr. AVIDOR (Israel) asked why the same provisions should not apply also to general activities.

(49) Mr. MAHEU (Assistant Director-General) replied that Mr. Avidor's remark touched on an important question of substance which was

liable to reopen the whole discussion.

(50) Mr. SEDES (France) proposed that the order of the phrases in paragraph 8 be inverted, to read: "In order to release funds for the planning of the future programme, the Director-General is authorized, with the approval of the Executive Board..."

(51) Mr. ABDEL-RAHMAN (Egypt) wanted the words 'Major Projects'(sub-title) moved to immediately before paragraph 9. It would be better to leave paragraph 8 as it was.

(52) After some discussion, it was agreed to eliminate sub-titles completely.

(53) Mr. COWELL (United Kingdom) thought that the inversion suggested by Mr. Sedes would make it look as though funds were only to be obtained by means of transfers. Did not the Director-General already have funds for planning work?

(54) Mr. MAHEU (Assistant Director-General) considered that the only purpose of the French delegate's proposal was to improve the arrangement of the text, without changing its meaning.
(55) However, the problem to be settled was what the paragraph meant, and whether it should stand. It authorized the Director-General, with the approval of the Executive Board, to release funds. The provision was not absolutely essential, as the Director-General was already authorized to make transfers within the budget in certain cases, but it had the advantage of drawing attention to the possibility of such transfers. On the other hand, it might arouse some anxiety in the Programme and Budget Commission.

(56) Mr. SEDES (France) thought that, if no other funds were provided for the planning work mentioned in the resolution, the Director-General should be given explicit authorization to make transfers for the purpose.

(57) Mr. COWELL (United Kingdom) was not convinced, and moved deletion of paragraph 8 as unnecessary.

(58) Mr. LEE (United States of America) said the only aim of the paragraph was to ensure that the Director-General had sufficient funds for planning. The Assistant Director-General had said that funds were not needed. Hence the paragraph was no longer needed, and he would second the proposal for its deletion.

(59) Sir Ronald ADAM (Chairman of the Executive Board) said that the Director-General was now in a strong position, having been authorized to make transfers from line to line in the budget. Throughout the year, money was always becoming free for one reason or another. Hence paragraph 9 by itself was enough.

(60) Mr. ABDEL-RAHMAN (Egypt) thought that, nevertheless, paragraph 8 contained a useful idea not repeated in paragraph 9 or 10, namely, that the Director-General was authorized to release funds for planning.

(61) Mr. MAHEU (Assistant Director-General) proposed that paragraph 8 be deleted and that the following sentence be added at the end of paragraph 10: "He is authorized to release during 1955-56, with the approval of the Executive Board, the funds required for the preparation of these major projects."
(62) No appropriation had yet been made for the planning of future programmes, but, as it was a new activity, it would probably be an omission to make no mention of the possibility of budgetary transfers in the document.

(63) By 10 votes to 1, with 1 abstention, it was agreed to delete paragraph 8, and to make the addition proposed by the Assistant Director-General at the end of paragraph 10.

(64) Paragraphs 9 and 10 (amended) were adopted.

Paragraph 11

(65) Mr. SEDES (France) proposed (and it was so decided) that the third line should be amended to read: "... National Commissions, the United Nations and its Specialized Agencies, and non-governmental organizations."

(66) Paragraph 11, thus amended, was adopted.

(67) Paragraphs 12 and 13 were adopted.

(68) Document 8C/DIV/137, as amended, was adopted.

The meeting rose at 11.35 a.m.

# THIRTY-SIXTH MEETING

*6 December 1954 at 6 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**RESUME OF BUDGETARY EFFECTS OF DECISIONS TAKEN BY THE PROGRAMME AND BUDGET COMMISSION AND THE ADMINISTRATIVE COMMISSION, AND PROPOSED REDUCTIONS WITHIN THE BUDGET FOR 1955-56, TO BALANCE THE BUDGET** (document 8C/BUD/4)

(1) The CHAIRMAN said that the Programme and Budget Commission had completed its work on the programme for 1955-56. He understood that the programme approved by the Commission represented an increase of some $365,000 over the provisional ceiling decided on by the Conference. The Committee was called upon to adapt that programme to the ceiling on the basis of the proposals made by the Director-General in document 8C/BUD/4.
(2) The first part of the document outlined the action taken by the Commission, while the second contained a series of proposals for reduction.
(3) The task faced by the Director-General in harmonizing the Committee's recommendations with the decisions (sometimes in direct contradiction with each other) taken by the Commission, had been exceedingly difficult. He hoped that the Committee would be able to accept the proposals as a whole, even though individual members might have misgivings about certain items.

(4) The DIRECTOR-GENERAL said that his task had not been easy. It had been necessary to strike a balance between contradictory wishes expressed by different organs of the Conference.
(5) In cases where increases had been made in the cost of combined activities, and the Secretariat felt that the Conference wished to maintain those increases, or as much of them as possible, it had sometimes been necessary, in order to balance the budget, to take money from aid to Member States in general and devote it to aid to Member States in particular.
(6) The Committee would also note some reduction in staff costs, not only in common services but also in individual posts.

(7) The CHAIRMAN said that the first eight pages (in which minor corrections were required as a result of the afternoon meeting of the Programme Commission) were for purposes of information only, and he would propose that the Committee start with a discussion of page 9.
(8) At so late a stage in the Conference's work, he trusted that members disagreeing with the Director-General's proposals would present suggestions themselves, any deletion from those proposals necessitating a suggestion for a corresponding amount to be eliminated elsewhere in the programme.

(9) Mr. ABDEL-RAHMAN (Egypt) enquired about the possibility of transferring money, within budget lines, from one chapter to another, and asked for a table showing the appropriation lines.

(10) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that, on page 1, appropriation lines were shown as would be provided for in the appropriation resolution. The Executive Board had recommended that each department constitute only one appropriation line, as an improvement on the practice followed in past years.
(11) The Director-General would be authorized to make transfers within each line. But, if money were to be transferred from one line to another, authorization would have to be obtained from the Executive Board.

(12) Mr. ABDEL-RAHMAN (Egypt) said that, if for any reason a project were deleted altogether from the programme, the possibility of making money available for such a project, should it prove to be desirable in the course of the financial period, would be considerably reduced.

(13) The DIRECTOR-GENERAL said that, after the Conference, the Secretariat would prepare Approved Work Plans for the various departments, on the basis of the resolutions adopted, and with due regard to points made by the delegations during the session. If any project had been deleted altogether from the programme, the Secretariat would not feel authorized to revive it. However, if a project were left in, the Secretariat would consider it justified to transfer money to that project, if it felt the need for doing so.
(14) Ordinarily the Secretariat implemented the appropriation resolution without unnecessary transfers. If it felt there were serious reasons for not implementing any part of a resolution, it would have to refer the matter to the Executive Board.

(15) Mr. ABDEL-RAHMAN (Egypt) suggested that it might be well to leave at least a token figure for each project, rather than to delete it entirely, so that the Director-General might be able to revive it in certain circumstances.

(16) Mr. LEE (United States of America) said that delegations had had insufficient time to study

document 8C/BUD/4, and proposed adjournment.

(17) Mr. COWELL (United Kingdom) agreed, but wanted to know what principles had guided the Director-General in making his proposals.
(18) Some projects had been adopted by the Programme Commission by very small margins. That was a point to which the Director-General might have given attention in considering where to make cuts.
(19) There seemed to be some inconsistency in the treatment of subventions. Why were some subventions reduced while others were not mentioned at all?

(20) The DIRECTOR-GENERAL said that he had tried to decide on the reductions to be made in subventions in the light of three factors: the views expressed by the delegations in the Commissions, his own views, and the opinions of the Heads of Departments as to the cuts which would cause least damage to the Unesco programme as a whole.
(21) Some savings had been effected by simply postponing the date on which it was intended that action should start. Thus, in connexion with paragraph 222, it was proposed that money should be saved by delaying the recruitment of staff for several months.

(22) It was agreed to adjourn and to contine the discussion at the next meeting.

The meeting rose at 6.30 p.m.

# THIRTY-SEVENTH MEETING

*7 December 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**RESUME OF BUDGETARY EFFECTS OF DECISIONS TAKEN BY THE PROGRAMME AND BUDGET COMMISSION AND THE ADMINISTRATIVE COMMISSION AND PROPOSED REDUCTIONS WITHIN THE BUDGET FOR 1955-56 TO BALANCE THE BUDGET** (document 8C/BUD/4) (continued)

**SECOND PART: PROPOSED REDUCTIONS**

**PART I – GENERAL POLICY**

**CHAPTER II – EXECUTIVE BOARD**

Paragraph 17: Reduction of $102

(1) Approved.

**PART II – PROGRAMME OPERATIONS AND SERVICES**

**CHAPTER I – EDUCATION**

Paragraph 51 - Subvention to World Confederation of Organizations of the Teaching Profession

(2) Mr. COWELL (United Kingdom) asked whether during the discussions in the Programme and Budget Commission any proposals had been made for increasing other subventions in the Department of Education.

(3) Mr. ELVIN (Director, Department of Education) replied in the negative.

(4) Mr. LEE (United States of America) considered that, on the whole, document 8C/BUD/4 represented an excellent piece of work on the part of the Secretariat in adjusting the programme to meet the views of the Conference and the various contingencies which had arisen. In the present case, however, he formally opposed the recommendation of the Secretariat on paragraph 51. The World Confederation of Organizations of the Teaching Profession was doing valuable work and to reduce its subvention, without adequate explanation, at a time when subventions were being granted to new organizations, was contrary to the criteria which had been laid down. The Programme and Budget Commission had justly proposed restoring the subvention to its level in previous years and he urged that that recommendation should be adopted.

(5) The CHAIRMAN pointed out that the Committee, if it decided against any of the Director-General's proposals, would have to indicate other items where the reduction could be made. Any proposals for maintaining budgetary provisions under one project must therefore be accompanied by suggestions for deletion elsewhere.

(6) Mr. LEE (United States of America) proposed that the $4,000 required under paragraph 51 should be taken from the campaign against cancer (Natural Sciences, paragraphs 101 and 102). He further proposed deferment of the campaign and retention of the funds for other purposes. The Advisory Committee had recommended the deletion of that project and the Programme and Budget Commission had only approved it after

considerable argument and by a very narrow margin. As funds were short, it was a suitable part of the programme for making reductions and it would be wise to allow the project to mature before Unesco became involved in a controversial field.

(7) Mr. COWELL (United Kingdom) supported the proposal of the United States delegate, for the reasons the latter had given, and also because such enquiries as his own delegation had been able to make during the Conference indicated that considered scientific opinion would favour the line of action he had proposed. The arguments in the Programme Commission had been emotional and not scientific. If the United States proposal were accepted, nearly $18,000 would become available, which were needed for increases in other parts of the programme. The Programme Commission, for example, had wished to increase the subvention to the International Council of Scientific Unions, but the Director-General had been unable to implement the proposal through lack of funds. He therefore moved the adoption of the United States resolution, the savings, after deduction of $4,000 for the World Confederation of Organizations of the Teaching Profession, to be held in abeyance.

(8) Mr BOW (Canada) supported the proposal of the United States delegate and the suggestion of the United Kingdom delegate. He approved the principle of tapering off subventions, but, in that instance, he would favour maintenance at the previous level for the reason which had been given.
(9) With regard to the campaign against cancer, he urged that the Committee, in its report, should strongly reaffirm its previous decision. Approval of the project would create an unfavourable impression in Canada, where more than Unesco's total budget was being spent annually on cancer research, and where it would be difficult to explain how Unesco could hope to do any effective work with such a small allocation.

(10) Mr. AVIDOR (Israel) agreed with the first part of the United States delegate's proposal. With regard to the campaign against cancer, however, while he understood the reasoning, he could not approve the suppression of the project for reasons of economy, or because it was desired to use the funds for another project. If delegates were opposed to the allocation of funds for the campaign, they should raise the question in the Programme and Budget Commission or in the Plenary Conference, but not in the Advisory Committee, whose task was to adjust the budget. The Committee must be practical: if the project were suppressed, it would certainly be raised again during the Conference and more time would have to be spent discussing it. He urged that the Committee should have faith in the judgment of the Secretariat not to proceed with a project if it were found to be impracticable. He proposed that the $4,000 in question should be taken from paragraph 384 of the chapter on Education.

(11) Mr. ABDEL-RAHMAN (Egypt) proposed that the campaign against cancer should not be eliminated, but that it should be left in the programme, even with a reduced budget, to allow the possibility of further consideration.

(12) Mr. LAUGIER (France) said that his delegation would do everything in its power to convince the Executive Board and the General Conference that cancer research needed to be co-ordinated and promoted by international action. Research had been begun in many countries, and fresh results were being obtained every day. But the French delegation was persuaded that, if the results of all the research were internationally co-ordinated, it would be considerably more effective.
(13) Mr. Laugier pointed out that the appropriations requested were ludicrously small, and that it was not a question of setting up a laboratory, but of endeavouring to make better use of the efforts of isolated research workers.
(14) When the World Health Organization had made its position clear, it had been found that WHO could usefully undertake concerted action with Unesco.
(15) Mr. Laugier felt that Unesco could not stand aside from the campaign against cancer and was convinced that the Organization's decision would be of historic significance.

(16) Mr. LEE (United States of America) accepted the Egyptian delegate's proposal to postpone discussion of the campaign against cancer and saw some merit in the United Kingdom delegate's proposal. He requested that the cancer project should be considered as the source for the $4,000 needed to restore the WCOTP subvention to the level agreed by the Programme and Budget Commission.

(17) The CHAIRMAN pointed out that there could be no subsequent discussion of the campaign against cancer, since it was not included in the document under consideration. It was essential to consider not only the re-establishment of the subvention, but also where the funds were to come from, and a vote must therefore be taken first on whether or not to restore the subvention, secondly on the United States delegate's proposal and lastly on the delegate of Israel's proposal.

(18) Mr. JUNANKAR (India) said that there could be no question of returning to major items on which the Programme Commission had already taken a decision, and he doubted whether the Committee had the right to say whether a project or a budgetary allocation already approved by the Commission should be dropped or deferred. With regard to the subvention, in view of the explanation in document 8C/BUD/4 (page 1, Education: paragraph 51), and since it appeared adequate for the present needs of the Confederation, he could see no reason for an increase.

(19) Mr. BOW (Canada) disagreed with the statement of the delegate of France that research on cancer was unco-ordinated: on the contrary, there was close international liaison in that field. He did, however, agree that the sum Unesco was proposing to allocate to such an important subject

was ludicrous, and that its adoption would be regarded as an historic retrograde step on the part of Unesco. With regard to the World Health Organization, he had listened to the speech of the representative of that Organization and his interpretation of it did not accord with that of the French delegate.

(20) Mr. AVIDOR (Israel) proposed that a vote be taken first on whether or not the subvention should be increased and then, if necessary, on where the additional money should be found.

(21) The DIRECTOR-GENERAL considered that adequate reasons had been given for reducing the subvention. The normal procedure in helping an organization to establish itself was to start with a high subvention and taper it off as the organization became more secure. In certain circumstances, as in the case of ICSU, a normal sustaining subvention was given. The original proposal had been to give a sustaining subvention to WCOTP, but, in view of the Commission's decision, it had been decided, as a compromise, to make the tapering off process more gradual.
(22) With regard to the campaign against cancer, it would be out of order to cancel the project at the present stage, but there would be no objection to proposing a reduction in the budgetary allocation. If it were decided to increase the subvention to WCOTP by $4,000, he would not oppose the deduction of that sum from the cancer project. He did not, in any case, consider the budgetary provision for that project ludicrous: the work envisaged was in the nature of co-ordination, and at the present juncture it was only proposed to make a study for submission to the next General Conference. He had consulted the World Health Organization, which had approved the plan of work.

(23) The CHAIRMAN did not accept the possibility of restoring a subvention as an excuse for eliminating another project. He insisted that only the amount needed should be sought and accordingly proposed the following procedure:

(1) A vote on the desirability of restoring the amount of $4,000 to WCOTP.

(2) A vote on the United States proposal to take the sum from the cancer project.

(3) A vote on the delegate of Israel's proposal, if the United States delegate's proposal were rejected.

(24) Mr. LEE (United States of America) accepted the course proposed by the Chairman.
(25) With regard to the Director-General's explanation, he saw no evidence in the budget for Education to show that the tapering off process was a normal procedure: it appeared to be limited to the case in question.

(26) The DIRECTOR-GENERAL said that there had been no inconsistency. The case in question happened to be the only one arising under Education.

(27) Mr. SEDES (France) said that the French delegation fully accepted the reasons the Director-General had given to justify the reduction in the subvention.
(28) In his opinion, a distinction should be made between starting subventions and sustaining subventions. The decision taken might have implications for the future and enable Unesco to revise its policy on contracts.
(29) Mr. Sedes agreed with the Indian delegate that the Committee should accept the explanations given by the Secretariat and let the proposed reduction stand.
(30) A vote was taken on the proposal to restore the sum of $4,000 to the subvention granted to the World Confederation of Organizations of the Teaching Profession.

(31) The proposal was rejected by 7 votes to 4 with 1 abstention.

Paragraph 167

(32) Approved.

Paragraph 175

(33) Mr. AVIDOR (Israel) said that the recommendation was the first instance of the elimination of an entire project. He proposed that an amount of $2,000 should be retained, to be found from paragraphs 178, 213 or 384 under Education. In the case of paragraph 384, it would mean reducing the addition proposed by the Programme and Budget Commission from $14,000 to $12,000.

(34) Mr. ELVIN (Director, Department of Education) said that the Secretariat had proposed the cut with great reluctance, and it had been thought that funds might perhaps be found under paragraph 246 of the Department of Social Sciences. The Secretariat would not, however, oppose the delegate of Israel's proposal, and would prefer the last of the three alternatives suggested.

(35) Mr. SEDES (France) said that, as a practical social scientist, he considered it impossible to evaluate a pilot project with an appropriation of $2,000. In his opinion, the solution proposed by the Director-General should be adopted.

(36) The DIRECTOR-GENERAL said that the $2,000 would be of some use, and it might be possible to transfer other funds to add to it later in the year.

(37) The proposal of the delegate of Israel, seconded by the delegates of Germany, India and Egypt, was adopted by 8 votes to 2 with 1 abstention.

(38) Paragraphs 185, 192, 213, 218, 413 and 415 were approved.

**CHAPTER 2 – NATURAL SCIENCES**

Paragraph 58

(39) Approved.

Paragraph 79

(40) Mr. SILLER (Mexico) asked how the proposed cut would be made.

(41) Mr. AUGER (Director, Department of Natural Sciences) said that, in the past, the records of symposia on arid zone research had been published in a bilingual French-English edition, the papers remaining in the original language. It was proposed to insert after each paper a summary in Spanish, sufficient to give the reader the gist of it.
(42) That course would involve an additional expenditure of only $2,500, whereas a separate Spanish edition would cost double that amount. Moreover, in the latter case, there would be no reason for not having separate French and English editions.

(43) The CHAIRMAN asked whether the volume included an English summary of the original French and a French summary of the original English.

(44) Mr. AUGER (Director, Department of Natural Sciences) replied in the negative and confirmed the Chairman's assumption that Spanish readers would have readier access to the complete records, although in summarized form.

(45) Paragraph 79 was approved.

Paragraph 137

(46) Mr. BOW (Canada), recalling that the question of the campaign against cancer was still in abeyance, proposed that the budget for that project should be reduced to a nominal amount, to maintain it in existence, and that the remainder of the funds be applied to paragraph 137.
(47) The proposal was supported by the delegates of Egypt and the United States of America, and the Chairman pointed out that the restoration of $15,000 under paragraph 137 of Natural Sciences would leave a sum of about $2,000 for the project on cancer.

(48) In reply to a question from the United Kingdom delegate, the CHAIRMAN said that there was nothing to prevent further cuts being made in the allocation for the campaign against cancer if funds had to be found under any paragraphs where the Committee might decide to reject the Secretariat's proposed reductions.

(49) Mr. AVIDOR (Israel) asked why the Director-General and the Secretariat had not themselves proposed any reduction for the cancer campaign.

(50) Mr. AUGER (Director, Department of Natural Sciences) recalled that there had been a lengthy discussion in the Programme and Budget Commission on the campaign against cancer, and that the Commission had voted in favour of maintaining the project. The Secretariat had therefore taken the view that it would be improper to do away with the project for purely financial reasons.

(51) Mr. AVIDOR (Israel) accepted the explanation given.

(52) Mr. BOW (Canada) found the explanation concerning the campaign against cancer inconsistent with the Secretariat's proposal to eliminate the project under paragraph 175 of the chapter on Education.

(53) The CHAIRMAN pointed out that in the case of paragraph 175 the Director-General's proposal had not been approved in its entirety; an amount of $2,000 had had to be found from another part of the programme. He saw no inconsistency.

(54) The DIRECTOR-GENERAL said that, even if the sum of $2,000 had not been retained under paragraph 175, the project would not have been entirely ruled out, since evaluation was also provided for under Social Sciences. The situation was therefore different.
(55) He recalled the remark of the Director, Department of Natural Sciences, that it would be inelegant to kill a project, and also his reference to the long debate in the Programme and Budget Commission. It was undesirable to delete the project entirely, but he had been willing to agree to funds being transferred from it if the proposal to restore the subvention to WCOTP had been adopted.

(56) The CHAIRMAN pointed out that the delegate of Canada would be quite at liberty to oppose the cut under any paragraph and to recommend in each case that funds be taken from the campaign against cancer.

(57) Mr. SEDES (France) thought the Canadian delegate's proposal regarding paragraph 137 inadmissible. It was not a question of eliminating a project, but of reducing the number of experts from 3 to 2. In his opinion, with the co-operation that could be expected from the National Commissions, the project could be carried out with 2 experts.
(58) Mr. Sedes informed the Committee that his delegation approved the proposed reduction of $15,000.

(59) Mr. COWELL (United Kingdom) failed to understand the degrees of elegance as between reductions proposed by the Director-General and those recommended by the Committee. In his view the wisest procedure would be to work through the document, leaving to the end of each chapter the task of deciding how to find the funds for the total of any cuts which the Committee wished to restore.

(60) The CHAIRMAN was strongly opposed to the procedure suggested by the United Kingdom delegate, which would involve the Committee in working through the programme a second time. If cuts were opposed, the means to restore them must be considered in each case when a proposal was made.

(61) Mr. JUNANKAR (India) supported the procedure

advocated by the Chairman. Any other method would involve a complete revision of the programme, and the reopening of controversial discussions.

(62) Mr. HACQUAERT (Belgium), reverting to the Committee's decision on paragraph 175, pointed out that it meant deleting an appropriation of $7 000, which had been obtained for youth movements, with great difficulty, during the discussions of the Programme and Budget Commission. He was surprised at such a hasty decision.

(63) The DIRECTOR-GENERAL did not understand the objections of the Belgian delegate. The procedure proposed for paragraph 137 of the Natural Sciences chapter was entirely analogous to that followed in connexion with paragraph 175 of the chapter on Education.

(64) Mr. AVIDOR (Israel) proposed that a vote should be taken on whether or not to retain the campaign against cancer.

(65) Mr. ABDEL-RAHMAN (Egypt) referred to the question of a balanced programme, and suggested that the deletion of the activity under paragraph 139 of the chapter on Natural Sciences might to some extent be compensated by the retention of the $15,000 under paragraph 137. He accordingly proposed the restoration of the budget under paragraph 137, the funds to be taken from the campaign against cancer, leaving the sum of $2,680 for the retention of that project.

(66) Mr. ARTHUR (United Kingdom) proposed that the retention under paragraph 137 and the reduction for the campaign against cancer should be voted on separately.

(67) The CHAIRMAN said that a vote to restore the $15,000 to paragraph 137 must be conditional on finding the sum elsewhere in the programme.

(68) Mr. SEDES (France) thought that the two decisions should be taken together, for, if the Committee decided to restore the $15,000, the sum would automatically be taken from the appropriations for the campaign against cancer.

(69) Mr. BOW (Canada) supported the proposal of the French delegate.

(70) The proposal of the delegate of France was put to the vote and adopted by 7 votes to 4 with 2 abstentions.

(71) A vote was then taken on the proposal of the Canadian delegate to restore the amount of $15,000 under paragraph 137 of the Natural Sciences chapter, and to deduct the amount from the campaign against cancer.

(72) The proposal was adopted by 6 votes to 4 with 3 abstentions.

Paragraph 172

(73) Mr. AUGER (Director, Department of Natural Sciences), reminded the Committee that the Programme and Budget Commission had decided to maintain the Delhi Office at the existing level, i.e., with an appropriation of $95,000 for the two years, instead of the $35,000 provided for in the draft programme.
(74) The Secretariat proposed that the extra $60,000 be obtained in the following way: (1) a sum of $35,000 would be allocated to the Delhi Office; (2) to cover the remaining $25,000, an official (grade P.4) from the Department of Natural Sciences would be seconded to Delhi to fill one of the posts that were to have been abolished in the draft programme. The appropriation for the P.4 post would be found by a transfer within the budget. The sum required would be $21,826.

(75) In answer to a question from the CHAIRMAN, Mr. AUGER said that the Indian delegation had agreed to a reduction of $25,000 on the $60,000 required for maintaining the office at the existing level, on condition that an official from headquarters were sent to Delhi.

Paragraph 196

(76) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that paragraph 196 referred to a headquarters post for co-ordinating Science Co-operation Offices. The proposal included an incumbent who might be transferred to New Delhi.

(77) Mr. ARTHUR (United Kingdom) asked for an explanation of how the additional $60,000 proposed by the Programme and Budget Commission in the first part of document 8C/BUD/4 under paragraph 172 of the Natural Sciences chapter (page 3) was financed.

(78) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that the Programme and Budget Commission had proposed an increase of $60,000 under paragraph 172 and the Secretariat's proposal was to reduce that increase by $25,000 and to restore the staffing pattern by having a P.5 post instead of a P.4 one. The remainder of the sum would be provided partly by the reduction under paragraph 196 and partly by the Indian Government.

(79) Paragraph 196 was approved.

Paragraph 197

(80) Mr. AUGER (Director, Department of Natural Sciences) thought the Committee realized that the Director-General would have to review the whole question of Science Co-operation Offices during 1955. The proposal regarding paragraph 197 marked the beginning of that review.
(81) As the Secretariat saw it, the Science Co-operation Offices were destined to become decentralized bodies, capable of carrying out the Unesco programme themselves, whereas in the past they had been liaison agents.
(82) It had been found that, in the new programme, the Offices could be made responsible for

co-ordinating Unesco's activities in their respective regions. Those, like the Istanbul Office, which existed solely for liaison purposes, could be dispensed with.
(83) The Cairo Office would take over the activities of the branch office in Turkey.

(84) Mr. AVIDOR (Israel) said that the Istanbul Office had been established for three countries: Turkey, Iran and Israel. The delegate of Turkey had indicated that his country wished to belong to the European and not the Middle East region; for Israel, contact with Headquarters in Paris was adequate; and Iran could be accommodated by either Cairo or Paris. He accordingly supported the closing of the Istanbul Office.

(85) Paragraph 197 was approved.

Paragraph 198

(86) Approved.

(87) Mr. ARTHUR (United Kingdom) asked what weight should be attached to the note at the top of page 4 of the document: a recommendation to increase the subvention to ICSU if funds are available had no meaning. As he understood it, if the Commission had recommended that the subvention should be increased, the Director-General would have submitted proposals on how the necessary funds should be found.

(88) The CHAIRMAN said that funds were not, in fact, available. In any case, he did not see how the Advisory Committee could take action in the absence of a definite recommendation from the Programme and Budget Commission.

(89) The DIRECTOR-GENERAL explained that the Programme and Budget Commission had had in mind that if, after the proposed reductions had been considered, there were found to be any surplus, it should be used to increase the subvention to ICSU. Since the Commission had made no suggestions for finding funds from other parts of the budget, he had not felt it possible to offer any proposals himself. The Commission had not taken a vote on the matter.

CHAPTER 3 – SOCIAL SCIENCES

Paragraphs 123 and 127

(90) Approved.

Paragraphs 140-163

(91) Mrs. MYRDAL (Director, Department of Social Sciences) said that the sum of $826 was an incidental saving resulting from the replanning of Project 3.4.

(92) Paragraphs 140-163 were approved.

Paragraph 190

(93) Approved.

Paragraph 222

(94) Mr. LEE (United States of America) recalled that the Advisory Committee, when discussing the project, had advocated high priority because it was eminently suited to the basic purposes of Unesco. In the course of discussion the Social Sciences Department had suffered most and been the least demanding, and he felt that the reduction under paragraph 222 should be less severe. He accordingly proposed the restoration of a sum of $6,420, to be taken from the project in draft resolution 8C/DR/63 (referred to on page 5 of document 8C/BUD/4) to publish the works of the Polish poet Adam Mickiewicz. That resolution had been placed in the programme at a very late date and was not integrated in the programme; it was, moreover, an activity more appropriate for non-governmental organizations, National Commissions and national organizations. Several similar projects had been rejected, and he saw no reason to depart from principles in programme planning at the expense of a high priority project.

(95) Mr. JUNANKAR (India) agreed that the project under paragraph 222 deserved high priority and appreciated the fact that the proposed international centre was to be located in India. The proposal to stagger the establishment of the centre would not materially affect its priority and he accordingly gave it his support.

(96) Mr. SEDES (France) was prepared to approve the proposed reduction if the Indian delegate agreed to it.
(97) But he found it difficult to accept the method suggested by the delegate of the United States of America, who had advocated a cut in one item of the programme in order to make possible an increase in another.
(98) Mr. Sedes pointed out that, if an appropriation of $6,420 for a particular project were cut out, so that the sum might be transferred elsewhere, it would not necessarily meet the requirements of the project to which it was allocated.

(99) Mrs. MYRDAL (Director, Department of Social Sciences) said that the amount of $13,400 represented reductions of from $2,000 to $3,000 in five posts at the centre. A delay in recruiting staff from the beginning of January 1956 to February or March was possible and introduced a certain flexibility in the funds required.

(100) Mr. LEE (United States of America), while realizing that the country primarily concerned with the project was India, considered that the Secretariat should not take a decision without consulting all interested countries.
(101) With regard to the proposed reduction, it appeared to him irresponsible to reduce funds for a high priority project, while adding funds for a project which was not viewed very favourably and which had been submitted too late to be properly integrated in the programme.

(102) The DIRECTOR-GENERAL said that the item referred to by the delegate of the United States of America had been approved in the Programme and Budget Commission by 14 votes to 12 on a motion to delete the resolution.

(103) Mr BOW (Canada) supported the proposal of the United States delegate.

(104) The proposal of the delegate of the United States of America to restore the sum of $6,420 to paragraph 222 and withdraw the amount from the implementation of resolution 8C/DR/63 was put to the vote and rejected by 2 votes to 5 with 4 abstentions.

(105) Mr. COWELL (United Kingdom) explained his abstention from voting. He might equally well have been faced with a choice between diphtheria and smallpox, neither of which he desired.

(106) Mr. ABDEL-RAHMAN (Egypt) said that the United Kingdom delegate had voiced his own views. The vote which had just been taken was a departure from normal procedure. The operative part had been the proposed reduction, and while he favoured that cut he would have preferred to see the funds applied elsewhere.

(107) Mr. LEE (United States of America) pointed out that he had spoken in favour of the International Centre for Research on Social Problems of Industrialization in Asia long before resolution 8C/DR/63 had been received.

(108) The CHAIRMAN noted the comment of the United States delegate.

(109) The Director-General's proposal concerning paragraph 222 was approved.

Paragraph 261

(110) Approved.

**CHAPTER 4 – CULTURAL ACTIVITIES: PARAGRAPHS 32-34, 296-298, 304-311, 403, 415**

(111) Approved.

**CHAPTER 5 – MASS COMMUNICATION: PARAGRAPHS 197 and 251**

(112) Approved.

**CHAPTER 6 – EXCHANGE OF PERSONS: PARAGRAPHS 106 and 111**

(113) Approved.

**CHAPTER 7 – GENERAL RESOLUTIONS: PARAGRAPH 27**

(114) Approved.

**CHAPTER 8 – DOCUMENTS AND PUBLICATIONS: PARAGRAPH 15**

(115) Approved.

**PART III – GENERAL ADMINISTRATION**

**CHAPTER 1: PARAGRAPH 16**

**CHAPTER 2: PARAGRAPHS 39 AND 57**

**CHAPTER 4: PARAGRAPH 79**

(116) Approved.

**PART IV – COMMON SERVICE COSTS**

Paragraphs 14 and 39

(117) Approved.

(118) Mr. RAO (Acting Chief, Bureau of Programme and Budget) drew attention to two further alterations proposed by the Programme and Budget Commission, which had been received too late for inclusion in the document:

1. A reduction of $2,000 for the two-year period under General Resolutions, paragraph 21.
2. Approval of resolution 8C/DR/15 (Friends of Unesco Clubs) involving a sum of $500 for 1956.

(119) The total amount available would therefore be $1,500.

(120) Mr. JUNANKAR (India) proposed that the sum should be applied to the International Centre for Research on Social Problems of Industrialization in Asia (paragraph 222 of the Social Sciences chapter).

(121) Mr. ABDEL-RAHMAN (Egypt) proposed that it should be used for the pilot project under paragraph 175 of the chapter on Education.

(122) The proposal of the delegate of Egypt was adopted.

(123) The CHAIRMAN recalled that the first report of the Advisory Committee had contained a recommendation that draft resolutions from Member States should be submitted to the Director-General at an earlier date in order not to impede the work of the Conference, as had happened at the present session. No action, however, had been taken by the Programme and Budget Commission, and he thought that it would be appropriate to call the matter to the Commission's attention.

(124) Another question still outstanding was the future of the Advisory Committee. In his opinion, the change in the Executive Board's structure to provide for government representation eliminated the need for the Committee, but members would have to consider the matter so that a recommendation could be made to the Conference.

(125) The DIRECTOR-GENERAL said that the

question of draft resolutions would normally come up for discussion by the Executive Board in connexion with the organization of the work of the next session of the General Conference. If, therefore, no action were taken by the Programme and Budget Commission, he himself would bring it to the attention of the Board.

(126) In reply to a question from Miss LAISE (United States of America), the CHAIRMAN said that the Appropriation Resolution would be discussed at the next meeting of the Programme and Budget Commission and subsequently by the Advisory Committee.

(127) Mr. HACQUAERT (Belgium) thought that the changes made in the structure of the Executive Board should be a reason for keeping the Committee in being, since it represented the voice of the majority in the Conference.

(128) He therefore proposed that the Committee be maintained, and that its members be chosen, for preference, from among the delegates of countries not represented on the Executive Board.

(129) The CHAIRMAN said that the question would be taken up at the next meeting of the Committee.

The meeting rose at 12.10 p.m.

# THIRTY-EIGHTH MEETING

*8 December 1954 at 5.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**APPROPRIATION RESOLUTION FOR 1955 AND 1956 (document 8C/BUD/6, Rev.)**

(1) The CHAIRMAN, on behalf of the Committee, paid a tribute to the work done by Mr. Rao in producing the resolution and appropriation table.

(2) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that the resolution and table had been drawn up as in previous years.

Paragraph 1 and the Annex

(3) The CHAIRMAN pointed out a typing error. The figure 874,861 opposite Total, Part I should read 847,861 (English text only).

(4) Paragraph 1 and the Annex were adopted.

(5) Paragraph 3 was adopted.

Paragraph 4

(6) On a point being raised by Mr. LEE (United States of America), there was some discussion whether the figures given referred to assessments or to total estimates.

(7) Mr. COWELL (United Kingdom) suggested (and it was so decided) that the paragraph should read: "Assessments in respect of 1955 shall be based on the total estimates ($9,491,420), for that year, and assessments in respect of 1956 shall be based on the total estimates ($10,508,580) for that year."

(8) Paragraphs 5 and 6 were adopted.

Paragraph 7

(9) Mr. RAO (Acting Chief, Bureau of Programme and Budget), in answer to a question by Mr. ABDEL-RAHMAN (Egypt), said that the Executive Board would have to endorse any emergency transfers the Director-General might make between appropriation lines.

(10) Mr. AVIDOR (Israel) said that, when the Executive Board were informed of the details of the transfers and the reasons for them, it might disagree with the Director-General's action.

(11) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that the paragraph was a safety clause, which the Director-General had never in fact invoked. The Director-General would take the action mentioned only when it was perfectly clear that the Executive Board would not take exception to it.

(12) Sir Ronald ADAM (Chairman of the Executive Board) said that the Director-General had never used the authority given him under the clause and was very unlikely to do so. In practice, he could always get hold of the Chairman of the Board, who would quickly send a circular letter to the members, before action was taken.

(13) Paragraph 7 was adopted.

(14) Paragraphs 8 and 9 were adopted.

(15) The CHAIRMAN said that the resolution, as amended, with the table, would be submitted to the Programme and Budget Commission at its next meeting.

FUTURE OF THE ADVISORY COMMITTEE

(16) The Chairman said that the Committee had one more point to discuss before its work could be considered completed. That was whether or not there should be an Advisory Committee at future sessions.
(17) The question had been raised in the General Committee. The Director-General had suggested that the members of the Advisory Committee for the ninth session should be designated at the eighth session, and that the Executive Board should be authorized to decide whether the Committee should be convened before, or during, the ninth session. The Director-General had made that suggestion because, under a resolution submitted by the Scandinavian countries, the Executive Board would be called upon to consider how the ninth session should be organized.
(18) Hence, as the new Executive Board would be composed of government representatives, the Committee might wish to consider the question and make some recommendation to the Programme and Budget Commission.

(19) Mr. JUNANKAR (India) thought that the Committee might show a certain bias in favour of its own continued existence.
(20) He did not, however, see what connexion there was between the new procedure for election of the Executive Board and the rôle of the Advisory Committee.
(21) It was true that the new Board would consist of government representatives, who, in their wisdom, might feel qualified to speak on behalf of the other fifty States not represented on the Board. But it did seem to him that there might be a call for some other body, such as the Advisory Committee, to express the views of those latter States.
(22) The Advisory Committee had wasted a good deal of effort because it had lacked clear instructions (in connexion with the two budget levels, for example). It would have been better if the Conference had taken a decision on financial limitations at the outset.

(23) Mr. HACQUAERT (Belgium) considered that the continued existence of the Advisory Committee was justified, particularly in view of the new structure of the Executive Board.
(24) As far as the Advisory Committee's work was concerned, experience at the eighth session had shown that the majority of points on which the Committee had taken decisions had been thrown open again for discussion and that at least some of its recommendations had not been followed.
(25) Mr. Hacquaert maintained that the work of the Advisory Committee had been done too late; to be really useful, it should have been done before document 8C/5 (proposed programme and budget) was drawn up; it was obvious, however, that such a procedure would not be desirable, for the Advisory Committee would then become a sort of second Executive Board.
(26) However, in view of the undoubted value of some of its discussions (those on the preparation of future programmes, for example), the delegate of Belgium believed the existence of the Committee to be justified, but its methods of work should be revised.

(27) Sir Ronald ADAM (Chairman of the Executive Board) thought that only the Board was competent to comment on the Director-General's proposals before the Conference began. Once the Conference had started, however, it was difficult for the Board to work effectively, since its members were also members of national delegations. Hence, during the Conference, it would be useful to have an advisory committee.

(28) Mr. SOMMERFELT (Norway) said that, with the Programme and Budget Commission as now organized, the Advisory Committee might well be unnecessary. But the organization of the work of the Programme and Budget Commission should be thoroughly reviewed.
(29) The Advisory Committee could do useful work if its membership were increased (say to 24 or 25), and if the majority of its members represented countries not represented on the Executive Board. In addition, the Committee's report ought to be ready before the Conference began, so that it could form the basis for discussion in the Programme and Budget Commission.

(30) Mr. ABDEL-RAHMAN (Egypt) thought it was difficult to decide whether the Committee was of value, because it was not known what changes might be made in the procedure for preparation of the programme. For example, how far would the Board be responsible for drawing up the programme?
(31) Under the circumstances, all the Committee could do would be to recommend that the possibility be maintained of convening an advisory committee to consider the programme and to submit a report.

(32) Mr. FRANCOIS (France) was of opinion that meetings held during the eighth session could be divided into two types:

1. Meetings of the Programme and Budget Commission type, where the discussion proceeded article by article, almost farthing by farthing, as if the Advisory Committee had not already cleared the ground and made recommendations, moreover, in the end, that discussion often led to completely different, if not contradictory, decisions. Such methods should certainly not continue, for they resulted in an equal waste of money and effort.
2. Certain meetings of the Advisory Committee at which the discussion, limited to a particular problem and based on documents and specific information, had made it possible to do useful work.

(33) It might therefore be concluded that the Advisory Committee's work was not without value, if it were considered to consist, primarily, of expressing opinions on particular problems. If it were also to deal usefully with wider questions and their budgetary implications, other methods of work would have to be envisaged.

(34) Mr. LEE (United States of America) agreed that perhaps too little was known of future procedures

for it to be possible to recommend terms of reference for the Committee. But the Committee might agree that the Executive Board should study the organization of the Conference and provide for an advisory committee to serve when and if required.
(35) It had been suggested that the Advisory Committee might be useful in so far as it represented countries not represented on the Board. That point should not be pressed too far. There were other considerations to be borne in mind.

(36) Mr. AVIDOR (Israel) said that the Committee could not at that stage start discussing the organization of future sessions. The Executive Board and the Secretariat should be left free to decide how the organization of the Conference might be improved.

(37) Mr. COWELL (United Kingdom) thought there was a good deal to be said for reinforcing the preliminary work on programme and budget done before the Conference.
(38) At the eighth session, the advice offered by the Committee had sometimes differed from that of the Executive Board, and there had been some duplication of effort. Would that situation arise again with the new Board? It was difficult to say.
(39) There was certainly a need for an advisory committee to deal with particular problems referred to it by the Programme and Budget Commission.
(40) Possibly the Director-General's suggestion had much to commend it, namely, that the Conference should set up an advisory committee, freely chosen from among the 72 Member States of Unesco. The Executive Board would then be free to convene the committee before the Conference, if it saw fit to do so.

(41) The CHAIRMAN thought that, if the advisory committee were to be merely a body called upon to ensure that the views of the countries not represented on the Executive Board were made known, then a case could be made for having a second body, consisting of countries not represented on the advisory committee, to check the latter's conclusions, and so on ad absurdum.
(42) He was therefore not in favour of a second examination of the programme by the Advisory Committee, if the preliminary examination were made by the Executive Board.
(43) He agreed with the delegate of France that the Committee had been most successful in dealing with the particular problems referred to it. But, since it was not possible to know in advance what those problems would be, it would be unwise to oblige the Board to convene the committee before the Conference began.
(44) Hence he was inclined to agree with the Director-General's suggestion that the Conference should set up a committee which the Board would convene as it thought fit.

(45) To show that there was often no real exchange of views, Mr. FRANCOIS (France) recalled the difference of opinion that had arisen at a meeting of the Programme and Budget Commission between the French delegation and the Director of the Department of Education, the delegate of France had made a speech, the Director of the Department had made a speech, but the two parallel monologues had resulted in nothing constructive. Yet that was the type of question which should be thoroughly discussed by a small group of competent people fully aware of the importance of the subject.

(46) The CHAIRMAN said that the heads of departments would be obliged to attend meetings of the Programme and Budget Commission, and it was not easy for them to attend meetings of the Advisory Committee held at the same time.

(47) Mr. MAHEU (Assistant Director-General) stated that the Director-General was well aware of the need for a complete revision of the organization of the Conference's work. He had no solutions to propose at the moment but hoped that, during the coming months, he would have an opportunity to study the problem with members of the Executive Board.
(48) With regard to the future of the Advisory Committee, the Director-General had not wished to express an opinion on the fundamental issues involved. The only purpose of the proposal he had made was to point to a procedure which, while safeguarding both the sovereignty of the General Conference and the constitutional powers of the Executive Board, would make it possible to get out of a difficulty.
(49) Mr. Maheu then drew attention to two aspects of the problem which might shed some light on the question of the existence and responsibilities of the advisory committee.
(50) Hitherto, the Executive Board had been responsible for presenting, together with its comments, a programme which had in fact been prepared by the Director-General. It would be desirable for the Executive Board's comments to be more detailed, and even expressed in stronger terms, so that governments would be sure that the draft programme and budget had been very closely examined.
(51) There were also certain difficulties inherent in the present membership of the Programme and Budget Commission, which in fact worked like several parallel commissions. In the seats reserved for each delegation, a succession of specialists replaced one another and thus all hope of a general view of the programme disappeared.
(52) If, in considering the usefulness of the Advisory Committee, it were assumed that the Executive Board would in future make a more thorough examination of the draft programme, and that the methods of work of the Programme and Budget Commission would be revised in such a way as to give it a general view, it would be seen that the Committee was not so essential, except for dealing with very special problems which might be submitted to it, either directly by the Executive Board, or by the Programme and Budget Commission as its work progressed.
(53) The Committee would thus serve as a small standing advisory committee whose various working parties would be sub-committees.

(54) Mr. SEDES (France) considered that

Mr. Maheu's remarks had done much to clarify the question.
(55) It should not be forgotten that the programme for 1957-58 would differ in many ways from the present programme. For example, the study of major projects would call for many committees of specialists belonging to various disciplines, whose activities would no longer be parallel, but would have to be very closely co-ordinated.

(56) Mr. ABDEL-RAHMAN (Egypt) still felt that there were many unknown factors to be taken into consideration. The Committee could only recommend that the question whether an advisory committee was necessary should be referred to the Executive Board.

(57) Mr. JUNANKAR (India) doubted whether there were in fact so many unknown factors. The Programme and Budget Commission had already taken certain decisions on the procedure for preparing future programmes.
(58) A detailed scrutiny of the programme by the Conference itself was always necessary. It could not be made by so large and unwieldy a body as the Programme and Budget Commission. The Commission could only lay down general policy, leaving the Advisory Committee to examine points of detail.
(59) If the Executive Board in its new form were really responsible to Unesco as a whole, and really desirous of giving due weight to the views of all Member States, then there was no reason why its report on the programme should be different, in broad outline, from the report by the Programme and Budget Commission.

(60) Mr. LEE (United States of America) queried whether it was possible for the Conference to adopt a resolution authorizing the Board to lay down procedure for the next session. Could the Board be authorized to appoint an advisory committee?

(61) The CHAIRMAN observed that the Conference would have to give special instructions if the Board were to be allowed to elect such a body.

(62) Mr. MAHEU (Assistant Director-General) recalled that, under the Constitution, the Executive Board was responsible for drawing up the agenda of the General Conference, but it could not decide upon the membership of a committee, or appoint its members.
(63) It was for that reason that the Director-General had made his proposal concerning procedure, with the idea that the General Conference, in setting up an advisory committee, would show that it agreed on the principle, while leaving it to the Executive Board to define the committee's terms of reference and decide when to convene it.

(64) The CHAIRMAN said that little was known about what the Board would propose for the reorganization of the Conference. The best course would be for the Conference to elect an advisory committee and leave the Board to decide when it should be convened.

(65) Mr. FRANCOIS (France) proposed the closure of the debate.
(66) Firstly, the Programme and Budget Commission was a necessary evil, its methods of work would have to be improved if scientists, teachers, men of letters and specialists in all branches were to feel that they were doing useful and interesting work. Secondly, the advisory committee could be an asset, as experience had proved, if it remained a strictly advisory body.
(67) The delegate of France therefore suggested that the Committee, taking account of what he had just said, should do no more than make very general recommendations, thus in fact leaving it to others to deal with the fundamental issues

(68) Mr. MAHEU (Assistant Director-General) had a strong impression that the Committee was about to reach agreement and that it would be better to take a decision forthwith.

(69) Mr. LEE (United States of America) moved that the Committee recommend the Conference to elect an advisory committee of x members (the number to be decided on by the Programme and Budget Commission), to be convened at such times, and for such purposes as might be specified by the Executive Board.

(70) Mr. BOW (Canada) seconded.
(71) His delegation was not in favour of the Executive Board being called on to make a detailed examination of the programme. It had been suggested that the sessions of the Board were already too long and too many.
(72) Similarly, he was not in favour of such an examination being made by the Programme and Budget Commission, which was too large for such a task.

(73) The United States motion was adopted.

(74) After the usual expressions of thanks the meeting rose at 7.15 p.m.

# CHAPTER VII

# NOMINATIONS COMMITTEE

## FIRST MEETING

*12 November 1954 at 4.30 p.m.*

*Chairman:* Mr. KABIR (India)

**ELECTION OF THE PRESIDENT AND VICE-PRESIDENTS OF THE GENERAL CONFERENCE AND OF THE CHAIRMEN OF COMMISSIONS AND COMMITTEES (document 8C/NOM/1)**

(1) The DIRECTOR-GENERAL opened the meeting and pointed out that the Executive Board had drawn up a list of candidates for election to the posts of President and Vice-Presidents of the Conference, and chairmen of the commissions and committees. He called on the Chairman of the Executive Board to present his report.

(2) Sir Ronald ADAM (Chairman of the Executive Board) explained that the Board had considered at length all the possible nominations to the various posts to be filled, so as to ensure representation of all continents and groups of countries on the General Committee of the Conference. The list drawn up on the basis of the Board's discussions seemed to satisfy that requirement.
(3) He called on the Committee to elect first its Chairman, and, in accordance with the Board's recommendation, to appoint the delegate of India.

(4) Unanimously approved.

(Mr. KABIR (India) then took the Chair)

(5) The CHAIRMAN thanked the Committee for the honour done to his delegation and asked the Chairman of the Executive Board to present his suggestions for the choice of other members of the General Committee.

(6) Sir Ronald ADAM (Chairman of the Executive Board) read out Rule 30 of the Rules of Procedure of the Conference, according to which the Nominations Committee, on a report by the Executive Board, was required to submit a list of candidates for the posts of President and Vice-Presidents of the General Conference, and to submit to the commissions, committees and subsidiary organs, proposals for the election of their chairmen, vice-chairmen and rapporteurs.
(7) He stressed the difficulty of the task devolving upon the Executive Board, which, in drawing up its list, had taken account of two main factors: (1) the need for ensuring fair geographical distribution, so that all regions and cultural groups would be represented on the General Committee of the Conference; (2) the desirability of bringing in certain Member States which had not yet been represented on the General Committee of the Conference.
(8) Furthermore, although the functions assigned to the various members of the General Committee were equally important, some called for gifts of leadership and experience of Unesco work not possessed by all candidates. The Executive Board had therefore thought it should in some cases nominate individual delegates who had already successfully discharged such functions. For instance, for the Programme and Administrative Commissions, which carried the great bulk of the Conference's work, it suggested calling upon Mr. Bourgeois (Switzerland) and Mr. Beeby (New Zealand) respectively.
(9) The Executive Board had made the following proposals:

President of the Conference: Uruguay

Vice-Presidents of the Conference: Brazil, France, Italy, Japan, Pakistan, Spain, Thailand, Union of Soviet Socialist Republics, United Kingdom and United States of America.

Programme and Budget Commission, Chairman: Switzerland (Mr. Bourgeois)

Administrative Commission, Chairman: New Zealand (Mr. Beeby)

Legal Committee, Chairman: Egypt

Nominations Committee, Chairman: India

Credentials Committee. Colombia

Advisory Committee on Programme and Budget, Chairman: Australia (Mr. Gardner Davies)

Committee on Reports of Member States, Chairman: Iraq

Headquarters Committee: Venezuela.

(10) As the Chairmen of the Credentials and the Nominations Committees had already been elected, the Committee had to decide on the other proposals.

(11) Mr. SOLDATOV (Union of Soviet Socialist Republics) pointed out that the list proposed by the Executive Board did not allow for adequate

representation of the Eastern and Central European countries, of which six were already members of Unesco and several others had applied for admission. He thought that at least two seats on the General Committee of the Conference should be granted to those countries and asked for the Committee's views on that point.

(12) Mr. COLOMBO (Argentina) emphasized that not one of the Vice-Presidents of the Conference was a representative of the Spanish-speaking Latin American countries and proposed considering nomination of candidates from Chile and Mexico.

(13) The CHAIRMAN explained that in the General Committee the Chairmen of Commissions and Committees were on an equal footing with the Vice-Presidents of the Conference and that among them the Spanish-speaking countries seemed to be well represented (Spain, Colombia, Uruguay and Venezuela).
(14) Furthermore, he wondered how the Committee could take decisions on the suggestions of the representatives of the Union of Soviet Socialist Republics and Argentina, as put forward.
(15) He proposed that the Committee first decide on the choice of the President of the Conference.

(16) The nomination of Uruguay was unanimously approved.

(17) Mr. THA HLA (Union of Burma) agreed with the delegates of the Union of Soviet Socialist Republics and Argentina that the list proposed by the Executive Board was less satisfactory than he had expected. He emphasized that South East Asia, for which only one country, Thailand, had been nominated, was inadequately represented.

(18) Mr. TERAN ROBALINO (Ecuador) congratulated the delegate of Uruguay on the honour done to his country by offering it the Presidency of the Conference.

(19) The CHAIRMAN asked members to vote on the rest of the list as a whole, as the comments made did not take the form of specific proposals.

(20) Mr. SOLDATOV (Union of Soviet Socialist Republics) explained that his remarks were based on two considerations: (1) the list proposed did not allow for a fair geographical distribution of the countries of Eastern and Central Europe; (2) considering the number of members on the General Committee, those countries were obviously less well represented than the others. It would be only right to give them another seat. A fair decision on that point would make it easier to deal later with a number of other problems.

(21) Mr. BUSTAMANTE (El Salvador) proposed adding Chile and Mexico to the list.

(22) The Proposal was supported by the delegate of Brazil.

(23) Mr. SHARIF (Pakistan) pointed out that the list had been drawn up by the Executive Board after lengthy discussion and with due regard to certain basic considerations; he proposed that the Committee vote first on the nominations to the posts of Vice-President.

(24) Mr. BERREDO CARNEIRO (Brazil) thought that, as all seats on the General Committee were of equal importance, the Committee should consider the list as a whole. However, as Venezuela did not seem likely to be represented at the Conference, the proposal concerning the Chairmanship of the Headquarters Committee would probably have to be amended.

(25) Sir Ronald ADAM (Chairman of the Executive Board) explained that out of the 19 posts to be filled, 6 were allocated to Europe, 5 to the American continent, 4 to Asia, 2 to the Middle East and 2 to other regions of the world, including Africa and the South Pacific (2 seats had been set aside for the latter group because of the special qualifications of the candidates proposed).

(26) The CHAIRMAN asked the Committee to vote on whether it would take a decision on the list as a whole.

(27) Mr. SECCO ELLAURI (Uruguay) thought the Committee should adjourn the meeting in order to work out a new procedure. It was difficult to take a decision on a single proposal.

(28) Mr. BERNAL JIMENEZ (Colombia) recalled that the original idea had been to appoint Egypt one of the Vice-Presidents, and he wondered whether it would not be possible to give one of the Latin American countries the post originally proposed for Egypt seeing that the latter had finally been chosen for the Chairmanship of the Legal Committee.

(29) Mr. PHOTIADES (Greece) was disappointed to find the Committee working so slowly.

(30) Mr. HUZAYIN (Egypt) saw no reason to alter the list of Vice-Presidents. Spain had been chosen to replace Egypt on that list and he supported the new nomination.

(31) Mr. VASSALLO ROJAS (Chile) thought it was contrary to the democratic principles on which Unesco was based to discuss one single list; every country should be given a chance of expressing its views.

(32) Mr. BERREDO CERNEIRO (Brazil) emphasized that the Executive Board had always proposed lists of candidates without any idea of imposing them on the Conference. He suggested taking a secret vote which would enable all delegates to include new names on the list.

(33) Mr. NUFER (United States of America) was prepared to vote on the whole list, which did not imply that he would accept all the names proposed by the Board.

(34) Mr. COLOMBO (Argentina) supported the proposal of the delegate of Brazil.

(35) Mr. AMMOUN (Lebanon) also felt that the Committee should prepare a new list.

(36) Sir Charles Webster (United Kingdom) thought that the Committee should bear in mind the Executive Board's efforts and vote first on the proposed list. If that list were not approved, the Committee could then consider a different solution.

(37) Mr. THA HLA (Union of Burma) saw no point in prolonging the discussion. The only question was whether to vote on the entire list or consider the different categories of posts separately.

(38) The CHAIRMAN put that question to the vote.

(39) The Committee decided, by 26 votes to 13, to vote on the list as a whole.

(40) The CHAIRMAN put to the vote the nominations proposed by the Executive Board.

(41) That list was approved by 25 votes to 12 with 6 abstentions.

(42) Mr. KOTSCHNIG (United States of America) said that he had voted against the Board's proposals, not from lack of confidence in the Board but because he thought that when a delegation submitted a new nomination it was entitled to have that nomination considered.

(43) Mr. COLOMBO (Argentina) also said that he had not intended to show any mistrust in the Board. He had voted against merely in order to make his position clear.

(44) Mr. TERAN ROBALINO (Ecuador) said he had voted against the Board's list in order to emphasize that not enough seats had been set aside for Latin America and also to affirm the principle according to which the Board should make proposals and not impose its suggestions.

(45) Mr. VLAHOVIC (Yugoslavia) was satisfied with the appointment of nine of the ten countries included on the list. He had voted against the list because he had had no opportunity of expressing his opinion by a secret vote.

(46) Mr. PRATT (Australia) asked whether a new nomination would be made for the chairmanship of the Headquarters Committee if it turned out that Venezuela would not be attending the Conference.

(47) Mr. de ERICE y O'SHEA (Spain) urged that when the time came to elect the Vice-Chairman of the Headquarters Committee consideration be given to appointing a delegate of Latin America.

(48) The CHAIRMAN replied that the suggestion would be borne in mind.

(49) The DIRECTOR-GENERAL explained that the Secretariat had not yet received any official communication about Venezuela attending the Conference.

(50) The CHAIRMAN pointed out that, by its vote, the Nominations Committee had adopted the same list as the Executive Board.

(51) He congratulated the countries nominated.

The meeting rose at 6.15 p.m.

# SECOND MEETING

*15 November 1954 at 3.30 p.m.*

*Chairman:* Mr. KABIR (India)

**SUBMISSION OF CANDIDATE'S NAMES FOR THE POST OF CHAIRMAN OF THE HEADQUARTERS COMMITTEE AND FOR ONE POST OF VICE-PRESIDENT OF THE CONFERENCE**

(1) The CHAIRMAN said that the item on the agenda for the meeting was the choice of a candidate for the post of Chairman of the Headquarters Committee, so far held by Mr. Parra-Perez, the delegate of Venezuela, who was absent. He added that the delegate of Brazil, Professor Berredo Carneiro, had been nominated. If Mr. Carneiro were elected, he would have to resign from the Vice-Presidency of the Conference.

(2) Mr. BERREDO CARNEIRO (Brazil) agreed to stand for the post of Chairman of the Headquarters Committee and to resign from the Vice-Presidency of the General Conference provided it were understood that Mr. Parra-Perez, who was unable to attend the Conference, would resume his post afterwards.

(3) Mr. BADINI CONFALONIERI (Italy) hoped very much that the delegate of Brazil, whose experience would be invaluable to the work of the Headquarters Committee, would be replaced as Vice-President of the General Conference by the delegate of one of the other Latin American countries. That would, he thought, be logical and fair from the point of view of geographical distribution.

(4) Mr. PHOTIADES (Greece) suggested that the Chairman should remind the Committee of the "numerus clausus" system adopted by the Headquarters Committee and should enumerate the countries represented on the Committee. He thought that would save time.

(5) Mr. BERNAL JIMENEZ (Colombia), who was speaking on behalf of his delegation and, he thought, expressing the general feeling of all the Latin American delegations, thanked Mr. Carneiro for resigning from the Vice-Presidency of the Conference and accepting the post of Chairman of the Headquarters Committee.

(6) He also thanked the delegate of Italy for expressing the hope that the post of Vice-President of the General Conference would continue to be held by a member of one of the Latin American delegations.

(7) He proposed, as Vice-President of the Conference, the delegate of Chile, a country which had only recently joined Unesco but which was a centre of culture and peace in Latin America.

(8) The CHAIRMAN thought that suggestion useful, though somewhat premature: the Committee must first nominate the candidate for the post of Chairman of the Headquarters Committee.

(9) Mr. BERREDO CARNEIRO (Brazil) was elected by general agreement. The Chairman reminded the meeting of the unofficial proposal submitted by the Colombian delegate, which could, he thought, now be considered official.

(10) Mr. PHOTIADES (Greece) supported the Colombian delegate's proposal to nominate the delegate of Chile to the post of Vice-President of the Conference.

(11) Mr. Vassallo Rojas (Chile) was nominated by general agreement.

(12) On behalf of his delegation, Mr. VASSALLO ROJAS (Chile) agreed to stand for the post of Vice-President of the Conference, and assured the Committee of his earnest intention to fulfil his task sincerely and energetically, in pursuit of the ideal of international freedom and brotherhood.

(13) The meeting rose at 4.15 p.m.

# THIRD MEETING

*6 December 1954 at 4.30 p.m.*

*Chairman:* Mr. KABIR (India)

**NOMINATION OF CANDIDATES FOR MEMBERSHIP OF THE EXECUTIVE BOARD (documents 8C/JUR/2, 8C/JUR/5, 8C/NOM/35 8C/DIV/133 and 8C/DIV/140)**

(1) The CHAIRMAN reminded the Nominations Committee that the purpose of the meeting was to discuss the procedure for the election of members of the Executive Board. That procedure, set forth in document 8C/DIV/133, had just been partially amended by the adoption of document 8C/JUR/5 by the General Conference in plenary session. The Committee would not vote on nominations until the following morning (7 December). He asked if that procedure would be acceptable to the Committee.

(2) The procedure proposed by the Chairman was approved.

(3) At the request of Mr. PHOTIADES (Greece), Mr. SABA (Legal Adviser) read Article V of the Constitution, as amended, relating to the Executive Board.

(4) The CHAIRMAN asked if the Committee would agree not to have any discussion on the merits of individual candidates or countries.

(5) Mr. BOURGEOIS (Switzerland) agreed entirely with the Chairman's suggestion, but asked whether he might apprise the Committee of a letter he had received from Mr. Piaget, a candidate for the Executive Board.

(6) Speaking on a point of order, Mr. TUNCEL (Turkey) asked whether the Committee would, before voting, discuss document 8C/DIV/140, relating to the geographical distribution of seats among Member States.

(7) Replying to the delegate of Turkey, the CHAIRMAN explained that the relevant document would be considered as soon as the question of procedure had been settled. On the subject of the letter from Professor Piaget, he feared that to allow his message to be read would open the door to other communications relating to individual candidates. He therefore wondered if the delegate of Switzerland would be kind enough to refrain from pressing his point.

(8) Mr. BOURGEOIS (Switzerland) explained that he had no intention of going into Mr. Piaget's merits; he merely wished to inform the Committee of a personal communication from Mr. Piaget, giving the reasons for his absence and explaining his views regarding Unesco.

(9) Mr. CABOUAT (France) asked that Mr. Bourgeois be authorized to read the communication from an absent candidate. If other delegations wished to present other official communications likely to influence the voting, it was the time to bring them forward too.

(10) Mr. MIGONE (Italy) supported Mr. Cabouat's proposal.

(11) Mr. BERNAL JIMENEZ (Colombia) saw no reason why the letter should not be read, since it related to a person so important as Professor Piaget. He thought, however, that it would be difficult later to refuse the same right to other candidates who were prevented from being present at the session or felt it would be unsuitable for them to attend, but who might also wish to make written communications to the Committee.

(12) The CHAIRMAN decided to put the matter to the vote.

(13) The French proposal that the Committee hear the communication from Professor Piaget was adopted by 30 votes to 1, with 20 abstentions.

(14) Mr. BOURGEOIS (Switzerland) read the following passages from Mr. Piaget's letter:

Princeton, December 1954

"Although the General Conference has modified the structure of the Executive Board, this decision has naturally not altered my attitude towards Unesco. I had agreed to stand again for election to

the Board, and I stand by my agreement, since our Government and my friends of the Swiss delegation are good enough to place their confidence in me - for which I am infinitely grateful.

I regret that I am unable to be among you on this occasion. Invited by the Princeton Institute to spend two years here in order to finish a job with the help of the mathematicians of this famous School, I was able to accept a stay of only three months, and my obligations in Geneva and at the Sorbonne made it imperative that I should take these three months precisely this autumn when I should have liked to be in Montevideo.

.....

So I should be most grateful if you would explain and excuse my absence to all my friends, whom I should not like to disappoint. Despite appearances and the circumstances I have just mentioned, I am still as anxious as ever to work with the Organization, whose shortcomings and growing pains have never prevented us from believing in it and its great future.

.....".

(15) It was unanimously agreed that there should be no discussion of individual candidates.

(16) The Committee then considered document 8C/DIV/140.

(17) Mr. TUNCEL (Turkey) considered that document 8C/DIV/140 was already out of date. The Turkish delegation had studied it closely, particularly as it dealt with a question which had been discussed in Turkey's last two reports to Unesco. In its relations with the Unesco Secretariat, Turkey was at the moment regarded as one of the European countries.

(18) Turkey, however, in the document, was included in Group B. In spite of its close relations with the other countries in that group, Turkey wished, by reason of its membership of the Council of Europe and its relations with Unesco, to be included in Group A.

(19) Mr. SABA (Legal Adviser) pointed out that document 8C/DIV/140 was not intended to define "regions". It was a tentative arrangement, taking into account the distribution in the past. Mr. Saba added that, for the purposes of the Secretariat's work, Turkey was at the moment included in the European group.

(20) Mr. TUNCEL (Turkey) was quite satisfied with Mr. Saba's statement, but asked for Turkey to be included in Group A for the Executive Board elections.

(21) The CHAIRMAN considered that the Committee was in agreement with the Turkish delegate's proposal.

(22) Mr. PHOTIADES (Greece) stressed that the Committee was an advisory body and asked how many of the candidates for the Executive Board were persons competent in the arts, the humanities, science, education and the diffusion of ideas, within the meaning of Article V, A, 2 of the Constitution.

(23) The CHAIRMAN was sure that members of the Committee would bear the remarks of the delegate of Greece in mind. He pointed out that the curriculum vitae of each candidate was before the Committee and that those defined their special fields of interest and competence; clearly all candidates were eminent personalities in their fields. All were persons of culture.

(24) Mr. PHOTIADES (Greece) would have liked the name of each candidate to be accompanied by an indication of his specialty.

(25) Mr. HUZAYIN (Egypt) asked whether the Nominations Committee had power to transfer a country from one geographical group to another. He pointed out that Turkey had been chosen more often and for a longer time than any other country to represent Member States of the Middle East on the Board. His delegation very much hoped that Turkey would continue to feel that she belonged to that geographical area.

(26) Mr. SABA (Legal Adviser) pointed out that the document in question did not bind the Committee in any way. It had been drawn up at the request of the General Committee, which wanted to have a list in accordance with the recommendations made by the Programme Commission at the sixth session. There was no official definition of regions; the document merely gave indications on the basis of what had been done in the past.

(27) Mr. TUNCEL (Turkey) pointed out that since the previous year Turkey had been included in the European group for the purposes of the Secretariat.

(28) Mr. AMMOUN (Lebanon) considered that there could be no objection to the contentions of the Turkish delegation. Moreover, a strictly geographical distribution was not enough; the main factor to consider was cultural grouping.

(29) Mr. TUNCEL (Turkey) stressed that the problem was solely that of the relations between Turkey and Unesco. Turkey wanted those relations to be maintained through the "European" unit. Mr. Tuncel had no wish to go into the definition of the geographical region of the Middle East, and stated that Turkey, whose territories were situated in both Europe and Asia, could freely choose to be included in the European group for the purposes of its relations with Unesco.

(30) The CHAIRMAN announced that the two following candidatures had been withdrawn: Mr. Diaz Samayoa (Guatemala) and Mr. Al-Hilli (Iraq). There thus remained thirty candidates.

(31) The ballot would take place the following morning, 7 December, at 10 a.m.

(32) Mr. SANDOVAL VALLARTA (Mexico) wished for clarification of a point regarding electoral procedure which was obscure in the Rules of

Procedure. Rule 95, read with Rule 89, which had been amended that afternoon, stipulated that the majority for election was 50 per cent plus 1 of the votes cast. Half the number of votes might not be an integer, for example, half 41, would be 20 1/2. According to generally recognized parliamentary practice, it would be necessary to take the nearest whole number above, and accordingly, in the case he had instanced, 22 votes would be required for election. The Mexican delegate asked if that interpretation was correct.

(33) Mr. SABA (Legal Adviser) endorsed that interpretation. Supposing that 61 votes were cast, half of that figure would be 30.5, and the majority required would be 32.

(34) Mr. BERNAL JIMENEZ (Colombia) desired that, before rising, the meeting should take note of a statement by the group of Latin American countries and perhaps subscribed to by the United States of America and Canada; while geographical and cultural distribution was a criterion commonly adopted for elections, it was unfavourable to the American continent because it did not take into account the proportion of countries included in that continent nor the importance of its culture.
(35) The American countries might have hoped that when the number of members of the Executive Board was increased to 22, they would be allowed a larger representation on it.
(36) The question had been studied very unselfishly and the American countries were willing that other continents should have a larger number of members on the Board so that Europe and Asia would be better represented. That did not mean that in the future distribution of seats on the Board which would certainly be made at the next session of the General Conference, the American continent should not be given the proportion of Executive Board members to which it was entitled.
(37) The countries of America had taken that decision in the hope that it would lead to closer understanding between all the peoples and abate regional self-interest; it was for that reason that America was prepared to give the advantage to the peoples of Europe and Asia.

(38) The Colombian delegate asked that his statement should appear in the record.

(39) The CHAIRMAN was sure that all delegations would appreciate the spirit of generosity shown by the countries of the American continent Their gesture would not of course serve as a precedent, as each session of the General Conference was independent of the others.

(40) Mr. SPILHAUS (United States of America) reverted to the definition of a simple majority. The Legal Adviser had said that, if there were 61 valid votes, the majority required would be 32; the minority, however, would then be 29 and there would be a difference of three votes between the two.

(41) Mr. SABA (Legal Adviser) while appreciating the United States delegate's point, stressed that under the terms of Rule 17 (new Rule 16) of the Rules for the Conduct of Elections by Secret Ballot, as amended, "Fifty per cent plus one of the votes recorded shall constitute the majority required...". If the number of votes cast was 61, fifty per cent plus one of that figure would be 31.5. Mr. Saba also pointed out that the procedure of drawing lots if votes were equally divided, which was already in force at the United Nations, had been adopted.

(42) Mr. SPILHAUS (United States of America) was perfectly satisfied with the legality of the interpretation, but not with the wisdom of it.

(43) Mr. RUIZ-GIMENEZ (Spain) had wished to speak immediately after the statement by the Colombian delegate. The debate had then turned to legal questions. He wished, however, to record his satisfaction and gratitude for the generous action of the American countries and asked that it should be taken into consideration at the next General Conference.

(44) In order to avoid any doubt on the matter, Mr. SANDOVAL VALLARTA (Mexico) again asked the Legal Adviser whether fractions were to count as whole votes, i.e. whether half counted as a whole.

(45) Mr. SABA (Legal Adviser) replied affirmatively.

(46) Mr. HAGUIWARA (Japan) wanted to know what would happen if the result of the ballot was 31 votes to 30. There would not be an equal division of votes, and lots could not be drawn as laid down in document 8C/JUR/5.

(47) Mr. SABA (Legal Adviser) admitted that in such a case there would be no need to draw lots. As from the third ballot, a candidate obtaining 31 votes against 30 could be regarded as elected.

(48) Mr. HAGUIWARA (Japan) thought that it would be well, at the ninth session of the Conference, to propose an amendment to the provisions concerned in order to remove any ambiguity.

(49) Mr. SABA (Legal Adviser) considered that it would be more satisfactory to regard 31 votes to 30 as constituting a majority even if the figure was not, mathematically, fifty per cent of the votes recorded plus one.

(50) Mr. MONTAGNIER (Secretary of the Conference), replying to Mr. BOURGEOIS (Switzerland), said that the Committee met in camera only if it decided so to do.

(51) The proposal to hold the next meeting of the Nominations Committee in the main Conference Hall was adopted by 34 votes to 0, with 10 abstentions.

The meeting rose at 5.50 p.m.

# FOURTH MEETING

*7 December 1954 at 10 a.m.*

*Chairman:* Mr. KABIR (India)

**NOMINATION OF CANDIDATES FOR MEMBERSHIP OF THE EXECUTIVE BOARD**

(1) The CHAIRMAN recalled that it had been agreed the previous day to proceed immediately with the secret ballot. As soon as the ballot had started, no new names could be proposed. He therefore invited any delegations wishing to propose new names to do so at once.

(No new candidates were proposed.)

(2) The Chairman informed members of the Committee that, out of the 30 candidates, they were to vote for 22: if they voted for more or fewer, their ballot papers would be invalid.

(3) At the Chairman's request, Miss McPHEE (Secretary of the Committee) read the list of candidates.

(4) Mr. SABA (Legal Adviser) read out Rule 95 of the Rules of Procedure of the Conference, as amended.

(5) Norway and Yugoslavia were appointed as tellers.
(6) The Nominations Committee then proceeded to vote by secret ballot.
(7) The result of the vote was as follows

Mr. G. A. Raadi (Iran) 65 votes; Mr. Oscar Secco Ellauri (Uruguay) 64; Mr. José Ricardo Martinez Cobo (Ecuador) 64; Mr. Athelstan Spilhaus (United States of America) 64; Mr. Orestes Ferrara Marino (Cuba) 62; Mr. Henri Laugier (France) 62; Mr. S. M. Sharif (Pakistan) 62; Mr. Mohamed Awad (Egypt) 61; Mr. Paulo E. de Berredo Carneiro (Brazil) 61; Mr. Arcot L. Mudaliar (India) 60; Sir Ben Bowen Thomas (United Kingdom) 60; Mr. Vittorino Veronese (Italy) 58; Mr. Haguiwara (Japan) 55; Mr. Juan Estelrich y Artigues (Spain) 54; Mgr Jean Maroun (Lebanon) 53; Mr. Nathaniel V. Massaquoi (Liberia) 53; Mrs. Maria Schlueter-Hermkes (German Federal Republic) 51; Mr. Frans Bender (Netherlands) 48; Mr. Jakob Nielsen (Denmark) (Denmark) 44; Mr. Alexandr V. Solodovnikov (Union of Soviet Socialist Republics) 42; Mr. Herman Johannes (Indonesia) 41; Mom Luang Pin Malakul (Thailand) 41; Mr. Jean Piaget (Switzerland) 39; Mrs. Paz Reinoso de Rodriguez (Philippines) 35; Mr. Samuel Sambursky (Israel) 33; Mr. Stefan Wierblowski (Poland) 32; Mr. Rafael Bardales (Honduras) 23; Mr. George L. Paik (Korea) 23; Princess Souvanna Phouma (Laos) 23; Mr. Vo Van Lua (Viet-Nam) 20.

(8) The CHAIRMAN announced that the number of delegations entitled to vote had been 72. Four delegations had been absent and there had been 1 abstention and 1 invalid ballot.

(9) There had thus been 66 valid votes. The majority required was therefore 34 votes. There were 24 candidates who had more than the required majority. He therefore proposed that the Nominations Committee recommend the first 22 names to the General Conference, adding that two other candidates had obtained more than the required majority.

(10) The General Conference might wish to adopt a provision for the future, stipulating that, when the number of candidates having obtained more than the required majority was greater than the number of seats available, the first 22 on the list should be elected.

(11) To solve the problem and avoid any difficulty when the election was held at the plenary meeting, Mr. SABA (Legal Adviser) suggested that the Committee recommend the General Conference to add the following clauses to Rule 89 of its Rules of Procedure:

"If at any of the ballots a number of candidates greater than the number of seats to be filled obtains the required majority, those candidates having obtained the greatest number of votes shall be declared elected.

If, however, amongst the candidates having obtained the greatest number of votes, two or more have obtained an equal number of votes and are competing for one or more seats yet to be filled, the President shall decide between them by drawing lots."

(12) Mr. BAUGNIET (Belgium) considered that the Committee could hardly express an opinion straight away on a proposal which had not been submitted in writing. He therefore asked for it to be distributed in the various working languages.

(13) The CHAIRMAN asked if the Committee would agree to the proposal in principle, leaving it to the Legal Adviser and the Rapporteur of the Legal Committee to prepare a text for approval by the General Conference.

(14) Mr. BOURGEOIS (Switzerland) asked whether the proposal had been studied beforehand by the Legal Committee and recommended by it.

(15) It was unanimously agreed to recommend the first 22 names to the General Conference, adding that two other candidates had obtained the required majority.

(16) With regard to the proposed modification of procedure, as the text of the proposal was not available and as it had not been considered by the Legal Committee, it was agreed to suggest, but not to recommend, that procedure to the General Conference.

(17) The CHAIRMAN thanked all the heads of delegations for the patience and goodwill which they had shown at the third meeting of the Nominations Committee. He assured them that his only intention in proposing that discussion be limited to procedural matters had been to ensure that the Committee completed its work in time.

The meeting rose at 1.45 p.m.

# FIFTH MEETING

*10 December 1954 at 3.30 p.m.*

*Chairman:* Dr. MUDALIAR (India)

**RECOMMENDATIONS TO THE GENERAL CONFERENCE CONCERNING THE ELECTION OF MEMBER STATES TO SERVE ON THE LEGAL COMMITTEE, THE ADVISORY COMMITTEE ON PROGRAMME AND BUDGET AND THE COMMITTEE ON REPORTS BY MEMBER STATES**

(1) The CHAIRMAN said that he had been called upon to replace the Chairman of the Committee, who had left for India.

(2) The task of the Committee was to elect the Member States who would serve on three Committees of the General Conference at its next session: the Legal Committee, the Advisory Committee on Programme and Budget and the Committee on Reports by Member States.

(3) Document 8C/DIV/154 showed the membership of those Committees as elected at previous sessions.

(4) The Member States to serve on the Headquarters Committee and on the Executive Board had already been elected.

(5) The President proposed the following lists for the approval of the Committee:

Legal Committee (15 members) - Colombia, Czechoslovakia, France, Italy, Japan, Laos, Lebanon, Mexico, Netherlands, Pakistan, Union of South Africa, United Kingdom, United States of America, Union of Soviet Socialist Republics, Uruguay.

Advisory Committee on Programme and Budget (17 members) - Australia, Burma (Union of), Chile, Egypt, France, Guatemala, India, Israel, Philippines, Poland, Sweden, Switzerland, Turkey, United Kingdom, United States of America, Union of Soviet Socialist Republics, Yugoslavia. Of those 17 members, 6 were also members of the new Executive Board.

Committee on Reports by Member States (15 members) - Argentina, Austria, Cambodia, Ceylon, Colombia, France, Honduras, Hungary, Iran, Jordan (Hashemite Kingdom of), Norway, Spain, United Kingdom, United States of America, Union of Soviet Socialist Republics. It had been suggested that, in the last Committee, Korea should take the place of Colombia.

(6) Mr. MARTINEZ COBO (Ecuador) said that the Latin American countries were under-represented on the three Committees as proposed. They would not, however, ask for additional seats. They did, nevertheless, wish to propose that Colombia and Argentina should be represented on the Legal Committee, Chile and Mexico on the Advisory Committee, and Guatemala and Honduras on the Committee on Reports by Member States.

(7) Mr. SECCO ELLAURI (Uruguay) said that the group of Latin American countries had reached easy agreement on candidatures for the Executive Board, because a number of possible candidates had stood down to make way for others. His country would follow that example and would not stand for election to the Legal Committee.

(8) Mr. MARTINEZ COBO (Ecuador) thanked the delegate of Uruguay, and proposed that the place of Uruguay be taken by Argentina.

(9) Mr. COLOMBO (Argentina), thanking the delegate of Ecuador, said that his country was unable to accept, being already proposed for the Committee on Reports by Member States. It would prefer a seat on the Legal Committee.

(10) Mr. DUERING (Sweden) said that for two years Sweden had been represented on the Advisory Committee. He would suggest that Sweden be replaced by Norway on the Advisory Committee, and that Sweden be elected to a seat on the Committee on Reports by Member States.

(11) Mr. MARTINEZ COBO (Ecuador) suggested that Costa Rica be represented on the Committee on Reports by Member States.

(12) Sir Kenneth GRUBB (United Kingdom) had understood that the Scandinavian countries had wanted Denmark to serve on the Committee on Reports by Member States, instead of Norway.

(13) The CHAIRMAN recalled that the delegate of Sweden had just suggested that Sweden, rather than Norway, should serve on that Committee.
(14) In view of the suggestions made, he proposed that the three committees be composed as follows:

Legal Committee (15 members) - Argentina, Colombia, Czechoslovakia, France, Italy, Japan, Laos, Lebanon, Mexico, Netherlands, Pakistan, Union of South Africa, United Kingdom, United States of America, Union of Soviet Socialist Republics.

Advisory Committee on Programme and Budget (17) members) - Australia, Burma (Union of), Chile, Egypt, France, Guatemala, India, Israel, Norway, Philippines, Poland, Switzerland, Turkey, United Kingdom, United States of America, Union of Soviet Socialist Republics, Yugoslavia.

Committee on Reports by Member States (15 members) - Austria, Cambodia, Ceylon, Costa Rica, Denmark, France, Honduras, Hungary, Iran, Jordan (Hashemite Kingdom of), Korea, Spain, United Kingdom, United States of America, Union of Soviet Socialist Republics.

(15) The three proposals were unanimously adopted.

The meeting rose at 4.10 p.m.

# CHAPTER VIII

# LEGAL COMMITTEE

## FIRST MEETING

*12 November 1954, 6.10 p.m.*

*Chairman:* Mr. AWAD (Egypt)

OPENING OF THE MEETING AND NOMINATION OF A CHAIRMAN

(1) Mr. SABA (Legal Adviser) declared the meeting open and requested members of the Legal Committee to elect their chairman. The Nominations Committee had put forward the name of Mr. Mohamed Awad Mohamed, leader of the Egyptian delegation. In the absence of any observations, the choice of Mr. Awad was automatically accepted.

(Mr. Awad took the chair.)

(2) The CHAIRMAN, after expressing his thanks for the honour done him, proposed that the meeting be adjourned and that the General Conference be informed of this decision.

The meeting rose at 6.20 p.m.

## SECOND MEETING

*17 November 1954, at 10.30 a.m.*

*Chairman:* Mr. AWAD (Egypt)

ELECTION OF A VICE-CHAIRMAN AND A RAPPORTEUR

(1) The CHAIRMAN said that the first business of the Committee was the election of a Vice-Chairman and of a Rapporteur.

(2) Mr. HUZAYIN (Egypt) proposed, and the proposal was duly seconded, that Mr. Jaramillo Arango (Colombia) should be elected Vice-Chairman of the Committee.

(3) It was also proposed, and the proposal was seconded, that Mr. BAUGNIET (Belgium) be elected Rapporteur.

(4) Both these proposals were adopted.

(5) Mr. BAUGNIET (Belgium) thanked the Committee for the honour thus done him. However, he could agree to act as Rapporteur only provided that that would not prevent him from speaking freely during the discussions.

(6) The CHAIRMAN said that anyone acting as Rapporteur was rendering a service to the Committee. The Rapporteur would of course retain complete liberty to put forward an independent point of view.

(7) Mr. JARAMILLO ARANGO (Colombia) expressed his appreciation of the honour done to him.

DISCUSSION OF QUESTIONS REFERRED TO THE LEGAL COMMITTEE BY THE ADMINISTRATIVE COMMISSION

(8) Mr. SABA (Legal Adviser) said that the following questions had been referred to the Committee by the Administrative Commission: (a) Item 9.3.2 of the agenda - Draft amendments to Articles V and VI of the Constitution, proposed by the Director-General

(reports of the Director-General), (b) Item 9.3.4 of the agenda - Draft amendments to the Rules of Procedure of the General Conference; (c) Item 9.3.3 of the agenda - Draft amendment to the Constitution, relating to the withdrawal of Member States.
(9) On the last item, Mr. Saba recalled that a decision of principle had already been taken by the Administrative Commission, which had declared in favour of introducing into the Constitution a clause enabling Member States to withdraw on their own decision alone.
(10) Mr. Saba went on to say that the Committee had also been asked by the Administrative Commission to take a decision on two legal questions connected with item 9.3.1 of the agenda (Draft amendments to Article V of the Constitution - structure of the Executive Board).
(11) The first of those two questions was as follows: on 11 August 1954 the Japanese Government had submitted a proposal to modify a draft amendment already presented to the Director-General by the United States Government, the text of which was reproduced in document CL/943 Annex 1. If the American proposal were rejected, could the amendment proposed by Japan be adopted? In other words, could the General Conference, after rejecting a draft amendment, accept a proposal which had itself been submitted as an amendment to that draft?
(12) The second legal point on which the Committee was asked to give its opinion was the following: should a change in a figure (such as the change which would increase the number of members of the Executive Board from 22 to 24) be regarded as a formal change, or as a change of substance? In accordance with Rule 105 of the Rules of Procedure, the General Conference could in fact adopt certain purely formal changes without prior communication to Member States.

(13) The CHAIRMAN asked the Committee to begin by examining Mr. Saba's second point.

(14) Mr. HAGUIWARA (Japan) considered it advisable to exercise great prudence whenever it was contemplated changing Unesco's Constitution. Article XIII of the Constitution, under which such amendments became effective upon receiving the approval of the General Conference by a two-thirds majority, already constituted an important exception to the much stricter rules usually followed in matters of international law.
(15) Mr. Haguiwara also drew the Committee's attention to the very restrictive nature of the terms used in Rule 105 of the Rules of Procedure, where the changes which the Conference might adopt without prior communication to Member States were described as "purely matters of drafting".
(16) For his part Mr. Haguiwara thought that a change which would result in the number of members of the Executive Board being increased from 22 to 24 could not be considered purely a matter of drafting, and that it would therefore be dangerous to treat it as such.

(17) Mr. SABA (Legal Adviser) thought it well to remind the meeting that the question whether a change in figures could be regarded purely a matter of drafting had already been raised at the seventh session of the General Conference as a result of proposals submitted by the Canadian delegation. The latter had asked the General Conference to decide that an amendment consisting of a change of figures, or of proportions, could not be regarded as a substantive change. In view of the arguments then put forward in the Legal Committee and the Administrative Commission, the Canadian delegation had finally decided to withdraw its proposal and ask the Executive Board and the Director-General to examine the possibility of changing the Rules of Procedure dealing with amendments to the Constitution (Rules 103 to 106).
(18) However, the Administrative Commission found that some delegations did not wish the interpretation given by the Commission to Rule 105 of the Rules of Procedure to be taken as a precedent binding upon the General Conference.
(19) These then, concluded Mr. Saba, were the precedents on which the Committee could, if it so wished, base its decision on the question now submitted to it for examination.
(20) Furthermore, at its seventh session the General Conference had occasion to interpret and apply Rules 105 and 106 when the United Kingdom delegation submitted a proposal concerning the tenure of office of members serving on the Executive Board in 1952. Various solutions had been suggested and had been the subject of draft amendments forwarded to Member States within the time-limit fixed by the Constitution. The United Kingdom proposal differed slightly from those draft amendments and, in view of the temporary nature of its provisions, was not regarded by the Conference as a substantive amendment; it was adopted.

(21) In view of the importance of the Executive Board's work, Mgr MAROUN (Lebanon) thought that an amendment designed to change the number of its members from 22 to 24 could not be considered purely a matter of drafting; in his opinion, such an amendment constituted "a substantive change".

(22) Mr. WEST (United Kingdom) said he was not a legal expert. Nor had he been present at the seventh session of the General Conference, at which the amendments mentioned by the Legal Adviser had been discussed. He did feel, however, that what had happened at that session could not be regarded as an irrevocable precedent governing the decisions which the Committee now has to take.

(23) To use non-legal terminology, he thought that a proposal for an increase in the membership of the Executive Board was a serious one. He had much sympathy with the view expressed by the delegate of Lebanon. The ratio obtaining between the size of the Board and the total number of Member States was so important, and had such an effect on the whole Organization, that it was difficult to regard such a proposal as merely a matter of drafting.

(24) Mr. PAGE (Canada) strongly endorsed the view expressed by the previous speaker that such a proposal was not merely a drafting matter, but a question of substance.

(25) The CHAIRMAN asked whether he could assume that the Committee unanimously considered an increase in the number of members of the Board to twenty-four to be a substantive change.

(26) Mr. SABA (Legal Adviser) observed that what the Committee was being asked to decide was not the actual number of seats on the Executive Board, but whether a change of figure could or could not be regarded as merely a formal change.

(27) Mr. HUZAYIN (Egypt) moved that the Committee adopt the following motion: "The Legal Committee considers that any change in the membership of the Executive Board, as proposed by Japan, is not merely a matter of drafting."

(28) Mr. KOTSCHNIG (United States of America) said that there should be no mention of the Japanese proposal. Several delegations had raised the question of increasing the membership of the Board beyond the figure proposed by Japan.

(29) Mr. PHOTIADES (Greece) suggested that no mention be made of any figure, but that the Committee confine itself to expressing its opinion that any change made in the number of members of the Executive Board was a substantive change.

(30) Mr. HUZAYIN (Egypt) agreed to the change in his motion.

(31) Mr. JARAMILLO ARANGO (Colombia) said that the change discussed by the Legal Committee regarding the number of members of the Executive Board was a substantive and not a merely formal change. There was a proposal to increase the number of members of the Executive Board; it was no mere matter of drafting but was a subject on which the General Conference would give a final decision.

(32) Mr. BAUGNIET (Rapporteur) submitted to the Committee a draft resolution worded thus:

"The Legal Committee is of opinion that any change in the number of members of the Executive Board cannot be regarded as a change which is purely a matter of drafting."

(33) The Rapporteur's text was then put to the vote and adopted by 10 votes to 1 with 2 abstentions.

(34) Mr. KOTSCHNIG (United States of America), explaining his abstention, said that Rules 103 to 106 of the Rules of Procedure should not be interpreted in too narrow a sense. Of course, any change in the Constitution was a most important matter. But, if those Rules were interpreted too narrowly, no room would be left for any rewording of amendments duly submitted to the Conference, and it might even be that a minority would be able to prevent adoption of an amendment by the Conference on purely formal grounds. As regarded the Japanese amendment itself, proposing an increase of two members, he was convinced that the change proposed was no mere drafting matter, but he had serious doubts whether it was a matter of substance.

(35) The CHAIRMAN said that the Legal Committee now had to decide whether the Japanese proposal for an increase in membership from twenty to twenty-two (submitted, in accordance with the Rules, three months before the Conference) could stand by itself if the United States amendment to the Constitution (document 8C/ADM/1, Annex III) were rejected.

(36) Mr. SALIM (Hashemite Kingdom of Jordan) pointed out that, under Rule 104, the proposed changes had to be "communicated to Member States at least three months before the opening of the session". Had that been done in the specific case before the Committee?

(37) Mr. SABA (Legal Adviser) confirmed that Rule 104 had been observed in the case of the Japanese amendment.

(38) Mr. HUZAYIN (Egypt) thought that the Japanese amendment, submitted as it had been according to the Rules, had independent status, and therefore should stand even if the United States proposal were rejected.

(39) Mr. KOTSCHNIG (United States of America) disagreed. He had no doubt at all (and neither had his legal advisers) that the Japanese proposal was an amendment to the United States amendment. In the Director-General's communication to Member States, it was clearly stated that the Japanese Government was submitting an amendment to an amendment. That had been made clear by the Japanese Government itself, and confirmed only the day before by the Japanese delegation. Otherwise, it would have to be considered as an amendment to the Constitution and, as such, would be out of order, having been submitted only three months before the Conference.

(40) A striking proof of his assertion was afforded in paragraph C (b) of the Japanese amendment (document 8C/ADM/1 Add.): "ten members may serve..... in the new capacity as provided for in the present amendments to the Constitution pertaining to the composition of the Executive Board." If the Japanese amendment was not an amendment to the United States amendment, what was the meaning of the expression "new capacity"? Thence, for irrefutable reasons, if the United States amendment to the Constitution were rejected, the Japanese amendment would lapse too.

(41) Mr. BAUGNIET (Rapporteur) thought it desirable that the Committee should know the exact terms of the letter addressed to the Director-General on 11 August 1954 by the representative of the Japanese Government.

(42) Mr. SABA (Legal Adviser) read out that letter and said that its annex was a draft amendment to the amendments proposed jointly by the United States, Australia, Brazil and the United Kingdom. Those amendments, as he had already mentioned, would be found in document CL/943 Annex 1.

(43) Mr. Saba also drew the Committee's attention to Rule 86 of the Conference Rules of Procedure, which dealt with voting on amendments. According to that Rule, the Conference should first vote on the Japanese amendment and then, if that were adopted, on the American proposal as altered by that amendment.

(44) Mr. KOTSCHNIG (United States of America) felt that the Japanese amendment should not be adopted independently of the American proposal.

(45) As no other delegate wished to speak, the CHAIRMAN asked the Rapporteur to submit to the Committee a draft resolution on the question.

(46) Mr. BAUGNIET (Rapporteur) then submitted to the Committee the following text:

"The Legal Committee is of opinion that the amendment submitted to the Director-General by the Japanese Government on 11 August 1954 constitutes, as indicated by the title of the document annexed to the letter in question, a draft amendment to the amendments to Article V of the Constitution proposed jointly by the United States of America, Australia, Brazil and the United Kingdom (CL/943, Annex 1). It cannot therefore be regarded as a separate and self-contained amendment to the provisions of Article V of the Constitution. It could not, therefore, be adopted by the General Conference unless the amendment to which it relates were itself adopted."

(47) After a comment by Mr. MAYER (France), Mr. BAUGNIER (Rapporteur) said that he was willing to delete the last sentence of the above text.

(48) Mr. KOTSCHNIG (United States of America) said that his delegation had no objection to deletion of the last sentence in the rapporteur's original draft, provided it were clearly understood and acknowledged that the last sentence was an obvious consequence of the earlier part of the motion.

(49) The Rapporteur's text, without the last sentence, was put to the vote and adopted by 10 votes to 0, with 3 abstentions.

The meeting rose at 12.20 p.m.

# THIRD MEETING

*19 November 1954 at 3.30 p.m.*

*Chairman*: Mr. AWAD (Egypt)

**CONSIDERATION OF DRAFT AMENDMENTS TO PARAGRAPHS 1, 3, 4, 12 and 13 OF ARTICLE V OF THE CONSTITUTION CONCERNING THE EXECUTIVE BOARD** (document 8C/ADM/1, Annex III)

(1) The CHAIRMAN announced that the Legal Committee had been convened to examine draft amendments to Article V of the Constitution as adopted by the Administrative Commission that morning. The original United States amendment, co-sponsored by Australia, Brazil and the United Kingdom, had been adopted in an amended form by the Administrative Commission as follows:

A. Composition

Paragraph 1

As in document 8C/ADM/1, Annex III, page 4, save for the substitution of "twenty-two" for "twenty" in the second line (Japanese amendment).

Paragraph 3

The United States delegation had withdrawn its amendment to paragraph 3 and the original paragraph in the Constitution had therefore been retained.

Paragraph 4

As in document 8C/ADM/1, Annex III, page 4.

B. Functions

Paragraph 12

Replaced by paragraph 11 of document 8C/ADM/1, Annex II, page 3.

C. Transitional provisions

Paragraph 13

As in document 8C/ADM/1, Annex III, page 4, save for the substitution of "twenty-two" for "twenty" in the third line, and the substitution of "eleven" for "ten" in the last line but one.

(2) The Chairman explained that it was the Committee's task to see that there was nothing contradictory or legally inadmissible in the amendments adopted.

(3) In reply to a question from Mr. MAYER (France), Mr. KOTSCHNIG (United States of America) said that the intention in paragraph 4 was that a government should nominate only one candidate, in the event of the death or resignation of a member; however, if that person were not appointed, he assumed that the government concerned would be able to nominate someone else.

(4) Mr. PHOTIADES (Greece) rather feared difficulties of interpretation in connexion with the new Article 12, which, he recalled, read as follows:

"Although the members of the Executive Board are representative of their respective Governments, they shall exercise the powers delegated to them by the Conference on behalf of the Conference as a whole."

(5) Mr. SABA (Legal Adviser) recognized that the members of the Executive Board would sometimes be faced with problems if they were to reconcile the responsibilities they had assumed as mandatories of the Conference as a whole with the instructions they had received from their Governments. He observed that there were precedents for that case. Thus the Security Council, which the United Nations had made primarily responsible for the maintenance of peace, also consisted of representatives of Member States.

(6) Mr. CABOUAT (France) wished to be assured that the word "resignation" appearing in paragraph 4 would under no circumstances enable a government to dismiss its representative. In other words, he wished to be certain that the "resignation" in question could only be accepted if it were put in by the member himself, and not by his government.

(7) Mr. HAGUIWARA (Japan) spoke on a point of order. He asked the Chairman for information on the procedure which the Committee intended to adopt in studying the amendments now submitted for its examination.

(8) The CHAIRMAN suggested that the Committee might wish to adjourn for fifteen minutes to study the amendments.

(9) Mr. WEST (United Kingdom) formally moved adjournment for a quarter of an hour.

(10) Adopted.

(11) The meeting having reassembled, the CHAIRMAN called upon the Rapporteur to give some explanations.

(12) Mr. BAUGNIET (Rapporteur) read out the few formal amendments which it was proposed to make in the French text of paragraph 1. In the third line of the paragraph (document 8C/ADM/1. Annex III, page 4), the words "de l'Etat qui l'a nommé" would be replaced by the words "de l'Etat qui l'avait désigné", and "en cette qualité" would replace "ès qualité".

(13) Mr. HAGUIWARA (Japan) observed that, in the English text, the words "each of whom shall represent the Government of his State" were not sufficiently precise and questions might arise in connexion with people having several nationalities.

(14) Mr. BAUGNIET (Rapporteur) drew the Committee's attention to the fact that nothing should normally prevent a State being represented, if it so desired, by a national of another State. The words "of his State" seemed to him therefore to be too restrictive.

(15) Mr. HAGUIWARA (Japan) stressed that at all events the English and French texts should be made to agree with each other.

(16) The CHAIRMAN suggested that a drafting Committee be appointed, composed of English, French and Spanish-speaking members, to bring the three texts into line, as far as was linguistically possible.

(17) Mr. SABA (Legal Adviser) was not in favour of a drafting committee being appointed and preferred that the Committee should continue its discussion. He therefore invited English-speaking delegates, and particularly the delegate of the United States, to say whether they thought it possible to change the English text so as to bring it into line with the proposed French text, which, he recalled, read as follows: "Chacun d'eux représente le gouvernement qui l'avait désigné."

(18) Mr. KOTSCHNIG (United States of America) did not quite understand the difference in French between "désigner" and "nommer". In English, it would be perfectly correct to say "the government of the State which has nominated him". There was no need to substitute "designated".

(19) In reply to the United States delegate, Mr. SABA (Legal Adviser) said that there was no basic difference between the words "désigner" and "nommer", which could both be translated into English by "appoint". However, the word "nominate" meant for the French putting forward a candidate's name.

(20) Mr. WEST (United Kingdom) asked if the point under discussion were whether or not a government could nominate a national of another country, or whether it was merely a question of reconciling the English and French texts.

(21) Mr. BAUGNIET (Rapporteur) said that the problem was as follows: the Administrative Commission had approved two texts in English and French which were not in line with each other. The question therefore was to decide which of those two texts the Legal Committee would choose.

(22) Mr. KOTSCHNIG (United States of America) remarked that the original language of document 8C/ADM/1 was English, so that any adjustment should be in the French text.
(23) Drawing attention to paragraph A.2 of Article V of the Constitution, where it was stated that "Not more than one national of any Member State shall serve on the Board.....", he thought that it was quite clear that the person nominated had to be a national of the country which nominated him.

(24) Mr. HUZAYIN (Egypt) was against restricting the freedom of Member States to nominate nationals of other countries, if they so desired. He was therefore in favour of the words suggested by the delegate of the United States of America, namely "the government of the State which has nominated him", which would not restrict that freedom.

(25) Mr. WEST (United Kingdom) thought that the point was substantive rather than legal. He suggested that the Legal Committee might outline the difficulty and prepare two alternative texts, one reflecting

the intention of the United States delegation and the other that of the delegate of Egypt, for consideration by the Administrative Commission.

(26) Mr. HAGUIWARA (Japan) thought that, if the Committee decided, as the United Kingdom delegate had suggested, to submit two different texts, it should none the less express a preference for one or the other.

(27) Mr. MERMINOD (Switzerland) observed that, if the proposed French text were agreed upon (i.e. "Chacun d'eux représente le gouvernement de l'Etat qui l'avait désigné"), the situation would be as follows: each State would be free to nominate any one of its delegates as a candidate to the Executive Board; however, in order to conform to paragraph A. 2 of Article V, States would in fact be obliged to avoid appointing as their representatives on the Board persons who were not included among their nationals. For that paragraph stipulated that "not more than one national of any Member State shall serve on the Board at any one time, the President of the Conference excepted".

(28) Mr. HAGUIWARA (Japan) supported Mr. Merminod's point of view.

(29) Mr. SABA (Legal Adviser) was in agreement with the United Kingdom delegate in thinking that it would be preferable to draw up two different texts and try to reach agreement on one of them. The best way of doing that seemed to him to draft a French text corresponding exactly to the English version and an English text corresponding exactly to the French version.

(30) At the suggestion of Mr. WEST (United Kingdom), it was agreed to adjourn for five minutes in order to work out texts satisfactory to all delegates present.

(31) The meeting having reassembled, Mr. WEST (United Kingdom) read out the following text, on which there was a large measure of agreement among the English-speaking delegations: "The Executive Board shall be elected by the General Conference from among the delegates appointed by the Member States and shall consist of twenty-two members, each of whom shall represent the government of the State of which he is a national. The President of the General Conference .....etc."

(32) It appeared that an almost word-for-word French translation would be satisfactory to French-speaking delegations.

(33) Mr. West had one reservation to express in connexion with States which allowed people to have more than one nationality. In the case of a person with more than one nationality, it would have to be clear that, in representing one of the States whose nationality he possessed, he was choosing for that purpose the nationality of that State and could not, by so doing, debar the second of the States whose nationality he possessed from being separately represented by one of its own nationals.

(34) Mr. CABOUAT (France) was prepared to approve the text proposed by the United Kingdom delegate, the French equivalent of which would be: "Chacun d'eux représente le gouvernement de l'Etat dont il est le ressortissant".

(35) Mr. HAGUIWARA (Japan) suggested that in the English text the number 22 should be written not in figures, but in letters as it was in the French text.

(36) That proposal was approved.

(37) The Committee finally approved the following text for paragraph 1:

"The Executive Board shall be elected by the General Conference from among the delegates appointed by the Member States and shall consist of twenty-two members, each of whom shall represent the Government of the State of which he is a national. The President of the General Conference shall sit ex officio in an advisory capacity on the Executive Board."

(38) The CHAIRMAN then invited the Committee to examine paragraph 4 (document 8C/ADM/1, Annex III, page 4).

(39) Mr. BAUGNIET (Rapporteur) read out the few changes which it was proposed to make to that paragraph, the chief of which would be to replace the words "En cas de décès ou de démission d'un des membres" by the words "En cas de décès d'un des membres ou en cas de démission présentée par un des membres". That would avoid any interpretation to the effect that resignations might be brought about not by the member himself, but by his Government.

(40) Mr. HUZAYIN (Egypt) thought that it would be better to make the English text perfectly clear by amending it as in the French text to read: "In the event of the death of a member, or the presentation of his resignation by a member of the Executive Board....." That would make it clear that it was a question of the individual himself resigning and not of the government's withdrawing him.

(41) In reply to the Egyptian delegate, Mr. SABA (Legal Adviser) observed that in English the word "resignation" was sufficiently precise and sufficiently different from the word "dismissal" for it to be unnecessary to amend the English text.

(42) Mr. WEST (United Kingdom) strongly endorsed the remarks made by the Legal Adviser: resignation could only be a voluntary act on the part of the individual, so that the two texts were the same; however, he would be prepared to accept the Egyptian amendment, if the rest of the Committee so agreed.

(43) Mr. PHOTIADES (Greece) observed that only death and resignation were dealt with in paragraph 4, while disablement was not considered. He drew the Committee's attention to the problems which might arise in the case of, for instance, insanity.

(44) Mr. KOTSCHNIG (United States of America) agreed that, theoretically, it was possible that a member might become insane and still insist on attending meetings of the Executive Board, but that

danger had always existed; it was to be hoped that the Board would continue to be protected from such a misfortune.

(45) In view of the remarks by the Legal Adviser and the delegate of the United Kingdom, Mr. HUZAYIN (Egypt) agreed to withdraw his amendment to the first line of paragraph 4, on the understanding that it would be recorded in the minutes.

(46) Mr. HAGUIWARA (Japan) proposed that the words "le Conseil" should be replaced by "le Conseil exécutif" in the first line of paragraph 4 (French text).

(47) That proposal was accepted.

(48) The Committee finally approved the following text for paragraph 4.

"In the event of the death or resignation of a member of the Executive Board, his replacement for the remainder of his term shall be appointed by the Executive Board on the nomination of the Government of the State the former member represented. The Government making the nomination and the Executive Board shall have regard to the factors set forth in paragraph 2 of this Article."

(49) The CHAIRMAN then invited the Committee to examine the texts proposed for paragraphs 12 and 13.

(50) Mr. BAUGNIET (Rapporteur) said that the word "remanié" should be deleted from the third line of the new paragraph 13 (Transitional Provisions, French text).

(51) Mr. KOTSCHNIG (United States of America) observed that the word "revised" should also be omitted in the English text.

(52) Agreed.

(53) Mr. HAGUIWARA (Japan) moved the addition of the word "General" before "Conference" in the second line of the English text of the new paragraph 12 (former paragraph 11 of document 8C/ADM/1, Annex II).

(54) Agreed.

(55) In connexion with paragraph 13, Mr. Haguiwara raised the question of the re-eligibility of former members.

(56) Mr. PHOTIADES (Greece) considered that former members should, according to the proposed texts, be eligible for re-election provided their governments reappointed them.

(57) The CHAIRMAN pointed out that the question was whether to disregard all that had happened in the past, so that a member of the Board who had exhausted his two consecutive terms of office would still be re-eligible as a representative of his government. He asked the Committee whether it considered that the position should be made clear in the Constitution, or whether it thought that the question could be dealt with under the Rules of Procedure.

(58) Mr. BAUGNIET (Rapporteur) observed that the conditions for re-eligibility were defined in paragraph 3. The provisions of that paragraph, which had remained unchanged, should therefore be followed during the transitional period.

(59) Mr. HAGUIWARA (Japan) drew the Committee's attention to the unfortunate situation that might arise, during the transitional period, if paragraph 3 were applied too strictly. He wondered whether it would be possible to insert provisions allowing of a more flexible procedure during that period, in the Rules of Procedure of the General Conference.

(60) Mr. BAUGNIET (Rapporteur) replied that that question should be raised before the Administrative Commission.

(61) The CHAIRMAN observed that nothing new was involved. When the Executive Board had been established in 1946, some members had been drawn by lot to serve for one year only, which meant that, if re-elected, they could serve for only three years altogether. He asked the delegate of Japan if he would be content to have his statement recorded in the minutes.

(62) Mr. HAGUIWARA (Japan) said that he would be prepared, if the Committee thought it possible, to submit a text to the Administrative Commission to have provisions inserted in the Rules of Procedure of the General Conference, so as to ensure greater flexibility in the conditions of re-eligibility laid down in paragraph 3 during the transitional period.

(63) Mr. SABA (Legal Adviser) doubted whether it would be possible, by amending the Rules of Procedure or by any other means, to alter provisions which, like those at present being examined by the Committee, had already been approved by the Administrative Commission.

(64) The CHAIRMAN thought that the feeling of the Committee was that there was no need to insert a special provision to cover that point, either in the Constitution or in the Rules of Procedure.

(65) It was agreed that Mr. Haguiwara's suggestion should merely be recorded in the minutes.

**DRAFT AMENDMENTS TO THE RULES OF PROCEDURE OF THE GENERAL CONFERENCE – COMPOSITION OF THE EXECUTIVE BOARD (document 8C/ADM/3 (II), Add.1)**

(66) The CHAIRMAN stated that the United States delegation had also submitted draft amendments to the Rules of Procedure concerning the composition of the Executive Board. The United States amendments to paragraph 3 of Rule 30 and to Rule 96 having been withdrawn, the only Rules to be examined by the Committee were 95, 95A and 98. He asked the Committee to consider the United States' amendments in document 8C/ADM/3 (II).

Rule 95 (Elections)

(67) Mr. HAGUIWARA (Japan) observed that, in view of the changes just made in Article V of the Constitution, Rule 95 of the Rules of Procedure should be amended as follows: (a) in paragraph 1, "ten members" should be replaced by "eleven members"; (b) paragraph 2 should read as follows: "Only a delegate nominated by the Government of the State of which he is a national for election to the Executive Board may stand for election."

(68) The changes suggested by Mr. Haguiwara were approved.

(69) The Committee then examined Rule 95A (document 8C/ADM/3 (II), Annex I).

(70) The CHAIRMAN indicated the changes which should be made in the figures contained in that Article.

(71) Mr. PHOTIADES (Greece) drew the Committee's attention to a mistake he had noticed in the third line of the English text of the paragraph, where the words "shall be elected by Executive Board" should be replaced by "shall be elected to the Executive Board".

(72) Mr. KOTSCHNIG (United States of America) remarked that that was obviously a clerical error. He suggested that the text might be amended to read: "twenty-two members shall be elected by the General Conference pursuant to the provisions of Article V of the Constitution....".

(73) Mr. HAGUIWARA (Japan) preferred to keep to the words of the Constitution (Article V, C. 13 revised), which were: ".... shall be elected to the Executive Board pursuant .... etc."

(74) Mr. KOTSCHNIG (United States of America) withdrew his suggestion.

(75) Mr. CABOUAT (France) remarked that the proposed English text of Rule 95A of the Rules of Procedure exactly reproduced the text which had just been approved for the new Article V, C. 13 of the Constitution. He thought therefore that the Committee need now do no more than bring the French texts of the two rules into line with each other.

(76) The Legal Adviser and the Rapporteur approved the remark made by Mr. Cabouat.

(77) It was agreed that Rule 95A, in English, French and Spanish, should reproduce the wording of Article V, C. 13 of the Constitution, as amended.

Rule 98 (death or resignation)

(78) Mr. KOTSCHNIG (United States of America) pointed out that the situation here was exactly the same: Rule 98 in English was an exact reproduction of Article V, A. 4 of the Constitution as amended; the French and Spanish texts also should therefore be the same in both cases.

(79) Agreed.

(80) The CHAIRMAN stated that the Rapporteur would report the results of the Committee's work to the Administrative Commission.

(81) Mr. JARAMILLO ARANGO (Colombia) suggested that, although the Spanish text had not been examined, the respective documents should be altered to conform with the terms used in English and French, in those parts on which agreement had been reached.

(82) The CHAIRMAN proposed that the Colombian delegate's suggestion should be accepted.

(83) Agreed.

(84) Mr. BAUGNIET (Rapporteur) asked if the Committee would authorize him to inform the Administrative Commission in his report only of those texts which had been more or less changed and which had been finally approved by the Committee.

(85) Mr. PHOTIADES (Greece) proposed that the Committee decided to authorize Mr. Baugniet to submit his report in the form which he had just suggested.

The meeting rose at 6.40 p. m.

# FOURTH MEETING

*26 November 1951 at 10.30 a.m.*

*Chairman:* Mr. AWAD (Egypt)

**DRAFT AMENDMENTS TO ARTICLE V, PARAGRAPH 9, AND ARTICLE VI, PARAGRAPH 3, OF THE CONSTITUTION, PROPOSED BY THE DIRECTOR-GENERAL** (documents 8C/ADM/2 and 8C/ADM/2, Add.1)

(1) The CHAIRMAN invited the Committee to consider item 9.3.2 of the revised agenda dealing with amendments to Articles V and VI of the Constitution, and requested the representative of the Director-General to introduce the question.

(2) Mr. SABA (Legal Adviser) recalled that item 9.3.2 dealt with a question which had been discussed in a general way; the solution proposed in the documents had been approved in principle by the Administrative Commission. The system at present in force needed standardizing.
(3) Under the present provisions of the Constitution the Director-General had to draw up one report covering the activities of the Organization between sessions of the Conference and another relating to the activities of the Organization during years when the Conference did not meet. Those reports had to be submitted to the Board, which could make comments on them.
(4) The Board had considered it materially impossible to examine reports to be sent to Member States during years when no session was held, and to respect the proposed time-limits for despatch. That being so, it had been proposed that the Director-General should draw up a report every year on the activities of the Organization from 1 January to 31 December; such reports would be sent direct to Member States without passing through the Board.
(5) The Board, on the other hand, would draw up and submit to the General Conference at each of the latter's ordinary sessions, its comments on the annual reports drawn up by the Director-General since the preceding session and on any interim report which had had to be made to cover the activities of the Organization during the first months of the year in which an ordinary session was held.
(6) With regard to the amendments proposed by the delegation of the Union of South Africa (document 8C/ADM/2 Add. 1), the representative of the Director-General stated that there was no reason why the first amendment (amendment to paragraph 9 of Article V) should not be adopted; i.e. delete the words "since the last ordinary session of the Conference" and substitute "which he is required to prepare in terms of Article VI, paragraph 3".
(7) With regard to the second amendment, Mr. Saba saw no reason for deleting the words "if necessary" in paragraph 3 of Article VI, as the need for an interim report depended upon the exact date of the session.

(8) Mr. PHOTIADES (Greece) wished to know if, under the new provisions, the annual reports by the Director-General would or would not be checked by the Executive Board, and what the Board's rôle would be in its relations with the Director-General when he sent out his report. If that point were not cleared up, it would seem that the Board would only be able to make its comments every two years.
(9) Such comments required an examination of the Director-General's reports and therefore implied a certain check on them.
(10) The delegate of Greece concluded by stating that the Executive Board, whose task it was to supervise the execution of the programme adopted by the General Conference, must be able to make its comments on the Director General's annual report.

(11) Mr. SABA (Legal Adviser) pointed out that the Executive Board would not be thereby deprived of its supervisory function, which extended to the whole of Unesco's activities between sessions of the General Conference. All that would be affected would be the dates for drawing up the reports and the dates on which the Board would make its comments. Moreover, the proposal under examination had been made by the Executive Board and the Board would comment on the annual reports.

(12) Mr. HAGUIWARA (Japan) observed that it was the Executive Board which submitted the Director-General's report to the General Conference, with or without comments. In the years between Conferences the Executive Board had theretofore communicated the report to Member States and enclosed its comments, if it so desired. As now proposed, it was the Director-General who both drew up the report and circulated it to Member States. It could be agreed that he would communicate his report to the Executive Board, as well as to Member States, but he would not wait for a session of the Board before sending it to the various governments.
(13) It was therefore not only a question of correcting the former text but of introducing new ideas into it.

(14) Mr. SABA (Legal Adviser) observed that the amendments submitted were the result of the Executive Board's deliberations and seemed to reflect the wishes of the General Conference. He recalled that, under the current provisions, the comments made by the Executive Board on reports submitted during years when no ordinary session was held had to deal particularly with the activities to be undertaken by Unesco during the ensuing twelve months. In point of fact, when the two-year principle had been adopted, there had been no question of fixing an exact time

schedule for executing a programme which was thenceforth to be carried out over two years. At that time it had been thought advisable for the Director-General and the Board to draw up that schedule during the two-year period and that Member States should receive information and comments from the Board concerning activities proposed for the second year. However, the General Conference had decided, upon the proposal of the Administrative Commission, that the draft two-year budget should be divided into annual sections and should include a time-schedule of the Organization's activities. That meant that the General Conference had in advance all necessary information concerning proposed activities.

(15) The CHAIRMAN pointed out that different reports were involved: (1) the Director-General's report, on the Organization's activities since the holding of the last Conference, referred to in the amendment to Article V, paragraph 9; (2) a report on the Organization's activities covering the period 1 January-31 December each year, mentioned in the amendment to Article VI, paragraph 3; and (3) a report, "if necessary" to cover the period following the preceding General Conference; that third report was mentioned in the last sentence of the amendment to Article VI, paragraph 3. The Chairman suggested that the Committee might consider the relative positions of those various reports.

(16) Mr. HAGUIWARA (Japan) explained his point of view; the Director-General's report had to be circulated to Member States as soon as it was printed, i.e. without awaiting the next session of the Executive Board. But the report, once printed, had to be communicated to the Executive Board at its next session so that the Board might study it. Mr. Haguiwara suggested that the words "shall communicate to Member States" should be followed by "and to the Executive Board" in the proposed text of paragraph 3 Article VI. As the Director-General always sent his report to Board members, that addition could be considered as no more than a drafting change.

(17) Mr. CABOUAT (France) wished to clarify the Committee's deliberations. He thought that the Committee should not be more royalist than the king in opposing the proposal made by the Executive Board itself. For that reason the delegation of France was in favour of the proposed amendments.
(18) He raised the question of the number of reports which the Director-General should draw up. If the Conference adopted the proposed amendment, it seemed that between the eighth and ninth sessions of the General Conference the Director-General would have to prepare and distribute three reports:

(1) from the end of the session to the end of the year;

(2) for the year in which there was no session;

(3) for the period between 1 January and the beginning of a new session of the General Conference for the year in which the General Conference met.

(19) Mr. PAGE (Canada) assumed that there would be no period of the Organization's activities which would not be covered by a report and upon which the Executive Board would not be able to comment. If that were so, his delegation proposed that the amendments under discussion should be adopted. As long as the implications of paragraph 9 of Article V were kept in mind, the authority of the Executive Board would be safeguarded without any increase in administration.

(20) Mr. SABA (Legal Adviser) considered the Committee's discussion to be very useful.
(21) The proposed amendments would in no way prejudice the Executive Board's right to make comments. It was a question not only of communicating reports to Member States and the Executive Board, but also of relieving the Board of the duty of communicating them to Member States.
(22) There was one report every year which was called the annual report. There might also be an interim report covering that part of the year previous to a session of the Conference.

(23) Mr. SIMSARIAN (United States of America) agreed with the remarks made by Mr. Saba. It must be made clear that no repetition of reporting was contemplated. A satisfactory solution might be found on the basis of the proposal submitted by the United Kingdom delegation in the Administrative Commission, to the effect that the Constitution should contain only a statement of the principle involved and that the detailed references to the matter on which reports should be submitted should be made the subject of a separate resolution. The general principle could be included in the Constitution in the form of the first sentence of paragraph 9 of Article V; the detailed procedure could then be made the subject of a separate resolution based on the amendment to paragraph 3 of Article VI, on the following lines:

"The General Conference decides,

That the Director-General shall prepare and communicate to Member States a report on the activities of the Organization covering the period from 1 January to 31 December of each year. In those years during which the General Conference shall meet in ordinary session, the Director-General shall prepare, if necessary, a report covering the activities of the Organization from the end of the preceding year. As contemplated under Article V, paragraph 9, the Chairman of the Executive Board shall present, on behalf of the Board, to each ordinary session of the General Conference, with or without comments, the above report of the Director-General."

(24) The last sentence would show that only the reports already contemplated would be submitted to the General Conference, and that the Director-General would not be required to prepare any others.

(25) Mr. WEST (United Kingdom) thanked the United States representative for his support of the United Kingdom proposal. He fully agreed with his views.

(26) Mr. PHOTIADES (Greece) expressed doubts concerning the Executive Board's future powers. In the past it had not represented Member States; if it had made no objection to the adoption of the resolution submitted to the Committee, there were particular reasons for it. Thenceforth members of the new

Executive Board would represent the governments of Member States and the situation might be entirely different.

(27) The delegate of Greece wondered whether the adoption of the proposed text would not diminish the Executive Board's authority by establishing a direct link between the Secretariat and Member States without the Executive Board being able every year, to make its opinion heard.

(28) Mr. HAGUIWARA (Japan) suggested that the United States proposal be adopted but would recommend use of the word "reports".

(29) Mr. BAUGNIET (Belgium), speaking in the name of his delegation and not as Rapporteur, disapproved of the United States proposal, explaining that in his view the Director-General's report was a juridical obligation and that the statutory text establishing it must specify how often it should be submitted. He did not think that the new draft of Article VI in accordance with the Director-General's proposal could be altered frequently and considered that the proposal made for stability.

(30) Mr. CABOUAT (France) asked the Committee to come to a decision so as to shorten the debate.

(31) Mr. WEST (United Kingdom) pointed out that the proposal to adopt a resolution rather than to amend Article VI of the Constitution was not intended to encourage the General Conference to make frequent modifications in the procedure to be followed. That would be most unsatisfactory. The main object of that proposal was to ensure maximum flexibility and to make it easier for the General Conference to modify procedure if the need arose.

(32) While fully appreciating the legal aspects of the question, he recalled that the United Nations Economic and Social Council dealt with similar cases by means of resolutions. There was no absolute necessity for Unesco to adopt the same method, but it might serve as a useful indication.

(33) Mr. SIMSARIAN (United States of America) agreed with the previous speaker. There was clearly a need for stability, and the business before the Committee showed that amendments to the Constitution provided no guarantee of such stability. A resolution by the General Conference should be considered valid and should remain in force without further action being taken by the General Conference at either its month or any subsequent sessions. It was bad policy to issue new editions of the Constitution for any changes of detail that were introduced.

(34) Mr. HAGUIWARA (Japan) thought a compromise solution should be proposed, as, in his view, it should be laid down in the Constitution that the Director-General was responsible for presenting the report but that its frequency could be laid down in the Rules of Procedure in order to avoid taking an identical decision at each biennial Conference.

(35) Mr. PHOTIADES (Greece) supported the Japanese delegate's proposal, provided that reports were submitted to the Executive Board, which was Unesco's second constitutive body.

(36) Mr. HUZAYIN (Egypt) supported the proposal of the representatives of Japan and Greece. It would simplify matters with regard to the Constitution, it would safeguard the legal point of view and ensure the greater flexibility for which the United Kingdom delegation was concerned.

(37) Mr. SABA (Legal Adviser) stated that the Rules of Procedure of the General Conference set out to lay down procedure for its work and debates. They could not therefore include provisions relating to reports to be submitted by the Director-General in the intervals between sessions. There remained the choice between a constitutional provision and a resolution. At the stage they had reached the Chairman of the Committee should perhaps call for a vote on the question.

(38) In reply to a question by the Lebanese delegate, who wished to know if a resolution could modify the Rules of Procedure in the same way as an amendment, Mr. Saba stated that he thought the obligation to present reports could usefully be included in the Constitution, which could also specify that it was the Conference's task to decide by a simple resolution on the form and frequency of such reports.

(39) Mr. SIMSARIAN (United States of America) thought that the proposal by the representative of Japan was a valuable compromise. A very general statement on the reports might be included in the Constitution, and the details dealt with elsewhere. The Japanese proposal also avoided delay in the distribution of the reports while waiting for the comments of the Executive Board.

(40) The sentence enbodying the general principle, to be included in the Constitution, might be drafted as follows:

"The Director-General shall prepare reports on the activities of the Organization, which shall be communicated to Member States and to the Executive Board."

(41) Mr. HUZAYIN (Egypt) thought that Article V, paragraph 9, should be left as amended, but that Article VI, paragraph 3, should be simplified.

(42) The CHAIRMAN took it that the representative of the United States had withdrawn his original proposal. He therefore proposed that a drafting committee, composed of the Rapporteur and the representatives of the United States and Japan, prepare a compromise draft based on the Japanese proposal.

(43) He adjourned the meeting for ten minutes.

(44) Mr. BAUGNIET (Rapporteur) read out the text of paragraph 9 of Article V of the Constitution as amended by the delegate of the Union of South Africa:

"9. The Chairman of the Executive Board shall present, on behalf of the Board, to each ordinary session of the General Conference, with or without comments, the reports on the activities of the Organization which the Director-General is required to prepare in accordance with the provisions of Article VI. 3(b)."

(45) After a discussion, this draft was adopted.

(46) The CHAIRMAN, turning to the amendments to Article VI, paragraph 3, said the drafting committee proposed that the following text be added to the body of paragraph 3 as contained in the Constitution:

"The Director-General shall prepare and communicate to Member States and to the Executive Board periodical reports on the activities of the Organization. The General Conference shall determine the periods to be covered by these reports."

(47) Mr. SABA (Legal Adviser) stated that reports to Member States could be communicated only by the Director-General of Unesco, while any other member of the Secretariat, appointed by him, could replace him at all official meetings.
(48) He also suggested that the proposed amendment to paragraph 3 of Article VI should form a separate paragraph 3b.

(49) Mr. HUZAYIN (Egypt) was not opposed to the proposal of the Legal Adviser. The new sub-paragraph, however, had little relation with the first part of paragraph 3, and it would perhaps be more satisfactory to include it in Article VI as a separate paragraph 7. That would avoid any change in the numbering of the other paragraphs.

(50) The CHAIRMAN, taking into account a suggestion by the representative of France, said that the proposal before the Committee was that the existing text of Article VI, paragraph 3, be renumbered 3a, and the new text submitted by the drafting committee added as paragraph 3b.

(51) The proposal was unanimously adopted.

(52) With regard to the resolution to be submitted to the General Conference, the CHAIRMAN pointed out that the Committee would have to inform the Conference, through the Administrative Commission, that it wished it to determine the periods to be covered by the reports.
(53) The draft text of the resolution as submitted by the drafting committee was as follows:

"The General Conference, having considered Article VI, paragraph 3b, of the Constitution, decides:

That the Director-General shall prepare and communicate to Member States and to the Executive Board

(1) A report on the activities of the Organization covering the period from 1 January to 31 December of each year;

(2) In those years during which the General Conference shall meet in ordinary session, if necessary an interim report covering the activities of the Organization from the end of the preceding year."

(54) Mr. PHOTIADES (Greece) asked that the Executive Board be placed before the Member States in the passage dealing with the sending of the Director-General's report. He explained that that was a question of fact and form which should be respected.

(55) Mr. BAUGNIET (Rapporteur) preferred the reverse order.

(56) Mr. SIMSARIAN (United States of America) thought the drafting committee had agreed that the words "if necessary" in the last part of the resolution, should come immediately after the words "an interim report".

(57) Mr. SABA (Legal Adviser) thought that the alteration proposed by the Greek delegate should not attempt to determine the order of presenting reports.
(58) He thought that the Board should appear after Member States as it was to them that the Director-General's reports were addressed. Member States should for that reason be considered as the addressees of those reports.

(59) Mr. PHOTIADES (Greece) said he fully understood the point of view of the Legal Adviser. All he feared was that the reports would be sent direct to the governments of Member States, avoiding the intermediary stage of the Executive Board, which represented the General Conference. That would mean that the Executive Board no longer exercised any check.
(60) Mr. Photiades added that he had no fears as regards the existing Director-General but that permanent rules should be drawn up so as to eliminate possible mishaps in the future.

(61) Mr. SABA (Legal Adviser) was frankly of the opinion that reports were addressed to Member States. They would also be communicated to the Board, which could comment on them, if it wished.

(62) Mr. SIMSARIAN (United States of America) wanted to be sure that the distribution of the reports would not be delayed while waiting for the Executive Board to meet. If the reports were published in January, and the Executive Board only met in May, the reports would be distributed on publication and the Board would comment on them when it met and circulate its comments to Member States. That was his understanding of the situation.
(63) It should furthermore be made clear that the interim report would also be communicated to Member States; both reports should be prepared by the Director-General and communicated to Member States and to the Executive Board.

(64) The CHAIRMAN replied that the points raised by the United States representative were covered by the draft text of the resolution submitted by the drafting committee. He invited the Legal Committee to vote on that draft resolution.

(65) The draft resolution as submitted by the drafting committee was unanimously adopted.

The meeting rose at 1 p.m.

# FIFTH MEETING

*26 November 1954 at 3.30 p.m.*

*Chairman:* Mr. HUZAYIN (Egypt)

**DRAFT AMENDMENT TO THE CONSTITUTION, AND OTHER PROVISIONS, CONCERNING THE WITHDRAWAL OF MEMBER STATES** (documents 8C/ADM/6 and Add.1, 2, 3, 4)

(1) Mr. SABA (Legal Adviser) recalled that the General Conference at its second extraordinary session, in July 1953, had decided that Unesco should follow the example of other Specialized Agencies by inserting in its Constitution a clause concerning possible withdrawals by Member States.
(2) In accordance with a General Conference resolution and a recommendation by the Executive Board, the Director-General had therefore submitted to the Conference, within the regulation time-limit, two draft amendments to Article II of the Constitution. The first of those resolutions envisaged unilateral withdrawal, i.e. that the Member State concerned should simply give notice of its withdrawal, The second resolution stipulated that a withdrawal must be accepted by a two-thirds majority of the General Conference.
(3) As the Administrative Commission had decided that the first draft alone should serve as a basis for a Constitutional amendment, the second did not need to be examined, nor did the Cambodian delegation's proposal to amend it.
(4) Mr. Saba read out the first draft, which appeared on page 2 of document 8C/ADM/6, and said that it had given rise to three proposed amendments, submitted by the Belgian, United States and Australian delegations respectively. The third of these proposals had been withdrawn.
(5) The Belgian delegation's draft amendment provided for the withdrawal of a Member State on 31 December of the year following that during which notice was given. The United States delegation's amendment stipulated that the financial obligations of the State should continue throughout the financial period in which its withdrawal took effect.
(6) Mr. Saba said that those two drafts were in keeping with the spirit of the draft amendment to the Constitution. He added that, in conformity with the Financial Regulations and the Constitution, Member States were required to pay the contributions due for the whole financial period, and he asked the Committee to examine the Belgian and United States drafts in turn.

(7) Mr. WEST (United Kingdom) supported the first draft of Article II. 6 as it appeared on page 2 of document 8C/ADM/6, and, subject to an explanation of the Belgian amendment, was willing to accept it with the exception of one small point, to which he would refer later.

(8) Mr. BAUGNIET (Belgium) said that, in submitting its draft resolution, the Belgian delegation had aimed at simplifying procedure. As Unesco had adopted the calendar year for the division of its work, it seemed to him that it would be easier if the obligations of a Member State which had given notice of withdrawal were to cease with the end of that year.
(9) The Belgian delegate thought that the ideal solution would doubtless be to take the end of the budgetary period as the end of a State's obligations but, since that period might extend in extreme cases to four years, it seemed unlikely that such a solution could be adopted.

(10) Mr. WEST (United Kingdom) believed that his interpretation coincided with the explanation given by the delegate of Belgium. It appeared also to coincide with the substance of the United States amendment.
(11) He asked how long the period of financial obligation would last. The question of financial obligation should be considered at the same time as the question of notice and one phrase should be found to cover both questions.

(12) Mr. SIMSARIAN (United States of America) thought that the delegate of the United Kingdom was correct in suggesting that the two questions should be considered together. The United States delegation supported the Belgian proposal. It felt that the two questions should be synchronized and that the financial obligation cover the same period as the notice, while the State concerned would still be effectively a Member of the Organization. Any withdrawal from the Organization should not affect financial obligations to the Organization up to the effective date of that withdrawal.

(13) The Legal Committee agreed to accept the principle of the Belgian amendment, and Article II. 6 would be amended accordingly.

**PROPOSAL ON THE WITHDRAWAL OF MEMBER STATES SUBMITTED BY THE DELEGATION OF THE UNITED STATES OF AMERICA** (document 8C/ADM/6 Add.2)

(15) Mr. SIMSARIAN (United States of America) formally withdrew the United States proposed amendment, but suggested a slight change in the text of Article II. 6 as it stood in document 8C/ADM/6. He proposed that the last sentence of the first paragraph of that Article should read "no such withdrawal shall affect the financial obligations owed to the Organization on the date the withdrawal takes effect".

(16) Mr. WEST (United Kingdom) pointed out that the word "State" after the words "Associate Member" should be deleted.

(17) Mr. SABA (Legal Adviser) read out the version of Article II. 6 resulting from the proposed amendments.

"Any Member State or Associate Member State of the United Nations Educational, Scientific and Cultural Organization may withdraw from the Organization by notice addressed to the Director-General. Such notice shall take effect on 31 December in the year following that during which the notice was given. No such withdrawal shall affect the financial obligations owed by the State concerned towards the Organization at the date when the notice takes effect. Notice of withdrawal by an Associate Member State shall be given on its behalf by the Member State or other authority having responsibility for its international relations."

(18) Approved.

**DRAFT AMENDMENT TO THE RULES OF PROCEDURE OF THE GENERAL CONFERENCE (document 8C/ADM/3 (III))**

(19) Mr. SABA (Legal Adviser) said that at its sixth session the General Conference had adopted a resolution granting to Associate Members the same rights as to full Member States, except for voting rights, but that it seemed necessary to bring the Rules of Procedure into line with that decision, and that was the purpose of document 8C/ADM/3 (III).

(20) The CHAIRMAN asked the Committee if it approved the procedure suggested by Mr. Saba.

(21) Mr. WEST (United Kingdom) suggested that it might save time if only amendments to which there was an objection were discussed. It would of course be necessary to discuss any amendments to which further amendments had been submitted.

(22) Mr. SABA (Legal Adviser) agreed with the United Kingdom delegate in thinking that, once the principle had been admitted, the addition of the words "and Associate Member States" after "Members" need not be examined in detail rule by rule. But, with regard to Rule 24, he thought it advisable to discuss the proposed amendment; some members might doubt the need for it, as it would give an Associate Member the right to oppose the admission of a representative to the Conference.

(23) Mr. WEST (United Kingdom) considered that, since the Rule had been altered to include Associate Members, if the word "Member" appeared on its own, the intention was not to include "Associate Members".

(24) Mr. CABOUAT (France) wished to know whether the Conference, when determining the status of Associate Members, had intended to give them the same powers as full Members, except for voting rights.

(25) Reverting to the text of resolution 41.21, adopted by the General Conference at its sixth session, Mr. SABA (Legal Adviser) said that in principle an Associate Member had the right to submit suggestions and to oppose certain motions, which implied that it could express disapproval of the admission of a representative; only voting rights were denied.

(26) Mr. Saba explained that he had merely wished to draw the Committee's attention to Rule 24, but that he would raise no objection if it were decided to include the proposed amendment.

(27) Mr. BAUGNIET (Rapporteur) thought it preferable to adopt that amendment, for in his opinion it was advisable to state exactly what would happen if an Associate Member questioned the qualifications of a representative; otherwise it might be supposed that Rule 24 would not apply when the opposition came from an Associate Member, and that the delegate whose qualifications were questioned could not take his seat at the Conference, even provisionally.

(28) Mr. CABOUAT (France) agreed with the Belgian delegate's point of view.

(29) All the amendments providing for the addition of the words "and Associate Member(s)" after "Member(s)" were approved.

Rule 30

(30) Mr. SABA (Legal Adviser) said that it had appeared necessary to add a new paragraph to Rule 30 in order to reserve to representatives of Member States alone the posts of president and vice-president of the General Conference together with those of chairmen, vice-chairmen and rapporteurs of commissions and committees.

(31) Mr. BAUGNIET (Rapporteur) suggested that in this new paragraph the word "other" before "subsidiary bodies" should be deleted.

(32) With this modification the amendment to Rule 30 was approved.

Rule 47

(33) Mr. SABA (Legal Adviser) said that, as Rule 30 had been amended, it also seemed necessary to amend Rule 47 dealing with the election of various officers on the General Committee of the Conference. However, in place of the amendment suggested in Annex I of document 8C/ADM/3 (III) and that submitted by the delegation of the Union of South Africa, he would prefer another amendment, consisting in the addition to Rule 47 of a new paragraph as follows: "The provisions of Rule 30, paragraph 4, shall apply to the present Rule."

(34) The Legal Committee adopted this proposal.

(35) Mr. WEST (United Kingdom) asked whether the Committee had intended to agree to the amendment to Rule 94 proposed by the South African delegation, to which Mr. SABA (Legal Adviser) replied that the

amendment proposed by the South African delegation was divided into two parts. The Committee had dealt only with the part referring to Rule 47.

Rule 69

(36) Mr. BAUGNIET (Rapporteur) thought the amendment was unnecessary since paragraph 1 had not been amended.

(37) Mr. WEST (United Kingdom) drew attention to the fact that the United Kingdom proposal, which would have had the same effect, had been missed out of the list of amendments submitted. He agreed that the proposed amendment to Rule 69 was unnecessary.
(38) The United Kingdom delegation had proposed a further amendment to paragraph 2 of Rule 69. It was a question of drafting, involving the use of the English word "constitute". In English the word "constitute" would refer to all persons taking part in the Conference, when what was actually meant was all full members. Associate Members could not be counted towards a quorum. He proposed that the words "are members of" should be substituted for the word "constitute" in paragraph 2.

(39) Agreed.

Rule 78

(40) Mr. WEST (United Kingdom) said that the United Kingdom proposal contained in document 8C/ADM/3 (III) Add. 2 was to delete the amendment proposed to Rule 78 (document 8C/ADM/3 (III)Annex I).
(41) That proposal had been made by the United Kingdom delegation because it felt that, if there were no mention of Member States in a Rule, it was not necessary to make specific reference to Associate Members. If Associate Members were not specifically excluded, the Rule would apply to them as well as to Member States.

(42) The proposed amendment to Rule 78 was rejected.

**DRAFT SUBMITTED BY THE UNITED KINGDOM TO AMEND CERTAIN AMENDMENTS TO THE RULES OF PROCEDURE PROPOSED IN DOCUMENT 8C/ADM/3 (III) ANNEX 1**
(document 8C/ADM/3 (III) Add.2)

Rules 3(1) and 5(1)

(43) At the request of Mr. CABOUAT (France), the Committee again examined the amendments proposed to Rules 3(1) and 5(1).

(44) Mr. BAUGNIET (Rapporteur) said that the effect of the amendments proposed by the British delegation would be to deny Associate Members the right to invite the General Conference to hold a session on their territory, or to be included among States allowed to request that an extraordinary session be convened.
(45) The Belgian delegate thought that in the first case, which was not connected with voting rights, it was difficult to give a negative reply; on the other hand, the convening of an extraordinary session of the Conference was closely connected with voting rights, and Mr. Baugniet thought that the Associate Members should not be allowed to make such a request.

(46) Mr. SIMSARIAN (United States of America) supported the mention of the Associate Members.

(47) Mr. WEST (United Kingdom) remarked that the United Kingdom delegation was not raising policy objections to an Associate Member's being given the right to invite the General Conference to hold a session in its territory, but had been obliged to consider whether the proposed amendment to paragraph 1 of Rule 3 was consistent with the terms of the resolution adopted by the General Conference which governed the rights of Associate Members. That resolution referred clearly to the conduct of business of meetings, but did not contain any clear provision on the prior question of where meetings should be held. Certain practical difficulties might arise, e.g. of a legal character, concerning such matters as the guarantee of privileges and immunities to representatives of Member States if meetings should be held in territories not responsible for their own international relations. The United Kingdom delegation had therefore proposed the deletion of the amendment to paragraph 1 of Rule 3, but it had no strong feelings on the question.
(48) In answer to the delegate of France, who had asked his opinion on the principle that Associate Members should only be permitted to extend such an invitation through the power responsible for their international relations, Mr. West said that he would have preferred notice of such a question, but it occurred to him that some might argue that, if Associate Members were given the right to issue invitations, they were entitled to issue them direct. The United Kingdom would not agree with such a view, but in any case thought that the right to issue invitations was clearly meant under the Constitution to apply only to Member States, and, if the United Kingdom amendment were accepted, the point referred to by the delegate of France would not arise. If, on the other hand, the United Kingdom's interpretation of the Constitution were not accepted, it would be necessary to amend Rule 4 consequentially to refer to Associate Members. The United Kingdom delegation proposed however that Rule 4 should remain as it was and that no reference should be made to Associate Members in paragraph 1 of Rule 3.

(49) The United Kingdom proposal was adopted, the delegate of Egypt opposing it.

(50) Mr. WEST (United Kingdom) said that a different point arose in paragraph 1 of Rule 5, if the words Associate Members were added. If Associate Members were to be allowed to form part of the one-third of Members requesting an extraordinary session of the General Conference, it would amount to giving them the right to vote. He supported the principle that Associate Members should be allowed to express opinions on any matter, but doubted whether it had been the intention to give them what was in the case in point tantamount to the right to vote. He did not feel strongly on that point,

however, and, if necessary, was prepared to withdraw his proposal.

(51) Mr. SABA (Legal Adviser) agreed with the United Kingdom delegate and wished to add a legal argument to the reasons the latter had put forward. If it were decided that the Conference should put Associate Members on an equal footing with Member States with regard to convening extraordinary sessions, not only would Rule 5 of the Rules of Procedure have to be amended, but the Constitution as well. He regretted that that point had not been borne in mind when the draft amendment was presented, and advocated that Rule 5 be retained in its existing form, adding that the General Conference could at its next session consider amending the Constitution on that point.

(52) The United Kingdom delegate's proposal was approved.

Rule 28

(53) In reply to Mr. SIMSARIAN (United States of America), who asked whether the Committee had examined the draft amendment submitted by the United Kingdom delegation, proposing that the words "and Associate Members" be added after "Member States" in paragraph 1 of Rule 28, Mr. SABA (Legal Adviser) said that in practice the Credentials Committee examined the credentials of delegations from Associate Member States as well as those from Member States. However, he realized that it would be wise to state that specifically.

(54) The draft amendment concerning Rule 28 was approved.

Rule 94

(55) Mr. SABA (Legal Adviser) recalled the terms of Rule 92, which dealt with the acceptance by any State, not a member of the United Nations but wishing to become a Member of Unesco, of all the obligations of membership.
(56) He said that their acceptance was necessary a fortiori on the part of an Associate Member, which did not have to ratify or sign the Constitution, and that was the reason for the proposed amendment; it seemed to him logical and necessary.

(57) Mr. WEST (United Kingdom) pointed out that, in view of the decision of the Committee concerning Article VI of the Constitution, which had been taken at the morning meeting (document 8C/JUR/SR. 4), the numbering of the new Rule 94 A was wrong.
(58) He did not think that the new Rule should be part of Rule 94 and it was not quite the same as Rule 93. He suggested that the new Rule 94 A should be numbered Rule 93 and that all subsequent Rules be renumbered.

(59) Mr. SABA (Legal Adviser) thought that in that case it would be better to add a paragraph to Rule 92, which would consist of two sections:
(a) the existing paragraph which dealt with States not members of the United Nations;
(b) the new paragraph, dealing with Associate Members.

(60) Mr. WEST (United Kingdom) accepted Mr. Saba's proposal.

(61) Mr. SIMSARIAN (United States of America) did not think that it would be wise to use the letters (a) and (b) for numbering the paragraphs, as the only paragraphs so numbered in the Rules of Procedure were concerned with transitional measures. He thought that the paragraphs should be numbered in conformity with existing practice, namely, (1) and (2).

(62) Mr. SABA (Legal Adviser) suggested that Rule 92 be entitled "Requests for admission" and that paragraphs 1 and 2 be headed "States not members of the United Nations" and "Associate Members" respectively.

(63) Mr. BAUGNIET (Rapporteur) pointed out that, if Rule 92 were entitled "Requests for admission", confusion might arise with regard to Rule 93 "Consideration of applications". In his opinion the new paragraph might be 92 a, which would show that it was an additional clause, independent of what followed.

(64) Mr. WEST (United Kingdom) pointed out that Rule 92, and the new paragraph which it had been proposed to add to Rule 92, were on the same subject; he proposed that the heading to Rule 92 should be altered in such a way as to include both cases. It might read: "States not members of the United Nations and Associate Members."

(65) Mr. SIMSARIAN (United States of America) supported the United Kingdom proposal.

(66) Mr. BAUGNIET (Rapporteur) saw no possibility of finding a common title for two such different clauses. He therefore recommended a paragraph 92. 1 with the heading already appearing in the Rules of Procedure, and a paragraph 92. 2 with the heading suggested in the draft amendment.

(67) Mr. CABOUAT (France) observed that, in order to standardize the wording of the document, it would be advisable to put "State" in the plural in the heading of Rule 92 in the French text.

(68) Mr. SIMSARIAN (United States of America) said that, if the Legal Committee felt that the two matters were separate, it would be necessary to put them in separate Rules. Subsequent Rules would then have to be renumbered.

(69) The CHAIRMAN put to the vote the Rapporteur's proposal to number the new Rule 92 bis.

(70) The proposal was rejected.

(71) He then put to the vote the proposal that the new paragraph should be added to Rule 92, that the two paragraphs should be numbered (1) and (2) and that they should appear under one comprehensive heading.

(72) Approved.

(73) Mr. SABA (Legal Adviser) hoped that the Committee would decide to add the words "and Associate Members" after "Member States" in Rules 103, 104 and 105 and in all draft amendments sent to Associated States.

(74) Approved.

**AMENDMENTS TO RULE 40 OF THE RULES OF PROCEDURE**
**(document 8C/ADM/3 (III) Annex II)**

(75) Mr. SABA (Legal Adviser) said that the object of the draft amendment to Rule 40 was to standardize and legalize the procedure followed at the last extraordinary session of the General Conference, when electing an acting President in place of the Conference President, who had been suddenly recalled by his government.

(76) Approved.

**AMENDMENT TO RULE 30 OF THE RULES OF PROCEDURE**
**(document 8C/ADM/3 (III) Annex III and document 8C/DR/65)**

(77) Mr. SABA (Legal Adviser) said that the Chilean delegation had submitted an amendment to the draft amendment contained in Annex III of document 8C/ADM/3 (III).
(78) In reply to a question by the French delegate Mr. Saba said he did not know the reason for the Chilean delegation's draft amendment.

(79) Mr. BAUGNIET (Rapporteur) thought he could explain the intentions of the Chilean delegation be reminding the meeting that the way in which the Nominations Committee had presented its proposals for the different offices on the General Committee of the present Conference had surprised many delegates, and it had seemed necessary to protest against such a procedure.

(80) Mr. WEST (United Kingdom) thought that the Nominations Committee had accepted the list of candidates out of convenience. Under the provisions of paragraph 1 of Rule 30, it had the right itself to put forward a list of nominations and was not compelled to adopt the list submitted to it by the Executive Board. The present text of Rule 30 was legally correct.

(81) The CHAIRMAN remarked that he was not a lawyer, but thought that the Executive Board had no supreme powers during a session of the General Conference and that the Nominations Committee should take the initiative in preparing lists of nominations. In practice, however, the position was different. Disappointment had been caused in certain cases through the adoption of the list submitted by the Executive Board.
(82) He supported the Chilean amendment in principle, but thought its preamble too strong.

(83) Mr. PAGE (Canada) asked if it would be possible to hear a statement from the delegate of Chile, who happened to be present, on the basic reason underlying that delegation's proposal.

(84) Mr. VASSALLO ROJAS (Chile), who had drafted document 8C/DR/65, said that it was the result of the experience of the Chilean delegation at the present General Conference. Although Rule 30 seemed to indicate that the Nominations Committee determined the list of candidates, that in fact had not happened at the present session. There was some indication that, in accordance with tradition, recommendations made by the Executive Board had to be accepted. The Chilean delegation submitted its draft resolution to avoid the possibility of incidents of that kind.

(85) Mr. WEST (United Kingdom) thanked the delegate of Chile for his statement. It was purely a question of convenience that had made the Nominations Committee adopt the list submitted by the Executive Board.
(86) The proposal amounted to a substantive amendment and, as the Legal Committee was not competent to discuss such amendments, he proposed that it should refer it back to the Administrative Commission and ask for instructions.
(87) This proposal was supported by the delegate of France.

(88) Mr. SIMSARIAN (United States of America) supported the principle of the Chilean amendment. He did not consider that there was any need for the Executive Board to submit a list of nominations.
(89) He proposed that the Legal Committee should report to the Administrative Commission that no legal problem was involved, so that the Administrative Commission could take a decision without having to refer it back to the Legal Committee.

(90) Mr. BAUGNIET (Rapporteur) agreed with the United Kingdom delegate with regard to the competence of the Committee.
(91) He observed that, under Rule 30 as it appeared in the Rules of Procedure, the Nominations Committee was completely free to submit to the Conference different proposals from those made by the Executive Board.
(92) He suggested that the purpose of the Chilean amendment could equally well be achieved by a purely formal change in the present text of paragraph 1, which would read as follows: "On information received from the Executive Board, the Nominations Committee shall determine and submit....."

(93) The CHAIRMAN put to the vote the proposal made by the United Kingdom delegate and supported by the French and Japanese delegates.

(94) Approved by 5 votes to 3.

**DRAFT AMENDMENTS TO RULES 25, 26 AND 73**
**(document 8C/ADM/3 (III) Annex IV)**

(95) Approved.

**DRAF AMENDMENT TO RULE 106 (document 8C/ADM/ (I))**

(96) Approved.

The meeting rose at 6 p.m.

# SIXTH MEETING

*2 December 1954 at 10 a.m.*

*Chairman*: Mr. AWAD (Egypt)

**VARIOUS QUESTIONS REGARDING THE PROCEDURE FOR THE ELECTION OF MEMBERS OF THE EXECUTIVE BOARD**

(1) The CHAIRMAN said that the subject had been raised in the General Committee and had been referred to the Legal Committee in its legal aspects. The Secretariat had on the other hand circulated a paper on the conduct of elections by secret ballot, which was submitted for the consideration of the Committee as document 8C/DIV/133.
(2) He invited the Legal Adviser to introduce the subject.

(3) Mr. SABA (Legal Adviser) said that, with regard to the procedure for the election of members of the Executive Board, the Legal Committee had been requested to report to the General Committee on the three following questions:
1. Would a ballot paper carrying fewer names than the number of vacancies be valid?
2. In what circumstances could candidates whose names had not been approved by the Nominations Committee, be considered eligible?
3. What action should be taken to remove the contradiction between Article IV. 8. a of the Constitution and Rules 88 and 89 of the Rules of Procedure of the General Conference?

(4) On the proposal of Mr. HAGUIWARA (Japan), the Committee decided to take the third question first.

(5) Mr. SABA (Legal Adviser) explained that paragraph 2 of Rule 88, and Rule 89, of the Rules of Procedure were not in keeping with Article IV. 3. a of the Constitution, as they permitted the election of candidates in the second ballot who had obtained no more than a plurality, while Article IV. 8. a stipulated that decisions of the Conference should be taken by an "absolute majority", i. e. by 50% plus one of the votes.

(6) Mr. CABOUAT (France) observed that the Constitution took precedence of the Rules of Procedure. He therefore proposed that Rules 88 and 99 of the Rules of Procedure should be amended so as to bring them into line with Article IV. 8. a of the Constitution.

(7) This proposal was seconded by Mr. HAGUIWARA (Japan).

(8) The CHAIRMAN pointed out that the rules for the conduct of elections by secret ballot adopted by the General Conference at its sixth session laid down that a candidate to be elected needed to obtain the majority required by Rules 88 or 89 of the Rules of Procedure.

(9) Mr. BLANCO ACEVEDO (Uruguay) stated that paragraph 8a of Section C of Article IV of the Constitution required a simple majority, while Rule 88 (2) of the Rules of Procedure said that a relative majority was needed. In view of that discrepancy he recommended that the Constitution should prevail and that the necessary amendment be made in the Rules of Procedure to bring them into line with the Constitution.

(10) Sir Kenneth GRUBB (United Kingdom) supported the views expressed by the representative of France.

(11) The CHAIRMAN drew attention to paragraphs 17 and 18 of the Rules adopted by the General Conference for the conduct of elections by secret ballot, with particular reference to the definition of "absolute majority" in the first ballot under Rules 88 and 89 of the Rules of Procedure. The definitions adopted by the General Conference in 1951 were still binding and it was for the Legal Committee to accept them or alter them.

(12) Mr. SABA (Legal Adviser) said that the contradiction between Rules 88 and 89 of the Rules of Procedure and Article IV. 8. a of the Constitution could be removed by the following amendments:
(13) In paragraph 1 of Rule 88, delete the words "in the first ballot". Delete paragraphs 2 and 3 of Rule 88 in their entirety.
(14) In Rule 89, first sentence, delete the words "in the first ballot" and delete the second sentence in its entirety.
(15) In document 8C/DIV/133 (Rules for the conduct of elections by secret ballot, extract from the Resolutions of the sixth session of the General Conference), the last sentence of paragraph 17 should be amended to read:
"Fifty per cent plus one of the votes recorded shall constitute the absolute majority required under Rules 88 and 89."

(16) Mr. KOTSCHNIG (United States of America) agreed that it was preferable to alter the Rules of Procedure rather than the Constitution. However, in order to avoid an indefinite number of drawn votes, with the votes being continually recast for the same candidates, the most practical solution would be to replace Rules 88 and 89 of the Organization's Rules of Procedure by the corresponding Rules of the Rules of Procedure of the General Assembly of the United

Nations. Rule 88 would then read:

"When only one person or member is to be elected and no candidate obtains in the first ballot the majority required, a second ballot shall be taken which shall be restricted to the two candidates obtaining the largest number of votes. If in the second ballot the votes are equally divided, the President shall decide between the candidates by drawing lots."

(17) Rule 89 would read

"When two or more elective places are to be filled at one time, those candidates obtaining in the first ballot the majority required shall be elected. If the number of candidates obtaining such a majority is less than the number of persons or members to be elected, there shall be additional ballots to fill the remaining places, the voting being restricted to the candidates obtaining the greatest number of votes in the previous ballot to a number not more than twice the places remaining to be filled."

(18) The same principle would thus be embodied in both Rules, and the discrepancy between the Constitution and the Rules of Procedure would be eliminated.

(19) Mr. PHOTIADES (Greece) supported the proposal to adopt the wording of the Rules of Procedure of the General Assembly of the United Nations.

(20) Mr. WEST (United Kingdom) was in favour of radically amending Rules 88 and 89 and the relevant paragraphs in the Rules for the conduct of elections by secret ballot adopted by the General Conference at its sixth session. That would make it possible to avoid the difficulties connected with the notion of "absolute majority".

(21) The CHAIRMAN assumed that the Committee was in favour of substituting the relevant Rules of Procedure of the General Assembly of the United Nations for Rules 88 and 89, and invited a drafting committee, composed of the representatives of the United Kingdom, the United States of America, France and Japan, as well as of the Legal Adviser and the Rapporteur, to propose an exact text.

(22) He suspended the meeting for 10 minutes.

(23) The meeting having resumed, Mr. SABA (Legal Adviser) submitted the following proposals which took into account the exchange of views that had taken place:

(24) In paragraph 1 of Rule 88 the words "in the first ballot" would be deleted.

(25) Paragraphs 2 and 3 of the same Rule would be replaced by the texts quoted by Mr. Kotschnig from the Rules of Procedure of the United Nations General Assembly. Mr. Saba read out the texts again, adding that the French version would be brought into line with that of the Rule in question.

(26) Rule 89 would also be replaced by the text proposed by Mr. Kotschnig.

(27) Mr. KOTSCHNIG (United States of America), supported by the representative of the United Kingdom, proposed that, in order to eliminate entirely the difficulty arising from the notion of "absolute majority", the first sentence of Rule 88 be deleted; he pointed out that it was already implied in the text of the Rule as adopted by the drafting committee.

(28) Mr. CABOUAT (France) remarked that the phrase "absolute majority" was not an appropriate term to designate a number of votes equal to "fifty per cent plus one of the votes".

(29) Mr. SABA (Legal Adviser) observed that under Mr. Kotschnig's proposal no more than the "required majority" would now be necessary under paragraph 88. He therefore invited the Committee to approve that proposal. In that event the words "absolute majority" should also be deleted from the last sentence of Rule 17 of the Rules for the conduct of elections by secret ballot (document 8C/DIV/133). This sentence should then read:

"Fifty per cent plus one of the votes recorded shall constitute the majority required under Article IV. 8a of the Constitution and Rules 88 and 89 of the Rules of Procedure of the General Conference."

(30) The Committee said it was prepared to approve the amendments just mentioned by Mr. Saba to the following paragraphs or Rules: Rule 89 and paragraphs 1 and 2 of Rule 88 of the Rules of Procedure; Rule 17 of the Rules for the conduct of elections by secret ballot.

(31) With regard to Rule 88, paragraph 3, Mr. HAGUIWARA (Japan) observed that the drawing of lots between two candidates who had obtained the same number of votes was contrary to the Rules of the Constitution, since ultimately it might lead to the election of a candidate who had not obtained the required majority.

(32) Mr. SABA (Legal Adviser) considered that legally Mr. Haguiwara was right and that the proposed drawing of lots was not really compatible with the provision that no candidate should be elected without having obtained the required majority.

(33) Mr. KOTSCHNIG (United States of America) pointed out that the incompatibility mentioned by Mr. Saba was not absolutely true. The system proposed, if accepted, meant in fact conferring on the Chair a right of vote which the Chair would use in favour of the candidate designated by the draw, thus permitting him to obtain the required majority.

(34) Mr. WEST (United Kingdom) observed that the system of drawing lots was sanctioned by numerous precedents.

(35) Mr. HAGUIWARA (Japan) none the less thought it incongruous that a Director-General, for example, might ultimately be elected by drawing lots.

(36) Mr. BLANCO ACEVEDO (Uruguay) agreed with the Japanese delegate. In important votes the final decision should not be left to chance but to the conscience of delegates. It would hardly seem serious to leave it to chance. He preferred and therefore recommended that the ballot should continue until it clearly reflected the opinion of delegations.

(37) Mr. MERMINOD (Switzerland) also shared the Japanese delegate's opinion.

(38) Mr. CABOUAT (France) asked Mr. Saba to describe the practice in other international organizations.

(39) Mr. SABA (Legal Adviser) replied that, as the United States delegate had already stated, the Rules of Procedure of the United Nations General Assembly permitted the drawing of lots when there was an equal number of votes in the second ballot for two candidates to one post. Not all the Specialized Agencies had adopted that procedure, the ILO, for instance, followed another method.

(40) In reply to a remark by Mr. HAGUIWARA (Japan) regarding the system used in certain parliaments of giving the Chair an additional vote in case of an equal division in the voting, Mr. SABA (Legal Adviser) pointed out that there was a considerable difference between a parliament and an intergovernmental organization. At the General Conference it was States and not deputies who ha he right to vote. But the State to which the President or Chairman belonged already had a vote which was exercised by another member of the delegation appointed to represent it at the Conference.

(41) Mr. BAUGNIET (Rapporteur) and Mr. MERMINOD (Switzerland) approved Mr. Saba's observations.

(42) Taking into account the exchange of views which had just taken place, Mr. HAGUIWARA (Japan) proposed that paragraph 3 of Rule 88 be replaced by a clause stating that in the event of an equal division at the second ballot, further ballots must be held until the required majority was obtained.

(43) Upon the Committee's taking a vote on the Japanese proposal, it was found that an equal number of votes had been cast on either side.

(44) Mr. JARAMILLO ARANGO (Colombia) suggested as a compromise that the Japanese proposal should be discarded in favour of another, viz. that a third ballot should be held and, if both candidates still obtained the same number of votes, then lots should be drawn. He asked the Secretariat to draft a resolution to that effect.

(45) Mr. CABOUAT (France) seconded the Colombian delegate's proposal.

(46) The CHAIRMAN invited the Committee to vote on the substance of the proposal, leaving it to Mr. Saba to find a suitable draft later.

(47) The Colombian proposal was adopted by 9 votes to 1, with no abstentions.

(48) Mr. HAGUIWARA (Japan) explained that in voting against the Colombian proposal he had been prompted solely by a legal doubt, for, as he had already said, he felt that to draw lots was at variance with Unesco's Constitution.

(49) The CHAIRMAN invited the Committee to study the second question on which the General Committee had asked it to come to a decision - the validity or invalidity of certain ballot papers.

(50) Mr. BAUGNIET (Rapporteur) indicated the changes which he thought should be made in Rules 13 and 14 of the Rules of Procedure concerning the conduct of elections by secret ballot.

(51) Mr. Baugniet's proposals were seconded by the United States and United Kingdom delegates and approved.

(52) The CHAIRMAN invited the Committee to take a decision on the question as to the conditions in which candidates could be regarded as eligible whose names had not been approved by the Nominations Committee.

(53) Mr. SABA (Legal Adviser) recalled that, in conformity with the decisions recently taken, the clause which stipulated that "Only delegates nominated either by the Nominations Committee or by two delegations, before the ballot, may stand for election (to the Executive Board)" had been struck out from Rule 95 of the Rules of Procedure of the General Conference. That being so, he considered that the rôle of the Nominations Committee was now a purely advisory one and that all candidates nominated by Member States were in fact eligible, irrespective of what the Nominations Committee felt about them.

(54) Mr. HAGUIWARA (Japan) accepted Mr. Saba's interpretation but wished to know until when it was open to Member States to nominate candidates.

(55) Mr. SABA (Legal Adviser) thought nominations would be acceptable until the ballot was taken. The second and later ballots could however only apply to those candidates not so far elected who had obtained the largest number of votes in the preceding ballots.

(56) Mr. BAUGNIET (Rapporteur) added that the number of names on the ballot papers must always be equal to the number of vacancies still to be filled.

(57) The Committee approved the foregoing interpretation of the provisions regarding the nomination of candidates.

(58) The Committee then examined the following question. interpretation of Article V, paragraph 3, of the Constitution (eligibility for re-election of Executive Board Members) (document 8C/JUR/4).

(59) The CHAIRMAN recalled that Article V, paragraph 3, of the Constitution dealt with the re-eligibility of members of the Executive Board. A memorandum had been prepared on the subject by the Japanese delegation (document 8C/JUR/4), which the Committee had before it.

(60) Mr. HAGUIWARA (Japan) had very little to add to the memorandum submitted by his delegation, but thought it desirable that Mr. Saba should offer the Committee his comments.

(61) Mr. SABA (Legal Adviser) recalled that Article V. 3 of the Constitution stipulated that members completing their term of office on the Executive Board were immediately re-eligible for a second term, but that they could not sit for more than two consecutive terms. Having regard to the change in the Board's structure, the question now was whether terms or parts of terms during which any particular individual had sat on the former Board should or should not be taken into account with regard to his re-eligibility to the new Board.

(62) Mr. BAUGNIET (Rapporteur) thought the reply was in the affirmative. He saw no reason for distinguishing between the old and the new Board with regard to re-eligibility.

(63) Mr. KOTSCHNIG (United States of America) said that, in addition to the two extreme interpretations given in the Japanese memorandum, there was a third interpretation, which, he thought, should be taken into account. That was the case of the member who, at the time of the modification of the structure of the Executive Board, had served only half his term on the Board. He knew of members who were in precisely that situation. In his opinion that should not be counted as a term, and the provisions of Article V, paragraph 3 should not, in that particular case, apply.

(64) Mr. KABIR (Chairman of the Nominations Committee) hoped that the case of individual members would not be taken into account in the discussion. He also pointed out that it would in some cases be difficult to apply such a rule to members elected on a casual basis.

(65) Mr. KOTSCHNIG (United States of America) said that, after the explanations given by the Legal Adviser, he would be prepared to support the proposal outlined by the Rapporteur.

(66) Mr. SABA (Legal Adviser) thought that there might be some doubt as to the effect of the modification of the Board's structure, namely whether the rule of non-eligibility for immediate re-election was applicable to present members of the Board who had so far sat on the Board in a personal capacity. Nevertheless, if it were decided to apply that rule, no distinction could be made between members on the basis of the effective duration of the terms they had already served. A distinction of that kind would not, moreover, remove all unfairness and could not, he felt, be approved without a prior alteration of certain provisions of the Constitution.

(67) Mr. BRIGHT (Liberia) wished to know if under the provision under consideration the members of the Executive Board were individuals or Member States.

(68) Mr. SABA (Legal Adviser) explained that thenceforward the members of the Board were persons representing States.

(69) The CHAIRMAN thought the Committee agreed that the interpretation given by the Rapporteur, advocating continuity in the Executive Board, was the correct one.

(70) Mr. HAGUIWARA (Japan) pointed out that the Administrative Commission had, in his view, decided in favour of the principle of "discontinuity" between the old and the new Boards The Japanese proposal which the Commission had rejected as being at variance with that interpretation, had, on the contrary, aimed at ensuring a measure of "continuity" between the old and the new Boards by allowing for the re-eligibility of certain members whose term had been curtailed as a result of the changes in the Board's structure.

(71) Mr. WEST (United Kingdom) had the impression that the Administrative Commission, while accepting the principle of discontinuity in the membership of the Executive Board on a purely legal basis, had, from the point of view of personalities, been in favour of continuity. That was shown by the fact that under the new system the members of the Board, who were now representing their governments, would still be considered as individuals. They could for example resign personally but could not be recalled by their governments.

(72) The CHAIRMAN put to the vote the principle that any previous term served by a member of the Executive Board should be taken into account with regard to his re-eligibility to that body, any part of a term being counted as a full term.

(73) The principle, as enunciated by the Chairman, was adopted by 7 votes to none, with 4 abstentions.

(74) The Committee went on to consider the amendments to the Rules of Procedure resulting from the adoption of Russian as a working language of the General Conference.

(75) Mr. SABA (Legal Adviser) stated that the amendments in question would inevitably affect Rules 52, 55 and 60, in which Russian would be included among the working languages enumerated, unless the list of working languages were dropped in accordance with the solution already adopted for Rules 57, 59 and 78, where mention was made of the working languages but without any list.

(76) In reply to a question from Mr. KOTSCHNIG (United States of America), Mr. MONTAGNIER (Chief of the Bureau of Conference Planning and General Services) said that, when the General Conference was held away from headquarters, it would be difficult to have the Conference Journal printed in Russian, but the Russian edition might perhaps be replaced by a shorter, unprinted version got out with whatever duplicating apparatus might be available.

(77) Mr. KOTSCHNIG (United States of America) said that his delegation would not object to the proposals outlined by the Head of the Bureau of Conference Planning and General Services. It would thenceforward be necessary to interpret Rule 55 in the light of what Mr. Montagnier had said.

(78) After a brief discussion it was decided to add Russian to the list of working languages at present appearing in Rules 52, 55 and 60.

(79) Upon the proposal of Mr. HAGUIWARA (Japan), it was also decided that the heading of Rule 53 should be amended to read "language of the country in which the Conference is being held" instead of "Additional working languages".

The meeting rose at 1.15 p.m.

# SEVENTH MEETING

*2 December 1954 at 3.30 p.m.*

*Chairman:* Mr. AWAD (Egypt)

**DRAFT RESOLUTION AMENDING THE FINANCIAL REGULATIONS** (document 8C/DR/90)

(1) Mr. HARPER-SMITH (Comptroller), referring to the proposal contained in paragraph 4 of the Spanish resolution that the Director-General should submit a revised version of the Financial Regulations to the General Conference at its ninth session, pointed out that the United Nations and its Specialized Agencies had held a series of meetings three years previously to try and agree on uniform financial regulations. Financial regulations common to the United Nations and its Specialized Agencies, with variations only in accordance with their various Constitutions, had been finally agreed upon. Those regulations had been submitted to and adopted by the General Conference at its sixth session. Slight modifications had been made by the General Conference at its seventh session, but they did not alter the substance of the regulations.

(2) He submitted that it would be difficult for the General Conference to revise the Financial Regulations without going through the machinery of the United Nations and its Specialized Agencies.

(3) Mr. SABA (Legal Adviser) added to the remarks made by the Comptroller and said that one of the provisions of the draft resolution (first paragraph) would be difficult to apply. It was stipulated that thenceforward no decision of the General Conference should be valid if it was contrary to the provisions of any part of the Financial Regulations. As it was the Director-General and the Secretariat who were responsible for executing the decisions of the Conference, that provision would put the Director-General in a difficult position by obliging him to interpret both a resolution and the Financial Regulations; it might also force him to forbid a particular resolution being executed; he would thus act both as executive agent and final arbiter; Mr. Saba urged the Committee not to impose such a responsibility on the Director-General. He asked the Spanish delegate if he would be prepared to withdraw that provision.

(4) In answer to the CHAIRMAN, who asked what was really expected of the Legal Committee, Mr. HARPER-SMITH (Comptroller) said that the Administrative Commission had considered that, as the majority of points in the resolution would involve changes to the Rules of Procedure, it would request the advice of the Legal Committee.
(5) If paragraph 1 became effective, an insertion would be necessary in the Rules of Procedure. Likewise, paragraphs 2 and 3 referred to Rules of Procedure.

(6) The CHAIRMAN remarked that the Administrative Commission had taken no decision on the resolution and it was not yet clear what it wished to do about it. In that case, he thought that the Committee was free to give the resolution consideration along any lines suggested by its members.

(7) Mr. KOTSCHNIG (United States of America) shared the apprehension of the Legal Committee concerning the impact of paragraph 1 and wondered if the delegation of Spain would be willing to withdraw that paragraph.
(8) In his opinion, paragraphs 2 and 3 presented no difficulties. A financial regulation would not be suspended lightly. He was willing to support the proposals.
(9) Paragraph 4 was not clear. He would agree if the Director-General were asked to make a study of the effectiveness and soundness of the financial regulations and to report to the General Conference at its ninth session.

(10) Mr. FRAGA IRIBARNE (Spain) thanked the Chairman and members of the Committee for allowing him to speak although he was not a member of the Committee.
(11) He said he had listened to the criticism made about the draft resolution presented by his delegation to amend the Financial Regulations and was prepared to withdraw paragraph 1. He thought that paragraph 4 could be altered so as to avoid the disadvantages which had been mentioned; thus paragraphs 2 and 3 would remain; those he wished to maintain as being of value.

(12) Mr. CABOUAT (France) said that the French delegation shared the United States delegate's feelings, and thought that, if the first paragraph were approved, it might put the Conference in an embarrassing position. The French delegation was, however, prepared to support paragraphs 2 and 3. Paragraph 4 would be improved if it were slightly amended so as to leave the Director-General greater latitude in applying it.

(13) Mr. ARTHUR (United Kingdom) sympathized with the resolution proposed by Spain. He reminded the Committee that the United Kingdom delegation, in the Administrative Commission, had proposed that the Financial Regulations should be adhered to in financing the 1955-56 programme. It had been grateful for the support of the Spanish delegation.
(14) The resolution submitted by the delegation of Spain, however, contained points to which he could not agree. In the first place, with regard to paragraph 1, he thought that it was highly questionable whether one General Conference could pass a resolution that would commit another one.
(15) He had no objection to paragraph 2.
(16) In his opinion, paragraph 3 itself involved adding a Rule to or amending a Rule of the Rules of Procedure.
(17) He hoped that the delegation of Spain would agree to withdraw paragraph 4 from the resolution. All that was necessary was for the General Conference to agree to adhere to the Financial Regulations.
(18) He thought that the Committee could agree that the basic problem was how to persuade the General Conference that, having adopted financial regulations, it should adhere to them.
(19) He could not support the preamble to the resolution in its existing form; in his opinion, it did not represent an accurate account of events.
(20) He had no specific amendments to propose to the resolution at the present stage and suggested that a small drafting committee be set up to draft a resolution in the light of the discussion which had taken place, for submission to the Administrative Commission.

(21) Mr. CABOUAT (France) repeated that the French delegation was prepared to support paragraphs 2 and 3.
(22) The French delegation would like the third paragraph of the preamble to be deleted. It seemed difficult for the Conference to vote a resolution condemning another resolution taken a few days earlier; in addition, the term "tacitly infringed" was too strong and Mr. Cabouat did not consider its use to be justified; he also failed to see what had been meant by "simple" resolutions and said he was against adopting that term. Mr. Cabouat asked the delegate of Spain if he would consent to the paragraph being omitted, as it added little to the first two paragraphs in which the objectives sought by the Conference in adopting a resolution of the kind were clearly defined.

(23) The CHAIRMAN summarized the objections which had been made to the draft resolution and asked the Committee if it was in agreement with the suggestion of the United Kingdom delegate that a small drafting committee be set up to draft a resolution for submission to the Administrative Commission.

(24) Agreed.

(25) The meeting adjourned for ten minutes and on resumption the CHAIRMAN called on Mr. Saba.

(26) Mr. SABA (Legal Adviser) stated that the small drafting committee had considered that, instead of proposing the adoption of a resolution, a recommendation should be made to the Administrative Commission to include three clauses in that part of its report dealing with the application of the Financial Regulations. They might be drafted as follows:

"The Administrative Commission considers that:

1. Any departure from the Financial Regulations should be preceded by the preliminary suspension of the provision to which an exception is to be made.

2. No amendment to the Financial Regulations can be examined by the Conference unless the question has been placed on the agenda of the General Conference in accordance with the Rules of Procedure;

3. It would be desirable to insert in the Financial Regulations a provision that the Regulations may not be amended nor the application of a Regulation suspended except by a decision taken by a two-thirds majority."

(27) Mr. HAGUIWARA (Japan) asked what force those three clauses would have if they were included in the Administrative Commission's report. Would they have the force of a recommendation, a resolution or of an amendment to the Financial Regulations?

(28) Mr. SABA (Legal Adviser) said that, while clause 2 was the statement of an existing rule, clause 1 was a recommendation and "vceu", linked with clause 3; the latter recommended the introduction of provisions laying down that a two-thirds majority was necessary to amend or cancel the application of any Financial Regulation. The Commission might ask the Director-General to submit a text to the next session of the General Conference, but that would seem unnecessary, as he would normally feel obliged to do do.

(29) Mr. HAGUIWARA (Japan) gathered that that part of the Commission's report would be no more than a recommendation, on which a decision would be taken at the next session of the Conference and that it was not proposed to alter the Financial Regulations forthwith; on that understanding, he supported the drafting committee's proposal.

(30) The Legal Committee agreed to the procedure proposed by the drafting committee.

Draft Resolution 8C/DR/74 rev. and 8C/DR/113: Legal guarantees to be provided nationally for the staff of the Secretariat.

(31) The CHAIRMAN called on Mr. Saba.

(32) Mr. SABA (Legal Adviser) said that the Legal Committee's task with regard to this proposal had not

been specified (document 8C/DR/74 rev.); it had asked the Chairman of the Administrative Commission for details. The Chairman had replied that his Commission would like the Legal Committee's opinion on the character of the ltr an delegation's proposal and had further asked it to decide whether the Italian text imposed specific obligations on governments or whether it was a recommendation involving no legal obligations. Misgiving had been aroused by the title of the amendment proposed by the United Kingdom delegation to the draft resolution presented by the Italian delegation (document 8C/ADM/113); that title "Legal Guarantees to be provided nationally for the staff of the Secretariat", the Legal Committee was asked to submit a new wording closer to the real meaning of the resolution. The Chairman of the Administrative Commission had made it clear that it was not for the Legal Committee to choose between the Italian and United Kingdom resolutions.

(33) Mr. ARTHUR (United K gdom) explained that there had been a legal reason behind the amendment proposed by the United Kingdom delegation. If the Italian proposal were adopted, the General Conference might impose legal obligations on Member States. The United Kingdom delegation could not agree to any such imposition by the General Conference. The United Kingdom considered each case on its merits and wished to maintain its freedom to do so.
(34) Further, the Italian resolution implied that it was the common practice for Member States not to reinstate their nationals after a term of service with an international organization. There was not sufficient evidence to support such an implication.
(35) He was prepared to see the Italian resolution passed at some future date, after sufficient evidence had been collected to show that the above was indeed the common practice. He suggested that the Director-General might be asked to collect information from Member States as to the practice followed by them in that connexion. Further, in order to obtain that information, the Director-General might write to Member States about individual cases and might also enquire about laws passed and policies adopted in that connexion.
(36) He pointed out that the title to the resolution 8C/DR/74 rev. was that proposed by the Italian delegation. The United Kingdom delegation would suggest as a title: "Secondment of the nationals of Member States for service with international organizations."

(37) Mr. BOW (Canada) was not clear whether the United Kingdom proposal was an amendment of the Italian proposal, as amended by the United States delegation, or whether it was a substitute motion. If it was to be considered an amendment, he was not clear whether the preamble to the Italian proposal was to be added to that of the United Kingdom.

(38) Mr. ARTHUR (United Kingdom) indicated that he was not prepared to agree to the last phrase of the Italian preamble, as he considered that the whole question could not be examined until further information had been obtained.
(39) He thought that it might be wise to consider the United Kingdom proposal as a substitute motion, since it made radical alterations to the Italian resolution.
(40) He was prepared to accept the Italian preamble with the exception of the last phrase.

(41) Mr. BOW (Canada) suggested that, if the United Kingdom proposal was to be considered a substitute motion, the United Kingdom delegate should draft the preamble for it.
(42) He further suggested that the two resolutions should be forwarded to the Administrative Commission to decide which should be adopted.

(43) Mr. ARTHUR (United Kingdom) said that, with regard to the preamble, he would be satisfied if the last phrase were deleted and the word "recommends" added after the word "Secretariat".

(44) The CHAIRMAN asked whether the Committee would agree to forward the two proposals to the Administrative Commission with a statement to the effect that the Legal Committee saw no legal objection to the form in which the Italian resolution had been drafted and suggesting that the United Kingdom proposal should be considered by the Commission if the Italian resolution were rejected.

(45) Mr. MERMINOD (Switzerland) drew the Committee's attention to the fact that, as the Australian delegate had pointed out at a meeting of the Commission, a measure of the kind advocated in the draft recommendation could only have a limited effect in a Federal State; he spoke from experience of his own country.

(46) The CHAIRMAN thought that the effect would be the same in a Federal State as in any other type of State. Unesco could not force governments to pass laws.
(47) The Committee could mention in its report to the Administrative Commission that the resolution should be sent to Member States in the form of a recommendation.
(48) He asked whether the Committee would be prepared to leave the drafting to its Bureau.

(49) Mr. KOTSCHNIG (United States of America) had no objection to the procedure suggested by the Chairman, but warned the Committee that a similar discussion would take place in the Administrative Commission.
(50) He asked why the resolutions had been referred to the Legal Committee in the first instance, and suggested that the Committee should report to the Administrative Commission that it had been unable to decide what was required of it with regard to the two resolutions.

(51) The Legal Committee agreed to report to the Administrative Commission the substance of the discussion which had taken place.

The meeting rose at 4.40 p.m.

# CHAPTER IX

# CREDENTIALS COMMITTEE

## FIRST MEETING

*12 November 1954 at 11.45 a.m.*

*Chairman:* Mr. BERNAL JIMENEZ (Colombia)

### OPENING OF THE MEETING AND APPOINTMENT OF THE CHAIRMAN

(1) The DIRECTOR-GENERAL declared the meeting open and called on the Chairman of the Executive Board to propose candidates for the post of Chairman.

(2) Sir Ronald ADAM (Chairman of the Executive Board) proposed the appointment of the delegate of Colombia.

(3) Approved unanimously.

### EXAMINATION OF CREDENTIALS

(4) Mr. SABA (Legal Adviser), after reminding the meeting of the procedure to be followed for scrutinizing delegations' credentials, said that the secretariat had received a large number of credentials which fulfilled the requirements laid down in Rule 22 of the Rules of Procedure, and a number of other credentials which, though they did not strictly comply with the provisions of Rule 22, could nevertheless be considered, under the established procedure, as provisional credentials enabling their holders to be seated in a provisional capacity subject to later submission of final credentials. Lastly, a few delegations had not yet arrived and it was not sure that they would all attend the Conference session. He would make a proposal on that point later on.

(5) Mr. LUSSIER (Secretary of the Committee) read the list of countries which had sent credentials in due form to the Secretariat Australia, Austria, Burma (Union of), Byelorussian SSR Cambodia, Canada, Ceylon, China, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Egypt, El Salvador, France, German Federal Republic, Greece, Guatemala Haiti, Hungary, India, Indonesia, Iran, Israel, Italy, Japan, Jordan (Hashemite Kingdom of), Laos, Libya, Monaco, New Zealand, Nicaragua, Norway, Panama, Poland, Spain, Sweden, Switzerland, Thailand, Ukrainian SSR, Union of Soviet Socialist Republics, Union of South Africa, United Kingdom, United States of America, Uruguay, Viet-Nam, Yugoslavia.

(6) Mr. SOLDATOV (Union of Soviet Socialist Republics) wished to make a statement concerning the representation of China. He noticed that the Chinese delegation consisted of persons not appointed by the Government of the People's Republic of China, but by the Kuomintang Group. As he had already done in plenary session, he drew the Committee's attention to the anomalous situation with regard to the representation of China in Unesco. The Government of the People's Republic, the only legal government empowered to appoint representatives of China, had not yet been represented in Unesco, where its proper place had been taken by a representative of the Kuomintang régime, which had been deposed by the Chinese people and could not speak on its behalf. Accordingly, the Soviet delegate submitted to the Committee a proposal, the adoption of which would serve the interests, not only of the Chinese people, but of all countries concerned with the development of cultural relations and their contribution towards better international understanding and the promotion of peace. The proposal read

"The General Conference,

Considering the proposal by the delegation of the Union of Soviet Socialist Republics concerning non-recognition of the Kuomintang representatives of the Chiang-Kai-Shek group at the eighth session of the Unesco General Conference,

Decides to consider invalid the credentials of the Kuomintang representatives of the Chiang-Kai-Shek group at the eighth session of the General Conference of Unesco".

(7) Mr. Soldatov explained that his motion had been drawn up with a view to its final adoption by the plenary Conference. However, he was prepared to alter its wording if the Chairman thought necessary by substituting the words "Credentials Committee" for "General Conference".

(8) In reply to Mr. ENVERGA (Philippines), Mr. SABA (Legal Adviser) explained that the question was not whether China was a member or not of the Organization - it had been a member ever since Unesco was founded - but of the Soviet delegation's objecting to the admission of the representatives of China. The credentials submitted by the latter were issued by the same authorities who had issued the credentials of Chinese delegations to previous sessions of the General Conference. Since 1950 objections had been raised against those credentials. The General Conference had not accepted those objections at previous sessions. The Conference, on the advice of the Credentials Committee, would have to take a decision on the objection just raised.

(9) Mr. KOTSCHNIG (United States of America) thought that the only point at issue was consideration of the credentials submitted by the only Chinese delegation present at the Conference. He did not consider the Soviet delegate's proposal acceptable and, in order to avoid a lengthy discussion aimed at excluding the representatives of the Government of the Republic of China in favour of representatives of the Central People's Government of the People's Republic of China - a discussion which, incidentally, should take place in plenary session - Mr. Kotschnig submitted the following motion:

"The General Conference decides to adjourn any consideration at the eighth session of any proposals to exclude the representatives of the Government of the Republic of China or to seat representatives of the Central People's Government of the People's Republic of China".

(10) Mr. COWELL (United Kingdom) seconded the proposal of the United States delegate. The question should be adjourned.

(11) Mr. CARBAJAL VICTORICA (Uruguay) was also against rejecting the credentials submitted by the delegation of China. As the Legal Adviser had said, it would be contravening the Constitution of Unesco. The credentials had been issued by the same authorities as for previous conferences; those authorities, moreover, were recognized by the United Nations, which had refused to admit the Chinese People's Republic as long as that Government's attitude towards Korea remained unchanged, for it was a government which the United Nations regarded as an aggressor. Owing to the close link between the United Nations and Unesco - their mutual relationship was defined in Article X of the Constitution - Unesco could not admit to membership a government not recognized by the United Nations.

(12) Mr. SOLDATOV (Union of Soviet Socialist Republics) noted that a procedural difficulty arose. The United States delegate had proposed adjourning consideration of the Soviet delegation's proposal but he would remind the Committee that acceptance of the United States proposal would mean postponing a decision on the credentials submitted by any delegation of China whatsoever. He personally was in favour of taking a decision at the current session and did not think that the United States delegate's proposal was a procedural motion, since it dealt with a substantive question - adjournment of the question of accepting the Chinese delegation's credentials in general. In conclusion, he asked the Committee to vote on his proposal and, if it were defeated, to vote then on the proposal of the United States delegate. He believed lawyers would understand his point of view, moreover, he was prepared to explain it in detail. He felt he must reply to a point raised by the delegate of Uruguay, namely, whether or not it would be in keeping with Unesco's Constitution to accept the Soviet Union's proposal. He personally thought that, by accepting it, the Committee would be acting consistently with the Constitution. The aim of his proposal was to bring about broader collaboration in the field of international understanding and it did not in any way contravene the Constitution. The fact that the credentials of the Formosan Government's representatives had been accepted in the past meant nothing, mistakes might have been made but there was no point in repeating them. The delegate of Uruguay had raised another point: who was the aggressor in Korea. The Soviet delegate did not think that was a question which the Committee or Unesco itself could decide. The Soviet Union took the view, shared by other States, that the Central Government of the People's Republic had not intervened in Korea. It was only Chinese volunteers who had taken part in the operations; they had had to intervene to defend their homeland when its frontiers had been threatened. His statement was justified by the fact that it was not he himself who had raised the point, but the delegate of Uruguay; he had therefore been obliged to state the Soviet delegation's point of view.

(13) Mr. CARBAJAL VICTORICA (Uruguay) explained that he had not said that it was Unesco's duty to decide who had been the aggressor in Korea. That question had been referred to and would have to be decided by the United Nations.

(14) Mr. KOTSCHNIG (United States of America) regretted that political questions had been introduced into the discussion. The Soviet delegate's proposal had a political complexion and was out of place in that Committee. Mr. Soldatov had said that lawyers would understand his point of view - and he (the speaker) did understand it - but that did not mean that he agreed with the legal interpretation given. The Soviet delegate had argued that Mr. Kotschnig's proposal was not a procedural question. He read it again and asked for the whole discussion to be adjourned. In that connexion, he pointed out that, under Rule 75 of the Rules of Procedure, any such motion took precedence and that, apart from the proposer, one representative could speak in favour of, and one against the motion. In conclusion, he asked for a vote to be taken on his proposal as it was definitely a procedural motion.

(15) Before replying to the points raised by Mr. Kotschnig, Mr. SOLDATOV (Union of Soviet Socialist Republics) enquired in what order the two proposals before the meeting, Mr. Kotschnig's and his own, would be put to the vote.

(16) The CHAIRMAN said he would put them to the vote in the order in which they had been submitted. That would mean taking Mr. Soldatov's proposal first.

(17) Mr. KOTSCHNIG (United States of America) pointed out that, under Rule 77, his proposal should have priority.

(18) Mr. SABA (Legal Adviser) thought it was an awkward situation. The solution to be adopted depended on the character and nature of the motions submitted. But views differed on their definition. Was the text before the Committee a draft amendment to the report to be submitted by the Chairman, or an independent motion, followed by a contrary motion? If there was any doubt, the Chairman could ask the Committee in which order it wished to vote.

(19) Mr. SOLDATOV (Union of Soviet Socialist Republics) pointed out that he had submitted an amendment to the paragraph in the report mentioning China: he had proposed that the credentials of the delegation of China be considered invalid. In his first statement, the United States delegate had asked for that proposal to be adjourned. It was for the Committee to decide whether or not it wished to consider those credentials valid. If Mr. Kotschnig's proposal were approved, the decision concerning the credentials of one particular country, China, would be left in suspense. He also pointed out that, when he read his motion again, Mr. Kotschnig had further specified that the Conference would reject any proposal to secure the representation of the Chinese People's Republic and had moved the adjournment of the whole question.

(20) Mr. Soldatov pressed for a vote to be taken on his proposal, which constituted a draft amendment to the report. When that was done, other votes could be taken on other proposals.

(21) The CHAIRMAN drew attention to Rule 77 (c), under which motions to adjourn the debate on an item under discussion had priority. He would take a vote on the order of voting. Mr. KOTSCHNIG (United States of America) felt sure his point of view would prevail and so raised no objection, although he saw no need for such a procedure, since the Rules of Procedure were clear. Mr. Soldatov's proposal was one of substance (exclusion of a delegation), whereas his own (adjournment of the debate) was purely one of procedure.

(22) The proposal to vote first on the proposal of the Soviet Union was put to the vote and defeated by 5 votes to 1, with 1 abstention.

(23) Mr. Kotschnig's proposal was reread:

"The General Conference decides to adjourn any consideration at the eighth session of any proposals to exclude the representatives of the Government of the Republic of China or to seat representatives of the Central People's Government of the People's Republic of China".

(24) The proposal was put to the vote and approved by 6 votes to 1, with 1 abstention.

(25) Mr. SOLDATOV (Union of Soviet Socialist Republics) asked what procedure would be adopted for submitting the report and voting on it.

(26) Mr. SABA (Legal Adviser) pointed out that the report was not finished. The Committee still had to consider the provisional credentials, the credentials of observers from certain non-Member States and from certain territories and international organizations invited to the Conference.

(27) Mr. LUSSIER (Secretary of the Committee) read the list of countries which had submitted provisional credentials: Argentina, Belgium, Brazil, Chile, Colombia, Ecuador, Honduras, Iraq, Korea, Lebanon, Liberia, Mexico, Netherlands, Pakistan, Philippines and Turkey. Furthermore, credentials for observers had been submitted by Bulgaria, the Holy See, Portugal and Rumania, which were not members of Unesco, as well as by the Saar and the following territories: Gold Coast, Sierra Leone, the British Caribbean group and the Malaya-British Borneo group. Two international organizations - the International Labour Organization and the World Health Organization - had also accredited representatives.

(28) Mr. SABA (Legal Adviser) further mentioned certain countries which had not yet submitted credentials and recalled the procedure adopted in 1952 and 1953, when the Chairman of the Committee had been authorized to report direct to the Conference on such cases.

(29) Mr. COWELL (United Kingdom) suggested that that procedure be followed, and formally moved the adoption of the report setting forth the information submitted to the Committee by the Secretariat. It would then still be possible to reconvene the Committee in case of need.

(30) Mr. SOLDATOV (Union of Soviet Socialist Republics) pointed out that under Rule 85 parts of a proposal should be voted on separately if a representative asked for the proposal to be divided, and he called for a separate vote on the part of the report dealing with the credentials of the delegation of China.

(31) Mr. SABA (Legal Adviser) then gave a general outline of the draft report. It would begin with the statement that the Committee had met, that it had appointed its Chairman and considered the documents issued by various States. It would then be indicated that a proposal had been made by the delegate of the Union of Soviet Socialist Republics concerning the credentials submitted by the delegation of China and followed by a counter-proposal by the delegate of the United States of America, which had been adopted. The list of States which had submitted credentials would then follow, together with the Committee's recommendation that those States be seated at the Conference. In accordance with the request made by the delegate of the Union of Soviet Socialist Republics, a separate vote should be taken on the mention of China in that list.

(32) The report would then give a list of the States

which had submitted provisional credentials, followed by the recommendation that they be allowed to take part provisionally in the work of the Conference subject to later submission of credentials in due form. Next would come the list of observers. The report would then state that the Committee had authorized its Chairman to report direct to the Conference on any further credentials that might reach him before the Committee's next meeting.

(33) Mr. SOLDATOV (Union of Soviet Socialist Republics) agreed with the form of the report, as described by Mr. Saba, but asked that mention be made of the first vote taken by the Committee about the order in which the vote on the two proposals was to be taken.
(34) If the part dealing with acceptance of the Chinese delegation's credentials were not omitted, the Soviet delegate would have to vote against the entire report and he asked for an explanation of his vote to be included.

(35) Mr. KOTSCHNIG (United States of America) thought that, to avoid duplication, the statements of Committee members defining their position should be included in the minutes.

(36) Mr. SABA (Legal Adviser) said that a record had been taken and would be issued.

(37) Mr. SOLDATOV (Union of Soviet Socialist Republics) did not press for the inclusion of his statements in the report, since a record of the meeting would be prepared; he called for a vote by roll-call.

(38) After a brief exchange of views, the Committee decided to take a vote by roll-call first on the retention of the word "China".
Voted for: Egypt, France, Philippines, United Kingdom, United States of America, Uruguay.
Voted against: Union of Soviet Socialist Republics.
Abstained: Indonesia.
(39) The result was 6 votes for, 1 against and one abstention.
(40) The vote on the report as a whole was as follows:
Voted for: Egypt, France, Indonesia, Philippines, United Kingdom, United States of America, Uruguay.
Voted against: Union of Soviet Socialist Republics.
(41) The result was 7 votes for, and 1 against.

(42) Mr. SOLDATOV (Union of Soviet Socialist Republics) said that he had been obliged to vote against the report as a whole solely because of the rejection of his proposal to consider the credentials of the Chinese delegation invalid since its members came from a group disowned by the Chinese people and could not represent China in Unesco. He asked for that statement to be included in the minutes.

(43) Mr. HUZAYIN (Egypt) pointed out that the fact of his delegation's having voted for the report as a whole did not imply that it recognized the governments of certain States which had submitted credentials deemed to be valid.

(44) The CHAIRMAN thanked members of the Committee for their readiness to carry out a difficult task.

(45) Mr. KOTSCHNIG (United States of America), on behalf of the Committee, thanked the Chairman for his masterly conduct of the Committee's proceedings.

The meeting rose at 2.30 p.m.

# CHAPTER X

# COMMITTEE ON REPORTS OF MEMBER STATES

## FIRST MEETING

*12 November 1954 at 6 p.m.*

*Chairman:* Mr. AL-HANI (Iraq)

(1) In place of the Director-General, who was detained at another meeting, Mr. CHEVALIER opened the proceedings and informed the Committee that the General Conference had approved the proposal by the Nominations Committee recommending that one of the representatives of Iraq should take the Chair at this Committee: Mr. Al-Hani, the Iraqi delegate, was unanimously elected Chairman

**ITEM 10 OF REVISED AGENDA: ELECTION OF VICE-CHAIRMEN AND RAPPORTEUR**

(2) Having taken the Chair, Mr. AL-HANI suggested that the delegates of Cambodia and Ecuador should be elected Vice-Chairmen.

(3) Mr. CHIRIBOGA TERAN (Ecuador) thanked the Chairman for his suggestion, but asked that the delegate of the Dominican Republic should be elected in his place

(4) Messrs. Hong Hoeung Doeung (Cambodia) and Pannocchia Alvarez (Dominican Republic), having been proposed by Mr McCULLOUGH (United States of America), were unanimously elected Vice-Chairmen.

(5) The CHAIRMAN then proposed that Mr. Hazoumé (France) should be appointed Rapporteur.

(6) This proposal was adopted unanimously.

(7) The delegates of Cambodia, the Dominican Republic and France thanked the Committee for the honour it had just done them.

(8) In reply to a remark by Mr. HONG HOEUNG DOEUNG (Cambodia) concerning the procedure for studying the reports submitted to the Committee for examination, the CHAIRMAN observed that that was a question to be discussed at the next meeting.

The meeting rose at 6.45 p.m.

# SECOND MEETING

*13 November 1954 at 10.30 a.m.*

*Chairman:* Mr. AL-HANI (Iraq)

**ADOPTION OF AGENDA** (document 8C/DIV/24)

(1) The agenda was adopted without comment.

**ITEM 10.2 OF REVISED AGENDA: CONSIDERATION OF REPORTS PRESENTED BY MEMBER STATES FOR 1952-53**

(2) The CHAIRMAN said that the Conference had provided eight meetings for the accomplishment of the Committee's work Fifty of the reports had been submitted within the prescribed time and appeared, in the three working languages, in the printed documents 8C/4; five had been received subsequently and appeared as roneographed documents 8C/4 in the original language only. Another one (Denmark) had just been received and was being reproduced, also in its original language. Although not obliged to do so by the resolution adopted by the General Conference at its seventh session, the Committee might nevertheless wish to examine those last reports.

(3) Mr. FRANCOVICH (Director of the Regional Office for the Western Hemisphere) said that the Director-General would be unable to be present, as he had to attend another meeting, and had appointed Mr Francovich as his representative.
(4) He went on to say that the Secretariat had just received the report from Poland and asked whether it was to be mimeographed.

(5) The CHAIRMAN asked the Committee to decide whether it wished to discuss all the reports, including that submitted by the Government of Poland, which was in French.

(6) Mr McCULLOUGH (United States of America), supported by Sir Kenneth GRUBB (United Kingdom), proposed that the Committee should discuss both the printed reports and the roneographed reports, including the one from the Polish Government.

(7) The proposal was adopted.

(8) In reply to the delegate of the United States of America, the CHAIRMAN said that it would not be possible for the roneographed reports to be translated in time, they would have to be studied in their original language.

(9) Sir Kenneth GRUBB (United Kingdom), referring to the question of distribution of work, suggested that the Committee be divided into five small groups, arranged so as not to contain representatives of the countries whose reports were to be discussed.

(10) Mr. FRANCOVICH (representing the Director-General) said that on previous occasions work had been divided among working groups. Member States' reports had been split up into groups as follows: two for English ones, two for French ones and one for Spanish ones. The same system, already used at other Conference meetings and which had given good results, could be adopted on that occasion

(11) The CHAIRMAN asked whether members had all read the reports, or whether it was considered advisable to set up the working groups proposed by the delegate of the United Kingdom. He drew attention to the plan of work (document 8C/DIV/24) which was being distributed.

(12) Mr. McCULLOUGH (United States of America) said that he had read the reports, but only in a general way. He thought that the Committee's work would be most useful to the Conference if the reports were studied in detail by working groups.

(13) The CHAIRMAN asked members to state the languages in which they wished to work.
(14) The indications given were as follows

| | |
|---|---|
| Austria - absent | Iraq - English |
| Cambodia - French | Luxembourg - absent |
| Dominican Republic - Spanish | Turkey - absent |
| | South Africa - English |
| Ecuador - Spanish | U.S.A. - English |
| France - French | U.K. - English |

(15) As there were 4 English-speaking, 2 French-speaking and 2 Spanish-speaking delegates, it was agreed to set up two English working groups and one each in French and Spanish.

(16) The CHAIRMAN invited the working groups to indicate which reports they wished to study.

(17) On the suggestion of Mr. McCULLOUGH (United States of America) it was agreed that the Secretariat should allocate the reports among the working groups. Each member would have about eight reports to study.

(18) Mr. FRANCOVICH (representing the Director-General) said that the plan had been prepared on the basis of experience gained at previous sessions of the General Conference.
(19) That plan, which could be divided into two parts, would comprise: (A) Factual considerations and form of the reports (a) date received, (b) conformity with the proposed plan (c) general presentation of the

reports, and (B) Content of the reports, in which the distribution of subjects was set forth in accordance with Unesco's activities in different fields. Consequently, the plan laid down the dividing up of reports by subjects, Education, Natural Sciences, Social Sciences, Cultural Activities, etc.
(20) The activities of the national and the co-operative organizations were also being studied.
(21) Furthermore, the plan laid down the form and content of future reports, and the Committee could make recommendations to improve their usefulness.
(22) He considered that the reports submitted by the working groups should not exceed one page.

(23) Mr. HONG HOEUNG DOEUNG (Cambodia) wanted an item of the work programme to be more precisely indicated. Would the Committee study all subjects country by country, or would it study all the reports taken together subject by subject?

(24) Mr. FRANCOVICH (representing the Director-General) said that, in the past, working groups had referred each report back to the Committee, but that their final report was, naturally, a general report.

(25) Mr. McCULLOUGH (United States of America) said that the delegate of Cambodia had raised an important point. It was essential for the Committee to have a purpose and to know whether the object of its report was to inform the General Conference or to guide it in its decisions on Unesco's work for the coming two years. If the report were only for the purpose of information, the Committee would in effect be redoing the work of the Secretariat, which had already made summaries of the more important parts of the reports.
(26) What he had in mind was that the Committee might, by extracting certain guiding principles from the reports, offer conclusions which would be of real use to the General Conference. There were no doubt many domains in which such action would be useful, but an outstanding example was the development of National Commissions, on which most of the reports had commented.
(27) The working groups would do better and more effective work if they knew exactly what their task was.

(28) The CHAIRMAN asked the Director-General's representative to comment on the United States delegate's remarks, which had raised an important question concerning the plan of work.

(29) Mr. FRANCOVICH (Representative of the Director-General) considered that a plan of work such as was discussed by the delegations of Cambodia and the United States of America would be very useful. In addition to the reports, recommendations ought to be submitted; they would prove very useful for the future. The Secretariat welcomed with genuine interest the suggestions made by Cambodia and the United States of America.

(30) Mr. HONG HOEUNG DOEUNG (Cambodia) asked the Director-General's representative to clear up one point in the proposed plan of work, under Section II appeared recommendations by the Committee concerning the form and content of future reports, and he asked whether that system also enabled recommendations to be made about future activities.

(31) The CHAIRMAN, replying to the delegate of Cambodia, said that it would be in order for such recommendations to be made in the Committee's final report to the General Conference, the word "content" being understood in its broadest sense.

(32) Sir Kenneth GRUBB (United Kingdom) said that it would follow from previous statements that each working group should keep certain basic questions in mind. Taking the development of National Commissions as an example, the questions might be:
1. Was the National Commission representative of the main educational, scientific and cultural interests?
2. Was there contact between the National Commission and Unesco?
3. Was the National Commission doing anything to interest the educated public at large in the work of Unesco?
4. What had the National Commission done to advance the main purposes of Unesco?
(33) That method would help the groups in judging the reports and making practical suggestions concerning Unesco's future work.

(34) Mr. FRANCOVICH (Representative of the Director-General) said that reports of Member States should deal with the most important aspects of the work carried out.
(35) As an example, he mentioned the report presented by the United States of America, which contained specific data concerning that country's ratification of various international agreements. That type of information was particularly useful for helping the Committee in its work.
(36) In the same way, reports submitted by Member States should contain suggestions tending to facilitate the carrying into effect of resolutions adopted.

(37) Mr. McCULLOUGH (United States of America) appreciated the comments of the Director-General's representative, but re-emphasized the need for a plan of work which would ensure the best and most effective results. He shared the views of the United Kingdom delegate, whose remarks had raised in his mind a question which the Committee might like to consider: whether the Committee served a useful purpose or whether it would be better in future to rely on the Secretariat's summaries of reports. He asked whether it would be possible for the Secretariat to prepare a memorandum setting out first the purpose of the Committee's work, which had never been clearly defined, and then some guiding questions on the lines of the United Kingdom delegate's suggestions.

(38) Mr. HONG HOEUNG DOEUNG (Cambodia) entirely agreed with the opinions expressed by the United States and United Kingdom delegates.

(39) Mr. FRANCOVICH (Representative of the

Director-General) considered that, as far as the aims of the Committee on Reports of Member States were concerned, resolution 30.214 approved at the fifth session of the General Conference, should be read out.

(40) Sir Kenneth GRUBB (United Kingdom) proposed that the Secretariat should prepare a paper on the lines already suggested and submit it to the next meeting. It would then be possible for the working groups to be set up and start work immediately.

(41) The proposal was seconded by Mr. WIDDOWSON (Union of South Africa) and adopted.

The meeting rose at 12.05 p.m.

# THIRD MEETING

*15 November 1954 at 10.30 a.m.*

*Chairman:* Mr. AL-HANI (Iraq)

**ITEM 10.2 OF REVISED AGENDA: CONSIDERATION OF REPORTS PRESENTED BY MEMBER STATES FOR 1952-53** (continued)

(1) The CHAIRMAN said that following the decision taken at the previous meeting, a list had been prepared (document 8C/DIV/75) naming the members of the working groups and the reports which each would have to study. He proposed that the delegate of Turkey, who had just arrived, be included in the French-speaking group The paper was before the Committee for comment.

(2) In reply to a question from the delegate of France, the CHAIRMAN said that each group was free to arrange its own methods of work.

(3) Document 8C/DIV/75 was approved without further comment.

(4) Mr. FRANCOVICH (Representative of the Director-General) announced that the report from the Government of Brazil had just been received and asked whether the Committee was prepared to accept it as it had the other reports which arrived after the prescribed date.

(5) Mr. TUNCEL (Turkey), speaking as former Chairman of the Committee, proposed that the report be accepted, in accordance with the practice followed at the previous session of the General Conference.

(6) The proposal was seconded by the delegate of the United States of America and adopted.

(7) The CHAIRMAN said that the report was in English and would accordingly be assigned to one of the English-speaking groups.

(8) He drew attention to the typewritten document which the Secretariat had prepared following the statements by the delegates of the United Kingdom and the United States of America on the purpose and task of the Committee.

(9) Mr. McCULLOUGH (United States of America) complimented the Secretariat on the document and said that it would help to secure uniformity of the working groups' reports.

(10) The document was approved.

(11) The CHAIRMAN announced that the next meeting of the Committee was due to take place on Wednesday 17 November at 3.30 p.m. He asked whether that would give the working groups enough time to prepare their reports, and pointed out that it would not be necessary for all of them to be ready for that meeting.

(12) Mr. TERAN ROBALINO (Ecuador) considered the time too short and asked if the meeting could be postponed until Thursday or Friday.

(13) Mr. HAZOUME (France) asked whether the meeting could be deferred until Friday, as his group had sixteen reports to study

(14) The CHAIRMAN said that the Secretariat had informed him that, for administrative reasons, a meeting could be held on Thursday but not on Friday.

(15) Mr. TERAN ROBALINO (Ecuador) said that the report of the Spanish-speaking group could be ready by Thursday.

The meeting rose at 11.05 a.m.

# FOURTH MEETING

*18 November 1954 at 10 a.m.*

*Chairman:* Mr. AL-HANI (Iraq)

**ITEM 10.2 OF REVISED AGENDA: CONSIDERATION OF REPORTS PRESENTED BY MEMBER STATES FOR 1952-53** (continued)

(1) The CHAIRMAN called on the delegate of Ecuador to present his observations on the reports submitted by the Spanish-speaking Member States.

(2) Mr. HONG HOEUNG DOEUNG (Cambodia) suggested that it would be more convenient that delegates belonging to the same working parties should sit together during the discussion of the various Member States' reports. The Committee could revert to its normal seating arrangements, in alphabetical order, for the general discussion of the final draft report.

(3) That suggestion was seconded by Mr. HAZOUME (France) and was approved unanimously.

(4) Mr. TERAN ROBALINO (Ecuador) said that, in compliance with the recommendation of the delegates from the Spanish-speaking countries, three reports had been drawn up on the reports submitted by the Spanish-speaking Member States:

(1) That submitted by the delegate of the Dominican Republic on the reports of Chile and Ecuador;

(2) That submitted by the same delegate on the reports of Costa Rica and the Dominican Republic;

(3) That submitted by the delegates of Ecuador and the Dominican Republic on the reports of the other Spanish-speaking countries.

Each of the reports had been rearranged under three main heads:

(a) Structure and layout

(b) Contents

(c) Conclusions

(5) Mr. Teran Robalino then read out the reports on Argentina, Colombia, Cuba, Haiti, Honduras, Mexico, Nicaragua, Panama, El Salvador, Spain and Uruguay. He added that the conclusions drawn from them were as follows:

(6) With regard to Argentina, it was most desirable that in future the reports from that progressive South American country should conform as closely as possible to the mutually agreed layout so as to enable the Organization to appreciate to what extent that country was adhering to and collaborating in Unesco's programme.

(7) One point which should be specially brought out was the effort to make education more democratic by the use of certain fundamental measures such as free education from the kindergarten to the university. Similarly, the educational reforms introduced by the Argentine Government deserved a special mention, they bore chiefly on matters in the social and professional field and represented a valuable contribution to Unesco's lofty aims.

(8) With regard to Colombia, mention should be made of that country's brilliant collaboration in the attainment of Unesco's high objectives. The working party considered that the legitimate aspirations conveyed by Colombia in its report should receive the most favourable consideration possible.

(9) The Cuban report left a favourable impression and testified to that country's genuine desire for closer relations with Unesco. Attention should be directed to the work of the Autonomous National Commission, an experiment that would undoubtedly fulfil the hopes inspired by that sort of organization.

(10) Special attention should be drawn to the importance of the report submitted by Spain, being the first which that country had presented as a Member State of Unesco. It bore witness to the significance attached by Spain to its relations with Unesco. Spain's contribution would be a valuable one having regard to its cultural heritage and tradition which had survived every change of fortune and persisted throughout the centuries. Spain's achievements since its recent entry into Unesco were of the highest significance, and its report afforded clear testimony of its intention of co-operating in Unesco's lofty aims.

(11) Haiti had given a particularly important place to Unesco activities. Every encouragement should be given to that country's efforts on behalf of culture, education and science at the national level.

(12) The report submitted by Honduras clearly brought out that country's anxiety to collaborate in Unesco's aims. It should receive more and more encouragement for the energetic action it was taking to that end.

(13) In Mexico praiseworthy progress could be recorded, and a clear account emerged of that country's valuable contribution to Unesco's objectives.

(14) Nicaragua should be recommended to make its future reports more explicit and complete, particularly having regard to the goodwill shown by that country in its relations with Unesco.

(15) Panama should in future submit reports in accordance with the proposed layout, and it should include a full, if summary, review of the various measures adopted with regard to Unesco programmes, agreements and conventions.

(16) The suggestions made to Panama should be repeated in the case of El Salvador.

(17) Uruguay's valuable contribution to Unesco's objectives deserved the fullest appreciation. The increasingly good relations between that progressive country and Unesco called for special mention.
(18) Mr. Teran Robalino suggested that the present session of the General Conference should congratulate the Government of Uruguay on having formed the Specialized Commissions which had done so much to facilitate the work of the Executive Committee of the National Commission in preparing for the eighth session of the General Conference. The Specialized Commissions also should be congratulated on the excellence of their services and their efficient collaboration in organizing the work of the Conference.

(19) That suggestion of the delegate of Ecuador was seconded by the delegate of the Dominican Republic.

(20) The CHAIRMAN, after thanking the delegate of Ecuador for his report, said that a few Spanish-speaking countries remained to be reported on at the afternoon meeting, at which the Committee would doubtless wish to consider the suggestions made by the delegate of Ecuador in connexion with the report by Uruguay

The meeting rose at 12.55 p.m.

# FIFTH MEETING

*18 November 1954 at 3.45 p.m.*

*Chairman:* Mr. AL-HANI (Iraq)

**ITEM 10.2 OF REVISED AGENDA: CONSIDERATION OF REPORTS PRESENTED BY MEMBER STATES FOR 1952-53** (continued)

(1) The CHAIRMAN declared the meeting open and said that the reports submitted by the delegates of Ecuador and the Dominican Republic would now be heard; those were the reports dealing with the last of the Member States' reports which the Spanish-language working party had been appointed to study.

(2) Mr. TERAN ROBALINO (Ecuador) submitted the report by the delegate of the Dominican Republic dealing with the Member State reports from Chile and Ecuador. He also presented his own report on the reports from Costa Rica and the Dominican Republic. The conclusions were as follows:
(3) Chile had shown goodwill in implementing the programme proposed. However, it should be recommended to submit fuller reports.
(4) As regarded Ecuador, projects should be stimulated, particularly in the national field.
(5) Costa Rica had carried out useful activities.
(6) The Dominican Republic, according to its report, was making "real conquests in the field of education", and future reports should deal with all points connected with Unesco's programme, agreements and conventions.

(7) The CHAIRMAN thanked the delegates of Ecuador and the Dominican Republic for their reports. He asked the Committee whether it would prefer to hold a discussion after each group of reports, or wait until they had all been heard. After a brief discussion, it was decided that the debate would take place on 29 November, when all reports had been submitted and, if necessary, a further meeting could be held between that date and 6 December, when the final report was to be drawn up for presentation to the General Conference.

(8) Miss BISHOP (United Kingdom) presented the comments of the first English-speaking group on the reports of the following Member States:
Afghanistan
(9) The report did not follow the proposed plan and dealt principally with the general state of education in the country, emphasizing the need for assistance from "foreign organizations". Although assistance from Unesco had been limited, Afghanistan was grateful for the few measures already taken in various fields.
(10) Afghanistan, Miss Bishop noted, had taken part in the regional education conference in New Delhi, and in the scientific conference at Karachi.
(11) Assistance might be assumed to be needed in the training of National Commission personnel and in the execution of programme activities. Public relations were of lesser importance.
Hashemite Kingdom of Jordan
(12) No information was given on the ratification of international conventions and very little about the implementation of Unesco resolutions.
(13) Unesco was criticized for lack of assistance to that Member State. The only project in which the Organization collaborated was the women's training college. The Courier had been actively distributed, but dissatisfaction had been felt over an article on Israel. Jordan also regretted the cancellation of the Regional Conference of National Commissions.
(14) Up to the present, the Ministry of Education had acted as National Commission, but the creation of a new National Commission, of which the Minister of Education would be Chairman, had been discussed

with the Unesco External Relations Officer for the Middle East.

Korea

(15) Three agreements were at present being studied: the Agreement for Facilitating the International Circulation of Visual and Auditory Materials, the Agreement on the Importation of Educational, Scientific and Cultural Materials, and the Convention on the International Computation Centre.

(16) No specific information was given on the implementation of Unesco resolutions.

(17) The report contained useful general information on educational reconstruction, but it was not always easy to perceive how much had been done by the Government alone, and how much in combination with the Specialized Agencies. Korea was, however, concerned with international understanding, the exchange of persons, and the preservation of the cultural heritage of mankind. It was trying to reduce obstacles to the free flow of information. A serious need was felt for translations of the world's classics.

(18) General educational reconstruction had been assisted by Unesco. The National Commission had been organized in January 1954 with a Government grant. It had 60 members, 35 being appointed by organizations designated by the Minister of Education, and the others directly by him. The Minister was Chairman.

Libya

(19) The report contained much interesting information on the general development of education in the country, but that did not concern Unesco in the executive sense. Special reference was made to the Education Act of 1952, and to the conclusion in 1953 of a Cultural Agreement between Libya and Egypt.

(20) No information was given on the ratification of international agreements, on the implementation of Unesco resolutions or on the National Commission.

Philippines

(21) The Philippines had previously ratified the Agreement on the Importation of Educational, Scientific and Cultural Materials. They had now adopted Act No. 871 on tax exemption. Some efforts had been made with regard to the Agreement for Facilitating the International Circulation of Visual and Auditory Materials of an Educational, Scientific and Cultural Character. The Philippines was not a signatory to the Universal Copyright Convention adopted in Geneva in 1952.

(22) Interesting but incomplete information was given on the implementation of Unesco resolutions.

(23) The National Commission had been fully re-established in 1951-1952 with a Government subsidy of 100,000 pesos and a staff of 11. It published the Philippine Unesco News.

(24) The report, Miss Bishop concluded, gave a general impression of renewed activity and interest, but contained no complete information on the specific planning and execution of programme activities. Nothing was said about public relations.

Thailand

(25) No information was given on the ratification of international agreements. As to the implementation of Unesco resolutions, close co-operation existed between Thailand and Unesco, which had been cemented by the recent visit of the Director-General, Sir Ronald Adam and other members of the Executive Board. On that occasion a service contract had been signed, establishing a research and training centre in educational psychology.

(26) The report included much material on general educational development, including adult education.

(27) The National Commission had taken an active part in the promotion of the Unesco programme.

(28) The report, Miss Bishop concluded, gave the impression of very fruitful co-operation between Thailand and Unesco. Probably it would be best to leave existing measures to mature before further advances were planned on a large scale.

German Federal Republic

(29) Preparatory steps had been taken for that country's accession to the Agreement on the Importation of Educational, Scientific and Cultural Materials. A law allowing accession to the Universal Copyright Convention was to be submitted in due course. Germany was prepared to accede to the Agreement on the Establishment of the European Organization for Nuclear Research. It had shared in the preparatory work on the International Convention for the Protection of Cultural Property in the Event of Armed Conflict.

(30) The report, Miss Bishop stated, gave the impression of considerable activity, much of which had developed only recently.

(31) The National Commission had held a conference in January 1952 with the Director-General of Unesco. It had set itself three initial tasks: the development of public libraries, the production of an international book of folk songs, and the improvement of school textbooks. Co-operation with Unesco headquarters had increased considerably and relations had been established with it by several government departments.

(32) The National Commission pleaded for the employment of more Germans in the Secretariat.

(33) Finally, the report contained full information on the structure and activities of the National Commission.

India

(34) The Visual and Auditory Materials Convention was under consideration. It had not been possible to ratify the Importation Agreement. The Computation Centre Agreement was under study and, with regard to the Copyright Convention, India was considering the introduction of a bill to amend the existing law.

(35) The accent in the report was on the implementation of the Unesco programme, of which a detailed account was given in the various fields.

(36) The National Commission had been put on a permanent footing in 1952. It had three sub-committees devoted to education, science and culture respectively. The Executive Board consisted of 11 members.

(37) In general, Miss Bishop concluded, India gave proof of great interest in Unesco. The need was felt, however, for more than the aid of experts. An Educational Development Fund was required, and the Fundamental Education Programme was in need of revision and enlargement. The significance and purpose of natural sciences should be more widely popularized. Unesco, too, was in need of decentralization, and should devote more of its attention to creating a better appreciation of Eastern culture, particularly of Eastern classics. It would seem that the whole relation of Unesco to India would benefit from very careful study, in view of the importance of India in Asia, and of the

interest that country had taken in Unesco.
Netherlands
(38) The report mentioned signature of the Copyright Convention and contained information on the implementation of Unesco resolutions.
(39) The National Commission was clearly very active. The Netherlands Unesco Centre, working under its auspices, dealt with problems of mass communication. It issued press releases, published a monthly news bulletin and promoted the sale of Unesco publications.
(40) The Netherlands acknowledged assistance from Unesco after the flood disaster. Money raised by the Gift Coupon Scheme had aided educational reconstruction.
(41) The working party, Miss Bishop concluded, stressed the importance of a statement made in the report to the effect that it was found difficult to present Unesco to the general public as a living reality. The Netherlands felt that the Centre should devote its attention to forming an improved information service.
New Zealand
(42) New Zealand had decided not to sign the Visual and Auditory Materials Agreement, but its ratification of the Importation Convention was expected in the near future; the Copyright Convention was being considered.
(43) Interesting information was given on the implementation of Unesco resolutions.
(44) The National Commission was mainly concerned with stabilizing work done in the different fields.
Union of South Africa
(45) The attitude of this Member State to the Visual and Auditory Materials Convention was not clearly stated. It had been decided not to sign the Computation Centre Agreement. The Union of South Africa, being a member of the Berne Convention, did not feel bound to sign the Copyright Convention.
(46) Unesco resolutions had been implemented in various fields (education, natural science and cultural activities).
(47) The South African National Commission was still an interim body. It worked largely through the National Advisory Council for Adult Education and its standing committees for arts, science, adult education and physical education. There was little public interest in the work and purposes of Unesco.
Indonesia
(48) Although the Importation Convention had not been signed, facilities had been granted for the importation of scientific equipment. The Copyright Convention had not yet been adequately considered by the National Commission. The Government was in favour of joining the Berne Convention.
(49) As to implementation of Unesco resolutions, close co-operation was kept up with Unesco through the Unesco Affairs Section of the Ministry of Education. The National Commission did not however keep Unesco sufficiently informed of operations. Several Unesco officials had visited the country. Unesco's help was found particularly useful over technical assistance.
(50) The National Commission, formed in 1951, now consisted of 33 members, under the chairmanship of the Minister of Education.
(51) Some work had been done to promote understanding of the United Nations and of Human Rights.

(52) The CHAIRMAN thanked the delegate of the United Kingdom for the report, which, although nominally representing the joint work of the Iraqi and United Kingdom delegations, had been produced entirely by herself.

The meeting rose at 6.45 p.m.

# SIXTH MEETING

*22 November 1954 at 10 a.m.*

*Chairman:* Mr. AL-HANI (Iraq)

**ITEM 10.2 OF REVISED AGENDA: CONSIDERATION OF REPORTS PRESENTED BY MEMBER STATES FOR 1952-53** (continued)

(1) Mr. HAZOUME (France) said that, having been chosen to submit to the Committee observations on the reports from Cambodia, Laos, Lebanon, Viet-Nam and Poland, he had decided that the best method was to take each section of the plan sent to Member States in December 1953 (CL/867, Annex) and to make a statement on the activities of the first four States under each section. As the document sent by Poland differed substantially from the others, it would be presented separately. He was therefore submitting his report in six sections as follows:
I. Introductory comments (Unesco membership of each State).
II. Information concerning the efforts made by each Member State concerned, in the fields of education, science and culture.
III. The international conventions accepted by those States either officially or unofficially during the period 1952-53, and the efforts they had made to give effect to international recommendations.
IV. Action taken to implement the resolutions of the Unesco programme, with its sub-sections on education,

exchange of persons, natural sciences, social sciences, cultural activities and mass communication.
V. National Commissions and all other co-operating bodies, and their activities.
VI. Measures taken on behalf of organizations other than those recognized by Unesco to associate them in the execution of the Unesco programme.
(2) In the second part of his remarks, dealing with the report submitted by Poland, the French delegate said that that country, which had been a foundation member of Unesco, had later suspended and only very recently resumed its collaboration. In his opinion, its most recent report was much more a document containing information on Poland's activities in the educational, scientific and cultural fields, than a report sent in reply to the Director-General's request in accordance with the proposed plan.
(3) By way of concluding his analysis of the reports, he said that, while they fulfilled their purpose, they gave few or no particulars at all under certain headings which Unesco rightly regarded as very important. That remark applied especially to the Polish report.
(4) He drew special attention to the relative silence concerning mass communication questions.
(5) He considered that the reports did not adhere closely enough to the plan proposed for their preparation, with the result that the information supplied was sometimes confused or obscure.
(6) Generally, he thought that the Secretariat should do some preliminary work on the reports so as to produce an overall picture of the various activities listed in them, in relation to Unesco's general and special activities.
(7) That was the method of work he had himself adopted for the reports he had examined, but he feared the drafting of the Committee's general report would not be lightened by the fact that other rapporteurs had felt constrained to submit their observations on each report individually, that being the method employed by previous committees.

(8) Mr. HONG HOEUNG DOEUNG (Cambodia), submitting the reports presented by Austria, Greece, Iran, Syria and Turkey, said that his method had been to deal with each report section by section in accordance with the following scheme:
I. Structure and layout of the report;
II. Content of the report (comprising in whole or in part the sections proposed by the Director-General);
III. His own conclusions.
(9) He thought that from the Austrian report there emerged an impression of hard work and of optimism as to the future relations between that country and Unesco. The recommendations and general resolutions of the sixth and seventh sessions of the General Conference had been put into effect, the National Commission was active and well organized.
(10) The report showed that Austria was taking more and more interest in its membership of Unesco, and an effort of that kind for revival of cultural activities immediately after a destructive war deserved every encouragement.
(11) The report from Greece contained important and fairly complete information on the progress achieved. It showed that the Greek Ministry of Education had been very active, but there was nothing to indicate to the General Conference the extent, unquestionably considerable, of the Ministry's collaboration in Unesco's work.
(12) The report on Iran conformed by and large to the plan proposed by the Director-General. It set out in six sections the activities of the National Commission and its sub-committees in giving effect to the different points in the Unesco programme.
(13) He considered that Iran's effective collaboration in Unesco's work was due to the essentially sound organization of its National Commission, the Iranian Government's resolute co-operation, and the support given by cultural and social organizations.
(14) The Syrian report followed the proposed plan fairly closely and gave a general picture of Syria's participation in Unesco's work; it also gave particulars concerning the implementation of certain parts of the programme.
(15) He thought that Syria and Unesco should be in even closer contact than at present in the implementation of the General Conference's resolutions.
(16) The Turkish report was, generally speaking, in accordance with the plan suggested by the Secretariat, and certain of the five chief sections with which it dealt were adequately developed.
(17) The Secretariat should make a special note of the particularly satisfactory results achieved by the Turkish National Commission, whose close collaboration with the Unesco Secretariat promised to be even more fecund in the future. It was to be hoped that the National Commissions of the other countries would achieve similar results and that they would be helped to do so by even more watchful attention on the part of the Secretariat, as had been the case in Turkey during the implementation of certain points in the regular programme and the Expanded Technical Assistance Programme.

(18) The CHAIRMAN thanked the delegates of France and Cambodia for their detailed analyses of the reports.

The meeting rose at 12.45 p.m.

# SEVENTH MEETING

*23 November 1954 at 3.30 p.m.*

*Chairman:* Mr. AL-HANI (Iraq)

**ITEM 10.2 OF REVISED AGENDA: CONSIDERATION OF REPORTS PRESENTED BY MEMBER STATES FOR 1952-53 (continued)**

(1) The CHAIRMAN opened the meeting and invited the delegate of Turkey to present his statement on the six reports with whose study he had been entrusted - those of Belgium, France, Italy, Monaco, Switzerland and Yugoslavia.

(2) Mr. TUNCEL (Turkey) first expressed the satisfaction he had felt upon reading those reports, which, in their form and content, adhered generally to the plan proposed by the Director-General and to the recommendations of the Committee.
(3) The Belgian report - which might be criticized for exceeding the number of pages prescribed - showed very clearly that the Belgian public displayed interest in Unesco whenever the latter intervened in a field of practical interest which demanded international action. Thus an understanding of Unesco's objectives and activities had been greatly promoted in Belgium by the creation of bodies like the European Organization for Nuclear Research, or by the organization of meetings such as the International Conference on the Rôle and Place of Music in the Education of Youth and Adults.
(4) Mr. Tuncel stated that, in the field of fundamental education, the efforts made by Belgium, France, Italy and Yugoslavia merited special attention. Thus, the fundamental education work carried out by Belgium in the Congo and Ruanda-Urundi deserved the highest praise. France, too, had tackled the problem courageously. The Fundamental Education Sub-Committee of the National Commission was particularly active, and fundamental education experiments in the French territories of Central Africa had finally resulted in the creation, in French West Africa, of the Centre fédéral d'éducation de base (Federal Fundamental Education Centre) at Dakar. The efforts made in Italy by the Italian Central Committee for Popular Education to develop reading centres, and to set up national and provincial information centres for adults, also deserved notice. A special committee for fundamental education and the study of its social and cultural problems had been set up within the Italian National Commission, independently of the Adult Education Committee which had proved very effective. Lastly, Mr. Tuncel said, note had to be taken of the efforts of the sub-committee set up within the Yugoslav National Commission to deal with all fundamental and adult education problems.
(5) Mr. Tuncel then passed to the question of education for living in a world community, in connexion with which steps of many different kinds had been taken in Belgium; those steps were bound to help very considerably in spreading and extending a spirit of international understanding. In that context Mr. Tuncel recalled that it was Mr. Verniers who had taken the Chair in July 1953 at the Expert Committee which had been convened at Unesco House to study the principles and methods of education for living in a world community.
(6) The French National Commission had for its part issued a certain number of publications which might prove very useful for instruction about living in a world community; the Italian National Commission had also helped in developing international understanding, and particularly in bringing Italian and foreign youth closer together, by presenting a collection of children's drawings from some sixty countries.
(7) In the same field, it should be mentioned, continued Mr. Tuncel, that 5,000 copies of an issue of the Courier devoted to Human Rights (December 1953) were distributed through the good offices of the Swiss National Commission. On the occasion of Human Rights Day, 10 December, that Commission had also granted subventions to certain educational reviews, which made it possible for them to publish special numbers. In Yugoslavia, Mr. Tuncel added, measures had also been taken with a view to improving teaching about the United Nations and Human Rights.
(8) Mr. Tuncel went on to say that very useful work had been done, in the six countries under consideration, to assist the teaching and dissemination of science. In that respect he made special mention of the activities of the Commission scientifique des programmes (Scientific Programme Committee) under the chairmanship of Mr. P. Rivet, and of the Comité scientifique (Science Committee) under the chairmanship of Professor Laugier. He particularly drew members' attention to the value of the national and international symposia which had been organized in 1953 by the Centre national de la recherche scientifique (National Centre for Scientific Research). As regarded the popularization of science, the efforts made during that same year by the Palais de la Découverte and the French Broadcasting and Television Service could also be quoted as examples.
(9) In the case of Belgium, Mr. Tuncel continued, the following were the principal facts to be mentioned with regard to the teaching and dissemination of science: publication of a guide for the preparation of authors' abstracts, ratification of the Convention establishing an International Computation Centre, and of the agreement setting up a Council of

Representatives of European States for Nuclear Research; and measures taken by the National Association of Mathematics Teachers, the History of Science Museum at Ghent, the Science Club at Liège, the Royal Natural Science Institute and the Zoological Garden at Antwerp, for the popularization of science.

(10) Yugoslavia had for its part contributed usefully to the development of international scientific co-operation by publishing, in two of Unesco's working languages, a review giving a general idea of scientific activity in that country. Finally, in Monaco the National Commission was at present examining the desirability of drawing up multilingual dictionaries of terms used in oceanography, palaeontology and exotic botany.

(11) In the field of cultural activities, the six countries under consideration had done much brilliant work calculated to promote international co-operation. Thus, in 1953, Belgium had set up a National Music Council and a National Council for the Visual Arts. A Belgian theatre centre had also been formed to act as an international information service. The travelling exhibitions prepared by Unesco had been shown in approximately 50 places in Belgium during the last two years. Lastly, the first International Poetry Biennale, held at Knokke in September 1952, had brought together two hundred poets from thirty countries.

(12) In France, Mr. Tuncel continued, the National Commission had given generous aid to international organizations endeavouring to bring about collaboration between the various countries in cultural activities and humanistic studies. The authorities also wished to enable all sections of the French population to participate in the community's cultural life, and for that purpose they sought to develop rural community centres, youth and culture hostels, radio clubs, ciné-clubs and, above all, regional drama centres.

(13) Mr. Tuncel then enumerated the chief events to which Italy's keen interest in cultural activities had given rise: the reception in Venice of the International Conference of Artists; the creation of the National Committee of Visual Arts; the making of colour reproductions of a certain number of characteristic works painted, since 1860, by Italian artists; the organization of lending library services in the provinces, and the formation of a National Bibliographical Committee.

(14) Mr. Tuncel observed that the interest which H.S.H. Prince Peter of Monaco took in arts and letters had particularly encouraged the development of cultural activities in Monaco; the literary prize "Rainier III" was still awarded every year.

(15) Mr. Tuncel mentioned the creation in Yugoslavia of a vast network of cultural and artistic societies, which, through the organization of choral singing and concerts, helped to raise the level of the whole population's artistic education. He also stressed the very important part played by the Yugoslav Commission for Cultural Relations with Foreign Countries. That Commission had assisted a large number of Yugoslav painters to exhibit a selection of their works abroad. It had also been responsible for sending to foreign capitals the magnificent national ballets from Belgrade and Zagreb.

(16) Mr. Tuncel concluded that the six countries in question could be regarded as having implemented Unesco's programme very satisfactorily, and that in each of them the National Commission had duly performed its tasks as a body for advice and liaison.

(17) Having recognized that the account he had just given could furnish no more than a general picture of the activities undertaken in those countries in the various fields of interest to Unesco, Mr. Tuncel said he wished to inform the Committee of two suggestions which he had received from the Italian National Commission.

(18) That Commission desired, in the first place, that the International Social Science Bulletin should devote more space to legal questions; in particular, it suggested that Unesco should enlist a certain number of legal experts to make, for publication in the Bulletin, studies on the constitutional crises of our time.

(19) Secondly, with regard to Unesco Coupons, the Italian National Commission mentioned that the dilatoriness shown by certain suppliers in sending the books which had been ordered from them was likely to harm the system by discouraging buyers. The Commission therefore suggested that the necessary steps should be taken to remedy that situation.

(20) The CHAIRMAN called upon the representative of the United States of America to present his report.

(21) Mr. CONNORS (United States of America) said that Mr. McCullough, who was the Executive Secretary of the United States National Commission, regretted that the Commission had been unable to submit the report of the United States of America in time for it to be included with the reports of the other Member States in the printed volume (document 8C/4). Mr. McCullough was unfortunately detained in the Working Party on Decentralization and had asked Mr. Connors to take his place in presenting to the Committee the brief report he had prepared.

(22) Mr. Connors then proceeded, on behalf of Mr. McCullough, to present to the Committee a brief account of the reports of Australia, Canada, Denmark, Japan, Norway, Sweden and the United Kingdom, which were in close conformity with the form and structure requested by the Director-General, and on the report of the Union of Burma. The latter provided interesting data on the remarkable progress in Burma in the extension of education at all levels, on the participation of Burmese representatives in Unesco conferences, and on certain projects in Burma receiving Unesco assistance. It did not, however, conform to the outline suggested by the Director-General, nor did it make clear to what extent its educational programme related to Unesco and its programme.

(23) The report of Australia could be cited as a model of conciseness and relevance to the Unesco programme. It stressed the benefits Australia had derived from participation in Unesco seminars, conferences and meetings of experts, to which representatives of Australia themselves had made substantial contributions. The Government or the National Advisory Committee for Unesco had organized regional and national conferences to extend

to a wider audience an understanding of the matters discussed at Unesco conferences. The report revealed Government and National Advisory Committee initiative in undertaking projects responsive to Unesco resolutions. An example was the preparation of a travelling exhibition of Australian Aboriginal culture, which was received with great interest in the United States of America and which would soon be available to other countries.
(24) The report suggested that more Unesco projects should be designed so as to allow a larger measure of co-operation by National Commissions.
(25) The report of Canada stressed the development of closer co-operation with Unesco, the assistance given by national organizations in carrying out work related to Unesco's aims, and "growing public consciousness in Canada of the importance of the arts". Examples of that upsurge of interest in the arts were included in the report. The difficulty of complying with some of the requests received from the Secretariat were set out.
(26) The absence of a National Commission in Canada was mentioned as one handicap, but recognition was given to the generous support of co-operating agencies and organizations.
(27) The report of Denmark stressed the action undertaken to implement Unesco resolutions and provided useful information about the Danish National Commission.
(28) The report indicated notable progress in the development of bilateral studies of textbooks. It described several activities to make Unesco better known in Denmark, especially through projects offering an opportunity for popular participation, such as the Unesco group travel plans and the coupon programme.
(29) The report of Japan indicated unusual activity closely related to resolutions of the General Conference. Japan had undertaken important exchanges of art exhibitions with a number of other Member States, and great interest had been aroused in Japan by travelling exhibitions prepared by Unesco.
(30) Education for international understanding, including programmes both for children and adults, was a matter of particular interest. Public knowledge of Unesco had been promoted through publications, seminars and the use of the media of mass communication. Japan had been an active participant in Unesco seminars and conferences, both as host and by sending its experts to meetings in other parts of the world.
(31) The Japanese National Commission was an effective participant in those activities. It was well organized and well staffed, with a recognized rôle in promoting both specialized and popular interest in Unesco's work.
(32) The report of Norway indicated the establishment of a permanent secretariat to the National Commission during the 1952-53 period and an extensive and balanced attention to the wide range of work in which Unesco was engaged.
(33) A lively interest in education for living in a world community was indicated by the number and variety of projects undertaken in that field.
(34) A number of Norwegian workers participated in Unesco group travel schemes during the period. Particular mention should be made of progress in Norway in the field of applied social sciences, an area of work mentioned by few Member States.
(35) The report of Sweden recalled that its National Commission was responsible for all official relations with Unesco. Thus its report was largely an account of activities carried out under the auspices of the National Commission, which had the status of a governmental body under the Ministry of Education. Those activities included projects in almost every field of Unesco's interest. Sweden, like a number of other countries, had associated with its work a large number of non-governmental national organizations, and was increasingly informing its people about the work of the United Nations and the Specialized Agencies through every medium of mass communication.
(36) The report of the United Kingdom provided an excellent example of the ways in which a highly developed country benefited from its participation in Unesco, while at the same time making major contributions to the implementation of Unesco's programme in other parts of the world.
(37) For example, Unesco's programme for international understanding stimulated the preparation of a new publication in the United Kingdom called Teaching for International Understanding. That publication was not only of value in the United Kingdom, but had served as a guide to certain other countries in the preparation of similar materials on teaching for international understanding.
(38) Another example was its participation in seminars and meetings of experts, both as host and by sending distinguished experts to meetings in other areas of the world.
(39) While the national bodies which co-operated with the National Commission of the United Kingdom had been generous in their interest and participation in Unesco work, the report pointed out the continuing lack of general public knowledge and appreciation of what Unesco was and what it was trying to do, and the National Commission accepted the responsibility for improving that situation.

(40) The CHAIRMAN called upon the representative of South Africa to present his report.

(41) Mr. WIDDOWSON (Union of South Africa) said that the report of Ceylon showed a keen awareness of the necessity for disseminating information concerning the aims of Unesco and indicated that the problem was being energetically tackled. It was noted particularly that efforts had been made by the authorities in co-operation with the National Commission to include material on the United Nations and Unesco in the curriculum of both primary and secondary schools.
(42) The report of China showed that, in conformity with the Unesco programme for 1952-53, much progress had been made in education and the social sciences. Efforts were being made to spread knowledge of Unesco through the media of mass communication.
(43) The report of Egypt showed great activity in fundamental education. One of the most impressive developments in that field was the establishment of the first Arab States Fundamental Education Centre, the administration of which had been entrusted to

Unesco. Keen interest had been displayed in seminars and conferences. Much progress was also recorded in the field of adult education.
(44) The report of Iraq reflected the energetic efforts of the authorities to implement the aims of Unesco, more particularly in the field of primary education, where impressive results were being achieved. Iraq had shown great interest, and had participated, in almost every cultural conference and seminar organized by Unesco. With the help of a Unesco mission a vigorous approach had been made to the problems of adult and fundamental education.
(45) The report of Israel indicated the existence of a highly organized and very active National Commission. A particularly interesting aspect of its work was noted in connexion with the use of the media of mass communication to give publicity to the work and aims of Unesco.

(46) The CHAIRMAN thanked the representatives of Turkey, the United States of America and South Africa for their reports, which provided a valuable contribution to the study of the matter under consideration. The first stage of the Committee's work had been completed.

The meeting rose at 5.45 p.m.

# EIGHTH MEETING

*24 November 1954 at 3.30 p.m.*

*Chairman:* Mr. AL-HANI (Iraq)

(1) The CHAIRMAN invited the delegate of the United States of America to introduce his proposals for the Committee's report.

(2) Mr. McCULLOUGH (United States of America) asked if he might first submit his comments on the report of the Brazilian Government.

**ITEM 10.2 OF REVISED AGENDA: CONSIDERATION OF REPORTS PRESENTED BY MEMBER STATES FOR 1952-53 (continued)**

(3) Mr. McCullough said that the report of the Brazilian Government which had been presented in six sections in accordance with the Director-General's suggestions, showed intensified co-operation between Brazil and the Secretariat of Unesco during the past two years. Of especial interest was an account of the efforts of the Brazilian Institute of Education, Science and Culture (which was acting as the National Commission) to publicize the Declaration of Human Rights. The work of the Institute had been greatly stimulated by visits from members of the Secretariat, in particular, the Director-General and the Assistant Director-General.
(4) The headquarters of the National Commission was set up in 1952, with a documentation service, and during that year the secretary had spent four months at Unesco headquarters. A budget had been provided for the secretariat of the National Commission since 1953.
(5) Activities included the issue of a monthly bulletin, a number of publications (listed in the report) and co-operation with commissions in other States of Brazil - an interesting experiment in State co-operation in a country with a decentralized government.
(6) The activities of the National Commission and the Brazilian Government on behalf of Unesco had shown a steady increase during the two years under review.

**ITEM 10.4 OF REVISED AGENDA: REPORT TO THE GENERAL CONFERENCE**

(7) Turning to the question of the Committee's report, Mr. McCullough said that the suggestions he had to offer were not intended as a draft, but were ideas which, if approved by the Committee, might serve as a basis for the Secretary and the Rapporteur in preparing the report. Their adoption would necessitate some modification of resolution 60 of the seventh session of the General Conference.

Form and Content of the Reports

(8) Mr. McCullough said that, in the first place, it was essential to find a more efficient method of work for the Committee. To that end he hoped that for the next General Conference the Secretariat would be able to prepare an analysis of the reports so that the Committee would not have to spend time on a detailed study of the individual reports but would be able to start immediately on its real task of formulating proposals to guide the Conference in framing policies relating to Member States.
(9) As to the form in which Member States should submit their next set of reports, he proposed that they should be in four main sections, with two obligatory annexes. The four sections would contain: (1) an introductory comment; (2) information

on action taken to implement the resolutions of the seventh and eighth sessions of the General Conference (formerly Section 4); (3) information on measures to establish, promote and assist the National Commission or other co-operating bodies, and a survey of their activities (formerly Section 5); (4) information on measures to assist and develop other organizations and associate the appropriate national groups or institutes with the execution of Unesco's programme (formerly Section 6). The obligatory annexes would deal with the most important changes in laws and regulations affecting education, science and culture (formerly Section 2); and action taken on international conventions and recommendations adopted by the General Conference (formerly Section 3).
(10) A specific outline should be provided by the Secretariat for those annexes in order to permit the Member States to submit their information in a uniform way, which would be of greatest use to the Secretariat and to each other.

(11) Miss BISHOP (United Kingdom) agreed that the task of the Committee was not to conduct a detailed examination of the reports, but to draw conclusions from them. She therefore supported the proposal that the Secretariat should be responsible for studying the reports and pointed out that a change of procedure for the Committee would be involved.

(12) Mr. TUNCEL (Turkey) thought that the Committee agreed in general with the United States proposals, which could be usefully inserted in the Committee's final report.
(13) He had however additional suggestions to make. The Committee might with advantage be enlarged, as he had already recommended on behalf of the Turkish delegation during the general discussion of the Director-General's report. The Committee should be in a position to play a more important rôle and give effective help to the Executive Board in drawing up the draft programme.
(14) Member States' reports were a valuable source of information on their real needs and should be taken into consideration in planning the draft programme. He was therefore in favour of increasing the membership of the Committee and widening its competence.

(15) Mr. HONG HOEUNG DOEUNG (Cambodia) seconded the Turkish delegate's proposals, since in his view the programme should primarily be based on Member States' reports. The Committee should perhaps meet a few days before the opening of the Conference, in accordance with the practice adopted for the Advisory Committee on Programme and Budget.

(16) The CHAIRMAN asked for comments on the proposal of the Turkish delegate that the Committee's membership be increased and its powers extended.

(17) Mr. HONG HOEUNG DOEUNG (Cambodia) said that he entirely agreed with the proposals for increasing the membership of the Committee and adding to its powers.

(18) In reply to the CHAIRMAN, Mr. TUNCEL (Turkey) suggested that the number of members of the Committee be increased from, say, 11 to 18.

(19) Miss BISHOP (United Kingdom) asked the delegate of Turkey what would be the advantage of increasing the membership of the Committee. She doubted its efficacy in ensuring attendance at meetings, since many delegations found it difficult to supply members for all the working bodies of the Conference.

(20) Mr. TUNCEL (Turkey) thought that a larger Committee would find it easier to go through Member States' reports. In the current year the Committee had been in some difficulty owing to the increased number of reports to be reviewed. His proposal had the purely practical object of allowing a more penetrating analysis of Member States' reports.

(21) Mr. McCULLOUGH (United States of America) said that the proposal of the Turkish delegate touched on one of Unesco's main problems, which was how to secure an objective account of the way in which Member States implemented Conference resolutions. With regard to the review of work by Member States, it was inevitable that members should emphasize achievements rather than omissions.
(22) If a more important function could be formulated for the Committee, especially with regard to National Commissions and Member States, its status would be enhanced in the eyes of the Conference and delegations would be obliged to appoint members.

(23) Mr. TUNCEL (Turkey) asked for the Secretariat's opinion.

(24) Mrs. MALTERRE (Secretary of the Committee) thought that the increase in the membership of Unesco made it reasonable to contemplate enlarging the Committee. It might therefore be advisable to bring in two or three more members.

(25) Mr. TUNCEL (Turkey) suggested that, to avoid causing the Conference any anxiety, the Committee should recommend increasing its membership to fifteen.

(26) The delegate of Ecuador supported that proposal.

(27) In reply to Mr. HONG HOEUNG DOEUNG (Cambodia), Mrs. MALTERRE (Secretary of the Committee) said that the volume containing the reports received by the Secretariat within the time-limit was sent to governments seven weeks before the Conference opened, but the main question to be settled was that of reports arriving late. The Committee knew from experience the difficulties to which that gave rise, and a solution would be all the more necessary if the Secretariat was to be asked to make a more thorough preliminary analysis of the reports.

(28) Mr. TUNCEL (Turkey) was averse to taking a

decision with regard to reports received late. There was always such a possibility, but it should be regarded as exceptional and no provision should be made for it in advance.

(29) Mrs. MALTERRE (Secretary of the Committee) felt that attention should nevertheless be drawn to the need for observing the time-limit, since the Secretariat would otherwise be unable to make the proposed analysis of the reports and the Committee itself would have to review late reports, as it was doing that year.

(30) The CHAIRMAN thought it would be helpful to insist upon the time-limit being observed, and asked whether the Committee would agree to insert a recommendation to that effect in its report.

(31) Mr. TUNCEL (Turkey) pointed out that the Committee was responsible for an exhaustive analysis of the reports; and he felt it would be better not to spend too much time on the question of late reports. He was not however, opposed to inserting in the report a recommendation on the observance of the time-limit.
(32) Reverting to the Cambodian delegate's proposal, which he willingly supported, he feared that in practice it might prove very difficult for Member States to send representatives to Committee meetings before the General Conference opened.

(33) Mrs. MALTERRE (Secretary of the Committee) thought it would be possible to convene the Committee in the very first days of the session so that it could circulate its report to the Programme and Budget Commission at an early date, before submitting it in plenary session.

(34) Mr. HONG HOEUNG DOEUNG (Cambodia) agreed with that solution on condition that the Programme and Budget Commission only met after the Committee for the review of Member States' reports.

(35) Mr. McCULLOUGH (United States of America) said that it would assist the work of the Committee at the next Conference if the fifteen members could be designated before the end of the present Conference, and if each country would undertake to reply to the Director-General's letter, sent together with his observations on the reports of Member States, and submit proposals for the Committee's agenda.

(36) The proposals of the delegates of Turkey and the United States of America were approved.

(37) On the proposal of the United States delegate, it was further agreed to include the following sentence in the Committee's report: "The Committee notes with satisfaction the increased number of reports received on time this year and urges Member States to comply with the regulations".

(38) The discussion having reverted to the form of future reports, Mr. TUNCEL (Turkey) recalled that in Section 2 of the plan proposed by the Director-General (document 8C/4, page 5), Member States were invited to supply "information on the most important changes made in laws and regulations relating to education, science and culture". In most of the reports the following note appeared in Section 2: "The information supplied under this heading has been sent to the Clearing House of the Department of Education in Unesco".
(39) As those reports were finally intended for the general public, he thought that Member States should treat that part of their report with the attention it deserved.

(40) Mr. McCULLOUGH (United States of America) agreed that it was essential to retain in the reports a compilation of information on the most important changes in laws and regulations affecting education, science and culture, and also that the Committee should be given a summary of the contents of that part of the report. He had proposed it as a separate annex because of its importance and because it did not fit into the framework of the first four sections.

(41) Mr. TUNCEL (Turkey) explained that he was willing to agree to the information in question appearing as an annex, or in any other form in reports framed in accordance with the new plan that had been suggested.

(42) Mrs. MALTERRE (Secretary of the Committee) pointed out that the reasons for deleting Section 2 were set out in the introduction to the volume containing Member States' reports. The available appropriations were insufficient to allow publication of the total content of reports in one volume and it had therefore been necessary to pass the information under Section 2 to the Clearing House of the Education Department. She added that Member States had been requested to keep their reports within 5 to 15 pages of typescript, but in many cases they had greatly exceeded those limits.

(43) The CHAIRMAN asked for a decision regarding the four sections proposed in Part 1 of the United States delegate's suggestions.

(44) Approved.

(45) Mr. McCULLOUGH (United States of America) pointed out that the four sections (with the two annexes) were equivalent to the six sections under the Director-General's existing plan.

(46) Mrs. MALTERRE (Secretary of the Committee) asked whether the Committee wished the compulsory annexes to be published in the same volume as the reports or as separate documents. A budgetary problem was involved.

(47) Mr. TUNCEL (Turkey) thought it necessary to limit the length of reports. If all Member States kept within the fixed limits, it should be possible to avoid the difficulties of publication and yet have available all the information required.

(48) Mr. McCULLOUGH (United States of America)

supported the Turkish delegate's plea for the size of reports to be limited. As, however, it might be difficult for Member States to condense that information in the reports themselves, he proposed that it be contained in compulsory annexes, with summaries of them prepared by the Secretariat and incorporated in its analysis of the reports.

(49) Mr. TUNCEL (Turkey) urged that the annexes too should be as short as possible.

(50) Mr. HONG HOEUNG DOEUNG (Cambodia), while agreeing that the number of pages should be limited, pointed out that that might inconvenience Member States who wanted a little more space. The necessary funds might be found in, for example, the budget of the Department of Mass Communication, where some publications seemed to overlap with others.

(51) Mrs. MALTERRE (Secretary of the Committee) recalled that the sums intended for the publication of Member States' reports appeared in the General Conference budget. It was impossible to take funds from the budget of other departments.

(52) The CHAIRMAN asked for comments on the two proposals:

1. That a limit be set to the number of pages.
2. That, if Member States exceeded the limit, only a summary of their reports would be included.

(53) Mr. McCULLOUGH (United States of America) proposed including a suggestion in the Committee's report that sufficient funds be available for the publication of the reports and that the Director-General be authorized to have summaries made where necessary.

(54) Mr. HONG HOEUNG DOEUNG (Cambodia) would not oppose a limitation on the number of pages but hoped that the maximum allowed would be, say, 15.

(55) Mrs. MALTERRE (Secretary of the Committee) pointed out that Member States had been asked to keep to an average of 10 pages, but all the reports received contained at least 15. For practical reasons, therefore, it would be better to fix a pretty strict limit.

(56) Mr. HONG HOEUNG DOEUNG (Cambodia) remarked that the National Commissions of small States were anxious to obtain publicity for those of their activities which they considered the most interesting. Their publication funds being inadequate, such information had to be included in Member States' reports and an adequate number of pages was needed for that purpose.

(57) Mrs. MALTERRE (Secretary of the Committee) pointed out that, if the question were that of periodical reports concerning National Commissions, there already existed in Unesco's Official Bulletin a special section dealing with the Commissions Other information on their activities appeared in the Courier, Unesco Features, etc. Several Commissions also published their own bulletin.

(58) Miss McPHEE (Secretariat) said that one of the chief difficulties facing the Secretariat in relation to Member States was the lack of information about them and interest on their part. It was difficult to find interesting information for the Official Bulletin, and, if reports of activities were forthcoming, the Secretariat would be glad to publish them in the Official Bulletin and in the Courier and the Radio Review.

(59) Mr. HONG HOEUNG DOEUNG (Cambodia) pointed out that many National Commissions had been founded very recently and often had no news to publish. It might be a useful suggestion that the Official Bulletin should publish, in the issue preceding the opening of the Conference, fuller information on the work of the various National Commissions.

(60) After mentioning that the problem of periodical news about the activities of National Commissions was entirely different from that of Member States' reports, Mrs. MALTERRE (Secretary of the Committee) said that, as editor of Unesco's Official Bulletin, she would be glad to publish in it any news from National Commissions.

(61) Mr. TUNCEL (Turkey), reverting to the question of the size of reports, suggested that the limits laid down for the present session of the Conference be retained. It could, however, be stated, without causing inconvenience, that the maximum number of pages should be between 10 and 15.

(62) The CHAIRMAN summarized the points on which the Committee had agreed: 1. That reports from Member States should not exceed 15 pages. 2. That, if any Member State exceeded the limit, the Secretariat had the right to summarize that report. 3. That the two annexes should be issued as separate documents.

Action Reported by Member States

(63) Mr. McCULLOUGH (United States of America) said that his first proposals dealt with procedures and the form of reports. Those that followed represented conclusions reached after studying the reports of Member States submitted to the present session of the General Conference and concerned the links between the Secretariat and Member States and the need for Member States to assume greater responsibilities.

(64) He suggested that the following points should be emphasized in the Committee's report:

1. The need for continuous communication between the Secretariat and Member States and the value of reporting both failures and successes.
2. The need for closer contact between the Secretariat and each Member State.
3. The need for greater efforts on the part of the Secretariat and the appointment of additional field staff to ensure closer and more effective contact.
4. The need to concentrate effort on activities promoting international understanding and co-operation.

5. The need for more effort to promote public understanding of, appreciation of, and participation in Unesco's work.

(65) The Committee agreed to include the foregoing five suggestions in its report.

The meeting rose at 6.0 p.m.

# NINTH MEETING

*29 November 1954 at 3.30 p.m.*

*Chairman:* Mr. AL-HANI (Iraq)

(1) The DIRECTOR-GENERAL regretted that he had not been able to attend all the meetings of the Committee. He greatly appreciated its work and in particular approved the general trend of the conclusions it had reached. Since a new tendency of the Organization was to pay greater attention to the needs and activities of Member States, the reports they submitted would acquire greater importance. Member States, he hoped, would take still more care in preparing them and he assured the Committee that the Secretariat would give them the most detailed and thorough consideration.

**ITEM 10.4 OF REVISED AGENDA: REPORT TO THE GENERAL CONFERENCE** (document 8C/REP/1 (prov.)) (continued)

(2) The CHAIRMAN invited the Committee to consider its draft final report point by point:

Study of the Reports submitted for 1952 and 1953

(3) This section of the report was approved without comment, except that it was recommended to include in a footnote the list of the 58 Member States having submitted reports.

Conclusions and Recommendations of the Committee

1. Form and contents of future reports

(4) Miss BISHOP (United Kingdom) feared that there might be some overlapping between Section 2 and Annex II.

(5) Mrs. MALTERRE (Secretary of the Committee) did not think Annex II overlapped with Section 2. The latter was intended to contain general information on the implementation of the programme resolutions as a whole, while Annex II would deal with only a few specific points.

2. Recommendations concerning the work of Member States

(6) Approved.

3. Procedure for the study of future reports

(7) Mr. McCULLOUGH (United States of America) expressed a wish to submit a revised text for the final paragraph of the draft resolution contained in the Committee's report, which would have a bearing on paragraph (a) of the third part of the report. He therefore proposed that the Committee consider first paragraphs (b), (c) and (d), and return to paragraph (a) after approval of the text of the draft resolution.

(8) Agreed.

Paragraph (b)

(9) Mr. HONG HOEUNG DOEUNG (Cambodia) found the phrase "allocating, in future, sufficient funds", a trifle vague and suggested replacing "sufficient" by "more".

(10) Mrs. MALTERRE (Secretary of the Committee) explained that for the current year the funds were rather too small but an increase of only some $1,000 for the two coming years would suffice to overcome the difficulties.

(11) Mr. WIDDOWSON (Union of South Africa) thought it would be necessary to justify the request for more funds by pointing out, for example, that with the entry into the Organization of new States the number of reports being submitted was steadily increasing.

(12) Mr. HAZOUME (Rapporteur) recalled that the Committee was not empowered to fix a figure for increased appropriations, but it could stress the need for such an increase.

(13) He therefore suggested that paragraph (b) be completed by a phrase to the effect that, in consequence of the constant increase in membership, and, consequently, of the total volume of reports submitted and costs of publication, the attention of the General Conference should be drawn to the need for adjusting the amount allotted under that head.

(14) That proposal was approved.

Paragraphs (c) and (d)

(15) Approved.

Draft Resolution

(16) The four first paragraphs were approved.

Fifth paragraph

(17) Mr. HONG HOEUNG DOEUNG (Cambodia) proposed that the word "urges" be substituted for "requests", and Miss BISHOP (United Kingdom) proposed that "strictly" be added before "to observe".

(18) With those amendments the fifth paragraph was approved.

Sixth paragraph

(19) Mr. McCULLOUGH (United States of America) said that the Working Party on Decentralization had completed its work and had adopted a report. In that report it called on the Director-General and the Executive Board to carry out a comprehensive study of the methods of co-operation between the Organization and the Member States and of the possible ways of developing it, such a study to be based on a thorough examination of the work of the National Commissions. If that proposal were approved by the Commission on Programme and Budget, the Committee, he thought, should be more specific in the final paragraph of its resolution. He therefore proposed that the text of the sixth paragraph of the draft resolution be replaced by the following:

"Resolves that the Committee be reconstituted for the next session of the General Conference on a broader basis and with enlarged responsibility.

The new Committee, which shall consist of 15 members to be elected at the present session, shall consider the reports of the Member States and the study by the Director-General of the relationships between the Organization and the Member States.

In the light of this examination, it shall make recommendations

(1) On the form and content of future reports and

(2) On the further development of the participation of Member States in the planning and execution of the Unesco programme."

(20) Mr. HONG HOEUNG DOEUNG (Cambodia) said that in the last paragraph he would prefer to say "on the way in which Member States participated ..." instead of "on the further development of the participation of Member States in".

(21) Mr. McCULLOUGH (United States of America) pointed out that his amendment was concerned with the final act of the Committee on Reports of Member States at the ninth session of the General Conference, when, after considering the work of the Member States, it would be preparing final recommendations for their fuller participation in the planning and execution of the Organization's programme.

(22) Mr. HONG HOEUNG DOEUNG (Cambodia) thought that the two basic ideas in the last paragraph should be brought out quite clearly, viz.

(1) How Member States had effectively participated in framing and executing the programme;

(2) How they should participate in future.

(23) Mr. McCULLOUGH (United States of America) agreed that the proposal of the representative of Cambodia improved the amendment he had submitted and made it clearer.

(24) The CHAIRMAN proposed that the Committee approve the text of the last paragraph of the draft resolution as submitted by the United States representative and amended by the representative of Cambodia.

(25) He also proposed that the Committee approve paragraph (a) under the heading "3. Procedure for the Study of Future Reports", subject to the Secretariat's making the slight alterations consequent upon the adoption of the final text of the last paragraph of the draft resolution.

(26) Agreed.

(27) Subject to drafting changes to be made by the Secretariat, the draft final report was unanimously approved.

(28) Mr. HAZOUME (Rapporteur) undertook, when presenting the final report to the General Conference, to make no changes except those just approved, though he would include in the introduction a few personal words of thanks to the Government and people of Uruguay for their hospitality.

The meeting rose at 4.45 p.m.

# CHAPTER XI

# HEADQUARTERS COMMITTEE

## FIRST MEETING

*15 November 1954 at 4 p.m.*

*Chairman:* Mr. KABIR (India)

*later:* Mr. BERREDO CARNEIRO (Brazil)

(1) Mr. KABIR (Chairman of the Nominations Committee) opened the meeting and announced that Dr. Parra-Perez (Venezuela), Chairman of the Headquarters Committee, was unable to attend the eighth session of the General Conference. The Nominations Committee had therefore proposed that the delegate of Venezuela be replaced by the representative of another Latin American country, Professor Berredo Carneiro, representative of Brazil.

(2) Mr. Berredo Carneiro was elected by acclamation.

(3) He was then invited to take the Chair in place of Mr. Kabir.

(4) The CHAIRMAN thanked the members of the Committee for electing him. He said that the agenda of the meeting had now been exhausted but added that during the current session of the General Conference the Committee would be holding two or three meetings, the times and dates of which would be announced later.

(5) Mr. PHOTIADES (Greece) suggested that the meeting approve the summary records of the seventeenth session of the Committee, which had just been distributed (documents 17 HQ/SR.1 (prov.) and 17 HQ/SR.2 (prov.))

(6) The CHAIRMAN pointed out that that approval was included in the provisional agenda of the Committee's next meeting, which he then read out:

1. Adoption of the provisional agenda (document 18 HQ/1).
2. Approval of the summary records of the seventeenth session (documents 17 HQ/SR.1 and SR.2 (prov.).
3. Supplementary report on the accommodation of the European-African Office of the International Civil Aviation Organization (ICAO) in the permanent Headquarters Building of Unesco (document 18 HQ/2).
4. Supplementary report of the Headquarters Committee and Progress Report of the Director-General (document 18 HQ/3).

(7) The Chairman added that the General Committee would fix the date of the Committee's next meeting.

The meeting rose at 4.20 p.m.

# SECOND MEETING

*25 November 1954 at 3.30 p.m.*

*Chairman:* Mr. BERREDO CARNEIRO (Brazil)

**ADOPTION OF THE PROVISIONAL AGENDA** (document 18 HQ/1)

(1) The agenda was adopted.

**APPROVAL OF THE SUMMARY RECORDS OF THE SEVENTEENTH SESSION** (documents 17 HQ/SR.1 (prov.) and 17 HQ/SR.2 (prov.))

(2) At the proposal of Mr. PHOTIADES (Greece), the summary records of the seventeenth session were approved.

**REPRESENTATION OF THE EXECUTIVE BOARD ON THE HEADQUARTERS COMMITTEE**

(3) Sir Ronald ADAM (Chairman of the Executive Board) hoped that the Headquarters Committee would not object if a representative of the Board thenceforth attended its meetings without the right to vote.

(4) Mr. PHOTIADES (Greece) attached great importance to Sir Ronald Adam's proposal; he thought it essential that the Executive Board should be represented at the meetings of the Headquarters Committee.

(5) Mr. GARDNER DAVIES (Rapporteur) strongly supported the proposal that a representative of the Executive Board attend the meetings of the Headquarters Committee, without the right to vote.

(6) The proposal was adopted.

**PROGRESS REPORT ON BUILDING OPERATIONS IN PARIS**

(7) In response to a request from Mr. GARDNER DAVIES (Rapporteur), Mr. CALLISON (Chief Engineer, Headquarters Office) gave a progress report on the building operations in Paris. The building permit had been received from the French Government, and the site had been cleared of military buildings and was in a suitable state for excavations to start. Satisfactory international bids had been taken and were being evaluated in detail. A collation of satisfactory bids showed beyond doubt that there would be enough money in the budget to construct the Headquarters Building. Thereafter, the letting of contracts and actual process of construction would be a matter of routine. In conclusion, Mr. Callison said that the site had thenceforth been taken over from the French Government, so that Unesco was entirely responsible for it.

(8) Mr. GARDNER DAVIES (Rapporteur) thought the news very satisfactory but, as there had been some delay, he wondered if Mr. Callison would outline the proposed stages of work during 1955.

(9) Mr. CALLISON (Chief Engineer, Headquarters Office) explained that the preparation of contracts had been somewhat delayed because it had been necessary to harmonize bids from a number of countries, and that had involved a great deal of comparison. It would be possible, however, to let the first and most important contract (excavation and masonry) in December, and it was expected to take some eighteen months to execute. A series of other contracts (electricity, plumbing, etc.) would then be concluded progressively. It was estimated that the major part of the shell of the building would be up by the end of 1955, there would also be a considerable number of other trades represented during the masonry work. Dates for contractors, with penalties for delay in delivery, would have been fixed. It was expected that the building would be completely finished at the end of December 1956 or in January 1957.

(10) Mr. COWELL (United Kingdom) thought it fortunate that it had been decided to hold the ninth session of the General Conference in New Delhi, as the permanent headquarters obviously would not be ready in time. The calendar of work showed over six months' delay in starting the actual construction. With regard to tendering, he had had a rather strong complaint from a British electrical firm and wondered if the specifications had been drawn up in the correct way from the point of view of international competition. He asked if Mr. Callison could throw any light on progress in that aspect of the work. It was important to avoid needless complications, as international competition would certainly be intense and the matter would be complicated enough in any case.

(11) Mr. PHOTIADES (Greece) felt that the problem raised by Mr. Cowell was an extremely delicate one. It was difficult to ask the Director-General to lay down particular specifications for any given country. It should, however, be possible to draw up technical specifications acceptable to firms in the different countries.

(12) There was, of course, a problem of dimensions and standards. For the provision of electric plugs,

for instance, they would have to abide by French standards, otherwise they would run up against great difficulties later when it came to replacements. In general, however, the Committee could ask Mr. Callison to see that the specifications would be equally acceptable to British firms, or to those of any other country.

(13) Mr. CALLISON (Chief Engineer, Headquarters Office) was aware of the question raised by the British contractor. He explained that the consulting electrical engineer had been replaced, and although, basically, there had been no change in specifications, additional information had been supplied to firms wishing to tender. At all events, the complaint was being investigated.

(14) Mr. POMPEI (Italy) emphasized that the question was more than a technical one. The Secretariat had laid down extremely detailed specifications - too detailed, in the opinion of some firms - and that showed that Unesco's interests had been diligently defended.
(15) Mr. Pompei wished, nevertheless, to be informed about the method used for invitations to tender and the awarding of contracts. With regard to prices, the offers could certainly be worded very briefly and sent in a single envelope. On the other hand, several copies of technical details should be supplied so that they might be examined by all the experts concerned. It would also be useful to deposit in one of Unesco's safes a copy bearing Unesco's seal and the signatures of the members of the Headquarters Building Contracts Committee.

(16) Mr. CALLISON (Chief Engineer, Headquarters Office) replied that the problems mentioned by the delegate of Italy had been anticipated and that all precautions had been taken. The procedure had been that prices had come in one set of sealed envelopes, and technical offers in another. They had been kept under lock and key until all the material was in Unesco's possession. When the deadline for the submission of materials had run out, the tenders had been opened in the presence of the seven members of the Headquarters Contracts Committee; they were at present being examined for accuracy, thoroughness and conformity with the project. The problem of combining contractors of different nationalities was being broached with the utmost care and secrecy. All action would be on record and, when secrecy was no longer necessary, could be verified by anyone. The fact that Unesco, as an intergovernmental organization, enjoyed exemption from certain taxes and import duties had complicated the base offers, and adjustments had had to be made in order to ascertain the exact cost for Unesco.

(17) Mr. COWELL (United Kingdom) thanked Mr. Callison for his explanations. He thought that it would be useful if the Committee could have a document containing a schedule of all the operations described by Mr. Callison. He had no intention of bringing pressure to bear on behalf of any British firm, but he felt justified in pointing out that the invitations to tender had all been drafted in French without any indication that specifications were required; also that the specifications had been changed, not leaving contractors much time afterwards.

(18) Baron van der STRATEN WAILLET (Belgium) wished to know what method was used for publishing invitations to tender. Did the Secretariat act through government channels or did it establish direct contact with the firms it thought most competent?
(19) The Belgian delegate also asked whether the Secretariat was going to invite further tenders and, if so, how firms interested could get in touch with the Secretariat to offer their bids.

(20) Mr. CALLISON (Chief Engineer, Headquarters Office) replied that, at the present time, 85 to 90% of the bids had been made. Others would come later, and their scope would be determined to some extent by the initial bidding. As to the results of the bidding, nothing had yet been decided, but successful bidders would be notified in due course. Invitations to tender had been published in the French newspapers and letters announcing the competition had been sent to all National Commissions. Some countries had been very active in passing on the information to their contractors, while others had replied that, in view of the distances involved, it was not an interesting proposition for their firms. All parties interested wrote and secured questionnaires, and replies to 1,500 questionnaires had been received. It was found that there were more qualified contractors than could possibly be used. Those with the best qualifications had therefore been selected and notified that they could bid. All had operated on the basis of identical materials.

**SUPPLEMENTARY REPORT ON THE ACCOMMODATION OF THE EUROPEAN-AFRICAN OFFICE OF THE INTERNATIONAL CIVIL AVIATION ORGANIZATION (ICAO) IN THE PERMANENT HEADQUARTERS BUILDING OF UNESCO** (document 18 HQ/2 and Add.)

(21) The CHAIRMAN recalled that the question had already been examined at the Committee's seventeenth session and since then had been the subject of direct negotiations between the Director-General and representatives of ICAO. He asked the Legal Adviser and the Rapporteur to explain the present position to the Committee.

(22) Mr. SABA (Legal Adviser) said that the legal problem raised by ICAO's request was as follows: to construct on a site for which the French Government had granted Unesco a 99-year lease, renewable every 99 years, a building for the accommodation of ICAO, and if necessary, in the upper storeys, for the accommodation of Unesco. The Secretariat intended to safeguard in its integrity Unesco's right of ownership over the buildings. It was therefore proposed to ask ICAO for the sums necessary for the construction of the building to be used as its regional office, and to recognize ICAO's right of occupation for as long as it desired.
(23) The two cases in which ICAO's right of occupation would come to an end had also been envisaged.

(24) 1. If ICAO decided it would no longer maintain a regional office in Paris, Unesco would have a right of pre-emption over the part of the building in question, in return for a payment proportional to the number of years ICAO had occupied the building. ICAO intended to obtain from the French Government an interest-free loan repayable in 30 years. If ICAO were to cease occupying the building after 15 years, Unesco would assume responsibility for the 15 remaining annual instalments.
(25) 2. If Unesco decided to relinquish the buildings on the Place Fontenoy site, the French Government could exercise its right of option by purchasing the buildings. Failing that, Unesco could decide to purchase the site by virtue of the right of option accorded to it. That double stipulation was intended to enable the site and the buildings to be held, if necessary, in the same hands. In those circumstances, Unesco would pay ICAO a reasonable indemnity, but only if ICAO's right of occupation came to an end before 1 January 2000.

(26) The CHAIRMAN considered that the Committee should first decide on the fundamental principle of the building's ownership, so as to be able to give the Director-General the necessary instructions. As a member of the Committee, and in view of the negotiations that had already taken place, he thought Unesco should be given full rights of ownership over the additional building, whatever the circumstances.

(27) Mr. CABOUAT (France) thought that the draft contract outlined by the Legal Adviser constituted the simplest and wisest solution to the problem. Moreover, that solution coincided with the various possibilities offered to Unesco in the lease granted by the French Government. Unesco could not sub-lease a part of the site without the prior consent of the French Government and that would raise complicated problems.
(28) Mr. Cabouat noted, however, that in Annex III of document 18 HQ/2, page 9, paragraph 19, it was stated that "ICAO might transfer the benefit of its contract only to another Specialized Agency of the United Nations", and he wished to know what would happen if no Specialized Agency wanted to succeed ICAO. That was only a hypothetical contingency, but it should not be overlooked.

(29) Mr. GARDNER DAVIES (Rapporteur) remarked that the Committee seemed to be considering details before the general principle. He proposed that a decision be taken first on the principle before discussing the means of implementing it.
(30) He recalled that the Headquarters Committee, at its seventeenth session, had been informed by the Director-General that ICAO's Council had not finally decided whether or not it wished to have accommodation at Unesco's permanent headquarters. The Committee had therefore agreed that it could not take a decision on a hypothetical request, but had authorized the Director-General to continue negotiations with ICAO, on the understanding that the granting of accommodation would not involve additional cost or delay. The Director-General had further been authorized to submit the plan of the ICAO building to the Panel of Five. Mr. Gardner Davies asked the Director-General to explain what the present position was.

(31) The DIRECTOR-GENERAL hoped that the Committee would approve the principle of granting accommodation to ICAO, while laying emphasis on Unesco's right of ownership. He felt sure that the misunderstanding on the part of the ICAO Council would be cleared up when the French law had been explained to them. He would review with ICAO the question whether the payment of 3% of the maintenance costs by ICAO was too high or too low.

(32) Mr. COWELL (United Kingdom) seconded the proposal that the Headquarters Committee approve the principle of making accommodation available to ICAO. The Committee could then go on to discuss the details of the bargain.

(33) The CHAIRMAN suggested that the Committee should first take a decision on the principle of concluding a contract with ICAO. It could then discuss the question of Unesco's right of ownership, and the details of the proposed contract.

(34) Mr. GARDNER DAVIES (Rapporteur) hoped that, when the legal aspect had been discussed, the Committee would have an opportunity to consider the architectural aspect.

(35) Mr. PHOTIADES (Greece) felt that it was essential to safeguard Unesco's right of ownership.

(36) The CHAIRMAN said he was in favour of stipulating first and foremost the principle of Unesco's right of ownership over any building constructed in agreement with ICAO, whatever the terms of the contract might be.

(37) Mr. COWELL (United Kingdom) likewise accepted that principle.

(38) Mr. CABOUAT (France) said it must be understood that the recognition of Unesco's right of ownership implied the application of the terms of the lease to the whole of the site.

(39) Mr. GARDNER DAVIES (Rapporteur) entirely agreed with the principle, but wanted to know whether it would be acceptable to ICAO.

(40) The DIRECTOR-GENERAL replied that he believed that the Council of ICAO would accept the principle concerned.

(41) The CHAIRMAN interpreted the principle as a condition sine qua non of a future contract between Unesco and ICAO.

(42) Mr. POMPEI (Italy) emphasized that the principle must also be applied in the event of further storeys being added to the building.

(43) Mr. SABA (Legal Adviser) said that was a logical consequence of Unesco's right of ownership, but it would be advisable to stipulate it expressly in the contract.

(44) The CHAIRMAN considered the Committee was agreed in recognizing the need to safeguard Unesco's right of ownership over the building that might be constructed for the accommodation of ICAO. He asked the Committee if it had any objections to the continuation of negotiations between the Director-General and the representatives of ICAO within the framework of the proposed plan and with a view to concluding a contract.

(45) Mr. COWELL (United Kingdom) took it that the Committee had disposed of the question of joint ownership in paragraph 2 of Annex I to document 18 HQ/2 (page 4). He suggested that the Committee should therefore pass on to consider paragraph 3, i.e. the possibility of ICAO's relinquishing the premises before the complete reimbursement of construction costs.

(46) Mr. CABOUAT (France) wished to repeat what he had already said at the Committee's last session, as representative of the host State: in the light of the experience acquired during the negotiations which had taken place during the last two years, the French Ministry of Foreign Affairs hoped that the Director-General, before signing a definite agreement with ICAO, would keep it unofficially informed of the development of the negotiations so that it might, if necessary, give its opinion on any particular point.

(47) The DIRECTOR-GENERAL replied that he would be glad to accept that undertaking.

(48) Mr. GARDNER DAVIES (Rapporteur) reminded the Committee that it was only an advisory body and that it was for the Director-General himself to report to the General Conference. He presumed, however, that the Committee's recommendations would be annexed to that report.

(49) The DIRECTOR-GENERAL agreed with the Rapporteur that the Headquarters Committee's main task was to advise the Director-General, but, as a committee of the General Conference, it should report to the Conference on the advice which it gave to the Director-General. Its report could, as the Rapporteur had suggested, be annexed to his own.

(50) The CHAIRMAN considered that an addendum containing the recommendations adopted during the Committee's current session should be added to the Committee's report to the General Conference.

(51) Mr. POMPEI (Italy) remarked that the French Government had only asked to receive unofficial information about the negotiations between Unesco and ICAO. He asked whether the lease did not contain any clause relating to transactions such as the one under consideration and whether it would not be advisable to associate the French Government more closely in the current negotiations.

(52) Mr. SABA (Legal Adviser) replied that, under the terms of the lease, Unesco was authorized to let part of the premises to an international organization or Member State. Another clause authorized the transfer of the use of a part of the site to an organization belonging to the family of the United Nations.

(53) The lease also provided that a part of the premises could be let temporarily to organizations not belonging to the family of the United Nations, but it was stipulated that the French Government must be consulted whenever it was proposed to transfer the right of occupation of part of the site.

(54) The clause of the draft contract with ICAO stipulating that ICAO could transfer the benefit of its contract only to another Specialized Agency of the United Nations had been drafted expressly to give every guarantee to Unesco and to the French Government. Habitation of the same site could be harmonious only if the site were occupied by two organizations belonging to the family of the United Nations. Such harmony was all the more necessary as it was proposed to grant ICAO a right of perpetual occupation.

(55) Mr. CABOUAT (France) entirely agreed with Mr. Saba that the clause in paragraph 19 of Annex III of document 18 HQ/2 met the wishes of Unesco and the French Government. His previous remark merely concerned the legal aspect of the question. In a contract of that kind it was advisable to anticipate all possible consequences. In the event of ICAO's relinquishing the premises, and if Unesco did not wish to take them back itself, ICAO should be asked to give priority in the transfer of its contract to another Specialized Agency of the United Nations, or, failing that, to another organization, in agreement with the French Government.

(56) Mr. SABA (Legal Adviser) said that he had envisaged such a clause but had not felt it possible to retain it. Certainly, if an organization quite acceptable to Unesco and the French Government offered to succeed ICAO, at a relatively short interval, there would be no difficulty; but it would be better to leave the General Conference complete freedom in the matter and not to introduce too automatic a clause. The General Conference would thus be able, if necessary, to approve a new contract.

(57) Mr. COWELL (United Kingdom) said that the Legal Adviser had anticipated most of what he had intended to say. He took it that the conclusion was that the Headquarters Committee should refer in its report to the possibility of ICAO relinquishing the premises before the complete reimbursement of construction costs, recommending that it be left to the General Conference, in consultation with the French Government, to decide what to do in such an eventuality.

(58) Mr. SABA (Legal Adviser) replied that it would be for the General Conference to authorize the Director-General to recover the premises in question. If such authorization were not granted, ICAO could transfer its right of occupation to another Specialized Agency of the United Nations; failing that, it would be necessary to provide a new contract which would have to be approved by the General Conference.

(59) Mr. POMPEI (Italy) thought that, if the General Conference did not authorize the exercise of the option and if ICAO did not find another Specialized Agency of the United Nations willing to succeed it, Unesco's rights should be safeguarded, for it might be maintained that Unesco, in not exercising its right of option, was renouncing its rights in the matter.

(60) Mr. PHOTIADES (Greece) asked whether it would be stipulated that, if ICAO transferred the benefit of its contract, negotiations with Unesco would be necessary.

(61) Mr. COWELL (United Kingdom) thought it would be useful to obtain particulars concerning the financial aspects of the problem. In fact, it seemed that the contract might entail considerable expenditure on the part of Unesco.

(62) Mr. SABA (Legal Adviser) said that ICAO would be free to transfer the benefit of its contract to any organization belonging to the family of the United Nations, but the French Government maintained a right of control in the matter, since its authorization was necessary for the installation on its territory of the headquarters or regional office of an international organization.
(63) ICAO would obtain the loan already referred to by negotiating directly with the Caisse des dépôts et consignations. Even if ICAO decided to relinquish the premises, it would remain responsible for that debt. Unesco would succeed ICAO only if the General Conference decided to exercise Unesco's right of option.
(64) If it did not exercise that option, the General Conference must not ignore the fact that it was relinquishing certain rights, but there would be no legal void, for ICAO would, in principle, retain the right of occupation of the premises as long as it was unable to transfer it to another organization and it could even decide to maintain a reduced service on the spot or negotiate a new contract in which it would be possible to reinstate Unesco's rights.
(65) Paragraphs 18 and 19 of Annex III of document 18 HQ/2 were merely a preliminary draft. It would no doubt be necessary to stipulate that ICAO must give fairly long notice, 4 years for instance, in order to enable the Secretariat to study all the possibilities in the event of ICAO's departure and to submit to the General Conference all the facts which would help it to take a decision.
(66) Although it might be useful to stipulate that Unesco should be consulted, it would be dangerous to introduce a clause giving Unesco an actual right of veto in the hypothetical circumstances envisaged, since ICAO's possibilities were, after all, fairly limited.

(67) The CHAIRMAN proposed that, in the light of the observations made, the Committee should recommend that the Director-General be authorized to continue the negotiations and conclude an agreement with ICAO. That recommendation would be included in the Committee's final report to the General Conference.

(68) Mr. GARDNER DAVIES (Rapporteur) approved the proposal provided that a satisfactory solution were found for the architectural problem.

(69) The Chairman's proposal was approved subject to the reservation made by Mr. Gardner Davies.

(70) Mr. COWELL (United Kingdom) entirely agreed with the Chairman's formula, but proposed adding that the Director-General should undertake the negotiations on the basis of the principles set forth in Annex III.
(71) With regard to procedure for the conclusion of the final contract, he suggested that the General Conference might be requested to authorize the Executive Board to approve the final contract prepared by the Director-General.

(72) The CHAIRMAN asked Mr. Cowell if he would agree that the final contract should be approved, not by the Executive Board, but by the Headquarters Committee.

(73) Mr. COWELL (United Kingdom) replied in the affirmative.

(74) Introducing the discussion on the architectural aspect, Mr. CALLISON (Chief Engineer, Headquarters Office) drew attention to the letter from Mr. Gropius in Annex II to document 18 HQ/2 and to the letter from Mr. Le Corbusier in document 18 HQ/2 Add. 1. Although the proposed new building had been called the building for ICAO, that was not entirely the case. The Headquarters Office considered it also as a building designed for the future expansion of Unesco. It had not been possible to execute the original plan for expansion, and the latest proposal, which fitted in with ICAO's request, would be far more economical. Unesco's future expansion, moreover, would not be affected, whether it was ICAO or another organization occupying part of the building. The architectural plan itself had been prepared by the three working architects and approved by four of the five members of the International Panel. As far as the Headquarters Office was concerned, the plan was entirely satisfactory. Certain aspects of the plan suggested by Mr. Le Corbusier were rather more complicated and costly.

(75) Mr. GARDNER DAVIES (Rapporteur) recalled that every precaution had been taken at the architectural level during the past two years to ensure that Unesco had the best possible advice on a world-wide basis. Thenceforth, when it was proposed to introduce a large new element, he felt that the same precautions should be taken. He therefore proposed that a meeting of the Panel of Five be convened, if necessary at ICAO's expense, to approve the plans for the additional building before the Director-General was authorized to proceed with construction.

(76) Mr. CABOUAT (France) agreed all the more readily with Mr. Gardner Davies' suggestion as the problem of the building's appearance had raised most of the difficulties in obtaining a building permit.
(77) It was envisaged that the height of the new building might subsequently be increased, but for

some considerable time the building would remain incomplete and the architects should constantly be concerned to give the incomplete building, the plans of which would be submitted to the appropriate French authorities, an aspect not displeasing to the eye.

(78) The DIRECTOR-GENERAL would agree to convening the Panel of Five, but wondered at what stage and by what procedure he would obtain authority to proceed with construction if he did not agree with the Panel of Five.

(79) After hearing the remarks of Mr. Gardner Davies and Mr. Cabouat, Mr. PHOTIADES (Greece) felt somewhat uneasy, particularly as paragraph (b) of Mr. Le Corbusier's letter, set out in document 18 HQ/2 Add.1, declared that "the proposed layout of the building ... is quite inharmonious and ... would constitute an eyesore in what has become an harmonious setting". It would be well to put an end to such controversies and request that the relations between the Panel of Five and the Director-General be ensured exclusively through the Chairman of the Panel of Five; otherwise the situation would become very confused.

(80) Baron van der STRATEN WAILLET (Belgium) agreed with the French delegate's remarks. The Place Fontenoy site was in danger of being disfigured, for several years, by the presence of an incomplete and inharmonious building. Moreover, the Committee was faced with two schemes, one in an annex to document 18 HQ/2, the other attached to Mr. Le Corbusier's letter.

(81) It was difficult to form an opinion on the basis of Mr. Le Corbusier's rough sketch, and it would therefore be helpful to convene a new meeting of the architects, as had been suggested by Mr. Gardner Davies.

(82) In conclusion, Baron van der Straten Waillet asked whether there was not a contradiction between the Director-General's words, in paragraph 9 of document 18 HQ/3, to the effect that the proposed project would not involve "any additional expenditure for Unesco", and the fact that Unesco must utilize a part of the basement of the building in question.

(83) The DIRECTOR-GENERAL replied that some funds would be used which would otherwise have been spent on subterranean space outside the limits of the building itself. As regarded the Panel of Five, provision had already been made in the budget for a meeting in January. If another meeting proved necessary, ICAO might be asked to pay the cost of it.

(84) Mr. GARDNER DAVIES (Rapporteur) thought that it would be necessary to call a second meeting of the Panel to approve the final plans. Personally, he would not like to have to approve in July plans which had been approved by the Panel only in the preliminary stage.

(85) Mr. PHOTIADES (Greece) recalled that the Committee had already asked that their meetings, each of which cost $5,000, should be limited in number. He proposed it be decided that the meeting envisaged should be the last.

(86) The CHAIRMAN gathered from Mr. Gardner Davies' suggestions that the Panel of Five would meet at the end of January at Unesco's expense. They would hold another meeting at ICAO's expense in order to examine the draft plans of the three architects. Finally, the Conference would have to authorize the Committee to approve the final plans so that building operations could be started.

(87) The Committee then took note of the Director-General's supplementary progress report (document 18 HQ/3).

(88) The CHAIRMAN proposed that the Rapporteur draw up an addendum to the Committee's report to the Conference and that it should later be submitted to the Committee for approval.

(89) Mr. GARDNER DAVIES (Rapporteur) agreed with the Chairman. He thought that the Committee's report should contain some draft resolution on the points discussed; he offered to prepare it for approval by the Committee before the report was submitted to the Administrative Commission.

(90) Agreed.

The meeting rose at 7 p.m.

# THIRD MEETING

*1 December 1954 at 3.30 p.m.*

*Chairman:* Mr. BERREDO CARNEIRO (Brazil)

**CONSIDERATION OF THE SUPPLEMENTARY REPORT OF THE HEADQUARTERS COMMITTEE** (document 18 HQ/5)

(1) The CHAIRMAN drew the Committee's attention to document 18 HQ/5 and suggested an amendment of the English text - replacement of the word "larger" (paragraph 3) by "appropriate".

(2) Mr. COWELL (United Kingdom) suggested changing the word "one" ("which would at the one time") to "same".

(3) Mr. FERNANDEZ QUINTANILLA (Spain), as a sequel to the Chairman's proposal, suggested changing the words "más amplio" in the Spanish text to "otro".

(4) The CHAIRMAN suggested amending paragraph (c) of the resolution by replacing the present text by the words "to proceed with the actual construction required".

(5) Mr. GARDNER DAVIES (Rapporteur) explained that the report before the Commission was a supplement to document 8C/ADM/24, which would include both the supplementary report of the Headquarters Committee and its attendant draft resolution and the supplementary report of the Director-General.
(6) He suggested that the Committee review the report article by article and the resolution paragraph by paragraph before forwarding the document to the General Conference.

(7) Mr. COWELL (United Kingdom) asked that the word "the" (that the ICAO had formally declared...) be struck out of paragraph 4 of the English version. Incidentally, if ICAO was likely at some future date to discontinue using the prospective building, the position would then have to be considered by Unesco in agreement with the French Government; he wished a reference to that effect included in the report.

(8) Mr. GARDNER DAVIES (Rapporteur) thought the important thing was to authorize the Director-General to pursue the negotiations and to mention the formal point agreed upon by the Committee and stipulating that the agreement must safeguard Unesco's exclusive title to the premises occupied by ICAO. He felt that the Director-General would obviously be guided by what had been said in the Committee's discussions and saw no need to add to the length of the report.

(9) The CHAIRMAN enquired whether Mr. Cowell agreed with Mr. Gardner Davies' remarks or wished to make a formal statement.

(10) Mr. COWELL (United Kingdom) appreciated the Rapporteur's point of view but felt that paragraph 5 of the report apparently applied only to the period of actual building, while paragraph 6 only provided for the safeguarding of Unesco's rights of ownership. It would be useful to add to that paragraph a passage recommending that the necessary arrangements be made in case ICAO ceased to occupy the premises.

(11) Mr. GARDNER DAVIES (Rapporteur) pointed out that the Rapporteur's task was simply to draft proposals; they must in any case be discussed by the Committee.

(12) Mr. PHOTIADES (Greece) moved the adoption of Mr. Cowell's text.

(13) Adopted.

(14) The CHAIRMAN suggested that they take the draft resolution next.

(15) Mr. POMPEI (Italy) thought it might be preferable to send forward two separate resolutions, the first applying to the general execution of the project for the headquarters building and the second to the building of the ICAO office.

(16) Mr. GARDNER DAVIES (Rapporteur) thought that the Conference did not need to take any decision about the general execution of the undertaking and should confine itself to noting the progress achieved, on the other hand, it had to give its views on the specific question of the ICAO building.

(17) Mr. POMPEI (Italy) appreciated Mr. Gardner Davies' point of view but feared that the Conference might not fully realize what had already been done by the Headquarters Committee and the Director-General. He therefore suggested submitting two draft resolutions; the first would comprise the first two introductory paragraphs of the present project, plus paragraph 1 and the second the third introductory paragraph, plus paragraph 2.
(18) That, he felt, would make approval of the action taken by the Headquarters Committee and by the Director-General more formal. He also thought a paragraph should be added to the first resolution on the future activities of the Headquarters Committee.

(19) Mr. GARDNER DAVIES (Rapporteur) suggested two alternative courses. The first would consist in adopting the solution advocated by Mr. Pompei but without adding anything about the work of the Headquarters Committee, which had been laid down by resolution 13 of the second extraordinary session of the General Conference; the second course would be to retain the text of the present draft unchanged and delete only paragraph 1, which could be re-inserted at the request of any of the delegations represented on the Administrative Commission.

(20) Mr. COWELL (United Kingdom) thought it would be hard to improve on the Rapporteur's draft. Nevertheless, he was in favour of two separate draft resolutions and thought the words "with satisfaction" in paragraph 1 of the first resolution could hardly be kept, as they seemed to refer to the Headquarters Committee itself; it could left to a delegation to move their insertion.

(21) Mr. KABIR (India) was against splitting up the original draft resolution and suggested keeping only the draft resolution referring to the ICAO building; he felt that the general resolution "notes with satisfaction..." could be moved by a delegation in the Administrative Commission.

(22) The CHAIRMAN thought that two draft resolutions could be submitted, as two separate documents (documents 8C/ADM/24 and 8C/ADM/24 Add.) were going to be presented to the Administrative Commission.

(23) Mr. PHOTIADES (Greece) considered that the Headquarters Committee should report to the General Conference in plenary meeting and not to the Administrative Commission.

(24) The CHAIRMAN informed Mr. Photiades that the report had to be submitted to the Administrative Commission.

(25) Mr. PHOTIADES (Greece) did not think that procedure was legally admissible.

(26) Mr. POMPEI (Italy) thought that they could submit to the Administrative Commission a draft resolution dealing solely with the construction of the ICAO building and that one of the delegations present could move a general resolution on the activities of the Headquarters Committee and thus spare the latter's blushes.

(27) The CHAIRMAN asked the representative of the Executive Board how he thought the report should be submitted.

(28) Sir Ronald ADAM (Chairman of the Executive Board) considered that the Headquarters Committee was a committee of the General Conference on the same footing as the Administrative Commission and could accordingly report to the plenary conference, which could then refer the matter back to the Administrative Commission.

(29) Mr. CABOUAT (France) saw no objection to submitting two draft resolutions and felt that the words "with satisfaction" referred more particularly to the Secretariat and did not imply eulogy of the Committee itself. He was thus in favour of the first solution suggested by the delegate of Italy for submitting two draft resolutions to the General Conference. It would simplify the work of the Administrative Commission if it were given ready-made drafts.

(30) Mr. COWELL (United Kingdom) thought it was immaterial whether they submitted one or two resolutions but maintained his proposal to delete the words "with satisfaction".

(31) Mr. GARDNER DAVIES (Rapporteur) explained that the Headquarters item was on the agenda of the Administrative Commission which had already been adopted by the General Conference. He moved that the text of the resolution be kept as it stood or be split into two and the contents considered in the light of the present discussion.

(32) Sir Ronald ADAM (Chairman of the Executive Board) pointed out that the procedure in question had been adopted to save time. The Administrative Commission undoubtedly contained more experts on matters relating to the new Headquarters than the plenary conference and it was easier for the Rapporteur of the Administrative Commission to cover the matter in his report.

(33) Mr. GARDNER DAVIES (Rapporteur) said that in 1952 the Headquarters Committee did submit its report, including the draft resolution, to the Administrative Commission.

(34) The CHAIRMAN said he would submit the report to the Administrative Commission but pointed out that that action would not affect the Headquarters Committee's right to report direct to the General Conference.

(35) Mr. PHOTIADES (Greece) hoped that that procedure would not constitute a precedent.

(36) The CHAIRMAN asked the Committee to approve the substance of the report and suggested that, in view of the limited time available for reproduction of the final text, they adopt a version as close as possible to the text, as originally worded, on the understanding that the delegations represented on the Administrative Commission could submit such amendments as they chose.

(37) Mr. COWELL (United Kingdom) reminded members of the amendments suggested for paragraph 6, and noted that paragraph 2 (b) of the draft resolution did not mention what would be the rôle of the Headquarters Committee.

(38) The CHAIRMAN moved an amendment to the beginning of paragraph 2 (b), to read: "to conclude with ICAO, in consultation with the Headquarters Committee..."

(39) Mr. POMPEI (Italy) suggested that, instead of

that, the amendment should read: "to conclude with ICAO, after approval by the Headquarters Committee...". He also felt that the wording of paragraph 2 (c) "to proceed with the construction of additional building" was very wide.

(40) Mr. GARDNER DAVIES (Rapporteur) said it was clearly understood that the Secretariat was only authorized to erect that part of the new building which could be used immediately.

(41) Mr. PHOTIADES (Greece) asked whether the Legal Adviser had approved the text under discussion and remarked that the Administrative Commission might very well ask the Legal Committee for its views.

(42) The CHAIRMAN said that the draft report had been communicated to the Legal Committee. He moved the approval of document 18 HQ/5 on the understanding that the draft resolution could be amended by the Administrative Commission.

(43) Adopted.

**ADOPTION OF THE PROVISIONAL MINUTES OF THE MEETING OF 25 NOVEMBER**

(44) Mr. GARDNER DAVIES (Rapporteur) reminded the Committee that it had to approve the provisional minutes of its meeting of 25 November.

(45) The CHAIRMAN moved that formal approval of the minutes in question be postponed till the next meeting.

(46) Mr. GARDNER DAVIES (Rapporteur) thought that the Committee should decide the date of that meeting.

(47) Mr. LEGUEN (Secretary of the Committee) pointed out that, under the rules for the adoption of the minutes of organs of the General Conference, delegates could hand in their corrections to the Secretariat of the Conference within a period of 3 days; that procedure could be applied to the minutes of the Headquarters Committee.

(48) Mr. COWELL (United Kingdom) moved the adoption of that procedure.

(49) Adopted.

(50) Mr. GARDNER DAVIES (Rapporteur) moved that the date of the next meeting of the Committee be decided by the Chairman in consultation with the Director-General. He hoped that the Committee would be able to meet at the end of January when the members of the International Panel of Five Architects would be in Paris.

(51) The CHAIRMAN said he would settle that date in consultation with the Director-General.

(52) Adopted.

The meeting rose at 5.30 p.m.

# INDEX

## KEY TO THE SYSTEM OF NUMBERS USED

1. Roman numeral: Plenary Meetings, Committees or Commissions (according to the chapters of the table of contents) during whose sessions the subject was discussed.
   - II. Plenary Meetings
   - III. General Committee
   - IV. Programme and Budget Commission
   - V. Administrative Commission
   - VI. Advisory Committee on Programme and Budget
   - VII. Nomirations Committee
   - VIII. Legal Committee
   - IX. Credentials Committee
   - X. Committee on Reports of Member States
   - XI. Headquarters Committee
2. Arabic numeral: Actual number of the meeting concerned.
3. Numbers in parenthesis: Paragraphs covering the discussions.

## PART I

Index of subjects discussed, items on the agenda, and questions brought up for consideration.

# Special subscription services

*The subscription services listed below are intended particularly for librarians and for organizations concerned with the study of international affairs. Subscriptions should be sent to Unesco National Distributors or, in case of difficulty, direct to Unesco.*

## UNESCO DOCUMENTS SUBSCRIPTION SERVICE

This service offers direct from Paris one copy of each Unesco main series document in the language selected by the subscriber. Unesco documents (usually roneoed) are of particular interest to those wanting more complete documentation on the organization and activities of Unesco than is provided by its official publications. Main series documents – as distinguished from working series – are available for distribution outside Unesco House in English and French, some in Spanish. Subscribers to the Spanish service should state alternative language where no Spanish version is available. Unesco documents are not sold separately.

Annual rate (including postage): $30 £10 10,000 fr.

## COMPREHENSIVE PERIODICALS SUBSCRIPTION SERVICE

A combined subscription to all 10 Unesco periodicals (French or English version, Spanish when available) offering a considerable reduction over the total cost of separate subscriptions.

Annual rate (including postage): $25 £6.6.0 6,000 fr.

## BOOK SUBSCRIPTION SCHEME

One copy of each new book or pamphlet in any one language sent on publication direct from Paris. Available only to subscribers to the two services described above. Cost: value of the books despatched, plus postage. Payment is made in one sum every six months.
