(41) Mr. ESTELRICH (Spain) said that in the Cajal Institute, Spain possessed one of the most up-to-date neuro-biological research centres, where techniques of the highest value were being developed. It was proposed to transform that national institute into an international neuro-biological centre and he suggested that, when the time came, the National Commission should get into touch with the Secretariat.

(42) Mr. ANGELL (United States of America) was surprised at the high figure given in paragraph 64 for staff costs.

(43) Mr. AUGER (Director, Department of Natural Sciences) explained that the staff in question did not work exclusively for the International Committee on Research in the Natural Sciences Programme, but divided their time between the committee and assistance to scientific research, for which provision was made in draft resolution 2.22. If the total sum proposed for the two projects were approved by the Commission, it might be advisable to reconsider the amounts allotted to each of them.

(44) Mr. JOHANNES (Indonesia) proposed that the words "or other appropriate bodies designated by the National Commission of the State concerned" should be added after the words "National Research Councils" in line 4 of resolution 2.21, because some countries had no national research councils.

(45) Mr. ABEYWICKREMA (Ceylon) seconded the Indonesian proposal. Countries like Ceylon had several scientific research institutes but no research council as yet. For maintaining contacts with such countries that amendment was necessary.

(46) Mr. PAGE (Canada) supported resolution 2.21 in principle but suggested that the International Advisory Committee should be more selective in the work it undertook.

(47) The CHAIRMAN asked for a vote on the amendments to resolution 2.21, proposed by the delegates of Brazil and Indonesia.

(48) Approved.

(49) Resolution 2.21 was approved with those two amendments.

Resolution 2.22: Assistance to scientific research

(50) The CHAIRMAN intimated that draft resolutions concerning item 2.22 had been submitted by the delegations of France (document 8C/DR/1), India (document 8C/DR/9 rev.) and Japan (document 8C/DR/32 rev.). As the three drafts could be combined into a single text, the Chairman asked whether such a text had been drafted.

(51) Mr. AUGER (Director, Department of Natural Sciences) said that the Japanese delegation had prepared the new draft; it was being reproduced and would be examined later; if approved, it would become resolution 2.221.

(52) Mr. CHEVALIER (Secretary of the Commission) read out the recommendation of the Advisory Committee that top priority be given to project 2.22.

(A) Arid zone (paragraphs 76-84)

(53) Mr. IBAÑEZ GOMEZ (Chile) pointed out that the study of arid zones was of great importance to his country and he hoped that Chile would be included in such a study. Much of its territory was unfit for cultivation, and through studies of that kind very extensive areas could be brought into production.

(54) Referring to paragraph 81, he urged that the reports to be published should appear not only in French and English but also in Spanish.

(55) Mr. LEROY (France) observed that paragraph 79 provided for the publication in English of the proceedings of the symposium on wind and solar energy. While he recognized that English was a universal language, he deplored the fact that the work in question and certain others already published on allied subjects were not to be published in French also, for they might well be of interest to the French Union.

(56) Mr. AUGER (Director, Department of Natural Sciences) explained that the text was at fault on the point and that the publication was to be bilingual, with the English and French speeches reproduced in the original language. The system had already been used on several occasions when the two languages had been employed at a meeting.

(57) Mr. LEROY (France) also asked that, whenever a publication appeared in one language only, it should always be in the author's own language.

(58) Sir John SIMONSEN (United Kingdom) thought that, as Unesco had limited resources, it should concentrate on major projects. He approved the proposal for research fellowships in paragraph 83. Such fellowships would be useful in conveying information from area to area.

(59) Mr. TOROCHESHNIKOV (Union of Soviet Socialist Republics) said that the Soviet Union attached great importance to the arid zone question and felt that it should be placed in Category I. It was important to study the nature of the causes in order to prevent the creation of further arid zones. By undertaking studies in a series of regions data would be collected which would be important in the improvement of living conditions in arid areas. He assumed that the Director-General would carry out that important research work with the assistance of the countries concerned.

(60) In the Soviet Union much irrigation work had transformed a series of arid areas into fertile regions. In addition, the question of drought had been solved in limited areas by utilizing the water from small rivers to form reservoirs which could serve larger areas.

(61) Another significant factor in the problem of drought was deforestation. The Soviet Union had undertaken large schemes of reafforestation in an attempt to avoid the drought menace. The work should, however, not be limited to questions relating to flora and fauna but should attempt to conquer the whole problem of turning arid zones into fertile regions.

(62) He hoped that the Director-General would select specialists for arid zone research who were interested in combating the whole arid zone problem.

(63) Mr. ANGELL (United States of America) considered the resolution very important. He would support any additional help given to the project if it were in line with the policy of concentration of the

programme. He was prepared to accept a reduction with regard to the projects on the humid tropical zone, the money thus saved being allocated to the arid zone project.

(64) Mr. PAGE (Canda) supported the remarks made by the United States delegate. While not denying the usefulness of the projects included under resolution 2.22, he thought there were too many of them. In his opinion Unesco should concentrate on the arid zone project and consider the possibility of releasing funds from other projects for that purpose.

(65) Mr. STEINIG (United Nations) assumed that the work of the United Nations on water control, drought, etc. was known to members of the Commission and said that it bore a close relationship to the projects outlined in resolution 2.22. Committees of the Economic and Social Council were studying problems of the arid zone and humid tropical zone and had published their first findings. He assured the Commission that Unesco would be regularly informed of developments on projects undertaken by the United Nations in those fields.

(66) Mr. THA HLA (Union of Burma) proposed rejection of the United States suggestion that work on the humid tropical zone should be suspended and that the funds saved should go towards arid zone research.

(67) The CHAIRMAN said that a recommendation to that effect had been made, but it did not provide for transferring the funds from paragraph 88 to paragraph 84.

(68) Mr. STANKOVIC (Yugoslavia), on behalf of his delegation, supported the draft resolution (document 8C/DR/98) on the semi-arid zones of the Mediterranean, submitted by the Italian delegation.

(69) Mr. AUGER (Director, Department of Natural Sciences) explained that the Advisory Committee on Arid Zone Research habitually covered the semi-arid regions, many of which were in process of becoming arid.

(70) Mr. SEVERI (Italy) said that he had already cleared up the matter unofficially with Mr. Auger, and the Italian delegation would not press for a vote on the resolution it had submitted. Furthermore, it seemed to him that, since the countries of southern Europe - Greece, Italy, Spain - had been mentioned as possessing arid zones, Yugoslavia might well be added to them.

(71) Mr. AUGER (Director, Department of Natural Sciences) said that France itself had been the scene of studies by the Advisory Committee on the Arid Zone, which had sent a mission to the Montpellier area.

(72) The CHAIRMAN read out a recommendation by the Advisory Committee on Programme and Budget that the draft resolution (document 8C/DR/59) submitted by the Belgian delegation be rejected.

(73) Mr. FLORKIN (Belgium) said that his delegation was willing to withdraw its proposal.

(74) Mr. AUGER (Director, Department of Natural Sciences) noted that paragraph 94, which provided for a general study of given arid regions, met the wishes of the Belgian delegation.

(B) Humid tropical zone (paragraphs 85-88)

(75) Mr. ABEYWICKREMA (Ceylon) strongly opposed the suggestion to postpone work on humid tropical zone research, giving reasons. He considered that plans could be drawn up immediately, but suggested that it should be done in a different way from that proposed in the programme. He proposed that Unesco should ask the National Commissions to study the problem in their own countries, telling them what kind of information was required. He was prepared to give a note on the nature of that information to the Secretariat. The following year a meeting of specialists, including experts from the Food and Agriculture Organization, the International Labour Office and the World Health Organization, could be held to consider reports, and from those reports, a work plan could be drawn up for consideration by the ninth session of the General Conference.

(76) If more money than was required for the above should be available, he would suggest that the work be done on a regional basis, the regions involved being Central America, Central Africa, South and South East Asia.

(77) He proposed that an immediate start be made. If the work were postponed, parts of the humid zone would in time become semi-arid and the problem would be larger than ever.

(78) Mr. CHEVALIER (Secretary of the Commission) read out the recommendations of the Advisory Committee on Programme and Budget that the execution of the humid tropical zone programme be postponed for a year.

(79) Mr. BERREDO CARNEIRO (Brazil) recalled that in 1946 he had made a proposal to Unesco for the establishment of an International Institute of the Hylean Amazon. The project had been adopted and extensive studies had been carried out with the co-operation of several international organizations and assistance from experts. A convention had been drawn up and signed by 9 States situated in humid tropical regions, but political considerations had prevented its ratification. After that setback, the Brazilian Government had itself, through its National Council for Scientific Research, founded a research institute in the Amazon region. The work had thus not been interrupted and the scientific data collected by the Institute of the Hylean Amazon, which were considered to be of great value by the experts who had examined them, had not been wasted.

(80) The Brazilian delegate thought it would be a pity to postpone the proposed work for a year or two, particularly as an advisory committee would not run up against the political obstacles which had prevented the Institute of the Hylean Amazon from continuing in being.

(81) He therefore supported the proposal by the delegate of Ceylon.

(82) Dr. MUDALIAR (India) endorsed the remarks by the delegate of Ceylon, agreeing that the problem needed immediate attention. He concurred with the suggestion that the National Commissions should study the problem and make reports. He hoped that the Secretariat would be able to prepare a plan along those lines.
(83) He suggested that the National Commissions be permitted to designate the experts for those studies.

(84) Mr. MASSAQUOI (Liberia) supported the proposal by the delegate of Ceylon.
(85) The humid tropical zone was an area which was 90% utilized for growing rubber. The natural consequence of increasing the supplies of rubber was that less space was available for growing food. He suggested that action be taken before the problem became out of control.

(86) Mr. THA HLA (Union of Burma) supported the proposal of the delegate of Ceylon that there should be no postponement. He thought that the point made by the delegate of Liberia concerning the ever-increasing acreage being taken up by rubber plantations was important. There were innumerable problems of the kind which had an important bearing not only from the economic point of view generally but especially from the point of view of growing food.
(87) He supported the proposal of the delegate of Ceylon that the resolution should be adopted.

(88) Mr. PAGE (Canada) supported in principle the proposal contained in document 8C/DR/99, and would agree to methods being used which would lend additional financial support to the arid zone project and ultimately to the humid tropical zone project. That could be done by suppressing paragraph 88 and by allocating only the amount proposed for 1956 to the project proposed in document 8C/DR/99. Both projects would then be brought into action in a proper fashion.

(89) Mr. AUGER (Director, Department of Natural Sciences) appreciated that several delegations were anxious that a start be made in 1955 on research on the humid tropical zone.
(90) He proposed the following solution, which was based on the original estimates: in 1955 $2,000 would be spent in the form of contracts with experts on preparing for the following year's work, and National Commissions would be asked to take part in that preparatory work; in 1956, $10,654 would be allotted to the execution of the project. Thus the first year would not be wasted.

(91) Mr. ABEYWICKREMA (Ceylon) agreed with Mr. Auger that the total amount would not be required in the first year. He suggested that subventions should be given to scientific co-operation officers in the first year and a sum of $12,000 be set aside for a meeting of experts in the second year.

(92) Sir John SIMONSEN (United Kingdom) supported the remarks made by Mr. Auger. He thought that the requirements of British colonies would be met and that the procedure would lead to a more satisfactory study for future years.

(93) The CHAIRMAN asked the Commission to take a decision on Mr. Auger's suggestion, which met with the approval of the delegate of Ceylon and had also been supported by the delegate of the United Kingdom.

(94) Approved.

(C) Physical oceanography and marine biology (paragraphs 89-91)

(95) Mr. KAYA (Japan), referring to paragraph 89, hoped that the proposal would be approved and that the programme of work would become more definite during the coming two years.
(96) He proposed that the word "physical" be deleted from the title of the project.
(97) The Japanese delegation had submitted the resolution contained in document 8C/DR/61 because it wished to see the establishment of an Advisory Committee on Oceanographic Research similar to that which had been established for the arid zone programme. That Advisory Committee would be concerned in co-ordinating oceanographic research in various regions, especially in the Indo-Pacific region and in Latin America. The Secretariat had prepared document 8C/PRG/22 which contained all information necessary for the discussion of the Japanese draft resolution. It also contained an amended work plan, with which the Japanese delegation was in complete agreement.

(98) Mr. THA HLA (Union of Burma) expressed satisfaction that the Director-General had considered it important to undertake research on oceanography and marine biology. He feared, however, that the research as planned might be directed only towards the deep sea. The Burmese delegation would like to see it extended to shallow waters.
(99) He proposed that a sentence should be added at the end of paragraph 89, which would read: "Such fundamental oceanographic research should include a study of similar problems in coastal areas and lagoons".

(100) Mr. IBANEZ-GOMEZ (Chile) was in favour of paragraph 89 and agreed with the Japanese delegate's comments.
(101) He considered it advisable to delete the word "physical" qualifying "oceanography"; the survey might then include other subjects.
(102) Any oceanographic research in any part of the Pacific would form part of a much needed body of work. It was impossible to understand certain scientific problems of marine biology without a knowledge of the ecology of neighbouring and even of distant areas.
(103) The assistance given by Unesco's Science Co-operation Centre in Montevideo had made it possible to determine the basis for future studies in marine biology and to strengthen the first institute of the kind to be established in that part of the continent. A series of marine biological

stations should be set up to work with it, as uncoordinated research was of little practical use.

(104) Mr. AL- KOUSSI (Egypt) warned the Commission against the danger that energies might be dissipated in oceanographic research, and urged that a clearly defined subject, or a specific region, be chosen for the proposed action by Unesco.

(105) The CHAIRMAN thought he should make it clear that the Commission was not being asked to take a decision on paragraphs 89-91 but on the amended text appearing in the Annex to document 8C/PRG/22, which had been approved by the Bureau and the Executive Board of ICSU.

(106) Mrs. PECSON (Executive Board) said that the Executive Board had approved the latter text.

(107) Approved.

Higher Budgetary Level

(A) Arid zone (paragraphs 92-100)

(108) Mr. ESTELRICH (Spain) observed that the arid zones it was proposed to study were those in Latin America, the Middle East and South Asia. The Spanish delegation proposed that the Mediterranean area should also be included, comprising both the European and the North African shores.

(109) Mr. AUGER (Director, Department of Natural Sciences) saw no scientific objection to including the regions of Southern Spain and North Africa in the suggested list.

(110) Paragraphs 92-100 were approved.

(B) Campaign against cancer (paragraphs 101 and 102)

(111) Mr. CHEVALIER (Secretary of the Commission) read out the recommendation of the Advisory Committee on Programme and Budget that the project be held over for the 1957-58 programme.

(112) Miss TULCHINSKAIA (Ukrainian Soviet Socialist Republic) said that her delegation could not accept the Advisory Committee's recommendation, and supported the project set forth in the programme.
(113) In her opinion, the problem was the practical application of the results obtained. Unesco was not concerned with the causes of cancer, which was the subject of research by the greatest specialists, but should play its part in co-ordinating research and promoting the practical application of results.

(114) Mr. VANECEK (Czechoslovakia) reserved the right to submit detailed proposals on the problem later, but wished to state that Czechoslovak scientists would co-operate whole-heartedly in any work undertaken on the problem of cancer.

(115) Mr. LAUGIER (France) said that France was profoundly convinced that international institutions had responsibilities to fulfil with regard to the progress of sciences which alleviated human suffering.
(116) France had been the first country to ask the United Nations to take international action to encourage scientific research and discovery. At one of the first meetings of the Economic and Social Council, the French delegation had submitted a resolution requesting the Secretary-General of the United Nations to consult Unesco and the other Specialized Agencies concerned, and to submit a general report to the Economic and Social Council on the establishment of United Nations research laboratories. The resolution met with more or less general approval and received 15 votes in favour out of a total of 18.
(117) The report requested had been written and, although there were slight differences of opinion on the methods to be used, it was unanimously agreed that the United Nations could not ignore questions of scientific research and scientific discovery
(118) Unesco's reply was particularly useful and constructive; in particular it recommended the establishment of an institute for the study of the chemistry and biology of self-reproducing substances, including the study of cancer research.
(119) At the request of the Economic and Social Council, a joint committee of United Nations and Unesco experts, bringing together eminent scientists from different countries, was held at Unesco House. In its recommendations, that committee gave a high place to the foundation of an international institute for the chemistry and biology of living matter.
(120) Mr. Laugier also recalled a resolution of the Economic and Social Council dated 14 August 1950, which made Unesco responsible for initiating action in that field and requested the Organization to make an appraisal in order of priority of the problems of scientific research referred to in the report of the committee of scientific experts, and to evaluate the contribution that existing research centres could make to the study of those problems.
(121) The French delegate further quoted a resolution of the International Advisory Committee on Research in the Natural Sciences Programme, recommending that a meeting of experts be convened (1) to consider means for an intensification and better co-ordination on the national and international plane of fundamental research relating to cancer, (2) to recommend a plan of action to WHO and Unesco.
(122) On behalf of his delegation, Mr. Laugier felt obliged to urge the Commission to join with the Executive Board in approving the request for the very modest sums included in the budget, so as to enable Unesco to fulfil the mission entrusted to it.
(123) He recalled the anxiety felt lest the work of WHO and Unesco might overlap. If such difficulties existed, they should, in his opinion, be removed without delay by the co-ordinating bodies of the United Nations. But they did not exist, and the two organizations had shown an excellent spirit of co-ordination. Mr. Laugier referred to a statement, made by the representative of WHO to the Advisory Committee on Research in the Natural Sciences Programme, that Unesco's rôle was to promote the progress of basic scientific knowledge, particularly in the fields of biology, physics and chemistry, which might prove helpful in the fight against cancer, while

the actual fight was the business of WHO. The French delegate was convinced that the two organizations were in a position to undertake concerted action to overcome that scourge. He solemnly called upon the Commission to accept its responsibilities, reminding members that the work of all great scientists came within Unesco's province.
(124) Mr. Laugier went on to say that, if Unesco postponed its decision, it would, for one or more years, be depriving the whole of mankind of the international assistance that it had a right to expect in the struggle against a scourge which was growing daily more terrible.
(125) The French delegate ended with the hope that a large majority would vote the Director-General's proposal.

(126) Mr. BARBEY (Switzerland) spoke on behalf of one who had no voice in the Commission - the "man in the street".
(127) He assumed that the "man in the street" was anxious to have information about Unesco and consulted the documents available to him. He found in them general information which made little impression on him. The "man in the street" knew that such scourges as cancer existed, but the information he could obtain about them was vague and not always impartial. But if he were to learn that Unesco by agreement with WHO had undertaken to discover whether it was possible to co-ordinate research on that subject for constructive purposes, he would take courage and conceive hopes which would draw him closer to Unesco. At the same time great caution should be shown in raising such hopes.
(128) Even if Unesco's efforts did not succeed, it would still redound to the credit of the Organization to have recognized the importance of the problem and tried to solve it.
(129) Referring to the sums which Unesco had agreed to spend on organizing conferences, on publications, on subventions, and on building its headquarters, he wondered how the Organization could refuse the very small sum requested for the attempt to render an invaluable service to humanity, and he thought that public opinion would judge its hesitancy harshly if it knew of it.
(130) The Swiss delegate also considered that Unesco should not refrain from any action which appealed to popular sentiment.
(131) He therefore urged the Commission to vote in favour of the project relating to the campaign against cancer.

(132) Mrs. PECSON (Executive Board) assured the Commission that the Executive Board would gain fresh inspiration from the moving discussion which had taken place. Two points were clear, namely, that human suffering should be prevented and that human resources should be conserved.
(133) The Executive Board had recommended that a sum of $17,680 should be allocated for the project on the grounds that the campaign against cancer was of universal importance.

(134) Mr. LI U YING (China) said that his delegation unreservedly supported the proposal in the draft programme and budget and fully concurred in the French delegate's views.
(135) He recalled that, at a plenary meeting, he had advocated the establishment of a cancer institute, and he hoped that the suggestion would be accepted.

(136) Mr. PAGE (Canada) felt embarrassed at having to mention budget limitation, concentration of effort and publicity after hearing the moving appeals which had been made. But he considered that the Advisory Committee had made a sensible recommendation, as it would be better for purposes of concentration to ensure successful completion of a project before extending the programme. He thought that it was harmful to Unesco to extend that programme to wider fields if projects were never completed. Many other agencies were occupied with work in connexion with the cancer campaign and Unesco was not in a position to add sufficiently to the success of the campaign to make it worth starting.

(137) Sir John SIMONSEN (United Kingdom) had listened with interest to the eloquent appeal to the emotions made by the French delegate. If Unesco established an international laboratory for the study of cancer, it would have to recruit staff from other existing laboratories and the net increase in cancer research would be nil. He recalled the decision taken by the Council of International Organizations of Medical Sciences that it would be better to use available funds to help countries set up their own research unit than itself to set up an international research unit.
(138) The United Kingdom delegation would oppose the proposed project and would support the recommendation by the Advisory Committee on Programme and Budget.

(139) Mr. STANKOVIC (Yugoslavia) reaffirmed his delegation's interest in every aspect of the cancer campaign.
(140) He agreed with the French delegate with regard to co-operation between Unesco and WHO.
(141) He proposed that, in conformity with the suggestion made by the Director of WHO, the project under consideration be entitled not "Campaign against Cancer", but "Basic Research on Cancer".

(142) Mr. SIDDIQI (Pakistan) was of the opinion that such a project was an activity that belonged to Unesco. It was of the utmost urgency and could not be postponed. He proposed that the Director-General's project should be adopted.

(143) Mr. WIDDOWSON (Union of South Africa) also felt that he had been put in a difficult position and was being forced to say whether he was for or against the cancer campaign. While in sympathy with the campaign, he wondered whether a project undertaken by Unesco would not overlap the activities of the World Health Organization. He asked whether the representative of WHO could make a statement on the question. In the absence of an assurance that there would be no overlapping, he would vote against the proposal.

(144) Dr. HIGGINS (World Health Organization) said

that there could be no duplication in the work of the two organizations since the competence of the two bodies had been very clearly defined and their views on the cancer problem had been set forth by the representative of WHO at the eighth plenary meeting on 16 November and could be consulted in the provisional record.
(145) The Director-General of WHO had also addressed a letter to the Director-General of Unesco, which appeared in document 8C/PRG/20 Add. 1, suggesting that, wherever the phrase "Campaign against Cancer" appeared in documents, it would be more appropriate to use the term "Basic Research on Cancer".
(146) He emphasized that the World Health Organization had been taking an interest in the important problem of cancer and would continue to do so within its own purview.

(147) Mr. BERREDO CARNEIRO (Brazil) wished to consider the problem from the scientific point of view.
(148) In the first place, he thought that a project for which such an insignificant sum was asked could not be abandoned for reasons of economy. If such reasons were to predominate, they would put an end to most Unesco projects.
(149) The Brazilian delegate also thought that there could be no duplication between Unesco's activities and those of WHO. WHO had not yet taken up the problem of cancer, and it was to be feared that, if the two organizations waited for each other, nothing would be started.
(150) Unesco's field was basic research. However small its resources might be, the Organization could not refuse to take part in the campaign against a disease which so ravaged the population, or to co-ordinate the research undertaken on it.
(151) He recalled the speech by the Czechoslovak delegate and was glad that the countries of Eastern Europe were willing to pass on the results of their research to other countries. He expected very considerable results from the collaboration of Eastern and Western scientists.
(152) He therefore warmly advocated that the project proposed by the Secretariat be approved.

(153) Mr. FLORKIN (Belgium) wished to add a biochemist's views to the discussion.
(154) Recalling the terms of the draft resolution which appeared in the programme, he did not think that anyone could say which piece of basic research work would throw light on the cancer problem, or, rather, he felt that every piece of research work would help towards its solution. It was not certain that cell growth explained cancer, and certain biologists claimed that cancer cells in no way differed from normal cells. The question was therefore still at a preliminary stage, which necessitated a great deal of caution in deciding what lines research should follow.
(155) Mr. Florkin hoped that the field for the suggested co-ordination would be clearly defined, and that the International Union of Biological Sciences and the International Union of Biochemistry would be consulted.

(156) Mr. SPILHAUS (United States of America) felt that those delegates who decided to support the practical point of view were at a disadvantage in a discussion which had been on a high emotional level. He feared that Unesco's participation in the campaign against cancer would raise false hopes.
(157) Unesco's budget would not permit of much being done. Owing to the world-wide interest in cancer research, he did not think that it would be necessary for Unesco to act as a clearing house for information. He was opposed to the project not because he was opposed to cancer research, but because he felt that Unesco should use its funds where most good could be done. If the project were to be adopted by the Commission, he proposed that it should be relegated to Category 4 as being of least promise as far as results were concerned. In his opinion it would be better to spend the money on basic research, as cancer was outside Unesco's field of activities.

(158) The CHAIRMAN put paragraphs 101 and 102 to the vote. They were approved by 21 votes to 18, with 7 abstentions.

(159) Mr. FLORKIN (Belgium) thought that draft resolution 8C/DR/60, submitted by his delegation, should be examined after resolution 2.22.

(160) Mr. CHEVALIER (Secretary of the Commission) said that there was also a draft resolution submitted by the French delegation, dealing with the proper use of natural resources. It should be discussed at the same time as the Belgian delegation's resolution.

(161) Mr. AUGER (Director, Department of Natural Sciences) pointed out that resolution 2.22 ended with the project relating to the cancer campaign and that the other draft resolutions, including those relating to atomic energy, should be examined separately.

The meeting rose at 7 p. m.

# SEVENTEENTH MEETING

*30 November 1954 at 9.30 a.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

**ITEM 8.4.2 OF REVISED AGENDA : NATURAL SCIENCES** (continued)

(Document 8C/DR/108): Peaceful use of atomic energy, draft resolution presented jointly by the delegations of France, India and Japan

(1) The CHAIRMAN invited the delegate of India to introduce the proposal, which combined the three proposals submitted by the Governments of France, India and Japan in documents 8C/DR/1, 9 and 32 respectively.

(2) Dr. MUDALIAR (India) said that the Indian Government and National Commission believed that the only way to secure peace and happiness in the world was to divert the efforts and resources at present expended on the production of armaments to the more humanitarian task of using the momentous discoveries of atomic energy in the service of mankind.
(3) The original proposal in document 8C/DR/9 was based on a decision by the National Commission nearly a year previously; a revised version had been submitted in document DR/9 (rev.), following the announcement of the important resolution passed by the United Nations Political and Security Committee on 23 November.
(4) It was inevitable that, once the destructive potentialities of atomic energy were known, attention would be turned to discovering how it could be used to preserve instead of to annihilate the human race, and to promote peaceful co-operation, friendship and better understanding.
(5) The conquest of time and space had brought nations closer together, and humanity could only be saved by universal action. A new hope had appeared on the horizon, and it was for Unesco to seize the opportunity offered by the United Nations and to work for peace in the world.
(6) He supported the amendments of the French and Japanese delegations, together with the budgetary implications, and urged that the Director-General should be free to use the funds as he thought best.

(7) The DIRECTOR-GENERAL said that he was personally interested in the proposal and agreed with the delegate of India as to the importance of following the lead set by the United Nations. He would like the Commission to know that an important part had been played by the Director of the Department of Natural Sciences, who had been called in to participate in the work of the Bunche Committee when the proposals were being drafted.

(8) Mr. KAYA (Japan) said that the most urgent need at the present time was for medical and biological research on the effects of radio-activity. Through ignorance or negligence in the treatment of radio-active substances, the injury might be extended to innocent people through water, air, soil or food. No conclusions had yet been reached on methods of decontamination and other important aspects and it was impossible in the circumstances to provide protection against atomic injury.
(9) It was evident that research involved complex problems, and could not be conducted without close co-operation from experts in such fields as medicine, biology, meteorology, oceanography, chemistry and physics. Hitherto there had been little co-operation, and for that reason the Japanese delegation had proposed the calling of a meeting of experts for exchange of information and promotion of research.
(10) Certain circumstances had led the Japanese delegation to amend the resolution, notably the recent action on the part of the United Nations.
(11) It had also been pointed out, in document 8C/PRG/20, Add.2., that the Director-General of the World Health Organization considered that the Japanese proposal impinged on the activities of that Organization. While agreeing that the main objectives of the resolution came within the field of WHO's activities, there were many important problems requiring research which did not touch on health; for example, contamination of air, rain and sea water; analysis of radio-active isotopes; and mutation in human beings caused by radiation.
(12) Nevertheless, taking all things into consideration, the Japanese delegation had agreed that it would be most appropriate for Unesco to work in co-operation with the United Nations and the World Health Organization.

(13) Mr. SUZUKI (Japan), having explained the joint draft resolution, proposed that the last two lines of paragraph three of the joint resolution should be amended by deletion of the words "as protection against" and their replacement by the words "such as those involved in the...". The resolution would then have a wider scope and study would not be limited to the harmful effects of radio-activity.

(14) Mr. LEROY (France) fully endorsed the opinions expressed by the delegates of India and Japan. In the name of the French delegation, he urged the need for such measures. In his opinion, it was not a question of undertaking activities parallel to those of the United Nations, but of taking the necessary steps to achieve close co-operation with the latter in the field under discussion.

(15) The French delegation believed that an international agency would offer many advantages, particularly for collecting and distributing information. It would also be useful to form a "pool" of isotopes available to all those interested, and it was important to study the question of protection against the effects of radio-activity, particularly for the research workers themselves. Such an agency would facilitate co-operation between all the specialists concerned.
(16) Mr. Leroy added that the French delegation attached particular importance to the last paragraph, which should enable research workers all over the world to intensify their efforts.

(17) Mr. SPILHAUS (United States of America) warmly supported the Indian resolution, together with the amendments proposed by the delegates of France and Japan, and hoped that Unesco would co-operate in the United Nations plan for the peaceful use of atomic energy. The plan, which had been initiated by President Eisenhower and developed by conversations with the United Kingdom, France, Canada, Australia, Belgium, the Union of South Africa and Portugal, included the establishment of an international atomic agency and the convening of an international scientific conference in 1955, both under the auspices of the United Nations. Unesco and the other Specialized Agencies could play extremely useful parts.
(18) The United States of America believed that there were great potentialities in the use of atomic energy for peaceful purposes, but that it was necessary to educate people in order to eradicate existing fears. Nuclear fuel, for example, was simply a newer variety of fuel, potentially so abundant as to remove future shortages, but, like all fuel, needing care in handling. Development and exploitation of coal and petroleum, for example, had unfortunately always been accompanied by dangers, and continuous research was necessary to reduce hazards and perfect safety measures. In the United States of America considerable effort was being devoted to finding safeguards, making diagnosis and improving treatment of injuries in connexion with radio-active materials. In the interests of spreading information, it would be useful for Unesco to co-operate with the proposed United Nations atomic energy agency and the World Health Organization.
(19) Turning to the constructive aspect, the problem to be solved was how best to use atomic energy both as a fuel and in the form of isotopes. At present the use of nuclear power depended on economic considerations and the first areas to enjoy its benefits should accordingly be those where other forms of power were expensive or non-existent. Reactors, working on the same principle as power reactors, could be built comparatively cheaply in many parts of the world, and could be used for training purposes and also for the production of radio-isotopes.
(20) The two main uses for radio-isotopes were to change living organisms and as tracers. The first was of great importance in the treatment of cancer and the preservation of food. As tracers, they could be used either in growing plants: in the study of genetics, plant and animal growth, reproductive processes and the production of food from common chemicals by photosynthesis; or in inanimate physical activities: as control devices in industry, or to study the physics of the earth in order to gain knowledge which would improve long-range weather forecasting and thus benefit the production of food.
(21) Up to the present time, the United States of America had made 2,800 shipments of isotopes to fifty different countries. Under the United Nations plan, such activities would be multiplied and countries would also be encouraged to produce their own isotopes.

(22) Mr. NIELSEN (Denmark) supported the resolution, but had the following comments to make.
(23) While certain aspects of research on the use of isotopes could be assisted by international co-operation, some countries were already working with isotopes, and it was important that their work should not be impinged on by the proposed international agency.
(24) With regard to the effects of field radio-activity, he agreed that some aspects came within the field of the World Health Organization, but there were many others to be considered. He hoped that, since the scheme was being organized by the United Nations, there would be a correct distribution of responsibilities between the Specialized Agencies.
(25) Finally, no mention had been made of the work of the International Commission on Radiological Protection and other organizations. It was important to make use of existing research and knowledge.

(26) Mr. ZAMORANO HERNANDEZ (Chile) considered that the merit of the proposals in the draft resolution presented by India, Japan and France was obvious, and that they need not be discussed in detail. They deserved to meet with enthusiastic and unanimous approval because they were in keeping with the spirit of Unesco. The peoples of all countries wanted science to be put at the service of man, and it was natural for isotopes to be used for mankind's benefit. Chile would therefore vote in favour of establishing an international institute for research into those problems.

(27) The CHAIRMAN requested members to close the discussion as quickly as possible.

(28) Mr. VILLAR (Uruguay) warmly praised draft resolution 8C/DR/108. Referring to the utilization of nuclear energy, he drew attention to the new possibilities opened up by recent discoveries. They would make nuclear energy more widely available in the world, would increase the benefits which electrical energy could bring to countries where it was difficult to transport fuel or where water power was lacking and would enable regions of great natural wealth to be exploited to an extent not yet practicable owing to lack of means. He thought that great importance should be attached to small atomic piles, since they were easy to utilize.

(29) Mr. RAADI (Iran) did not wish to repeat the cogent remarks of previous speakers, but it seemed to him that current scientific research should be accompanied by a campaign to publicize the dangers of radio-activity and

the possibilities of utilizing atomic energy for peaceful purposes.
(30) Unesco could render considerable service to the public by instructing its Department of Mass Communication, for instance, to throw some light on the mystery at present surrounding atomic energy research.
(31) Mr. Raadi wondered whether the authors of draft resolution 8C/DR/108 would agree to add to the third paragraph of their text a clause - subject to later verbal improvements - on the lines he had suggested.

(32) Mr. SEVERI (Italy) warmly welcomed draft resolution 8C/DR/108 and emphasized the importance of international research into methods of safeguarding research workers against the dangers inherent in their work.

(33) Mr. MICHALOWSKI (Poland) supported the joint proposal, although he preferred the original one submitted by the Indian delegation. Poland had repeatedly stressed the danger of using atomic energy for destructive purposes. There was widespread evidence of the desire among the people and among social as well as scientific bodies, in developed and underdeveloped countries alike, that it should be used for peaceful purposes. The unanimous adoption of the United Nations resolution was also significant, and he hoped there would be unanimous approval of the proposal now before the Commission. Unesco had an important rôle to play, and he urged priority for the implementation of the resolution.
(34) Certain countries where nuclear energy was already highly developed had an obligation to the rest of the world: first to prohibit the use of atomic weapons and eliminate fear in the world; and second to develop and encourage the peaceful use of atomic energy. In implementing the resolution, the Director-General should work in close contact with those countries and make use of their knowledge and experience.

(35) Mrs. PECSON (Executive Board) said that the Executive Board was whole-heartedly in support of the use of atomic energy for the benefit of mankind and had devoted much time and effort to the problem. The Board had supported the French proposal in document 8C/DR/1, with the proviso that before any meeting of experts were held the countries concerned should be consulted to ascertain their interest in the problem.
(36) The Board had unanimously recommended adoption of resolution 8C/DR/9, but had suggested that document 8C/DR/32 should be revised in the light of the United Nations resolution. The Board had not been able to review the joint resolution, but, in view of the foregoing comments, and the fact that the Japanese resolution had been amended, in her opinion, approval could be taken for granted.

(37) Mr. CABOUAT (Rapporteur, Advisory Committee on Programme and Budget) said that the Committee had examined draft resolutions 8C/DR/1, 9 and 32 together, in view of the obvious connexion between them, and had considered them extremely important.
(38) The Committee had pointed out the need for close co-operation with the United Nations and, in the case of the resolution on an international programme of research on problems connected with the use of radio-isotopes, had recommended that the choice of experts should not be limited to Europe and that the advice of the Advisory Committee on Research in the Natural Sciences Programme be sought.
(39) The Committee had also asked that WHO be approached with a view to defining exactly the respective fields of competence of that body and Unesco in connexion with the Japanese proposal for protection against the effects of radio-activity. A most satisfactory reply had been received from WHO.
(40) Mr. Cabouat added that the Advisory Committee on Programme and Budget had not studied the draft resolution at present before the Commission but recommended the adoption of any resolution which would enable Unesco to co-operate with the United Nations and the Specialized Agencies in the field of atomic energy. The work plan drawn up by the Secretariat was also intended to give effect to the three original draft resolutions.

(41) Mr. CHEVALIER (Secretary of the Commission) read out the draft amendment earlier proposed by the Japanese delegate and consisting of the addition of the following words after "certain technical questions" in the third paragraph of resolution 8C/DR/108: "such as those involved in the effects of radio-activity on life in general".

(42) The above amendment was seconded by Mr. NIELSEN (Denmark).

(43) Mr. Chevalier then read out a draft amendment submitted by Mr. Raadi; it was to add to the third paragraph the words: "as well as for the diffusion of objective information concerning the dangers and the peaceful uses of atomic energy".

(44) The amendment was supported by Mr. ZAMORANO HERNANDEZ (Chile).

(45) Mr. AUGER (Director, Department of Natural Sciences) thought that the authors of the draft resolution under consideration would not object to changing its form slightly so that it might be included in the programme for 1955-56. The first two paragraphs would be considered as a preamble, then paragraphs 3 and 4 would appear as "Resolution 2.221", and the last paragraph would be deleted and replaced by the corresponding work plan.
(46) It would also be advisable to add to paragraph 108 a work plan corresponding to Mr. Raadi's proposal.

(47) Mr. RAADI (Iran) agreed with Mr. Auger's suggestions.

(48) In reply to a question from the delegate of the USSR, the CHAIRMAN said that the work plan referred to at the end of resolution 8C/DR/108 was the one set out in document 8C/PRG/24, Add. 1.

(49) Resolution 8C/DR/108, as amended, was put to the vote and adopted unanimously.

(50) Mr. ZAMORANO HERNANDEZ (Chile) was grateful for the opportunity to raise a point of procedure. A member of his delegation, referring to paragraphs 79 and 81 of the chapter on Natural Sciences, had asked for the documents there mentioned to be translated into Spanish. No immediate reply had been given. A letter had been sent to the Secretariat but it had not yet answered. The previous week, the Argentine delegate had made a similar request with regard to the chapter on Education. Mr. Zamorano Hernandez would like to know what action had been taken on those requests. The Chairman had alluded to their financial implications, and the speaker once more asked if he would indicate the Commission's views in the matter.

(51) The CHAIRMAN replied that Mr. Zamorano's question differed from that put previously by the Argentine delegation. The Secretariat had in fact replied that the translations asked for by the Argentine delegation involved no special expenditure because the documents in question were merely roneographed.
(52) The translations requested by the Chilean delegate, on the other hand, would entail a total expenditure of $4,530. If the Commission felt that it should accede to the request, it would have to be transmitted to the Advisory Committee on Programme and Budget for its opinion.

(53) Mr. CASSANI (Argentina) supported the Chilean delegate's request, which was based on the reasons expounded by his delegation when it had made a similar request with regard to the chapter on Education. Reports on the arid zone were of the greatest interest to Latin America, which asked the Commission to view its request with favour.

(54) The Chilean delegate's proposal was put to the vote and approved by 19 votes to 5, with 21 abstentions.

(55) Mr. SPILHAUS (United States of America) said that there was a difference between his own understanding of the amendment submitted by the Iranian delegate and the wording given by the Chairman. The version which he had voted for was: "as well as for the diffusion of information concerning all aspects of the peaceful utilization of atomic energy".

(56) The CHAIRMAN, speaking in English, read the text before him, which was as follows: "and to disseminate objective information on the dangers and on the peaceful use of atomic energy".

(57) Mr. SPILHAUS (United States of America) asked if the Iranian delegate would be agreeable to the deletion of the word "dangers" and the substitution of the words: "concerning all aspects of the peaceful utilization of atomic energy", which would broaden the scope of Unesco's work.

(58) The CHAIRMAN recalled that the Commission had already approved the amendment submitted by the delegate of Iran.

(59) Mr. RAADI (Iran) hoped that steps would be taken to disseminate objective information on the peaceful utilization of atomic energy. As his original proposal had been made subject to improvements in drafting, he left it to the Commission's discretion to decide on the exact wording.

(60) Mr. PAGE (Canada) supported the United States delegate. The selection of one aspect would give it undue emphasis. He also opposed the word "objective", since it might imply that Unesco was not in the habit of supplying objective information.

(61) Mr. RAADI (Iran) thought that the following wording would convey the unanimous feelings of members of the Commission: "... and to the dissemination of objective information concerning all aspects of the peaceful utilization of atomic energy".
(62) Mr. Raadi wished to retain the word "objective", as he thought that it was the Secretariat's task to collect and sort out information before disseminating it.

(63) Mr. SPILHAUS (United States of America) said that he was prepared to withdraw his opposition to the word "objective", but insisted on the inclusion of the word "peaceful".

(64) Mr. RAADI (Iran) signified his acceptance.

(65) Mr. PAGE (Canada) also agreed not to press for the exclusion of the word "objective". It was essential to retain the word "peaceful", however, since otherwise the Department of Natural Sciences could be asked to give plans for the latest hydrogen bomb.

(66) It was agreed to accept the text as read out by the delegate of the United States of America in place of the one previously adopted.

(67) Mr. AUGER (Director, Department of Natural Sciences) said that the Secretariat had just received the text adopted by the United Nations Political and Security Committee on the peaceful uses of atomic energy. It differed slightly from that attached to document 8C/PRG/24, but the paragraphs relating to co-operation between the United Nations and Unesco had not been changed. The Secretariat would shortly circulate the document for information purposes.

(68) On a point of order, Mr. AL-KOUSSI (Egypt) wondered whether it was usual to reopen the discussion on resolutions which the Commission had already approved.

(69) The CHAIRMAN recognized that the Egyptian delegate's comment was most pertinent, but recalled that he had asked the Commission whether it approved of the United States delegate's proposal, which was supported by the Canadian delegate. He also felt that a certain degree of flexibility should be preserved in the Commission's transaction of business.

(70) Mr. VLAHOVIC (Yugoslavia) thought that the reference in the first paragraph of resolution 8C/DR/108 to the Political and Security Committee of the United Nations was due to a

misunderstanding and that the organ concerned was the Political Commission.

(71) Mr. AUGER (Director, Department of Natural Sciences) was of opinion that the General Assembly of the United Nations should be mentioned in the final version, as in the last resort it would have to reject or approve the resolution concerned.

Paragraphs 42-48

(72) Mr. CABOUAT (Rapporteur, Advisory Committee on Programme and Budget) informed the meeting of the Advisory Committee's recommendation that the proposed contract with the Council for International Organizations of Medical Sciences for translating medical abstracts should be cancelled, and the appropriations for 1955 under paragraph 48 thereby reduced by $3,000 (see document 8C/5, corrigendum, page 9).
(73) The above recommendation had been approved after a short discussion, during which it was mentioned that some delegates had informed the Committee of the feeling in certain National Commissions that the translations were not indispensable, and that a saving might be effected under that head.

(74) Sir John SIMONSEN (United Kingdom) recalled his statement at a previous meeting on the danger of mistranslation of medical abstracts. He thought that the project had been dropped.

(75) In reply to Mr. AL-KOUSSI (Egypt), Mr. AUGER (Director, Department of Natural Sciences) explained that the translations in question were English, French and Spanish only.

(76) Mr. AL-KOUSSI (Egypt) wondered whether it would be possible for the translations to be in Spanish only, as that would be more economical.

(77) Speaking as representative of CIOMS, Mr. BERREDO CARNEIRO wished to know Mr. Auger's views on the Advisory Committee's suggestion.

(78) Mr. AUGER (Director, Department of Natural Sciences) recalled that certain appropriations had had to be cancelled in favour of more important projects, but, in the present case, the cancellation was not counterbalanced by any increase elsewhere. He added that, in his opinion, the $3,000 were not essential.

(79) The Advisory Committee's recommendation was unanimously approved.

Paragraphs 54 and 55

(80) Mr. CABOUAT (Rapporteur, Advisory Committee on Programme and Budget) explained that several members of the Committee had expressed doubts, not about the substance of the Secretariat's proposal, but about the method envisaged. It had been felt that the work would receive more publicity if the help of specialized periodicals were called in, but, because of the commercial negotiations that would be necessary, it had seemed preferable to adopt the measures proposed by the Secretariat.

(81) Mr. FLORKIN (Belgium) understood that the International Anatomical Nomenclature Committee was responsible for selecting and publishing for the next International Anatomical Congress a nomenclature which would appear in its records. He saw no difference between that solution and publication in specialized periodicals.

(82) Mr. AUGER (Director, Department of Natural Sciences) pointed out that commercial firms preferred to publish the nomenclature in its final version, while Unesco was aiding the preparatory work at present in progress.

(83) Paragraphs 54 and 55 were unanimously approved.

Draft resolutions 8C/DR/35, 8C/DR/54, 8C/DR/60

(84) At the CHAIRMAN's suggestion, the delegates of France, Uruguay and Belgium agreed to prepare a joint resolution for consideration at the next meeting.

2.3 Teaching and dissemination of science

Paragraphs 103-106

(85) Mr. ZAMORANO HERNANDEZ (Chile) thought that paragraphs 103 and 104 of the preamble were somewhat obscure and ambiguous. It was, for instance, over-dogmatic to say: "The great fund of knowledge .. becomes a resource for humanity and a means of improving the conditions of life only when it reaches the public, is understood and put to use". That statement seemed to him to be exaggerated; in his opinion, the dissemination of science should consist in making scientific discoveries known among the general public. Unless it were popularized, scientific thought would not penetrate the minds of the masses. He asked the Department to set out its objects with greater clarity. He believed that the latter should be: (1) to disseminate scientific knowledge in order that the public might be familiar with the work scientists were doing, support it and co-operate with them in its own way; (2) to disseminate scientific knowledge without popularizing it unduly; people should be "uplifted" through the acquisition of such knowledge. In his opinion, paragraphs 103 and 104 said little to that effect.

(86) Mr. AUGER (Director, Department of Natural Sciences) entirely shared the Chilean delegate's views with regard to science teaching - it should not be limited to publicizing a certain number of results, but should try to make the scientific spirit understood.
(87) Mr. Auger added that the aim of paragraphs 103 and 104 was in no wise to lay down the law on the subject. Perhaps it would be advisable to publish some twenty pages setting out the Secretariat's ideas, for example, in the series "Unesco and its programme".

(88) Mr. BERREDO CARNEIRO (Brazil) recalled that the Department of Natural Sciences had already published an account of its ideas and intentions. That work had been most interesting, but he felt that he ought to draw the Commission's attention to the danger of expressing an opinion on complex questions which were more suitable for committees of experts.

(89) Mr. WEILENMANN (Switzerland) wished to add to the third line of resolution 2.31, after "in the sciences" the words "and especially the activities of adult education establishments". The Swiss delegation felt that it was necessary to make specific mention of bodies which devoted themselves to adult education and had already rendered considerable service.

(90) The above proposal was seconded by Mr. SEVERI (Italy).

(91) Mr. ZAMORANO HERNANDEZ (Chile) admitted that there might be many documents which explained the points to which he had referred, but wished to draw attention to the phrase in paragraph 104 which read "In the relatively undeveloped countries it is recognized that underdevelopment is largely the result of a lack of science". He thought that statement exaggerated and lacking in foundation. mention should also be made of other factors, for instance, economic or social conditions, etc. He therefore asked that the statement be deleted or explained in more detailed documents. At the CHAIRMAN's suggestion, he proposed that the paragraph be referred to the Drafting Committee so that other factors might be added as a basis for the assertion.

(92) Mr. BERREDO CARNEIRO (Brazil) objected to the wording of paragraph 104 on similar grounds. He did not think that there was any close connexion between a country's scientific knowledge and its degree of development. He emphasized the danger of brief, categorical statements, leaving no room for shades of interpretation.

(93) Mr. TUNCEL (Turkey) did not agree with the Chilean delegate and proposed the retention of the existing wording.

(94) In reply to Mr. KABIR (India), the CHAIRMAN recalled that the Commission had already had an opportunity to introduce changes into the resolutions and work plans.

(95) By 29 votes to 9, with 4 abstentions, it was finally agreed to refer paragraph 104 to the Drafting Committee, as suggested by the delegate of Chile.

(96) The proposed amendment to resolution 2.31, submitted by the Swiss delegate and seconded by the Italian delegate, was approved by 35 votes to none, with 4 abstentions.

(A) General scientific information (paragraphs 107-115)

(97) Mr. VO VAN LUA (Viet-Nam) considered that in paragraph 112 it was not enough to talk of increasing the number of articles in Impact and the number of copies printed; the need to improve its layout and redouble efforts to make it pay should also be emphasized. The speaker added that the review was nevertheless considered of great interest by scientists in his country.

(98) Mr. AUGER (Director, Department of Natural Sciences) was willing to accept a change in the work plan on the lines suggested by the delegate of Viet-Nam.

(99) Sir John SIMONSEN (United Kingdom) thought that the projects described in paragraphs 107-114 were admirable.

(100) He was however, concerned at the low circulation of Impact and the fact that it was run at a loss. The articles were good, but he considered them too costly. A publication of a more popular character, with a wider circulation, might be more satisfactory.

(101) He also doubted the value of travelling exhibitions and thought that travelling fellowships might be of more use.

(102) Mr. AL-KOUSSI (Egypt) stated that the Egyptian Government was prepared to give material assistance to the plan to publish some of the Impact articles in Arabic. He agreed with the criticisms voiced by the delegate of Viet-Nam with regard to the layout of the review, although he found its contents excellent and was not in favour of turning it into a more popular type of publication, as suggested by the delegate of the United Kingdom. Mr. Al-Koussi was convinced that a greater effort should be made to increase its circulation.

(103) Mr. AUGER (Director, Department of Natural Sciences) said that the Secretariat was perfectly willing to alter the layout of Impact. He had been very pleased to hear the complimentary remarks about the articles published in it.

(104) He added that efforts would be made to increase Impact's circulation. It was true that contracts and other arrangements at present in force raised certain problems, but he was able to announce that new arrangements had been made for the United Kingdom.

(105) In reply to Mgr MAROUN (Lebanon), Mr. Auger explained that there was no appropriation under paragraph 113, that explained the words: "The Secretariat will also study the possibility of having selected articles from Impact published in Arabic...". The assistance of the Egyptian Government, however, would probably make it possible for articles to be published in Arabic without any additional appropriations; in that case, the relevant passage in the work plans could be altered accordingly.

(106) Section (A) was then approved.

(B) Travelling science exhibitions (paragraphs 116-118)

(107) Mr. ABEYWICKREMA (Ceylon) thought that travelling exhibitions were useful, but that there

were not enough to supply all countries. A large number of small exhibitions would be more effective. He noted that exhibitions were withdrawn after a certain period and proposed that they should then be given to Member countries to use as a nucleus for permanent scientific exhibitions.

(108) Mr. AUGER (Director, Department of Natural Sciences) thought the suggestion made by the delegate of Ceylon excellent; it was perfectly possible to leave a scientific exhibition in the last country where it had been shown, instead of bringing it back to Paris, so long as the government of the country undertook to carry out the necessary repairs and use the exhibition as the nucleus of a science museum.

(109) Mr. PAGE (Canada) approved the general proposals contained in paragraphs 116-118 and agreed with the suggestions of the delegate of Ceylon. He asked, however, if it would be possible to obtain, through the exhibition staff or appropriate persons in the countries receiving exhibitions, some idea of their value and public response to them. Some method of assessment would help in planning future exhibitions.

(110) Section (B) was approved.

(C) Conference on the Public Understanding of Science (paragraphs 119 and 120)

(111) Section (C) was approved.

Higher Budgetary Level

Travelling science exhibitions (paragraphs 121 and 122)

(112) Mr. SANDOVAL VALLARTA (Mexico) agreed with the Canadian delegate's suggestion. As there were no data available on the results of the travelling exhibitions, he asked for fuller information before voting for increased appropriations under that head.

(113) Mr. AUGER (Director, Department of Natural Sciences) thought it very difficult to say exactly how much success an exhibition had. The number of visitors gave some indication; 80,000 was the figure for attendance at Lima and 20,000 for Pnom-Penh. Further, according to information gathered from educators in countries where the exhibitions had been shown, visitors had managed to acquire a considerable amount of knowledge and ideas from them.

(114) Mr. SUZUKI (Japan) stated that Unesco's exhibitions had met with considerable success in his country, and he thought that the Organization's efforts in that field should be encouraged.

(115) Mr. VO VAN LUA (Viet-Nam) pointed out that Unesco exhibitions were extremely useful, for they made the Organization known to populations which perhaps would have had no other opportunity to come into contact with its activities. The exhibition recently organized in Viet-Nam had been a complete success.

(116) Mr. Vo Van Lua also favoured the project for films to accompany the exhibitions.

(117) Mr. FLORKIN (Belgium) said that, in Belgium, filmstrips about the travelling exhibitions were already in use at all educational levels, and were found very helpful in science teaching.

(118) Mr. LINKSON (Australia) was interested in the educational value of travelling exhibitions, but had doubts about the results obtained. He suggested that, when examining the results of exhibitions, consideration should be given to the possibility of receiving countries' playing a greater part in their preparation. Such a policy would, in his opinion, result in exhibitions which were more suited to the needs of the respective countries and areas, and would also help in training nationals to present their own exhibitions.

(119) Mr. SHARIF (Pakistan) had no doubt of the educational value of travelling exhibitions. Recent experience in Latin America was sufficient to justify continuing the project, and he strongly supported it. He also agreed with the delegates who had advocated the policy of linking travelling exhibitions with local effort.

(120) Paragraphs 121 and 122 were approved.

(121) Resolution 2.31, as amended by the delegate of Switzerland, was adopted.

Resolution 8C/DR/56 (rev.): Dissemination of science

(122) The proposal submitted by Uruguay was seconded by the delegates of Italy, Chile, Turkey and France.

(123) The delegate of Uruguay accepted the Advisory Committee's recommendation that the proposal should be considered as a technical assistance item either in the 1955-56 or the 1957-58 programme.

Draft resolution 8C/DR/51: Scientific and technical education

(124) Mr. ESTELRICH (Spain) pointed out that the present rapid development of science raised serious problems in teaching it, particularly in secondary schools. The Spanish teaching profession was much occupied with the problem and had put it to the Director-General during his visit to Spain the previous May. That visit had aroused great interest in the country and the Director-General had expressed appreciation of Spain's efforts to co-operate effectively with Unesco. It had been decided at that time to suggest to Unesco projects which were (a) international in scope, (b) of practical interest and (c) urgently required. One such project was the establishment of a "Pilot Centre for the study of methods of teaching science in secondary schools and for the training of teachers of scientific and technical subjects for such schools", referred to in draft resolution DR/44, which was an amendment to resolution 2.32. Document 8C/DR/51 had been added for purposes of information. To the data given in documents DR/44 and DR/51 should be added the fact that the second Latin American Congress on Education, held in Quito the

previous October, had recommended the project. Spain was ready to establish the Centre in order to meet its own needs, co-operate more closely with Unesco and implement the recommendation of the Quito Congress. The ever-increasing stream of Latin American students coming to Europe to study in Spanish schools had made it still more desirable to set up such a Centre. Spain was bearing all the costs of establishing and maintaining the Centre and was only asking Unesco for a contribution towards laboratory equipment, documentation and books, and possibly for some professor or expert who might be needed.

Project 2.32: Teaching of sciences

(125) Mr. ZAMORANO HERNANDEZ (Chile) asked the Director of the Natural Sciences Department what were meant by "State primary and secondary schools" in resolution 2.32 of the draft programme and budget.

(126) Mr. AUGER (Director, Department of Natural Sciences) replied that the words referred to primary and secondary education, as understood in France, at any rate.

(127) Mr. THA HLA (Union of Burma) said that as a university professor he had difficulty in advising State scholars on their choice of universities in other countries. There was a need for a manual of world universities with detailed information on the specific branches of science that were taught. He proposed the inclusion of such a manual in project 2.32

(128) Mr. SALIM (Hashemite Kingdom of Jordan) referring to resolution 2.32, doubted the necessity for improving science teaching in fundamental education since the main concern in fundamental education was to teach reading and writing and to improve economic conditions. His experience of the teaching of science in primary and secondary schools showed that schoolchildren who had been taught science for a number of years had little grasp of scientific ideas and had not developed a scientific outlook.

(129) Mr. CASSANI (Argentina) repeated the question asked by the Chilean delegate. He wished to know whether the expression "secondary schools" included all educational establishments between elementary schools and universities. He thought that the point should be clarified.

(130) Mr. NIELSEN (Denmark), referring to the remarks of the Burmese delegate, pointed out that the International Universities Bureau had already published a list of universities and was working on a cataloguing system. The Burmese delegate would, he felt sure, receive useful information if he applied to the Bureau.

(131) Mr. AL-KOUSSI (Egypt) mentioned two volumes on universities which had been published in the United States of America.

(132) In reply to Mr. RAADI (Iran), Mr AUGER (Director, Department of Natural Sciences) and the CHAIRMAN confirmed that the proposed addition to the work plan, corresponding to resolution 2 31, had been implicitly approved at the same time as paragraph 108.

(133) Mr. SHARIF (Pakistan), referring to paragraph 132, extended an invitation to the proposed conference on science teaching and vocational and technical training in South Asia on behalf of his delegation and Government If it were decided to hold the conference in Pakistan, his Government would offer all possible facilities to ensure its success.

(134) Mr. PRASAD (India) supported the proposal of the delegate of Pakistan.

(135) In connexion with resolution 2.32, Mr. Prasad referred to a proposal which had been made by the National Committee of the International Mathematical Union to organize a conference of Member States in South and South East Asia. He read a resolution passed by the Executive Committee of the International Union on 31 August 1954 during its meeting at The Hague, as a result of which the Indian delegation had asked Unesco for a grant of $3,000. The request had been approved by the Executive Board, but rejected by the Advisory Committee on Programme and Budget on 11 November 1954 by a vote of 5 to 4 with 2 abstentions.

(136) The Indian Government attached great importance to the conference and had already set aside a sum to contribute to its cost. He accordingly submitted the following proposal.

"Considering that the Executive Committee of the International Mathematical Union, at its meeting held at The Hague on 31 August 1954, voted unanimously in favour of a conference on mathematical education to be held in India in 1956 for countries of South and South East Asia, the General Conference authorizes the Director-General to make a grant of $3,000 to the National Committee in India of the International Mathematical Union to organize the proposed conference".

(137) Mr. AUGER (Director, Department of Natural Sciences) said that he had attended the meeting of the International Mathematical Union and could assert that the plan to hold a conference on the teaching of mathematics aroused the keenest interest.

(138) The Indian delegate's proposal, seconded by Mr. SUZUKI (Japan) and Mr. ABEYWICKREMA (Ceylon), was approved on the understanding that it would be referred to the Advisory Committee on Programme and Budget for its opinion.

The meeting rose at 1.15 p.m.

# EIGHTEENTH MEETING

*30 November 1954 at 3.30 p.m.*

*Chairman* Mr. BOURGEOIS (Switzerland)

(1) *The* CHAIRMAN *drew delegates' attention to a* detail: of a question with budgetary implications were referred to the Advisory Committee on Programme and Budget, that Committee was not called upon to re-examine it in order to submit a fresh project to the Commission for approval. The Advisory Committee's work was already concluded before the Commission began its meetings, thenceforward its task was to co-operate with the Director-General in working out proposals for enabling the programme and budget to be brought into line with the appropriations voted by the Conference It would, however, take note of the Commission's wishes.

[illegible] 3.3 OF REVISED AGENDA: SOCIAL SCIENCES

[illegible] s. MYRDAL (Director, Department of Social [illegible]ces) said that she was grateful for the opportunity to introduce the Department's programme to the Commission. The programme was divided into two parts, Section I on general activities and Section II on special activities. She drew attention to the statistical activities, which were in a special category, as they concerned every department of Unesco. Section I aimed at developing international machinery for the social sciences and Section II at helping to solve social problems of international importance by applying social science.

(3) She would only speak on the trends of development, pointing out Unesco's social science targets and how far they had been realized.

(4) The resolutions under 3.11 had as an objective the creation of international machinery for promotion of the social sciences. Unesco had to build from scratch, itself creating practically all the important social science associations, the international bibliographies for social science, etc., and now a firm foundation had been laid. In 1955-56 it was proposed to extend the geographical coverage of all the activities already established and at the same time to concentrate on fewer projects.

(5) The major social science associations were extending their activities to a greater number of countries, which involved higher costs and had thus necessitated a slight increase in subventions. It was intended to set up a system of social science correspondents in countries where there were too few social scientists to form an association. In addition, Unesco would help in arranging a meeting of the International Economic Association in Latin America and of the International Sociological Association in the Mediterranean next year.

(6) *The Social Sciences Department made much use* of the associations in the execution of its programme. This was particularly true of its co-operation with the International Social Science Council, which was set up in 1952 on a provisional basis but was now a fully developed organ, and carried the double function of a multi-disciplinary union like ICSU and CIPSH as well as being an advisory committee

(7) The same story of concentration on fewer activities, but of widened geographical coverage, could be told about the Department's documentation activities. The period 1955-56 should see a complete set of bibliographies for all the chief disciplines in the social sciences, with the aid of the International Committee for Social Science Documentation. Until 1954 work had been undertaken to cover the linguistic areas, first, of the working languages of Unesco, Spanish as well as other European languages, next Japanese, Hindu, Urdu, Thai and, in general, social science production in Asian countries. In 1955-56 it was proposed to establish machinery for an equally complete coverage of the production in Arabic and other languages of the Middle East. The only major linguistic area not systematically covered by the end of 1956 would be the Slavonic area.

(8) Finally, a major activity for the promotion of social science was contained in resolution 3.3, concerning the teaching of the social sciences. Again, the work had begun some 4 years ago by laying the foundations of a general, international fact-finding survey of social science teaching as it actually was at university level, and by having experts formulate a set of general recommendations for its improvement and extension. In the current programme period stress had been laid on regional activities, thus making it possible to adapt the recommendations to local needs and traditions. Consequently, it was logical to shift the accent in 1955-56 to direct aid to Member States. No fewer than 23 requests had been received from Member States for missions to advise on teaching reforms or to introduce teaching of new disciplines. In the future more attention could be directed towards the content of that teaching, curricula, teaching aids, etc.

(9) Mrs. Myrdal concluded by saying that, although an important first phase was being traversed in building up a social science machinery, thitherto non-existent at the international level, the task of promoting social science was by no means completed. After the foundations had been laid it was, however, logical to turn the work in the direction of closer co-operation with Member States, who alone could advance the social sciences to the point where they ceased to be underdeveloped sciences.

Paragraphs 1-15

(10) The CHAIRMAN opened discussion on the introduction to chapter 3.

(11) Mr. SEDES (France) explained the principles on which his remarks would be based
(12) The French delegation considered the Department of Social Sciences as the cornerstone of Unesco, and believed that its rôle was:
(1) to extend scientific knowledge concerning man in a given environment;
(2) to encourage Member States in research work, and help them to train and make use of specialists and to apply their knowledge,
(3) to keep Member States informed of research methods and of results obtained.
(13) Unesco's aim in the field of social sciences should be:
(1) to undermine social prejudice and break down the barriers between different societies,
(2) to develop a close understanding between the various human groups and give them a sense of each other's worth,
(3) to bring genuine, scientific backing to the educational activities of Member States.
(14) The French delegate added that the experience of all those concerned with the social sciences was sufficiently developed to ensure that those aims did not remain purely academic, but led to definite practical results.
(15) It was on those criteria that the French delegation intended to base its examination of the programme for the social sciences.

(16) Mr. VITO (Italy) appreciated the breadth of the social science programme, saying that it not only advanced the possibility of increasing interest in social science in all countries but emphasized the necessity of encouraging the exchange of results.
(17) The Italian delegation was glad to note that the activities proposed by the Secretariat were concentrated on the main areas providing problems of interest to social scientists. He suggested that Unesco should study economic and social problems and land reform from the aspects of interest to Unesco. Other aspects could be dealt with by other organizations. The aspect of interest to Unesco was how to organize community life and social relationships better.

(18) Sir Charles WEBSTER (United Kingdom) said that the social science co-operation body in the United Kingdom had asked him to express their appreciation of the proposed programme.
(19) In his opinion, parts of the programme needed clarification and others were overloaded or too ambitious. He hoped that the International Social Science Council would become more democratic and that it could be used for the distribution of funds

(20) Mr. LI U YING (China) had no general remarks to make, but intended to approach the question from a methodological standpoint.
(21) It seemed to him essential to enquire further into the problems raised by the social sciences - a subject still in its infancy. Reviewing the very diverse fields comprised by the social sciences, the speaker advocated the development, side by side with sociology, of an applied science which he would call "sociotechnics".

(22) Mr. LORENTZ (Poland) was pleased at the references, in the first sentence of the preamble, to the desire that the social sciences should aid man's progress towards peace and better living conditions and, later on, to the proposals for studying problems of international understanding and tensions.
(23) He wondered whether the latter projects, which he regarded as of major importance, had been given a high enough priority. Unesco's task was to smooth the way for discussion and for the pooling of experience between groups of mankind professing different beliefs. The Organization seemed, however, to be directing its energy towards training specialists, a task which he thought less urgent.
(24) He also thought the question of racial discrimination, dealt with in a draft resolution of the Indian delegation, deserved special attention.
(25) The Polish delegate felt, moreover, that the programme as a whole failed to express the need for universal brotherhood in the way that might have been expected of Unesco. The preamble to the chapter on the social sciences referred to a certain number of countries, but neither those of Eastern Europe nor China figured among them.
(26) Among the important questions which Mr. Lorentz thought might be usefully discussed between his own and other countries were women's cultural and political rights, industrial progress, and land reform While the programme was being examined, his delegation would stress the need to create a common pool of knowledge and experience between all countries on those subjects.
(27) The Polish delegate hoped that, when working out the 1957-58 programme, the Organization would duly consider giving the various countries a larger share in Unesco's work and that the obstacles to the admission of certain States would disappear.

(28) Mr. WADIA (India) congratulated the Director of the Department of Social Sciences on the excellent work done by the Department.
(29) It was a common experience that exact sciences attracted most attention because they could be studied dispassionately and because they furnished the peoples of the world with luxuries. The social sciences were in their infancy, but dealt with the living problems of humanity.
(30) The Indian delegation was closely interested in the training of social scientists, in the clearing house activities of Unesco, which would add to the fund of knowledge on social science problems, in the standardization of statistics, and in racial relations. It was particularly interested in the International Social Science Council.

(31) Mr. MORITO (Japan) explained why the Japanese delegation paid particular attention to Unesco's activities in the field of social science. A considerable number of factors causing or intensifying international tensions were to be found in that field. Studies, however, did not always promote

peaceful solutions of social problems. His delegation was convinced that Unesco was the most appropriate agency to tackle the complex problems involved, and that its contribution would be very great if problems were approached with realism and objectivity.

(32) The Japanese delegation welcomed the well-balanced concentration of the programme. It thought that Unesco's activities should be directed towards easing the tensions and conflicts arising from the economic, social and cultural life of each nation. His delegation agreed to the selection of the problem of race, the problem of human rights, the problem of migrants and the problem of the social impact of industrialization as major subjects for the programme.

(33) The problem of migrants might be regarded as one of the cultural and social aspects of the problem of population. The latter problem was of more concern to the United Nations than to Unesco, but he thought that Unesco could collaborate in that work on a much wider basis than merely by making a study of the migrants' problem.

(34) His delegation stressed the importance of regional and national activities in the sphere of social science. Many problems, such as minorities, could best be studied at the regional or national level. For that reason it supported the project for setting up a research centre both in the southern part of Africa and in South Asia and the projects concerning the holding of symposia and the undertaking of studies in Africa, Asia and Latin America.

(35) His delegation hoped that the results of the study of social problems and of measures for their peaceful solution would be widely disseminated in popular form through the most effective media.

(36) Lastly, the Japanese delegation supported the measures proposed for developing evaluation techniques of programme activities.

(37) The CHAIRMAN asked delegates to pay collective tribute to the labour involved in working out the programme of the Social Science Department, and in their statements to keep strictly to the discussion of its essential points.

(38) Mr IBANEZ-GOMEZ (Chile) associated himself with the tribute paid to Mrs. Myrdal by the Commission. He said that Chile, which had only very recently joined Unesco, had always been interested in the development of the social sciences, and that his delegation was very satisfied with the report presented by the Social Sciences Department.

(39) Social sciences were indispensable to the knowledge of peoples and to the promotion of mutual understanding. The study of social phenomena fostered the brotherhood of man and interdependence between States.

(40) Chile made the study of the social sciences at all educational levels compulsory. Its Faculty of Law was also a faculty of social sciences, and the country had social science seminars and study centres and special schools of social service.

(41) The free flow of information and publications should be intensified, and, in that respect, the work which Unesco was carrying out through its Social Science Bulletin was of great value. The Bulletin was not well enough known and deserved a wider circulation. It was the most important publication of its kind in the world.

(42) The Chilean delegation was interested in encouraging studies in comparative law - one of the needs of contemporary culture. The contradiction between different legal systems and techniques was an influence clouding understanding between peoples. Legislative systems needed unifying to facilitate international understanding. Unesco should strengthen its ties with the International Committee of Comparative Law, which had its headquarters in Paris and was an Organization of great value, with ramifications throughout the world, and particularly in Latin America.

(43) Lastly, an indispensable condition for international understanding was that international organizations, Unesco, and the principles of human rights should be made known to all circles in all countries. An enquiry had just been carried out in Chile on the occasion of the tenth anniversary of the founding of the United Nations. The results of that enquiry, in which various sections of public opinion had been sounded, were most discouraging. They had shown that there was great ignorance, even in educated and university circles, about what international organizations were, and, furthermore, that people were sceptical and lacked faith in their usefulness. Insufficient information about the organizations which controlled the life of the world had so far been disseminated, and the little publicity they had been given had drawn far more attention to their failures than to their achievements. Unesco should circulate more information on the subject in all countries, paying particular attention to spreading a knowledge of its own special aims and of human rights.

(44) Mr FORSYTH (New Zealand) recognized and appreciated the difficulties which faced the Department of Social Sciences and the needs of the various countries for social science. He thought that the Department had perhaps been tempted to expand too rapidly. In his opinion it was desirable to limit the number of projects and to follow a precise and clear course of action.

(45) A vote was taken on the preamble to the Social Sciences chapter, which was approved.

Project 3.01: Social science co-operation offices (paragraphs 16-24)

(46) The CHAIRMAN reminded the Commission that the Advisory Committee had made no comment on those items.

(47) Mgr MAROUN (Lebanon) drew attention to the Co-operation Office in Cairo, set up three years previously, which, thanks to the help provided by the Department of Social Sciences and to the zeal of the social science officer in Cairo, had already achieved very satisfactory results.

(48) Whereas, previously, nothing had been done in the field of social science, in the region, specialists in the Middle East were beginning to meet, to make contacts and to work together, but there still

remained much to do in a region of extreme social complexity.
(49) The Lebanese delegate expressed a certain concern, since he understood that the Secretariat was proposing to abolish the Cairo post and replace it by a non-permanent mission which would be responsible for carrying on the work already undertaken. He thought that would be a grave mistake, as the work begun in that region should not be interrupted. He therefore urged that the post be kept in being.

(50) Mrs. MYRDAL (Director, Department of Social Sciences) assured the delegate of the Lebanon that no change was proposed and the post would remain. The social science officer would remain at his headquarters, but would direct his activities more specifically to countries of the region more distant from Cairo.

(51) Mgr MAROUN (Lebanon) was satisfied with Mrs. Myrdal's explanation.

(52) Paragraphs 16-24 were approved.

Section I

Project 3.11: Co-operation with international social science organizations and institutions

(53) Baron van der STRATEN WAILLET (Belgium) remarked that, in allocating subventions, Unesco apparently tended to favour organizations set up under its auspices. For example, the International Social Science Council and the International Committee for Social Sciences Documentation were to have their subventions increased respectively from $15,000 to $18,000 and from $3,000 to $9,000, whereas the maximum increase granted to the various international social science associations was $1,000.
(54) The Belgian delegate proposed that each of the associations dealt with in paragraphs 35, 37 and 39 should have its subvention increased from $7,500 to $8,500 for each year, that the International Committee of Comparative Law (paragraph 41) should receive $7,000 in place of $6,000 for each year, and that the International Union of Scientific Psychology (paragraph 43) should have its subvention raised from $4,500 to $5,000 a year.
(55) As the Austrian delegate was not present, Baron van der Straten Waillet thought he should speak on behalf of the International Society of Criminology, a most deserving institution which would find itself in difficulties without the subvention of $1,000 it had received under the previous budget. The Belgian delegation supported the request of the Austrian delegation for the restoration of that subvention.
(56) Baron van der Straten Waillet thought the figures given for contracts reasonably satisfactory, but he considered that the system of contracts should be made more flexible and that provision should be made for:

(1) arrangements enabling awards to be made for good work carried out by associations on their own initiative,

(2) an amendment to the clause dealing with the evaluation of hours of work for purposes of payment, the only form of payment suitable for scientific work was an agreed sum;

(3) greater flexibility in the clause dealing with dates of payment, associations which provided guarantees should be able to obtain advances,

(4) an option for authors to take back their manuscripts if not published, without being obliged to buy them back.

(57) The Belgian delegate added that he intended no criticism of the financial departments of the Secretariat.
(58) He asked the Commission to consider the possibility of submitting a resolution to the Administrative Commission along the lines he had just mentioned.

(59) The CHAIRMAN pointed out that the provisional budget ceiling had already been fixed and that, while the Commission was free to take any decisions it wished, it did not appear to be aware of the danger of swelling the estimated figure by proposing continual increases.

(60) Mr. ZAMORANO HERNANDEZ (Chile) said that his delegation was not given to asking systematically for budget increases. He felt it incumbent upon him, however, to support the Belgian delegation's request that the subvention which had been granted in previous years to the International Society of Criminology, be restored to the budget. The Society had carried out work of the greatest value, criminology was a very important science concerned with the study of conditions responsible for anti-social behaviour. It was strange that the subvention which the Society had been receiving from Unesco, and which it should continue to receive, had been withdrawn.

(61) The CHAIRMAN pointed out that the resolution submitted by the Austrian delegation (document 8C/DR/13) would come up for discussion at the end of the chapter on Social Sciences.

(62) Mr. VITO (Italy) accepted the principle of the two resolutions under discussion (3.111 and 3.112).
(63) With regard to the statement in paragraph 29 that the development of social sciences at the national level was the responsibility of Member States, as was the establishment of social science committees within the framework of National Commissions, he recommended that Unesco associate itself with those committees. He stressed the importance of setting up national research councils where they did not already exist.
(64) He considered that the International Social Science Council should have as large a membership of different countries as possible. To that end, he recommended that the membership of its Executive Council should be increased in order to ensure a wider participation of countries.

(65) Mr. BRANDAO CAVALCANTI (Brazil) seconded the proposal of the Italian delegate. He mentioned that his country had just set up a National Social Science Council and hoped that aid would be forthcoming for its development.

(66) Paragraphs 31-33 were approved.

(67) Mr. SEDES (France) supported the Belgian delegate's proposal to increase the sums provided for in paragraphs 35, 37, 39, 41 and 43. He added, however, that he would propose reductions in certain items of the programme which would come up for discussion later.

(68) The CHAIRMAN put the proposal of the Belgian delegate concerning paragraph 35 to the vote.

(69) Approved by 11 votes to 9, with 17 abstentions.

(70) The CHAIRMAN asked for a vote on the Belgian delegate's proposal concerning paragraph 37.

(71) In addition to the French delegate, the delegates of Brazil and Chile supported the proposal.

(72) Mgr MAROUN (Lebanon) reminded the Commission that, at the Conference of International Non-Governmental Organizations, all the organizations had been asked to try to make contact with those countries where there were no national committees. The Lebanese delegate wondered whether the Belgian delegate's proposal was likely to promote such action.

(73) The CHAIRMAN stated that the Director-General had urged non-governmental organizations to request grants in the form of contracts rather than of subventions.

(74) Mrs. MYRDAL (Director, Department of Social Sciences) pointed out that there had already been an increase of $1,000 per year in the subventions to social science associations. That increase had been made in order to help cover the increased travel expenses envisaged for expansion of geographical coverage.

(75) Mr. ANGELL (United States of America) found himself in a difficult position on the question of subventions. In his opinion, an element of irresponsibility was involved in raising the proposed subventions. The United States delegation would be consistent and oppose any such increase. He had heard no argument given which would justify it

(76) Baron van der STRATEN WAILLET (Belgium) appreciated the disinterested attitude of the United States delegation. He wished to make it clear that the object of the Belgian delegation's proposal was to redress the balance between the "free" associations, on the one hand, and the committees set up under the auspices of Unesco, on the other, so as to ensure that the latter did not oust the former.
(77) He withdrew his proposal in respect of paragraph 37.

(78) Mr. PRATT (Australia), while sympathetic towards the work of the Association, was opposed to the granting of small subventions. In his opinion it would be more appropriate to leave the subvention total as it stood and to undertake work through the Association by means of contracts.

(79) The Commission adopted paragraphs 36 and 37 without amendment.

Paragraphs 38 and 39

(80) Mr. GANON (International Sociological Association) said that the Director-General's report on the subventions granted to international non-governmental organizations, including the International Sociological Association, showed that the subventions were in the nature of contracts, i.e., that the organization receiving the subvention was carrying out work which Unesco could not perform, or could not do so well or so economically.
(81) A study of the programme showed that the natural sciences had been granted several thousand dollars more than the social sciences. Research in the natural sciences was costly, but research in the social sciences was also far from cheap. The International Sociological Association had done all it could to pay its own expenses. As it had not the right to vote, it would be unable to register its support of the Belgian delegation's proposal, with which it was, however, in complete agreement.
(82) The Director-General's report also made it clear that, for an association to be considered international, two conditions had to be fulfilled: that it work on a worldwide scale, and that its membership be international. It was not sufficient for it to cover one continent, Europe, America, etc. The allocation of subventions to date had not taken those considerations into account.
(83) The sociological meetings for which subventions had been granted had all been held in Europe, and had been attended almost exclusively by Europeans. The social psychology and cultural anthropology surveys had taken in only one Latin American country, Mexico. The whole question was dealt with in document 8C/ADM/20, Annex XXVI. He was not asking that any subventions be withdrawn, but that account be taken of the merits of the International Sociological Association in the work of developing the social sciences.

(84) Mr. FORSYTH (New Zealand) considered that the topic for discussion by the Third World Congress of Sociology was unrealistic unless precise terms of reference were decided beforehand. Time was wasted during conferences unless they were planned along specific and narrowly defined lines.

(85) The proposal of the delegate of Belgium concerning paragraph 39 was supported by the delegates of France and Uruguay.

(86) Mr. ANGELL (United States of America) thought that some confusion had arisen as a result of his last intervention. He considered that all organizations should be treated alike.
(87) He asked whether the Commission had decided to leave the subvention to the International Economic Association as it appeared in paragraph 35. If not, he proposed that the Commission should do so for the reason that all organizations should be treated alike.
(87) He asked whether the Commission had decided to leave the subvention to the International Economic

Association as it appeared in paragraph 35. If not, he proposed that the Commission should do so for the reason that all organizations should be treated alike.

(88) The CHAIRMAN proposed that in the interests of consistency - and therefore of fairness - the Commission should take a decision on the advisability of increasing the sums mentioned in paragraphs 34-45, as a whole, without going into them again in detail.

(89) Mr. AWAD (Egypt) pointed out that the budget figures as proposed in the draft programme resulted from careful study by the Secretariat, which had consulted the organizations concerned. He was of the opinion that the Commission did not possess the means of judging the organizations without a more detailed study and he doubted the wisdom of trying to modify the figures. He agreed with the delegate of the United States of America that the proposed amounts should remain as they were.

(90) Mr. SEDES (France) was willing to take account of the comments made by the delegates of the United States of America, Australia and Egypt, provided that the Director of the Department of Social Sciences could assure him that the proposed subventions would enable the associations to continue their work and form national branches.

(91) Mr. ARSENAULT (Canada) said that his delegation agreed with the delegates of the United States of America, Australia and Egypt.

(92) Mr. WADIA (India) supported the opinion of the delegate of the United States of America. The temptation to vote an increase in the subventions was natural but he felt that, if a delegate proposed an increase, he might equally well propose cuts elsewhere in the programme.

(93) Mrs. MYRDAL (Director, Department of Social Sciences) explained that all the organizations to which it was proposed to give subventions had been created by Unesco and were equally close to Unesco's heart.

(94) In answer to the delegate of New Zealand concerning precise topics for discussion at conferences, she explained that the theme was "New research on how social change affects social institutions such as the family". Plans had been made by ISA for working papers on very precise points.

(95) The increase in subventions proposed in paragraphs 44 and 45 did not really constitute increased payments by Unesco, but included as a subvention certain sums which had been included under the heading of contracts in earlier periods.

(96) The Secretariat had carefully studied and weighed the subventions to be granted to organizations. Those organizations could, of course, use larger subventions, but were glad to accept the scale of subventions proposed as an expression of the fair judgment of the Director-General. All subventions had been approved by the Executive Board and the Advisory Committee on Programme and Budget.

(97) Paragraphs 34-45 were approved by 37 votes to 4, with 2 abstentions.

International Statistical Institute (paragraphs 46-50)

(98) In reply to a question from the delegate of the Federal Republic of Germany why there had been an increase in the subvention to the International Statistical Institute, Mrs. MYRDAL (Director, Department of Social Sciences) explained that formerly a sum of $9,000 had been given to the Institute in the form of a contract to supply international staff. That activity was now called a subvention and represented the same sum of money as before.

Unesco Institute for Social Sciences, Cologne (paragraphs 51 and 52)

(99) Approved.

Staff travel (paragraphs 53 and 54)

(100) Approved.

(101) The CHAIRMAN asked the Commission to consider the draft resolution concerning the International Society of Criminology (document 8C/DR/13), submitted by the Austrian, and seconded by the Belgian, delegation.

(102) Mr. CABOUAT (Rapporteur, Advisory Committee on Programme and Budget) said that the Advisory Committee had not felt able to recommend that the proposal be adopted, as the Society's activities were not closely enough related to those of Unesco.

(103) Mrs. PECSON (Executive Board) said that the Executive Board had given the proposal very careful consideration but, in the interests of concentration of resources, had been unable to recommend its adoption by the General Conference.

(104) Sir Charles WEBSTER (United Kingdom) asked if the International Social Science Council was consulted on an application of that kind. In his opinion, some body should assist Unesco to reach a decision on such matters.

(105) Mrs. MYRDAL (Director, Department of Social Sciences) said that the International Council was consulted on the proposed programme as a whole. That request for a subvention had been received by the Secretariat much too late to be submitted to the Council. Unesco had co-operated with the International Society of Criminology and had in 1953-54 given it a small subvention to be used for work on teaching of criminology.

(106) Sir Charles WEBSTER (United Kingdom) proposed that consideration of document 8C/DR/13 should be postponed until the ninth session of the General Conference in order that the opinion of the International Social Science Council could be obtained.

(107) The United Kingdom proposal was supported by several delegates.

(108) Mr. VITO (Italy), speaking not only as a delegate but as a member of the International Social Science Council, pointed out that the Council had not been intended as a body to control Unesco subventions. The Council was not consulted on administrative problems but only on social science ones.

(109) Mr. AFTALION (Argentina) said that document 8C/ADM/20 gave an account of the work of the International Society of Criminology and its financial resources. The information given showed that the Society was reliable and that its activities met real needs. It was constantly engaged in international work connected with the study of the serious problem of crime, and it therefore seemed clear that Unesco should continue to take an interest in its efforts.
(110) It could also be seen from the above-mentioned document that the subvention to the Society was one of the smallest in Unesco's budget. It was unjustified from all points of view to cancel a subvention of $1,000 to an eminent and useful body. The Argentine delegation would support the maintenance, at least, of that sum in the budget. Anything less would show failure to recognize work of world-wide interest

(111) The CHAIRMAN asked the delegate of Belgium the amount of the subvention granted to the International Society of Criminology.

(112) Baron van der STRATEN WAILLET (Belgium) confirmed that the subvention was $1,000.

(113) In answer to the delegate of the United States of America, who asked if he was correct in believing that work on criminology was more closely associated with the Social Affairs Department of the United Nations than with Unesco, Mrs. MYRDAL (Director, Department of Social Sciences) replied in the affirmative and added that the Secretary-General of the United Nations had asked to be consulted on any proposed subvention in that field.
(114) Unesco was, however, interested in the teaching of criminology and had intended giving contracts to certain organizations representing disciplines such as criminology to undertake work on teaching.
(115) The International Society of Criminology was doing very valuable work. It had certain resources of its own. It had been proposed, in the interests of concentration of the programme, not to give it a subvention.

(116) Mr. ROMANO MUNOZ (Mexico) also expressed surprise that the subvention to the International Society of Criminology had been withdrawn. The new contributions made by psychology to the study of crime and of its penal consequences had completely transformed penology. No advance in penal legislation was possible without sound preliminary studies in criminology. Studies of that kind were carried out very seriously in Mexico, and a number of eminent men of international repute had come to the fore. The foremost penal experts in Mexico were at the moment devoting their attention to criminology.
(117) It was strange that such a small subvention to so important a scientific body had been deleted from the budget. It would be very regrettable if Unesco, which had taken a leading part in the study of the social sciences, were to neglect a fundamental subject which had transformed the classical concept of delinquency.
(118) The Mexican representative appealed to the Commission to maintain the subvention.

(119) Mr. VITO (Italy), raising a point of order, explained that he did not object to the proposal of the United Kingdom delegate to postpone consideration of document 8C/DR/13 until the ninth session of the General Conference, but with the reservation that the Secretariat should prepare a paper containing information concerning the work of the International Society of Criminology in the meantime.

(120) Mr. BERGSTRAESSER (German Federal Republic) could not see what criteria had been used to grant a subvention to the International Society of Criminology. The income of the Society amounted to $40,000 and the withdrawal of a contribution of $1,000 by Unesco was unlikely to diminish the Society's efforts.
(121) Secondly, referring to document 8C/ADM/20, he suggested that, in the future, an evaluation should be added to the reports of affiliated associations, based on the reports from those associations or on the experience of the Secretariat. Such evaluations would be of great assistance to members of the Commission for voting purposes.

(122) The CHAIRMAN considered that it would be a dangerous thing for the Secretariat to be asked to give the organizations good conduct marks. It should provide general information, leaving Member States at liberty to obtain further details.

(123) Mr. AWAD (Egypt) hoped that subventions of $1,000 would not be reintroduced in future programmes. Unesco was right in concentrating on major disciplines. He thought that the Commission should not alter the figures proposed by the Secretariat for the period 1955-56.

(124) Mr. SEDES (France) had felt inclined to agree with the United Kingdom delegate. After hearing the explanations given by Mrs. Myrdal, however, and knowing how useful the help of such a body might be to Unesco in its educational work, he was in favour of restoring the subvention.

(125) Sir Charles WEBSTER (United Kingdom), raising a point of order, pointed out that the United Kingdom proposal was an amendment to document 8C/DR/13. He accepted the amendment which had been proposed to his amendment, and moved that consideration of document 8C/DR/13 should be deferred.

(126) The CHAIRMAN called for a vote on the resolution contained in document 8C/DR/13, with

the amendment proposed by the United Kingdom delegate.

(127) Approved by 30 votes to 10, with 3 abstentions.

(128) The CHAIRMAN then submitted to the Commission the following draft resolution, submitted by the Belgian delegation:

"The Programme and Budget Commission,

Considering that the present rigidity of the contract system frequently inhibits the work of non-governmental organizations,

Requests the Administrative Commission to re-examine the system of contracts, with a view to:

1. Enabling awards to be made for studies or other work of outstanding merit contributing to the achievement of Unesco's aims,

2. Making the contract system, and methods of financial control, more flexible".

(129) Mr. RAO (Acting Chief, Bureau of Programme and Budget) welcomed the opportunity given him by the delegate of Belgium to explain the Secretariat's method of allocating subventions.
(130) The Secretariat considered subventions as sums of money granted for carrying out a programme project. As a form of aid, the method was flexible, with no hard-and-fast rules or conditions.
(131) With regard to the question of making advance payments, a satisfactory system had been established which was outlined in document 8C/ADM/5 Advances were made only when necessary but there was nothing to prevent the Director-General from making them.
(132) Questions of the waiving of copyright were dealt with through the Publications Board. Copyright was waived when it was thought useful to do so.
(133) He concluded by wondering whether the Belgian delegate would reconsider his position if the Director-General gave the Commission an assurance of flexibility and undertook to act in the new financial period in the light of the discussion which had taken place.

(134) Baron van der STRATEN WAILLET (Belgium) was prepared to withdraw his draft resolution, if he received from the Secretariat an assurance of flexibility with regard to contracts.
(135) He asked for further information on two points:

(1) did the existing contract system allow for the possibility of recompensing work which had not been commissioned, but had proved useful?

(2) could an author who had handed over a manuscript to Unesco and surrendered the copyright, regain possession of his work, without repurchasing it, if Unesco decided against publishing it?

(136) Mr. RAO (Acting Chief, Bureau of Porgramme and Budget) explained that, by the definition of a contract, services had to be rendered to Unesco before a contract was given. Compensation to organizations for work done and not asked for by Unesco would fall under the category of subvention.
(137) Copyright clauses were waived without incurring expense.

(138) Baron van der STRATEN WAILLET (Belgium) withdrew his draft resolution.

Project 3.12: Clearing house for information and advisory services (paragraphs 55-70)

(139) Mr. WEILENMANN (Switzerland) considered that adult education institutes should be given the place they deserved and, for that purpose, proposed adding at the end of paragraph 57 the words "with the help of the institutes of adult education".
(140) He emphasized the importance of resolutions 3.122 and 3.34, and said that it was his opinion that, if Unesco were deprived of all its activities with the exception of those, it would still be left with its most important.
(141) The crucial question was the one of publications and of how information, factual and other, should be printed to reach everyone in the world. Publications should be made in every language in which it was desired they should be read, and should be available in cheap form. He suggested that Unesco, or even better, a committee of experts connected with Unesco, should choose the material for publication, choose the authors and the publishers in the various countries and the form in which the publications would appear. Unesco could assist in the work of translation.
(142) The scheme he had suggested should be self-supporting and, to enable that to be the case, Unesco could approa publishers, book clubs, humanitarian societies, etc. who were willing to co-operate in the field, and ask them not only to publish, but to distribute booklets approved by the Committee.
(143) He asked the Secretariat to consider his suggestion and thanked Mrs. Myrdal and the Chairman for all they had done

(144) The Swiss delegate's proposal was supported by the delegates of Egypt, Uruguay and France.

(145) In answer to a question from the delegate of Canada why there had been an increase in the budget appropriation for project 3.12, paragraph 55, Mrs. MYRDAL (Director, Department of Social Sciences) explained that a series of projects which had previously appeared under separate headings had been merged into the clearing house project. In addition, there was a slight increase due to the number of enquiries which had poured into the Department.

(146) Mr. VITO (Italy) supported the resolution. He suggested that contributions to the Social Science Bulletin should be requested from social science experts, even if such experts came from countries having relatively unknown languages.

(147) The draft amendment proposed by the Swiss delegate was approved.

(148) Resolutions 3.121 and 3.122 (amended) were approved

Project 3.13: Improvement of social science documentation and terminology (paragraphs 71-90)

(149) Mr. ARSENAULT (Canada) asked why the estimate for 1955-56 for the improvement of social science documentation and terminology represented

a substantial increase over that for 1953-54. He noticed that approximately half of the amount was for the project on the International Bibliography of Anthropology, and asked whether such a bibliography was necessary and why it would take so much money to prepare.

(150) Mrs. MYRDAL (Director, Department of Social Sciences) replied that there had been no very substantial increase in the budget, which had moved only from $22,891 in 1954 to $28,668 in 1955. The increase proposed would be justified by the increased number of bibliographies. Paragraph 83 referred not only to the Bibliography of anthropology but to the five bibliographies mentioned in paragraphs 78-82.

(151) The CHAIRMAN asked whether the different countries were called upon to communicate data to the Secretariat to assist in compiling the bibliographies.

(152) Mrs. MYRDAL (Director, Department of Social Sciences) replied in the affirmative. The technical work was being organized by the International Committee for Social Science Documentation, and the international professional associations advised on the content to be covered.
(153) In countries such as France and the United Kingdom, which had well-established bibliographical services, the work of compilation was done for Unesco by those institutes. Unesco was trying to find national correspondents in all countries to help with the work, relying largely on specialized librarians and documentalists.
(154) Replying to an earlier remark by the delegate of Poland concerning the absence of coverage in the bibliographies of publications in Eastern European languages, Mrs. Myrdal pointed out that coverage was being gradually extended to all linguistic areas. She had already mentioned the possibility that coverage of the Eastern European linguistic area might be considered for the period 1957-58.

(155) Paragraphs 71-90 were approved.

Project 3.2: Statistics relating to education, science and culture

Paragraphs 91-95

(156) Mr. PRATT (Australia) stressed the importance of project 3.2 and urged that attention should be given to the initial stages of the work prior to collation, in order that classification, analysis and definitions should be as effective as possible.

(157) Replying to a question from the delegate of the United Kingdom, the CHAIRMAN said that document 8C/PRG/2 would be examined at the same time as paragraph 107.

(158) Paragraphs 91-95 were approved.

Project 3.22: Collection and publication of statistics (paragraphs 96-102)

(159) Approved without discussion.

Project 3.23: Improvement of international comparability of statistics (paragraphs 103-112)

(160) Mr. WARD (United Kingdom) had four comments to make on the standardization of educational statistics (document 8C/PRG/2, Annex III).
(161) In the first place, the United Kingdom delegation was not enthusiastic about standardization of statistics on literacy or on routine schooling. It was not possible to measure literacy accurately and he doubted the value of undertaking elaborate exercises in an attempt to do so.
(162) Secondly, the principal methods suggested for obtaining information on routine schooling were by asking direct or indirect questions. In his opinion, indirect questioning was worthless.
(163) Thirdly, the Director-General had proposed that schools should be defined under categories different from those proposed by the committee of experts. In his opinion, the committee of experts' definition was the right one.
(164) Lastly, he thought that classification of pupils and students by sex and grade was unsatisfactory.
(165) He hoped that the Director-General would reconsider his proposals in the light of the recommendations of the committee of experts.

(166) Mr. ANGELL (United States of America) pointed out that, although the United States delegation was interested in the standardization of educational statistics and would co-operate in the project, it was in a difficult position with regard to the procedure proposed for obtaining statistics. The United States of America was a Federal Republic and had no central educational authority. The Government would be willing to co-operate in the proposed work, but was not in a position to compel States to undertake it. He hoped that, if results from the United States of America were incomplete, the reason would be understood by other countries.

(167) Mrs. MYRDAL (Director, Department of Social Sciences) said that to abstain from attempting to define measures for illiteracy would be fatal. Even if the standards were not perfect, the very considerable advances made in literacy constituted one of the outstanding cultural conquests of our era, and must be registered.
(168) In answer to the delegate of the United Kingdom, she intimated that the Director-General had made proposals at variance with those of the committee of experts as a result of comments made to him by Member States.
(169) She pointed out that in document 8C/PRG/2, the Director-General was only asking for authorization to send a report with annexes to Member States for their comments. The question would have to appear before a General Conference a second time, under the existing rules of procedure.

(170) Mr. STEWART (Canada), while agreeing with the remarks made by the delegates of the United Kingdom and the United States of America, supported the resolution and, on behalf of his Government, expressed willingness to co-operate in the work.

Section II

Project 3.3: Development of social science teaching (paragraphs 113-134)

(171) Mr. SEDES (France) noted the use of the phrase "at all levels", in resolution 3.31, in referring to the teaching of the social sciences. The same expression occurred again in resolution 3.33. The French delegate asked for further details about the teaching of the social sciences at secondary school level.

(172) Mrs. MYRDAL (Director, Department of Social Sciences) explained that the heading for resolution 3.3 was inclusive. Teaching of the social sciences at all levels was referred to in the paragraphs of the work plans under that heading. Elements of social science teaching existed in secondary school education and an analysis was being made with the co-operation of the International Federation of Secondary School Teachers.

(173) Mr. SEDES (France) proposed that, to avoid confusion, resolution 3.31 be amended as follows: "Member States are invited to encourage, develop and improve the teaching of the social sciences, as such, and the use of knowledge acquired from the social sciences at all levels of teaching"

(174) The amendment was put to the vote and approved.

(175) The CHAIRMAN put before the Commission a draft resolution submitted by the delegation of Iran, to launch a scheme for setting up an international institute for the training of international civil servants (document 8C/DR/62).

(176) Mr. RAADI (Iran) first made the point that the draft resolution had no budgetary implications. It related to a preliminary study to determine whether it would be desirable to set up an institute, under the auspices of Unesco, to train candidates for the international civil service. The idea was not a new one. The two basic factors taken into account in the recruitment of international civil servants were professional competence and geographical distribution In practice, it was often difficult to combine those two factors and in many cases geographical representation could be achieved only at the expense of professional competence, or vice versa. The Iranian delegation therefore felt that it would be wise to seek a rational solution to the problem, even if it could not be put into effect until later.
(177) What was in mind was merely a study of the question in co-operation with the United Nations and the other Specialized Agencies. The Director-General could then report to the Conference at its next session on the results of his consultation, and it would lie with the Conference to decide whether any such body should be set up. If the institute were set up, a student who had attended the course and been awarded a diploma would not, ipso facto, be entitled to a post in an international organization.
(178) He thought, however, that such a system would enable the underdeveloped countries to put up candidates for the international civil service.

(179) Sir Charles WEBSTER (United Kingdom) mentioned the statement of the delegate of Iran that no budgetary charge would be made for undertaking the proposed work. In his opinion, however, if the work was to be done properly, it would take the Secretariat a very long time and involve it in much additional work The problem was highly controversial and it was not known whether other agencies would be willing to co-operate in its solution.

(180) In answer to a question from the delegate of the United States of America, Mrs. MYRDAL (Director, Department of Social Sciences) said that both the United Nations and Unesco kept track of information on that subject As a project subsidiary to that for carrying out fact-finding surveys (paragraph 121) on the teaching of several disciplines, such as public administration, Unesco could undertake the necessary work.
(181) The delegate of the United Kingdom had been correct in saying that extra work would fall upon the Secretariat, but the difficulties here would be political rather than technical.

(182) Mr. ANGELL (United States of America) was impressed by the importance of the problem raised by the delegate of Iran. He suggested that the Commission agree to the collection of information during the period 1955-56 and leave consideration of a resolution until the ninth session of the General Conference.

(183) Mrs. PECSON (Executive Board) said that the Executive Board had not discussed the resolution.

(184) Sir Charles WEBSTER (United Kingdom) recognized the problem, but being anxious not to throw the burden of planning onto the Secretariat, asked the delegate of Iran if he would be willing to accept the suggestion made by the delegate of the United States of America.
(185) He suggested that paragraph (1) of the resolution contained in document 8C/DR/62 might then read: "to study, jointly with the United Nations and the Specialized Agencies, the information which might be used in the future for the establishment of an international centre or institute.. ".

(186) Mr. RAADI (Iran) said that, in view of the explanations given by Mrs. Myrdal, he accepted the point of view of the United States delegate. He also accepted the suggestion of the delegate of the United Kingdom, subject to possible rewording.

(187) The CHAIRMAN proposed that the Iranian and the United Kingdom delegates should together decide on the new wording, which would be submitted to the Commission at its next meeting.

(188) Approved.

(189) Mr. SANCHEZ REULET (Organization of American States) wished to make a suggestion to Unesco's Department of Social Sciences concerning the teaching of statistics. He asked, that were Latin America was concerned, account should be taken of the work of the Inter-American Institute of

Statistics in improving teaching and in training specialists. The Institute had a special centre dealing with such activities and represented the most important current project in connexion with statistics.

(190) Sir Charles WEBSTER (United Kingdom), raising a point of order, pointed out that the question of public administration had been dealt with at Chicago. In addition, he considered that, as the question of industrial relations was very involved and extensive, it would be better if the project outlined in paragraph 121 were limited to fact-finding surveys in the fields of statistics and demography.

(191) In reply, Mrs. MYRDAL (Director, Department of Social Sciences) said that the studies which had been undertaken by the public administration clearing house in Chicago were not complete. They did not cover all countries nor all branches of administration. The work Unesco proposed to undertake on teaching of public administration was in accord with the United Nations Technical Assistance Board.

(192) For the survey of the teaching of statistics, Unesco could rely on the International Statistical Institute and the Inter-American Statistical Institute, which would greatly facilitate the execution of that part of the project.

(193) She admitted that the question of the teaching of industrial relations was a difficult one and suggested that it might be deferred until a later programme. A survey on the teaching of criminology could take its place.

(194) Sir Charles WEBSTER (United Kingdom) moved that the resolution should be adopted with the suggested amendments.

(195) The Commission adopted resolution 3.31 with the French amendment, and resolutions 3.32 and 3.33 with the Swiss amendments.

The meeting rose at 7.10 p.m.

# NINETEENTH MEETING

*30 November 1954 at 9.30 p.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

**ITEM 8.4.2 OF REVISED AGENDA: NATURAL SCIENCES (continued)**

DR/110: Rational exploitation of natural resources (submitted jointly by the French, Belgian and Uruguayan delegations)

(1) Mr. FLORKIN (Belgium) submitted draft resolution 2.222, together with the work plan and budget estimates for 1955-56 and explained that the document submitted to the Commission was intended to replace draft resolutions 8C/DR/35, 54 and 60.

(2) Draft resolution 2.222 stated:

"The Director-General is authorized to promote the co-ordination of research on the conservation and utilization of natural resources, with reference more particularly to the repercussions of hydro-electrical works on the natural environment".

(3) Mr. Florkin drew attention to the serious effect which the construction of a big dam and other plant or hydro-electrical works might have on the natural surroundings of an area when man's interference was divorced from the enlightenment of expert opinion on natural conditions.

(4) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) announced that the Advisory Committee, after examining the very interesting proposals contained in draft resolutions 35, 54 and 60, now included in draft resolution 110, had recommended that they should be submitted by the Director-General again for the 1957-58 programme.

(5) Mr. AUGER (Director, Department of Natural Sciences) explained that the idea was to bring engineers and naturalists together so that the needs of industry could be weighed against those of nature. The result would be that constructors of dams would take into account the effect of their schemes upon natural resources.

(6) Mr. BERREDO CARNEIRO (Brazil) reminded members of the unfortunate results that had followed the hydro-electrical development of the semi-arid region of North East Brazil. That immense area was now faced with serious difficulties, the water that had accumulated above the dams had dissolved the salines in the soil and had become more harmful to surrounding vegetation and animal life than the former aridity had been.

(7) He therefore warmly supported the draft resolution.

(8) Sir John SIMONSEN (United Kingdom) viewed the proposal with much sympathy, but proposed that the Commission should accept the Advisory Committee's recommendation.

(9) Mr. ABEYWICKREMA (Ceylon) asked whether it would not be possible to include it in the humid tropical zone project for the 1957-58 budget.

(10) Mr. PAGE (Canada) supported the United Kingdom's proposal, adding that a good deal of work had already been done nationally and internationally on the conservation and utilization of natural resources and that the project would suffer no great damage through delay.

(11) Mr. LINKSON (Australia) enquired whether co-ordination with the International Union for the Protection of Nature, and other bodies, had been considered.

(12) Mr. AUGER (Director, Department of Natural Sciences) said that the proposal was submitted in agreement with the International Union for the Protection of Nature and the International Commission on Large Dams, two non-governmental organizations which consisted of qualified representatives of two bodies with widely divergent interests and which would be glad to state and compare their points of view. A meeting of that kind would be most useful.

(13) In reply to Mr. PHOTIADES (Greece), Mr. AUGER said that agronomic engineers and, in particular, specialists in soil study should take part in the work. The co-operation of pedologists was particularly important, as the Brazilian delegate had pointed out.

(14) Mr. Auger explained that, provided the subject appeared in the programme, even with a reduced budget or no budget at all, the Director-General would be able to initiate consultations with specialists. But, if the project were postponed until 1957-58 he would not even be able to start consultations.

(15) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) wished to make it clear that in making its recommendation the Advisory Committee had been fully conscious of the interest of the project contained in draft resolution 110. One of its reasons for proposing the delay had been precisely to allow for more detailed consultation with the international organizations mentioned by the Australian delegate. Those organizations, though they agreed with the proposal in principle, had not yet had the opportunity of commenting fully on it.

(16) The Director-General he added, would need some textual basis on which to start the necessary preliminary consultations.

(17) Mrs. PECSON (Representative of the Executive Board) said that the Executive Board had recommended the proposals contained in draft resolutions 35 and 54, but had asked that draft resolution No. 60 be deferred until the next General Conference, as it was a very important one, which should be studied in detail first. She noted that the proposal in question was not included in draft resolution 110, and therefore the draft resolution was in line with the Executive Board's recommendation.

(18) The CHAIRMAN pointed out that there were three proposals before the Commission: (a) the draft resolution submitted by the French, Belgian and Uruguayan delegations (document 8C/DR/110); (b) the amendment moved by the United Kingdom delegation for adopting the conclusions of the Advisory Committee on Programme and Budget, and urging that the project be postponed until 1957-58; (c) the proposal that the Director-General be instructed to study the question while avoiding any budgetary implications.

(19) Mr. BERREDO CARNEIRO (Brazil) considered that there were no technical or budgetary reasons for postponing the project, which was within clearly defined limits and carefully planned, and which would be very beneficial to all the semi-arid zones.

(20) Put to the vote, the United Kingdom amendment for deferring the project until 1957-58 was adopted by 13 votes to 9, with 11 abstentions.

(21) Mr. BERREDO CARNEIRO (Brazil) remarked that the project, although postponed, had not been dropped entirely, as the Advisory Committee on Arid Zone Research would be able to draft recommendations for the General Conference's ninth session.

(22) Mr. MAHEU (Assistant Director-General), explaining the impact of the decision just taken, said that, in the absence of funds, the Secretariat could not undertake a really exhaustive analysis of the project. The idea would be explored with a view to its inclusion in the draft programme and budget for 1957-58.

(23) The CHAIRMAN then read out draft resolution 42 submitted by the Uruguayan delegation on the teaching of the principles of the conservation of natural resources:

"The General Conference,

Authorizes the Director-General to promote the teaching of the basic principles of the conservation of natural resources, to assist, by the use of the media of mass communication, in making the public aware of these problems and to encourage research on subjects connected with the principles of conservation".

(24) The Chairman thought that that text, which had been approved by the Advisory Committee on Programme and Budget, would keep the question of the rational utilization of natural resources in the programme without entailing any appropriations.

(25) Mr. AUGER (Director, Department of Natural Sciences) believed a simple verbal change in one paragraph of the proposed programme and budget, with no budgetary implications, would suffice.

(26) Mr. FLORKIN (Belgium) asked the Uruguayan delegation to abide by the general idea of the draft joint resolution (document 8C/DR/110). Obviously there was no need in that resolution to refer explicitly to teaching of the principles of the conservation of natural resources, as the proposed measures could not be envisaged unless teaching formed part of them.

(27) He suggested that the Uruguayan delegation should withdraw DR/42, just as he had himself withdrawn DR/58, and should accept his proposal to add to the beginning of DR/110 the text submitted in paragraph 23 above.

(28) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) indicated that the Advisory Committee had reached the same conclusion with regard to draft resolutions 42 and 58 as on the project previously discussed. Consultation with other organizations was necessary, and the Director-General should have the opportunity of studying the proposals for inclusion in the 1957-58 programme.

(29) Mr. VILLAR (Uruguay) indicated his assent to the Belgian draft resolution.

(30) Draft resolution 8C/DR/110 was approved.

Technical aid to Member States

Resolution 2.321: The Director-General is authorized to provide technical aid for Member States in connexion with science teaching at university level and for the practical teaching of science in secondary schools.

Paragraphs 136 and 137

(31) Mr. JOHANNES (Indonesia) warmly defended the project contained in paragraph 136. Indonesia was in great need of expert aid in training for all the peaceful uses of nuclear energy, about which the Commission had passed a resolution that morning.

(32) Paragraphs 136 and 137 were approved.

Paragraphs 138 and 139

(33) Mr. PRASAD (India) proposed that, as the allocation for the teaching of science in secondary schools was so small, it should be suppressed in favour of other projects.

(34) Mr. BERREDO CARNEIRO (Brazil) asked whether, in the event of paragraphs 138 and 139 being rejected, Mr. Auger could consider using the $40,000 thus saved for the nuclear physics and cosmic rays project.

(35) The CHAIRMAN reminded delegates that the Commission had already voted large supplementary funds and that it might very well not have the sum mentioned at its disposal.

(36) Mr. MAHEU (Assistant Director-General) suggested that sums made available by cancelling projects or postponing them to 1957-58 should be counted as remaining in a general fund, so that after the budget had been reviewed in detail the Director-General could submit to the Commission overall proposals for final budgetary adjustments.

(37) Put to the vote, the cancellation of the appropriations referred to in paragraphs 138 and 139 was rejected by 18 votes to 13, with 3 abstentions.

DR/109: Quito Observatory

(38) Mr. MONTALVO (Ecuador) proposed that the sum of $3,000 be added to the end of the chapter to pay for part of the technical aid needed by the Government of his country for modernizing the equipment at the Astronomical Observatory in Quito. His Government had frequently spoken to Unesco officials on that important matter.
(39) The insignificant sum requested would only cover part of the expert's cost, the major part being borne by the Government of Ecuador. The principal object of that request was to be sure of an efficient technician, to be recommended by Unesco.

(40) Mr. FORSYTH (New Zealand) repeated a protest he had made at an earlier meeting against the flood of last-minute draft resolutions, submitted far too late for their discussion by delegates, let alone by National Commissions. He raised a tentative point of order: could a new draft resolution on a particular question be handed round while the question was actually being discussed?

(41) Sir John SIMONSEN (United Kingdom) remarked that, according to Rule 78 on page 22 of the Rules of Procedure, new draft resolutions could not be submitted later than the end of the seventh day of the session.

(42) The CHAIRMAN reminded delegates that the Commission had decided to consider draft resolutions, originally rejected because of failure to submit them within the time limit, when a delegation insisted upon submitting them afresh in the form of oral proposals. He noted further that the proposal to reject the Ecuadorian suggestion on the Quito Observatory had not been seconded.

(43) Speaking on a point of order, Mr. BERREDO CARNEIRO (Brazil) said that the project submitted by the Ecuadorian delegation had rightly been declared non-receivable as a draft resolution, but it could take the form of a request for technical assistance, i.e. for the services of an expert, as had happened in the case of an observatory in Brazil.

(44) Mr. AUGER (Director, Department of Natural Sciences) thought the Technical Assistance Board would not accede to a request of that kind; it had already stated that projects connected with astronomy did not come within its normal programme.
(45) He would suggest, however, that the project might be brought within the programme by extending the provisions of resolution 2.321 on technical aid to Member States so as to cover astronomy.

(46) Mr. VILLAR (Uruguay) said that, having listened to Mr. Auger's statement, the Uruguayan delegation supported the new version of the Ecuadorian proposal.

(47) Mr. PAGE (Canada) protested against the manner in which the proposal of the delegate of

Ecuador had been presented, and felt he could not participate in the discussion of it in that form.

(48) The CHAIRMAN said that, should the Commission so wish, it could revoke its previous decision to receive oral proposals. Declaring that the discussion could be reopened, he recalled that protests had been lodged by delegates who had asserted that the Commission's powers were unduly limited by the automatic rejection of oral proposals on the ground that that was required by the rules of debate.

(49) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) thought that the General Conference at its seventh session had laid down clearly the procedure for the consideration of new proposals. The Commission should normally have before it, in connexion with each proposal, the recommendation of the Executive Board and that of the Advisory Committee. If the Commission intended to upset that procedure, he failed to see what the rôle of the two Advisory Committees was.

(50) The CHAIRMAN asked once more whether the Commission was in favour of or against considering oral proposals.

(51) Speaking on a point of order, Mr. BERREDO CARNEIRO (Brazil) urged that a distinction be made between proposals with and those without budgetary implications.

(52) The CHAIRMAN reminded members that they had decided to receive oral proposals even when they had budgetary implications.

(53) Mr. PHOTIADES (Greece) said that every General Conference had consistently followed the practice of refusing to consider any proposal not previously approved by the Executive Board.

(54) Mr. AL-KOUSSI (Egypt) felt that a fair balance should be maintained between flexibility in discussion and the rejection outright of any unwarranted extempore proposal. The Ecuadorian proposal came within the normal procedure and was therefore receivable in equity, if not within the strict letter of the law.

(55) Mr. SPILHAUS (United States of America) was led by the very confusion of the meeting at that moment to support the protests made by the delegates of New Zealand and Canada.

(56) Mr. AUGER (Director, Department of Natural Sciences) suggested that on the basis of resolution 2.321 the Commission would be in order in mentioning astronomy in paragraph 136 side by side with nuclear physics and cosmic rays. That solution was entirely feasible and had no budgetary implications. It involved neither a new draft resolution nor a new proposal, but only a textual amendment.

(57) After the New Zealand delegate had reiterated his point of view, the CHAIRMAN replied that he did not feel that his decisions amounted to a departure from the motion adopted at the beginning of the Commission's work.

(58) According to the strict letter of the rules, a draft resolution tabled after document 8C/DR/61 was not receivable as such. The Commission had decided that, if any delegation so demanded, it might submit a project in the form of an oral proposal and, if the latter had any budgetary implications, the Commission would be free to accept or reject such implications, or even the whole proposal.

(59) Mr. MAHEU (Assistant Director-General) thought that Mr. Auger had given the correct explanation of the proposal under discussion. It was merely an amendment to the work plan, and so entirely receivable.

(60) For the rest, the references to astronomy, nuclear physics and cosmic rays served only as illustrative example. The Director-General was free to arrange the details according to requirements, for the work plans accompanying the draft programme and budget were not a legal document, with limitative or exclusive effect.

(61) Mr. LINKSON (Australia) shared the perturbation of other delegates at the inclusion of the request presented by the delegate of Ecuador in paragraph 136. Was it a suitable time, and even a suitable place in the budget for it? The renovation of an astronomical observatory had little to do with the development of university education in nuclear physics. Mr. Linkson considered it a dangerous precedent to make such amendments in a programme which ought to be homogeneous. One word, one syllable had divided Christianity.

(62) Mr. SANDOVAL VALLARTA (Mexico) said that, in view of the explanations of the Director of the Natural Sciences Department, and of the fact that the Ecuadorian proposal had no budgetary implications, a solution would be to insert the word "astronomy" in paragraph 136 and include Ecuador in the list of countries in question.

(63) Miss BOLLO (Uruguay) observed that the point under discussion was one of procedure and did not affect the substantive question, i.e. Ecuador's request for technical aid, which was really the subject under consideration.

(64) Mr. ABEYWICKREMA (Ceylon) wished to know how the figures under paragraph 137 had been arrived at, and whether they could be reduced by the rejection of the proposal submitted by the delegation of Ecuador.

(65) The CHAIRMAN suggested that, in view of the difficulties entailed by his proposal, the delegate of Ecuador might be willing to refer it to the next General Conference.

(66) Mr. MONTALVO (Ecuador) said that, provided the situation could be cleared up at the meeting that day, his delegation would not object to withdrawing its proposal for the time being. But he did not wish the subject to be regarded as closed, since, in his opinion, it was of paramount importance both to his

own country as to the rest of the American continent, the Observatory rendering the most valuable services owing to its geographical position.

(67) Sir John SIMONSEN (United Kingdom) saw no relation between the proposal of the Director-General under project 2.321 and that of the delegation of Ecuador.

(68) Mr. PRASAD (India) said that paragraphs 136 and 137 had been adopted. Before it could go any further with the discussion the meeting would have to decide whether it would take up the subject again or not.

(69) The CHAIRMAN asked whether the Commission wished to revert to paragraphs 136 and 137 in order to include the word "astronomy".

(70) The reconsideration of paragraphs 136 and 137 was put to the vote and approved by 11 votes to 9.

(71) Mr. AUGER (Director, Department of Natural Sciences) thought that the Commission would be straying very far from the truth in supposing that astronomy was not a subject of university education. In France, for instance, the observatories were regarded as an integral part of the universities, making it possible to give practical application to the theoretical teaching of the lecture room.
(72) As the Assistant Director-General had explained, even if the Commission took no decision, the proposal represented a measure on which it was open to the Director-General to take action. But it would be better that the Commission approve the inclusion of astronomy in the paragraph and so recognize the existence of a very real need.

(73) Put to the vote, the amendment to paragraph 136 was adopted by 23 votes to 4, with 7 abstentions.

(74) Mr. PRASAD (India) said that it had been agreed to include the word "astronomy" in paragraph 136. It was now necessary to vote on the required subvention.

(75) Mr. MAHEU (Assistant Director-General) explained that the decision just taken did not cover the $3,000 requested, but merely authorized the Director-General to take action within the limits of the present budget appropriations.
(76) Further, resolution 2.231 should be amended by deleting the last part of the sentence on the practical teaching of science in secondary schools.

"The Director-General is authorized to provide technical aid for Member States in connexion with science teaching at university level".

(77) That amendment was approved without discussion.

Project 2.41: Science Co-operation Offices

(78) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) having stated that the Advisory Committee had recommended that the project be referred to the Working Party on Decentralization, the SECRETARY read out the passage dealing with the matter in the report of the Working Party:

"Having heard the Chairman of the Executive Board and the Director of the Natural Sciences Department on this subject, the Working Party recommends that:

(a) the science co-operation offices should be maintained as proposed by the Director-General in the draft programme and budget (document 8C/5) for the next two years. Consideration of the special case of the Delhi Office was, however, left to the Programme and Budget Commission,

(b) the Director-General should be asked to study carefully the development of the science co-operation offices with a view to establishing how the funds at the disposal of these offices could be most efficiently expended". (Document 8C/PRG/25 (rev.), page 2 of English version.)

(79) Mr. IBANEZ GOMEZ (Chile) said that the regional science co-operation offices had always received highest priority at the instigation of the Anglo-Saxon delegations, which had in fact been the driving force behind them. Chile, which had just joined Unesco, wished to be associated with that policy and pressed for the highest priority for those activities.
(80) He emphasized the importance of the regional offices and recalled the work achieved by the Montevideo Office, which had been responsible for Chile's entry into Unesco.
(81) The one tangible achievement of Unesco in the South American continent was the direct action taken by the Co-operation Office for Latin America, and for that reason he was dismayed at reading in document 8C/PRG/25 (rev.) that "the Director-General should be asked to study carefully the development of the science co-operation offices with a view to establishing how the funds at the disposal of these offices could be most efficiently expended". That sentence, if approved, would imply a criticism, for it almost asked whether the Director-General was watching carefully over the development of those offices.
(82) Further, looking at the sentence from a wider angle, it implied placing in the Director-General's hands an instrument which would enable him to veto any future agreements on co-operation offices. That was to say, a personal decision by the Director-General would suffice to modify or cancel a decision taken by a sovereign body such as the General Conference.
(83) He therefore asked that document 8C/PRG/25 (rev.) be approved with the deletion of paragraph (b) in Point II.

(84) Mr. BERREDO CARNEIRO (Brazil), speaking on a point of order, said that the proposal was unacceptable unless the Working Party's report were included in the discussion.

(85) Mr. PHOTIADES (Greece) asked for the Assistant Director-General's views on the budgetary implications of the recommendation.

(86) Mr. MAHEU (Assistant Director-General) explained that the report, though not actually included

in the discussion, might be used as a source of information to assist members in the debate.
(87) The Secretariat's opinion was that paragraph (b) did not imply any criticism, at most a suggestion to facilitate further progress.

(88) Mr. PRASAD (India) expressed the surprise of his delegation at the proposal contained in paragraph 145 of the proposed programme and budget to transform the office for South Asia into a branch office. That was the only retrograde step in the whole of the Natural Sciences chapter, and it was in contradiction to resolution 2.41 authorizing the Director-General to develop the activities of science co-operation offices in South Asia among other parts.
(89) The reason given was that of budgetary limitations, but $40,000 had been released under paragraph 139; and in studying paragraphs 182 and 196-197, he found the only result of the reduction was the suppression of one P-5 post.
(90) On account of the importance of the science co-operation offices, the delegation of India proposed that paragraph 145 should be replaced by the following:

"Past experience of the work of the science co-operation offices has shown that there is urgent need to expand their activities in South and South East Asia and bring them more into consonance with the requirements of the region with a view to encouraging the spread of scientific education and knowledge and providing facilities for the greater utilization of science in raising the standard of living of the people. The Conference therefore authorizes the Director-General to maintain the existing science co-operation office at Jakarta at its present level, and, on the basis of the offer of the Government of India made in consultation with, and with the support of the delegations of Indonesia,, Burma and Ceylon, to develop the Delhi Science Co-operation Office into a Nucleus Office in terms of resolution 8C/DR/14, of which notice has already been given.

"The Conference further authorizes the Director-General to make consequential changes in paragraphs 172-184 (pages 70-71) and paragraphs 191 and 192 (page 71) of the Draft Programme and Budget for 1955-56, and to carry out necessary alterations in the budget provision for the effective implementation of this proposal".

(91) The delegate of India drew attention to draft resolution 8C/DR/14, in which his Government offered free office facilities and guidance over residential accommodation to members of the regional office.

(92) Mr. VILLAR (Uruguay) said that the Science Co-operation Office in Latin America played an invaluable part in spreading scientific knowledge in that part of the world, both by arousing the interest of governments and peoples and by facilitating and stimulating scientific development and research.

(93) The CHAIRMAN asked whether the Uruguayan delegate had any concrete proposal to formulate.

(94) Mr. VILLAR (Uruguay) replied that his delegation shared the concern expressed by the Chilean delegate, but had suppressed his feelings in the matter, on the understanding that their remarks would be noted in the records.

(95) Mr. ABEYWICKREMA (Ceylon) supported the delegate of India. Why should the Office in India be singled out for reduction? That Office served a very useful purpose in an area with a population exceeding 400,000,000 Moreover, library facilities etc. in the area were still inadequate.

(96) Mr. PAGE (Canada) fully supported the delegate of India. The budgetary implication was small and the need of the service in that area was a vital one.

(97) Sir John SIMONSEN (United Kingdom) was sorry to oppose the delegate of India in saying that the Director-General's proposal was a tribute to his country. The development of science in India had attained such a high standard that it could now carry on without a full-scale office.

(98) In reply to a question from the CHAIRMAN, Mr. MAHEU (Assistant Director-General) said that in its draft resolutions on the decentralization of Unesco's activities and the establishment of a regional office in South and South East Asia (documents 8C/DR/7 and 8C/DR/14), the Indian delegation had asked for a regional office to be opened for co-operation with Unesco, and had been supported by the delegations of Ceylon, Indonesia and Burma. That proposal would come up for discussion in connexion with Point V of the Working Party's report on decentralization (8C/PRG/25 (rev.), page 5 of the English version) and the general resolutions, none of which documents were at present under discussion.
(99) The question under examination at the moment was the retention or abolition of the Delhi Office under the present system. Its retention would cost Unesco $60,000 for the two years.

(100) The Liberian delegate having supported the Indian proposal to retain the Delhi Office at its present level with an expenditure of $60,000 for 1955-56, the proposal was adopted by 19 votes to 9, with 4 abstentions.

(101) The CHAIRMAN said that the question would be submitted to the Advisory Committee on Programme and Budget.

(102) The provisions relating to project 2.41: Regional Science Co-operation Offices, were adopted as far as paragraph 149 with the amendment proposed by the Indian delegation.

(103) The provisions relating to the Science Co-operation Office in Latin America (Montevideo), paragraphs 150-152, were adopted without discussion.

Meetings and scientific research (paragraphs 153-159)

(104) Mr. SANDOVAL VALLARTA (Mexico) proposed an amendment to paragraph 156, the first sentence to be replaced by: "It is proposed to organize in Mexico an international congress on cosmic radiation

under the auspices of the International Union of Pure and Applied Physics" The next sentence could remain unaltered, but the last should be amended to read: "the Science Co-operation Office will pay the expenses of some of the participants"
(105) The Mexican delegation's reason for desiring that amendment was that at the International Congress on Cosmic Rays held in France in 1953 the Cosmic Rays Committee of the International Physics Union had agreed that the next congress should be held in Mexico City. Prior to that decision the Mexican National Commission had applied for assistance for a symposium on gravitation and cosmology. But in view of the agreement with the International Physics Union, Mexico had decided to propose the present amendment.

(106) The CHAIRMAN remarked that the Mexican delegate's proposal had no budgetary implications.

(107) Various proposals connected with the science co-operation offices in Latin America and the Middle East, and with meetings and scientific research, were adopted without discussion (paragraphs 153-171).

Science Co-operation for Asia (paragraphs 172-175)

(108) Mr. PRASAD (India) asked that his proposal (document 8C/DR/89) should be taken into account in dealing with that section.

(109) Mr. MAHEU (Assistant Director-General) apologized for having misled the Commission with regard to the budgetary implications of retaining the Co-operation Office in Delhi. Contrary to what he had said, the figure was not $60,000 for the two years 1955 and 1956, but $60,000 per annum, i.e. $120,000 for the two years. He asked the Commission to hear a statement by the Director of the Natural Sciences Department on the reasons that had led the Director-General to propose cutting down the Delhi Office.

(110) Mr. AUGER (Director, Department of Natural Sciences) explained that the regional scientific co-operation offices were not, properly speaking, regional co-operation offices. Members of the Secretariat were sent there but were not officially seconded to one of the regions in the normal sense of the term. That was why the offices were mobile and, in the same way, special branches set up in the Philippines and Shanghai had later been withdrawn.
(111) Furthermore, India had made great strides in scientific research over the last few years. It now possessed excellent research laboratories and full-grown universities attended by many holders of scholarships and staffed by fully-trained scientists. India therefore was not a country in urgent need of scientific aid and the Director-General had preferred to concentrate on Jakarta and the Middle East.
(112) The Delhi Office had not been abolished: a senior member of the Department was remaining there to carry out liaison work and possibly organize symposia and series of lectures.

(113) Mr. SPILHAUS (United States of America) was confused. The delegate of India had first referred to a small adjustment, namely one P-5 post. Then $60,000 had been mentioned and finally $120,000 On the other hand, a whole new field (that of astronomy) had been incorporated into a project "at no cost". Mr. Spilhaus was beginning to doubt the validity of the budget document.

(114) Mr. PRASAD (India) was also confused after the explanations of the Director of the Natural Sciences Department. He thanked the delegate of the United Kingdom for his interpretation of the reduction of the office as a tribute to India, but did not find a word of that in the reasons given for that reduction in paragraph 145. The net result of the various changes, as stated in paragraph 192, was the decrease of one P-5 post. Did that amount to $120,000?
(115) If India had developed scientifically, there was all the more reason for maintaining the office at its present level. The delegate of India did not think that the discussion could be reopened again in that manner.

(116) Mr. AUGER (Director, Department of Natural Sciences) thought it inaccurate to say that the only cut in the Delhi Office was the suppression of a grade P-5 post. In abolishing that post, expenditure on accommodation, travel and the salaries of local staff were also reduced. It was unnecessary to give scientific aid to India, a country where science was already highly developed. If the Commission decided that it was the most advanced countries that needed Unesco's scientific co-operation, offices would have to be set up in the United States of America and Western Europe.
(117) If the Delhi Office were retained at full strength, with no increase in the general budget for the project, the other science co-operation offices would have to revert to their 1952-53 level.

(118) Mr. BERREDO CARNEIRO (Brazil) recalled the vote passed by a big majority in favour of retaining the Delhi Office. The Commission should not go back on that vote before receiving the report of the Advisory Committee and examining it at leisure. It was unwise to come to a decision in a few minutes near midnight, on the fate of scientific co-operation in a country like India.

(119) The CHAIRMAN pointed out that the parliamentary shuttle system was not in use at Unesco's General Conference, moreover, the vote in question being based on erroneous information could not be counted as valid.

(120) With the above reservations regarding the question of the auxiliary office in Delhi, paragraphs 172-175 relating to science co-operation offices in Asia were approved without discussion.

(121) Mr. MASSAQUOI (Liberia) referred to the Indian delegation's proposal (document 8C/DR/89), which had been accepted on the basis of erroneous figures. In deferring that question until all the detailed figures were before the meeting, the

$40,000 saved in connexion with paragraphs 138 and 139 should be taken into account.

(122) The Secretariat should not be allowed to dictate to the Commission when obliging it to go back upon its vote. When the Secretariat was favourable to a project, it was disposed to make all necessary alterations, but in the case under discussion an incorrect figure had been given, which showed that the Secretariat did not want India to gain its point.

(123) The CHAIRMAN recalled the Commission's previous decision when voting the provisional budget for the Natural Sciences Department. He urged delegates not to go back on their offer with regard to the Delhi Office before they knew the exact figures:

(a) of the budgetary implications of the Delhi Office;

(b) of the total saving effected in the provisional budget of the Natural Sciences Department.

(124) Mr. MAHEU (Assistant Director-General) apologized again for his mistake. The late hour no doubt explained his own lapse and certain exaggerated imputations ascribed to him by the Liberian delegate. He regretted his mistake, but to say that it was a calculated manoeuvre in order to defeat a delegation's proposal was an undeserved insult.

(125) Mr. PRASAD (India) requested the Secretariat to provide the figures for maintenance of the Delhi Office at its reduced level, so that the additional expense involved in keeping it at its present level could be estimated

(126) Mr. U-TSUN-CHEN (China) considered that, if the vote on the Delhi Office was invalid, the Commission should disregard it.

(127) The CHAIRMAN asked whether the Liberian delegate wished to make for entry in the records a statement on his previous remarks about the Secretariat, to indicate that he agreed with the latter.

(128) Mr. MASSAQUOI (Liberia) was sorry he could not then make the statement required of him.

(129) At the request of the delegate of the United Kingdom, the meeting was adjourned just after midnight.

# TWENTIETH MEETING

*1 December 1954 at 10 a.m.*

*Chairman:* Mr. THA HLA (Union of Burma)

**STATEMENT BY THE LIBERIAN DELEGATE**

(1) Mr. MASSAQUOI (Liberia) referred to a discussion between himself and the representative of the Secretariat at the previous meeting. He had not intended to question the integrity of the Secretariat and in view of the explanation which had been given he was prepared to withdraw his statement.

**ITEM 8.4.3 OF REVISED AGENDA: SOCIAL SCIENCES** (continued)

Paragraphs 124-130

(2) Approved.

Direct aid to Member States in the organization of social science teaching (paragraphs 131-134)

(3) Mr. SANCHEZ REULET (Organization of American States) expressed his satisfaction at the work Unesco was doing to study the position with regard to social science teaching in Latin American universities, he added that OAS was prepared to co-operate in the work by furnishing the services of its own staff and making an appropriation for the purpose in its budget for 1955 and 1956.

Technical aid to Member States (paragraphs 135-139). Resolution 3.34

(4) Sir Charles WEBSTER (United Kingdom) said that a large sum had been allocated to the project, but not enough information was given on how it would be spent. There were very few highly qualified social scientists available and since, as had been pointed out, social science activities were fairly new to Unesco's programme, it was important not to advance too far without adequate personnel. He asked if the Director of the Department could indicate whether there was sufficient talent available to justify expenditure at the rate of $50,000 in each of the coming two years.

(5) Mr. VITO (Italy) asked whether some of the technical aid budget recommended in resolution 3.34 could be used to assist the establishment of social science teaching institutes, to help in developing research on the social implications of

mass communication. He was not concerned with the technical aspects, but with the kind of research carried out by the Institute of Public Opinion, the BBC Listener Research in the United Kingdom and the Society of Authors in Italy. In the past there had been no attempt to deal with the problem at university level, but if any such initiative were taken by Unesco, the University of Milan would be glad to co-operate.

(6) Mr. BRANDAO CAVALCANTI (Brazil) dwelt on the stimulus Unesco's aid might give to the teaching of the social sciences, which was still in its early days.
(7) Technical aid would be particularly valuable in the formation of research centres, whether teams of students or private institutions.

(8) Mgr MAROUN (Lebanon) said that his country had made a request for help with a view to founding an Institute of Social Sciences in the Lebanese University The Institute, which would be founded under the joint auspices of the Lebanese, American and French universities, would be widely open to students and highly international. Mgr Maroun assured the Commission that the preparatory work, which had been done on the basis of thorough enquiries carried out over several years by the Beirut Centre for Social Research, was already finished.

(9) Mr. PRATT (Australia) said that the general opinion at the regional conference on teaching of social science in Asia had been that the best results from a limited budget would be achieved by sending social scientists out of the underdeveloped countries for training rather than sending missions into those countries. The Australian delegation supported the resolution, with the proviso that two-way action should be envisaged, and that missions should not be contemplated unless they had been requested.

(10) Mr. MENDIS (Ceylon) supported the resolution but agreed with the point made by the delegate of Australia. He was particularly interested in paragraph 138, since in his country teaching would have to be given in schools before it could start in universities. With regard to the delegate of Lebanon's statement, the request he had made was a special one and Unesco should grant it.
(11) To sum up, Ceylon would be glad to take advantage of a project for training social scientists; and teaching within the countries should be given first in teacher training colleges, then in secondary schools and lastly in the universities.

(12) Mrs. MYRDAL (Director, Department of Social Sciences), replying to the delegate of the United Kingdom, said that, far from having too large a budget, the programme had had to be limited through lack of funds. In the previous year, one mission had been proposed, but twenty-three had been requested from Member States. It had been possible, with the Executive Board's help in making transfers from other parts of the budget, to send four missions (to Costa Rica, Guatemala, Pakistan and Greece), but there were still 19 requests outstanding. Moreover, the project was included on the general ground that when the 1955-56 programme was being planned the Secretariat had been instructed that more attention was to be given to direct aid to Member States. Unesco would be helping Member States not only by advisory missions but also by assistance with teaching aids and by grants for fellowships. (See Exchange of Persons Programme, paragraph 49)
(13) The Italian delegate had suggested certain activities which, Mrs. Myrdal said, might be among the requests from Member States. Selection among requests received would be necessary, but difficult with a limited budget, but suggestions from delegates would be borne in mind at the appropriate time.
(14) With regard to paragraph 138, the Department's share in fellowships under the Exchange of Persons Service was at present concentrated on two fields, the one, at present under discussion, of promoting social science teaching and the other on the social impact of industrialization. The fellowships and mission schemes were planned in conjunction, so that students trained abroad would be able to take over from the foreign experts at the end of their term of work.
(15) The Director-General would shortly be sending a circular letter inviting requests from Member States, but funds were already inadequate for projects which had been submitted with fully detailed plans. Those included a social science institute in Lebanon, social science teaching in Syrian universities and Iraqi secondary schools, the teaching of statistics in Iran, an institute of economics and sociology in Guatemala, and a regional post-graduate institute of economics in Central America.
(16) Thus the project represented a modest start to meet specific needs which had been strongly voiced by Member States.

(17) Mr. SEDES (France) admitted that it was a good thing for students from certain countries to go abroad to foreign universities better organized than their own, but he thought it was equally necessary to arrange courses in the social sciences in universities that lacked them.
(18) It should not be forgotten that social science courses were normally accompanied, and should always be accompanied, by research, and that such research provided the countries in which it was carried out with a considerable body of data likely to help them in understanding their own needs. It was for Unesco to take the lead in organizing social science courses and, their indispensable corollary, research.

(19) Mrs. PINTO DE VIDAL (Uruguay) regretted that the social sciences had not yet been brought within the aegis of the United Nations, since it would be a fine task for Unesco to encourage the study of those sciences, particularly in the underdeveloped countries. She considered that, if Unesco could enlist the aid of Member States and obtain an increase in its revenue, it could carry out that very important work more energetically and on a more lavish scale.

(20) Mr. SIDDIQI (Pakistan) was keenly interested in the activities proposed under resolution 3.34.

A scheme was being worked out in his country for setting up a faculty of social sciences, to include the study of international relations, political science, economics, geography and other related subjects, and the assistance envisaged under the resolution would be most helpful. In his opinion teaching should start at university level, in order to provide personnel equipped to introduce the subjects in secondary schools and training colleges.

(21) Mr. SUNDARAM (India) was sympathetic towards the resolution but disagreed with the argument of the United Kingdom delegate. The very fact that social sciences were less developed than other activities showed that unlimited sums could be used for teaching and training in that field. As he had stated at a previous meeting, the development of the social sciences was essential to the promotion of the attitude to peace which was one of the fundamental ideas of Unesco.

(22) Mr. WALKER LINARES (Chile) said that his delegation fully supported resolution 3.34, although it considered that it would be essential to include instruction about social legislation in the teaching of the social sciences; Unesco might be able to carry out that work in collaboration with ILO

(23) Mrs. MYRDAL (Director, Department of Social Sciences), replying to the delegate of Chile, said that, although social legislation was the concern of the International Labour Organization, Unesco was the only agency in the United Nations family dealing with the teaching of social sciences and therefore also with the teaching of law. Many requests had been received for assistance in that field, and there would no doubt be many more if the proposed programme were approved.
(24) With regard to the resolution proposed by the delegation of India (DR/21), asking for assistance in connexion with the School of International Relations at Delhi, the Executive Board and the Advisory Committee on Programme and Budget had recommended that requests of that nature should be dealt with under resolution 3.34 as aid to Member States.

(25) Mr. RAADI (Iran) approved the substance of the resolution, as did most of the delegations.
(26) Iran was one of a group of countries that had experts who, without perhaps being world authorities, could start off the teaching of the social sciences in their own countries. But, lacking proper organization, appropriate help and often the necessary documentation, those experts had to turn to other subjects. Whatever steps they might take towards organizing social science teaching on systematic lines should be supported with all Unesco's authority.

(27) Mr. AWAD (Egypt) supported the project in all its aspects, and mentioned particularly the training of teachers and the teaching of social sciences at university and post-graduate levels. In his view, however, the States concerned should contribute to the cost of projects which affected a limited area.

(28) Mr. DIAZ SAMAYOA (Guatemala) thought that, although the work undertaken by the Department of Social Sciences was worthy of high praise, efforts should be made to leave the greatest possible development of the subjects in question at university level. His delegation therefore thought that Member States should be recommended: (1) to set up, in their universities, special institutes for study and research in the social sciences; (2) to include certain social science subjects in their respective curricula, taking particular account of their influence on the development of man's mind, (3) to increase the funds already allocated to such work.

(29) Mr. BERGSTRAESSER (German Federal Republic) supported the proposals of the delegates of Guatemala and France. A small budget could be used to the greatest advantage by careful cultivation of research and teaching at university level, thus helping underdeveloped countries to train their own staff with the least delay. He proposed - either for inclusion in the resolution, or as a general directive that priority should be given to training of people who would be able to train social science teachers in their own countries.

(30) Mrs. MYRDAL (Director, Department of Social Sciences) said that the views of the German delegate would be kept in mind.
(31) In reply to the delegate of Egypt, in general the same rules applied as for technical assistance. A round figure of $12,000 per annum was provided for each mission, the total sum thus allowing for four missions in each of the years 1955 and 1956. If, as sometimes occurred, a country needed a mission for more than one year, the number of countries would have to be reduced.

(32) The CHAIRMAN asked for a vote on resolution 3.34, amended by the deletion of the word "technical".

(33) The resolution was adopted unanimously.

(34) The Commission then voted on project 3.3 as a whole, comprising resolutions 3.31, 3.32, 3.33, and 3.34.

(35) The project was approved unanimously.

Projects 3.4-3.7

(36) Mr. CABOUAT (Advisory Committee on Programme and Budget) said that the Advisory Committee had tried in its recommendations to select from the many priority fields those most deserving of special attention. Projects 3.5 and 3.6 belonged to that category.
(37) On the other hand, it had had to eliminate - although, of course, only temporarily - projects whose execution seemed of secondary importance, given the available credits. That applied to project 3.4, and especially paragraph 152, relating to public acceptance or rejection of Unesco and United Nations principles.

(38) Mrs. MYRDAL (Director, Department of Social Sciences) introduced the remainder of the chapter on Social Sciences. The last four projects differed in character from the previous ones, in that

they constituted a programme in which Unesco, on the basis of the machinery established in the previous section, was endeavouring to apply the resources of social science to the solution of certain vital social problems. The ones which had been selected were: human rights, international understanding, social development, and evaluation. They represented, in fact, an adaptation of Unesco's social sciences programme to the concern for practical action expressed by the Executive Board and by Member States. Unesco's means were modest compared with the vastness of the problems involved, and help would be needed from Member States. Unesco could provide the stimulus and strategic aid in marshalling the resources of the various countries, so that research could be carried out internationally instead of bilaterally.

(39) In that connexion she referred to Unesco's more ambitious programme of 1946 and quoted a recommendation stressing the vital need to tackle the problem of tensions. In spite of careful preparation in the Department of Social Sciences, Unesco had never been called upon to implement the recommendations adopted in 1952, 1953 and 1954 calling for research directly in tensions areas. Such a resolution was therefore not included in the present programme. A new stage had been reached, where the study of tensions was being replaced by positive action for the improvement of international understanding.

(40) Mrs. Myrdal described briefly project 3.4, which had two major fields of activity: mediation and public opinion. She read an extract from the report of the recent meeting of the Expert Committee on Education for International Understanding and Co-operation, welcoming the inclusion of paragraphs 148-160 in Unesco's programme. Public opinion on the ideals of Unesco and the United Nations represented a new venture for Unesco in its studies of the crucial problem of peace and international understanding. A cautious approach was envisaged in the initial stages, and the free assistance offered by several public opinion research institutes represented a valuable contribution. With their help Unesco would be able to discover in what directions it should intensify its work for the enlightenment of the public through education and mass communication.

(41) On the problems of human rights and social development close co-operation would be maintained with the United Nations and the international organizations concerned. At present neither the United Nations nor any of its constituent bodies had research departments in those fields and, while Unesco could not accept full responsibility, it would be possible by mobilizing social scientists in different countries to direct activities to problems of specific value to those bodies which had to make decisions on international problems. Thus the Department of Social Sciences was endeavouring to serve the United Nations and the Specialized Agencies and to promote wider public interest in them. There was full co-operation within the United Nations family, a good division of labour and no risk of overlapping.

(42) In the field of human rights (project 3.5) activities were devoted to ethnical groups, women's rights and migrants; racial problems were of particular importance. A certain amount of success had attended the campaign for enlightening the public on race problems. In 1955-56 a great part of the resources of the Department would be devoted to problems of social changes, under project 3.6, with special attention to those caused by rapid economic development. It was also proposed to establish a centre of applied social science for use as a task force in the service of Member States to help them in their planning of economic and social development. Finally, in project 3.7, a series of evaluation projects was envisaged to serve international action programmes and also to assist other departments of Unesco and the United Nations. Unesco's function would be to establish techniques which could later be included in the routine administration of such programmes as libraries, fundamental education, fellowships and seminars, in order to test their efficiency.

(43) The applied social sciences programme was concentrated on a few problems where an acute need was manifested. Since it was to be carried out in many regions and with the co-operation of local personnel, it would indirectly also lead to increased training and the promotion of internationalism.

(44) Mr. ANGELL (United States of America) said that he had intended to submit a proposal on race relations combining the resolutions of the Indian and Czechoslovak delegations (DR/5 and DR/72) together with an addition on behalf of his own delegation (DR/105 rev.). In the circumstances, he proposed that the three resolutions should be discussed together, or that discussion should be deferred until he had prepared the combined resolution, or that the matter should be referred to a plenary meeting.

(45) Mr. RAO (representing the Director-General) proposed that the matter should be submitted to the General Committee for decision.

(46) Mrs. PINTO DE VIDAL (Uruguay) asked that the motion put forward by India (document 8C/DR/5) be discussed immediately by the Commission, since she could see no reason for postponing its consideration.

(47) Mr. SUNDARAM (India) said that it would be appropriate to discuss the resolutions in the Commission because of their budgetary implications.

(48) At the suggestion of Mr. RAO, it was decided to postpone discussion until the night meeting.

(49) Mr. STEINIG (United Nations) proposed, in order to save time, to speak on a number of connected projects. Confirming a statement made by the Director of the Department of Social Sciences, ever closer co-operation was developing between that department and the corresponding divisions of the United Nations Secretariat, and the United Nations was relying more and more on the Department of Social Sciences for basic research into the many complex problems with which it had to deal.

(50) With regard to the integration of ethnic groups in Africa, the United Nations was interested in the project and looked forward to receiving systematic

information on its development and preliminary results.
(51) An important part of Unesco's work and one of particular interest to the United Nations was the section dealing with social sciences and the problems of social development, and social sciences and evaluation techniques; both subjects had a bearing on the programme of technical assistance to under-developed countries. From the history of the industrialized West it was known how high - considering the human factor - was the price paid for industrialization and how deep were the structural changes brought about by it in Western society. Unesco's research should help to avoid the repetition of that experience in lands to be newly developed. He hoped that special attention would be paid to research on methods to promote successful transition from traditional to modern society, including the problem of changing from rural to urban life.
(52) Other fields of common interest to the United Nations and Unesco were the project on the social problems of industrialization in South Asia and the proposed symposium in Latin America. In connexion with the latter, the United Nations Economic Commission for Latin America was planning a seminar in 1956 on economic development and he looked forward to co-operation and joint action by Unesco and ECLA.
(53) The United Nations would also welcome information on the relation of local self-government to community development, resulting from the studies proposed under paragraphs 201, 211 and 230. In that connexion, he referred to a resolution passed at the thirteenth session of the Economic and Social Council and called attention to the shortage of information on local authorities for social and economic development observed by the United Nations in preparing a report on community welfare centres and community development projects; he was convinced that consultations between Unesco and the United Nations on the selection of areas for surveys would help both organizations in their work.
(54) Finally, in the important study of the social aspects of land reform, the United Nations, after consultation with Unesco, had welcomed co-operation between that Organization and the competent departments in the United Nations.

Project 3.5: The social sciences and problems of human rights and minorities

(55) Mr. SCOTT (United States of America), who said that he was a member of the United States Congress, claimed to represent a nation which had found that persistent and courageous facing of problems brought about substantial results.
(56) Freedom and non-discrimination were linked with the search for security and peace in the world, and non-discrimination as it was understood in the United States of America implied freedom to speak, think, meet together, write and publish.
(57) The section of Unesco's programme dealing with human rights and non-discrimination was important, and continued work was needed to improve conditions in many parts of the world. Much still remained to be done concerning the position of the negro in the United States of America. A recent study sponsored by Unesco had indicated that a difference still existed between the standing of the negro citizen and the white citizen, but that in almost every significant economic, political, educational and social aspect there had been rapid improvement.
(58) At the present time ten per cent of Americans were negroes, but negroes represented eleven per cent of industrial workers, and the high proportion in industry was an indication of the negro's progress, for he now commanded a wage four times higher than in 1940, while the rise for the average population was only two-and-a-half times. Some negroes were now landholders and wealthy business men, they worked in banks, public utilities, insurance companies and retail stores; and followed the professions of physicist, chemist, psychologist, doctor and metallurgist. They were a vital factor in local, State and national government, had been selected to city councils, State legislative bodies and to Congress. They also served as State and Federal judges and held important city, State and Federal government positions, including the post of Assistant Secretary of Labour.
(59) While in 1900 fifty-six per cent of the negro population was illiterate, in 1940 ninety per cent were literate. Nine out of ten attended school and at the present time 128,000 were at college. Negro professors served on the faculties of more than seventy United States colleges.
(60) A significant milestone in negro progress was the Supreme Court decision in May 1954 declaring segregation in public education to be a denial of the equal protection of the laws guaranteed by the United States Constitution. That declaration was a measure which was truly effective within the meaning of paragraph 167 of Unesco's programme on social sciences, and it illustrated the need for continued progress towards the elimination of discriminatory practices.
(61) In the United States of America, efforts would not cease until all discriminatory practices were eliminated, and his delegation supported the development of a constructive and effective programme for Unesco, to be implemented by Member States as well as by the Secretariat.

(62) Mrs. PINTO DE VIDAL (Uruguay) congratulated the delegate of the United States of America on the cheering and most satisfactory state of affairs he had described; she added that Uruguay would give its support to any move for promoting the campaign against discrimination between human beings, because it believed that the only way of advancing the peace and unification of the world was to open the doors to everyone in the political, social, economic and cultural spheres.

(63) Mr. SUNDARAM (India) introduced a resolution which his Government had submitted in document 8C/DR/8, calling upon Unesco to initiate a world campaign against the evils of race discrimination, as an integral part of its programme. He had been inspired by the account of the progressive reduction of race discrimination in the United States of America, unfortunately, there were still areas in the world where it not only persisted but was being intensified.

(64) There could only be one opinion in Unesco on race discrimination, which was a disaster to humanity, and he submitted his resolution in the conviction that it would receive unanimous approval. No effort or expenditure could be too great for the implementation of the resolution, and Unesco, in impelling action by those who at present merely paid lip service to principles, would be the spokesman of world conscience.

(65) Mr. SEDES (France) gave the French delegation's support to the draft resolution submitted by India (document 8C/DR/8).
(66) In view of what other speakers had said regarding their own countries, he wished to remind the Commission that France had conferred the status of French citizens on all the inhabitants of its overseas territories. They thus enjoyed all the rights and liberties established in the Constitution.

(67) Mr. UMREIKO (Byelorussian Soviet Socialist Republic) supported the Indian resolution and deplored the continuance of racial discrimination despite all efforts to combat it. No government which respected the principles of democracy could permit national persecution in any form, and all races, however small, must have equal legal and moral rights in governmental, social and cultural life. Before the 1917 revolution the Byelorussian SSR had had a low economic and cultural standard of life, with eighty per cent of the population illiterate. Since that date, conditions had improved until at the present time equal rights were enjoyed in every field, and illiteracy was no longer existent. Racial discrimination was one of the most serious threats to human dignity and he hoped that the resolution would receive unanimous approval.

(68) Mr. ANGELL (United States of America) supported the Indian resolution but asked if the amendment proposed in document 8C/DR/105 (rev.) would be acceptable.

(69) Mr. SUNDARAM (India) had no objection to the revised and enlarged form of the resolution, but pointed out that his original resolution had been formulated to permit of immediate action by Unesco, since Unesco had not sufficient funds to deal with all aspects of discrimination simultaneously. He accordingly proposed the following addition at the end of the revised version: "beginning with an intensive study of racial discrimination in the next two years".

(70) Mr. ANGELL (United States of America) accepted the proposed addition.

(71) Sir Charles WEBSTER (United Kingdom) supported the proposal and the amendment, but stressed that a campaign must be carefully planned and of a practical character, and not limited to propaganda. He welcomed the statement of the Uruguayan delegate on the political position of women.

(72) Mr. STEINBERGER (German Federal Republic) expressed whole-hearted supported for the resolution. His country had experienced a particularly evil form of discrimination which, although deliberately and falsely described as racial, had in fact been the organized murder of a minority. He supported the revised version as amended by the delegate of India.

(73) Mr. AFTALION (Argentina) said that his delegation strongly supported the Indian proposal for undertaking a campaign against racial discrimination, he also asked whether the other types of discrimination mentioned under project 3.5 should not be dealt with at the same time.

(74) Mrs. PECSON (Executive Board) said that the Board had warmly approved the proposed action for eliminating all forms of discrimination. It would also welcome the fact that a member of the United States Congress had come to Unesco to speak of his country's progress in the struggle for freedom and equality. She wished to place on record that the members of the Board considered the Supreme Court decision referred to by the United States delegate as one of the most significant landmarks in the march of humanity. It gave inspiration for further efforts in the prosecution of Unesco's programme for the elimination of discrimination in any form.
(75) In conclusion, the Executive Board had recommended the deletion of the word "racial" from the resolution DR/8.

(76) Mr. VITO (Italy) supported the Indian proposal as revised and amended, but urged that, whatever might be the meaning attached to the word "campaign", any activity undertaken should be scientifically planned. Propaganda and pamphlets alone served no useful purpose.

(77) Mr. ZAMORANO HERNANDEZ (Chile) agreed with the delegate of the United Kingdom that the approach to the problem of racial discrimination should be methodical, for it deserved very serious study. For that reason, the Indian motion should be most carefully examined. Nor should it be forgotten that there were other kinds of discrimination in the world, equally ugly, though they might be more subtle.

(78) Mr. FLORES AGUIRRE (Mexico) said that his country, with its long and honourable tradition of opposition to racial discrimination, naturally sympathized with the unanimous feeling in favour of the Indian motion, but he, too, thought that the proposed campaign should be soundly planned, in order to achieve practical and satisfactory results.

(79) Mr. BRANDAO CAVALCANTI (Brazil) supported, enthusiastically but not for sentimental reasons, the resolution submitted by the Indian delegation and broadened by the United States amendment.
(80) Brazil had shown long since that it was possible to reach a clear and satisfactory solution to the problem of discrimination in regard to race, sex, and even in the political field.
(81) He added that a law had just been passed in his country instituting penal measures to deal with infractions of the rules of non-discrimination prescribed by the Constitution.

(82) Mr. WIDDOWSON (Union of South Africa) was not satisfied with the emphasis placed on racial discrimination in the resolution; a study of the documentation assembled by Unesco on inter-racial tensions showed the operative words to be "scientific study". Several delegates had questioned the use of the word "campaign", and to the South African delegation the proposal appeared to be a deviation from the scientific approach and liable to lead to action in the political field. His delegation would therefore abstain from voting.

(83) Mr. THA MYAT (Union of Burma) read out a paragraph which the Burmese delegation had proposed for addition to paragraph 174. The proposal had been circulated in document 8C/DR/96.

(84) Mrs. MYRDAL (Director, Department of Social Sciences) said that the plan of work in connexion with the original resolution 8C/DR/8, which it was hoped would apply to the amended resolution if adopted, was as follows:
(85) First, an information campaign through mass media at Unesco's disposal for which no additional budget would be required.
(86) Second, existing pamphlets, which had already had a wide distribution, would be translated into other languages. For that purpose an additional sum of $8,000 would be needed to be made available to National Commissions interested in such translations.
(87) Third, a larger campaign, prepared by social scientists and educationalists, to plan measures for eradicating discrimination through the schools, for which a budget of about $11,000 would be required.
(88) In order to prevent overlapping with the work of the United Nations Sub-Commission on Discrimination and Minorities, she asked if the Indian delegate would accept the following redrafting of his amendment to the revised version of the resolution:
"undertaking in 1955 studies especially on measures for eradication of racial prejudice".
Emphasis would thus be placed on positive measures rather than studies of actual cases of discrimination, which had a political implication.
(89) With regard to the addition to paragraph 174 submitted by the delegate of Burma, she gave an assurance that the Director-General would bear it in mind when executing the programme. A vote was not called for, however, since it concerned only the plan of work.
(90) The delegates of India and the United States of America accepted the redrafting suggested by the Director of the Department of Social Sciences.

(91) The resolution was adopted, the South African delegate abstaining from voting.

(92) Sir Charles WEBSTER (United Kingdom) asked whether the additional budgetary allocation necessitated by the adoption of the resolution would have to be found from other parts of the budget.

(93) Mr. RAO (representing the Director-General) said that the Commission's duty was to approve a project on its merits. It was for the Director-General to discover how the necessary funds could be obtained.

(94) The budgetary implications of the resolution were unanimously approved (DR/8 and paragraphs 174-180)

Women's political rights and political education (paragraphs 181-183)

(95) Miss RAILEY (Liberia) said that the pattern prevailing in West Africa could well fit into the project for the integration of ethnic groups. The impact of industrialization and urbanization on the tribal units resulted in a social evolution which would be of interest to the Department of Social Sciences. The recommendations of the Abidjan Conference and the Stanleyville Report should be implemented, and the Liberian delegation urged that Unesco should give them due attention.
(96) With regard to women's political rights, the Liberian delegation supported whole-heartedly the project in paragraphs 181-183, but hoped that Africa would one day have the benfit of a similar project. It had taken the women of Liberia almost a century to gain their rights, and they had only been granted the vote in 1944. At the present time women held important governmental positions and had an equal participation with men in social and political affairs. There was still, however, considerable need for improvement.

(97) Mrs. LEGARDA (Philippines) said that the project under discussion was of great interest to the women of the Philippine Republic. The Pan-Pacific Women's Association, of which she was President, was preparing an international conference of women in the Pacific area in 1958 with financial support from Unesco. One of the items discussed would be the results of the proposed pilot project in Asia. As representative of half a million women in a country where women held many important positions, she looked forward to the results of the pilot project, which would be of great value in deciding the best methods of improving women's participation in local, civic and political affairs.
(98) In conclusion, she was proud to have a fellow countrywoman on the Executive Board of Unesco, and pointed out that, with the inclusion of two women among the candidates for the Executive Board, Unesco at its eighth session of the General Conference had an opportunity for giving a lead in the elimination of discrimination between the sexes.

(99) Mr. SEDES (France) regretted that there had been no discussion of paragraphs 174-179 before the vote was taken on the budgetary implications.
(100) After apologizing for having to go back to the question, he expressed his astonishment that the problem of the integration of African ethnic groups into a more advanced culture was dealt with in the section on race relations, which was scarcely the proper place for it.

(101) Mrs. MYRDAL (Director, Department of Social Sciences), referring to the observations of the delegates of France and Liberia, said that the activities in question could equally well have been included under paragraph 206, and it was only as a matter of presentation that they had been included

separately. T..e projects under paragraph 175 had been started in 1953-54 under Studies on Discrimination. In future work, however, the studies of ethnic groups would have to be considered together with those in paragraph 206.

(102) Mr. MASSAQUOI (Liberia), referring to paragraph 176, said that it would be preferable to study the impact of Western culture and economy on the African ethnic group as a whole, rather than the impact of one African group upon another. Whether or not one group was Westernized, the impact came from outside and not from within

(103) A vote was taken on paragraphs 181-183 and they were approved unanimously.

The meeting rose at 1 p. m.

# TWENTY - FIRST MEETING

*1 December 1954 at 3 p.m.*

*Chairman:* Mr. THA HLA (Union of Burma)
*later:* Mr. BOURGEOIS (Switzerland)

**ITEM 8.4.2 OF REVISED AGENDA: NATURAL SCIENCES (continued)**

Resolution 2.41 (paragraph 145) (continued)

(1) The CHAIRMAN asked the Commission to resume consideration of paragraph 145, which had been discussed at the meeting before the last.

(2) Mr. MAHEU (Assistant Director-General) thought he could end the previous day's misunderstanding by clarifying the situation.
(3) He drew delegates' attention to document 8C/DIV/120, which showed a difference of $59,992 between the 1953-54 appropriations for the Science Co-operation Office in New Delhi and the 1955-56 estimates. That figure was very close to the $60,000 on which the vote had been taken.
(4) After briefly recalling the facts, Mr. Maheu said that, as the result of a remark by one of his colleagues on the interpretation which the Indian delegate might have given to the word "present" when asking for the post to be maintained at its present level, he had thought he had made a mistake in quoting the figure of $60,000. He had believed that the Indian delegate had been asking on behalf of the Delhi Office, not the present (1954) appropriation of $95,580 for two years, but those now proposed for 1955-56, i.e. something like $150,000 for the two years. If that had been so, the difference compared with the Director-General's estimate would have been, not $60,000, but around $120,000. He had thought it necessary to inform delegates accordingly.
(5) If the Indian delegation simply wished the Office to be maintained at the 1953-54 level, the sum voted upon was correct, and there was no need to go back on that vote.

(6) The CHAIRMAN thanked Mr. Maheu for his explanation and informed him that, at the morning meeting, the delegate of Liberia had withdrawn his statement of the previous night. He thought that the Commission could consider the question of the Indian Office settled.

(7) Mr. HOPE (United States of America) asked whether the project had been re-established at the level of the 1953-54 budget, pointing out that if that were so, the amount of money provided would be inadequate for the successful operation of the Office. He had understood that an additional sum of $150,000 over and above the amount provided for in the 1953-54 budget would be required for its successful operation.

(8) Mr. MAHEU (Assistant Director-General) confirmed that, with $60,000 in addition to the appropriations suggested by the Director-General, the Delhi Office could be maintained at the present level (1953-54).
(9) He recalled that the abolition of the Office had been suggested in order that larger sums might be allocated to the three other science co-operation offices. Though wishing to increase the efficiency of the offices, the Director General and the Director of the Department of Natural Sciences had not felt able to ask for larger appropriations for all of them, and had thought that the best solution would be to close the Office in the most highly developed region.
(10) Mr. Maheu said that the situation resulting from the decisions taken was as follows: three science co-operation offices would receive considerably larger appropriations, while the fourth, the Delhi Office, would be maintained at its present level with the help of the $60,000 to be added to the Director-General's budget estimate.

(11) Mr. HOPE (United States of America) was satisfied with the explanation but not satisfied that the Commission was acting in accordance with the plan for remodelling the programme. He thought that the line taken by the Commission was contrary to the policy of concentrating on fewer projects in

order to be able to give them adequate help.

(12) Mrs. PINTO DE VIDAL (Uruguay) asked whether it was intended to abolish the Science Co-operation Office for Latin America, which had its headquarters in Montevideo.

(13) Mr. AUGER (Director, Department of Natural Sciences) said that the Montevideo Office appeared in the programme with an increased appropriation and that no change was contemplated in regard to it.

(14) Paragraphs 176-184 were approved.

(As the Commission had next to examine the chapter on Cultural Activities, the meeting was suspended for 5 minutes. Mr. Bourgeois took the Chair.)

(15) The CHAIRMAN consulted delegates on the procedure to be adopted to shorten meetings and enable the Commission to complete its examination of the programme within the desired time.

(16) Mr. PANNETON (Canada) proposed that both the number and length of speeches should be limited.
(17) The delegate of Chile suggested that speeches be limited to three minutes while the delegate of Poland proposed a limit of three to five minutes.

(18) Mr. BRICHET (France) thought it would be unfortunate to limit the discussion when questions of substance and not of procedure were under consideration. In his opinion, it would be wise, before taking Draconian measures, to see how delegations used the freedom of speech allowed to them on the Cultural Activities chapter.
(19) The French delegate asked that the maximum length of speeches should not be less than five minutes, adding that his delegation was ready to attend as many evening meetings as might be necessary for a full exchange of views.

(20) Mr. PANNETON (Canada) thought that the Chairman should be left to limit the number and length of speeches as he thought necessary.

(21) Sir Charles WEBSTER (United Kingdom) proposed that the length of speeches should be limited to three minutes unless special permission were given for an extension of that time and that there should be no limitation on the number of speakers.

(22) By 35 votes to 6 it was decided to limit speeches to three minutes.

(23) The CHAIRMAN said that the Commission had to examine a considerable number of draft resolutions, together with the observations made on them by the Advisory Committee on Programme and Budget. The Executive Board had not studied all the drafts as some of them had arrived too late.
(24) As the Commission's chief responsibility was to vote on the proposed resolutions in the programme and draw up a work plan in conformity with them, the Chairman thought it would be wise not to examine draft resolutions bearing reference numbers above DR/61, but to refer them to the Secretariat with a request that they be given as much attention as possible.

(25) Mr. SOMMERFELT (Norway) submitted a proposal to that effect, which was seconded by the delegate of New Zealand and adopted by 31 votes to 3, with 1 abstention.

(26) Mr. LALGIER (France) said that, while his delegation approved the decision to limit speeches on the different items in the programme to three minutes, it thought that greater freedom should be left to members of the Commission in the general discussion at the beginning of each chapter. He thought it would be difficult for delegations to expound their views in three minutes.

(27) It was decided that the limit on the length of speeches should not apply to the general discussion.

### ITEM 8.4.4 OF REVISED AGENDA: CULTURAL ACTIVITIES

(28) Mr. THOMAS (Director, Department of Cultural Activities) said that the chapter on Cultural Activities, like the other chapters in the programme, was divided into two sections, the first of which dealt with general, and the second with special, activities.
(29) The activities covered by the first section, designed to develop cultural co-operation between Member States, were planned as a preparation and backing for the work of the second section, and to furnish guidance thereon. By way of example, Mr Thomas mentioned the work undertaken by Unesco to help Member States to develop their libraries, and the exchange of information between museums, which took practical form in the publication of Museum.
(30) The Director of the Department of Cultural Activities emphasized how important the co-operation of international non-governmental organizations was to Unesco's cultural activities. Those organizations offered all specialists in cultural activities an opportunity for contacts and exchanges with other countries. They supported and guided the work of the Secretariat and were the best guarantee of its success. Unesco handed over to reliable non-governmental organizations of that sort certain specialized activities which would call for large funds and staff if the Organization undertook them itself. Finally, in many cases where value judgments were needed, those organizations, which were non-political and consisted of competent people, saved Unesco from taking decisions that might compromise it or cause difficulties.
(31) The Secretariat did not contemplate increasing subventions to the associations; it tended more and more to replace subventions by contracts, in accordance with the directives issued by the General Conference and the Executive Board.
(32) The second section of the chapter comprised three main headings. Under the first, "Preservation of the cultural heritage of mankind", the Secretariat sought to give direct, practical aid to Member States, for instance, by sending them missions of experts. Under the second heading, "Humanistic studies in culture and education", the Secretariat,

convinced that education and cultural activities should not be kept in separate watertight compartments, tried to develop co-operation between teachers and specialists in cultural activities and to bring libraries and museums increasingly into the work of schools. Under the third heading, "Culture and international understanding", were listed thirteen activities for the promotion of international understanding. Mr. Thomas pointed out that one of the best ways of teaching people to know and understand each other was to encourage contacts between different cultures.

(33) The programme also provided for the development of other activities: the use of modern methods of reproducing works of art, translation of representative works of different cultures, and a history of the cultural and scientific development of mankind.

(34) Mr. Thomas explained that the Secretariat, in what might seem an arbitrary classification of activities under three headings, had aimed at clarity and simplicity. The field covered by cultural activities was enormous, reaching on one side to the highest spheres of thought, research and artistic creation and, on the other, to the dissemination among the masses of the products of that thought, knowledge and creation. In drawing up the programme, the main concern had been for greater concentration and better co-ordination of cultural activities with those of other departments.

(35) Mr. Thomas added that the extreme diversity of cultural life should not be forgotten and that Unesco's work in that field had to take into account factors even more complex than those involved in education, science or mass communication, and to be organized with even greater caution and flexibility.

(36) Mr. UNGARETTI (Italy) congratulated Mr. Thomas on the work accomplished by his Department.

(37) He asked that no effort should be spared to spread culture by fundamental education and thus encouraging higher standards in the arts and literature. But he also urged that there should be no pause in the encouragement given to pure research, the source from which culture drew fresh strength.

(38) The Italian delegate was pleased to learn of the proposed collaboration between the Departments of Cultural Activities and Education, especially with regard to the production of reading material for new literates. In that connexion he drew attention to the difficulty of adapting a classic and advocated the publication of selected, annotated excerpts from good authors.

(39) Recalling that the International Association of the Visual Arts had just adopted its Constitution and that the International Conference of Artists had decided that an International Council of Arts and Letters should next be set up, the Italian delegate asked the Department of Cultural Activities to arrange for a study of the question. The International Council of Arts and Letters would ensure that contemporary works of art circulated more easily; it could also bring knowledge and experience to bear in the field of copyright, give general guidance in making works of literature known by broadcasting and study means of reforming the teaching of the arts and literature in the schools. As there was no longer anything to prevent the founding of the Council, consideration should be given to it without delay.

(40) Mr. Ungaretti also asked for an increase in the subvention to the International Association of the Visual Arts, which would be responsible, among other tasks, for considering how copyright should be applied to works of visual art, and which might be commissioned to reform the curricula of fine art schools.

(41) In conclusion, he hoped that a representative of the cinema would be asked to sit on the International Council of Arts and Letters when it was established.

(42) Mr. MENDIS (Ceylon) said that his Government attached great importance to cultural activities, in which field Ceylon as well as other Asian countries could play an important part.

(43) He offered, on behalf of his Government, to lend experts on archaeological and historical sites to other countries which might like to benefit from the experience gained by work in Ceylon, and asked the Director of the Department of Cultural Activities to note that offer.

(44) The delegation of Ceylon was particularly interested in resolution 4.23, (paragraphs 145-147), but wondered whether the provision made would meet the requirements of Member States. While not suggesting an increase, he would ask that the needs of Asian countries be given greater attention and emphasis when planning the programme for 1957-58

(45) Mr. RIVET (France) was pleased at the amount of the Cultural Activities budget allocated to subventions to international non-governmental organizations.

(46) His delegation believed that those organizations provided an effective and economical means of increasing international co-operation and enlisting the support of intellectual circles, which had shown a tendency to ignore Unesco.
It was therefore advisable to assist the non-governmental organizations by subventions, however small, and to neglect no means of developing them and securing better co-ordination among them.

(47) Mr. Rivet endorsed the Norwegian delegate's request for an increase in the subvention to the International Council for Philosophy and Humanistic Studies.

(48) Like the Italian delegate, he wished to see the International Council of Arts and Letters brought into existence.

(49) The French delegation was in favour of the project for the translation of representative works of different cultures, but in his opinion the National Commissions should be more closely associated with it.

(50) Mr. Rivet emphasized the importance of museums in education; he thought that all Member States should take steps to make it easier for everyone to visit museums, particularly by opening them in the evening without raising the admission charge.

(51) With regard to the history of the scientific and cultural development of mankind, the French delegate recalled that the idea of such a publication

had been brought up by the French delegation at the Beirut Conference. He was surprised to see, however, that the material collected to date was a meagre basis for a definitive work. Moreover, he had noticed that several publishing houses had announced the publication of similar works.
(52) Mr. Rivet hoped that the States recently admitted to Unesco would be asked to contribute to the history of the scientific and cultural development of mankind and that there would be genuine international collaboration on the subject.

(53) Mr. HOPE (United States of America) indicated that the United States delegation was deeply interested in cultural activities and would support in a general way the programme as outlined. He suggested that the General Conference should invite representatives of the arts, such as composers, actors and painters, to be present at the next General Conference. Concerts and exhibitions by internationally known artists during the session of a General Conference would do much towards teaching foreign culture. He had just read the report received from Paris on the possibilities of teaching international understanding. In his opinion, the best opportunity to achieve that international understanding was through cultural activities. The Director-General might be requested to take that into account when considering his future programmes.
(54) Unesco could contribute through its cultural activities to the technical assistance programme by exchanging exhibitions of art between East and West.

(55) Mr. SOLODOVNIKOV (Union of Soviet Socialist Republics) said that the development of cultural collaboration was very important and helped to ensure peace.
(56) The Government of the Soviet Union was interested in improving cultural relations between the peoples, and his delegation therefore supported that item in the programme.
(57) The USSR was anxious to take an active part in preparing the cultural and scientific history of mankind. It should be mentioned that, in the Soviet Union, five million people devoted their leisure time to musical activities, ballet, the visual arts, and so on, and their assistance in such work would be of considerable value.
(58) He considered that Unesco should concentrate on: (1) helping underdeveloped countries, (2) making the masterpieces of art better known, by means of reproductions, recordings and films, in that connexion the Soviet delegation was convinced that Soviet music and films would win a high place at international exhibitions; (3) translating representative works of all countries in accordance with resolution 4.44.

(59) Mr. THA MYAT (Union of Burma) congratulated the Director-General on the lucid presentation of the programme. In his opinion the two sections had been integrated in a workable form.
(60) He thought that the highest priority should be given to work which would foster international urderstanding and for that reason he would like to emphasize the importance to Unesco of the co-operation between specialists in Section I.
(61) He welcomed the proposals for technical aid to Member States and the idea of presenting African and Asian culture to the Western world. He considered that international understanding could be obtained through cultural activities as easily as through education and science.
(62) He was disappointed with the small funds which had been made available for the programme activities. Cultural institutes were as important as fundamental education centres for the promotion of international understanding.
(63) He pointed out that in the fundamental education centre in Burma a national museum, national library and national art gallery had been set up. In those centres the modern cultures of various linguistic areas of South East Asia and Burma were presented for comparative study. Up to the present funds had not been sufficient to cover that work. The preser' programme was partly a corrective. He asked the Secretariat to consider an equitable adjustment for future programmes.

(64) Mr. IBANEZ-GOMEZ (Chile) said that cultural activities were of great importance to Latin America, and especially to his country. His delegation was pleased to see the preferential treatment given to those activities in the programme, and hoped the appropriations for them would not be reduced, even in the smallest degree.
(65) He was glad that work had started on the translation of works by Latin American authors, and paid tribute to Unesco's efforts to preserve the cultural, artistic and archaeological heritage of mankind.
(66) He thought that greater assistance should be given to non-governmental organizations such as the International Theatre Institute, the International Union of Architects, the Association of Universities, etc.
(67) Exhibitions should be developed and obstacles to the free flow of books removed: the Organization should also induce Member States to ratify the Copyright Convention, signed in Geneva in 1952.
(68) In conclusion, he proposed that a meeting of outstanding personalities in the fields of science, literature, the visual arts and cultural activities, should be held in New Delhi during the ninth session of the General Conference; such a meeting would mark a considerable advance in the promotion of all those branches of activity.

(69) Miss NEFFA (Lebanon), commenting on the Cultural Activities chapter, said that it was commonly thought that the principal needs of Member States were the extension of education and the development of science teaching. But many countries reveal enormous shortcomings with regard to the dissemination of culture.
(70) It was desirable that Unesco should extend its collaboration to all peoples and not allow the European continent to monopolize cultural associations.
(71) She also criticized the common view of culture as a means rather than as an end and the tendency to use the cultural and artistic heritage of mankind as a tool.

Unesco should be congratulated on its efforts to safeguard and develop all cultures.

(72) Mr. WADIA (India) said that his delegation considered cultural activities closely linked with the peaceful future of the world. Extreme specialization was the tragedy of education. To counteract that tragedy it was necessary to broaden education by including humanistic studies. "Culture" was difficult to define but involved a keenness to know and understand other peoples and their views. The world was in urgent need of such understanding.
(73) Each country contributed something of value to human understanding. Humanism would serve as a check to science but the objectivity present in scientific studies would have to be applied in humanistic studies. To obtain that objectivity, national textbooks needed revising.
(74) He welcomed the international survey of classical studies and the use of radio and television for the diffusion of knowledge.
(75) The Eastern countries looked to Unesco to help them make up for lost time. The Indian Government was in a mood to ask for more assistance although a large amount was already being spent on cultural activities. He hoped that the Commission would be sympathetic if it asked for more.
(76) Referring to the suggestion by the United States delegate concerning the extension of invitations to artists to attend Unesco's General Conferences, he said that he would support that suggestion with pleasure. He himself had made a similar suggestion informally to the Director of the Department of Cultural Activities, who had doubted if enough money could be made available for that purpose. The speaker had not considered inviting a representative of each of the arts from each country, but rather that a careful selection should be made of representatives of all the arts from various countries. He hoped the Secretariat would bear the suggestion in mind

(77) Mr. TUNCEL (Turkey) congratulated Mr. Thomas on the work embodied in the Cultural Activities programme, which took account of all the suggestions made by Member States at the last session of the Conference.
(78) He drew the Commission's attention to the importance of that part of the programme and asked that it be given priority. In his opinion, Unesco's work could be fully effective only if due use were made of culture.
(79) The Turkish delegate hoped that intellectuals and creative artists in all Member States would do all they could to help in carrying out the programme of Cultural Activities.

(80) Mr. ASTRADA (Argentina) said that Unesco should harmonize the two fundamental aspects of its work: planned action in the technical field and concerted action to spread and foster basic principles relating to the spiritual side of the life of men and communities.
(81) His country was naturally pacific, by principle, conviction and sentiment; it therefore believed in peade through the spirit, by co-operation in creative endeavour. Unesco's fundamental task was to hasten the advent of a new humanism in an atmosphere of harmonious coexistence.
(82) In conformity with those ideas, the Argentine delegation firmly supported the items in the programme dealing with humanistic studies.

(83) Mrs. PINTO DE VIDAL (Uruguay) considered that the Cultural Activities programme was well framed, and she wished to draw special attention to the popularizing of the visual arts and the development of museums. In that connexion, she requested support for draft resolution 8C/DR/46, submitted by Uruguay, which advocated the establishment of an international museum agency under the auspices of the municipality of Montevideo and asked Unesco's aid for that purpose.
(84) She proposed that the Bulletin for Libraries should neither be reduced in size nor altered in character.
(85) In conclusion, she pointed out how extremely important translations of ancient and modern works were for better understanding between the peoples.

(86) Sir Charles WEBSTER (United Kingdom) joined in emphasizing the work of the non-governmental organizations, which were keeping up the standards of value. The maintaining of those standards was of primary importance to Unesco in face of possible depreciation.
(87) He welcomed the words of the delegate of the USSR and his declaration of willingness to co-operate in cultural activities. The association of members of the Soviet Union had been missed and he thought that all would look forward to their co-operation in the future.
(88) Speaking for the International Council for Philosophy and Humanistic Studies, he said that historians as well as the United Kingdom delegation would look forward to co-operation by the Soviet Union in its work.

(89) Mr. SHARIF (Pakistan) thought that cultural activities offered the greatest hope for securing the ideals of Unesco. For that reason the Pakistan Government was particularly interested in the programme of cultural activities.
(90) The promotion of cultural activities in each Member State was of primary importance in enriching the life of the citizen. The lack of proper understanding of different cultures was at the root of international misunderstanding. It was necessary to spare no effort in making known to each country the cultures of other countries. He welcomed the comment by the delegate of Argentina that all cultures should live together. Cultural contacts and international co-operation in the field of culture would promote a wider feeling of identity of interests among countries.
(91) His delegation warmly supported the projects which aimed at promoting libraries, museums, translation of the classics, international intellectual co-operation, and the provision of reading material for literates.
(92) He was also interested in the United States proposal and hoped that the Secretariat would find a means of securing its objective.
(93) He suggested that a Secretariat official, an expert in cultural activities, should be appointed and an office set up in Pakistan for the supervision of Unesco work in the field of cultural activities.

The Pakistan Government would offer facilities for such an office, such as a building, equipment and local staff. He would make no specific proposal on the subject at the present stage but would ask the Secretariat to consider his suggestion at its discretion.

(94) Mr. BERGSTRAESSER (German Federal Republic) expressed the gratitude of his delegation to Mr. Thomas for the preparation of the document under discussion, which showed a remarkable degree of unity.
(95) The German delegation would like to emphasize the second and third of the groups of activities proposed by Mr. Thomas and stressed their interconnexion. It was important to secure a solid formation of minds through culture and education by implementing a growth of respect of one nation for another. Exchanges of culture would eventually lead every citizen to realize that mankind had a common basis.
(96) The German delegation was particularly interested in maintaining or increasing the funds for projects 4.31, 4.42 and 4.44, and welcomed the increase for purposes of exchanging culture. He concluded by expressing the hope that the Commission would be united in preserving or increasing the funds for furthering humanistic studies.

(97) Mrs. LEGARDA (Philippines) appreciated the programme prepared by the Director of the Department of Cultural Activities.
(98) She heartily seconded the proposals of the delegates of the United States of America, Pakistan and Argentina concerning cultural exchanges.
(99) She emphasized the value of culture in the education of the young and in the prevention of juvenile delinquency. If the young were kept fully occupied and their minds kept constructively busy, they would keep out of trouble. In her opinion the Uruguayan scheme for teaching all the arts to the young was one which could be usefully followed in other countries.
(100) Secondly, she emphasized that budget limitations prevented more being done in the field of cultural activity. She felt that much could be achieved if the world could be weaned away from the trend of sordid materialism and imbued with a deeper sense of spiritual values.

(101) Mr. NAVRATIL (Czechoslovakia) wished to make two comments.
(102) On behalf of his delegation, he recognized the important place that should be given to the cultural activities programme, on condition that, when carrying it out, the Organization's essential aims (i.e. international understanding and the development of national cultures) were kept in view, and that the Organization's universality was fully maintained.
(103) He also hoped that Unesco's departments would endeavour to collaborate with his country, which had had some experience of the methods of cultural activity proposed in the programme.

(104) Mr. SANCHEZ REULET (Organization of American States) said that there were four items in the Cultural Activities programme which were of particular interest to the States he represented: (1) resolution 4.33, which authorized the planning and production of reading material designed for new literates; (2) the exchange of publications; (3) the mobile microfilming unit, which should be given top priority, and (4) the translation of representative works of Latin America. He considered those activities essential to progress in the American States.

(105) Mr. THOMAS (Director, Department of Cultural Activities) had been struck by the unanimity of views expressed in the general discussion, which was most encouraging to the Secretariat.
(106) He thanked the Organization of American States for its offer of collaboration, which the Secretariat would most certainly note. He added that close co-operation had already been established between Unesco and that Organization, and had been strengthened by experience on many occasions.

Paragraphs 1 26

(107) Approved.

Project 4.11: Co-operation with international cultural organizations

Resolutions 4.111 and 4.112

(108) Mr. BRANCA (Italy) remarked that some of the associations belonging to the various councils were members of two or more of them. He wished to know whether the position was not anomalous and whether the associations concerned received a subvention through each of the councils to which they belonged.

(109) Mr. THOMAS (Director, Department of Cultural Activities) replied that the principle of multiple affiliation according to the diverse interests of the associations was recognized and legitimate. If an international organization received two subventions by virtue of its membership of two councils, that was not inadvertent, each of the two subventions was intended for different work.

(110) Paragraphs 30 and 31 were approved.

(111) Mr. CHEVALIER (Secretary of the Commission) read out the recommendation of the Advisory Committee on Programme and Budget for increasing the proposed subvention to the International Council for Philosophy and Humanistic Studies.

(112) Mr. SYME (Representative of the International Council for Philosophy and Humanistic Studies) was grateful for the opportunity to address the Commission.
(113) The Commission would find in document 3C/ADM/20 an account of the different federations within the Council. In addition, he expected a report on the work of the Council for the last three years to arrive from Paris. That report would be available to all delegates.
(114) Although the Council received money from Unesco, it was neither controlled nor oppressed by

Unesco. The twelve member organizations of the Council were not oppressed either and worked freely in co-operation.
(115) The money received from Unesco was not used for administrative purposes but for widening the geographical distribution of its member organizations.

(116) In answer to a question from the delegate of Canada as to the resources of the Council outside the Unesco subvention, Mr. SOMMERFELT (Norway) said that the member organizations paid a percentage of their income to the Council.
(117) When the organization was founded in 1949, it took up projects formerly undertaken by governments and suspended during the war. As the Council became better known requests were received from all parts of the world and it had been faced with a dilemma. It had to decide whether to drop old projects or reduce subventions to projects. It had chosen to reduce subventions, which was regrettable as it meant that international co-operation was slowed down.
(118) He proposed that the subvention to the Council should be increased by $10,000 per annum in the interests of concentration.

(119) Mr. BRICHET (France) seconded the Norwegian delegate's proposal.
(120) The French delegation, realizing the possible effect of the proposal on the balance of the budget, was thinking of suggesting cuts in other parts of the programme.

(121) Mr THA HLA (Union of Burma) observed that international organizations conformed to the spirit of Unesco but suggested that they should be requested to become more truly international.

(122) Mr HOPE (United States of America) supported the Norwegian proposal.
(123) He stressed the importance of international understanding and suggested that international organizations should be reminded that a subvention from Unesco included an understanding that they would further Unesco aims in that direction.
(124) With regard to the financing of organizations and Unesco's relations to such financing he mentioned that an organization to which he had belonged had received a substantial subvention for three years from an outside body. It had taken three years for the Secretariat of the organization to discover that it had received that subvention. He proposed that the Secretariat should be asked to study carefully the administrative awareness of organizations before granting them subventions.

(125) Miss BOLLO (Uruguay) urged that, although all international organizations deserved Unesco's support, additional assistance should be given, in particular, to the PEN clubs.

(126) Sir Charles WEBSTER (United Kingdom) strongly supported the Norwegian proposal. The subvention could be used for the express purpose of carrying out the suggestion of the delegate of Burma. As a member of the International Council for Philosophy and Humanistic Studies, he assured the delegate of the United States of America that a situation similar to that he had mentioned could not arise in the Council.

(127) Mr. SUZUKI (Japan) supported the Norwegian delegate's proposal.

(128) Mr. THOMAS (Director, Department of Cultural Activities) reminded the Commission that, at the beginning of the meeting, after pointing out the benefits the Secretariat derived from the co-operation of the non-governmental organizations, he had explained the policy adopted with regard to them.
(129) The International Council for Philosophy and Humanistic Studies certainly did excellent work, but if the Commission agreed to increase the funds allotted to it, that might upset the balance of the budget. The additional appropriation voted would have to be taken from some other item.
(130) There were other organizations which also deserved increased grants and, if the Commission embarked upon such a course, it might find itself in a dilemma.

(131) Mr. SOLODOVNIKOV (Union of Soviet Socialist Republics) thought that the gratitude expressed to the Department of Cultural Activities during the discussion should be shown by reposing greater confidence in it.
(132) When the Natural Sciences programme was examined the Commission had decided to leave the Secretariat to go into the details of subventions. It should follow the same procedure with regard to cultural activities instead of taking hasty decisions.

(133) The CHAIRMAN put the Norwegian delegate's proposal to the vote.

(134) Adopted by 16 votes to 7, with 21 abstentions.

Paragraphs 36-41

(135) The CHAIRMAN said that the Advisory Committee had made no comments on those paragraphs.

(136) Mr. FORSYTH (New Zealand) intimated that he had received definite instructions from his National Commission to express its appreciation of the work of the International Council of Museums. The benefit from the Unesco subvention was clearly felt. He hoped that the vote just taken would not result in a cut of the subvention to the International Council of Museums.

(137) Mr. BRICHET (France) drew the Commission's attention to the International Council of Museums, whose work was increasing and which was gaining in authority every day.
(138) His delegation attached especial importance to the work of that organization, which could be particularly helpful to the underdeveloped countries.
(139) Referring to the proposed subvention to the International Music Council, which was $24,000, while that to ICOM was no more than $20,000, the French delegate asked that the two subventions be better balanced.

(140) Sir Charles WEBSTER (United Kingdom) seconded that proposal.

(141) Mr THOMAS (Director, Department of Cultural Activities) remarked that the International Council of Museums was the only organization in the Cultural Activities chapter to which the Secretariat had proposed an increased subvention.
(142) The International Music Council was growing rapidly and had recently set up numerous national committees as well as regional councils for South Asia, the Far East and America. The Secretariat would be extremely sorry if the proposed subvention to that organization were reduced.
(143) Mr. Thomas added that all the organizations receiving subventions had asked for larger sums than those allotted, but the Secretariat's decisions had been communicated to them.

(144) Mr BRANCA (Italy) observed that the International Music Council included several associations among which the proposed subvention would be divided.

(145) Mrs. LEGARDA (Philippines) stressed the importance of not cutting, but if possible increasing the subvention to the International Music Council.
(146) She reminded the Commission that a regional conference of the Council was being planned next year in Manila That conference was being organized on the understanding that the subvention would not be reduced.

(147) In the light of the information just given, Mr. BRICHET (France) thought it better to withdraw his proposal, but he asked the Secretariat to note his remarks with a view to placing the two associations on an equal footing when future programmes were drawn up.

(148) As there was no discussion on paragraphs 39-41, paragraphs 32-45 were approved.

International Union of Architects (paragraphs 46-48)

(149) Mr. MARDONES RESTAT (Chile) (International Union of Architects) said that the subvention that his organization received from Unesco ($500 a year) was the smallest allotted to any international non-governmental organization. He wished to point out that the history of culture was bound up with the history of architecture, a fact recognized in the Unesco emblem itself, which depicted the façade of a Greek temple.
(150) Mr. Mardones Restat proposed that the Unesco subvention to the International Union of Architects be raised to $5,000 a year.

(151) Mr. BRICHET (France) supported the proposal of the Chilean delegate.
(152) His country had welcomed the foundation of the International Union of Architects with lively satisfaction. For a long time, artists had shown little enthusiasm for taking part in Unesco's work. The Union's membership represented architects throughout the world, irrespective of school, it was arranging a Congress to study problems connected with the training of architects and with travelling exhibitions. The Union should therefore be given whole-hearted encouragement.
(153) The French delegate asked that the proposed subvention to the International Union of Architects be raised to $5,000 for each of the two years.

(154) Mr. BERGSTRAESSER (German Federal Republic) reminded the Commission that every increase voted would necessitate a decrease or cut elsewhere in the programme. Each project had its individual value.
(155) He thought it would be wise to adopt a procedure whereby no increases could be proposed without a statement of where the money was to come from.

(156) The CHAIRMAN felt that the Commission would find itself in a dilemma if it proposed reductions one the one side and increases on the other. Such a course seemed to him dangerous.

(157) Mr. LINKSON (Australia) thought that consideration should be given to the remarks of the delegate of the German Federal Republic. All the organizations deserved all the support which Unesco was able to give them. He thought that the Commission should restrict itself to the means which were known to it and should keep a rational balance. He reminded the Commission that the various subventions had been carefully examined by the Secretariat during the preparation of the budget and programme and since then, by the Advisory Committee. He warned against allowing generous instincts to overcome common sense. It would be unwise to continue voting increases unless the Commission were prepared to accept later cuts in the programme.

(158) The CHAIRMAN thought that, as the Chilean and French delegates maintained their proposal, it would be best to postpone the question until the next meeting.

The meeting rose at 7 p. m.

# TWENTY - SECOND MEETING

*1 December 1954 at 9.30 a.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

**ITEM 8.4.3 OF REVISED AGENDA : SOCIAL SCIENCES (Continued)**

DR/62 (rev. 2): Study preliminary to the establishment of a training centre for international civil servants

(1) The CHAIRMAN said that this draft resolution had been revised in agreement with the Iranian delegation and was supported by the delegations of France, Lebanon, the United States of America, Switzerland and Italy

(2) It was unanimously adopted without discussion.

(3) Mr. MUJEEB (India) remarked that the resolution submitted by his delegation had not been dealt with. Only the amendment had been adopted.

(4) The CHAIRMAN said that consideration of the draft resolutions relating to the peaceful co-operation of different forms of government submitted by India (document 8C/DR/5 (rev.)) and Czechoslovakia (document 8C/DR/72) had been deferred until the end of the discussion on the programme and budget of the Department of Social Sciences.

(5) Mr. RAADI (Iran) asked that a correction be made in the French text of the draft resolution submitted by his delegation and just adopted: the word "information" should be "informations".

Migrants (paragraphs 184-187)

(6) Mr. ESTELRICH (Spain), referring to paragraph 186, said that the Conference there mentioned - . although it seemed innocuous - was to deal with very difficult questions which affected the very essence and well-springs of culture and had important repercussions on the political relations between peoples.
(7) From the human point of view, it could not be stated in absolute terms whether assimilation, i.e. the loss of national characteristics, or the preservation of such characteristics, was better. In some cases, assimilation had produced good results, but in others it had emasculated the genius of the assimilated peoples. It therefore seemed unlikely that practical measures for the cultural integration of immigrants, such as those to be indicated in the model handbooks which the Conference was to consider, could be recommended for general use.
(8) For those reasons, it seemed advisable, if specialists from the principal countries of immigration were to be asked to attend the Conference, to invite specialists from the emigration countries as well, in order to obtain a more complete picture of the problem. He would like to hear Mrs. Myrdal's authoritative views on that point.

(9) Mr. VITO (Italy) said firstly that Unesco's task in connexion with migrants was to assure the protection of their cultural characteristics, while keeping them in harmony with the cultural policy of the immigration country. "Integration" he felt, was a preferable word to "assimilation", the latter had a slight flavour of imposition.
(10) Secondly, participants in meetings in the Western Hemisphere should include representatives of countries from which migration took place as well as those which received immigrants.
(11) Lastly, the delegate of Italy was surprised to find that two methods had been combined in the same resolution. The first part referred to discrimination, which everyone could agree to reject, while the second dealt with a real problem, that of migrants, which needed much study and improvement.

(12) Mr. AFTALION (Argentina) said that one of the most difficult and delicate tasks incumbent on Unesco was to investigate the factors either prejudicial to the cultural assimilation of immigrants, or conducive to their integration into the new environment to which they had chosen to move. He thought that the study of the integration of immigrants into their new environment should be based not only on what the laws laid down but also on a practical and realistic study of how the laws were applied and how they affected people. That practical approach to the problem gave cause for thinking that the United Nations were doing all they could, to ensure the success of the future Conference. To do so, it would be necessary above all to bear in mind the point of view of the nations which received immigrants and the ideologies obtaining there. The Argentine Republic had gained much experience in the matter, extending over a hundred years, as it had received a steady influx of immigrants.
(13) Argentina would be very pleased for the Conference to be held in its territory because the experience it had gained might suggest interesting studies in other countries.

(14) Mr. SANCHEZ REULET (Organization of American States) said that OAS viewed with sympathy and interest any activities calculated to solve the migration problem, which was common to many American States. For that reason he repeated the offer already made regarding the possibility of that

Organization's collaborating in the preparations for the Conference.
(15) It should be noted that the Pan American Union's Department of Economic and Social Affairs had already carried out studies, especially in Venezuela, where the problem was of great topical interest. He considered that those studies might be used, and hoped that the Department of Social Sciences would bear that possibility in mind.

(16) Mrs. MYRDAL (Director, Department of Social Sciences) took note of all the suggestions made by delegates. In particular, she agreed to adopt the word "integration" suggested by the delegate of Italy instead of "assimilation".

(17) The CHAIRMAN recommended delegates to confine their comments to the draft resolutions under consideration and not to stray into the discussion of paragraphs which merely set forth Unesco's work plans.

(18) Paragraphs 184-187 were put to the vote and adopted.

Higher Budgetary Level

Technical aid to Member States (paragraphs 188-190)

(19) Resolution 3.53, was adopted, with 5 abstentions. (The delegates of the USSR and Czechoslovakia pointed out to the Chairman that abstentions should not be left unrecorded.)

Project 3.6: Social sciences and problems of social development (paragraphs 191-210)

(20) Mr. CABOUAT (Rapporteur, Advisory Committee on Programme and Budget) said that, during its discussion of the item, the Advisory Committee had been very favourably disposed towards the various projects connected with research into the consequences of industrialization, particularly in South Asia, and had given them high priority.

(21) Mr. BRANDAO CAVALCANTI (Brazil) was particularly interested in the suggested symposium in Latin America (paragraph 208), but wished it to be put forward a year, saying that the Economic Commission for Latin America had agreed to such a change. He asked for the opinion of the Director of the Department of Social Sciences on that point.

(22) Mr. GUTIERREZ PALACIOS (Chile) was surprised at the total omission from paragraph 202 of any reference to workers and their trade unions in relation to such an important subject.
(23) He said that a rapid process of industrialization, such as was taking place in his country, had repercussions peculiar to such transitional periods, which the working class had to endure - poverty and unemployment in many thousands of homes. In that connexion, the Confederation of Free Trade Unions was in a position to give much help.
(24) He therefore proposed that paragraph 202 be amended so to mention the assistance which the international trade union organizations could give in the research and studies referred to in the paragraph.

(25) Mr. MATIC (Yugoslavia) was very interested in the draft resolution on the social sciences and problems of social development in relation to industrial development, and to productivity in particular (paragraph 204). All the same, he thought that a survey of the psychological factors affecting productivity would be incomplete, for it was not psychological factors alone which raised or lowered productivity. There were also sociological factors, whose importance was at present to be seen in Yugoslavia, where economists and sociologists were studying the effect of the handing over of factory management to the workers.

(26) Mr. SEDES (France) thought that the list of bodies which would take part in the research instigated by the International Social Science Council was rather restrictive so far as trade union organizations were concerned. The International Federation of Free Trade Unions was mentioned, but the International Confederation of Christian Trade Unions had been forgotten. The French delegate asked that trade union organizations, and in particular, the International Confederation of Christian Trade Unions be mentioned in paragraphs 202 and 205.
(27) The French delegate agreed with his Yugoslav colleague that it was not enough to study the effect of psychological factors alone on the development of productivity. He also thought that the contents of paragraph 204 bore little relation to its heading.

(28) Mr. VITO (Italy) supported the delegates of Chile and France with reference to paragraph 195. The resolution on the social impact of technological change should be carried out in close touch with the trade union movements associated with Unesco. The same applied in the case of paragraph 205.

(29) Mr. MASSAQUOI (Liberia) referred to paragraphs 202 and 203. Research in connexion with problems arising in Africa South of the Sahara was vital, and all the territories in that area should have the opportunity of participating in it. The delegate of Liberia wished to know to what extent associate members of Unesco would be allowed to participate actively in the work of that office, which might become the nucleus of what would later be an International Centre for Research on Social Problems of Industrialization in Africa South of the Sahara.

(30) Mr. FORSYTH (New Zealand) questioned paragraph 201. The world-wide survey proposed here was a big task and the use it was to be put to was not altogether clear.
(31) With reference to paragraph 207, the delegate of New Zealand had some doubts as to how it was proposed to define the "middle classes", whose rôle in economic development was to be studied.

(32) Mr. PAZUR (Czechoslovakia) held views similar to those of the French delegate and asked that the World Federation of Trade Unions be mentioned in connexion with the survey of the psychological factors affecting productivity.

(33) With regard to paragraph 196, which referred to the difficulties experienced by certain countries when they tried to harmonize economic growth with social development, he said that Czechoslovakia was a highly industrialized country, but that one part of it - Slovakia - had been industrialized only since the war. The delegate described the new impetus to cultural life to be observed in that region, mentioning in particular that local folklore, which had previously been considered merely as an amusement, had become one of the most important cultural factors in the social development of the Slovak people.

(34) Mr. WIDDOWSON (Union of South Africa) welcomed the proposal in paragraph 203 but, as a budgetary principle was involved, felt that the consultations with the Commission for Technical Co-operation in Africa South of the Sahara should take place before further activities were undertaken.

(35) Mr. PRATT (Australia) raised only two doubts: in connexion with paragraph 205, Unesco should be cautious in embarking on the study of productivity in view of the large number of agencies already active in that field, and it would be preferable to begin with a study of what was being done by other nations. He asked Mrs Myrdal for an indication of the cost of the activities in paragraphs 204 and 205.
(36) With regard to paragraph 211, Mr. Pratt wondered why, since intensive investigations had already been made in the field of community development and were available, the item had been given high priority.

(37) Mr. WARD (United Kingdom), in the absence of the delegates of the Gold Coast and Sierra Leone, felt justified in speaking for them. They would, he said, wish for the opportunity of taking part in the enquiry under paragraphs 202 and 203. On their behalf he expressed agreement with the delegates of Liberia and South Africa.

(38) Mr. BENVENUTO (Uruguay) wished to suggest an addition to paragraphs 196 and 197 concerning the serious disturbances produced by technological change. The proposed addition would read as follows: "It is suggested to the Director-General that it would be well to bring to the notice of Member States, national parliaments and cultural, educational and workers' organs in general, the need to give men and women, as human beings and as workers, the soundest and broadest education or general training possible, firstly in order to give practical activities their due place in human life and, secondly, to enable men and women to assimilate, and adapt themselves more quickly and efficiently to the unexpected technological changes which the incalculable growth of science tends to produce at an increasing speed and with repercussions ever more difficult to predict".

(39) Mr. SANCHEZ REULET (Organization of American States) said that his Organization's Department of Economic Affairs could help in arranging for the seminar on economic progress, referred to in paragraph 208. He repeated the offer to that effect made in a memorandum already communicated to the Director of the Department of Social Sciences.

(40) Mrs. MYRDAL (Director, Department of Social Sciences) replied to a number of points raised by delegates.
(41) Czechoslovakia: a number of studies of the effects of industries had been undertaken by Unesco and those effects were not all bad. Mrs. Myrdal quoted the work edited by Margaret Mead, one of Unesco's best sellers.
(42) Chile, France and Uruguay: she agreed with the need for a wider co-operation with trade union groups, pointing out that the work plan suggested was no more than an indication, for later development.
(43) Yugoslavia: Mrs. Myrdal agreed that the title of paragraph 204 should have been wider in scope. The paragraph itself covered the sociological factors indicated by the delegate of Yugoslavia.
(44) Australia: a survey of research accomplished elsewhere had actually been made by Unesco as a preparation for this work plan, and had pointed to the need for a certain type of study which was so far lacking and which Unesco could provide, namely, comparable studies and studies having more of a sociological and cultural than an economic character. Mrs. Myrdal mentioned as an example that several Dutch firms with international branches had placed their shops at the disposal of the Organization as a kind of laboratory, and she proposed a comparative study of that kind, which Unesco might undertake in co-operation with The Hague Institute of Social Sciences.
(45) New Zealand: Mrs. Myrdal referred to the symposium on the rôle of middle classes in the Middle East, paragraph 207. That had been suggested by groups in the countries of that region as important owing to the emergence of a new class of technicians, agronomists etc., the lack of whom was a burning problem in the Middle East.
(46) Mrs. Myrdal then answered a question put by the delegates of Australia and New Zealand on paragraphs 211-13, the study of local self-government. Although intensive studies had been made in some countries, no comparative study existed. There was proposed first to make an extensive mapping of the different forms of local self-government, after which more intensified studies could be carried out in certain countries. The United Nations representative had remarked on the eventual usefulness of such studies for United Nations work on community development.
(47) Finally, replying to the delegate of Brazil, Mrs. Myrdal said that a symposium in Latin America (paragraph 208) had been planned for 1956 but, if it became feasible in 1955, there would be no objection on the part of the Secretariat. She pointed out a small change with reference to paragraph 209: the seminar referred to was to be held mainly under FAO auspices, and another would be organized jointly with ECAFE on problems of urbanization.

(48) Mr. SASSEN (Netherlands) indicated his Government's willingness to collaborate with Unesco in research on any problems presented to The Hague International Institute.

(49) Resolutions 3.61 and 3.62 up to paragraph 210 inclusive were adopted without further comment.

Community development (paragraphs 211-213) (document 8C/DR/55)

(50) Mr. CHEVALIER (Secretary of the Commission) read out the last part of the draft resolution submitted by the Uruguayan delegation on the subject of teaching about human rights:

"The General Conference,

. . . . . .

Authorizes the Director-General to promote a study:

(a) of the economic, social and political circumstances militating against the establishment of the rule of law and the practice of true political democracy,

(b) of possible national and international measures for ensuring the practical observance of human rights and fundamental freedoms".

(51) The first part of the resolution concerned the Department of Education.

(52) Mr. SEDES (France) proposed an amendment to the draft resolution and wished consideration to be given to a contract with the International Political Science Association, which would be holding its Congress in Stockholm in 1955. The French amendment would add the following paragraph to the end of the document:

"A contract will be concluded in 1955 with the International Political Science Association to enable it to pursue these studies and to extend the recruitment of experts to attend the congress which it is to hold on this question: 1955: $4,000".

(53) Mrs. MYRDAL (Director, Department of Social Sciences) said that the Executive Board and the Advisory Committee had considered that studies under (a) were to be recommended but that simultaneous studies under (b) would be technically and scientifically impossible. The French amendment implied a reduction of the contract which might, on the approval of the two bodies, be concluded with the International Association of Political Science, from $5,000 to $4,000.

(54) Mr. BRANDAO CAVALCANTI (Brazil) seconded the amendment proposed by the French delegate.

(55) Mr. MATIC (Yugoslavia) congratulated the Director of the Department of Social Sciences on the clarity and precision with which the global survey of existing forms of local self-government had been planned (paragraph 211). He quoted examples of the development of local self-government in his own country, and added that such instances of communal management had led to an economic democracy embracing the traditional rights of the individual as well as his economic rights. Several surveys on the subject had been published in Yugoslavia, and the Yugoslav National Commission would be happy to collaborate in the project.

(56) Mr. WARD (United Kingdom), referring to paragraph 211, enquired whether the title "community development" was not rather different from the content of the paragraph, which dealt with local self-government. Community development in the United Kingdom had a technical significance as a type of fundamental education.

(57) Mr. AVIDOR (Israel) referred back to draft resolution 55. Why could the $4,000 contract not come under paragraph 211 (iii)?

(58) Mrs. MYRDAL (Director, Department of Social Sciences) replied that the subject, although related to the contents of the draft resolution, did not cover the same territory.

(59) Mrs. Myrdal agreed with the delegate of the United Kingdom that a longer heading for paragraph 211 would have been clearer; it was a survey of local self-government which aimed at being of use to community development.

(60) A vote was then taken on draft resolution No. 55 submitted by the Uruguayan delegation and amended by the delegate of France, which was adopted by 12 in favour, 3 against and 8 abstentions.

(61) Paragraphs 211-213 were adopted without comment.

Social aspects of land reform (paragraphs 214 and 215)

(62) Mr. MENCEL (Poland) asked why a very small sum was provided for 1955 and nothing for 1956 (paragraph 2 5). Would a transfer of funds be possible, should the activities in question prove important?

(63) Mrs. MYRDAL (Director, Department of Social Sciences) replied that the activities begun in the 1953-54 period were not yet concluded. It was further hoped that a meeting for co-ordinating all work in the United Nations family on land reform would be held in the spring of 1955 with the Food and Agriculture Organization. Unesco proposed however to render practical aid in that field under paragraphs 224 and 225.

International Centre for Research on Social Problems of Industrialization in South Asia (paragraphs 216-222)

(64) Sir Charles WEBSTER (United Kingdom) said that conditions were not ripe for the establishment of an Institute of Social Science in South Asia. Was it wise to spend $67,000 in one year on a hypothetical project, and how could results be obtained so quickly as to be used to advise governments? He hoped it would not mean the reduction of the International Research Office in Paris.

(65) Mrs. MYRDAL (Director, Department of Social Sciences) said there would be no change in the Paris Office nor would any permanent or general kind of institute be set up in South Asia. Under Aid to Member States, there was, however, room for a normal extension of the work of the Paris Office, offering aid in applying social sciences to government planning. A work plan had been prepared in great detail and had been discussed with the Government of India. The International Social

Science Council was fully in agreement with Unesco on the point.

(66) Mr. W/ (India) regretted that the delegate of the Unite... ...ngdom was not sympathetic to the creation of a Social Science Institute in South Asia. A great many developments had taken place in that part of the world, and such an institute would help it to avoid the errors made in the West during its own development. India, as the country industrially most advanced, was indicated for such a centre, and all its neighbours wished a centre to be started there.

(67) Mr. ANGELL (United States of America) did not share the pessimism expressed by the United Kingdom delegation, but was not satisfied by Mrs. Myrdal's reply. If the Centre was to be a permanent one, he would oppose it, as he would oppose any permanent Unesco centre on the subject.

(68) Sir Charles WEBSTER (United Kingdom) said that he had not opposed the project but merely the way it had been presented. Mrs. Myrdal had removed most of his fears. He agreed with the delegate of the United States of America that as a temporary project it could be of advantage to all concerned.

(69) Mr. SIDDIQI (Pakistan) supported the proposal for establishment of the centre in South Asia and announced that his Government would extend its whole-hearted co-operation.

(70) Mrs. MYRDAL (Director, Department of Social Sciences) explained that there were two parts to the centre. The documentation centre would remain in the host country, but the research centre (which took up the bulk of the funds) was a temporary one. The Government of India planned to meet one-third of the costs.

(71) Paragraphs 216-222 were adopted.

(72) Paragraphs 233-235 were adopted without comment.

Project 3.7: The social sciences and evaluation techniques (paragraphs 226-242)

(73) Mr. ANGELL (United States of America) had three points to make. Firstly Unesco had a great need for evaluation in many aspects of its work. Secondly, evaluation meant more than an appraisal or measurement of the degree of achievement of an activity, however useful that might be. Unesco wanted to know what means produced good results, and that required comparison. Thirdly, there were four proposals in the project. The first, on libraries, was good but did not include the element of comparison. He suggested research should be carried out in an area with a library and in an area without one, to provide comparison. The second part of the project suffered from the same lack; Mr. Angell suggested that in the next two-year period further similar research be undertaken to provide a comparison with the current one. The last two parts of the project met his requirements, and the delegate of the United States of America commended them.

(74) Baron VAN DER STRAETEN WAILLET (Belgium) proposed the addition at the end of resolution 3.7, of the words: "as well as the non-governmental organizations".

(75) Miss RAILEY (Liberia) strongly supported the evaluation of literacy campaigns and of the long-range effects of international seminars. The complex rôle played by literacy campaigns in fundamental education in underdeveloped countries needed close study. With regard to the second evaluation, it would only be fully effective if carried out at the same time as a series of follow-up activities.

(76) Mr. PRATT (Australia) agreed with the excellent remarks made by the delegate of the United States of America on the evaluation project. The sum of money allocated to it seemed a very reasonable one. Mr. Pratt remarked that the cost of an evaluation should bear some relation to the cost of the project. He agreed with the importance given to the development of techniques as well as to the actual evaluation, and he also supported the delegate of Belgium in suggesting that in the case of a large-scale evaluation it would be a good idea for a totally unconnected organization to undertake it.

(77) Mr. GANNON (International Sociological Association) said that project 3.7 was especially interesting to all concerned with the study and practical application of the social sciences, as it dealt not only with the investigation of a practical subject but with the discovery of a series of techniques to enable the effectiveness and success of a programme to be determined.

(78) He believed that no science and no branch of study could be considered systematized unless its techniques included processes for the quantitative statement of results. Evaluation techniques were also methods of assessing the factors which were taken into account during the execution of a programme, such as nationality, occupation, social standing, age, mentality, etc.

(79) For the reasons set forth in paragraphs 231 and 241, he was not aware what evaluation techniques were to be used in 1955-56 but, from the terms employed in the budgetary justification, he took it that they were to be those appropriate to the experimental method, the principal forms of which seemed suitable for the proposed operation of measurement and assessment.

(80) He thought that the results of the work would be fruitful, and as a sociologist, he personally looked forward to having an instrument for precise control and evaluation in social theory and practice.

(81) The Belgian amendment was seconded by France and was approved.

(82) Paragraphs 226-242 were approved.

Higher Budgetary Level

Technical aid to Member States for evaluation of development projects (paragraphs 243-246)

(83) Mr. CABOUAT (Rapporteur, Advisory Committee on Programme and Budget) said that the Committee favoured more thorough study of the question before action was taken upon it, and had decided to recommend that the appropriation of $12,000 for 1955 be deleted and that the project appear in the programme for 1956 only.

(84) Mrs. MYRDAL (Director, Department of Social Sciences) informed the Commission that the budget estimates in question had been made on the basis of requests received and which had had to be refused in previous years (e.g. the Ceylon rural development scheme). She suggested that, if any cuts were to be made in the evaluation project, the Secretariat should be left free to make them wherever it thought best. The budget for evaluation of literacy campaigns, for instance, was included under the Education chapter.

(85) Mr. PRATT (Australia) and Sir Charles WEBSTER (United Kingdom) moved the suggestion made by Mrs. Myrdal, which was adopted.

Amendment to draft resolution of India (8C/DR/5 rev.) and amendment of Czechoslovakia (8C/DR/72)

(86) Mr. CHEVALIER (Secretary of the Commission) read out the text of these amendments (document 8C/DIV/131).

(87) Mr. HAJEK (Czechoslovakia) said that the amendment proposed by the United States of America was presented as an amendment to his delegation's amendment (document 8C/DR/72). But the United States delegation's text entirely ignored the idea of peaceful coexistence and its application as proposed in the Czechoslovak amendment.

(88) Mr. Hajek therefore did not regard the United States amendment as an amendment to his own resolution but considered it a new resolution. If the Commission took the American text as the basis for discussion, the Czechoslovak delegation would propose a new amendment to restore the essential part of the contents of its own resolution.

(89) Mr. ANGELL (United States of America) said that his delegation's amendment was less detailed than the Czechoslovak one. The Commission could choose between the two.

(90) Mr. MUJEEB (India) hoped that the Commission would be able to agree on one resolution in order that it might be adopted unanimously.

(91) Mr. FORSYTH (New Zealand) suggested that, as there was still some difference of opinion on the resolution, the delegates of India, Czechoslovakia and the United States of America should prepare a new text together, and submit it to the Commission in the next day or two.

(92) Mr. STOLETOV (Union of Soviet Socialist Republics) proposed that the question be discussed at the next meeting, when his delegation would all be present.

(93) Mr. AVIDOR (Israel) requested the three delegates in preparing their text, to bear budgetary implications in mind.

(94) Sir Charles WEBSTER (United Kingdom) supported that request.

(95) Mrs. PECSON (Executive Board) announced that the decision of the Executive Board on draft resolution No. 5 had been unfavourable.

(96) It was agreed to postpone the discussion until a new draft amendment had been prepared by the three delegations concerned.

The meeting rose at 11.45 p.m.

# TWENTY-THIRD MEETING

*2 December 1954 at 10 a.m.*

*Chairman*: Mr. BOURGEOIS (Switzerland)

ITEM 8.4.4 OF REVISED AGENDA: CULTURAL ACTIVITIES (continued)

International Union of Architects (paragraphs 46-48) (continued)

(1) Mr. BRICHET (France) said, that in view of the Secretariat's observations, the French delegation was withdrawing its proposal to increase the subvention to $5,000.
(2) However, he again affirmed that the International Union of Architects was inadequately endowed to carry out the research and general enquiries implied in its programme, and he asked the Secretariat, in the form of a proposal, not to lose sight of the necessity of increasing that subvention, as far as credits allowed, in 1956 if possible, and to bear those indications in mind when future programmes were being drawn up.

(3) Mr. MARDONES RESTAT (Chile) pointed out that it was the Chilean and not the French delegation which had asked for the budget of the International Union of Architects to be increased.
(4) It appeared that Unesco considered libraries, museums and archives to be more important than the work of creative artists. It was however true that town planners had a heavy task before them; the World Population Conference, held in Rome, had stated that in the next 25 years the world population would increase by a thousand million; which meant that within that time-limit, nine new cities the size of Montevideo would have to be built.
(5) The International Union of Architects was certainly not begging for a subvention for its own existence, but because it hoped to serve Unesco aims better.

(6) As many speakers had asked for the time-limit on speeches to be extended beyond three minutes, the CHAIRMAN put the question to the vote.

(7) Rejected by 14 votes against 14, with 20 abstentions.

(8) The Chilean delegate having asked for another vote to be taken, that proposal was also voted upon, according to the usual procedure, and was rejected by 20 votes against 17.

(9) The French proposal, seconded by the delegations of Italy and the United Kingdom, was approved by 33 votes against 1, with 3 abstentions.

International PEN Club (paragraphs 49-51)

(10) Miss BOLLO (Uruguay) voiced her country's hope that the PEN Clubs would be encouraged as far as possible in their very important work by a larger subvention than that granted in the draft Programme and Budget for 1955-56.

(11) Mr. PANNETON (Canada) was diametrically opposed to that course. The International PEN Club grouped a small number of persons whose literary fame and success ensured them against hardship.
(12) He would be in favour of a subvention of one dollar as a token of the respect that body deserved, but he thought that the $4,000 a year could be devoted to more important tasks.

(13) Mr. WADIA (India) regretted that there was opposition to renewing the subvention for the International PEN Club, as he had intended to propose that it should be increased.
(14) With regard to the proposed meetings, while he agreed that the autonomy of international organizations must be respected, he considered that Unesco, in providing subventions, had the right to make suggestions. He accordingly proposed that the next meeting of the International PEN Club should be held in Asia, and extended an invitation on behalf of his Government. He urged that the subvention should be continued; conferences were costly and leading intellectuals were not always wealthy.

(15) Mr. MENDIS (Ceylon) asked whether Ceylon was included among the six Asian countries mentioned in paragraph 49 as possessing PEN Clubs. If not, he would oppose the subvention, and support the Canadian delegate's proposal.

(16) Mr. DE SALIS (Switzerland) was of the same opinion as the Canadian delegate. Although he did not wish to pass judgment on the value of the International PEN Club, he wondered whether it was really necessary for Unesco to subsidize a body which had been functioning so satisfactorily for over thirty years.

(17) Miss NEFFA (Lebanon) thought that Unesco should exercise greater influence over the activities of PEN Clubs, so as to make them really international. She suggested that the proposed subvention for 1955 and 1956 should be used to achieve a wider distribution of the Bulletin in various languages and to obtain, geographically, better cultural representation.

(18) Mr. SUZUKI (Japan) appreciated the interesting proposal by the Indian delegate, although he thought it was perhaps for the International PEN Club to decide where it would meet.

(19) Mr. FLORES AGUIRRE (Mexico) thought it would be more useful to use the subvention proposed for 1955 and 1956 for instituting an international prize to reward the work that PEN Clubs did in forwarding Unesco's aims.

(20) Mr. THOMAS (Director, Department of Cultural Activities) drew the Commission's attention to document 8C/ADM/20 on the employment of subventions granted to international non-governmental organizations (quadrennial review by the Executive Board).
(21) In reply to the question from the delegate of Ceylon, Mr. Thomas explained that Ceylon did not figure in the list of countries in which the International PEN Club was represented by national centres. Although there were not PEN Club committees in every country, they were spread very widely over the earth's surface.
(22) With regard to the purposes of the subvention, Mr. Thomas gave the following information: in the main, it helped with the publication of a quarterly bulletin which provided information on books that had come out in a great number of countries, especially those in languages that were not widely spoken, it also defrayed some of the expenses incurred by the meeting of the PEN Club's annual congress.
(23) In addition, the PEN Club collaborated with Unesco in selecting contemporary works of various countries that it would be highly desirable to translate into widely spoken languages.

(24) Mr. PAIK (Korea) said that a PEN Club now existed in his country, but it was possible that a report had not yet been made to headquarters. He accordingly supported the continuance of the subvention.

(25) A vote was taken on the resolution of the Canadian delegate, supported by the delegates of Switzerland, the German Federal Republic and Spain.

(26) The resolution was rejected by 13 votes to 25 with 12 abstentions.

International Association of the Visual Arts (paragraphs 52-54) and document 8C/DR/30

(27) Mr. CHEVALIER (Secretary of the Commission) informed the Commission that the Advisory Committee did not recommend approving DR/30, submitted by the Italian delegation.

(28) Mr. UNGARETTI (Italy) emphasized the necessity of giving that recently created organization all the help it needed to carry through the difficult tasks incumbent upon it and which were already well under way.
(29) Although the Italian delegation considered that the annual subvention should be double what had been provided for, it only proposed an increase of $2,000 a year and recommended that offices should be made available to the International Association of the Visual Arts in Unesco House.

(30) Mr. BRICHET (France) pointed out to the Commission that the Association could offer Unesco very useful collaboration.
(31) When future programmes were drawn up, not only an increase in subventions, but more contracts, should be provided for.
(32) Travelling exhibitions had shown the cultural importance of colour reproductions, for instance. Previously that field had been reserved to private publishers, who naturally concentrated on reproducing works that were readily saleable. The Association of the Visual Arts could do something towards getting certain periods and schools of pictorial art better represented than they were and toward bringing artists to collaborate more directly in the making of reproductions. It could also help to lower prices, which were still far too high.

(33) Mr. BERREDO CARNEIRO (Brazil) was of the same opinion as the Italian and French delegates.
(34) The International Association of the Visual Arts had managed in a very short time to gain the support of a great number of Member States. Its congress had had very practical results. The vitality of the Association and its carefully worked out plan of activities amply justified the aid proposed for it, which would enable it to reach artists, often working in isolation, in many parts of the world.

(35) Mr. MATIC (Yugoslavia) was of the same opinion as the three preceding speakers. The Association had filled a gap and it was Unesco's duty to help it in its early stages.
(36) Mr. Matic then informed the Commission that a committee had been set up in Yugoslavia grouping most Yugoslav artists.

(37) Mrs. PECSON (Executive Board) said that the Association had already been granted a subvention and the proposal therefore had no budgetary implications. The Executive Board had discussed the merits of the proposal and, since its object appeared to be to strengthen support for the Director-General's programme and budget, had decided to recommend its adoption.

(38) Mr. SUZUKI (Japan) supported the Italian proposal.

(39) Sir Charles WEBSTER (United Kingdom) said that there was insufficient evidence to justify support for such a new association. Two observers from the United Kingdom had attended the Association's last meeting, but had not been sent any report on it. The subvention was already a large one, and Unesco should be cautious in increasing subventions without adequate justification.

(40) Mr. HOPE (United States of America) said that the National Commission in his country believed in the importance for Unesco of securing the active support of creative artists. As an art historian, he reminded the Commission that artists were judged not as human or political beings but by the quality of

their work. The problem facing Unesco was, therefore, whether the setting up of an international organization would ensure the co-operation of the best artists from every country In the opinion of the United States Government the organization being discussed was a worthy experiment, and he hoped Unesco would be able to find the means to encourage the best artists to participate, so that it would not become one more bureaucracy.

(41) Mr. FLORKIN (Belgium) disagreed with the United Kingdom delegate; he thought that IAVA had already proved its worth.
(42) The Belgian delegation strongly endorsed the Italian delegate's proposal, particularly in regard to the granting of offices so that IAVA's secretariat could function.

(43) Mr. BARRENECHEA PINO (Chile) said that his delegation warmly supported not only the proposed subvention to the International Association of the Visual Arts, but a larger one, as he believed that in that way an effective stimulus would be given to heroes of culture who, more often than not, were struggling to create alone and in poverty.

(44) Seconded by various countries, the Italian proposal to increase IAVA's annual subvention from $6,000 to $8,000, was rejected by 20 votes against 20, with 8 abstentions.

(45) Mr. THOMAS (Director, Department of Cultural Activities) informed the Italian and Belgian delegates that the IAVA secretariat had long had offices at Unesco House.

(46) Mr. BRICHET (France) wanted to know what the Unesco Secretariat's policy was as regarded contracts with IAVA.

(47) Mr. THOMAS (Director, Department of Cultural Activities) assured Mr. Brichet that the Secretariat was anxious to collaborate with IAVA and had noted what the French delegation had said. However, one could not forecast the tendency of future programmes.
(48) For the rest, there was already collaboration between Unesco and IAVA, which had been consulted on the setting up of a committee of experts for the selection of colour reproductions for the two catalogues.

(49) DR/30, submitted by the Italian delegation, was approved, as regards the work plan, by 24 votes against 0, with 13 abstentions.

International Federation of Library Associations (paragraphs 55-57)

(50) Mr. BOURGEOIS (Switzerland), speaking as observer and chairman of that body reminded the Commission that the Federation had existed for a quarter of a century, that its activity had never relaxed and that its work was of benefit to everyone.
(51) The credits granted were of course much smaller than the amount requested - especially as $1,500 of the $2,400 were for the purpose of organizing a joint congress with other institutions. But the Federation was well aware that Unesco had done what it could.
(52) However, Mr. Bourgeois wanted two observations to be recorded:

1. The basic rôle of libraries in the functioning of any scientific and cultural organization was not sufficiently stressed in the programme.
2. When committees were convened and when international organizations met, the Federation would like to be represented by an observer - at its own expense of course.

(53) Mr. BRANCA (Italy) wished to endorse Mr. Bourgeois' remarks; the Italian delegation was conscious of the extremely important part libraries played in the intellectual life of the whole world.

(54) Mr. THA HLA (Union of Burma) asked whether Burma was a member of the International Federation of Library Associations. The Federation was of great interest to his country, where two important libraries were being built: an international Buddhist library, which would be of value to the whole world, and a national library, which would be of use to South East and South Asian countries. He was strongly in favour of Unesco's support for the Federation.

(55) The CHAIRMAN said that no library association in the Burmese Union was affiliated with the International Federation, which intended, however, to extend its action to many countries not yet in its ranks.
(56) As for the other questions, they did not come within the discussion of the programme, but Mr. Bourgeois expressed his willingness to answer them at the end of the meeting.

(57) Mr. BRICHET (France) agreed with what Mr. Bourgeois had said as chairman of the International Federation of Library Associations.
(58) He insisted that Unesco must collaborate with that Federation, and wanted to know by what criteria the International Association of Music Libraries was being granted a subvention of $3,000 while the Federation was to have only $2,400.

(59) Mr. MATIC (Yugoslavia) said that the Yugoslav delegation endorsed the observations made by Mr. Bourgeois and the delegates of Italy and France.

(60) Mr. CASSANI (Argentina) said that his delegation was in agreement with Mr. Bourgeois' wishes and with the support he gave to the petition for the International Federation of Library Associations; Argentina would vote in favour of any increase designed to encourage artistic and literary activities.

(61) Mr. GUTIERREZ PALACIOS (Chile) warmly supported Mr. Bourgeois' point of view and hoped that library associations in Spanish America would also as far as possible be admitted to membership of the International Federation; the work of those associations had gained greatly in importance in the last ten years.

(62) Mr. TVETERAS (Norway) supported the statement made by the representative of the

International Federation of Library Associations, the work of which was of importance to librarians all over the world. Although it was not appropriate to increase the subvention at the present time, he hoped that it would be possible to do so at the next General Conference so that co-operation between the Federation and Unesco could be extended and intensified.

(63) Mr. DE LOS SANTOS (Philippines) said that his delegation not only supported the French motion to maintain the proposed subvention to the International Federation of Library Associations but would like to see it increased as far as possible.

(64) Miss BOLLO (Uruguay) stated that Uruguay also gave its warm support to what Mr. Bourgeois had said.

(65) Mrs. PECSON, speaking as observer for the International Federation of University Women, said that the members of the Federation looked on the library movement as an important element in the work for peace through education, science and culture, especially in war-devastated countries, where so much cultural material had been destroyed. It was also an important factor in the successful collaboration of the intellectual élite. Libraries were not only an essential aid to fundamental education; they were the depositories of man's thought for future generations, and the means of disseminating knowledge of the culture and inherited traditions which were the pride of each nation. She urged that the International Federation of Library Associations should be given its proper status and that Unesco should grant it a subvention of not less than $5,000 yearly.

(66) The CHAIRMAN said that three countries of Latin America (including Uruguay) were represented in the International Federation of Library Associations.
(67) For the 1955 congress, the Federation had sent out 3,000 invitations, including many to non-members, for it was ever anxious to extend its action in all directions.
(68) Returning to the question of subventions, the Chairman reaffirmed his conviction that the Secretariat had distributed credits in the best possible way. He was sure that the Director-General would bear the Federation's needs in mind when future programmes were being drawn up, and he hoped that contracts would be concluded that would allow the Federation to undertake work of great value to Unesco.

(69) The DIRECTOR-GENERAL regretted that he was unable to speak as an observer, since he was no longer a member of any of the organizations in question. As Director-General, however, he assured Mr. Bourgeois in his capacities of Chairman of the Commission and observer for the Federation that every effort would be made to recognize the quality and significance of IFLA's work and that he would keep in mind what had been said during the discussion.

(70) Paragraphs 55-57 were adopted unanimously.

International Federation for Documentation (paragraphs 58-60)

(71) Adopted unanimously.

International Council on Archives (paragraphs 61-63)

(72) Adopted unanimously.

International Association of Music Libraries (paragraphs 64-66)

(73) Mr. SALIM (Hashemite Kingdom of Jordan) regretted that, through no fault of their own, international organizations were not always completely international, since many underdeveloped countries were not able to participate in their activities. On behalf of those less fortunate countries, he urged that ways should be found of satisfying their interest in the work of international organizations and their wish to be informed of activities, receive publications and send observers to meetings. It was important for Unesco to use every endeavour to see that the work and the representation of international organizations extended to the whole world.

(74) Mr. BRICHET (France) again asked for an explanation of the difference between the subventions granted to the International Federation of Library Associations and to the International Association of Music Libraries. What criteria had been adopted?

(75) The CHAIRMAN replied that the International Association of Music Libraries had undertaken a very big task of musical research - the preparation and publication of an international directory of musical sources.
(76) He added in passing that the Association had been invited to become a section of the Federation - while retaining its autonomy - in the same way as other library associations, such as those in the fields of the medical and agricultural sciences.

(77) With regard to the criteria on which the amount of subventions was based, Mr. THOMAS (Director, Department of Cultural Activities) supplied the following data: the Secretariat did not take the requests as a basis, even though they might be very well founded; the main consideration was thoroughly worked out plans for particular projects, such as that for the publication of an international directory of musical sources being undertaken jointly by the International Association of Music Libraries and the International Society for Musical Research.
(78) The Secretariat was also guided by decisions made by the General Conference at earlier sessions.
(79) Finally, the liaison between different international organizations, referred to in paragraph 68, and the meetings Unesco convened each year and which enabled the international organizations and Unesco to acquaint themselves with each other's programmes were also determining factors.

(80) Mr. DE SALIS (Switzerland) was surprised that the International Society for Musical Research should receive credits under three different heads. He realized that those subventions were granted for

different projects, but he thought there was a disproportion in the allocations, particularly if one remembered the regrets expressed at the small share that had fallen to the International Union of Architects.

(81) Mr. THOMAS (Director, Department of Cultural Activities) corrected the facts as put by the Swiss delegate.
(82) The International Society for Musical Research received only two subventions - one through the International Council for Philosophy and Human'stic Studies, for collaborating in the publication of the International Directory of Musical Sources, which would take several years; and one small subvention of $500 through the International Music Council for the regular publication of the bulletin Acta Musicológica.

(83) In reply to the Chinese delegate's suggestion that Unesco should concern itself with securing wide usage for a uniform system of musical notation, the CHAIRMAN recommended that the delegate submit that question directly to the Secretariat, for it lay outside the programme.

(84) (A) International Organizations was unanimously approved.

(B) and (C), paragraphs 67-71

(85) Mr UNGARETTI (Italy) said that the Conference of Artists held in Venice in 1952 had decided that an International Council of Arts and Letters would be set up after the International Association of the Visual Arts had been founded. The Italian delegation saw no reason for that council not being set up.

(86) Mr. THOMAS (Director of Cultural Activities) reminded the Italian delegate that the proposal to set up the Council had given rise to confused and contradictory votes.
(87) Moreover, the consultations the Secretariat had had with Member States had revealed the scepticism with which many of them viewed the idea. The international non-governmental organizations were on the whole more sympathetic, but one or two of them had expressed great reserve. On that account the Secretariat had not ventured to submit the project in 1954 and only suggested a grant for the setting up of a provisional liaison committee.

(88) Mr. UNGARETTI (Italy) then asked for the proposal to set up an International Council of Arts and Letters to be submitted to the General Conference at the following session.

(89) Sections (B) and (C) were unanimously approved.

Project 4.12: Co-ordination of bibliographical services and exchanges of information (paragraphs 72-83)

(90) Mr. GUTIERREZ PALACIOS (Chile) said that both the Unesco Libraries Division and Mr. Penna, the expert at the Regional Office in Havana, deserved to be warmly congratulated on the work they had done. Further, in view of the very great importance for Latin American countries of the information contained in the Unesco Bulletin for Libraries, his delegation considered that the budgetary estimate for that publication should be maintained, if not increased.

(91) Mr. BRICHET (France) said that any interruption of the Index Translationum was unacceptable. That work, which had a vital rôle to play, had aroused keen interest in intellectual circles. Subventions should be maintained at a level adequate to keep the undertaking going in 1955 and 1956.

(92) The CHAIRMAN said that the International Federation of Library Associations had said the same thing to the Secretariat.

(93) Mr. GOMEZ HOYOS (Colombia) seconded the delegation of Chile in their congratulations and also requested that the publication and credits of the Unesco Bulletin for Libraries should not be reduced.

(94) Mr. BARDALES (Honduras) also praised the Bulletin and asked that the credits for its publication should be maintained.

(95) Miss BOLLO (Uruguay) supported the request put forward by Chile, Colombia and Honduras that the Bulletin should continue to be published exactly as before.

(96) Mr. MONTALVO (Ecuador) was in complete agreement with what the preceding speakers had said and asked that the budgetary level for the Bulletin for 1955-56 should be raised.

(97) Mr. THOMAS (Director, Department of Cultural Activities) said that, in order to keep on publishing the Unesco Bulletin for Libraries in its present form, the Libraries Division would require another $1,500.
(98) The Secretariat, when it had proposed a reduction, had counted on the development of national bodies able to take over a part of the contents of the Bulletin.
(99) It was not impossible that the Organization of American States might give the Bulletin the aid it had offered for the Handbook on the International Exchanges of Publications.

(100) The proposal to maintain the credits necessary for the publication of the Unesco Bulletin for Libraries was approved by 24 votes against 6, with 13 abstentions.

(101) Resolution 4.12, as amended, was then unanimously approved.

Project 4.13: Implementation of international conventions and preparation of international agreements (paragraphs 84-100) and documents 8C/PRG/4, DR/45, DR/49 and DR/26

(102) Mr. CHEVALIER (Secretary of the Commission) said that the Advisory Committee recommended the adoption of draft resolution DR/45 with the

$3,000 increase in credits they involved.

(103) Mr. ESTELRICH (Spain) recalled that, on the basis of the recommendation which the Provisional Copyright Committee had made to the Director-General in May 1954, his country had offered to collaborate very closely with Unesco in publishing a compilation of copyright laws of the world in Spanish, consequently he hoped that there would be no opposition to the request to increase the credits required by $3,000.

DR/26: Index Translationum

(104) The draft resolution which had been submitted by the Italian delegation and which had been favourably recommended by the Executive Board, was unanimously approved, after being warmly seconded by the delegations of France, Lebanon, Chile, the German Federal Republic, Ecuador and the United Kingdom.

(105) Miss BOLLO (Uruguay) emphasized the importance of the Index Translationum; her country wanted new translations to be made both of ancient and of modern famous works, amongst them, of the works of Rodo and Vaz Ferreira.

(106) Resolution 4.132, amended to conform with document 8C/DR/45 and seconded by the Italian delegation, was approved.

DR/49. Right of creative workers and research workers

(107) Mr. CHEVALIER (Secretary of the Commission) said that the Advisory Committee on Programme and Budget had asked for clarification before taking a decision on that proposed by the Uruguayan delegation.

(108) Mrs. PECSON (Executive Board) said that the Executive Board had not been in favour of the resolution in its existing form but was prepared to reconsider it if amended or redrafted.

(109) There being no seconder, the resolution was not put to the vote.

(110) Mr. UNGARETTI (Italy) explained the Italian delegation's position on three points concerning copyright:

(a) Unesco must draw Member States attention to the matter of "double taxation", so that a general convention might be adopted regarding it;

(b) Italy was prepared to take part in a wide exchange of television programmes provided copyrights were respected;

(c) A beginning had yet to be made in the matter of copyrights in the field of the visual arts.

(111) Mrs. SCHLUETER-HERMKES (German Federal Republic) congratulated the Department of Cultural Activities, and the Copyright Division in particular, on the work it had done for the universal convention.

(112) That work had to be successfully completed. The various texts of the law on copyright would have to be published not only in English, French and Spanish, but in each national language, since in legal texts shades of meaning were very important.

(113) Paragraphs 85-100 were unanimously approved.

(114) The CHAIRMAN informed the Commission of the sudden death of Mr. César Bolaña, Director of Administrative Services at the Legislative Palace, who was responsible for getting the meeting rooms ready for the Conference.

(115) Mr. Bolaña, by his untiring efforts, had made it possible for Unesco's General Conference to meet under the best possible conditions.

(116) The Chairman, on behalf of the Commission, expressed his sympathy with Mr. Bolaña's family in their bereavement and his gratitude to the deceased.

(The meeting stood and observed a minute's silence.)

(117) The DIRECTOR-GENERAL said that the Secretariat, even more than the members of the Commission or Conference delegates, knew of the intensive efforts which had been needed to adapt the Palacio Legislativo to the purposes of the Unesco General Conference. He wished to associate himself with the tribute paid to Señor Bolaña.

(118) Miss BOLLO (Uruguay), in the name of her country, thanked the Commission for their condolences upon the death of Mr. Julio César Bolaña.

The meeting rose at 12.55 p.m.

# TWENTY - FOURTH MEETING

*2 December 1954 at 3 p.m.*

*Chairman*: Mr. BOURGEOIS (Switzerland)

Document 8C/DR/115: Peaceful co-operation

(1) The CHAIRMAN announced that the delegations of India, Czechoslovakia and the United States of America had reached agreement on the text of a joint draft resolution on peaceful co-operation. He read the text.
(2) The Chairman added that the text read was the outcome of discussions among the three delegations on the Indian draft resolution (document 8C/DR/5 (rev.)), the amendment submitted by the delegation of Czechoslovakia (document 8C/DR/72) and the amendment submitted by the United States delegation (document 8C/DIV/131).
(3) The Chairman asked the Commission if it was prepared to discuss the document immediately or if it wished to wait until copies had been distributed.

(4) The United Kingdom delegation, seconded by the delegations of Chile and Ceylon, proposed that it be discussed forthwith.

(5) Agreed.

(6) Mr. MUJEEB (India) was happy to introduce the joint draft resolution. There was no need to stress its importance. The whole world now wished to move in the direction of peaceful coexistence. The current session of the Conference, which was more widely representative than any previous one, was the proper occasion for the adoption of such a resolution. The Government of India offered all the assistance it could dispose of in the forwarding of the aims it set forth.

(7) Mr. BARRENECHEA PINO (Chile) expressed his agreement with the proposal and the lofty ideals inspiring it. He thought, however, that the wording of the text was too involved, with too much repetition, and that it should be revised. It was important that the resolution should be comprehensible to the general public throughout the world.

(8) Mr. ANGELL (United States of America) was sure every one understood that the drafting of the revised resolution had not been simple. In the present troubled times it was difficult for people with different points of view to agree. A representative text had been composed, and the delegate of the United States of America hoped it would not be found necessary to tamper with it.

(9) Mr. HEYEK (Czechoslovakia) emphasized the importance of the discussion that had been held on the problem, which bore on the basic principles underlying all Unesco's work. His delegation had supported the Indian proposal, made its own contribution and participated in the drafting of the final text.
(10) The Czechoslovak delegation would have preferred a clearer form of wording, particularly as far as the idea of peaceful coexistence was concerned. The current session of the Commission showed that peaceful coexistence was the foundation of all Unesco's projects, and also that it was possible to reach agreement on essential principles, even if they were imperfectly expressed.
(11) Mr. Hayek thought that the agreement reached by the three delegations was a hopeful sign that peaceful coexistence would increasingly influence international relations.

(12) Mr. BARRENECHEA PINO (Chile) explained that he had not made a request but merely a suggestion. If, however, the Commission considered that he had made a proposal, he would withdraw it in order not to confuse the discussion.

(13) Mrs. MYRDAL (Director, Department of Social Sciences) said that the major part of that resolution was a solemn appeal to Member States, but the last part also requested the Director-General to make an objective study. As a beginning, she suggested that the Secretariat might collect all possible information on the research already undertaken in that domain (history, political science, etc.) and further, it might ask those scientific organizations which held congresses during the next programme period, to establish small working parties and discuss how in their own branch it was possible to go forward along the lines proposed in the resolution. Mrs. Myrdal mentioned the tentative figure of $10,000 in that connexion.

(14) In submitting the joint resolution to the vote, the CHAIRMAN said that he felt very moved by it. It was a fine example of tolerance, moderation and understanding, and was of a completely different kind from the resolutions which the Commission adopted, with or without a vote, in the course of an ordinary day's work. He hoped that, if the rules permitted, the document would be adopted unanimously by acclamation.

(15) The delegate of Colombia having put the Chairman's suggestion in the form of a motion, the draft resolution was adopted unanimously by acclamation.

(16) The DIRECTOR-GENERAL remarked that it was clear in all minds that the new resolution

represented a very important development in the history of Unesco. The Organization would do all in its power to carry it out and to obtain the best possible results from the work it would undertake in that field.

ITEM 8.4.3 OF REVISED AGENDA: SOCIAL SCIENCES (continued)

Project 3.4: Social science and problems of international understanding and tensions (paragraphs 140-163)

(17) Mr. BRICHET (France) was unconditionally in favour of sections (A) Roads to agreement: mediation and other techniques for avoiding conflict, and (C) Improved information on foreign cultures. He felt some doubts, however, about section (B) Public acceptance or rejection of Unesco and United Nations principles. He wondered whether public opinion was sufficiently alive to such questions and stated that, in French country districts, for example, those principles were generally unknown, although they awakened great interest in all who were informed about them.
(18) The French delegate also pointed out that there were contradictions in the dates and thought that a stricter order should be observed for the activities concerned. In conclusion, he took the view that it was not yet possible to enter into the active phase and that section (B) of the project required additional study. He proposed that the relevant appropriations be deleted and transferred to some other part of the programme, where they would be more useful.

(19) At the CHAIRMAN's request, Mr. CHEVALIER (Secretary of the Commission) pointed out that the activities under section (B) had been classed by the Advisory Committee on Programme and Budget in Category 3 (document 8C/BUD/1, page 12).

(20) Mr. ANGELL (United States of America) wondered if Mrs. Myrdal had talked the subject over with the scientific groups.

(21) Sir Charles WEBSTER (United Kingdom) felt that the chapter in question was the weakest in the programme of Social Sciences, which was generally excellent. It was an intractable subject for practical measures. Sections (A), (B) and (C) were inadequate and could not be carried out without a stand being taken on controversial matters. Documents showing the failure of the techniques in question would have to contain critical remarks about governments, which Unesco could not publish. On (B) the delegate of the United Kingdom agreed with the French delegate. On (C) he remarked that education through seminars was part of Unesco's normal work. Sir Charles hoped that Mrs. Myrdal would study and prepare the section further before there was any question of its implementation.

(22) Mr. KABIR (India) agreed that the project should be postponed.

(23) Mrs. MYRDAL (Director, Department of Social Sciences) said that, before reaching a decision on section (A), draft resolution 21 should be discussed.
(24) With regard to (C), there was a great need for experts on technical assistance missions to have an understanding of foreign cultures. The pamphlets were intended to counteract the stereotyped information that was so abundant on foreign countries. The idea had won support from many quarters, and the United States National Commission had asked Unesco to be more active in that field.
(25) On (B) views were divided and, in view of the budget increase, Mrs. Myrdal was willing to reduce the figure under paragraph 155 and defer the implementation of paragraph 156.

(26) Mr. TOROCHESNIKOV (Union of Soviet Socialist Republics) supported the whole of project 3.4 and made some general remarks on the Social Sciences chapter as a whole.
(27) It was recognized in the USSR that differences of opinion did not prevent co-operation between scientists. Such co-operation was rendered still more necessary by the coexistence of different social and economic systems. Sociologists, economists, statisticians, demographers, etc., all working in the field of the social sciences, should join forces in the battle for peace and against the threat of a new war, for the peaceful coexistence of the two systems, the expansion of economic and cultural relations between all nations on a basis of equality and mutual interest, against all forms of discrimination and for all democratic rights and freedoms, for the raising of the living standard of the masses and aid to the economically underdeveloped countries.
(28) The Soviet delegate congratulated Unesco on having included in its social science programme, and particularly in project 3.4, a question as important as international co-operation and the elimination of tensions in international relations.
(29) In conclusion, he stated that the Soviet delegation would vote for the Social Sciences chapter in the hope that the fight for a lasting peace and the improvement of the living conditions of mankind would in future be a guiding principle in the work of Unesco and the organizations co-operating with it. At the same time the Soviet delegate made it clear that the application of those resolutions should in no way run counter to the national laws of the various countries concerned.

(30) Mrs. JOBORU (Hungary) considered that any effort to reduce international tension was at the heart of Unesco's work, and that not only should all items in that part of the programme be maintained, but further items added to it, such as the proposal of an international conference of outstanding social scientists from countries with different social systems, and the issuing of a high-level publication in which leading scientists and statesmen could express their outlook on tensions, as explained in the motion of the Indian delegation.

(31) Mr. FORSYTH (New Zealand) referred to section (C). He enquired how an objective picture could be obtained. Would not much more harm be done in the country that was written about than good to the scientists visiting it?

(32) Sir Charles WEBSTER (United Kingdom) moved a resolution that the whole section be referred back to the Director-General for further study. He would like the section kept in the programme, and suggested that the Director-General might produce a broad outline to be submitted to a small meeting on Monday or Tuesday.

(33) Mr. ANGELL (United States of America) wished to make it clear that he had not intended his earlier intervention as a criticism. He did not wish Mrs. Myrdal to receive the impression that her programme was not approved of. He would agree to minor changes, but it should not be reduced, in view of the resolution just voted by the meeting.

(34) The proposal of the United Kingdom delegate, supported by the delegate of Hungary, to refer project 3.4 back to the Director-General was put to the vote and adopted by 32 votes to 0, with 5 abstentions.

**ITEM 8.4.4 OF REVISED AGENDA: CULTURAL ACTIVITIES** (continued)

(35) Mr. PANNETON (Canada) explained his delegation's attitude towards the budget for the Department of Cultural Activities. While recognizing the major importance of the Department's programme, he protested against the unexpected increases in its budget, which were in danger of upsetting a balance which the Secretariat had had great difficulty in attaining.
(36) Mr. Panneton could detect little sign of efforts to achieve concentration, although concentration was supposed to be the keynote of the current session. For example, the number of organizations to be granted subventions had increased from 7 to 15. He expressed regret that the directives issued by the General Conference at its seventh session had not been better followed and had not inspired greater moderation in the various delegations.

Project 4.13: Implementation of international conventions and preparation of international agreements (continued)

(B) International Convention for the Protection of Cultural Property in the Event of Armed Conflict (paragraphs 101-110) and document 8C/PRG/23

(37) Mr. LORENTZ (Poland) drew the Commission's attention to the restrictions contained in the Convention signed at The Hague. For example, under paragraph 2 of Article 11, it was possible, in exceptional cases of unavoidable military necessity during an armed conflict, for immunity to be withdrawn from cultural property under special protection upon the order of the officer commanding a force the equivalent of a division in size or larger.
(38) The Polish delegate pointed out that the world had seen many instances of the destruction of cultural treasures, but never in the past had those held responsible for such destruction been excused or their acts legalized; on the contrary, they had been considered unpardonable acts of vandalism.

(39) Invoking paragraph 5 of the Protocol to The Hague Convention, Mr. Lorentz claimed the restoration of Polish cultural treasures deposited in other countries during the war.
(40) The delegate of Poland declared that his Government had signed the Convention and Protocol to demonstrate Poland's firm desire for cultural co-operation with all nations and to show its will to reach common agreement, even with those whose outlook and opinions were entirely different from its own.
(41) The Polish delegation accepted the whole of section (B) of project 4.13, in the hope that the national advisory committees set up under resolution II annexed to The Hague Convention would know how to interpret the articles and induce the different nations to take action in accordance with the spirit rather than the letter of the Convention.
(42) The Polish delegate expressed the hope that the various documents would ensure lasting protection, not only of the cultural property of nations, but also of the cultural heritage of mankind as a whole.

(43) Miss NEFFA (Lebanon) stated that the Lebanese Government attached special importance to the International Convention for the Protection of Cultural Property in the Event of Armed Conflict. It hoped that the Secretariat would give priority to that part of the programme, and that it would, in particular, ensure wider dissemination of information on problems relating to monuments to all countries interested, such as those of the Middle East.
(44) She suggested that, in order to ensure wider circulation of information, the Manual mentioned in paragraph 109 should be distributed not only to fine arts ministries, but also to National Commissions and to all the museums of the Middle East.

(45) Mr. NAVRATIL (Czechoslovakia) reminded the Commission that his delegation was represented on the Working Party on International Regulations, and had voted for the resolution concerning the Report on the Results of the Intergovernmental Conference on the Protection of Cultural Property in the Event of Armed Conflict. With the object of recalling Unesco's basic aims, it had moved an amendment to that resolution, consisting of the insertion of the following words before paragraph 3:

"While pursuing the aim, prescribed in the Constitution, of strengthening the defences of a peace founded on the intellectual and moral solidarity of mankind .....".

(46) The Czechoslovak delegate regretted that that idealistic clause had not been accepted, for it would have strengthened Unesco's moral standing with the public.
(47) As it had voted for the draft resolution, the Czechoslovak delegation would not propose the amendment a second time, but would content itself with the foregoing statement of principle made before the Commission.

(48) Mrs. REINOSO DE RODRIGUEZ (Philippines) was strongly in favour of the Convention for the Protection of Cultural Property in the Event of Armed Conflict. The smallest piece of cultural

property was a link between the past and the future. The amount budgeted in paragraph 110 was fully justified.

(49) Mr. ESTELRICH (Spain) seconded the suggestion made by the Lebanese delegate with a view to obtaining the widest possible circulation for the Manual on the Protection of Cultural Property in the Event of Armed Conflict.

(50) Mr. WIDDOWSON (Union of South Africa) approved document 8C/PRG/4, but wished to substitute, in paragraph 4 of the resolution, the word "recommends" for the word "requests". The resolution has been seconded by the delegate of the United States of America and adopted, without opposition, with one abstention.

(51) Mr. LINKSON (Australia) wished to clarify the position of his Government: Australia's signing of the final act and Convention adopted by the Conference should not be understood to prejudge its final decision with regard to becoming a party to the Convention. That question was at present under consideration.

(52) Mr. PHOTIADES (Greece) had certain reservations to make in respect of the International Convention for the Protection of Cultural Property in the Event of Armed Conflict.

(53) In reply to a remark by Mr. THOMAS (Director, Department of Cultural Activities), Mr. PHOTIADES (Greece) said that, while it was true that Greece had signed the Convention, his Government had instructed him to put forward certain reservations relating to the application of its provisions.

(54) Paragraphs 101-110 were then put to the vote and adopted, with one abstention.

(55) Mr. THOMAS (Director, Department of Cultural Activities) pointed out that the Commission's decisions applied to the Report of the Working Party on International Regulations (document 8C/PRG/23) and not to the Report on the Results of the Intergovernmental Conference on the Protection of Cultural Property in the Event of Armed Conflict (document 8C/PRG/4).

(56) Mr. CHEVALIER (Secretary of the Commission) then read the draft resolution on page 7 of the Report (document 8C/PRG/4), which had been adopted by the Working Party without opposition abstention (document 8C/PRG/23, pages 1 and 2).

(57) Mr. LINKSON (Australia) suggested a change of one word in paragraph 5: "to ensure application of the provisions" should be replaced by "to request application of the provisions".

(58) Mr. BRICHET (France) pointed out that The Hague Convention could hardly be modified, even if it were only a question of a single word, since that Convention had been signed by government representatives in May.

(59) The draft resolution submitted by the Working Party on International Regulations and relating to the protection of cultural property in the event of armed conflict was adopted, with 3 abstentions.

(C) International agreements on the exchange of publications and the microfilm reproduction of documents (paragraphs 111-113)

(60) Adopted without discussion.

(D) International regulations with regard to archaeological excavations (paragraphs 114-117)

(61) Mr. CHEVALIER (Secretary of the Commission) drew attention to the report on the desirability of establishing international regulations with regard to archaeological excavations (document 8C/PRG/5). The Working Party also submitted to the Commission a draft resolution appearing on page 3 of its report (document 8C/PRG/23).

(62) Mr. ESTELRICH (Spain) supported the proposals for international regulations with regard to archaeological excavations.

(63) Speaking not as a delegate but in a private capacity, Mr. Estelrich wished to draw the attention of those responsible for the preparation of the preliminary draft regulations to the fact that there were archaeological zones of great prehistoric and historical importance, such as Tangiers, which were at the same time, politically speaking, international zones.

(64) Mr. ROMANO MUNOZ (Mexico) pointed out that, in his country, there were real archaeological treasures which had a valuable contribution to make to knowledge of ancient cultures. For that reason, his delegation would support the establishment of international regulations with regard to archaeological excavations.

(65) Mr. HUZAYIN (Egypt) represented a country with cultural values rooted in prehistory. Its experience of excavations that had not been carried out on a scientific basis had led it to believe that rules were very valuable, and that where they were not followed it was better to leave antiquities untouched. His country would be glad to co-operate with any committee that might be established with a view to setting up such regulations. Egyptian non-governmental organizations offered their support.

(66) Mr. FLORKIN (Belgium) stated that his Government would prefer a fairly flexible system of protection by means of an international convention containing only the bare principles on which it would be easy to reach agreement. Such a convention would be supplemented by recommendations, and experience would show which were the countries determined to conform to the convention.

(67) Mr. LORENTZ (Poland) recalled the statement which he had made in the Working Party on the subject of archaeological excavations. In Poland, archaeological excavations had shown marked expansion during recent years and had aroused keen

interest both in government circles and among the public.
(68) Poland would gladly take part in excavations undertaken on an international scale and in the preparation of a convention relating thereto.
(69) The Polish delegate expressed his approval of the project and his willingness to co-operate in the drafting of international regulations with regard to excavations.

(70) Mrs. ZUEV (Union of Soviet Socialist Republics) stated that the Soviet delegation had no objection to resolution 4.132, but would like to make some comments on the proposal to establish international regulations with regard to archaeological excavations.
(71) The Soviet Government attached great importance to the scientific value of archaeological excavations and to the preservation of historic monuments. All archaeological monuments in the USSR were classified by the Government in accordance with the laws in force. Archaeologists had the right to declare a particular area important, after which there could be no further building in it until it had been inspected by the State, the Academy of Sciences of the USSR, or those of the Federated Republics. Excavations were conducted in accordance with a State plan and under the supervision of the academies.
(72) Every year, scores of scientific missions carried out excavations and drew up reports, describing the archaeological monuments in scientific terms. Cultural treasures were preserved where found or transferred to museums. The Moscow History Museum contained more than 900,000 objects discovered by archaeologists.
(73) Soviet archaeologists had acquired a great deal of experience in the organization and utilization of archaeological excavations and were ready to share their experience with archaeologists of other countries.

(74) Mr. SUZUKI (Japan) drew the Commission's attention to the fourth paragraph of the resolution on the regulations with regard to archaeological excavations, referring to excavations in occupied territory. In his opinion, the rights of an occupied territory where excavations were being carried out should be fully safeguarded, and its position in relation to the occupying power strengthened.

(75) Mr. PHOTIADES (Greece) shared the Belgian delegate's opinion and thought that what had started as a recommendation, and had already begun to be implemented, might later be incorporated in an international agreement.
(76) He added that it would be interesting one day to write a history of the objects of archaeological value scattered throughout the museums of the world, including a description of the road they had travelled before coming to rest in the museums.

(77) Mr. THOMAS (Director, Department of Cultural Activities) observed that the Working Party had advocated international regulations in the form of a recommendation to Member States, in accordance with procedure laid down by the General Conference.

(78) The Working Party's proposal under item 8.4.4.3 of the agenda concerning the international regulation of archaeological excavations was adopted, together with its resolution relating to draft regulations for international competitions in architecture (document 8C/PRG/23).

Project 4.14: Unesco library and reference services (paragraphs 118-121)

(79) Mr. KABIR (India) felt that, however valuable the services rendered under that project, the provision of $53,000 a year for staff and $13,000 other costs was somewhat high, and ought to be justified by making the library available to Member States upon request, in the form of mimeographic copies, for example.

(80) Mr. THOMAS (Director, Department of Cultural Activities) informed the Commission that the Unesco library was chiefly stocked with reference works, collections of reviews and periodicals, and other publications necessary to the proper functioning of the different sections of the Secretariat. The library also had a service responsible for documentation and the checking of bibliographies included in Unesco publications. At present, it included 12,500 reference works, and 13,000 volumes necessary for the carrying out of Unesco's ordinary and technical assistance programmes. It received about 2,000 requests per month. Further, the Unesco library availed itself of the lending services of all the Paris libraries.
(81) Apart from the services which it rendered to the Secretariat, the library, in spite of its limited means, placed its services as far as possible at the disposal of Member States.

(82) Mr. HOPE (Rapporteur), speaking as delegate of the United States of America, had no objection to the project but questioned its being placed in the chapter on Cultural Activities.

(83) The DIRECTOR-GENERAL replied that it was really as well placed there as anywhere else. He was reluctant to add to the units working directly under the Director-General's office.

(84) Project 4.14 was adopted.

(85) The CHAIRMAN, observing that the Commission was behindhand with its work, urged delegates, in examining the programme resolutions, to leave the Secretariat a certain amount of freedom in carrying them out.

(86) No objections having been raised, the above procedure was approved.

(87) Mr. BRANCA (Italy) reiterated the proposal of the Italian delegation to increase the subvention granted by Unesco to the International Association of the Visual Arts by $2,000, thereby bringing it up to $8,000 per annum. He reminded the Commission that the result of the vote on the proposal had been divided, 20 for and 20 against, and he therefore requested the Commission to vote a second time, in

accordance with Rule 90 of the Rules of Procedure of the General Conference.

(88) Mr. PANNETON (Canada) having observed that the taking of the second vote should appear on the Commission's agenda, the CHAIRMAN read Rule 90 and Mr. BRANCA (Italy), referring to certain precedents, requested that his proposal be included on the agenda of the next meeting, should the Commission decide against taking an immediate vote.

(89) The delegates of France and Greece having moved that a vote be taken immediately on the proposed increase, it was approved by 25 votes to 15, with 4 abstentions.

Project 4.2: Preservation of the cultural heritage of mankind

Paragraphs 122-131

(90) Mr. FLORKIN (Belgium) remarked that the Secretariat had studied the possibility of setting up the centre proposed under (A) either in Brussels or in Rome. The cultural co-operation existing between his country and Italy was a source of great satisfaction to him and he had no desire to create competition; he therefore proposed that the Director-General be asked to decide on the choice of the town in consultation with the Executive Board. He hoped that the Italian delegation would agree to that proposal. (Mr. Branca indicated his assent.)

(91) Dr. KEKHIA (Libya) begged leave to present his delegation's draft resolution on archaeological research in Libya (document 8C/DR/111). He observed that the proposal fitted into the project under discussion and entailed no additional expense.

(92) Mr. BRICHET (France) believed that many countries had needs similar to those of Libya and expressed the hope that the Libyan proposal would be submitted to the International Committee on Monuments. He moved adjournment of the debate on the proposal.

(93) Mr. HUZAYIN (Egypt) strongly supported the delegate of Libya. The case of Libya was a very special one and deserved all the encouragement and useful service the establishment of an institute in that area would provide.

(94) Mr. ESTELRICH (Spain) seconded the proposal.

(95) Mr. THOMAS (Director, Department of Cultural Activities) requested the Libyan delegate to confirm that his proposal had no budgetary implications.

(96) Dr. KEKHIA (Libya) having given the assurance requested, his proposal was put to the vote and adopted by 43 votes, with 4 abstentions.

(97) Mr. BRICHET (France), returning to the subject of the budget estimates for the establishment of the centre, noted that it was proposed to spend most of the money on the remuneration of a legal expert to draw up the centre's statutes. In his opinion, Unesco's Legal Adviser was perfectly capable of doing the work and he proposed the deletion of the estimates in paragraph 131.

(98) Sir Charles WEBSTER (United Kingdom) had been about to make the same point. It was an item which might lead to large expenditure at a later date. It was possible today to get a good deal of advice at the big museums, and it was doubtful if an international centre would be able to provide anything as good.

(99) The CHAIRMAN, speaking as delegate of Switzerland, emphasized the importance of setting up an international study centre. The International Council of Museums and the International Committee on Monuments were both responsible bodies and perfectly capable of establishing such a centre. Some of the large museums in different parts of the world had developed techniques leaving little to be desired, but small museums still made many mistakes. He was therefore in favour of maintaining the amounts proposed in paragraph 131.

(100) After the representative of the Executive Board had stated that the Board was in favour of the project, Mr. THOMAS (Director, Department of Cultural Activities) drew the Commission's attention to the fact that the estimate for 1955 was divided into two parts, namely contract ($900) and staff travel ($120). He requested the French delegate to rely on the judgment of the Director-General as far as travel was concerned. He recalled, moreover, that the Italian delegate had expressed approval of the project. The only object of Mr. Thomas' explanation was to make it clear why the proposed sums were necessary.

(101) Mr. BRICHET (France) having pressed for the deletion of the sum of $900, Mr. BRANCA (Italy) seconded the proposal that the centre's statutes should be drawn up by specialists in the Secretariat, without the help of an outside expert.

(102) The French proposal, seconded by the United Kingdom delegation, was put to the vote and adopted by 25 votes to 6, with 10 abstentions.

(103) Mr. CHEVALIER (Secretary of the Commission) then read the last two paragraphs of the Indian draft resolution contained in document 8C/DR/17.

(104) The Advisory Committee on Programme and Budget had advised rejection of the project and the Executive Board had considered it premature.

(105) Mr. KABIR (India), speaking on the last paragraph of DR/17, was very keen to promote that activity. His Government would be prepared to sacrifice the proposed museum in Chandigarh, the new capital of East Punjab, for the sake of having the museum in New Delhi.

(106) Mr. THOMAS (Director, Department of Cultural Activities) explained that, if it were a question of exploring the possibilities of establishing such a laboratory, Unesco would have no need to call

on outside experts and there would be no budgetary implications. If, on the other hand, a mission of experts were proposed, that would not be possible within the present programme. As far as fellowships were concerned, two additional fellowships, totalling $5,800, would have to be provided for out of the budget of the Exchange of Persons Service.
(107) Mr. Thomas believed that the Executive Board had drawn the Indian delegation's attention to the desirability of establishing an international centre before a regional one for South and South East Asia.

(108) Mr. PANNETON (Canada) thought that the Indian Government might establish the laboratory.

(109) In the light of all the comments made, the Indian delegation withdrew its proposal.

(B) Centre of photographic documentation on Egyptian antiquities (paragraphs 132-134)

(110) Adopted without discussion.

(C) International Committee on Monuments (paragraphs 135 and 136)

(111) Adopted without discussion.

(D) Cataloguing and preservation of Middle Eastern manuscripts (paragraphs 137-144)

(112) Miss NEFFA (Lebanon) fully supported the project, since the importance of the manuscripts was universally recognized. She hoped that Unesco would attach to the inventory all the importance which it deserved and that the work would be carried on even after the two-year period covered by the draft programme. She therefore suggested inserting in the work plan, not only that the Secretariat would consult the States concerned, but also that it would take advantage of the forthcoming congress of orientalists to consult experts on the choice of manuscripts to be catalogued.

(113) The project was approved.

(E) Technical aid to Member States (paragraphs 145-147)

(114) Mr. MENDIS (Ceylon), referring to paragraph 146, enquired whether the allocation provided here would be sufficient to cover at least the six requests that had been received from Member States and, if not, what additional provision could be made for the purpose.

(115) Mr. THOMAS (Director, Department of Cultural Activities) explained that mention had been made only of requests already received. Since the publication of document 8C/5, however, other requests had come in and, if they were to be met, a marked increase in the budget would be necessary.

(116) Mr. THA HLA (Union of Burma) made a general observation on the technical aid programme. The work plans, architectural designs etc., he felt, should be very broadly stated in order that the requests of Member States could be met with the required flexibility. The Secretariat should give preference to those national projects for which national authorities had already provided the major part of the cost. He insisted that, since the requests submitted by his Government and that of Libya had been made as early as 1950, the mission proposed should at least include those two requests.

(117) Mr. MENDIS (Ceylon) proposed that the budget in paragraph 147 should be doubled.

(118) Mr. BERREDO CARNEIRO (Brazil) reminded the Commission that the Brazilian and Egyptian delegations had originally been responsible for the inclusion of the project. When it had been drawn up in 1950 it had been realized that it meant imposing a heavy burden on Unesco, since, to carry it out successfully, enormous sums would be needed. In order to raise the necessary money, various methods had been employed, including a tourist tax.
(119) Unesco was at present in a difficult position, for the aid which it was able to give, although necessary, was more or less symbolic. The Brazilian delegate concluded by seconding the proposal of the delegate of Ceylon, which was also supported by the delegates of Liberia and Egypt.

(120) The CHAIRMAN warned the Commission against unforeseen or disproportionate increases in the budget. He recalled that it had already agreed to important increases in the budgets of the Departments of Education and Natural Sciences.

(121) Sir Charles WEBSTER (United Kingdom) claimed that it would be an irresponsible decision to double the amount so suddenly for an item which the Secretariat had considered at great length. He felt, too, that Member States ought to show their need of a project by themselves offering to pay a large part of the expense.

(122) Mr. FORSYTH (New Zealand), with all respect for the position of those who had put up the proposal, felt that the living (in such things as fundamental education in particular) came before dead monuments, given Unesco's limited budget.

(123) Mr. SHARIF (Pakistan) warmly supported the delegate of Ceylon. Replying to the United Kingdom delegate's remark, he said that such missions were followed up by very considerable expenditure in the carrying out of advice given. To the delegate of New Zealand he replied that museums were a powerful source of education. The increase of expenditure could surely be taken into consideration by the Advisory Committee with all similar increases, without affecting the budget ceiling.

(124) Mr. SHARIF commended the remarks of the delegate of Burma.

(125) A vote was then taken on the proposal of the delegate of Ceylon, which was adopted by 25 in favour, 13 against and 9 abstentions.

Project 4.31: Humanistic studies in culture and education

(126) Mr. ESTELRICH (Spain) approved the estimates and also the Italian draft amendment to resolution 4.31 (B), paragraph 159 (document 8C/DR/78 (rev.)).
(127) He thought that the rôle of the humanities in contemporary culture was one of the major cultural problems of the last thirty years. To disregard their importance in the Western world was to disregard the past, present and future of Western civilization. The humanities at the present time, in order to be relevant and operative, had to provide a satisfactory answer to the aspirations and needs of the modern world.
(128) Spain, in conformity with its humanistic traditions, wished to take part in Unesco's surveys and was ready to organize the necessary activities in Spain, where a Society of Classical Studies existed and had recently been admitted to membership of the International Federation of Societies of Classical Studies at its Congress in Copenhagen.

(129) Mr. ZAMORANO HERNANDEZ (Chile) approved the estimates for project 4.31, but wished to make certain reservations, for the project seemed to him to indicate a tendency in the department concerned to identify the concept of the humanities with the study of the classical literature of East and West alike.
(130) Did not all human achievements throughout the ages in the various artistic, literary, scientific and technical fields belong to the entire world, and should they not therefore be integrated in a wider and more modern humanism? Was it perhaps that the training of a "man" was incompatible with the training of a "factory hand", and literary education incompatible with practical, technical education?
(131) In Mr. Zamorano Hernandez's opinion, the notion of humanism developed in time with the course of the social revolution and the evolution of man's interests, including his "scientific" interests, without identification of the latter with any occupational purpose.
(132) On those grounds, the delegation of Chile could not subscribe unreservedly to the point of view emerging from the two paragraphs under consideration.

(133) The CHAIRMAN drew the Commission's attention to the slowness with which the discussion was proceeding. He would be compelled to ask the General Committee whether the Commission should be allowed to hold such long discussions, which might make it necessary to prolong the eighth session of the General Conference.

(134) Mr. NIELSEN (Denmark) proposed that, in starting a new chapter, the general debate should be omitted except for its introduction by the Chief of the department.

(135) The CHAIRMAN proposed that, if the Rules of Procedure permitted it, and if the Commission were prepared to accept it, the number of speeches on each subject be limited.

(136) After further discussion, the various proposals, aiming at limiting the number of speeches, were rejected.

The rôle of the humanities in contemporary culture (paragraphs 153-156)

(137) Mrs. SCHLUSTER-HERMKES (German Federal Republic), disagreeing with the opinion expressed by the Advisory Committee on Programme and Budget, proposed that the project be given high priority.
(138) She thought that the appropriations proposed were insufficient.
(139) She was surprised that the results of sociological research should have shown that the importance attached to classical and humanistic studies was on the decrease, while, on the other hand, interest in classical and humanistic culture was increasing among the masses. She concluded by saying that letters must be saved if human values were to survive.

(140) Mrs. PATRONETTO VALIER (Italy) drew the Commission's attention to the draft amendment submitted by the Italian delegation on the subject of humanistic studies in education (document 8C/DR/78 (rev.)), which had no budgetary implications.

(141) Mr. SOMMERFELT (Norway) proposed deletion of the estimates under paragraphs 156, 160 and 164. Those were important items but could not be covered by the present budget.

(142) Mgr MAROUN (Lebanon) drew the Commission's attention to the wording of paragraph 153, with particular reference to the listing of "intellectual traditions, art and religion, and cultural values in general". In his opinion, they were of unequal value and should not be grouped together. He thought that the Secretariat had made a mistake there.

(143) Miss MONTERO SAPRIZA (Pax Romana) said that the international movement of Catholic intellectuals which she represented favoured investigating the amount of importance attaching to classical and humanistic studies in the cultural development of communities, since, in view of the exigencies of ultra-specialized modern life, when man was in danger of being increasingly dominated by technology, the need was felt to awaken interest in all forms of culture, and more particularly in philosophy and art.
(144) In her view, it was not a matter of preparing the individual exclusively for a particular branch of technical work, but for fuller understanding of the problems of his environment. It was not only important to the individual that his mental horizon should be enlarged by humanistic studies; for international understanding and co-operation, those studies had a real contribution to make.
(145) She reminded the Commission that one of Unesco's aims was to encourage the development of the means of disseminating works of art, affording man the chance of enjoying the works which constituted humanity's artistic heritage. That being so, she suggested that steps be taken to facilitate free

access to museums, art galleries, etc., for the largest possible number of persons, especially art students and students in general; the ideal would be for all, whatever their station, to have free access, as was the case in almost all parts of the Americas.

(146) Mr. GOMEZ HOYOS (Colombia) thought that the considerations advanced by the Advisory Committee were a trifle inconsistent in that matter, since they began by recognizing explicitly the value of the Director-General's recommendations and proposals in that part of the programme and ended by expressing the view that they should be given a different priority.
(147) He wished to make it quite clear that his delegation most warmly supported the proposal of the German Federal Republic that either the programme and budget submitted in that section be retained as it stood, or that it be increased; the latter would have the effect of stimulating that particular work a little more.

(148) Sir Charles WEBSTER (United Kingdom) supported the delegate of Norway. The case in point, he said, was one of the clearest examples of neglect of the principle of concentration approved by the Commission.

(149) Mr. THOMAS (Director, Department of Cultural Activities) did not intend to go into details regarding the substance of the project; as far as wording was concerned, the Secretariat was in agreement with the proposals made. The estimates were modest and fitted in exactly with the work plan. The point was, firstly, to stimulate the activities of National Commissions and, secondly, to hand over work to non-governmental organizations, against remuneration in the form of contracts which did not greatly increase the budget.

(150) The proposal of the Norwegian delegation to delete the estimates in paragraph 156 was rejected by 20 votes to 13, with 8 abstentions.

(151) The German proposal to increase the estimates in paragraph 156 by $12,000 for the two years 1955 and 1956 was also rejected by 25 votes to 6, with 9 abstentions.

(B) Enquiry into the teaching of the humanities (paragraphs 157-160)

(152) Mrs. PATRONETTO VALIER (Italy) requested that her delegation's amendment (document 8C/DR/78 (rev.)) be incorporated in the work plan without any additional budgetary provision.

(153) Mr. CASSANI (Argentina) stated that his delegation was much in favour of the Italian amendment, but it introduced a concept - that of cultural regions - which Argentina could not accept. If that part of the amendment could be modified, his delegation would support it.

(154) The estimates for paragraphs 157-160 were approved.

(155) Mr. NIELSEN (Denmark) asked the Secretariat to incorporate the Italian proposal in its working plans. It did not affect the budget.

(156) Agreed.

(C) The use of radio and television in cultural programmes (paragraphs 161-164) (Joint project with the Department of Mass Communication)

(157) Mr. BRICHET (France) drew the Commission's attention to the importance of the relations between radio and television organizations, on the one hand, and the public on the other. He proposed that the estimate in paragraph 164 be maintained, despite the opinion expressed by the Advisory Committee on Programme and Budget.

(158) His proposal was adopted.

(D) A study of traditional cultures in communities of South East Asia undergoing rapid technological changes (paragraphs 165-171)

(159) Adopted without discussion.

Project 4.32: Education through the arts and the crafts (paragraphs 172-184)

(A) Production of study materials and teaching aids (paragraphs 177 and 178)

(160) Mr. BRICHET (France) drew the Commission's attention to the need for close contact between the Departments of Cultural Activities and Education in carrying out the project under discussion.

(161) Sir Charles WEBSTER (United Kingdom) on paragraphs 177 and 178, suggested that the study was important but could be improved if carried out through the International Society for Education through Art, which had at one time received a subvention from Unesco, and ought still to receive one.

(162) Mr. THOMAS (Director, Department of Cultural Activities) stated that the Secretariat shared the view of the United Kingdom delegate. That was why contracts had been chosen instead of subventions for the production of study materials and teaching aids. He assured the French delegate that close contact existed between his Department and other Unesco services for the execution of joint projects.

(163) Miss NEFFA (Lebanon) did not think that the publication of the proposed technical handbook would be a sure method of achieving the end desired, namely the development of education through the arts and the crafts.
(164) It was understandable that, in science teaching, for example, a technical manual and materials for practical work should be needed, in art teaching, however, it was doubtful whether such a text would be widely used.
(165) She realized that she was dealing with a rather delicate subject, but wished to draw the attention of the Commission to it and to state that, while she certainly approved the intentions underlying the

project, she was not very pleased with the work plans as they stood.

(166) Paragraphs 172-178 were adopted.

(B) Promotion of adult education through the arts (paragraphs 179-181)

(167) The Indian delegation having agreed to submit its draft resolution to the Secretariat in the form of a directive, the section was adopted without discussion.

(C) Technical aid to Member States (paragraphs 182-184)

(168) Adopted without discussion.

The meeting rose at 7 p. m.

# TWENTY - FIFTH MEETING

*2 December 1954 at 9.30 p.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)
*later* Mr. HOPE (Rapporteur) (United States of America)

(1) The CHAIRMAN, noting that there was no quorum, suspended the meeting for ten minutes.
(2) When the meeting had reassembled, the Chairman suggested that, as he would be unable to remain for the whole meeting, and as the three Vice-Chairmen were detained elsewhere, the Rapporteur be invited, in accordance with the rules, to preside over the debates.

(3) Agreed.

(Mr. Hope, Rapporteur, took the Chair.)

**ITEM 8.4.4 OF REVISED AGENDA : CULTURAL ACTIVITIES (continued)**

Project 4.33: Contribution to fundamental education (paragraphs 186-201)

(4) Mr. MUJEEB (India) observed that, if the project for the planning and production of reading material for new literates were adopted, it would mean immediate and enormous benefit for millions of people. With regard to paragraphs 189 and 190, the Indian delegation was of opinion that it would be better if, in the first place, the Member States and National Commissions concerned were asked to collect, study, and evaluate all the material that already existed, and examine the methods used in the production of literature for new literates and for its assessment through field workers. Then Unesco should organize regional conferences, with its experts as conveners, to make a study of the material and the reports of Member States, and to compare methods and experience. The findings of those conferences would serve as a basis for further action by Member States, in consultation and collaboration with Unesco.
(5) Referring to paragraphs 191-199, the delegate of India thought that the proposal that Unesco should prepare a set of 24 books to form a nucleus of a series of reading material for new literates was most attractive. Experience in India, however, suggested that it would be advisable to have a larger number of books, of 16 pages on an average, and the Director-General might consider whether it would be possible to have 50 books instead of 24 within the proposed budget. The books should be written in the language of the people for whom they were meant or in a language whose idiom was not too different.
(6) With regard to the distribution of the books referred to in paragraph 197, it would be better if Unesco specified the subjects, the number and type of illustrations for each book and the quality of the printing, and offered to pay a reasonable percentage of the cost to the Member States concerned. Arrangements along those lines had been made by the Delhi public library in India for the 25 booklets produced by it.
(7) In preparing reading material for new literates, the cost of production was of great importance. The Indian delegation therefore especially welcomed the proposal of assistance to Member States in printing and distribution facilities. Further, it would suggest that the offer of prizes made in paragraph 197 should be made both to individuals and to organizations engaged in literacy work, and that each organization should be asked, when it sent in its scripts, to name the person or persons to whom the preparation of the scripts was entrusted and to whom it would give the travelling fellowship or prize if its scripts were considered the best.

(8) Mr. CHARYAVIBHAJ (Thailand) had read the project with great interest and was sure that it would be very much appreciated by the Member States concerned. In his delegation's view, the chief problem was the choice of experts, and the greatest care should be taken in selecting them.
(9) With regard to choice of subjects, he suggested the addition of very elementary textbooks on such subjects as farming, poultry-keeping etc., since

new literates would first be interested in their vocations and the things which they saw around them. Immediate interest would lead to further interest in scientific and cultural subjects.
(10) In conclusion, the delegate of Thailand agreed with the delegate of India that the Member States and National Commissions concerned should be consulted before any books were produced. Subject to those comments, he moved approval of the budget estimates in paragraph 201.

(11) Mr. HUZAYIN (Egypt) strongly supported the project and the motion to approve the budget estimates. Adding to the points already raised by the delegates of India and Thailand, he pointed out that, although the project was a new one for Unesco, it was an old one for certain countries which had already acquired a great deal of experience in the field of fundamental education. Unesco's Arab States Fundamental Education Centre (ASFEC) existed in Egypt, but there were also a great many national projects of the same kind. Strenuous efforts were being made, for example, to produce primers. He therefore suggested that Unesco make full use of the experience acquired by those working in the field. A number of non-governmental organizations would certainly wish to participate in the project.
(12) As regarded experts, it was essential to have experts who spoke the language of the people concerned and had the cultural background of that language.
(13) With regard to choice of subjects, they should be in conformity with the cultural pattern of the area.
(14) In conclusion, the delegate of Egypt considered the project to be worthy of full support and hoped that it would be approved by the General Conference unanimously.

(15) Mr. WARD (United Kingdom) had two points to raise. Firstly, he hoped that in the proposed Unesco experiment, which would have advantages over most national projects, some study would be made of the layout of books, types of pictures and forms of print. Secondly, among the excellent subjects listed, he hoped that some literature, other than purely utilitarian literature, would be included. People should be taught to read for their amusement. In his own experience, a story of tribal history had sold far better than the usual didactic material. New literates might be introduced, for example, to Plato's Republic.

(16) Mr. BRICHET (France) stated that his delegation approved the principle embodied in resolution 4.33 and would vote for the proposed financial provisions.
(17) He felt doubtful, however, about the usefulness of the procedure proposed in paragraph 189. He urged that National Commissions and the administrative authorities of the States concerned be more closely associated with Unesco's activities in that field.

(18) Mr. AL-HILLI (Iraq) explained that he had worked on the project with Unesco experts in 1951, when the Organization had carried out a three months' experimental project in Egypt and the Dujaila project in Iraq, lasting two months and twenty days. On the basis of his experience, he wished to draw attention to two main points. Firstly new literates needed primers; secondly, they needed follow-up materials, including very short books dealing with various subjects. He hoped that full use would be made of the material resulting from the 1951 experiments. Iraq would be very happy to transmit to Unesco the books already produced.

(19) Mr. BERGSTRAESSER (German Federal Republic) asked the Secretariat what was meant in paragraph 193 by "world's classics". Secondly, he wondered if the Secretariat felt that, after only one year of investigation by experts, the field would have been sufficiently explored for the project to be launched.

(20) Mr. BARDALES (Honduras) emphasized the importance of careful preparation of texts designed for new literates. The persisting lack of suitable texts for that purpose had already caused some literacy campaigns to fail. He recommended that the experiments and achievements of the Education Section of the Organization of American States be taken into account. The Public Library which that Organization had established included three sections: science, arts and civics. Unesco should not go ahead with that part of its programme without having first examined and profited by experience gained in American countries.

(21) Mr. ROMANO MUNOZ (Mexico) had been specially instructed by his Government to say how interested it was in the activities referred to in paragraph 189. Mexico was carrying out intense literacy campaigns of its own. All classes of society, including the ordinary people and even soldiers, were taking part in them. Such campaigns were suffering from a lack of suitable reading material. The Literacy Commission, which was an official government organ, was responsible for the study of that important problem. Teachers were afraid that classical texts would be chosen for the purpose, experience had taught them that the reading of selections from the classics did not produce the results desired. He recommended that Unesco send an expert to Mexico to study that problem and the experiments in teaching people to read and write that were being conducted there.

(22) Mr. THOMAS (Director, Department of Cultural Activities) said that the Secretariat would do its best to carry out the suggestions made during the debate.
(23) He noted that there were three suggestions on which there appeared to be general agreement:

1. Greater account should be taken of the experience gained by Member States and intergovernmental organizations and the results which they had obtained.
2. The contents of books and pamphlets distributed by Unesco should be based on suggestions made by the States concerned, instead of being imposed from outside.
3. The Secretariat should work in close cooperation with National Commissions and national or local administrative authorities.

(24) Mr. Thomas explained that the Secretariat, realizing that the work plans should be kept fairly flexible, had already considered the possibility of basing its activities on those three principles.
(25) In reply to the question raised by the delegate of the German Federal Republic, Mr. Thomas suggested that the quotation marks before and after "world's classics" might be deleted, thus making the text clearer.
(26) He regretted that he was unable to reply to the remark of the Mexican delegate concerning translations of classical works in his country, as the Secretariat had not as yet acquired much experience in that field.

(27) Mr. BRANCA (Italy) wished to be assured that consideration would be given to the proposal made by his delegation in document 8C/DR/83.
(28) He was somewhat concerned about the word "adaptation", which suggested to him a summary in a few pages. He wondered whether that method would convey the author's thought faithfully and said that he would prefer "adapted presentation" or a similar expression.

(29) Mr. THOMAS (Director, Department of Cultural Activities) assured the delegate of Italy that the Secretariat would take the suggestions made in document 8C/DR/83 into consideration. He observed that some of them concerned projects which would be discussed later.
(30) In connexion with the word "adaptation", there was no cause for misgiving, for, in the Secretariat's view, that word had no dishonest implications; it had entered into current speech and was used by the best contemporary authors.

(31) Miss BOLLO (Uruguay) thoroughly agreed with what the Italian delegate had said. The word "adaptation" of the world's classics filled her with horror. The consequences of that process would be disastrous. Such adaptations were causing great harm in the theatre, the cinema and in literature. They gave a wretched impression of the great authors who had been lights of the world in their several generations. It was as if the reader were directed down paths unlit by the true originality and greatness of the authors.

(32) Mr. VILLALON GALDAMES (Chile) agreed with the Mexican delegate. He urged that the words "subject to revision in the light of information to be gathered in 1955", be given all due importance and, to that end, asked the Secretariat to consult the Organization of American States. He was dissatisfied with the subjects proposed in paragraphs 193-196 as material for new literates. He recommended that such texts should bear on the everyday surroundings of readers. For example health was mentioned, but there was no reference to nutrition or domestic and family life. He would prefer such subjects to be dealt with first, and later there would be time to pass on to the classics.

(33) The motion of the delegate of Thailand, recommending approval of the budget estimates in paragraph 201, was seconded by several delegations.

Project 4.34: Development of libraries (paragraphs 203-218)

(34) Mr. VILLALON GALDAMES (Chile) proposed that the paragraphs under resolution 4.34 be studied separately when new questions affecting different parts or areas of the world were discussed. Further, some speakers might wish to touch upon more than one of those items and, on that account, they should be allowed to speak for 5 minutes rather than 3.

(35) Mr. SUZUKI (Japan) asked whether a Japanese librarian or educator could be included amongst those taking part in the Seminar on Public Library Development in Asia.

(36) Mr. THOMAS (Director, Department of Cultural Activities) replied that the Secretariat would take the wish expressed by the Japanese delegate into consideration.

(37) Paragraphs 203-218 were approved.

Pilot project for the development of public libraries in Africa (paragraphs 219-223)

(38) Mr. MASSAQUOI (Liberia) recalled that Miss Summers, of Unesco's Libraries Division, had visited West Africa early in 1954. As a result of her visit, many countries of the area had expressed interest in having the project established in their territory.
(39) As Mr. Massaquoi had already pointed out at a meeting of the Executive Board, the sum of $15,000 was inadequate for a pilot project designed to meet the needs of the vast area South of the Sahara. Many of the countries concerned had expressed a desire to have travelling library vans to serve rural areas. He therefore proposed that the budget for the project be increased in order to enable a real library network to be established, covering the whole area South of the Sahara.

(40) Mr. BRICHET (France) announced that France would forgo Unesco aid in that sphere, in order that the needs of Liberia might be met.

(41) Mr. WIDDOWSON (Union of South Africa) was in favour of the project, but considered that, before undertaking it, the agreement of the authorities concerned should be obtained. Otherwise, plans would be unrealistic.

(42) Mr. HUZAYIN (Egypt) observed that the project not only had intrinsic worth, but would also be of value to Unesco in bringing it nearer to the great multitudes in Africa. He agreed with the delegate of Liberia that the budget estimate was inadequate, especially if travelling library vans and special equipment were to be used. He hoped that the sum would be increased to a figure which would guarantee the success of the project.

(43) Mr. WARD (United Kingdom) wished that his delegation could emulate the French delegation's sacrifice, but that was unfortunately impossible. However, he was sure that, wherever the project was

held, people would come to see it from other countries in the region, so that it would have widespread effects.

(44) Referring to the remark by the delegate of the Union of South Africa, Mr. MASSAQUOI (Liberia) stated that Miss Summers had negotiated with the respective governments.

(45) Paragraphs 219-223 were approved.

Regional Conference on the Exchange of Publications in Latin America (paragraphs 224-229)

(46) Mr. VILLALON GALDAMES (Chile) believed that everybody considered the regional conference to be very important. It would not be possible, however, to organize a suitable exchange of publications without taking account of past and present production. He referred to the Unesco Clearing House for Publications, which dealt with that question. In his view, such exchanges should be perfected at the international level before any attempt was made to improve national services. International schemes would be hindered and retarded if Unesco waited until national exchanges had gained momentum.

(47) Mr. ANGELL (United States of America) observed that, probably as a result of an oversight, no mention was made of the Organization of American States, which should certainly be asked to participate in the planning.

(48) Mr. ROMANO MUNOZ (Mexico) informed the Commission that he was a member of the Department of Cultural Activities of the Organization of American States and that he would be the Rapporteur of the Congress on the Exchange of Publications to be held the following March; in that capacity, he asked if the project in Unesco's programme was to be associated with that of OAS. He recommended that the work should be divided between Unesco and OAS.

(49) Mr. THOMAS (Director, Department of Cultural Activities) said that the Secretariat would take account of the comments made by the delegate of Chile.
(50) With regard to the point raised by the delegates of the United States of America and Mexico, he explained that it was an omission on the part of the Secretariat, which had always intended to co-operate with the Organization of American States in organizing the conference concerned.

(51) Paragraphs 224-229 were unanimously approved.

Development of associated projects (paragraphs 230-243)

(52) Unanimously approved.

Education for librarianship in the Arab States (paragraphs 244-251)

(53) Mr. HUZAYIN (Egypt) thought that, in the remodelled programme designed to meet the needs of Member States, the project under consideration was most timely and appropriate. Libraries played an important part in linking education with culture and the project would be very helpful in promoting the parallel development of education and culture.

(54) Paragraphs 244-251 were unanimously approved.

Paragraphs 252-267

(55) Approved without comment.

Mobile microfilming unit (paragraphs 268-277)

(56) Mr. VILLALON GALDAMES (Chile) congratulated the Secretariat upon the magnificent way in which that section of the programme had been prepared. In Latin American countries, microfilms had first been used in trade and industry, and later in libraries. There was wide scope for action. The rich store of collections held by many nations should be assembled. As far as Chile was concerned, it was imperative to microfilm the works of the great writer José Toribio Medina. It was not easy to estimate what influence the new technique would have on the life of peoples and governments. It would bring the cultural heritage, which had so far been accessible only to the privileged few, within range of all those wishing to study it.

(57) Mr. BRANCA (Italy) pointed out that his country had always considered microfilming as a very important activity which ought to be developed.
(58) He asked the Secretariat to study the possibility of forming two or three mobile microfilming units.
(59) Furthermore, he thought that those archives and libraries most exposed to damage, should be the first to benefit from the new process.

(60) Paragraphs 268-277 were approved.

Project 4.35: Development of museums (paragraphs 278-317)

(61) Mr. CHEVALIER (Secretary of the Commission) read out the Advisory Committee's recommendation that the project be placed in Category I.

(62) Mr. LORENTZ (Poland) stated that his country was very much in favour of all projects designed to encourage the dissemination of culture through museums and exhibitions, and was prepared to take an active part in carrying them out. He pointed out how necessary it was to make museums accessible to all - workmen and country folk, as well as intellectuals.

(63) Miss NEFFA (Lebanon) hoped that the projects included in paragraphs 287-301 would be approved. Lebanon had taken part in the courses organized in Athens on the educational rôle of museums; it was an idea which was gradually penetrating Lebanese schools. She recommended the conducting of a campaign on the subject of museums and school education. The best campaign would certainly be one for the proper organization of museums. She was speaking from personal experience, for Unesco

had recently organized the Damascus Museum and, comparing it with other museums in the country, she had been struck by its superiority. The question was one of great importance. The speaker then praised the pilot project for an educational museum, at present being carried out at Patzcuaro, and expressed the hope that regional seminars, similar to the one to be held in Patzcuaro in 1956, would be arranged subsequently in other parts of the world, such as the Middle East.

(64) Mr. BRICHET (France) drew attention to the importance of the campaign for museums.
(65) Recalling that, during the Middle Ages, monuments and works of art had been the "poor man's Bible", he expressed the opinion that, in underdeveloped countries at the present time, museums could become the best means of furthering education and culture.
(66) The number of visitors to museums increased daily, but they were a mere handful compared to the thousands of people who might benefit from them, or to the huge crowds drawn by sporting and other events.
(67) The delegate of France considered that action was imperative, and that it was for Unesco to take the lead. He emphasized the fact that museums should be accessible to all, irrespective of social background.

(68) Mr. ROMANO MUNOZ (Mexico) spoke of the pilot project for an educational museum at CREFAL, where a Unesco expert was already working. Although he believed that the project would be a success, he thought that, from the budgetary and administrative points of view, it should be kept separate from the Fundamental Education Centre at Patzcuaro.

(69) Mr. VILLALON GALDAMES (Chile) agreed with the Mexican delegate's point of view. His country thought the pilot project for an educational museum important, because Unesco techniques were used in dealing with schools; moreover, Mexico was a suitable place for the experiment, since its people were already co-operating in the main Patzcuaro project, which was of such great interest to Latin America; lastly, use could be made of experience gained by CREFAL, which in turn could benefit from the new project.

(70) Mr. BRANCA (Italy) agreed with the remarks made by the delegates of France and Mexico.
(71) He asked if a date was to be fixed for International Museums Day. In his view, it might be wisest to let each government decide upon a date for its own country, as it could thus be made to coincide with a national holiday.
(72) Lastly, he thought it desirable that the International Association of Art Critics and the International Association of the Visual Arts should co-operate in international exchanges of exhibitions.

(73) Mr. THOMAS (Director, Department of Cultural Activities) stated that no decision had been taken about a date for holding an International Museums Day. The International Council of Museums had suggested that it might be held on the tenth anniversary of the first session of the General Conference of Unesco.
(74) Mr. Thomas welcomed the Italian delegate's suggestion with regard to the help which certain associations might give in international exchanges of exhibitions.

(75) In reply to a question from Mr. ANGELL (United States of America), the CHAIRMAN pointed out that the comments of the Advisory Committee on Programme and Budget were limited to Section E. It had not commented on the other sections.

(76) Mr. OTERO MENDOZA (Uruguay) commented on the draft resolution presented by his delegation (document 8C/DR/46). It would be impossible to develop musuems without borrowing original works possessed by many centres and countries. Reproductions were not enough, and could not constitute a museum's main exhibits. Certain nations were richly endowed with works of art, and an effort should be made to put them to good use. The Executive Board had recommended that the draft resolution be referred to the International Council of Museums; Uruguay, however, wanted it to be included in Unesco's programme. He therefore hoped that the Conference would vote in favour of the resolution and that the Secretariat would include it in the Organization's programme for 1957-58.

(77) Mr. BRICHET (France) thought that the Uruguayan draft resolution was interesting. In his view, however, the proposal raised a difficult technical problem and it would be wise to refer it to the International Council of Museums, as suggested by the Executive Board.

(78) Mr. WARD (United Kingdom) said that, while his delegation felt every sympathy with the Uruguayan proposal, it considered that the General Conference was not qualified to invite the Director-General to select the Arts Centre at Montevideo as the first of such agencies. The United Kingdom delegation therefore seconded the Executive Board's proposal to refer the matter to ICOM.

(79) Mrs. PECSON (Executive Board) said that the Board, in discussing the project, had felt that the question was a technical one which should be referred to a specialized body like ICOM. The Uruguayan member of the Board, Mr. Secco Ellauri, had himself seconded the motion to refer the proposal to ICOM.

(80) It was agreed to refer document 8C/DR/46 to ICOM.

(81) Sections A, B and C (paragraphs 287-303) were approved.

D. Seminar workshop on the building of travelling exhibitions and a mobile museum for South East Asia (paragraphs 304-311)

(82) Mr. NEVINSON (United Kingdom) stated that the project had been very carefully considered by his

National Commission. Although South East Asia was thought to be a suitable site, it was felt that the project needed thinking over. Travelling exhibitions outside Europe had not yet been studied to any great extent; the transport of museum exhibits in hot climates raised problems which required further study. He therefore proposed that the project be rearranged, providing for consultations in 1956 before the mobile museum itself was set up.

(83) Mr. WADIA (India), referring to paragraph 306, stated that his country would prefer the workshop to be located in Delhi, rather than at Chandigarh.

(84) The proposal of the United Kingdom delegation to request the Secretariat to reword section D was seconded by Mr. WIDDOWSON (Union of South Africa).

(85) Mr. THOMAS (Director, Department of Cultural Activities) had noted, among the comments made by the United Kingdom delegate, an allusion to museum objects which might deteriorate if transported to a hot climate.
(86) He explained that the idea was not to create a museum of works of art, but a mobile museum in the form of a lorry with film and radio apparatus. That mobile museum would be used for health education and instruction on the conservation of natural resources in fundamental education campaigns. A three weeks' seminar workshop would be organized for South East Asian experts, in order to teach them how to build up such exhibitions.
(87) In reply to the delegate of India, Mr. Thomas said that the question of museums in India would be studied under another heading.

(88) The CHAIRMAN called for a vote on the proposal of the delegate of the United Kingdom.

(89) The proposal was rejected by 9 votes to 5, with 9 abstentions.

(90) Section D (paragraphs 304-311) was approved.

E. Technical aid to Member States (paragraphs 312-317)

(91) Mr. CHEVALIER (Secretary of the Commission) read out the fourth paragraph of the resolution presented by the Indian delegation in document 8C/DR/17, and observed that the Advisory Committee had not recommended the adoption of the project, which would represent a charge of $48,000 on the budget.

(92) Mr. WADIA (India) announced that the Indian delegation withdrew its proposal in document 8C/DR/17.

(93) The budget estimates in paragraph 317 were approved.

Project 4.41: History of the scientific and cultural history of mankind (paragraphs 318-325)

(94) Mr. LORENTZ (Poland) stated that his country was very interested in the project for the publication of a History of the Scientific and Cultural Developmnent of Mankind.

(95) Mr. BERREDO CARNEIRO (Brazil), speaking, not for the Brazilian delegation, but as Chairman of the International Commission for the preparation of a History of the Scientific and Cultural Development of Mankind, requested the Chairman to make an exception to the procedure adopted for the debates, and to allow him ten minutes to present his report.

(96) Mr. FRANCOIS (France) thought it impossible to open a discussion in the Commission on such a vast subject and one involving such a large sum of money.
(97) He proposed the establishment of a working party, under the chairmanship of Professor Carneiro, which would meet the following morning and go into the matter thoroughly.

(98) The CHAIRMAN took a vote on the proposal of the delegate of France.

(99) Adopted.

(100) In reply to a question from Mr. BERREDO CARNEIRO (Brazil), the CHAIRMAN said that he would ask the Secretariat to prepare a list of delegates to form the Working Party on the History of the Scientific and Cultural Development of Mankind.

Project 4.42: Study of cultural relations (paragraphs 327-340)

(101) Miss NEFFA (Lebanon) observed that museum activities usually interested only certain groups, but that the project under consideration was of interest to everyone, including the general public. The Arab States maintained important cultural and other relations with the peoples of Latin America, and she therefore requested that an invitation be addressed in good time to the Arab States, so that they might take part in the international discussion referred to in paragraph 335.

(102) Mr. SUZUKI (Japan) read a draft resolution (document 8C/DR/31) presented by his delegation and proposing an addition to paragraph 327.
(103) In support of the draft resolution, he explained that the Japanese Academy had started work on reproducing historical documents relating not only to Japan but also to other Asian countries, its aim being to retrace the history of relations between Asia and Europe. He hoped that Unesco would encourage that research by giving financial assistance.
(104) The Advisory Committee had recommended that the draft resolution be taken into consideration when the programme for 1957-58 was being prepared. The Japanese delegate wondered, however, if it would not be possible for the Secretariat to submit the question, as the Executive Board had recommended, to the International Council for Philosophy and Humanistic Studies, with a request that it prepare a work plan.

(105) Mrs. PECSON (Executive Board) announced that the Board had already recommended that the Japanese proposal be referred to the International Council for Philosophy and Humanistic Studies, with a view to the submission of a report to the General Conference at its ninth session.

(106) Mr. ROMANO MUNOZ (Mexico) stated that his delegation was very interested in the project concerning manuscripts in Europe relating to the history of Latin America (Section C). As Mexico had once been a colony, many extremely valuable documents relating to its history were to be found in Europe. The "Archivo de Indias de España" (Archives of the Spanish Indies) had given valuable help in that field. However, there were many historical documents of interest to Mexico in Austria, France and, especially, in the Vatican. In that connexion, Mexico requested Unesco to give it appropriate assistance.

(107) Mr. SLONIMSKI (Poland) drew attention to the draft resolution presented by the Polish delegation in document 8C/DR/63 and connected with resolution 4.42. The Polish proposal was that Unesco issue a publication to commemorate the centenary of the death of the great Polish poet, Adam Mickiewicz, in 1855. The Advisory Committee on Programme and Budget had recommended, instead of the issuing of a book, the publication of a series of articles in the Unesco Courier. The Polish delegation considered that that would not be an adequate substitute for its own proposal.

(108) Mr. THOMAS (Director, Department of Cultural Activities) recalled that the Advisory Committee had recommended that, in order to meet the wishes of the Polish delegation, articles on Mickiewicz should be published in the Unesco Courier.
(109) He believed that he was right in assuming that the delegate of Poland was asking for a work to be published, and pointed out that such a project had budgetary implications.

(110) Mr. BERREDO CARNEIRO (Brazil) shared the views of the Polish delegation. It was desirable to pay tribute to a man so representative of Eastern European culture and what had been done for Balzac and Goethe should also be done for the Polish poet.
(111) He wondered whether a publisher might issue the work at his own expense, under Unesco's auspices.

(112) Mr. BRANCA (Italy) emphasized that, in the field of international relations, emphasis should be laid on the fact that it was right to do homage to a great poet who had come into contact with many foreign countries and to whom Italy, in particular, always felt grateful.
(113) If the Secretariat did not think it could undertake the publication of a volume, as it had done for other writers, would it not be possible to request the Revue de Littérature Comparée to devote a special number to Mickiewicz, as it had done for Balzac? There would thus be no budgetary implications for Unesco.

(114) Mr. WIDDOWSON (Union of South Africa) felt that it would be placing an unfair onus on the Secretariat if the proposal were merely referred to it without instructions. The Commission ought either to reject the proposal, or vote the necessary money for it.

(115) Mr. FRANCOIS (France) recalled that, while Mickiewicz had had relations with Italy, he had lived in France. A tribute to him would be a tribute not only to a Pole, but also to a European and to one who had always fought for freedom.

(116) Mr. NAVRATIL (Czechoslovakia) supported the Polish delegation's proposal. He considered that Mickiewicz symbolized international friendship, based on intellectual understanding.

(117) Mr. SOLODOVNIKOV (Union of Soviet Socialist Republics) also supporting the Polish delegation's proposal, requested that a vote be taken on it, for, if the Commission approved it, the Director-General would be responsible for finding the funds necessary for publishing the volume.

(118) Mr. THOMAS (Director, Department of Cultural Activities) felt somewhat overcome by all the different suggestions made: the Advisory Committee recommended the publication of articles in the Courier; the delegate of Poland was asking for a work to be published and that would entail expenditure; the delegate of Brazil had recommended that a publisher be asked to issue the work at his own expense, and that might not be feasible; the delegate of Italy had suggested bringing out a special number of the Revue de Littérature Comparée, and that solution would probably not raise many difficulties.
(119) Mr. Thomas was prepared to study any of those solutions, but he needed specific instructions to do so.

(120) The CHAIRMAN asked the delegate of Poland whether he would be willing to restate his proposal, asking the Director-General to investigate the possibility of publishing such a book, rather than giving him definite instructions to publish it.

(121) Mr. THOMAS (Director, Department of Cultural Activities) stated that, on the basis of present standards, the Secretariat estimated the cost of publishing such a volume at $6,420.

(122) Mr. LORENTZ (Poland) maintained his delegation's proposal and requested that the Commission vote on it.

(123) Mr. BRANCA (Italy) recalled that the Commission had decided to increase the subvention granted to the International Council for Philosophy and Humanistic Studies to $10,000. He wondered whether part of that sum could not be set aside for the publication of a work on Mickiewicz.

(124) Mr. WARD (United Kingdom) thought that the Commission was faced with an extremely difficult choice. It had gone through the programme chapters, adding items to the budget. The following

week, the Commission would have a painful meeting, when it would have to cut out a great many of the items which it had put in. Therefore, while very much in sympathy with the Polish proposal, and hoping that its attitude would not be misinterpreted, the United Kingdom delegation would very reluctantly vote against the project and would support the suggestion that a series of articles on Mickiewicz be published in the Unesco Courier.

(125) Mr. BERREDO CARNEIRO (Brazil) considered that the solution suggested by the Advisory Committee on Programme and Budget was inacceptable.
(126) He proposed that the Director-General be invited:

(1) to study the possibility of publishing a volume at Unesco's expense;

(2) if the necessary funds could not be found, to ask the Revue de Littérature Comparée to devote a special number to Mickiewicz.

(127) Mr. TAMAS (Hungary) moved approval of the original Polish draft resolution.

(128) He considered not only that it was Unesco's duty to pay tribute to the Polish poet, but that it would be an honour for Unesco to have done so.

(129) Mr. LINKSON (Australia) moved, as an amendment to the Polish motion, that the possibility of having the book published by a commercial publisher under Unesco's sponsorship be explored.

(130) The motion was seconded by Mr. PANNETON (Canada).

(131) The Australian amendment was rejected by 14 votes to 12, with 5 abstentions.

(132) The Polish motion, as set out in document 8C/DR/64, was adopted by 20 votes to 3, with 8 abstentions.

(133) Project 4.42 was approved.

The meeting rose at 12.30 a.m.

# TWENTY-SIXTH MEETING

*3 December 1954 at 10 a.m.*

*Chairman:* Mr. THA HLA (Union of Burma)

**ITEM 8.4.5 OF REVISED AGENDA: MASS COMMUNICATION**

(1) Mr. DESJARDINS (Department of Mass Communication) stated that in the light of the different projects described in the chapter on Mass Communication the working party had arrived at a definition of the Department's main objectives and had drawn up a scheme which not only corresponded clearly to those objectives but also fitted in exactly with the Director-General's programme.
(2) A close examination of the different projects showed that activities fell into two separate groups:

(a) those under items 5.1 and 5.2, relating to public information and the promotion of international understanding by Member States and Unesco;

(b) those under items 5.3 to 5.6, covering projects relating to assistance to Member States in the development of Mass Communication services for educational, scientific and cultural uses.

(3) In carrying out the activities in the first group, the Department employed the following methods:

(a) co-operation with the press and press agencies, both international and national, for whom the Department prepared press releases, newsletters, photo stories, articles, leaflets and folders;

(b) co-operation with the radio: the Department distributed the Unesco World Review, weekly to over 1,600 radio organizations in nearly 120 countries and territories; it made recordings of talks, commentaries and interviews; it arranged for the production of documentary and cultural broadcasts; and it invited guest producers from radio organizations in Member States to make a series of broadcasts;

(c) production of visual aids, consisting of newsreel items, "shorts", and filmstrips, and organization of travelling exhibitions for circulation among the various States in turn.

(4) All the projects under items 5.1 and 5.2 represented services rendered by the Secretariat, not only to Unesco, but to the family of nations as a whole.
(5) Turning next to the second category, Mr. Desjardins described the activities concerned in detail.
(6) With regard to item 5.3 (Free Flow of Information), the methods employed by the Secretariat were threefold:

(1) Encouragement of Member States to conclude agreements and make administrative arrangements, and formulation of recommendations with a view to the establishment of international standards.

(2) Co-operation with the United Nations, the Specialized Agencies and appropriate international organizations, in order to encourage the adoption of practical measures for the reduction of obstacles

to the free flow of ideas from country to country.
(3) Enlistment of professional and governmental support by the supply of publications designed to encourage them to take remedial action.
(7) Referring to item 5.4 Mr. Desjardins explained that the basic task of the Clearing House was to collect and disseminate information on mass communication questions and to comply with requests from governments, national and international organizations, professional organizations and specialists.
(8) The Clearing House issued roneotyped copies of a bulletin for those engaged in mass communication work, and kept a register of specialists, through which experts could be recruited to undertake direct aid missions to Member States.
(9) Once collected, such information enabled the Secretariat to reply to requests from the Economic and Social Council and the other Specialized Agencies of the United Nations.
(10) The Economic and Social Council of the United Nations had moreover recommended, at its seventeenth session, that Unesco continue with its work of research and documentation.
(11) The projects included under item 5.5 were intended to stimulate exploration of new fields of knowledge, which might help Member States in their use of the different means of communication for fundamental and workers' education. Practical experiments, conducted in co-operation with a Member State and on its territory, were not only a help to that country, but also provided an opportunity to try out new methods which might benefit many other countries.
(12) The main purpose of item 5.6 was to give direct aid to Member States, at their request, in the form of expert missions and regional seminars organized with a view to speeding up the development of communication services in the beneficiary countries.
(13) Mr. Desjardins went on to emphasize the fact that the Economic and Social Council and the General Assembly of the United Nations had asked Unesco to endeavour to increase its aid to governments in the development of their mass communication services, and in particular to send them experts and help them to train specialists. The number of requests might accordingly be expected to increase.
(14) Mr. Desjardins reminded the Commission that item 5.7, "Voluntary International Assistance", had been included in the first group, and added that that item covered the various activities connected with the Unesco Coupon Scheme, which he explained in the following terms.
(15) The coupons were divided into two separate categories: in the first place, there were coupons on sale for books, films and scientific materials and also travel coupons. Thirty-seven Member States were at present taking part in the scheme, and, since 1948, Unesco had issued coupons to the value of over $6,000,000; the Organization had thereby been able to cover administrative and miscellaneous expenses, including salaries. The second group consisted of the gift coupons, which had considerable information and propaganda value, and gave large numbers of people in the different Member States an opportunity to take an active part in Unesco's programme, as well as in those of the United Nations and other Specialized Agencies.
(16) The material results obtained from the Gift Coupon Scheme were encouraging, and the number of donors was steadily increasing.

(17) Mr. DE SALIS (Chairman of the Working Party on Mass Communication) recalled that the Working Party had been instructed to examine the administrative pattern of the Department of Mass Communication, but did not have to take decisions on programme questions.
(18) As the Department's two main duties were to spread knowledge of Unesco's aims and activities, and to promote the development of the means of communication, the Working Party had unanimously agreed that each of those functions should have a corresponding section within the Department.
(19) The Department would thus be headed by a Director, with two assistant directors, one responsible for the group of activities under items 5.1, 5.2 and 5.7 and the other for those under items 5.3, 5.4, 5.5 and 5.6.
(20) The Working Party had agreed that, in the mass communication budget as a whole, funds should be divided between those two groups of activities in the same proportion as in the previous budget.
(21) The Director-General would be asked to draw up a report on the results of the proposed reorganization for submission to the General Conference at its next session.

(22) On behalf of the Director-General, Mr. DESJARDINS (Department of Mass Communication) expressed his entire agreement with the Working Party's resolution which, save for two abstentions, had been adopted unanimously.

(23) Mr. MAHEU (Assistant Director-General) conveyed to the Chairman of the Working Party, the Director-General's thanks for having studied with such care the problem of the structure of a department whose functions were both difficult and complex.
(24) He stated that the Director-General agreed with the recommendations in the report of the Working Party, which had succeeded in preserving the Department's fundamental unity while at the same time pointing clearly to its dual functions.

Project 5.1: Public information and promotion of international understanding by Member States

Paragraphs 15-20

(25) Mr. MAHEU (Assistant Director-General) drew the Commission's attention to the opinion expressed by the Working Party on Decentralization (document 8C/PRG/25 (rev.) page 4, B.2), to the effect that "the assistance to National Commissions" (paragraphs 19 and 20 under resolution 5.1 A) should "be transferred and added to the work plan for resolution 7.12 ($30,000 for the two years)"
(26) The Director-General was in full agreement with that recommendation. The point was not to eliminate such an important activity but to insert it where it could be most effective.
(27) The Assistant Director-General accordingly proposed that discussion of the item be deferred

until resolution 7.12 came up for study.

(28) Mr. HARDY (United States of America), on a point of order, moved that before starting on the discussion a vote should be taken on the appropriate section of the recommendations of the Working Party on Decentralization.

(29) The proposal, duly seconded, was adopted.

(30) The CHAIRMAN accordingly asked for a vote on Section IV B. (2) of document 8C/PRG/25 (rev.).

(31) The paragraph was adopted by 36 votes to nil with 6 abstentions.

(32) Mr. HARDY (United States of America), referring to resolution 5.1, said that the extent to which Member States could co-operate with Unesco by facilitating and encouraging the use of mass communication depended greatly on the kind of information produced by Unesco. Paragraphs 15-20 placed appropriate emphasis on the importance of Unesco's functional news reporting services and left it to the discretion of Member States to transmit news received to their own mass communication services. The nature and objectivity of reporting would depend on the degree to which Member States could translate news and information of a highly technical nature into the common language of the people for whom it was intended.

(33) Mr. FAWZI (Egypt) hoped that it would be possible to arrange the future programme so that project 5.7 would follow immediately after projects 5.1 and 5.2, since under the new structure the three activities would be controlled by the same assistant director.

(34) Mr. MAHEU (Assistant Director-General) said that the Secretariat would take note of the Egyptian delegate's suggestion.

(35) Mr. SHAHANE (India) was in general agreement with the report of the Working Party on the Administrative Structure of the Department of Mass Communication, but said that the major part of its output was in a language incomprehensible to the masses. In India, for example, Hindi was the only language of about one hundred million people. Unesco's activities, to be effective, must be made available to the masses and not merely to the élite. He hoped that the Director-General and the Secretariat would bear his admonition in mind.

(36) Mr. BRANCA (Italy) disliked the wording of paragraph 14, because it gave the impression that the principal aim of weaving together "information about the Organization's activities and information on educational, scientific and cultural matters in broad terms" was to give publicity to the work of the Department of Mass Communication itself.
(37) It was reasonable to expect the Department to serve Unesco's aims more directly. It should spread knowledge of works of great cultural value and of great scientific discoveries. Shakespeare, Dante and Cervantes would speak better than any radio expert.

(38) Mr. IBANEZ GOMEZ (Chile) considered that information about Unesco's activities should be adapted to local conditions in the different countries; he therefore suggested that the task be entrusted to the respective National Commissions.

National manifestations in support of international understanding (Sections B and C - paragraphs 21-24)

(39) Mr. HACQUAERT (Belgium), speaking on behalf of the Belgian National Commission, suggested that, in organizing public meetings and debates designed to further international understanding, Member States might more often call upon those of their own nationals who were former Unesco fellowship holders, as they might have a valuable contribution to make.
(40) With regard to reports on Member States by Unesco writers (paragraph 23), Mr. Hacquaert thought that they might also be distributed to National Commissions, which were often in a position, by virtue of their press contacts (as was the case in Belgium), to give them wider distribution.

(41) Mr. SHAHANE (India) proposed that the Department of Mass Communication should endeavour through the National Commissions to obtain the services of writers and broadcasters from different countries in order to produce material for use in disseminating information about Unesco. India was well equipped to use any films and exhibitions that Unesco might provide and, indeed, ranked second in world film production.

(42) Mr. RAADI (Iran) was in favour of leaving it to each country to decide how it could best contribute to promoting international understanding, by drawing on the resources of its own history and literature.
(43) In Iran, the National Commission and the United Nations Committee were about to form a working party, whose task would be to select outstanding themes which could be traced back thousands of years and might serve the cause of international understanding.
(44) The delegate of Iran hoped that, when the time came, the Secretariat would help in that undertaking.

(45) Mr. SUZUKI (Japan) thought it important that Unesco, in sending the National Commissions publications, films and exhibition material to assist them in organizing national manifestations, should take the special conditions and needs of each Member State into account.

(46) Mr. FAWZI (Egypt) pointed out to the Secretariat that, if the National Commissions were chosen as the principal liaison agencies, the result might be to restrict the scope of possible contacts with a country considerably.
(47) To take Egypt as an example, where the National Commission's headquarters were in Cairo, a big international, intellectual centre such as Alexandria was almost completely cut off from manifestations which might spread knowledge of the aims and activities of Unesco.

(48) Mr. MAHEU (Assistant Director-General) assured the delegates who had spoken that the Secretariat had carefully noted their suggestions and recommendations and would do its best to put them into practice.
(49) Referring especially to the statement of the Egyptian delegate, Mr. Maheu pointed out that most of the National Commissions were administrative bodies, centralized and often understaffed. It was undesirable for the Secretariat to feel obliged to co-operate too strictly and exclusively with National Commissions in the work of mass communication, thereby setting up a barrier between Unesco and the many information centres (particularly in the provinces) which were not closely linked with the National Commission.
(50) While not wishing to minimize what a National Commission could do, he did think it desirable to work out a flexible procedure in each country whereby direct contact with information agencies outside the capital would be made possible. The Secretariat would thus have a wider field of action.

(51) Sections B and C (paragraphs 21-24) were approved unanimously.

D. Direct action by Member States (paragraphs 25-28)

(52) Mr. CHEVALIER (Secretary of the Commission) informed the Commission that the Advisory Committee (document 8C/BUD/1, page 17) had recommended a reduction of appropriations under that head to $10,000 for the two years and the placing of the entire project in Category 3.

(53) Mr. HACQUAERT (Belgium) drew the attention of Member States represented on the Commission to a Belgian scheme which had proved inexpensive and most effective. He referred to the production of filmstrips from exhibition material supplied by Unesco, which had provided means of reaching hundreds of schools whose pupils were themselves unable to visit the exhibitions.

(54) Mr. ESTELRICH (Spain) observed that, if Unesco's propaganda were to be effective, simple and economical, it should take advantage of the closest possible contacts with Member States and the maximum strengthening of National Commissions.
(55) To that end, Spain placed her cultural development centres at Unesco's disposal to co-operate in activities which Unesco, even at great expense and difficulty, could not carry out successfully by itself.

(56) Mr. ESTABLE (Uruguay) was of opinion that the Charter of the United Nations and the Constitution of Unesco should be taught in every country, in the same way as the national constitution.
(57) Unesco had a noble and lifelong, but extremely difficult mission, requiring universal understanding and sympathy; it called for the efforts of many and the selfless devotion of the chosen few, fanatical in the cause of justice, education and culture for the good of all mankind.
(58) Unesco undoubtedly had a contribution to make to the blending of human traditions. It would be a sublime achievement, for it was a sign of the noblest form of patriotism to seek to make the best human traditions the strongest traditions in each country, and to ensure that human ideals took precedence over the ideals of individual nations.
(59) Unesco was an expression of the spirit of the New World, in which all traditions and inclinations were happily blended.

(60) Mr. IBANEZ GOMEZ (Chile) remarked that while the Courier was a very useful publication for Latin American countries, information by radio left something to be desired, he would therefore suggest that some of the material for broadcasting should be sent only to cultural bodies with a broadcasting service.

(61) Mr. HARDY (United States of America) strongly supported the Advisory Committee's recommendation on paragraphs 25-28. The reduced budget of $10,000 for the two years would still be an adequate financial basis for the activity envisaged by Unesco, and even a much larger sum could have little effect on action by Member States when divided between seventy countries.

(62) Mr. DUERING (Sweden) drew attention to the recommendations of the Expert Committee for Education on International Understanding and Co-operation. The Committee had noted that many National Commissions were developing valuable techniques for promoting international understanding and had instanced "Unesco Weeks" in Sweden. The Expert Committee had been divided in opinion concerning the activities referred to in paragraph 27, and the Swedish delegation supported the United States delegation in advocating the adoption of the Advisory Committee's recommendation that the budgetary allocation should be reduced to $10,000 and used solely for clearing house activities, information services and general collaboration with National Commissions. It was for Member States to take the initiative in such activities as celebrating Unesco's tenth birthday.

(63) Dr. MUDALIAR (India) supported the recommendation of the Advisory Committee and the views of the delegates of the United States of America and Sweden.
(64) Unesco would serve a more useful purpose by circulating information on the activities of Member States than by trying to stretch a small budget to activities by the Organization. Member States must use their own methods of propaganda, but they would appreciate information from other Members and from the Secretariat.

(65) A vote was taken on the Advisory Committee's recommendation to reduce the budgetary allocation to $10,000.

(66) The recommendation was unanimously approved.

Project 5.2: Public information and promotion of international understanding by Unesco and documents 8C/DR/19 and 20

(67) Mr. CHEVALIER (Secretary of the Commission) said that the Advisory Committee did not recommend

the adoption of 8C/DR/19, but recommended that 8C/DR/20 be included as a directive to the Director-General for the 1955-56 programme.

(68) Mrs. PECSON (Executive Board) said that the Board had considered 8C/DR/19 in three parts, and made the following recommendations:

1. Central Educational Films Library: there were neither adequate funds available nor sufficient justification to merit approval of the project at the present time.
2. Scripts: not recommended.
3. Survey of Broadcasting: it was not necessary to take action on the resolution, since the proposed activity was already being performed by Unesco and was provided for in the draft programme for 1955-56.

(69) The Board recommended the adoption of 8C/DR/20 because it involved no additional outlay and would give emphasis to Unesco's work.

(70) Dr. MUDALIAR (India), while not supporting document 8C/DR/19, asked if the Director-General could consider the possibility of circulating to all Member States a list of available educational films and how copies could be obtained. He also proposed that the survey of broadcasting should be continued so that the Director-General could provide additional information for the next General Conference.

(71) Mr. DESJARDINS (Department of Mass Communication) assured the delegate of India that the Secretariat would act on his two suggestions. The survey of broadcasting was indeed a permanent activity of the Organization. With regard to resolution 8C/DR/20, the Secretariat would see that due emphasis was given wherever possible.

(72) Dr. MUDALIAR (India) withdrew his two resolutions.

(73) Mr. FRIEDMAN (ORT World Union) proposed an addition to the work plans under resolution 5.2, to read as follows:

"I. Co-operation with non-governmental organizations. Non-governmental organizations having consultative arrangements with Unesco will be requested to invite their national associations, using all the means at their disposal, to give publicity to the principles and achievements of Unesco".

A. Co-operation with the Press (paragraphs 37-42)

(74) Mr. DE SALIS (Chairman of the Working Party on Mass Communication) stated that the Working Party had debated whether the Department of Mass Communication was the right place for the Press Analysis Section, and had unanimously decided that it was.

(75) Mr. TERROU (France) asked the Secretariat if it would guarantee that Unesco would not, in implementing that part of the programme, try to compete with national press agencies, but that, on the contrary, it would co-operate with them whenever possible.

(76) Mr. DESJARDINS (Department of Mass Communication) assured the French delegate that he had no cause for alarm. The Department of Mass Communication had, for over a year, been working in close collaboration with national, and in some cases even with the big international, press agencies.

(77) The aim of the Press Section was to supply information other than that of topical interest to newspapers whose staff writers could not produce enough to fill their general columns.

(78) However, the Department was of course only too glad to provide any national or international agency with topical items when requested to do so.

(79) Section A was unanimously approved.

B. The Unesco Courier (paragraphs 43-46)

(80) Mr. CHEVALIER (Secretary of the Commission) read out the relevant recommendation of the Advisory Committee (document 8C/BUD/1, page 18).

(81) Mr. DE SALIS (Chairman of the Working Party on Mass Communication) explained that the Working Party had been asked to consider two aspects of the question: first, the usefulness and financial situation of the Courier, and second, the possibility of substituting some other publication for it.

(82) The Working Party had been impressed by the pains that had been taken to improve the appearance and the contents of the Courier, and had unanimously recommended that it be continued, despite the considerable financial burden entailed; it based its views on the following considerations:

(a) the merits of the Courier;

(b) the undesirability of bringing the distribution campaign, which was still in progress, to an abrupt end;

(c) the fact that the substitution of any other publication would probably cost just as much.

(83) Mr. BENDER (Netherlands) said that in his country the Courier was considered indispensable. Sales were increasing rapidly and it was used for language teaching in secondary schools. He was, however, shocked by the high cost and asked how many copies were printed annually. He heartily supported the publication and hoped that it would be continued, but urged that efforts should be made to reduce the cost.

(84) Mr. DESJARDINS (Department of Mass Communication) said that the circulation was now over 25,000, details of which would be found in document 8C/PRG/18.

(85) Mr. FORSYTH (New Zealand) was in agreement with the delegate of the Netherlands. It was true that it could not be considered a commercial success, but it was one of Unesco's finest vehicles of indirect propaganda. It was an invaluable source of information for members of National Commissions, who in lectures and speeches were able to pass on its contents to a wide public. In his opinion, therefore, its commercial losses were in a large measure compensated by its propaganda value.

(86) Mr. KETRZYNSKI (Poland) considered that an organization like Unesco should have its own review.

Even if it were very costly, the Courier had already gained a considerable number of readers, and had proved its worth.
(87) The problem at present was to know how to make it more successful commercially, without pandering to public taste of a certain kind, or lowering its standards. What Unesco required was an instrument for the dissemination of the ideas for which the Organization stood.
(88) The Polish delegation thought that the Courier should devote more space to the international exchange of ideas and the expression of different cultures, and should ask well-known specialists in the various fields to contribute. With that end in view, the Polish delegation would support the Working Party's recommendations.

(89) Mr. BARBEY (Switzerland) drew attention to the fact that the Courier was arousing increasing interest, owing both to the new ideas underlying it and to its improved layout. It no longer attracted readers almost exclusively from the teaching profession. It should and could, by now, appeal to the general public, and the Swiss delegation would be interested to hear the opinion of the Secretariat on the prospect of such a development.

(90) Mr. HACQUAERT (Belgium) agreed with the remarks of the Polish and Swiss delegates.
(91) He thought, however, that the Courier might well include articles of topical interest, provided that they were presented from an angle different from that in the world press.
(92) He expressed his pleasure at the increase in subscriptions, although he continued to think that the number could be still further increased if the periodical were on sale at bookshops, of a less academic kind, which normally stocked larger numbers of newspapers and periodicals.

(93) Mr. PANNETON (Canada) pointed out that the Courier could not be judged by the same standards as the outside press. Its purpose was clear only when considered in the light of Unesco's own aims.
(94) The Secretariat should, however, set itself the twofold aim of reducing the cost price without lowering the quality, and of securing the widest possible distribution through National Commissions.

(95) Mr. DESJARDINS (Department of Mass Communication) had paid great attention to the suggestions made, and thought that the Department would be able to use them in the coming months.
(96) With reference to the distribution of the Courier, Mr. Desjardins informed the Commission that the Sales and Distribution Division was engaged in a complete review of the question of agents, concurrently with its endeavours to increase the number of subscriptions.
(97) In reply to the Polish delegate, Mr. Desjardins assured him that, in seeking to increase the sale of the Courier, neither the standard of its contents nor the quality of its presentation would ever be lowered, but that an attempt would be made to make it more alive.

(98) Section B was approved.

(D) Joint information mission (paragraphs 49-50)

(99) Mr. CHEVALIER (Secretary of the Commission) said that the Advisory Committee recommended placing this project in Category 3.

(100) Approved.

(E) Co-operation with radio organizations (paragraphs 51-53)

(101) Unanimously approved.

(F) Production of recorded radio programmes (paragraphs 54-64)

(102) Approved.

(G) Exhibitions (paragraphs 65-67)

(103) Mr. LEFRANC (France), after paying tribute to the quality of past exhibitions, proposed that the Secretariat explore the possibility of making more effective use of visual aids in the production and distribution of exhibition material.
(104) However successful they might be, even travelling exhibitions only reached a relatively small public.
(105) By using filmstrips or short films on the same subjects as those of the exhibitions, an infinitely larger number of people could be reached, whether such visual aids were shown in conjunction with the exhibitions or were circulated independently.
(106) An experiment of the kind had been tried out in France with great success, and Unesco would be well advised to follow that example.

(107) Mr. DUERING (Sweden) asked if the principles set out in the report of the Expert Committee on Education for International Understanding and Co-operation (page 11 of document 8C/DIV/80), which had been endorsed by the Advisory Committee on Programme and Budget, could be recommended for adoption as general criteria for Unesco in setting up exhibitions.

(108) Mr. BRANCA (Italy) fully endorsed the remarks of the delegate of France.
(109) He added, however, that visual aids played such an important part in spreading Unesco's main themes that more money ought to be set aside for them.

(110) Mr. HARDY (United States of America) supported the proposal of the delegate of Sweden. The criteria would be useful to all departments in Unesco.

(111) The CHAIRMAN said that the proposal had been noted by the Director of the Department.

(112) Mr. MAHEU (Assistant Director-General) asked Mr. Branca if he had understood him correctly in assuming that the Italian delegation wished to see the visual aids division reinforced.

(113) Replying in the affirmative, Mr. BRANCA (Italy) advocated that the projects referred to in paragraphs 72 and 74 be given a higher priority than

that recommended by the Advisory Committee, and that they be included at the normal instead of the higher budgetary level.

(114) Mr. MAHEU (Assistant Director-General) replied that there was no longer any distinction between normal and higher budgetary levels, but that increased staff for the division would obviously entail changes in the budget.
(115) He asked the Commission if it wished for details immediately, or if it would rather the Secretariat first studied the question and then communicated its new suggestions by way of the Advisory Committee when the time came to make the final budgetary adjustments.

(116) Mr. BENDER (Netherlands) said that, in considering staffing implications, it would be useful for the Director-General to bear in mind the budgetary reduction under paragraphs 25-28.

(117) Mr. LEFRANC (France) supported the proposal of the delegate of Italy and agreed with the procedure suggested by the Assistant Director-General.

(118) Paragraphs 65-67 were approved unanimously.

(H) Photographs on Unesco themes (paragraphs 68-71)

(119) Approved unanimously.

(I) Production of a film (paragraphs 72 and 73)

(120) Mr. CHEVALIER (Secretary of the Commission) said that the Advisory Committee recommended placing this project in Category 3.

(121) Dr. MUDALIAR (India) said that "World Without End" was still being shown and there was no urgent need for a new film at th oresent time. He proposed that the project should be placed in Category 4.

(122) The proposal was supported by the delegate of Egypt.

(123) The CHAIRMAN asked for a vote on the proposal to defer the project for consideration by the ninth General Conference.

(124) The proposal was adopted unanimously.

(J) Film showings in Member States (paragraphs 74 and 75)

(125) Mr. CHEVALIER (Secretary of the Commission) said that the Advisory Committee recommended placing this project in Category 3.

(126) The recommendation of the Advisory Committee was adopted.

(K) Prizes for films and film scenarios (paragraphs 76 and 77)

(127) Mr. CHEVALIER (Secretary of the Commission) said that the Advisory Committee recommended placing this project in Category 4. The Committee had come to the conclusion that the activity concerned was not calculated to give effective encouragement to the production of films and scenarios on human rights; it therefore proposed that it be deleted from the proposed programme for 1955-56.

(128) Mr. LEFRANC (France) deplored such a hasty decision. In the field of cinema, as in many other spheres, one of the weaknesses of the Secretariat's action was that it was not in close enough touch with film people. That the project was likely to be of great interest to professional circles was proved by the promise of support received from the Secretary-General of the French Film Producers' Union and by a letter from Mr. Orson Welles, from which the French delegate proceeded to read a number of extracts.

(129) Mr. NIELSEN (Denmark) said that, if Unesco offered prizes for film scenarios, commercial companies would no doubt be willing to produce the winning ones without cost to Unesco. There would, however, be a serious danger in that Unesco would have no influence on the final form of the film, which might be very different in character from the original scenario. Any films produced as a result of the project would be accepted by the public as Unesco products, and there would be no safeguard for Unesco's reputation. It would be wiser to offer prizes for films which had already been made.

(130) Mr. HARDY (United States of America) supported the sound reasoning of the Advisory Committee and proposed that the project should be deleted from the programme.

(131) Mr. BARBEY (Switzerland) heartily endorsed the remarks of the delegate of France.
(132) Such prizes would indeed encourage the production of documentary films on Unesco's main themes, and it might also be a good idea for Unesco in the same way to express its approval of big films which, in their time, advanced the cause of peace and international understanding such as "The Great Illusion" and "The Last Chance", to quote only two.

(133) Mr. MENDIS (Ceylon) supported the French proposal. The objections which had been advanced were not serious and it was worth retaining the allocation in paragraph 77.

(134) Mr. BRANCA (Italy) reminded the Commission that the Advisory Committee had taken its decision

on that point before learning of the conclusions reached by the Working Party on the Reorganization of the Department of Mass Communication; the Advisory Committee's recommendation was thus deprived of a great deal of its weight.

(135) There was a flagrant contradiction between the wish, so often expressed, to broaden the scope of the Department's activities, and the abrupt withdrawal of some of its largest appropriations.

(136) The Italian delegation was in complete agreement with the delegates of France and Switzerland in advocating the retention of the prizes, which could not fail to encourage the production of films likely to direct the public's attention to the main themes and high ideals of the Organization.

(137) Mr. MAHEU (Assistant Director-General) wished to return to film questions when the Commission had taken a decision on items, I, J and K.

(138) The delegates of the United Kingdom and Egypt heartily supported the recommendations of the Advisory Committee and vigorously opposed the point of view of the delegate of France, whereas the delegate of Turkey thoroughly endorsed the latter's view and pressed for the award of such prizes in 1958.

(139) Mr. SANDOVAL VALLARTA (Mexico) proposed that the two kinds of prizes referred to in paragraph 76 be considered separately.

(140) Mr. MAHEU (Assistant Director-General) saw no objection to taking a separate vote on prizes for scenarios, ($7,300) on one hand and for films ($1,200) on the other.

(141) The deletion of appropriations for prizes for film scenarios, recommended by the Advisory Committee, was approved by 27 votes to 6, with 6 abstentions.

(142) The deletion of appropriations for prizes for films, recommended by the Advisory Committee, was approved by 17 votes to 13.

The meeting rose at 1 p.m.

# TWENTY-SEVENTH MEETING

*3 December 1954 at 3.30 p.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

**ITEM 8.4.5 OF REVISED AGENDA : MASS COMMUNICATION** (continued)

(1) The CHAIRMAN stated that, with the agreement of the Soviet delegation, the discussion of the draft resolution it had submitted regarding the Mass Communication programme and budget (document 8C/DR/70) had been postponed until a later meeting.
(2) The Chairman had also informed the General Committee that the Commission wished to refer Project 3.4, under Social Sciences, to the Advisory Committee on Programme and Budget; the Chairman of the Advisory Committee had demurred, pointing out that his Committee had already discussed the chapter, and that there was every likelihood that a fresh examination would give much the same results as the original one.

Project 5.2 (continued)

(3) Mr. MAHEU (Assistant Director-General) felt that to postpone the discussion of draft resolution 8C/DR/70 would automatically mean postponing that of draft resolution 8C/DR/117. He asked whether the Commission wished to await that discussion before taking a decision on paragraphs 47 and 48 (Corr.) relating to brochures and folders.
(4) The decision taken that morning on project (J) "Film showings in Member States" was still not clear to the Secretariat; the adoption of the recommendation of the Advisory Committee on Programme and Budget to place the project in Category 3 (for implementation once Categories 1 and 2 had been dealt with) no longer had any meaning, for although the Committee had proceeded on the basis of priorities, not having been informed of the budget total, the Commission was not in the same position. It had fixed those totals, and for that reason could and should take firm decisions, not relative or conditional ones.
(5) From the Secretariat's point of view, the Commission's vote would mean postponement of the project until 1957-58.

(6) Mr. BENDER (Netherlands) expressed anxiety over the quick decision which had been taken at the morning's meeting in connexion with paragraph 72. He had no wish to reopen the discussion of that item but stressed his Government's view of the importance of producing another film of the type of "World Without End".
(7) Paragraph 72 proposed that a new film should be completed by the end of 1956. If, as he understood the morning's decision to mean, the production of the film were postponed, there would be a gap of two years during which there would be no film available on the work of Unesco. In his view, such films were of very great value in disseminating information about Unesco and he was against any postponement.
(8) He concluded by asking whether the decision of the Commission did, in fact, put that project in Category 3.
(9) The view of the Secretariat was that the Commission's decision would mean a postponement of the project to another financial period.

(10) Mrs. PECSON (Executive Board) said that Sections (I) and (J) (paragraphs 72-75) had been the subject of lengthy discussion in the Executive Board. The Board had studied reports from the Secretariat, from Member States, from members of the Executive Board and from the Director-General on all aspects of the film "World without End". In addition, the Chairman and one member of the Executive Board had made an on-the-spot investigation of the film in action in several countries. The consensus of opinion in the Executive Board had been that the activity provided an effective method of bringing together Member States and of publicizing the work of Unesco. The Board had received the impression that many Member States were anxious to show the film for purposes of spreading information about Unesco and for achieving better international understanding.

(11) Mr. BRANCA (Italy) thanked the Secretariat for its explanation. He also had not been very clear about the decision taken at that morning's meeting, for, while the Conference was stressing the importance of visual aids, the Commission was more or less systematically eliminating draft resolutions which called for their development. The delegate asked the Director-General to re-examine the budget for visual aids and to broaden the scope of the programme instead of merely increasing the staff. He proposed taking up the project again and assigning it a high priority, together with the project referred to in paragraph 69: prints and negatives.

(12) The delegate of India protested, on a point of order, against resuming the discussion of an item already decided, and the CHAIRMAN explained in reply that a delegate was always at liberty to propose the reopening of a discussion, but that he did not advise the Commission to follow the suggestion.

(13) Mr. HACQUAERT (Belgium) had not gathered whether the foregoing discussion had referred to paragraph 72 or to the report of the Advisory Committee on Programme and Budget. He thought the previous vote should be reviewed, and also advocated the project relating to the production of a film to promote international understanding (paragraphs 72

and 73 of the Programme and Budget). If the question were not discussed at the current meeting there would still be time to return to it in plenary meeting, although that was not very desirable. The Commission was very much better placed to hold such a discussion than the General Conference.

(14) Mr. CHEVALIER (Secretary of the Commission) pointed out that the current discussion seemed to refer to paragraphs 72 and 73, whereas all that the Assistant Director-General had mentioned in his question had been the section for film showings (paragraphs 74 and 75).

(15) Mr. TERROU (France) remarked on the lack of clarity in the debate and proposed taking a fresh vote.
(16) The delegates of the United States of America, South Africa and the United Kingdom stated that they had voted on paragraphs 72-75 at the morning meeting on the understanding that placing an item in Category 3 was tantamount to suppression.

(17) The delegates of Iran and Italy supported the remarks made by the French delegate.

(18) The Commission agreed by 18 votes in favour, 6 against and 9 abstentions, to suppress item (J) concerning film showings in Member States (paragraphs 74-75).

(19) Mr. MAHEU (Assistant Director-General) felt that the vote had clarified the position, and he could now deal with the question as a whole.
(20) Referring to the comments of the Italian delegate, he reminded the Commission that it had wished a well-staffed and active section to be set up in the Mass Communication Department to deal with all visual aids, including the cinema. But the staff depended on the programme, and yet the Commission had just struck out all the projects relating to the cinema. How could there be a staff without a programme? And how could there be a visual aids division if there were no film programme? The only way out would seem to be to authorize the Secretariat to submit new proposals on films, dealing with both the programme and staffing. Mr. Maheu suggested that a sum of $50,000 for the two years be set aside for that purpose.

(21) Mr. TERROU (France) asked the Secretariat to let the Commission have technical details: if the Commission saw them in writing, it could proceed to examine them; there was no point in referring to the Advisory Committee a project which could be thoroughly discussed by the Commission with the foremost specialists in Mass Communication present.

(22) Mr. HARDY (United States of America) hoped that his vote would not be construed as an objection to the use of films for Unesco work.
(23) He would object to any suggestion that Unesco should set up a film unit. In his opinion, contracts could be placed with commercial concerns which would allow of much more economic production.

(24) The CHAIRMAN announced that the Assistant Director-General would submit the Secretariat's proposals in 24 hours.

(25) The decision was approved.

(26) Paragraphs 78-80 were adopted without discussion.

Project 5.3: Free flow of information (paragraphs 81-126)

(27) Mr. DUERING (Sweden), referring to paragraphs 90-93, called attention to problems concerning the international exchange of the negatives of educational films.
(28) The international agreement covering the exchange of educational material applied only to the positives of such films, but greater use was made, in the adaptation of films for various purposes, of negatives. He drew the attention of the Secretariat to that point.
(29) He further suggested that reference to the difficulties arising in importing materials for art exhibitions should be added to the recommendations of the Advisory Committee concerning the import of broadcasting and television equipment. The words: "and an enquiry into the conditions governing the temporary import of material for art exhibitions" could be added to the Committee's report (document 8C/BUD/1).

(30) Mr. TERROU (France) remarked that project 5.3 marked the beginning of the section dealing with the second major function of the Department of Mass Communication. The French delegation considered the activities in question to be the most vital part of the Mass Communication programme, for by them people in every walk of life could be won over to the work of Unesco. If Unesco could one day secure the free flow of information on an international scale, and set up clearing houses, the leaders of world opinion would rally to the support of the Organization.

(31) Mr. SOLODOVNIKOV (Union of Soviet Socialist Republics) stated that his delegation attached great importance to resolutions 5.31, 5.32 and 5.33, while reserving the right to make its position clear at a later stage. The recommendations to Member States relating to those resolutions had been formulated at the fifth and seventh sessions of the General Conference before the USSR had joined Unesco. The delegate added that his delegation had received the documents on the Mass Communication budget rather too late to study them thoroughly.
(32) The delegation of the USSR would therefore abstain from voting on the resolutions.

(33) Sir Kenneth GRUBB (United Kingdom) stated that the United Kingdom delegation had always been in favour of the fullest and freest flow of information and welcomed any activities by countries which would assist or promote such flow.
(34) With reference to paragraph 94, however, he thought that, as the choice of facilities was so great and the ultimate ability or willingness of countries to co-operate so variable, there was not much

chance of success and he proposed that the project be dropped.
(35) He strongly supported the project outlined in paragraph 99 and saw no objection to extending the principle and system to include such things as objets d'art.

(36) Mr. WIDDOWSON (Union of South Africa) was of the opinion that bilateral agreements on the free flow of information were of greater value than multilateral agreements, and were adequate to meet existing needs.
(37) He suggested that the Secretariat should draft a model convention or agreement on a bilateral basis, which would be of great assistance to countries wishing to conclude bilateral agreements.

(38) Mr. DESJARDINS (Department of Mass Communication), in reply to the French and Swedish delegates, said that the Department could include in its programme an enquiry into the facilities for the temporary import of artistic material.
(39) Referring to the international instrument for the free movement of persons, Mr. Desjardins drew the Commission's attention to the Report of the Working Party on International Regulations (8C/PRG/23), with special reference to section IV (pages 4 and 5). The Working Party had examined the Director-General's report (document 8C/PRG/8) and adopted the following draft resolution:
(40) Mr. Desjardins then read the text of the resolution on pages 4-5 of document 8C/PRG/23.

(41) Mr. MAHEU (Assistant Director-General) pointed out that, if the Commission adopted that resolution, it would have to be inserted after resolution 5.33, becoming 5.34.

(42) Mr. PRATT (Australia) associated himself with the recommendation of the Working Party on International Regulations and complimented it on its realistic approach to the problem.
(43) He supported the principle motivating Unesco in its programme for the Exchange of Persons.

(44) The recommendation of the Working Party on International Regulations was adopted with 4 abstentions.

(45) Mr. CHEVALIER (Secretary of the Commission) drew the attention of delegates to the draft resolution proposed by the Austrian delegation, International Students' Correspondence (document 8C/DR/10). The idea was to request the Universal Postal Union to prepare an international agreement on the reduction of postage fees for international students' correspondence.

(46) The Secretary added that the Advisory Committee had not felt able to entertain the project, since the General Conference was not competent to approach the Universal Postal Union direct.

(47) The Executive Board, on the other hand, was not in a position to recomment that the Conference approve the proposal, for the request contained in it was outside Unesco's scope.

(48) Mr. LOEWENTHAL (Austria) asked if the words "suggests to" might not be substituted for the words "calls upon" in his delegation's draft resolution.

(49) Mr. MAHEU (Assistant Director-General) explained that the Director-General of Unesco could neither "call upon" the UPU to take action nor "suggest" that it do so. Member States alone could submit proposals to the Congress of that organization. Since many States were members of both Unesco and the UPU, the last paragraph of the draft resolution of the Austrian delegation might be drafted as follows: "Invites Member States to propose to the Congress of the UPU...".

(50) Mrs. PINTO DE VIDAL (Uruguay) hoped that the Austrian proposal would receive wide support. In her view, any measure which helped to promote inter-school correspondence should be supported by Unesco.

(51) Mrs. LEGARDA (Philippines) supported the Uruguayan proposal.

(52) Mrs. PECSON (Executive Board) said that, although Unesco was interested in the proposal, it had no jurisdiction in that field.

(53) The correct procedure would be for the Austrian Government to put a proposal before the Universal Postal Union.

(54) Mr. CHEVALIER (Secretary of the Commission) read out the draft resolution submitted by Uruguay relating to the free movement of persons (document 8C/DR/48).

(55) The Secretary added that the Advisory Committee had not recommended the proposal, the aims of which had been pursued by the Organization for several years past. Neither had the Executive Board recommended its adoption.

(56) The CHAIRMAN stated that, as it was not seconded, the draft resolution would not be put to the vote.

(A) International action for reduction of obstacles to free flow of information (paragraphs 88-102)

(57) Adopted, with 4 abstentions.

(B) Co-operation with United Nations, Specialized Agencies and other International Organizations (paragraphs 103-124)

(58) Adopted, with 5 abstentions.

(C) Studies on free flow of information (paragraphs 125-126)

(59) Adopted with 5 abstentions.

(60) The CHAIRMAN declared resolutions 5.31, 5.32, 5.33, and the new resolution 5.34, adopted.

Project 5.4: Clearing house and exchange and stimulation of educational, scientific and cultural programmes.

Paragraphs 127-135.

(61) Mr. CHEVALIER (Secretary of the Commission), referring to paragraphs 130 to 135, drew attention to a draft resolution submitted by the French delegation on educational television broadcasts (document 8C/DR/34). The Advisory Committee had recommended the adoption of the proposal, which entailed no additional expenditure.

(62) The French proposal was adopted.

(A) General clearing house activities (paragraphs 136-142)

(63) Mr. CHEVALIER (Secretary of the Commission) also drew the Commission's attention to the draft resolution put forward by the Austrian delegation: Encouragement of international co-operation in the field of educational films on the part of Unesco (document 8C/DR/16), which he read out. He added that the Advisory Committee had not recommended the adoption of the resolution, which would entail expenditure of $1,000.

(64) Mr. LEFRANC (France) thought the Advisory Committee's decision hasty and ill-considered. There were technical film dictionaries, but there was none dealing with audio-visual techniques for teaching purposes, laying stress on the use and application in teaching of such techniques. The International Council for Educational Film, which had three working languages, thus experienced the greatest difficulty in dealing with its correspondence, owing to the lack of a suitable dictionary.

(65) Mr. DUERING (Sweden) agreed with the delegate of France and supported the Austrian resolution (document 8C/DR/16).
(66) He drew the attention of the Commission to the similarity between the activities proposed in paragraphs 139 and 158 and asked what the difference between them was.

(67) Mr. DESJARDINS (Department of Mass Communication) noted that the International Council for Educational Film might indeed have been mentioned in paragraph 139, but it was already referred to in connexion with the international exchange of educational programmes (paragraphs 157 to 159), which was a related activity.

(68) Mr. HACQUAERT (Belgium) asked whether the Austrian draft resolution called for the sum of $1,000 in addition to the appropriations mentioned in section (A).

(69) The additional appropriation was approved, with 7 abstentions.

(70) The whole of section (A) (paragraphs 136 to 142), together with resolutions 5.41 and 5.42, was adopted.

(B) Press, film and radio for children (paragraphs 143-145 and document 8C/5, Corr. 3)

(71) Mr. DESJARDINS (Department of Mass Communication) stated that when document 8C/5 had gone to press, the Director-General was still without certain details needed to draw up the final text (document 8C/5 Corr. 3), which was now before the Conference and contained particulars of the two projects in view.
(72) He drew delegates' attention to the revised draft of the resolution submitted by the Italian delegation regarding Press, Film and Radio for Children (document 8C/DR/22 rev.). The Secretariat agreed to the substitution of the text there set out for paragraphs 143 and 143 bis.

(73) Mr. CHEVALIER (Secretary of the Commission) noted that the Advisory Committee had remarked on a certain overlapping between the activities described in paragraphs 143 and 144 of the original text (document 8C/5) and the action of Member States at national level. Documents 8C/5 Corr. 3 and 8C/DR/22 rev. had both appeared since then.

(74) Mr. CALO (Italy) recalled that the General Conference in 1952 had recommended that an international organization be set up to enquire into problems concerning children and young people in their relation to the cinema, television, press and radio. As could be seen from document 8C/PRG/16, many Member States and several non-governmental organizations had replied to the circular letter asking for their views on that recommendation. In many countries, particularly in Italy, the movement had made great strides, for government departments, educationists, programme producers and official representatives had taken an interest in it. What was needed was to co-ordinate the movement at the international level and to make use of the goodwill aroused in all countries and among all the organizations concerned. Exchanges should be arranged between the Member States in connexion with all the measures to be taken in the matter.
(75) If the estimated budget was too high, full use should be made of the studies and fact-finding campaigns conducted by the Department.

(76) Mrs. JOBORU (Hungary) said that films and radio played a big part in the upbringing of a child as well as did the home and school. It was suggested here that they should be used for the purpose of procuring better international understanding but they could also be the cause of hatred.
(77) She proposed that Unesco should collect information on the use of the cinema and radio in 1955 as a clearing house activity and, in addition, that at the end of 1955 the possibility or desirability of setting up a group of experts to study the problems involved, should be considered.
(78) If it should be discovered that films encouraged wars and hatred, Unesco would be in a position to raise a very strong protest. The authority of Unesco in the realm of teaching peace and spiritual values would thereby be increased.

(79) Mr. ESTELRICH (Spain) wished to support the Italian draft resolution.

(80) Sir Kenneth GRUBB (United Kingdom) indicated that the United Kingdom delegation was opposed both to the resolution contained in document 8C/DR/22 rev. and to the contents of paragraph 143.
(81) An enquiry had been made in the United Kingdom on the effect of the cinema on young people and it had been discovered that to pursue the enquiry properly would be extremely costly.
(82) He would be more inclined to support the proposal by the delegate of Hungary that the collection of information should be a clearing house activity.

(83) After some discussion, it was agreed, by 27 votes to 9, with 6 abstentions, to substitute the Italian draft resolution for paragraphs 143 and 143 bis in document 8C/5 Corr. 3.

(84) Mr. DESJARDINS (Department of Mass Communication) explained that the paragraphs 144 and 145 of Corr. 3 resulted from a Conference of experts on the film industry which had been held under the auspices of Unesco in July 1954 by the organizers of the International Film Festival at Locarno. It was expected that the film industry would, after a few years, soon take over responsibility for the measures advocated.

(85) The project was adopted without opposition.

(C) Co-operation with communication research institutes (paragraphs 146-148)

(86) Mr. CHEVALIER (Secretary of the Commission) read out the draft resolution on the Clearing House submitted by the French delegation (document 8C/DR/112), and quoted document 9C/PRG/17, on co-operation with communication research institutes.

(87) Mr. TERROU (France) remarked that there were many communication research organizations in the world. Such research work was at the moment very little connected and to co-ordinate it would be just the sort of activity normally pursued by Unesco. The document quoted confirmed that such a project would be useful to Member States. The annual appropriation of $3,500 was obviously inadequate, and Unesco should take steps to deal with that point.

(88) The French proposal, supported by several delegations, was adopted by 29 votes to 4, with 6 abstentions.

(D) Television and the educational and documentary film (paragraphs 149-153)

(89) Mr. DUERING (Sweden) expressed doubt of the value of this activity. He thought that, as the possibility of financial co-operation between television and the production of documentary films was a commercial one, its solution lay in the commercial field.
(90) The various countries had different technical standards in the use of television, and their financing and programme policies were different. In addition, the conditions governing the expansion of television were unstable. Rapid developments might render the contents of paragraph 151 obsolete.
(91) He moved that paragraph 151 be deleted from the present programme.

(92) Mr. SHAHANE (India) also thought that the proposal contained in paragraph 151 was premature and that it would be wiser to give countries and commercial interests time to propound their views. He proposed that the activity should be postponed for two years.

(93) Mr. LEFRANC (France) could not accept that argument, for the film industry had come into being 50 years previously and television had been in operation with every success for 10 years past.

(94) Mr. DESJARDINS (Department of Mass Communication) wished to make a general remark on the subject of television. In a very few years, there would be few countries without their own network; of the 58 Member States which already had or would within a year have their own television system, 16 were in North and South America, 28 in Europe, 7 in Asia, 4 in Africa and 3 in Oceania.
(95) Radio, with several years' experience behind it, already had firmly rooted customs, which those in charge were reluctant to change.
(96) Television needed enormous quantities of expensive programmes, and many producers desired or expected action by Unesco.
(97) There were technical difficulties, and they were constantly changing; efforts might be made to solve them by co-operation between cinema and television technicians. The cinema was unquestionably going through a critical period, and television offered an excellent market for educational films. It was an extremely useful means of promoting international understanding, since producers in many countries were already eager to take part in programme exchanges at their own expense. It should be borne in mind that television was established in Japan, in the USSR, etc., and that it was in the process of developing in many other countries.
(98) In conclusion, Mr. Desjardins said that he had found it hard to believe that such was the situation, but that in the past two years he had become absolutely convinced.

(99) Mr. HARDY (United States of America) said that the United States delegation would give its general support to the practice of exchanging educational films.
(100) He warned against an over-optimistic view of the use of television in education. Television offered great opportunities for the use of educational films and would limit the cost of production but it would also show the shortcomings.
(101) He thought that it would be wiser to postpone the activity to allow countries to experiment before determining whether the scheme should have universal application.

(102) Mr. FORSYTH (New Zealand) thought that the Commission was in agreement on the activity in so far as documentary films were concerned and wondered if the

item could be split into two parts with a separate vote being taken on each.

(103) Mr. DESJARDINS (Department of Mass Communication) was not sure that he had fully understood the proposal he had just heard. His project related to documentary films for which there was too small a market. It would entail an increase in the production of such films.

(104) The project was adopted by 31 votes to 3, with 8 abstentions.

(E) The rôle of broadcasting in the dissemination of culture (paragraphs 154-156)

(105) After explanations by Mr. DESJARDINS (Department of Mass Communication) and the CHAIRMAN, the project, which the Commission had already approved in dealing with the cultural activities budget, and which, moreover, was supported by the Belgian delegate, was adopted without opposition.

(F) International exchange and stimulation of production of educational, scientific and cultural programmes (paragraphs 157-159)

(106) The project, warmly seconded by the French delegate, was adopted without opposition.

(G) World Braille Council (paragraphs 160-162)

(107) The project had been approved by the Advisory Committee, which had raised the sum for contracts for the establishment of the Council by $2,500 for 1956.

(108) Adopted with increased allocation.

(H) Assistance in the production and dissemination of art films (paragraphs 162a to 162h, document 8C/5 Corr.)

(109) Mr. DESJARDINS (Department of Mass Communication) explained that the activities formerly dealt with partly by the Department of Cultural Activities and partly by the Department of Mass Communication had been linked up by the Director-General in the budget of the latter Department. Obviously the two services concerned would work closely together.

(110) The project was adopted, and included in the draft programme and budget.

Project 5.5: Use of the means of communication for fundamental and workers' education.

(A) Educational Film Institute for Latin America (paragraphs 172 and 173)

(111) Mr. SANDOVAL VALLARTA (Mexico), referring to paragraph 172 of the chapter on Mass Communication, said that he was happy to see that an educational film centre was to be set up in Patzcuaro, but that his Government wished to make one reservation. It did not know what the total cost of the scheme would be, but was agreeable so long as the Mexican contribution was no greater than Unesco's.

(112) Paragraphs 163-173 were put to the vote and approved.

(B) Local production of fundamental education films (paragraphs 174-176)

(113) Adopted.

(C) Visual aid kits for fundamental education (paragraphs 177 and 178)

(114) Adopted.

(D) Influence of educational broadcasts (paragraphs 179 and 180)

(115) Adopted.

(E) Periodical reading material for new literates (paragraphs 181 and 182)

(116) Mr. WARD (United Kingdom) said that the United Kingdom delegation approved the project for providing periodicals for new literates. He stressed the importance of seeing that the periodicals were of a type to suit the readers and that they should be published cheaply.

(117) The most difficult problem of all about such periodicals was that of dissemination. He cited the case in British colonial experience, where it had been discovered that within two hundred yards of the official bookshop official books were sold in the market at five times their official price.

(118) He drew the attention of the Secretariat to that and similar problems of dissemination and asked that it should tackle them.

(119) Mr. DESJARDINS (Department of Mass Communication) agreed with the United Kingdom delegate that such problems should be tackled and stated that the Secretariat was aware of them and had already approached the Director of the Bantu Press with a view to obtaining information about the difficulties involved. The Secretariat would keep the request of the United Kingdom delegate in mind.

(120) Paragraphs 181 and 182 were adopted.

(F) Fellowships (paragraph 183)

(121) Adopted.

(G) Regional Film Library for the Middle East (paragraphs 184 and 185)

(122) Adopted.

(H) Use of television for fundamental or workers' education (paragraphs 186 and 187)

(123) Mr. CHEVALIER (Secretary of the Commission) stated that the Advisory Committee had

considered that the project was premature and recommended postponing it until the 1957-58 programme.

(124) Mr. DESJARDINS (Department of Mass Communication) reminded the Commission of what he had already said of television. An experts' seminar had been held in London with great success and a similar experiment was to be tried in Japan.

(125) Mr. SUZUKI (Japan) stated that his country had had its own television service for a year. It was developing very rapidly and consideration would have to be given to the use of television for fundamental education much sooner than had been expected. He ended by saying that Japan would be very happy to take part in such an experiment.

(126) A vote was taken, and the project was adopted by 32 votes to nil, with 3 abstentions.

(I) Development of the radio forum as a means of fundamental education (paragraphs 188 and 189)

(127) Adopted without opposition.

Project 5.6: Technical aid to Member States in development of mass communication services (paragraphs 190-199)

(128) The project was adopted without opposition.

Project 5.7: Voluntary international assistance (paragraphs 200-220)

(A) Unesco coupon scheme and travel coupon scheme

(129) Mr. CHEVALIER (Secretary of the Commission) said that the whole project had been recommended by the Advisory Committee, which had laid special emphasis on its educational aspect.

(130) Mr. FAUBLAS (Haiti) pointed out that Unesco coupons were not accepted by booksellers everywhere in his country. He asked that efforts should be made to co-ordinate the scheme.

(131) Mr. SOLODOVNIKOV (Union of Soviet Socialist Republics) said that the Soviet delegation could not vote in favour of the projects concerning Unesco coupons, as the Soviet Government had taken no part in working out the various coupon schemes and it would need to give the programme further study.

(132) Mr. HARDY (United States of America) supported the provisions of this section and said that it offered greater opportunities for world-wide international understanding than any other section of the Mass Communication programme.

(133) Mr. WALKER LINARES (Chile) said that his delegation was keenly interested in the Unesco Coupon Scheme, but that in view of existing difficulties in getting coupons accepted, particularly in Latin American countries, he thought it advisable that a resolution be put forward recommending that banks in Member States accept the coupons in question.

(134) Mr. SUZUKI (Japan) recalled his proposal to set up a working party on the coupon schemes. Other delegations were interested in improving them, and he suggested that unofficial talks be held with representatives of the Secretariat.

(135) The CHAIRMAN remarked that similar talks held at the General Conference in Florence had produced excellent results.

(136) Mr. ZUCKERMAN (Department of Mass Communication) said that a discussion of that kind might be arranged for the following week.

(137) Mr. PAIK (Korea) testified to the effect of the gift coupon scheme in his country. His countrymen had been greatly impressed by the extent of the aid extended to it under the scheme. He hoped that it would be extended still further and gave it his whole-hearted support.

(138) Mr. LI U-YING (China) stressed the educational and social value of the Unesco Coupon Scheme. He thought that, modest though it was, the scheme should help in promoting the aims of the Organization.

(139) Mrs. KOCH (Denmark) agreed with the opinion expressed by the United States delegate.

(140) Denmark was concerned with four countries in the gift coupon scheme and concentrated on teaching about those four countries in its schools. All teaching was followed up with Unesco material. She emphasized that any textbooks on the four countries should not be prepared by Unesco but by experts having an inside knowledge of the countries concerned.

(141) The Danish Government felt that the ideals underlying the scheme were most vital to the work of Unesco.

(142) The DIRECTOR-GENERAL said that the loyal co-operation of Member States in the gift coupon scheme provided Unesco with its happiest experiences in the carrying out of its programme.

(143) Paragraphs 200-210 were adopted with 5 abstentions.

(B) Gift Coupon Programme (paragraphs 211-221)

(144) Paragraphs 211-218 were adopted with 5 abstentions.

(145) Mr. CHEVALIER (Secretary of the Commission) drew delegates' attention to the resolution submitted by the French delegation: Discounts for administrative expenses in connexion with Unesco Coupons. He read out the draft resolution (document 8C/DR/33), and added that the Advisory Committee had not recommended its adoption.

(146) The CHAIRMAN mentioned the Congress of the International Federation of Library Associations, which had been held in Zagreb. He thought the French delegation's resolution was founded on insufficient

information, and he himself endorsed the Advisory Committee's view.

(147) The delegate of Italy seconded the French resolution.

(148) The DIRECTOR-GENERAL pointed out that the resolution had budgetary implications amounting to $100,000. He was of the opinion that it would be impossible to accept it, as the Commission had still a long way to go in its work of cutting the programme.

(149) The delegate of France withdrew his resolution (document 8C/DR/33).

(150) Paragraphs 219-221 were adopted with 5 abstentions.

Draft resolution DR/11: United Nations stamps honouring Unesco

(151) This resolution was not seconded and was rejected.

Draft resolution DR/57 rev.: Circulation of educational, scientific and cultural publications

(152) Mrs. PINTO DE VIDAL (Uruguay) regretted that many of the proposals submitted by her delegation had been rejected. She could not understand why the Executive Board had not recommended the proposal to bring out a special stamp to facilitate the exchange of cultural material.

(153) Mr. DESJARDINS (Department of Mass Communication) said that the proposal would have to be amended, since the Director-General could not himself issue a stamp. The suggestion should be studied and submitted as a proposal to Member States, who could on their own account bring it before the Congress of the Universal Postal Union.

(154) Sir Ronald ADAM (Chairman of the Executive Board) added that the Board had not supported the proposal.

(155) The Uruguayan delegate agreed to the amendment and Mr. MAHEU (Assistant Director-General) accordingly proposed the following wording for the beginning of the draft resolution. "The General Conference invites Member States to propose that the Universal Postal Union issue.....".

(156) The proposed wording was accepted by the delegation of Uruguay, and by the delegate of the United Kingdom, and the project was adopted by 12 votes to 7, with 18 abstentions.

The meeting rose at 6.30 p.m.

# TWENTY-EIGHTH MEETING

*1 December 1954 at 11 a.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

**ITEM 8.4.6 OF REVISED AGENDA: EXCHANGE OF PERSONS SERVICE**

(1) Mr. W. CARTER (Chief, Exchange of Persons Service) said that the programme was divided into three parts: clearing house and advisory activities; administration of fellowships; and the promotion of exchange of persons for international understanding. Continuous work in the three fields since 1947 had enabled the Secretariat to build up experience in all aspects of problems pertaining to the exchange of persons. The service now possessed extensive documentation, had developed a series of publications and established contacts with governments and provate organizations in the countries concerned.
(2) The policy for 1955-56 was a continuance of the previous programme with the addition of certain new features, the first of which was the development of advisory services and assistance to Member States in the form of technical consultations and discussions on problems raised by them.

(3) With regard to fellowships, the policy was to offer a limited number for the pursuit of studies abroad in specific fields related to Unesco's programme. The programme would inevitably fall short of the needs of Member States, but the Secretariat had felt that it would be better, instead of trying to cope with an unlimited number of requests, to plan in collaboration with the programme departments and link fellowships with specific activities in those departments. Fellowships would thus be an essential tool in the execution of projects. The whole programme represented a concerted effort, in collaboration with the beneficiary and host countries, to develop programmes adequate to to the needs of individual fellows, and was, in addition, a form of technical aid to both the individual and his country. Underlying it was Unesco's basic objective of international understanding.
(4) With regard to the third part of the programme, exchange of persons for international understanding, which was concerned especially with young persons, manual and non-manual workers, and teachers, new

features included the extension of workers' travel to Latin America and Asia; advisory services for the recruitment of foreign teaching staff; and the promotion of regional cultural studies. The object of the regional studies, which were described in paragraph 104, was to promote better international understanding by enabling graduates to acquire knowledge of countries other than their own.

Paragraphs 1-8

(5) Approved.

Project 6.1. Clearing House and Advisory Services

Paragraphs 9-22

(6) Mr. HACQUAERT (Belgium) thought it would be advisable to merge certain publications dealing with travel. The Belgian delegation knew that the Secretariat had already given thought to that question and it brought it up only in order to encourage them to continue with it.

(7) Mr. W. CARTER (Chief, Exchange of Persons Service) assured the delegate of Belgium that the possibility of collaborating with the International Union of Official Travel Organizations was being actively pursued.

(8) Mr. HUZAYIN (Egypt) considered that the clearing house and advisory services should be encouraged. Unesco was not the only organization handling the exchange of persons: Egypt, for example, had developed its own system and had already arranged exchanges of nearly 5,000 students and 1,600 teachers with 35 countries. If Unesco would work out a scheme for co-ordinating such activities, Egypt would be glad to participate.

(9) Referring to paragraph 17, he urged that evaluation of the results of exchange schemes should be pursued more vigorously. Staff and students who had been sent abroad were not always able to work in their fields of specialization when they returned to their countries.

(10) Mr. RIESZ (International Association of University Professors and Lecturers), after recalling the basic aims of the non-governmental organizations he represented, emphasized the extremely important part played by the exchange of teachers and students in the dissemination of knowledge and the development of international understanding, and as a preliminary to the establishment of international faculties; in that connexion, he mentioned the measures taken by Uruguay in establishing a Faculty of Humanities and Sciences (the work of the philosopher Vaz Ferreira).
(11) The International Association of University Professors and Lecturers received no subvention from Unesco but the Organization concluded contracts with it for producing reports on given subjects.
(12) In 1955-56, the survey in progress would be published, revealing difficulties and obstacles which still hampered the exchange of teachers, such as the necessity of providing accommodation in some of the large towns. The equivalence of degrees, the status of teachers and the question of sabbatical leave were all bound up with the problem and had already been dealt with in the Association's previous reports.
(13) Mr. Riesz mentioned another report which the Association was preparing for Unesco, and which would show the significance of the exchange of teachers to the important problem of collaboration between the universities and industry.
(14) Finally, with regard to research fellowships, Mr. Riesz was of the opinion that they should not always be allocated according to a rigid plan, but that some of them should remain at the disposal of the Director-General to meet possible needs connected with new activities.
(15) Mr. Riesz concluded by saying that increased expenditure on education and international understanding should reduce the necessity to spend money on armaments.

(16) Mrs. LEGARDA (Philippines), speaking as observer for the World Association of Girl Guides and Girl Scouts, thanked Unesco on behalf of the Association's three million members for the valuable work which was being done in sponsoring exchanges of young persons. Two members had benefited in 1952 and two in 1954, but, with the establishment of a new training centre in Mexico during the coming year, more exchanges would be needed. She asked if the Director-General or the Executive Board would consider the possibility of increasing exchanges for young persons.

(17) Mrs. PECSON (Executive Board) said that the Executive Board was well aware of the importance of the rôle played by the Exchange of Persons Service. She read out the Board's comments (document 8C/5 Add. 1., paragraph 16, page 3).

(18) Paragraphs 9-22 were approved.

Project 6.2: Fellowship administration

Paragraphs 27-36

(19) Mr. ESTELRICH (Spain) said that it was essential to maintain at the same figure, and, if possible, to augment in future, the sums set aside for fellowships, by increasing the budgetary appropriation and reducing administrative expenses; to secure an equitable distribution of fellowships among countries and cultures; to award fellowships in such a way as to meet the particular needs of each country; and to rationalize the basis on which they were granted, stressing their technical character and their bearing on the principal educational problems.

(20) Mr. SAMBURSKY (Israel) said that it was important when arranging fellowships to send people to countries with a standard of development not too far above that of their own country, since it was more profitable for them to study conditions which had a reasonable possibility of attainment in the near future. It would also be useful if fellows could be given opportunities of studying the problems of the poorer parts of the host countries.

(21) Mr. CLEGG (United Kingdom) supported the section under discussion, but urged that awards should be notified as early as possible. Improvised arrangements for placing holders of fellowships at short notice might impair the quality of work.

(22) Mr. TOROCHESHNIKOV (Union of Soviet Socialist Republics) proposed that the following sentence be added to resolution 6.2:

"Taking into account in this matter that in the granting of these fellowships priority should be given first of all to the needs of the underdeveloped countries."

(23) Underdeveloped countries had expressed a need for experts to help in implementing Unesco's programmes in the fields of education, science and culture, and every effort should be made to help them to train their own personnel.

(24) Mr. FRIEDMAN (ORT World Union) suggested that, with an eye to the future, consideration be given to the possibility of including in the draft programme, under project 6.2, fellowships for the investigation and extension of the study of vocational guidance problems, and of incorporating in draft resolution 6.34 (paragraphs 99 and 100) the exchange of teachers from vocational training schools, in order to promote international understanding.

(25) Mr. ZAMORANO HERNANDEZ (Chile) said that his delegation supported the proposal made by Spain and suggested, in addition, that in granting fellowships Unesco give preference to technical education.

(26) Mr. GOMEZ HOYOS (Colombia) referred to the successful experiment being carried out by the Instituto Colombiano de Especializacion en el Exterior (Colombian Institute for Specialization Abroad); and said he had come to the conclusion that administrative expenditure in Unesco's Exchange of Persons Service was in excess of real needs and absorbed a large part of the funds which might be used for fellowships.

(27) Mr. MONTALVO (Ecuador) whole-heartedly endorsed the views of the Spanish delegation, and proposed that, in granting fellowships, the Unesco Secretariat should take due account of Technical Assistance programmes being carried out in various countries.

(28) The amendment to draft resolution 6.2, proposed by the delegation of the USSR, was seconded and unanimously adopted.

(29) Paragraphs 27-36 were unanimously adopted.

(30) Paragraphs 37 and 38 were unanimously adopted

Paragraphs 39-43

(31) Mr. CHEVALIER (Secretary of the Commission) said that the programme activities referred to in those paragraphs had been given high priority and the Advisory Committee understood that the same priority would extend to the relative fellowships.

(32) Paragraphs 30-43 were approved.

Paragraphs 44-46

(33) Miss DOUGLAS (Canada) urged that in granting fellowships special attention should be given to subjects in which Unesco was particularly interested, for example, the Arid Zone and the Geophysical Year. She hoped the Director-General would bear that in mind when using any surplus funds.

(34) The CHAIRMAN said that the Director-General and the Advisory Committee would bear the comments in mind.

(35) Mr. SANDOVAL VALLARTA (Mexico) said that in the discussion on paragraph 45 (in connexion with paragraph 136 of the Natural Sciences chapter) it had been decided to add the word "astronomy" after "nuclear physics and cosmic rays".

(36) The CHAIRMAN thanked him, and put paragraphs 45 and 46 to the vote.

(37) They were unanimously approved.

Paragraphs 47 and 48

(38) Mr. HUZAYIN (Egypt) said that many countries which were making efforts to promote education were hampered by the lack of statistical experts. He urged that the Secretariat should pay special attention to the need for helping such countries.

(39) Paragraphs 47 and 48 were approved.

Paragraphs 49-51

(40) Approved.

Paragraphs 52-54 and draft resolution 8C/DR/24

(41) Mr. CHEVALIER (Secretary of the Commission) reported that the Advisory Committee, after hearing from the Secretariat that the budgetary allocation was $20,000, had expressed approval of the project.

(42) Mrs. PECSON (Executive Board) said that the Executive Board had been greatly interested in draft resolution 8C/DR/24, but in view of the efforts made to draw up a programme equitably distributed between existing needs, had been unable to recommend it for adoption.

(43) Mrs. PATRONETTO VALTER (Italy) said that, if her information was correct, applications for the seven fellowships for artists and writers had already been received from 38 States.

(44) The Advisory Committee was undoubtedly justified in asserting that an increase in the number of such fellowships would upset the balance of the budget; but it was regrettable that the Secretariat, in seeking to achieve a balance, had not made more allowance for such important fellowships.

(45) The Italian delegation therefore asked for an increase in the number of such fellowships, if not immediately, at least for the years 1957-58.

(46) Mr. IBANEZ GOMEZ (Chile) said that his

delegation supported the Italian proposal; he also wished to know in what proportion funds were to be assigned, respectively, to librarians and to artists and writers; he understood that Unesco was very little known as yet in artistic and literary circles and he moved that the sums for artists' and writers' fellowships be increased as much as possible in the 1957-58 period.

(47) Miss BOLLO (Uruguay) said that her country was most sympathetic towards the Italian proposal and welcomed any effort to obtain an immediate increase in those fellowships.

(48) Mr. W. CARTER (Chief, Exchange of Persons Service) said that, although it was difficult to calculate exactly, the proportions in respect of Cultural Activities were approximately $24,000 for artists and writers and $12,000 for librarians. He pointed out that any increase under that project might affect paragraphs 55-61 and urged the necessity of maintaining the balance between the different parts of the programme.

(49) The proposal of the Chilean delegate to defer the Italian proposal (document 8C/DR/24) until the 1957-58 period was put to the vote and adopted by 19 votes to 6, with 14 abstentions.

Paragraphs 55-61

(50) Approved.

Paragraphs 62 and 63

(51) Approved.

Paragraphs 64-67

(52) Approved.

6.3: Promotion of exchange of persons for international understanding

Project 6.31: General promotion (paragraphs 69-76)

(53) Mr. AMMOUN (Lebanon) proposed that resolution 6.31 be amended by adding the phrase, "taking into account, as far as possible, the problems raised by unemployment among intellectuals".
(54) The Lebanese delegate was not blind to the fact that the question was specially difficult because there was no precise definition of the profession of intellectual worker.
(55) But the problem was a real one and the former International Institute of Intellectual Co-operation had studied it very carefully and had come to the conclusion that a solution might be found by co-operating with ILO.
(56) Unesco might revive that idea of co-operating with ILO in attempting by a series of measures, such as the opening of an information office or the compilation of some kind of world register, to find remunerative employment for young intellectuals who were otherwise thrown back on themselves and ready to resort to anything.
(57) The social structure of many countries was still threatened and history would show what effect unemployment in a section of the intellectual class had had on the rise of dictatorships.

(58) Mr. HUZAYIN (Egypt) said that the discussions proposed in paragraphs 73-74 represented one of the most useful of Unesco's activities, since many countries met with serious practical difficulties in connexion with exchange of persons. He fully supported the project and, while hesitating to ask for an increase in the number of the proposed meetings, urged that the existing plans should be implemented.

(59) Mr. SUZUKI (Japan) said that the Japanese delegation attached great importance to the question, and his Government would be very pleased if the meeting for the Asian countries were held in Tokyo.

(60) The DIRECTOR-GENERAL said that the Secretariat's attention had frequently been drawn to the problem referred to by the delegate of Lebanon. If the intention of his proposal was that the Secretariat should bear it in mind and take whatever steps were possible within the framework of the programme, he was willing to accept it.

(61) Mr. STEWART (Canada) had no objection to the proposal, but was not satisfied with the drafting of the English text.

(62) The proposal of the delegate of Lebanon was put to the vote and adopted by 41 votes to nil with 2 abstentions.

(63) Paragraphs 69-76 were approved.

Project 6.32. Exchange of workers

Paragrapns 77.84

(64) Mr. HACQUAERT (Belgium) observed that there was no mention of individual travel in Europe for workers, although that type of study tour had been encouraged and supported by Unesco.
(65) So long as every care was taken to ensure that such study tours were of use to the communities to which the grant-holders belonged, provision for them should continue to be made in the programmes, or should be introduced.

(66) Mr. W. CARTER (Chief, Exchange of Persons Service) said that efforts were being made to extend study tours not only in Europe but also further afield. Future activities had been planned more on a group basis than in the past, but he would bear in mind the possibility of individual tours when feasible. The plan envisaged, however, was to promote contact between small groups of workers.

(67) Mr. PRATT (Australia) supported the project but asked if it would be possible at a later stage to widen the scope of paragraph 81 to include Oceania.

(68) Mr. MATIC (Yugoslavia) drew the attention to the Secretariat to the fact that in certain countries - Yugoslavia, for instance - trade

unions were not necessarily affiliated with the international trade union organizations.
(69) The Secretariat should therefore try to find a means of enabling such workers to benefit from Unesco fellowships, as had already been done in the case of those offered by the United Nations Technical Assistance or other Specialized Agencies.

(70) Mr. FAUBLAS (Haiti) wondered whether, as resolution 6.31 concerned intellectuals in particular, resolution 6.32 should not refer solely to manual workers, in order to avoid duplication.
(71) It would be sufficient to delete the words "and non-manual" at the end of the resolution.

(72) The CHAIRMAN pointed out to the Haitian delegate that the term "non-manual" did not necessarily mean "intellectual" (business employees, for example, were not manual workers in the usual sense of the term), and there was therefore an objection to deleting the words "and non-manual" from the resolution.

(73) Mr. FAUBLAS (Haiti) did not insist on the deletion of the words, but urged that, in carrying out the resolution, priority be given to manual workers.

(74) Mr. W. CARTER (Chief, Exchange of Persons Service) explained that a technical problem of terminology was involved. The co-operative and trade union organizations with which Unesco was collaborating distinguished only between manual and non-manual workers and did not speak of writers, artists or musicians as such. It was a question of clarification, since some of the trade union organizations concerned included civil servants and clerks, who were termed non-manual workers in contrast to those who worked in factories and industry; he would prefer to retain the existing wording.
(75) With regard to the question of proportions, while the Secretariat was willing to bear it in mind, the problem was a delicate one. In selecting 75 groups from about 150 applications it was not easy to analyse the proportions of, for example, older and younger workers or men and women.
(76) In reply to a question from the delegate of France, Mr. Carter said that rural workers were included under the resolution, applications being received through the International Association of Agricultural Producers.

(77) Mr. CHARYAVIBHAJ (Thailand) supported the project but asked that South East Asia should be included under paragraph 81.

(78) Mr. W. CARTER (Chief, Exchange of Persons Service) said that it had been the intention to include that area in the project.

(79) Paragraphs 77-84 were approved.

Paragraphs 85-87

(80) Approved.

(81) Mr. W. CARTER (Chief, Exchange of Persons Service) said that in developing the scheme the Secretariat had always borne in mind the need for emphasis on young workers as well as on the more mature.

Paragraphs 88 and 89

(82) Approved.

Paragraphs 90 and 91

(83) Approved.

Project 6.33: Exchange of young people (paragraphs 92-97)

(84) Miss MILLER (World's Young Women's Christian Association) said that the YWCA had been in existence for a hundred years and for the last fifty years the World's YWCA, with headquarters in Geneva, had united National YWCAs, which now numbered 64. Through Unesco, the World's YWCA had been admitted to a sisterly relationship with other international non-governmental organizations each working for a particular aspect of Unesco's programme. She pointed out that nearly every women delegate to the present Conference was a member of a YWCA.
(85) Travel grants for young persons were of special interest to her organization and she regretted that in spite of the rise in travel costs the budget for the coming two years had been reduced from $33,000 to $30,000. Unesco's travel grants were of inestimable value to young leaders in the movement, who were thereby given opportunities of travel and international contact far beyond the means of either headquarters or the local organizations. Women had hitherto had far less opportunity than men, and she urged the importance of helping them to play their full part in the international field and in supporting Unesco's programme for mutual understanding between the peoples of the world.

(86) Mr. W. CARTER (Chief, Exchange of Persons Service) explained that the reduction was due to a change in the programme. During the past three years travel grants had been made to enable members of qualified international youth organizations to participate in brief study tours, international conferences and seminars, lasting from three weeks to a month. With regard to the future, however, it was felt that long-distance travel grants should be conditional not only on attendance at short-term activities but also on development by the organizations concerned of periods of training for youth leadership lasting from three to five months. Despite the resulting need for additional financial efforts on the part of the organizations themselves, a slight decrease in Unesco's grant was considered justifiable.

(87) Mr. McCULLOUGH (United States of America) recognized the difficulties facing the Secretariat in meeting the competing needs for fellowships and travel grants and did not wish to disturb the balance that had been achieved. He urged, however, that more attention should be given to the training of youth leaders and emphasized the close relationship between travel grants and the work of the non-governmental organizations whose co-operation was sought by Unesco. He hoped

that the Secretariat would consider the possibility of transfers from other parts of the programme to increase study grants in 1955-56 and that more attention would be given to that aspect of the department's activities in 1957-58.

(88) Paragraphs 92-97 were approved.

Project 6.34: Exchange of Teachers

Paragraphs 98-102 and draft resolution 8C/DR/23.

(89) Mr. CHEVALIER (Secretary of the Commission) drew attention to the Advisory Committee's recommendation that draft resolution 8C/DR/23 be considered by the Director-General when preparing the 1957-58 programme.

(90) Mr. VITO (Italy), introducing document 8C/DR/23, which had been submitted by his delegation, stressed the mutual interest of Unesco and the International Association of University Professors and Lecturers, the recent international conference had greatly appreciated the message of support received from the Director-General. Reports at that conference had emphasized the importance of the study being carried out by the Association and the fact that no other organization was working in that field.

(91) The fact that the number of affiliates was increasing and now included Canada, Australia and other distant countries made it clear that a contract of $1,000 was inadequate to carry out the world-wide study of matters connected with the recruitment, employment and exchange of teaching staff. He therefore urged that the amount should be increased to $2,000 for each of the years 1955 and 1956.

(92) Mrs. PECSON (Executive Board) said that the proposals in draft resolution 8C/DR/23 were already contained in paragraph 101 of the proposed programme and budget. Taking into account, however, the resources of the International Association of University Professors and Lecturers and the intended programme of action, the Executive Board had decided to recommend adoption of the resolution to enable the study to be carried out in a satisfactory manner.

(93) Miss BOLLO (Uruguay) said that her delegation warmly supported the Italian proposal.

(94) (Document 8C/DR/23) submitted by the Italian delegation was approved by 29 votes to 6, with 2 abstentions.

Paragraphs 103-106

(95) Unanimously approved.

The meeting rose at 1 p.m.

# TWENTY-NINTH MEETING

*1 December 1954 at 3 p.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

(1) As there was no quorum the meeting adjourned for 10 minutes; it then opened in accordance with the provisions of Rule 69, paragraph 2, of the Rules of Procedure.

**PROPOSAL BY THE DIRECTOR-GENERAL CONCERNING THE VISUAL INFORMATION SECTION OF THE DEPARTMENT OF MASS COMMUNICATION (document 8C/PRG/28)**

(2) Mr. DESJARDINS (Department of Mass Communication) said that the object of the proposal by the Secretariat was to give effect to suggestions put forward by several delegations, and particularly by those of France and Italy. He recalled that the Commission had decided to set aside a sum of $50,000 to develop the activities of the Visual Information Section. The Director-General considered that, if the proposals contained in the document were to be carried out, a sum of $60,000 would be necessary. It was therefore proposed that an extra $10,000 be freed.

(3) Mr. BENDER (Netherlands) thanked the Secretariat for the information provided.
(4) It had been intended that $50,000 should be devoted to making a film such as "World Without End". Then the scheme had been dropped and the Secretariat had been asked to see whether the money could not be used for other purposes. Did the reference to the making of "topical shorts" mean that the scheme was being taken up in some other form?
(5) Under paragraph 248, no particular provision was made for staff. Was the one P.5 post proposed in document 8C/PRG/28 really needed?

(6) Mr. DESJARDINS (Department of Mass Communication) said that the proposal that Unesco should make another big film had been decisively defeated. At the same time the Secretariat had been asked to reinforce

its visual information activities. The proposal was made in accordance with the desire expressed for more Unesco activity in that field and on the understanding that Unesco would not itself produce documentaries.
(7) The P.5 post would also supervise the work of the staff already provided for activities in connexion with exhibition and photography.

(8) Mrs. DA VENEZIA (Italy) supported the proposals made by the Secretariat in document 8C/PRG/28.

(9) Mr. LEFRANC (France) considered that the document was the logical outcome of previous discussions. Its object was to reshape the Visual Information Section and make the production of a certain amount of visual material possible. The French delegate relied on the Director-General to reframe the plan of work to fit the proposed budget.

(10) Mr. BARBEY (Switzerland) also approved document 8C/PRG/28, for the reasons given by the French delegate.

(11) The proposals contained in document 8C/PRG/28 were approved by 23 votes to nil, with 10 abstentions.

ITEM 8.4.4 OF REVISED AGENDA: CULTURAL ACTIVITIES

Project 4.42: Study of cultural relations (paragraphs 326-340)

(12) Mr. SUZUKI (Japan) enquired about the fate of the proposal submitted by the Japanese delegation in document 8C/DR/31.

(13) Mr. HOPE (Rapporteur) explained that it had already been decided to consider the proposal for the programme for 1957-58.

Draft resolution 8C/DR/27 concerning the work of Palladio

(14) Mrs. PATRONETTO VALIER (Italy) reminded the Commission that, in document 8C/DR/27, the Italian delegation had presented a proposal concerning a study of Palladio's work. If that proposal were not accepted, Unesco could still invite the International Committee on the History of Art, which was to meet in Venice in 1955, to devote one day of its congress to the work of Palladio. The proposal would entail no special expenditure.

(15) Mr THOMAS (Director, Department of Cultural Activities) said that the Secretariat was prepared to make the approach requested by the Italian delegation.

(16) Mr. HOPE (Rapporteur) said that the International Committee on the History of Art was already preparing for the conference it was to hold in Venice in September 1955. The Secretariat should therefore get into touch with the International Committee with all possible despatch, since it would be finishing its work early in January.

(17) It was agreed that the Italian proposal (document 8C/DR/27) should be referred to the International Committee on the History of Art.

(18) Paragraphs 326-340 were adopted.

Project 4.43: Dissemination of the visual arts and music.

Paragraphs 342-350

(19) Mr. MIHALYFI (Hungary) said that experience in his country had shown that the maintenance of cultural relations was the best way to achieve international understanding. Hungary maintained systematic cultural relations with more than twenty countries, and Hungarian children had recently won prizes in a competition for children's drawings, held in India.
(20) Accordingly, his country approved the exchange of exhibitions, and could not agree with the fear expressed that the results achieved would bear no relation to expenditure. It would gladly share in any scheme organized by Unesco for the exchange of exhibition material.
(21) Coloured reproductions of works of art were excellent instruments for spreading knowledge of national cultures. It was also true, as stated in paragraph 351 of the programme, that there were still no good reproductions of works of art from certain regions, especially the Orient. It was a great pity that Chinese art was so poorly represented. It was impossible to organize international cultural relations if the culture of one-quarter of the human race, with a magnificent history and wonderful prospects, was neglected. That was yet another argument in favour of ensuring the participation of the real representatives of China in the work of Unesco.

(22) Mrs. MALAKUL (Thailand) welcomed the programme of cultural activities, which was a decided improvement on that for the previous year. She would like to emphasize that there were, in Thailand, wall paintings worthy of reproduction.

(23) The CHAIRMAN announced at that point that Bolivia had made a payment which would thenceforward entitle its delegation to vote.

(24) Mrs. DA VENEZIA (Italy) pointed out that, in document 8C/DR/25, her delegation had presented a proposal calculated to encourage relations, and facilitate the exchange of photographic blocks between publishers of popular collections of art reproductions.
(25) With regard to catalogues of reproductions of works of art, Mrs. da Venezia stressed the fact that reproduction techniques were making constant progress and that the standards adopted in preparing such catalogues should be critically considered. Such an examination could be made at one of the meetings of experts on the subject.

(26) Mr. THOMAS (Director, Department of Cultural Activities) was in complete agreement with the Italian delegation's suggestions and recalled that the

Secretariat had already approached certain publishers of reproductions of works of art.

(27) Paragraphs 342-350 were approved.

Albums of reproductions of works of art (paragraphs 351-353)

(28) Mr. UNGARETTI (Italy) asked that the words "with which the public is little acquainted" be deleted from the heading of paragraph 351. He had no objections to the work undertaken by the Secretariat, but was convinced that it was art as a whole with which the public was but little acquainted.

(29) Mr. THOMAS (Director, Department of Cultural Activities) said that the Secretariat had so far refrained from publishing reproductions of well-known works in order not to compete with those already published. Furthermore, the Secretariat believed it was interpreting the General Conference's intentions correctly in devoting particular attention to spreading knowledge of the art of the East and of certain regions which could not call upon the most up-to-date reproduction techniques.

(30) Mr. McCULLOUGH (United States of America) was ready to leave the choice of subject-matter to the Secretariat. It was important that the albums published should maintain the highest standards of quality. Such works of art were a most effective contribution to international understanding.

(31) Mr. SUZUKI (Japan) said that his delegation was particularly interested in the project, as it thought that the public in other parts of the world still knew too little about Asian art.

(32) Mgr MAROUN (Lebanon) said that the albums published by Unesco were already out of stock; their success was due as much to their originality as to their quality. He hoped that arrangements would be made for larger editions.

(33) The DIRECTOR-GENERAL was prepared to amend the heading of paragraph 351 in accordance with the Italian delegate's suggestion.

(34) Approved.

(35) Paragraphs 351-353 were approved.

Travelling exhibitions of reproductions (paragraphs 354-356)

(36) Mr. HOPE (Rapporteur) suggested that the Secretariat should consider donating scientific exhibitions to Member States after they had served their purpose.

(37) Paragraphs 354-356 were adopted.

Dissemination of art films (paragraphs 357-359)

(38) Mrs. PATRONETTO VALIER (Italy) wondered why the project relating to art films was chiefly the responsibility of the Department of Mass Communication. As the essential object of such films was to spread knowledge about works of art, the project should really come under the Department of Cultural Activities.

(39) Mr. THOMAS (Director, Department of Cultural Activities) replied that it had been thought necessary to do more on behalf of art films through the Department of Mass Communication, which had qualified specialists on its staff and was in direct contact with film producers. Previously, a very small sum had been provided in the budget of the Department of Cultural Activities, while the staff concerned were attached to the Department of Mass Communication. It had seemed desirable to bring that division of responsibilities to an end, but the Department of Mass Communication would, of course, work in close consultation with the Department of Cultural Activities on the matter.

(40) Mr. McCULLOUGH (United States of America) said that art films were liable to be of very unequal quality. The Secretariat should try to encourage commercial producers to produce better art films.

(41) Paragraphs 357-359 were adopted.

Paragraphs 360-371

(42) Adopted.

Promotion of the establishment of permanent museums of reproductions and of record and film libraries (paragraphs 372-374)

(43) Mr. CHEVALIER (Secretary of the Commission) read out the observations on paragraph 372 made by the Advisory Committee on Programme and Budget in document 8C/BUD/1, page 15.

(44) Mr. THOMAS (Director, Department of Cultural Activities) accepted the deletion of the project and its postponement until a later date, in order to offset the additions made to the programme of his Department.

(45) The postponement of the project was unanimously approved.

Draft resolution 8C/DR/41: Measures for the development of drama and the spread of popular interest in the theatre

(46) The draft resolution submitted by the delegation of Uruguay which was recommended by the Advisory Committee on Programme and Budget (document 8C/BUD/1, page 16) was unanimously approved.

Project 4.44: Translations

Paragraphs 375-391

(47) Mr. MUJEEB (India) said that his country was very keenly interested in the matter, and his Government, as was stated in paragraph 378, had made large sums available to Unesco in order that Indian classics might be translated under Unesco's auspices.

Cultural Commission of the Arab League was at present sitting on the International Commission at Beirut, and the Secretariat would welcome any measures likely to strengthen co-operation between the Arab countries on that matter.
(65) Mr. Thomas said that his Department would be glad to study the suggestions made by Mr. Massaquoi. With regard to Mr. Bender's observations, Mr. Thomas noted that contradictory opinions had been expressed by the Expert Committee on Education for International Understanding and Co-operation, on the one hand, and the Advisory Committee on Programme and Budget, on the other, with regard to the translation of works from the literatures of European languages which were not widely spoken. The General Conference had not so far taken any definite decision on the matter.
(66) In reply to Mr. Laugier, Mr. Thomas wished to make it clear that National Commissions were always consulted on translation questions. To conclude, he stressed that the observations made by the Italian delegation were very interesting. The scope of the work had gradually expanded as the result of numerous consultations and negotiations. The expansion of the work would probably later necessitate an increase in the staff and in the budgetary resources for the project. Furthermore, the very small number of translators capable of undertaking certain types of work made it difficult to carry out the plans rapidly. One of the only two French specialists in Persian, for instance, had needed three years to complete the work he had been commissioned to do.
(67) Mr. Thomas said that paragraph 389 dealt with works in languages that were not widely spoken, such as Dutch.

(68) Mr. HUZAYIN (Egypt) said that translation was one of the most important instruments of international understanding. His country had on several occasions acted as a bridge between East and West. Greek works had been translated into Arabic and thence into Latin. It was trying to co-operate with Unesco in making Eastern cultures more familiar to the West, and vice versa. Unhappily, the International Commission in Beirut had made some serious mistakes, and it had been found that the Cultural Commission of the Arab League was more effective in promoting work of the type under discussion. Egypt was trying to co-ordinate the work of translation and to set up a clearing house in Cairo. All the experience acquired would be made available to Unesco.

(69) Mr. WALKER LINARES (Chile) was pleased at the translation into French and English of representative Latin American works, which carried on the tradition established by the International Institute of Intellectual Co-operation with its earlier Latin American series.
(70) He agreed with Mr. Laugier that translations should not be confined to literary works, but that works on sociology and other sciences which deserved to be more widely known should also be translated.
(71) He asked that a preliminary enquiry be carried out in the various countries before the selection of such works was made; cultural bodies and associations of critics should be consulted.

(72) Paragraphs 375-391 were approved.

Project 4.41: History of the scientific and cultural development of mankind (paragraphs 318-325)

Report by the Working Party (document 8C/PRG/27)

(73) Mr. MUJEEB (India), as Rapporteur of the Working Party, introduced the report by saying that the matter had been most thoroughly considered. The Working Party recommended that the work begun should be continued.

(74) Mr. HAYEK (Czechoslovakia) recalled that he had already had occasion, in the Working Party, to state that specialists from his country would be glad to co-operate in the preparation of the History of the Scientific and Cultural Development of Mankind and to help in making the work an objective account of the history of humanity.
(75) The Czechoslovak delegation thought it vital that the USSR, the People's Republic of China and the countries of Central and Eastern Europe should take a part in the work of the International Commission proportionate to the part they had played in the historical progress of mankind and in the development of historical science. Their contribution would be confined to the Commission's future work and would not imply acceptance of the responsibilities assumed by the Commission earlier.
(76) The Czechoslovak delegation had also expressed doubts about the project for preparing a shorter version of the history. A work of that kind was certainly to be desired if it was the fruit of extremely careful critical work, but the question was too important for the training of the younger generation and the development of popular education to be dealt with solely on a commercial basis.
(77) Mr. Hayek said, in conclusion, that the Czechoslovak delegation would vote in favour of the continuation of the project and the approval of the proposed appropriations, subject to the reservations he had just made.

(78) Mr. SUZUKI (Japan) hoped that Japanese specialists would be able to take part in the International Commission's work.

(79) Mr. FLORKIN (Belgium) supported the Working Party's report and proposed that it be adopted.

(80) Mr. VITO (Italy) said that reference was made in the report to an Italian proposal which had been rejected. He wished to inform the Commission that his proposal had been rejected by a negligible majority.
(81) In making it he had taken his stand on the fact that it ran counter to the traditions of Unesco to publish works tending to cheaper knowledge.

(82) Mr. WARD (United Kingdom) said that the proposal raised most serious questions.
(83) Contracts had been passed by the International Commission in the full exercise of the powers bestowed on it by the General Conference. Those contracts included one for the writing of the shorter history and, if it were broken, Unesco might be sued. It was therefore in the highest degree unwise to interfere.

(48) Mr. ESTELRICH (Spain) praised Unesco's work in this field. It had, however, to be recognized that very few translations were made and that it would be a long time before major works could be translated into the principal languages.
(49) Spain had for the moment made no request for the reproduction, by that means, of what was most individual and most essential in Spanish culture and thought. Unesco did not and probably would not have the means necessary for undertaking the enormous task of translating the works of all Eastern and Western cultures. Spain was in touch with the National Commissions and the most representative intellectual bodies in the oriental countries with the object of publishing the works of those countries in Spanish and vice versa. As soon as the financial and technical aspects of the project were settled, the Spanish delegation would apply to Unesco to co-ordinate the efforts being made.
(50) The first stage of the project would consist in translating into Spanish the major poetical, literary, philosophical and historical works of the Arab world.

(51) Mgr MAROUN (Lebanon) recalled that the first International Commission for the Translation of the Classics had been set up at Beirut. He wished to know whether other similar commissions had been formed and if it was proposed to group them in an international federation comparable with the International Federation of Translators, whose establishment he had noted with pleasure.

(52) Mr. MASSAQUOI (Liberia) said that for several years he had been wanting to speak on that very subject. In Africa history was largely unwritten history, unknown to the outside world and to the African peoples themselves. What books there were had largely been written in Arabic. Some of them had been translated into French, but were almost unobtainable. Important works had been written by French and German explorers (Frobenius, for example), but had never been translated.
(53) He therefore appealed to the Commission to help in writing the history of Africa, and not only the history of Africa after the Arab invasion. There must be many works in Spanish, Portuguese and French still to be unearthed, and perhaps valuable archives in places such as Lisbon and Madrid. Unesco should give assistance.

(54) Mr. SALIM (Hashemite Kingdom of Jordan) entirely agreed with the previous speakers. If Unesco wished to reach the masses, it must speak in their languages. Hence Jordan warmly welcomed the scheme for translation into Arabic.
(55) He hoped that there would be more co-operation between the International Commission for the Translation of the Classics in Beirut and the Cultural Commission of the Arab League. It was important that Unesco should assist the International Commission in its task.

(56) Mr. LAUGIER (France) pointed out that cultural exchanges were hindered by linguistic barriers. The translation of representative works was therefore a task of the greatest importance; the French delegation strongly supported Unesco's efforts in that field and hoped that they could be intensified.
(57) Mr. Laugier added that translations made under Unesco's auspices should be as nearly perfect as possible, and stressed the need for giving National Commissions a say in the selection both of translators and of works to be translated. Specialists had criticized the quality of certain translations.
(58) Mr. Laugier considered that Unesco should not confine its attention to works of general culture or to philosophical and literary works. Certain modern scientific works were vitally important and might be of great interest to various countries. Works of that kind, however, took years to reach countries speaking other languages. Consideration should therefore be given to the possibility of having the essential scientific works of the contemporary world translated.

(59) Mr. BENDER (Netherlands) warmly supported the resolution. He drew the Director-General's attention to the fact that his National Commission had some time ago submitted a list of works to be translated from Dutch. The Belgian and Netherlands National Commissions were co-operating in arranging for translations from that language. The Netherlands would certainly give all the assistance in its power.

(60) Mrs. MALAKUL (Thailand) was also strongly in favour of the resolution. Action of the type indicated was an excellent means of promoting international understanding. Great literature was exceedingly difficult to translate and translators ought to be well paid.

(61) Mr. ABEYWICKREMA (Ceylon) said that in paragraph 378 it was stated that, from 1954 onwards, special attention would be paid to Oriental literatures. As the delegate of Liberia had said, it was just as important that attention be given to the literature of Africa.

(62) Mrs. PATRONETTO VALIER (Italy) said that, although the project had been a very modest one at the beginning, it had since developed very considerably, thanks to the competence of the Secretariat and to the project's intrinsic interest. She thought that the Secretariat should later be given larger resources for pursuing the undertaking. In addition, meetings of experts might be held from time to time, at the expense of the governments concerned, to define the criteria applicable in the field in question.

(63) Mr. CHEVALIER (Secretary of the Commission) read out the suggestions made by the Expert Committee on Education for International Understanding and Co-operation with regard to the translation of works written in European languages which were not widely spoken (document 8C/DIV/80, page 17), he also read out the observations of the Advisory Committee (document 8C/BUD/3, page 3).

(64) Mr. THOMAS (Director, Department of Cultural Activities) said that the International Commission at Beirut was for the time being the only such body dealing with translations. The remarks of the delegate of Jordan were entirely in line with the wishes of the Secretariat. An observer from the

(84) The shorter history would of course be most carefully prepared and reviewed by a competent body. It would not be a textbook.
(85) Surely one of the aims of Unesco was to ensure that knowledge was disseminated on the widest possible scale. That aim would be furthered by publication of the shorter history.

(86) Mr. BENDER (Netherlands) supported what had been said by the delegate of the United Kingdom. The matter had been most thoroughly discussed already.

(87) Mr. SHARIF (Pakistan) gave enthusiastic support to the project and entirely agreed with the delegate of the United Kingdom.

(88) Mr. SOLODOVNIKOV (Union of Soviet Socialist Republics) thought that the work in hand, on a history of mankind, was of the greatest importance. It would make a signal contribution to international understanding. Soviet scholars would be happy to share in writing those sections devoted to a history of the peoples of the USSR. The question whether or not a shorter history should be edited was a secondary problem which could be decided on within the International Commission.

(89) Mr. NIELSEN (Denmark) supported what had been said by the delegate of the United Kingdom.
(90) The point of issuing a shorter version of the six-volume history, as he understood it, was that it would appeal to many thinking people who for one reason or another could not acquire the full work. In no sense would it be an authorized history for schools. Like the larger work, it would always be open to revision.
(91) He had always insisted that the work should not represent Unesco's own philosophy of history. It would represent the views of the scholars who had drafted it.
(92) It was quite natural that each session of the Conference should find something to criticize. But to stop the work in hand would be an act of complete irresponsibility.

(93) Mr. VITO (Italy), while recognizing the force of what had been said, considered that, in view of the terms of reference given to the Working Party, he had been well within his rights in speaking of the shorter history as a textbook. The point was that the purpose of the shorter version could be differently interpreted, and hence he would move that a decision as to its publication be deferred until the next session.

(94) Mr. LAUGIER (France) emphasized that the French delegation was aware of the considerable difficulties involved in the task with which the International Commission had been entrusted. Many intellectual problems had in fact to be solved. Unesco, which had been sympathetic to the project a few years earlier, should not complicate the Commission's task by raising financial difficulties. The French delegation would therefore vote in favour of the necessary appropriations.
(95) Mr. Laugier also wished to know how the International Commission intended to collaborate with Unesco's new Member States, for he attached great importance to such co-operation.
(96) The French delegation had serious reservations to make about the publication of a shorter version of the history. It hoped that the International Commission would confine itself to bringing out the scientific and cultural history unabridged, and did not think that Unesco should take responsibility for publishing a shorter version.

(97) Mr. HUZAYIN (Egypt) said that in document 8C/PRG/27 (report by the Working Party) mention was made (page 2) of the fact that the delegate of Egypt had criticized the plan of the third volume on the grounds that not enough space was devoted to the literary and philosophical aspects of the history of Islam.
(98) Now Volume III covered the period from 400 to 1,300 A.D., when Islam had been at the height of its glory. In the existing plan of the volume, emphasis was chiefly laid on political history and architecture. The peoples of Islam felt that they had made an outstanding contribution to the cultural history of mankind in the realm of philosophy. In Islamic thought, the philosophies of Greece, of Persia, of India and of the Arab world were blended to form a harmonious whole. Islamic thought was an outstanding example of fruitful intercourse between different peoples and cultures.
(99) The literary history of Islam was also a glorious one. For no less than sixteen hundred years, great literature had been produced in Arabic, a record surpassed only by the Chinese.
(100) While appreciating the work done on Islamic history by foreign scholars, his country strongly felt that representatives of the Arab world should be called upon to contribute.

(101) Mr. FERNANDEZ QUINTANILLA (Spain) considered that the shorter version should be postponed until the principal work itself had been finished. That was the only way of gaining a proper understanding of the problem and discovering whether it was possible and desirable to publish the shorter version.
(102) He asked that, in future, commitments with publishing houses which might compromise freedom of action in pursuing the project, should be avoided.

(103) Mgr MAROUN (Lebanon) reminded the Commission that the history of the scientific and cultural development of mankind would require ten years' work and the expenditure of $400,000. It was therefore a major project. The General Conference had, so far, unhesitatingly approved the necessary appropriations, thus demonstrating its confidence in the International Commission and in its President, whom Mgr Maroun congratulated on the high standard of the numbers of the Journal published to date.
(104) Mgr Maroun noted that there had been no mention in any report that the publication of the complete work would, so to speak, depend upon that of the shorter version. In point of fact, it seemed that the publishers wished the two publications to be linked. In such circumstances, the International Commission, which was responsible for the complete edition, would also have to take responsibility for the shorter version.

(105) Mr. ZAMORANO HERNANDEZ (Chile) said that the question whether or not a work of such a wide scope was to be published in whole or in part was less important than that it should be soundly prepared.
(106) The Commission, of which Mr. Berredo Carneiro was President, could be relied on from the scientific point of view and its work would be crowned with success.
(107) With regard to the shorter version, which had been described as difficult and hazardous, the Chilean delegate sumpathized with the desire of the representative of the USSR that the Commission should study the possibilities of popularizing the History of the Scientific and Cultural Development of Mankind. The work would be of great value to scholars; it was very much more important that the great mass of workers should appreciate its historical interest.
(108) He asked Mr. Berredo Carneiro if the Journal referred to in the document under examination, could be used for that work of popularization.
(109) The delegation of Chile thought that the acceptance of new contributors was a problem which should be left to the Commission's discretion.

(110) The DIRECTOR-GENERAL said that Unesco had adopted the work plan of the history in question. That plan made definite provision for the shorter version. It had been referred to the International Commission for action. Therefore, although the Conference could negotiate with the International Commission on points of detail, it was quite powerless to rule that there should be a change in the number of volumes published or that work on the shorter version should be stopped.
(111) All that the Conference was asked to do was to make suitable budgetary appropriations for the implementation of its previous decisions.
(112) Definite legal contracts had been entered into. They had been drawn up on the advice of Unesco's legal experts and rested on the authority given by previous sessions of the Conference.

(113) Mr. McCULLOUGH (United States of America) supported what the delegate of the United Kingdom had said. As the Director-General had pointed out, the Conference had entrusted the International Commission with a definite task. Since the original decision in 1950, the Conference had on three separate occasions reaffirmed its intentions and made the necessary appropriations. As a result, the International Commission had entered into definite contracts. There was no reason at all to think that the shorter version would be prepared with less care than the longer history. Hence the Conference should approve the budgetary appropriations in question for another two-year period.

(114) Mr. BERREDO CARNEIRO (President, International Commission for a History of the Scientific and Cultural Development of Mankind) said that the International Commission understood it was responsible for planning the work in six volumes and the two shorter versions intended for different sections of the general public. The Commission had never entertained the idea of publishing a textbook for any particular type of educational establishment. All it had done was to define the types of readers for whom the shorter versions intended for the general public were to be designed.
(115) The International Commission would certainly not shirk the task of preparing those shorter versions. It would use the same scientific methods and the same machinery for consulting specialists as for the complete editio . It was prepared, furthermore, to publish material for inclusion in the shorter versions, and even chapters from those works, in the Journal. There was therefore no question of two different techniques or of two different standards of exactitude.
(116) Mr. Berredo Carneiro added that the Commission would find it difficult to arrange for the publication of six 800-page volumes, containing many maps and illustrations, unless the publishers could count on the success of a more popular work to offset a possible loss on the principal work.
(117) The question had been very carefully studied, in order that the results of so much financial and intellectual effort should be accessible not only to a small élite but also to the general public.
(118) Mr. Berredo Carneiro wished to remind the meeting that the new Member States had been invited, as early as 1952, to collaborate with the Commission. The atmosphere of the Commission's work was truly international and it hoped to appoint members, corresponding members and consultants from among specialists of those countries.

(119) Document 8C/PRG/27 was finally approved with 6 abstentions.

(120) Project 4.41, paragraphs 318-325, was also approved, with 1 abstention.

**ITEM 8.4.4.1 OF REVISED AGENDA: REPORT ON THE INTERNATIONAL PETITION IN FAVOUR OF ESPERANTO** (document 8C/PRG/3 and Addendum) **AND DRAFT RESOLUTION 8C/DR/116**

(121) Mr. BLINKENBERG (Denmark) thought it would be extremely rash and premature for Unesco to advocate the use of Esperanto. He would therefore vote against the draft resolution under consideration.
(122) In his view, neither its structure nor the number of its supporters entitled Esperanto to the status of a universal, international language. It was an auxiliary language invented by an amateur linguist who had made use mainly of components drawn from several western languages.
(123) A linguist could hardly give a favourable judgment on Esperanto. Its phonetic system was unsatisfactory for many nations; and its morphology and system of derivations was not particularly happy.
(124) As an auxiliary language, it had certain uses, but it could not be regarded as a real instrument of culture, or as a language into which the masterpieces of the world's literature could be translated. Moreover, it was not the only, nor the best, existing international language, and the possibility of using simplified forms of widely spoken languages, such as Basic English or Français élémentaire, might also be considered.

(125) Mr. LAPENNA (Observer for the Universal Esperanto Association) regretted that the Chairman

had been able to allow him only three minutes for presenting the petition signed by 16,500,000 people. Contrary to the opinion of the Danish delegate, he mentioned linguists who had expressed very favourable opinions on Esperanto (A. Meillet, M. Müller, Marr, Shishmanov, etc.). Other linguists, such as Collinson in England, Björn Collinder in Sweden, and Waringhien in France, spoke the language perfectly and had indeed published several works in Esperanto. They were in fact the only people who were in a position to give an objective and well-informed judgment on Esperanto. Mr. Lapenna said that, moreover, the Danish delegate's statements were entirely unfounded.
(126) He recalled that the Association's Research and Documentation Centre had published and distributed to all delegations a document entitled "The International Language and the Contribution of the Esperanto Movement to the Aims of Unesco". U. E. A. had endeavoured to give Unesco full information about Esperanto (Report to the Secretariat, documents submitted to National Commissions and an Exhibition, including 3,000 works, within a mere hundred yards of the Conference building).
(127) He added that a Unesco observer had attended the thirty-eighth Esperanto Congress at Zagreb. He had been able to see that nearly 2,000 delegates from the most varied countries understood each other perfectly, without translation or interpretation, during the debates and discussions, at the Summer School and artistic functions, and in private conversation.
(128) Mr. Lapenna hoped that delegates on the Commission, after seeing and reading all the information provided on the subject, would be prepared, by taking an impartial decision, to meet the wishes of the 16,500,000 people who had signed the Petition. Language barriers were one of the chief obstacles to better international understanding. Romain Rolland had said that "for people to come to an understanding, they must be able to hear and understand each other", and he had added that "Esperanto thus opens the ears of the deaf, who have been for centuries isolated in their several languages".

(129) Mr. SOMMERFELT (Norway) observed that, as far as the resolution (document 8C/DR/46) contained a statement of facts, his delegation could vote for it. Paragraph 4, however, would commit Unesco to selecting Esperanto as an international language, rather than any of the other auxiliary languages which existed. In his view, it would be rash for Unesco to make such a choice, until the question had been thoroughly studied by experts.

(130) Mr. ESTABLE (Uruguay) said that his country had submitted a draft resolution designed to encourage bilingualism throughout the American continent. The idea was that all Americans should speak two languages, Spanish and English. A study of both languages at school for one generation would be enough for the essentials of two civilizations to become familiar throughout the continent.
(131) With the same object in view, Uruguay supported the petition for the spread of Esperanto. It was necessary to weigh the arguments for and against, and then come to a decision. Mr. Estable had made his choice not for technical reasons but in a spirit of sympathy and generosity, and asked that the proposal be approved.

(132) The CHAIRMAN called for a vote on draft resolution 8C/DR/116.

(133) Rejected by 22 votes to 3, with 19 abstentions.

Draft resolution submitted by Honduras, Nicaragua, Costa Rica, El Salvador, Ecuador and Haiti (document 8C/DR/3/ rev.2).

(134) Mr. CHEVALIER (Secretary of the Commission) read out the Advisory Committee's recommendation, which advised against adopting the draft resolution, in view of its financial implications.

(135) Mr. COTO CONDE (Union of Latin American Universities) commented on document 8C/DR/3 (rev. 2), saying that the first version had been revised so as to avoid budgetary implications. The Union of Latin American Universities, upon the advice of cultural associations and governments, hoped that the draft resolution would be approved in its existing form, in accordance with the procedure of the General Conference.

(136) Mr. THOMAS (Director, Department of Cultural Activities) said that the Advisory Committee had calculated the budgetary implications of the proposal before document 8C/DR/3 had been revised the first time. As the delegate of Honduras said that it had again been revised, it was difficult to know whether the proposal still had budgetary implications.

(137) Mr. COTO CONDE (Union of Latin American Universities) explained that he was referring to document 8C/DR/3 (rev. 2), which had been distributed, since he had a copy of it in his hands.

Draft resolution 8C/DR/6 concerning the dissemination of Asian and African culture in the West

(138) The CHAIRMAN opened discussion on draft resolution 8C/DR/6, submitted by the Indian delegation and announced that draft resolution 8C/DR/17, on the same subject, had been withdrawn by that same delegation.

(139) Mr. CHEVALIER (Secretary of the Commission) read out the comments of the Advisory Committee, which had seen no need to take a decision on draft resolution 8C/DR/6.

(140) Mr. MUJEEB (India) said that his delegation withdrew the draft resolution.

Draft resolution 8C/DR/106 concerning certain International Cultural Celebrations

(141) Mr. TAMAS (Hungary) wished to comment on three points in the draft resolution. The proposal was simply that such celebrations should be held in certain countries in both continents; but, if it were approved, Unesco would be able to give them universal interest.
(142) The proposal had no budgetary implications. The draft resolution was dated 30 November but had

been submitted within the time-limit of seven days after the opening of the General Conference, in accordance with the Rules of Procedure.

(143) Mr. THOMAS (Director, Department of Cultural Activities) drew attention to two points in the last part of the draft resolution: (1) Unesco was to organize commemorative celebrations simultaneously in all countries, devoting some of its publications to them and calling upon National Commissions for assistance; (2) the Conference was to adopt a resolution concerning the commemoration of the anniversaries of certain artists and scientists. (144) The Director of the Department of Cultural Activities asked if the Hungarian delegation's intention was that the celebrations should be organized by the individual Member States, or at Unesco's instigation. He thought that the point should be made clear in view of the budgetary implications to be taken into account in the second case.

(145) Mr. TAMAS (Hungary) read out the draft resolution and said that all that was asked was that Unesco adopt the idea and communicate it to Member States. No expenditure would be entailed.

(146) The CHAIRMAN asked if the draft resolution submitted by the delegation of Hungary was seconded; the delegation of the Soviet Union replied that it was.

(147) Mr. McCULLOUGH (United States of America) proposed that a decision on the Hungarian proposal be postponed until the ninth session of the General Conference.

(148) The CHAIRMAN pointed out that by 1957 and 1958 certain anniversaries would already have gone by.

(149) Mr. SOLODOVNIKOV (Union of Soviet Socialist Republics) proposed that the delegate of Hungary be invited to prepare a new and more precise draft resolution, which would be examined at the next meeting.

(150) Approved.

(151) Mr. LAPENNA (Universal Esperanto Association) asked what interpretation was to be placed on the rejection of the draft resolution submitted by the Mexican delegation. Did Unesco intend to encourage the study of Esperanto and would the Conference take note of the conclusions contained in document 8C/PRG/3? He pointed out that, if the Commission approved those conclusions, and in particular item IV, which related to the teaching of Esperanto in Member States, Unesco could consider the results achieved during coming years, and could take decisions with a view to more specific action.

(152) The CHAIRMAN replied that the Commission had taken note of the report contained in document 8C/PRG/3, but that the Director-General was not contemplating any specific activities in the matter.

(153) Mr. FORSYTH (New Zealand) thought that, in fairness to the representative of the Universal Esperanto Association, the Commission should either receive or approve document 8C/PRG/3.

(154) Mr. NIELSEN (Denmark), seconded by Mr. MUJEEB (India), moved that the Commission take note of document 8C/PRG/3.

(155) The motion was adopted.

(156) Mr. CHEVALIER (Secretary of the Commission) read out draft resolution 8C/DR/3 rev. 2, which the Documents and Publications Service had been unable to reproduce in time.

(157) Mr. COTO CONDE (Union of Latin American Universities) said that the resolution had been drafted several times. It had been submitted in October and seemed acceptable to the Secretariat; but it was later found that it might have financial implications. The draft resolution was therefore revised, and when it was observed that further obstacles to its adoption might arise, it was redrafted and submitted in a different form. All that was asked was that the Director-General should investigate the possibility of instituting a World Culture, Science and Education Week and of establishing Unesco Awards. The Director-General would submit his conclusions to the ninth session of the General Conference.

(158) Mr. LAUGIER (France) had been pleased to find a proposal he had often advocated in the Executive Board in draft resolution 8C/DR/3 rev. 2. (159) He thought that Unesco should begin to adopt the policy of replacing expert committees by competitive awards. He recalled the number of expert committees which had met to discuss the question of propaganda in support of Human Rights, and the number of documents necessary for their work, and stated that the method was inefficient and should be discarded. From a quick calculation made by a member of the Secretariat, the work to which he had referred had cost from $400,000 to $500,000. If the Secretariat had simply offered awards and concluded contracts with the associations concerned, the cost would have been less and a large number of works on the subject would already have been available to specialists and Unesco.

(160) The CHAIRMAN called for a vote on draft resolution 8C/DR/3 rev. 2.

(161) Approved by 34 votes to 7, with 4 abstentions.

(162) Before going on to study the chapter on documents and publications, the CHAIRMAN proposed that the delegation of the USSR, which had submitted draft resolution 8C/DR/70, and the delegations of Colombia, Ecuador, Jordan, Liberia, Mexico and United States of America, which had put forward an amendment to that draft resolution in document 8C/DR/117, should meet to draw up a joint draft resolution which would be examined at the next meeting.

(163) Approved.

CHAPTER 8 : DOCUMENTS AND PUBLICATIONS SERVICE

(164) Mr. DELAVENAY (Chief, Documents and Publications Service) first reminded the Commission of two features of his Service.

(165) The Documents and Publications Service had no programme of its own; it assisted all departments in the execution of their work and in the implementation of the Organization's programme.

(166) In addition, and particularly where publications were concerned, the Service went on with the execution of the programme when the departments had finished their work. That applied to reprints, re-issues and the sale of publications. The activities of the Documents and Publications Service were therefore concerned as much with Unesco's past as with the present.

(167) Mr. Delavenay emphasized an important aspect of the problem of publications, i.e. how Member States and National Commissions could co-operate in their distribution. In 1953, the Director-General had made specific recommendations to them with a view to enlisting their help (cf. document ODG/4, pages 38 to 41). Appreciable results had already been achieved, thanks to National Commissions and sales agents.

(168) The Chief of the Documents and Publications Service invited all delegates who wished to have further information on the question to come and see him before the end of the session.

(169) He also mentioned the improvements which it had been possible to make, as a result of sending questionnaires to National Commissions. Those questionnaires, which related to a particular Unesco publication, served to determine to what extent the publication fulfilled its object, the distribution it should be given, and the languages into which it should be translated.

(170) The sale of Unesco publications was expanding and had gone up noticeably during recent weeks. Mr. Delavenay gave the percentages of income from sales in relation to the funds obligated for contractual printing in preceding years: 8% for 1951, 13% for 1952, 15% for 1953, 32% for 1954. The net income at the end of 1954 would probably exceed $100,000, as against $220,000 spent by buyers, the difference of $120,000 representing the commission of sales agents and freight charges. In 1954, a sum of $26,000 had been spent on three experiments in connexion with the distribution of the Courier in French-speaking countries, the United States of America and Uruguay. Thanks to that campaign, the number of purchasers of the periodical had risen in six months from 6,000 (in December 1953) to 25,000.

(171) Mr. Delavenay drew the Commission's attention to the annex to document 8C/BUD/1: "Draft resolution consolidating the Rules of the Publications Fund."

(172) The Fund was of great help in the distribution of Unesco publications. The Advisory Committee's draft resolution was designed to fix its structure on a firm basis. The balance of the Fund for each year would be $50,000 instead of $150,000, the excess being surrendered to "Miscellaneous Income". The Director-General would be authorized to meet the cost of postage of publications out of the Fund.

(173) In the programme for 1955-56, provision was made for the establishment of two new posts at grade P. 2, whose incumbents would be responsible for distributing publications at the regional level. That that was the first step towards regionalization. Efforts would be made to increase the circulation of Unesco publications in Spanish in Latin America, where they were not yet widely enough known.

(174) In conclusion, Mr. Delavenay said that, while the existing budget should make it possible to look forward to the future with confidence, in 1957-58 greater efforts should be made, by regional action, to distribute publications arising out of programme activities.

(175) Mr. BARBEY (Switzerland) thanked and congratulated Mr. Delavenay. He took the increase in the sale of publications to be an encouraging sign. The criticisms made at previous sessions of the General Conference about Unesco publications had not been repeated, which proved that the existing estimates had met with general approval.

(176) Mr. HUZAYIN (Egypt) congratulated the Documents and Publications Service on the excellent work it had done in making Unesco known to the world. The issuing of publications in different languages was one of the most effective ways of spreading knowledge of Unesco's aims and ideals, and also of furthering international cultural understanding. The Arabic-speaking countries were ready to help in every possible way in the publication and distribution of translations into Arabic.

(177) Mr. SALIM (Hashemite Kingdom of Jordan) associated himself with the delegate of Egypt in praising the excellent work done by Mr. Delavaney and his Service. He was very happy to note the extension of translations into Arabic and hoped that every effort would be made to increase their number still further. He hoped that any money unspent would be used for that purpose.

(178) In conclusion, Mr. Salim moved the approval of Chapter 8 in document 8C/5 and Corrigendum.

(179) Chapter 8 in document 8C/5 and Corrigendum, together with the resolution of the Advisory Committee on Programme and Budget, contained in the Annex to document 8C/BUD/1, were unanimously approved.

(180) The CHAIRMAN announced that the Commission still had to consider Project 3.4 of the chapter on Social Sciences.

(181) Mr. SOLODOVNIKOV (Union of Soviet Socialist Republics), remarking that there were no French or Russian versions of the relevant document, moved adjournment of the item until Monday, 6 December.

(182) Adopted.

The meeting rose at 7 p.m.

# THIRTIETH MEETING

*6 December 1951 at 10 a.m.*

*Chairman* Mr. BOURGEOIS (Switzerland)

**ITEM 8.4.7.5 OF REVISED AGENDA: CONSIDERATION OF THE REPORT OF THE WORKING PARTY ON DECENTRALIZATION** (document 8C/PRG/25 rev.)

1. Mr. MAHEU (Assistant Director-General) presented the report of the Working Party on Decentralization.
(2) The report fell into six sections. The first, dealing with the general problems of decentralization, laid down certain essential principles and explained and justified the detailed recommendations that followed.
(3) Sections II, III, IV and V dealt with particular problems arising from various means of decentralization. The Secretariat had already made precise proposals in document 8C/5, for dealing with some of those problems, concerning science co-operation offices, the Regional Office at Havana and National Commissions. With the Indian delegation's proposal, dealt with in section V, the Working Party had considered a new means of achieving decentralization.
(4) That part of the report contained draft recommendations, which were submitted to the Commission for its approval.
(5) In section VI, the Working Party had considered the problem of where the General Conference should usually be held, trying to determine whether the fact of holding sessions away from headquarters might help in decentralization.
(6) Mr. Maheu suggested that the Commission study the various sections of the report separately.
(7) Section I did not entail adopting any specific text and the Commission could simply take note of it.

I. General problems of decentralization

(8) The Commission unanimously noted and approved section I of the report.

II. Science Co-operation Offices

(9) Mr. MAHEU (Assistant Director-General) reminded the Commission that the question of the science co-operation offices had already been considered in dealing with the programmes of the Departments of Natural and Social Sciences.
(10) The Working Party recommended maintaining the science co-operation offices and asking the Director-General to make a careful study of their development. Mr. Maheu said that no reflexion on the Secretariat had been intended; the Working Party wished for such a study in order that the offices might be more effective.

(11) Section II was unanimously approved.

III. Regional Office, Havana (resolution 7.31)

(12) Mr. MAHEU (Assistant Director-General) pointed out that the Commission could not discuss section III without at the same time taking a decision on draft resolution 7.31 (document 8C/5, Chapter 7, paragraph 23).
(13) The Working Party had recognized that the circumstances which had led to the establishment of the Havana Office were exceptional and that decentralization by that means was legitimate. But, as the circumstances were exceptional, it recommended that the experiment should not be repeated elsewhere without a thorough preliminary investigation.
(14) If section III were approved, paragraph (ii) of the Working Party's recommendation under that head would become the second paragraph of resolution 7.31.

(15) The CHAIRMAN thought it would be better if that paragraph became a new resolution 7.32.

(16) Mr. MAHEU (Assistant Director-General) said that the Working Party had intended the evaluation mentioned in paragraph (ii) to be carried out by the Director-General, who would not request extra appropriations for that purpose. The Executive Board would only have to examine the file the Director-General had prepared; it would not have to carry out an independent enquiry, which would entail expenditure.

(17) Section III, resolution 7.31 and the new resolution 7.32 were unanimously approved.

IV. National Commissions

(18) Mr. MAHEU (Assistant Director-General) said that section IV covered draft resolutions 7.11 and 7.12 (document 8C/5, Chapter 7, paragraphs 4 and 5) and the Working Party considered it to be the core of its report.
(19) The Executive Board had devoted special attention to the question of National Commissions, and the Working Party, after studying document 8C/11, had taken over the Board's recommendations in section IV.A.
(20) Section IV.A comprised recommendations regarding the study of: (a) the structures and methods of action of National Commissions; (b) the nature of their relationships with Unesco and with their governments; (c) obstacles encountered by Member States in the establishment of efficient National Commissions; (d) methods used by Member States to associate interested groups in Unesco's work.
(21) Mr. Maheu said that the Working Party had

dwelt particularly on item (d). The National Commission should be the rallying point of a country's energies, some of which were already concentrated in the national branches of international non-governmental organizations. If those energies could be more closely linked with the National Commissions, the Secretariat's work in the international sphere would be much easier.

(22) Sir Ronald ADAM (Chairman of the Executive Board) said that the Board had emphasized the importance attached to National Commissions, both in its submission to the Conference of the proposed Programme and Budget for 1955-56 (document 8C/5 Add. 1.) and in its report on the remodelling of the future programme (document 8C/PRG/13). He quoted from paragraph 18 of document 8C/5 Add. 1, (page 3). National Commissions, however, could only be set up by Member States, and Unesco's help was therefore conditional on action by those countries. The problem of National Commissions was one of the most important items before the current General Conference.

(23) Mgr MAROUN (Lebanon) thought that section IV of the report brought out one of the most striking aspects of Unesco's activity. Unesco's lack of success in some Member States was mainly due to the situation of the National Commissions, and he was glad to see that the Conference and the Executive Board were at last giving that question special attention.
(24) Mgr Maroun wondered whether it would not be advisable to add, after paragraphs (a), (b), (c) and (d), a paragraph (e), stating that the Executive Board and the Director-General should help the National Commissions to set up machinery for collaboration, so that they should have the necessary committee structure. Some of the Commissions lacked efficient subsidiary bodies and had not the necessary basis on which to build them up. The Secretariat should give special attention to their development.

(25) Mr. VERONESE (Italy) thought that the Lebanese delegate's proposal was covered by item (c) of section IV.

(26) Mr. TREJOS-DITTEL (Costa Rica), on behalf of his delegation, welcomed the document submitted to the Commission, and the Report presented by the Chairman of the Executive Board and the Assistant Director-General. He was convinced that anything done to assist the National Commissions would help the Organization, but asked why, on the occasion of the eighth session of the General Conference, no meeting of representatives of the National Commissions had been convened. The main defect of those Commissions was that their efforts were not co-ordinated, and it was the Secretariat's task to remedy that defect.

(27) Mr. HACQUAERT (Belgium), referring to Chapter 7, paragraph 9, of document 8C/5, said that his delegation saw no point in a regional conference of European National Commissions, since the members of those Commissions had ample opportunities of meeting.

(28) He also mentioned that the Belgian Youth Associations Committee had expressed a wish that delegates of such associations be invited to attend meetings of National Commissions.
(29) With regard to publication of documents in languages other than the working languages of Unesco, the Belgian delegate said that it would be advisable to consult the National Commissions of all the countries in which the language concerned was spoken. He quoted the case of Dutch, which was the language of a large part of Belgium as well as of the Netherlands.

(30) The CHAIRMAN put Section IV.A to the vote.

(31) Unanimously approved.

(32) The CHAIRMAN opened discussion on Section IV. B.

(33) Mr. MAHEU (Assistant Director-General) said that the methods recommended by the Working Party for implementing resolution 7.12 were designed to: 1. facilitate meetings between representatives of National Commissions; 2. enable the Secretariat to make the best use of the National Commissions in carrying out the programme.
(34) Replying to the Costa Rican delegate's remarks, Mr. Maheu explained that, at its previous session, the General Conference had withdrawn appropriations earlier made for meetings of the Secretaries of National Commissions before the opening of a session.
(35) He thought, however, that another method might be considered for the future: Secretaries of National Commissions taking part in the Conference as delegates could be invited to meet unofficially. If the Costa Rican delegate found that solution satisfactory, and if the Commission approved of it, the Secretariat would make the necessary arrangements.
(36) Mr. Maheu said that the Advisory Committee recommended abandoning the projects for the appointment of national correspondents and the organization of a regional conference of European National Commissions, on the understanding that the funds provided for those two projects would be distributed among other projects under resolution 7.12. The Working Party had endorsed those recommendations, as well as the one giving first priority to resolution 7.12.
(37) The work plan would therefore be as followed: (1) visits by Secretaries of National Commissions to the headquarters of the Organization or other National Commissions; (2) missions by officials of the Secretariat; (3) assistance to conferences of National Commissions, on the understanding that the National Commissions themselves would set those conferences on foot; (4) publication of a Handbook of National Commissions and a Guide for their use.
(38) The Working Party also recommended that the appropriations for the projects covered by resolution 7.12 as a whole should be increased by $20,000.

(39) Mr. SOMMERFELT (Norway) moved the adoption of the Advisory Committee's recommendation that the projects concerning the appointment of national correspondents and the organization of a regional Conference of European National Commissions should be dropped. He also moved

that the global budget of $63,000 should be maintained without the additional $20,000 recommended in paragraph B (4), (page 4).

(40) Mr. ABDEL-RAHMAN (Egypt) proposed the adoption of the Working Party's recommendations as a whole - including the additional $20,000. Such a decision would demonstrate belief in the importance of National Commissions.

(41) Mr. KABIR (India) supported the Norwegian delegate's proposal as far as national correspondents were concerned; with regard to the conference of European National Commissions, however, the Working Party had considered that, while it was not a high priority project, it should not be entirely rejected. He shared that view.
(42) In conclusion, he was entirely in favour of the additional $20,000. Assistance to National Commissions was one of the most important parts of Unesco's programme and, if the policy of paying more attention to activities in Member States under the remodelled programme were to be pursued, more funds would be needed for developing them.

(43) The DIRECTOR-GENERAL confirmed the possibility of a meeting of European National Commissions. If, either individually or collectively, any Member States expressed a desire to hold a meeting, the Secretariat would be prepared to give assistance.

(44) Mr. SAWADA (Japan) supported the Egyptian delegate's proposal, and stressed the value of international conferences of National Commissions. The recent conference in New Delhi, which he had attended, had given great encouragement to the Japanese National Commission.

(45) Mr. SHARIF (Pakistan) strongly supported the proposal of the delegate of Egypt and quoted the Working Party's recommendation in paragraph B (1) (c) of document 8C/PRG/25 (rev.). In view of that recommendation it was undesirable to delete the European conference from the programme, and in his opinion a certain freedom of action should be given to the Director-General. He moved the adoption of the recommendations of the Working Party.

(46) Mr. McCULLOUGH (United States of America) said that, in the course of seven General Conferences, hundreds of resolutions had been adopted asking for co-operation and action on the part of Member States, but the present Conference represented the first occasion on which measures were being taken to enable Member States to play their full part in executing Unesco's programme. In the opinion of the United States delegation, the proposals of the Working Party were designed to promote co-operation between Member States and the Secretariat and to increase world-wide action in the service of Unesco. He therefore supported the proposal of the Egyptian and Indian delegates that the Working Party's report be adopted in full.

(47) Mr. FRANCOIS (France) said that the French National Commission had the privilege of constant co-operation with the Unesco Secretariat and had recognized the value of such contacts. His delegation was ready to support any projects likely to foster relations between the National Commissions and the Secretariat.
(48) If Unesco could not count on the National Commissions it would be nothing but a bureaucracy. Mr. François said that his delegation endorsed the Working Party's proposal for an increase in the appropriations for resolution 7.12.

(49) Mr. VERONESE (Italy) was satisfied with the proposal for assistance to meetings of National Commissions and added that he had not abandoned hope that such a meeting would be organized for Europe.
(50) His delegation also supported the Working Party's request for an increase in the appropriations.

(51) Mr. FORSYTH (New Zealand) joined in the praise which had been expressed for the Working Party's report. In the present instance, the New Zealand delegation was reversing its customary opposition to budgetary increases; first, because the work was so important as to merit additional funds; and, secondly, because the method of operating was an example for future programme presentation, in that the Conference was asked to approve general principles and the Executive Board and the Secretariat were allowed adequate freedom in putting those principles into practice. Such a procedure would reduce the need for the Commission to attend to details, and give more authority and more liberty of action to the Executive Board and the Secretariat, which were in a better position to work out details.

(52) The DIRECTOR-GENERAL said that, before completing the programme and budget, the Secretariat had given serious consideration to the possibility of increasing the budget for the activities under discussion; it had finally been decided that any increase above what had been recommended should be the result of the initiative of delegates and a decision by the Conference; it should not be proposed by the Secretariat.

(53) The CHAIRMAN put to the vote the Working Party's proposal for an increase of $20,000 in the appropriations for resolution 7.12.

(54) Approved without opposition, but with 2 abstentions.

(55) Mr. MAHEU (Assistant Director-General) drew the Commission's attention to paragraph 2 of Section IV.B, which recommended that the assistance to National Commissions described in paragraphs 19 and 20 of the chapter on Mass Communication be transferred and added to the work plan for resolution 7.12, with the corresponding appropriations ($30,000 for the two years).
(56) He explained that it was an activity within the competence of the Division for Relations with Member States rather than that of the Department of Mass Communication.
(57) In reply to the Belgian delegate's comment, Mr. Maheu said that, when a work was translated into, or adapted in a language spoken in several countries,

the translation or adaptation would be placed at the disposal of all those countries.

(58) The CHAIRMAN asked for a vote on the transfer proposed by the Working Party.

(59) Unanimously approved.

V. Proposal of India (documents 8C/DR/7 and 8C/DR/14)

(60) Mr. MAHEU (Assistant Director-General) said that the Indian delegation's proposal related to a new means of decentralization.
(61) India proposed setting up machinery, at its own expense, to facilitate co-operation between the National Commissions of South and South East Asia, and offered the Director-General the use of that machinery.
(62) Mr. Maheu explained that the proposal entailed action by a Member State, not the establishment of a regional organ of Unesco.
(63) The Working Party wished the Director-General to be authorized to give advice and assistance to the Office it was proposed to set up, and to submit a report on the question at the following session of the General Conference. It would be for the Conference to decide whether a similar scheme should be adopted for use elsewhere at a later stage.
(64) If the draft resolution were approved by the Commission, it would be inserted in the programme after resolution 7.12.

(65) Mr. MENDIS (Ceylon) strongly supported the proposal. His country too had participated in the New Delhi Conference, which had been the first occasion on which National Commissions had worked together. The results were to be seen in the group proposals submitted to the present session of the General Conference.

(66) Mr. KABIR (India) confirmed the remarks of the delegates of Japan and Ceylon. The success of the New Delhi Conference had suggested the desirability of setting up some kind of permanent machinery for consultation and collaboration between National Commissions in the region. The proposal of his delegation had been discussed by the Advisory Committee and the consensus of opinion had been that an office of the kind indicated could act as a clearing house and strengthen the activities of National Commissions in the region. There was no intention of setting up a regional office, and there could be no objection to the establishment of a permanent office of co-operation by a group of countries working for Unesco. He commended the idea to other regions.

(67) The CHAIRMAN put Section V, and particularly the last paragraph, to the vote.

(68) Approved without opposition, but with 1 abstention.

(69) Resolutions 7.11, as amended, and 7.12 were unanimously approved.

VI. Place of the General Conference

(70) Mr. MAHEU (Assistant Director-General) explained that the Working Party's intention, in Section VI, had been to suggest some general principles concerning the location of future sessions of the General Conference.

(71) Unanimously approved.

(72) Mr. MAHEU (Assistant Director-General) said that, when the Working Party had asked the Director-General and the Executive Board to prepare four detailed studies for the following session of the Conference, it had not underestimated the magnitude of the task, but had deemed it necessary.
(73) The next session of the General Conference would mark the tenth anniversary of Unesco's establishment. The Organization should then make a critical evaluation of its working methods with regard to decentralization, in order to determine its future policy. That was the object of the four proposed studies, which would constitute a coherent whole.

(74) The Working Party's report, as a whole, was unanimously approved.

Draft resolution 8C/DR/15 concerning Clubs of Friends of Unesco

(75) Mr. SAWADA (Japan), introducing document 8C/DR/15, said that the need for publicizing and popularizing the aims of Unesco was already well known, and his delegation considered that the establishment of Friends of Unesco Clubs, although not the only method, was a very effective one. Many such clubs existed in Japan and were proving useful instruments in promoting Unesco's aims among the people. In his opinion they deserved every encouragement, and he regretted that a resolution on the subject had been deleted from the Preliminary Draft Programme and Budget for 1955-56. The Japanese delegation had accordingly proposed the reinstatement of the project, the Executive Board and the Advisory Committee were in favour of the proposal and he hoped that it would be unanimously adopted.

(76) The proposal was seconded by the delegate of France.

(77) Sir Ben BOWEN THOMAS (United Kingdom) was in sympathy with the Japanese resolution, but pointed out that many of the organizations catering for young people during and after the school period had aims similar to those of the Friends of Unesco Clubs. He accordingly proposed the insertion of the words "where necessary" in the first line of the resolution.

(78) Mr. SAWADA (Japan) agreed to the proposed amendment.

(79) Mr. MAHEU (Assistant Director-General) said that the sum of $500 mentioned in the last paragraph of the draft resolution for the publication of a Handbook of Clubs of Friends of Unesco could easily be found in the budget. But he wondered whether it would not be preferable to wait until 1957 before publishing the Handbook.

(80) Mr. FRANCOIS (France) said there were many Friends of Unesco Clubs in France, especially in university circles, and the National Commission was anxious to put them into touch with similar clubs in other countries. The Handbook would be extremely useful for that purpose

(81) Mr. MAHEU (Assistant Director-General) did not press the point; if sufficient material could be collected in 1956, the Secretariat would be glad to publish the Handbook.

(82) Draft resolution 8C/DR/15 was unanimously approved.

Project 7.2: Study of international cultural relations (paragraphs 13-21 and document 8C/PRG/11)

(83) Mr. MAHEU (Assistant Director-General) remarked that document 8C/PRG/11 was a report on a very complex question and the Secretariat was submitting it simply as a preface to a more detailed study.
(84) The General Conference had decided, at its third and fifth sessions, that a study of the bilateral and multilateral agreements concluded by Member States should be undertaken from the legal standpoint.
(85) The study had very soon taken on a technical and political character, for it had been found that the importance of the agreements under consideration lay not so much in the texts as in the way they were applied.
(86) The Assistant Director-General said that the Secretariat wished to continue the study with the help of experts who had practical experience of the implementation of agreements.
(87) The Secretariat felt that the activities of Member States within the international framework of Unesco system and their activities under bilateral and multilateral agreements were neither contradictory nor incompatible. They could and should be co-ordinated to render them more effective in both spheres. But for that purpose Unesco needed to be thoroughly acquainted with the structure and working of the bilateral and multilateral agreements, and, if necessary, to take them into account when planning and carrying out its own projects.
(88) Mr. Maheu was convinced that, if Unesco, with the help of the National Commissions, succeeded in co-ordinating the two systems, its action would be considerably more effective.

(89) Mr. RAADI (Iran) said that his delegation had studied document 8C/PRG/11 with great interest and hoped that the Secretariat would continue its enquiries.

(90) In his opinion, the study would render great service to Member States desirous of concluding bilateral agreements, as it would enable them to profit by what had already been done in that field.

(91) Mr. CHEVALIER (Secretary of the Commission) said the Advisory Committee recommended that project 7.2 be adopted but that the appropriations proposed for 1955 for payment of consultants be cut by $2,000.

(92) Mr. ESTELRICH (Spain) warmly congratulated the Secretariat on its Report on Cultural Agreements. He had, however, a few comments to make on paragraph 19 of the General Resolutions chapter in document 8C/5, and suggested that it be amended to provide that the Committee would be composed of experts representing the various existing systems of cultural relations.

(93) Mr. MAHEU (Assistant Director-General) agreed with the comments of the delegate of Spain.

(94) Mr. GOMEZ-HOYOS (Colombia), on behalf of his delegation, supported the Spanish proposal.

(95) Mr. COWELL (United Kingdom) was not opposed to international cultural conventions but disapproved of any large-scale outlay by Unesco on the publication of texts at the present time. There were many other activities deserving of higher priority and he was in favour of postponing the project for at least two years.

(96) Mr. FREY (German Federal Republic) supported the Spanish delegate's proposal.

(97) Mr. CARBONELL (Cuba) also supported the proposal and asked for the draft resolution to be put to the vote

(98) Mr. HACQUAERT (Belgium) endorsed the United Kingdom delegate's views.

(99) Mr. MIGONE (Italy) was in favour of the proposal to convene a committee of experts. He hoped that when the committee was set up it would include not only representatives of countries with much experience in the matter, but also less experienced countries, which would be able to tell the Committee of the difficulties they had to face. He added that certain international institutions that dealt with those problems, such as the Council of Europe, should also be consulted.

(100) Mr. MONTALVO (Ecuador) supported the Spanish delegate's proposal.

(101) The CHAIRMAN asked the Commission to take a decision on the Advisory Committee's proposal regarding the cut of $2,000 to be made in the appropriations for the payment of consultants.

(102) Unanimously approved.

(103) Mr. COWELL (United Kingdom) reminded the Commission of his proposal, which had been duly seconded, to postpone the project for two years

(104) The United Kingdom delegate's proposal, seconded by the Belgian delegate, was rejected by 18 votes to 9, with 19 abstentions.

**ITEM 8.4.7.1 OF REVISED AGENDA REPORT BY THE DIRECTOR-GENERAL ON THE DRAFT INTERNATIONAL COVENANTS ON HUMAN RIGHTS AND ON MEASURES OF IMPLEMENTATION OF EDUCATIONAL AND CULTURAL RIGHTS** (documents 8C/PRG/10 and 8C/DR/121)

(105) Mr. SABA (Legal Adviser) said that, since the last session of the General Conference, the United Nations Commission on Human Rights had held its ninth and tenth sessions and drawn up draft Covenants which had been submitted to the General Assembly for examination.
(106) Unesco had been asked to comment on those drafts. With regard to the definition of educational and cultural rights, the texts adopted had already been approved by the General Conference at its previous session. Since then, the Executive Board had made certain comments on the implementation of the draft Covenants.
(107) The Commission on Human Rights had also considered how far judgment could be given on complaints of violation of those rights. It had decided that the Human Rights Committee should consider complaints concerning the violation of civil rights, but that its competence should not extend to those regarding economic, social or cultural rights. In accordance with the instructions of the Executive Board, which attached great importance to the consideration of complaints, it had been suggested that Unesco should be authorized to submit its observations to the Human Rights Committee whenever that Committe had before it an allegation of violation of the right to information.
(108) At its ninth session, the Commission on Human Rights had studied new methods of implementing human rights. Those methods had been very carefully examined by the Secretariat, which, on instructions from the Executive Board, had submitted certain observations. The Board had taken the view that the adoption of the Covenants was essential and considered that the suggested methods of implementation should not take the place of the Covenants but should supplement them. It had also stated that Unesco was in a position to co-operate fully and effectively in the application of those methods.
(109) Mr. Saba concluded by saying that the General Conference had to give its views on the observations submitted, and to issue directives for the drawing up of further observations, since the United Nations General Assembly was to examine the draft Covenants at its next session.

(110) Mr. JUVIGNY (France) thought that Unesco should keep the United Nations informed of its point of view, as in the past. He hoped that the observations submitted by the Organization would be examined as soon as possible by the Third Committee. If the General Assembly did not complete its work within a year, the texts might be amended and the Executive Board might have to reconsider the question.
(111) The French delegate said that his delegation wanted to make certain amendments to document 8C/DR/121: (1) In the third paragraph, the words "approves the directives" should be altered to "noting the directives"; (2) the last paragraph should be replaced by the following text: "(3) to include in his report, with the agreement of the Executive Board any appropriate proposals on the steps to be taken to enable the Organization to play a full part in the implementation of educational and cultural rights".
(112) The French delegation's draft resolution was seconded by the delegates of Switzerland, Belgium, Chile and Ecuador. It was put to the vote, and unanimously approved.

**ITEM 8.4.7.4 OF REVISED AGENDA – OFFICIAL SEAL AND EMBLEM OF UNESCO** (document 8C/PRG/9)

(113) Mr. DELAVENAY (Chief, Documents and Publications Service) said that the proposal submitted to the Commission for approval was based on a resolution adopted by the United Nations General Assembly in 1946 with a view to protecting the colophon, symbol and emblem of the United Nations.
(114) The proposal provided for measures designed to prevent the use, without authorization by the Director-General, and in particular for commercial purposes, of the emblem, official seal and name of the Organization, and of abbreviations of that name through the use of its initial letters.
(115) The Egyptian delegation had suggested amending the text in order to make the prohibition valid for all alphabets. Mr. Delavenay wondered whether that amendment was necessary, for it seemed to him that the existing wording covered the Egyptian proposal.

(116) Mr. SABA (Legal Adviser) remarked that Unesco's seal and emblem bore Latin characters and there might be some doubt about the scope of the prohibition. In his opinion, it would be advisable to amend the text by adding the words "in Latin or other characters" after "its initial letters" in paragraph 2(1).

(117) That amendment was approved by the Egyptian delegate.

(118) Mr. EL-ZAYAT (Egypt) proposed the following amendment to the resolution on the first page of document 8C/PRG/9: in the first line of the first paragraph under "1. Resolves", insert after the word "above" the following phrase: "as well as other designs depicting the Organization's initials in other alphabets".

(119) Mr. SANDOVAL VALLARTA (Mexico) asked the Legal Adviser how he would meet the difficulty that would arise if a commercial firm had already for some time past been using the initials of Unesco.

(120) Mr. SABA (Legal Adviser) thought that the laws of the various Member States should see to it that the prohibition was absolute.

(121) The CHAIRMAN asked whether a publication bearing the Unesco emblem, but published in a country where the emblem was not protected, could be put on sale in a country where it was protected.

(122) Mr. SABA (Legal Adviser) said that everything would depend on the measures taken by the States concerned. The draft resolution constituted a recommendation which was not automatically enforceable.

(123) Mr. CARBONELL (Cuba) asked that, as the draft resolution under consideration did not include the design of the emblem, the words "reproduced above" should be replaced by "Unesco".

(124) Mr. SABA (Legal Adviser) said that Unesco's emblem was a distinctive sign and seal for which only Latin characters should be used. He thought, however, that a distinction should be made between the seal and the use of Unesco's name in any characters whatsoever.

(125) The draft resolution contained in document 8C/PRG/9 was put to the vote and unanimously approved.

**ITEM 8.4.7.3 OF REVISED AGENDA – PUBLICATIONS IN ARABIC** (7C/6.722)

(126) Mr. DELAVENAY (Chief, Documents and Publications Service) reminded the Commission that the General Conference, at its seventh session, had adopted resolution 6.722, calling for a report to be made to the Conference at its eighth session on publications in Arabic.
(127) That report was contained in documents 8C/3 and 8C/3 Add.

(128) Mr. Delavenay added that the Commission was simply asked to take note of it.

(129) The Commission noted the report.

Draft resolution 8C/DR/12: Translation of Unesco publications into German

(130) Mr. DELAVENAY (Chief, Documents and Publications Service) said that the Advisory Committee had recommended that draft resolution 8C/DR/12 be studied with a view to inserting it in the future programme, and that it had also approved a resolution concerning the translation of Unesco publications into languages other than the official languages of the Organization.
(131) It seemed therefore that it would be possible, with the co-operation of the National Commissions in the German-speaking countries, to make a start on the implementation of the Austrian delegation's proposal.

(132) The proposal was put to the vote and unanimously approved.

The meeting rose at 12.55 p.m.

# THIRTY-FIRST MEETING

*6 December 1951 at 3.30 p.m.*

*Chairman*: Mr. MARTINEZ ESPINOSA (Ecuador)

**CORRIGENDUM: SOCIAL SCIENCES PROGRAMME – PROJECT 3.4 · SOCIAL SCIENCES AND PROBLEMS OF INTERNATIONAL UNDERSTANDING AND TENSIONS** (document 8C/PRG/29)

(1) Mrs. MYRDAL (Director, Department of Social Sciences) recalled that, after the very important joint resolution on peaceful co-operation had been adopted, Project 3.4 had been referred back for revision by the Secretariat.
(2) In revising the project, her Department had benefited from the resolutions passed, and the suggestions made, in the Commission. It had taken account of two resolutions (documents 8C/DR/21 and 8C/DR/95, not formally discussed) and had given attention to the report by the Expert Committee on Education for International Understanding and Co-operation. It had also taken such expert advice as was available in individual delegations.
(3) Some individual projects had been dropped; elsewhere the emphasis had been changed. Aid to Member States (paragraphs (161)-(163)) remained as in document 8C/5.
(4) There were now only two main projects instead of three, namely A. Peaceful co-operation, and B. International Understanding and Misunderstanding.
(5) As regarded the former, an attempt had been made to embody the substance of the Czechoslovak draft resolution, and it was proposed that Unesco should convene an inter-disciplinary meeting of social scientists from regions with different cultural outlooks.
(6) In paragraphs (152) and (153) an attempt was made to emphasize the means laid down in the United Nations Charter for the peaceful settlement of disputes, and also to give satisfaction to those who had advocated Gandhian doctrines.
(7) In paragraphs (158)-(160), it was proposed that an attempt should be made to trace the sources of international misunderstanding by means of research into the media of mass communication.
(8) She had worked on the assumption that the same budget limits should be respected. In fact, it had been possible to make a small saving of some $800.

(9) Mr. DUERING (Sweden) said that his delegation fully approved the proposals now before the Commission. They were the outcome of fruitful collaboration between the heads of departments and the experts in individual delegations.
(10) The Expert Committee on Education for International Understanding and Co-operation had discussed the matter just before the Conference and had reported thereon (document 8C/DIV/80). That report had been thoroughly discussed by the Advisory Committee on Programme and Budget (see document 8C/BUD/3), which, in general, had approved the views of the Expert Committee.
(11) He would therefore propose that the Commission adopt the following resolution:

"The General Conference

1. Takes note of the Final Report by the Expert Committee on Education for International Understanding and Co-operation (document 8C/DIV/80).

2. Recognizes that the Report contains views, suggestions and recommendations which seem likely to serve the cause of international understanding and provide criteria and recommendations for future action by Unesco in this field.

3. Invites the Director-General and the Executive Board, in executing Unesco's programme for 1955-56 and in drafting future programmes, to consider the views and recommendations set forth in this Report."

(12) Paragraphs (141)-(151), (152)-(155), (156)-(157 (a)), (158)-(160(b)), and (161)-(163) of document 8C/PRG/29 were successively adopted.

(13) Mr. KELLY (Australia) was glad to find that most of the objections that had been raised at previous meetings to the project as a whole had now been answered. He appreciated the work done by the Department of Social Sciences in revising it, and was in favour of the adoption of the Swedish resolution.

(14) Mr. FRANCOIS (France) recalled that the French delegation had made serious reservations with regard to resolution 3.4. If it was now prepared to give its approval, it was because the whole project, as recast, was more homogeneous and, what was even more important, made it clear that one of the essential functions of the Department of Social Sciences was to obtain information which could be profitably used by the other programme departments, and because it stressed the need for close collaboration in that field with the appropriate non-governmental organizations.
(15) Lastly, the project dealt with exactly the type of activity that Unesco should pursue - long-term work whose success depended to a great extent on continuity of effort.
(16) The systematic study of the factors making for international understanding and misunderstanding would provide some index of public opinion with regard to the possibility of peaceful co-operation between the peoples.
(17) Such a study was essential and the French delegation hoped that the project would be given an even larger place in future programmes.

(18) Mr. MAHEU (Assistant Director-General) asked whether the Swedish delegation wished its proposal, with the substance of which the Secretariat agreed, to take the form of a specific resolution, or whether it would be satisfied if the text appeared in full in the Commission's report, in view of the fact that approval by the General Conference in plenary meeting would give it, in common with the rest of the Report, the force of a directive to the Director-General.
(19) Apart from the fact that the proposal would, owing to its form, be difficult to insert among the other programme resolutions, it should not be forgotten that the report which had given rise to it was produced by an Expert Committee convened for consultation, and that the Director-General had simply submitted it to the Commission for information, owing to its importance.

(20) Mr. DUERING (Sweden) said that he would be satisfied if the substance of the resolution he had proposed were embodied in the Commission's report, as a decision.

(21) Mr. FORSYTH (New Zealand) was happy that the suggestion made by the Assistant Director-General had been adopted.
(22) Project 3.4, as amended by the Department of Social Sciences, showed that Mrs. Myrdal was most amenable to the suggestions that had been made, and he was confident that the Secretariat would give close attention to the report by the Expert Committee, a most valuable document.

(23) Mr. FRANCOIS (France) recalled that the idea of establishing such a committee had been put forward by France in 1952, but with different purposes in view.
(24) The French delegation had reservations to make about the way its suggestion had been interpreted, about the constitution of the Committee and about the mission assigned to it.
(25) It would not, however, oppose the discussion of the report in plenary meeting, but it wished to urge the Commission to recommend that the introduction be very carefully examined, as it had already given rise to many objections regarding both form and content.

(26) Mr. SOMMERFELT (Norway) seconded the proposal by Sweden, as amended after discussion with the Assistant Director-General.

(27) Mr. DUERING (Sweden) emphasized that the word "approve" occurred nowhere in his proposed text, which was merely a recommendation to the Director-General to give attention to the report by the Expert Committee in planning future programmes.

(28) Mr. SUZUKI (Japan) supported the Swedish proposal.

(29) The text proposed by the delegation of Sweden (to take the form of a decision in the Commission's report) was put to the vote and adopted by 27 votes to 0, with 1 abstention.

(30) Mr. CHEVALIER (Secretary of the Commission) read out draft resolution 8C/DR/88, submitted by

the Brazilian delegation in the form of an amendment to document 8C/DR/69 (International Cultural Fund).

(31) Mr. BERREDO CARNEIRO (Brazil) said that his Government and National Commission had for a long time been trying to find a solution to the problem arising from the great disparity between the Organization's resources and the real needs of Member States.
(32) The Brazilian Government wished to collaborate with the majority of Member States who were trying to stabilize the programme and budget, for the States which bore the greater part of the financial responsibility for the Organization were justified in not wishing the ceiling of expenditure to rise year after year.
(33) But, though stabilization of the budget at the existing level might be necessary, it was still desirable that Unesco's activities should continue to develop if the manifest disparity between the aid given to Member States and their real needs was ever to be reduced.
(34) For that reason, the Brazilian delegation asked the Conference to authorize the Director-General to arrange for a study, in consultation with the Executive Board, the Member States and the United Nations, of the proposal to institute an International Cultural Fund to serve the real needs of the States in the fields of education, science and culture.
(35) That extra-budgetary fund would be financed by gifts from Member States, national and international organizations, and public or private associations.
(36) When the National Commissions of various Member States - particularly in the many under-developed regions - met, they often felt that they were getting nowhere because they simply had not the necessary resources.
(37) It was essential that those countries should know and see that Unesco was concerned about their difficulties, was studying means to remedy them and preparing a report which the Director-General would submit to the General Conference at its next session.

(38) Mr. ESTELRICH (Spain) warmly supported the well-calculated and optimistic proposal which the Brazilian delegation had just put forward.

(39) Mr. ABEYWICKREMA (Ceylon) strongly supported the creation of a fund to be operated in conjunction with the other Specialized Agencies.

(40) Mr. McCULLOUGH (United States of America) said that all would sympathize with the ideas behind the Brazilian resolution. But a similar proposal had already been submitted, in connexion with the creation of an educational fund. It had been decided that, pending the outcome of discussions in progress within the United Nations whether such a fund should be set up and how much money should be devoted to it, action should be postponed until the ninth session. He would therefore propose that for the sake of consistency action on the Brazilian resolution be postponed until the ninth session.

(41) Mr. ARTHUR (United Kingdom) had wished to say the same thing, and strongly supported the United States suggestion.

(42) Mr. GOMEZ HOYOS (Colombia) said that, as the proposal was not only optimistic but realistic, it might be approved immediately on the understanding that, in two years' time, at the ninth session of the General Conference, the methods that the Director-General would suggest for its implementation would be discussed.

(43) Mr. BERREDO CARNEIRO (Brazil) thanked the delegates of the United States of America and the United Kingdom for the sympathy they had expressed for his proposal.
(44) But the great host of illiterates would not be content with expressions of sympathy; they needed action and practical measures to assist them.
(45) Mr. Berredo Carneiro assured his colleagues that, if they only travelled through India or Latin America, they would not have the heart to oppose what was at the moment merely a suggestion for a study.
(46) The division, which had become apparent at the last session of the General Conference, between States without resources which were asking for aid and more fortunate States which were seeking to restrict the field of activity, had already lasted too long.
(47) The establishment of the proposed fund was necessary, and should be given consideration without delay. The Brazilian delegation hoped that there would be a unanimous decision on the resolution so that the Commission might disperse in an atmosphere of concord and hope.

(48) Mr. ZAMORANO HERNANDEZ (Chile) agreed with the Brazilian proposal and trusted that it would meet with the unanimous approval of the Commission. Without indulging in exaggerated idealism, he considered that Unesco should embark upon a study of the proposal.

(49) Mr. ARTHUR (United Kingdom) asked what was to be done with the proposed fund. How would it be collected? From voluntary sources in Member States, or would governments be asked to contribute. How would the fund operate in relation to the United Nations Technical Assistance programme and to Unesco's own programme of technical assistance?

(50) Mr. BERREDO CARNEIRO (Brazil) said that he would not have asked for the project to be studied if he had known the answers to the questions put by the United Kingdom delegate.
(51) Each Member State would have to say how it thought the fund should be organized, how much it desired such a fund, and what methods it wished to see adopted for operating the fund. The members of the Executive Board would also have to give their views on the feasibility of the scheme.

(52) The Brazilian delegate reiterated that it would be an independent, extra-budgetary fund managed by Unesco. It would absorb smaller funds which were too numerous to be effective.

(53) It could be said immediately that it was in Unesco's power to set up such a fund, but the questions asked by the United Kingdom delegate should be left to the Executive Board, the Director-General, Member States and the United Nations to answer in two years' time, after detailed studies had been carried out.

(54) Draft resolution 8C/DR/88, submitted by the Brazilian delegation, was approved by 30 votes to 10, with 2 abstentions.

Draft resolution 8C/DR/68 on the establishment of a Latin American regional centre for secondary school teachers

(55) Mr. COTO CONDE (Union of Latin American Universities) said that the proposal submitted by the delegation of Honduras had no financial implications, as the Chilean Government had officially offered to do the work of implementing it; he therefore asked the Commission to approve it.

(56) Mr. ZAMORANO HERNANDEZ (Chile) said that the scheme would provide a happy answer to one of the most urgent cultural needs of Latin America. Secondary education in those countries required standardization of curricula, methods, techniques, information, etc. At the proposed Regional Centre, serving teachers from the whole continent would meet to follow basic courses on education and the different branches of science and literature. In addition, the Centre would provide information, and deal with exchanges and experiments in the different types of secondary education.
(57) The Government and the National University of Chile, which were anxious that Unesco should collaborate as far as possible in founding a Latin American regional centre for secondary school teachers, were prepared to provide premises, laboratories and some of the teaching and administrative staff for the Centre.
(58) In giving its assent to the proposal put forward by the delegation of Honduras, Unesco therefore stood to lose nothing, on the contrary, the support it gave would add to its prestige.

(59) Mr. ABEYWICKREMA (Ceylon) said that, according to the sponsors of the proposal, Unesco would not be called upon to contribute. But reference was made to help from the Director-General. Did that imply financial commitments?

(60) Mr. ELVIN (Director, Department of Education) said that the request could be met within the funds for which provision was already made in document 8C/5.

(61) Mr. GOMEZ HOYOS (Colombia) warmly supported the draft resolution and, in view of a certain reluctance to incur expenditure on the project, suggested that Unesco should give technical aid to the proposed Centre by arrangement with the Chilean Government. In that way, the new institution would at least have a certain international standing.

(62) Mr. ROMANO MUNOZ (Mexico) was very sympathetic towards the draft resolution and did not wish to oppose it in principle. But the extreme diversity of methods and curricula in Latin American secondary education led him to believe that, independently of any aid that Unesco might give, all those countries would first have to reach agreement on the necessary standardization of secondary education. Besides Unesco's aid, a Latin American congress on secondary education should be held without delay to bring about the standardization which was essential if the studies to be promoted in Chile were to produce practical results.

(63) The DIRECTOR-GENERAL said that under resolution 1.213, already adopted, he had all the authority he required to examine projects of the kind mentioned in the resolution. He already had authority to spend money on the proposed centre.
(64) He would be glad to consider the question of assisting such a centre. But, at the stage reached, the Conference ought not he thought to adopt specific resolutions of that kind without having had the time to consider them in detail.

(65) Mr. BERREDO CARNEIRO (Brazil) said that the Director-General's comments were in line with his own ideas. The Chilean delegation could rest assured that the Secretariat was interested in its proposal.
(66) For the rest, many of the resolutions already adopted left the Director-General ample latitude for action of that sort.

(67) Mr. NIELSEN (Denmark) recalled that at an earlier meeting the Chairman had ruled that resolutions which were not definite amendments to the programme and were submitted after the time-limits laid down could not be discussed, since they would not have been considered either by the Advisory Committee or by the Executive Board.
(68) If the proposal was a definite amendment to the programme, it should have been submitted when the Commission was discussing resolution 1.213.
(69) It was not correct to say that the proposal had no budgetary implications. It would certainly use up some of the money already appropriated for such purposes over the next two years.
(70) Was the proposal an amendment to the list of fields enumerated in paragraph 199 of the Education chapter of the programme and budget as being those in which assistance might be requested free and compulsory schooling, teacher training, etc.?

(71) Mr. WARD (United Kingdom) said that, in adopting the various programme resolutions and appropriations, the Conference was authorizing the Director-General to proceed with certain types of work. Thereafter, if a particular Member State wanted work done on its territory, it should write to the Director-General to put its case, and the Director-General would then weigh one claim against another.
(72) It would be most unfortunate if the Programme and Budget Commission were to be flooded with resolutions calling for specific work to be undertaken in specific places.

(73) Mr. FORSYTH (New Zealand) agreed. The Commission had a tendency to go into excessive detail. It should confine itself to questions of principle, and leave the Director-General free to implement its decisions as he saw fit.

(74) Mr. COTO CONDE (Union of Latin American Universities) said that the proposal under discussion

had been submitted in good time to the competent authorities in Unesco by Chile, Honduras and the Union of Latin American Universities, and the wording of it had been decided in agreement with them.

(75) Mr. FRANCOIS (France) endorsed the observations of the delegates of the United Kingdom and New Zealand.

(76) The French delegation would not take a decision on such an important matter as the establishment of a regional centre for secondary teachers on the basis of a draft resolution a few lines in length, with no supporting explanation or background information.

(77) Mr. ABDEL-RAHMAN (Egypt) said that, while the Executive Board had recommended that the procedure for aid to Member States should resemble that for Technical Assistance, no definite procedure had been adopted. Thus proposals calling for technical aid should merely be referred to the Director-General, who would decide between them, and award priority treatment, on their merits.

(78) Mr. ZAMORANO HERNANDEZ (Chile) explained that the aim of the proposed regional centre was to improve the standards of secondary teaching in Latin America by achieving a more even level in education between different countries. He mentioned, at the same time, that the first South American Seminar on Secondary Education would shortly open in Santiago, Chile.

(79) In that instance, recourse had been had to Technical Assistance, which was considered to be the best method of procedure. The Chilean proposal was really that the Director-General should take due account of the wishes of the Latin American countries.

(80) The proposal had been carefully thought out, and the Director of the Department of Education had in his possession a memorandum giving full background information.

(81) Objection might be raised to the form of the proposal but to belittle it and speak lightly of it as an improvisation ceased to be merely inept and became offensive and irritating.

(82) Mr. WARD (United Kingdom) wished it to be understood that a vote against the proposal in no way implied that the delegation so voting did not want the Director-General most carefully to examine the proposal, or wanted him to refuse all aid to the project in question. If his delegation voted against, it would be because it felt that the Director-General had been given sufficient authority already to deal with it on its merits.

(83) Mr. ELVIN (Director, Department of Education) said that the proposal had in fact been discussed with the Secretariat in rather fuller detail than might at first sight appear. The proposal was most interesting, and he had the Director-General's authority for saying that, if it were submitted in the ordinary way, it would receive the most sympathetic consideration.

(84) The resolution of the delegation of Honduras (document 8C/DR/68) was put to the vote and rejected by 17 votes to 5, with 17 abstentions.

(85) Mr. MAHEU (Assistant Director-General) confirmed the interpretation to be given to the rejection of the draft resolution submitted by Honduras, it in no way implied that the proposal would not be studied, but merely that it would be examined with other similar requests received from Member States.

Draft resolution 8C/DR/106 (rev.) International Cultural Celebrations

(86) Mr. CHEVALIER (Secretary of the Commission) submitted draft resolution 8C/DR/106 (rev.) and read out an amendment to the second paragraph made by the Indian delegation, as follows

"Authorizes the Director-General, in consultation with the Executive Board, to study the question of marking the centenaries of writers, painters, musicians, scientists, philosophers and other men of genius who have enriched the cultural heritage of mankind, and to invite Member States and their National Commissions to organize suitable celebrations for this purpose."

(87) Mr. MUJEEB (India) strongly supported the Hungarian proposal. His delegation had proposed an amendment to the second paragraph. If that amendment were adopted his country would provide the names of distinguished Asian figures whose centenaries might suitably be celebrated.

(88) Only persons of international importance should be proposed for celebration by Unesco. In other cases, individual States or National Commissions could take the initiative.

(89) Mr. FRANCOIS (France) endorsed the request by the Indian delegate and further suggested that the Unesco Courier should take up the question by publishing biographies and articles about eminent men whose names appeared in the list.

(90) Mr. McCULLOUGH (United States of America) supported the resolution as amended, and hoped that suitable additions to the list of distinguished figures would be proposed from other parts of the world.

(91) Mr. TAMAS (Hungary) agreed with the amendment suggested by India, since it did no more than confirm the importance of commemorating in common the great figures of world culture.

(92) Mr. COWELL (United Kingdom) said that nobody would quarrel with the ideas behind the resolution.

Educationalists in many countries were endeavouring to familiarize the public with the achievements of persons who had made their mark in history.

(93) The idea of celebrating anniversaries was not new. August Comte had drawn up a calendar of his own for the purpose. Some of the names he had chosen would sound strangely to modern ears.

(94) The list of persons worthy of celebration was already exceedingly long, and to add more names would require more days than there were in the year. Any action by Unesco on the lines suggested would most certainly not increase the prestige of the Organization. Such action could best be left to the initiative of Member States. He would therefore move that no action be taken on the resolution.

(95) Mr. FORSYTH (New Zealand), as the headmaster of a large school, agreed with the previous speaker that to lay down a list of names would be to impose a formidable burden on educationalists. If there were too many celebrations, the effect intended would be entirely lost upon young people.

(96) An interesting suggestion had been made by the delegate of France. Perhaps the Courier could from time to time provide educationalists with factual data about the lives of famous men and women, in order that, every year, a few such great men and women might be selected for celebration.

(97) Mr. SOLDATOV (Union of Soviet Socialist Republics) said that the task of Unesco was to improve the cultural level of mankind, and adoption of the proposal would contribute to that end.

(98) He could not share the apprehensions felt by the delegate of New Zealand. Under the proposal, only five centenaries would be celebrated in two years.

It would increase the prestige of Unesco if such celebrations were made world wide.

(99) The Hungarian resolution, as amended by India (document 8C/DR/106 (rev.), was put to the vote and adopted by 28 votes to 9, with 7 abstentions.

(100) Mr. BERREDO CARNEIRO (Brazil), with the Chairman's consent, read out a recommendation adopted by the International Folklore Congress, held at Sao Paulo in 1954 under Unesco's auspices. It ran as follows "that a meeting of a limited number of experts representing the main trends be convened under Unesco's auspices at the appropriate time to make an exhaustive study of such problems and, if possible, to propose the solutions called for."

The meeting rose at 5.50 p.m.

# THIRTY-SECOND MEETING

*8 December 1971 at 10 a.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

**EXAMINATION OF THE REPORT OF THE ADVISORY COMMITTEE ON PROGRAMME AND BUDGET ON PROPOSED REDUCTIONS TO KEEP THE DRAFT BUDGET WITHIN THE PROVISIONAL BUDGET CEILING (documents 8C/BUD/4 and 8C/BUD/5)**

(1) The CHAIRMAN invited the Commission to examine documents 8C/BUD/4 and 8C/BUD/5. He explained that the cuts in document 8C/BUD/4 were proposed by the Director-General, and those in document 8C/BUD/5 by the Advisory Committee on Programme and Budget. Both aimed at keeping the budget within the limits laid down by the General Conference at its thirteenth plenary meeting.
(2) The Chairman then called on Mr. Gardner Davies, Chairman of the Advisory Committee, to make a statement.

(3) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) recalled that, when the Programme and Budget Commission had concluded its work on the draft programme and budget, the budget corresponding to the programme approved had exceeded the approved provisional budget ceiling by $362,713. The Advisory Committee had consequently been asked by the Programme and Budget Commission to adapt the programme and budget to that ceiling, working on the basis of proposals made by the Director-General. The reductions suggested by the Director-General were contained in the second part of document 8C/BUD/4. The Committee had paid tribute to the way in which the Director-General had accomplished the difficult task of proposing reductions, often on the basis of contradictory advice from the Advisory Committee and the Programme and Budget Commission, and, on the whole, the Advisory Committee considered his proposals to be very good.
(4) The procedure followed by the Advisory Committee had been to examine the proposed cuts one by one and, where it did not agree with them, to propose equivalent reductions in some other part of the programme. For example, in the chapter on Natural Sciences, the Committee had opposed the proposed cut of $15,000 in paragraph 137, but had suggested a reduction of $15,000 on the project in paragraph 102 - Basic research on cancer (document 8C/BUD/5). The decision had been carried by 6 votes to 4, with 1 abstention.
(5) In conclusion, Mr. Gardner Davies advised the Programme and Budget Commission to adopt the same procedure, in examining the proposed reductions, as that followed by the Advisory Committee.

(6) The CHAIRMAN pointed out that the Commission should start by taking note of the First Part of document 8C/BUD/4 (Resumé of Budgetary Effects of Decisions taken by the Programme and Budget Commission and the Administrative Commission - pages 1-8). In that connexion, he drew delegates' attention to the Note on page 4, on which a recent comment had been received from the Netherlands delegate; the Note read as follows:

"In addition, the Programme and Budget Commission recommended that, if funds are available, the subvention to ICSU be increased by $40,000 for two years."

(7) At the Chairman's request, Mr. SKENAZI (Secretary, Advisory Committee on Programme and Budget) read out the letter in which the Netherlands delegate proposed deletion from the above Note of the words: "if funds are available". According to the Netherlands delegate, the Programme and Budget Commission had unconditionally approved the Netherlands proposal for the $40,000 increase mentioned in the text.
(8) With the summary record of the Commission's fifteenth meeting (document 8C/PRG/SR.15 prov.) before him, Mr. Skenazi read out the paragraphs relating to the discussion which had arisen out of the Netherlands proposal, and to the decision taken in the matter.

(9) The CHAIRMAN remarked that everything depended on whether the decision previously taken by the Commission in regard to the Netherlands proposal had been correctly understood.

(10) Mr. KRUYT (Netherlands) said that, as he had pointed out in his letter, he had been under the impression that the proposal in question had been unconditionally approved. That was still his opinion.

(11) The DIRECTOR-GENERAL considered the Note on page 4 to be a faithful account of the conclusions reached by the Commission, i.e. that the subvention to the International Council of Scientific Unions should be increased only if other funds became available for the purpose.

(12) Mr. ABEYWICKREMA (Ceylon) believed that the decision had been to approve the additional sum, provided that funds were available.

(13) Mr. SCOTT (United States of America) stated that it was the view of his delegation that the approval of the sum had been contingent upon surplus funds being available in some other part of the programme.

(14) When attending the Advisory Committee on Programme and Budget, Mr. SOMMERFELT (Norway) had thought that he had heard a clear statement of what had been decided in the Programme and Budget Commission. After hearing the summary record read, however, he realized that the position was not so clear and he feared that he had voted on the wrong premises. He would like the question to be taken up again in the Advisory Committee.

(15) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) pointed out that the Advisory Committee had not voted on the subject. There had been a note in an information report from the Director-General, stating that the Programme and Budget Commission recommended that additional funds be granted if available; as no funds were available, the Committee had taken no action or vote.

(16) Mr. SOMMERFELT (Norway) regretted that he had used the word "vote". What he had meant was that his attitude had been determined by the information in document 8C/BUD/4; it might have been different if he had had the summary record before him.

(17) Mr. PAGE (Canada), referring to his own verbatim notes, thought it quite definite that the motion to provide ICSU with an additional $20,000 per annum had been contingent upon savings being made in some other part of the Natural Sciences programme.

(18) Mr. MAHEU (Assistant Director-General) pointed out that the Commission had to take a decision on two separate questions:

(a) a legal question: had the decision taken by the Commission at its fifteenth meeting been correctly interpreted by the Secretariat?

(b) a question of substance: did the Commission thenceforth wish to recommend that the subvention to the International Council of Scientific Unions be increased by $40,000, even if no additional funds became available during the two-year period 1955-56?

(19) Since the Commission was at liberty to reopen the discussion on the latter question, Mr. Maheu requested that it concur in the Secretariat's interpretation of the decision which it had taken at its fifteenth meeting.

(20) Mr. FAWZI (Egypt) agreed with the Canadian delegate in thinking that the Secretariat's interpretation was the right one. He very much hoped that, at such a late stage in the Commission's work, that discussion, which he at least had considered closed, would not be reopened.

(21) At the Chairman's suggestion, the Commission agreed to accept the Secretariat's interpretation for the time being, on the understanding that the discussion of the question of substance could be reopened at a later stage.

(22) The Commission having taken note of the First Part of document 8C/BUD/4, the CHAIRMAN requested delegates to consider the reductions proposed in the Second Part of the same document, in conjunction with those in document 8C/BUD/5. He pointed out that, in setting out each reduction, a reference had been inserted in the margin to the relevant paragraph in document 8C/5; in discussing the various proposals, therefore, the order of those paragraphs should be followed.

**PART I – GENERAL POLICY**

Paragraph (17)

(23) The reduction proposed in document 8C/BUD/4 was approved.

**PART II – PROGRAMME OPERATIONS AND SERVICES**

**CHAPTER I – EDUCATION**

Paragraphs (51) and (167)

(24) The reductions proposed in document 8C/BUD/4 were approved.

Paragraph (175)

(25) The CHAIRMAN pointed out that the Director-General had proposed, document 8C/BUD/4, a reduction of $16,800 on the project concerned. The Advisory Committee's proposal, on the other hand, was that a cut of only $14,800 should be made (document 8C/BUD/5) and that a saving of $1,500 which had become available under General Resolutions, paragraph 21, should be transferred to the project (Evaluation of a national pilot project in school education).

(26) Mr. FRANCOIS (France) proposed that the $1,500 just mentioned should not be used for the project outlined in paragraph (175), but should be deducted from the $2,000 cut proposed by the Advisory Committee in paragraph (384) (Associated Youth Enterprises). That cut would thus be brought down to $500.

(27) Mr. ELVIN (Director, Department of Education) stated that the Secretariat had no serious views on the subject. The original sum of $16,800 had been reduced to $2,000, but the Advisory Committee had decided that a sum of $1,500 which had become available under General Resolutions, should be added to it, making a total of $3,500. The result of the French proposal would be to restore the appropriation for paragraph (175) to $2,000, leaving the project in paragraph (384) with a reduction of only $500 instead of $2,000.

(28) The French delegate's proposal concerning paragraphs (175) and (384) was approved.

Paragraphs (185), (192), (213), (218); (413 and (145)

(29) The reductions proposed in document 8C/BUD/4 were approved.

CHAPTER 2 – NATURAL SCIENCES

Paragraphs (58) and (79)

(30) The reductions proposed in document 8C/BUD/4 were approved.

Paragraph (102)

(31) The CHAIRMAN explained that the cut proposed in document 8C/BUD/5 concerned basic research on cellular growth. As he wished to take part in the discussion as an ordinary delegate, he asked Mr. Umreiko, Vice-Chairman of the Commission, to take the Chair temporarily.

(32) Acting as Chairman, Mr. UMREIKO (Soviet Socialist Republic of Byelorussia) called upon Mr. Bourgeois to speak, adding that he would remain in the Chair until the end of the discussion on paragraph (102).

(33) Mr. BOURGEOIS (Switzerland) expressed keen regret that the Advisory Committee should have seen fit to recommend reducing by $15,000 the funds earmarked for basic research on cellular growth. Those funds, he reminded the Commission, had been requested so that Unesco might investigate ways of co-ordinating such research at the international level. The importance of such an enquiry had been repeatedly stressed, since 1948, in resolutions and statements issued by the Economic and Social Council, a Committee of Experts convened jointly by the United Nations and Unesco, the International Advisory Committee on Research in the Natural Sciences Programme, the Executive Board of Unesco and the present Commission.
(34) The reduction proposed in document 8C/BUD/5 had been approved by the Advisory Committee, but only by a very small majority. Mr. Bourgeois therefore hoped that the Commission, fully aware of the extent to which the project concerned might help in solving the cancer problem, would recommend to the General Conference that it should not make the proposed cut.

(35) Mr. FRANCOIS (France) seconded the delegate of Switzerland. He pointed out that, if the reductions proposed in paragraph (102) were put into effect, the funds available for basic research on cellular growth would be reduced to $2,680 for two years. It should be noted that the Advisory Committee had recommended restoring the $15,000 which the Director-General had suggested cutting out in paragraph (137) (Technical Aid to Member States). Even without those $15,000, there would still be an appropriation of $30,000 for the project in paragraph (137), and that would appear to be all the more adequate since sums set aside in the Exchange of Persons Chapter for the financing of certain fellowships might be considered as additional to it. Mr. François therefore proposed that the Commission recommend to the Conference that it approve the reductions proposed by the Director-General in paragraph (137) and that the original estimates for paragraph (102) be retained.

(36) Mr. VERONESE (Italy) seconded the two previous speakers and expressed his conviction that the study proposed in paragraph (102) was eminently suitable for Unesco.

(37) Mr. HACQUAERT (Belgium) was in favour of the $15,000 reduction proposed by the Director-General in paragraph (137).
(38) In order to clarify the discussion, he recalled that the Advisory Committee on Programme and Budget had voted on two questions, one after the other.
(39) The first question had been whether the Committee wished to link together the decisions it would be taking on paragraphs (102) and (137). The Committee had voted in favour of linking those decisions by 7 votes to 4, with 2 abstentions.
(40) The second question had been whether to reduce the appropriation for paragraph (102) by $15 000. The Committee had voted in favour of that reduction by 6 votes to 4, with 3 abstentions.

(41) Sir John SIMONSEN (United Kingdom) thought that most of the speeches made had been somewhat emotional. It was a purely scientific problem and the question was whether or not Unesco could contribute to its solution. As the delegate of Belgium, a distinguished biochemist, had said in the Advisory Committee on Programme and Budget, there was no scientific evidence that research on cellular metabolism would necessarily affect the cancer problem. Personally Sir John Simonsen believed that the solution might well come, not from teamwork in the laboratory, but from some unexpected source. Feeling, therefore, that Unesco could not usefully contribute to the solution of the problem, the United Kingdom delegation supported the proposal of the Advisory Committee on Programme and Budget.

(42) Mr. STOLETOV (Union of Soviet Socialist Republics) declared that his delegation had found the arguments of the delegates of Switzerland, France, Italy and Belgium in defence of the project in paragraphs 101-102 entirely convincing. The Soviet delegation therefore supported the maintenance of the sum of $15,000 under paragraph (102).

(43) Mgr MAROUN (Lebanon) pointed out that the funds provided under paragraph (102) were intended to enable Unesco to co-ordinate, at the international level, research on cellular growth being carried out in the various countries. He considered that, even if such research did not in the end provide the answer to the problem of cancer, the funds in question could not be appreciably reduced without a danger of misinterpretation by the press, and without, consequently, harming Unesco's prestige. He accordingly advocated the retention of the original estimates.

(44) Mr. LINKSON (Australia) fully shared the humanitarian feelings expressed by the delegates of Switzerland, France, Italy, Belgium and the USSR, but he was not convinced that they were right in judging it to be a humanitarian project. In his view, it might be a particularly cruel project, for it might raise false hopes among sufferers from cancer throughout the world. If the proposed reduction would mean a hold-up of cancer research, the Australian delegation would be unable to support it, but it was obvious that a vast amount of cancer research would

continue, whether Unesco entered the field or not. His delegation therefore seconded the proposal of the Advisory Committee on Programme and Budget.

(45) Having listened to all the arguments for and against the project, Mr. PAGE (Canada) wished to go on record as supporting whole-heartedly the proposal of the Advisory Committee to reduce it by $15,000.

(46) Mr. NIELSEN (Denmark) recalled that, when the project in paragraph (102) had been debated earlier in the programme, the Danish delegation had voted for it. The project in paragraph (137) however, was also very near to Mr. Nielsen's heart, and he found himself in a difficult position.
(47) As a solution of the problem before the Commission, Mr. Nielsen suggested that it might be wise to accept the reduction proposed by the Advisory Committee, instructing the Secretariat to find out, by negotiations with WHO and correspondence with Member States, whether it was likely that Unesco could be of any assistance in the field of basic research on cellular growth. He asked the Secretariat if such a task could be carried out with the remaining appropriation, and stated that he would reserve his attitude until he had received a reply to his question.

(48) Mr. AUGER (Director, Department of Natural Sciences) was emphatic in pointing out that Unesco by no means proposed, as the United Kingdom delegate appeared to think, to embark independently on research into cellular growth. What it did propose was to co-ordinate and facilitate work in progress in that field in the various countries. Even though very large sums might not be required for that purpose, an adequate appropriation should nevertheless be available for travel, so that the necessary contacts might be established from the outset between members of the Unesco Secretariat, laboratories in the various countries and eminent scientists particularly interested in cellular growth. The original estimates in paragraph 102 might possibly be reduced to some extent, but they should in any case remain well above the figure of $2,680, which would result from the cut of $15,000 proposed by the Advisory Committee.

(49) Mr. MUDALIAR (India) supported the proposal to maintain the sum of $15,000; he supported it not on emotional grounds, however, but on the basis of his personal experience as a medical man. In his view, it was not true to say that Unesco's participation in the programme would create false hopes. It should not be thought that Unesco was suddenly going to discover data which research in so many parts of the world had failed to reveal; but it seemed to him that it would be appropriate for Unesco to enter into the picture at the present stage; the Organization had a valuable part to play in co-ordinating such research, disseminating results and stimulating new activities. It had the great advantage of being in contact with scientists of all disciplines in every part of the world. It was true that excellent scientific journals existed, but it took some time for a scientist to bring out an article in a journal, and it would be far quicker for him to transmit the results of his research to Unesco for dissemination.
(50) The Indian delegation therefore considered that there was no justification for reducing the appropriation for paragraph 102 and moved that the original appropriation be restored.

(51) Mr. BROWNELL (United States of America) stated that his delegation shared the views expressed by the delegates of the United Kingdom, Australia and Canada and would support the reduction proposed by the Advisory Committee.

(52) Referring to a remark made by the delegate of the United Kingdom, Mr. BOURGEOIS (Switzerland) claimed that he had approached the problem as a scientist and had not let his feelings get the better of his judgment. He was only too aware, however, of the dangers of science, when it was not inspired by humanitarian considerations, not to urge once more that the original estimates in paragraph 102 be restored.
(53) Despite the assertion of the United Kingdom delegate, not all scientists agreed that there was practically no connexion between research on cellular growth and possible answers to the cancer problem. Even if such answers had finally to be sought elsewhere, Mr. Bourgeois wished to emphasize that the search could not be left to chance, and he felt that the task of international co-ordination which Unesco proposed to undertake with the funds mentioned in paragraph 102 was nevertheless extremely worth while.

(54) Mr. RAADI (Iran) was also in favour of restoring the appropriation concerned. There was no reason why all necessary precautions should not be taken to prevent the project from raising false hopes among those afflicted with cancer.

(55) The CHAIRMAN then invited the Commission to vote on the proposals by the delegate of France.
(56) The first proposal was to recommend to the General Conference that it withhold its approval of the reduction of $15,000 in paragraph (102) proposed by the Advisory Committee.
(57) The above proposal was adopted by 25 votes to 13, with 5 abstentions.

(58) The CHAIRMAN next asked the Commission to vote on the proposal to recommend that the General Conference approve the reduction of $15,000 in paragraph 137 proposed by the Director-General.
(59) The above proposal was unanimously adopted.
(60) Mr. Bourgeois having resumed the Chair, the Commission went on to examine the reductions proposed in paragraphs (172) onwards.

Paragraphs (172) and (196)

(61) The reductions proposed in document 8C/BUD/4 were approved.

Paragraph (197)

(62) Referring to the economy of $12,000 which it was proposed to make by abolishing the Istanbul Branch Office, Mr. TUNCEL (Turkey) asked Mr. Auger to explain to the Commission why it was proposed to close the Office.

(63) Mr. AUGER (Director, Department of Natural Sciences) explained that the discussions of the General Conference, and especially those of the Working Party on Decentralization, had shown the wisdom of focussing the work of the Science Co-operation Offices on the execution of the programme and of cutting down their information and documentation activities. The Istanbul Office was hardly in a position to follow the new trend. Moreover, it had never been completely autonomous, since it had always been more or less a branch of the Cairo Office. If the Office were closed, however, the Secretariat would do its utmost to ensure that Turkey and its National Commission continued to benefit from assistance in the field of science, similar to that which they had hitherto received from the Office. All that was involved was a change in the method of affording such assistance.

(64) Mr. PHOTIADES (Greece) drew the Commission's attention to the fact that the Istanbul Office was the only Science Co-operation Office in Europe. In his view it was extremely desirable to maintain it and even to make it independent so that it could work directly with the Secretariat, instead of being subordinate to the Cairo Office, as it had been in the past.

(65) Mr. TUNCEL (Turkey) emphasized the importance of the past achievements of the Istanbul Office and proposed, as already suggested by Mr. Photiades, that the post be maintained as an independent Office.

(66) Mr. SAMBURSKY (Israel) seconded the view expressed by the Director of the Department of Natural Sciences. He recalled that the Istanbul Branch Office had been established to serve three non-Arab countries in the region, namely Iran, Israel and Turkey. He was not aware of the opinion of Iran, but in Israel it had been found more effective to be in direct contact with Headquarters in Paris. He did not think that Turkey need feel that her prestige was involved: it was merely a question of adopting the most effective method and of saving Unesco money.

(67) Mr. ABEYWICKREMA (Ceylon) asked Mr. Auger which countries were at present being served by the Istanbul Branch Office.

(68) Mr. AUGER (Director, Department of Natural Sciences) replied that the Istanbul Office primarily served Turkey. He thought that the aid which the latter at present received from the Office could be furnished under Unesco's new programme to govern its relations with National Commissions.

(69) Mr. RAADI (Iran) thought that the Secretariat should be able to work out a solution which would satisfy Turkey, by guaranteeing that it would continue to receive aid in the scientific field comparable to that so far supplied by the Istanbul Office.

(70) Mr. TUNCEL (Turkey) again urged that the Office be maintained.

(71) The CHAIRMAN pointed out that, unless the Commission was prepared to agree to the suppression of the Office, together with the corresponding appropriation of $12,000, the provisional budget ceiling would be exceeded. The Commission would then have to decide whether it was willing to go before the General Conference with estimated expenditure slightly higher than the provisional budget total approved by the Conference at its thirteenth plenary meeting.

(72) Mr. KRUYT (Netherlands) stated that, at the end of the chapter on Natural Sciences, he wished to revert to the question of the subventions to ICSU.

(73) The CHAIRMAN took note of the remark of the delegate of the Netherlands, which made him feel even more strongly that the Commission ought to make up its mind at once about the "provisional ceiling".

(74) Mr. FORSYTH (New Zealand) would strongly oppose any suggestion to exceed the approved budget ceiling. He had already agreed to a series of reductions simply on the grounds that the ceiling could not be exceeded; to change that decision would make it necessary to reopen the discussion on every programme item that had been cut.

(75) Sir Charles WEBSTER (United Kingdom) seconded the remarks of the delegate of New Zealand.

(76) Mr. PHOTIADES (Greece) remarked that, since the decisions regarding the budget ceiling were provisional, the Commission should be entitled to make necessary adjustments forthwith, even if there were a slight discrepancy between the resultant figure and the maximum "provisionally" approved.

(77) Mr. FAWZI (Egypt) agreed with the delegates of the United Kingdom and New Zealand that it would be advisable to keep to the provisional ceiling already adopted.

(78) Mr. HACQUAERT (Belgium) pointed out that most delegations had by now received instructions from their governments which compelled them to consider the "provisional ceiling" as a final figure.

(79) Sir Ben BOWEN THOMAS (United Kingdom) interpreted "provisional" to refer to "instructions"; when the General Conference agreed upon a given figure, it gave instructions to the Programme and Budget Commission to work within that ceiling and all the work which the Commission did would be provisional until the General Conference, at its final meeting, confirmed the Commission's decisions and converted them into marching orders for the Executive Board.

(80) Mr. ABEYWICKREMA (Ceylon) fully agreed with the delegate of the United Kingdom and the Assistant Director-General, and strongly opposed any further discussion of the provisional budget figure.

(81) Mr. TUNCEL (Turkey) again urged that an effort be made to find some way of retaining the sum of $12,000 originally provided in the budget for the Istanbul Office.

(82) The CHAIRMAN warned the Commission of the

danger which lay in rejecting some of the proposals for reductions without making cuts elsewhere to offset the resultant increase in expenditure.

(83) Mr. MAHEU (Assistant Director-General) agreed with the delegate of the United Kingdom that it was necessary, in practice, to keep within the provisional budget total.
(84) He wished to make it clear that, if that opinion were shared by the Commission as a whole, the only way to retain the $12,000 for the Istanbul Office would be to economize on other items.

(85) Mr. HACQUAERT (Belgium) said that, if the duties discharged by the Istanbul Office could be carried out by other means, there should be no major objection to closing the Office.

(86) Mr. AUGER (Director, Department of Natural Sciences) stated that Turkey could be given all the necessary guarantees.

(87) In view of the foregoing discussion, Mr. TUNCEL (Turkey) agreed to the suppression of the $12,000 which had been earmarked for the Istanbul Office.

(88) Mr. MAHEU (Assistant Director-General), thanking the Turkish delegate, explained that the steps that would be taken by the Secretariat to compensate for the disappearance of the Istanbul Office, would consist, at the scientific level, of affording Turkey the services of the Headquarters staff of the Department of Natural Sciences, while, in a general way, the Turkish National Commission would receive the assistance available under resolution 7.12, provided that the Turkish Government requested it.

(89) Sir Ben BOWEN THOMAS (United Kingdom) expressed admiration for the generosity of mind shown by the delegate of Turkey, who had proved that it was possible to arrive at a truly international point of view and act as a citizen of the world. The United Kingdom delegation very much appreciated the attitude of the delegate of Turkey.

(90) Paragraph (197) was adopted.

Paragraph (198)

') Adopted.

(92) Returning to the question of the subvention to ICSU, Mr. KRUYT (Netherlands) recalled that it had been agreed by a large majority that a sum of $220,000 per annum was necessary for ICSU; the only question had been how to find the funds. He therefore moved that the Director of the Department of Natural Sciences be asked to find the necessary money within his Department's budget.

(93) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) suggested that the delegate of the Netherlands be asked to propose an equivalent reduction elsewhere to offset the increase which he advocated.

(94) Replying to a question from the CHAIRMAN, Mr. AUGER (Director, Department of Natural Sciences) stated that, if the General Conference so instructed him, the Director-General would certainly endeavour to find the sum necessary to offset the proposed increase in the Natural Sciences budget. That would, however, be no easy task.

(95) Mr. HACQUAERT (Belgium) observed that, if the Secretariat managed to find the necessary funds, it would inevitably be at the expense of other projects. He wondered if there were any chance of making a slight reduction in the figure of $20,000 per year, corresponding to the proposed increase.

(96) Mr. KRUYT (Netherlands) pointed out that, during the earlier discussion, the representative of ICSU had said that, in order to carry out its work effectively, ICSU required an additional sum of $100,000 a year. The additional $20,000 proposed thus represented only part of what was needed.

(97) Mr. DUERING (Sweden) observed that the Commission would be faced with the same problem when it came to the subvention to the International Council for Philosophy and Humanistic Studies (CIPSH) in the chapter on Cultural Activities. He thought that Unesco should try gradually to achieve some sort of balance in its subventions to the two organizations, both of which were doing valuable work. He pointed out that it was more difficult to obtain money for the humanities than for the natural sciences. In view of the need to keep within the budget ceiling, however, the Swedish delegation would reluctantly agree to the reductions proposed by the Advisory Committee, both for ICSU and for CIPSH.

(98) The CHAIRMAN suggested that the Commission might invite the General Conference to recommend that the Director-General allocate to the International Council of Scientific Unions, over and above the agreed subvention, such amounts as he might be able to economize during the period 1955-56, without detriment to the implementation of the programme adopted.

(99) Dr. MUDALIAR (India) thought that document 8C/BUD/4 was so excellent and well balanced that there was no need to continue to discuss it item by item. He moved that it be adopted in toto and that the Commission suggest that, if any savings were effected in the course of the year, the Director-General, in consultation with the Executive Board and taking account of comments made during the eighth session of the General Conference, be authorized to increase certain subventions.
(100) The above proposal was seconded by the delegations of Ceylon, the United Kingdom and Egypt and adopted.

(101) The CHAIRMAN did not wish, for the time being, to submit documents 8C/BUD/4 and 8C/BUD/5 as a whole to the Commission for approval, as suggested by the delegate of India. He invited the Commission to continue its examination of those documents chapter by chapter instead of paragraph by paragraph, as thitherto.

(102) Mr. GARDNER DAVIES (Chairman of the

Advisory Committee on Programme and Budget) pointed out that there were no further proposals for modification in document 8C/BUD/5.

**CHAPTER 3 – SOCIAL SCIENCES**

(103) Adopted.

**CHAPTER 4 – CULTURAL ACTIVITIES**

(104) Adopted.

**CHAPTER 5 – MASS COMMUNICATION**

(105) Adopted.

**CHAPTER 6 – EXCHANGE OF PERSONS**

(106) Adopted.

**CHAPTER 8 – DOCUMENTS AND PUBLICATIONS**

(107) Adopted.

**PART III – GENERAL ADMINISTRATION**

(108) Adopted.

**PART IV – COMMON SERVICE COSTS**

(109) Adopted.

(110) Mr. SALIM (Hashemite Kingdom of Jordan) proposed that, if savings were effected, the surplus funds be used, not only to increase the subventions to ICSU and CIPSH, but also to increase the appropriation for assistance to Palestinian refugees.
(111) This proposal was accepted.

(112) Mr. MAHEU (Assistant Director-General) reminded the Commission that it was really for the Executive Board to decide, during the financial year, how to allocate any sums that had been economized. Proposals such as that just made by the delegate of the Hashemite Kingdom of Jordan would in fact curtail the freedom of the Executive Board and the Director-General in that respect. It was therefore not advisable to make many more proposals of that kind.

(113) Dr. HIGGINS (World Health Organization) asked for the word "cancer" to be replaced by the expression "cellular growth" in document 8C/BUD/5 and that the title of section B, paragraph 101, of project 2.22 (document 8C/5 Natural Sciences Chapter) be altered accordingly.

(114) Mr. MAHEU (Assistant Director-General) assured the WHO representative that the English, French and Spanish texts would be brought into line, and that the words "basic research on cancer" would be replaced by "basic research on cellular growth".

Draft resolution 8C/DR/123: Measures to promote the use of means of mass communication to increase mutual confidence and understanding among the peoples of the world, submitted by Canada, Colombia, Czechoslovakia, Ecuador, France, India, Lebanon, Mexico, Union of Soviet Socialist Republics, United Kingdom and United States of America.

(115) Mr. STOLETOV (Union of Soviet Socialist Republics) drew attention to the fact that the press, radio and film were among the most important conquests of the mind of Man, for they influenced everyday life and the morals of every nation. They were capable of rendering inestimable services to the cause of international understanding and peace, but they could also be used as a means of defeating that same cause; no more powerful weapons existed for the stimulation of hatred and the sowing of suspicion and mistrust that led to war. The fundamental task of the General Conference was to ensure that mass media were used to promote Unesco's aims, as set forth in Article I of the Constitution. During the eighth session of the General Conference, delegates had heard speeches by women of India and the Philippines, laying emphasis on the importance of educating children for international understanding and peace, but all such efforts would be set at nought if mass media were allowed to implant distrust and hatred in the hearts of the young. The General Conference would not have fulfilled its obligations if it did not do everything in its power to fight against all forms of propaganda designed to incite men to aggression.
(116) The Soviet delegation had been very happy to note the desire for co-operation and mutual understanding shown by the delegations sponsoring the draft resolution, and it very much hoped that the latter would be unanimously approved by the General Conference. The unanimous adoption of the resolution would be warmly welcomed by the Soviet people, for, since 1951, all propaganda designed to constitute a threat to peace had been forbidden in the Soviet Union. The Soviet people, however were unaccustomed to fine and empty phrases and they would look forward confidently to the translation of the resolution into practical action. Mr. Stoletov therefore hoped that, if the draft resolution were approved, all Member States of Unesco, the Executive Board, the Director-General and the Secretariat would do all in their power to see that it was implemented, considering it as a fundamental part of Unesco's programme.

(117) Sir Kenneth GRUBB (United Kingdom) expressed his delegation's appreciation of the contribution to the work of the General Conference made by the Union of Soviet Socialist Republics and other friends. It had been a pleasure to his delegation to work with them, and it fully supported the draft resolution before the Commission.
(118) Like the Soviet Union, the United Kingdom deplored any tendency to inject hatred into discussions or relations between the nations. Often, in international organizations, there had been draft resolutions designed to prevent war propaganda, but they themselves had sometimes been expressions of propaganda, based on assumptions unacceptable to those who understood democracy and freedom of information and ideas in the sense that his delegation and the people of the United

Kingdom understood them. Peace with justice and freedom was sought by all, and mass media should be used to promote that aim. In the United Kingdom, however, it was not felt that it was the function of governments to control information or prevent propaganda, so that the United Kingdom delegation would have preferred not to use the words "undistorted information" but to base the resolution on resolutions 290 (IV) and 424 (V) of the General Assembly of the United Nations, which called on all nations to remove barriers to the free exchange of information and ideas. Nevertheless, despite that reservation, the United Kingdom delegation fully supported the draft resolution.

(119) In speaking of the removal of barriers to the free flow of information, the United Kingdom delegation meant also information about ideas and not merely columns of statistics or eulogies of achievement. It wished to see Unesco encourage, as the Organization was indeed already doing, the full and free confrontation of the thoughts, values and ideas which, throughout history, had determined the practical conduct of States and man. It wanted Unesco's meetings to be a true meeting of minds, intent on the pursuit of justice, freedom and peace, and it hoped that, as a result of the lead given by Unesco, such contacts of mind would be not only between States, but between the peoples whose welfare they were responsible for safeguarding. Above all, the United Kingdom delegation wished the present exchange of views to lead to practical action demonstrating the sincerity with which the resolution was put forward.

(120) The United Kingdom delegation associated itself with the resolution and expressed appreciation of the initiative taken by the delegate of the Union of Soviet Socialist Republics.

(121) Mr. AFTALION (Argentina) warmly welcomed and supported the draft resolution because it so admirably expressed the point of view which had been upheld by his country in the Economic and Social Council on 9 April 1954.

(122) Mr. SCOTT (United States of America) said that his delegation was glad to support the joint resolution, which was constructive and affirmative in both approach and content. The resolution, sponsored by eleven delegations whose countries girdled the world, appealed to all who were concerned with the dignity of man to encourage in every country the use of press, radio and films for the promotion of better relations between the peoples, and invited all Member States to promote the use of mass communication in the interest of increasing mutual confidence and understanding among the peoples of the world.

(123) The resolution made it clear that, to achieve those ends, it was essential to ensure freedom of expression and to remove barriers to the free flow of information. That was a view to which the United States had always subscribed and which was inserted in their Constitution and Bill of Rights. When the resolution became an expression of the views, not merely of the eleven countries sponsoring it, but of the entire Conference, it might well mark a milestone on the road towards better international understanding. However, much depended upon the degree to which it was carried into effect. If it helped to remove the obstacles and restrictions which had hitherto kept the peoples in ignorance of each other, their aspirations and achievements, the labours of those who had evolved the resolution would not have been in vain.

(124) Like the United Kingdom delegation, the delegation of the United States had felt that the word "undistorted" might lend itself to misinterpretation. It conjured up the spectre of censorship, government control and artificial restrictions imposed upon the press, radio and films. That was a concept which the American people had always firmly rejected and they found repugnant any suggestion that straight news reporting might be distorted information. People in the United States of America did not believe that it could be left to any government authority to decide what news was likely to be conducive to improved international relations; it was considered essential that the people should have free access to all the news, whether it originated at home or abroad. As we read in St. John's Gospel: "And ye shall know the truth, and the truth shall make you free". Universal application of that principle would be a major factor in bringing the peoples of the world closer together, lifting the burden of ignorance from them and at the same time giving them the tools to contribute to the achievement of that peace towards which they all aspired.

(125) The United States delegation therefore supported the draft resolution warmly and sincerely, and hoped that it would meet with the approval of the General Conference.

(126) Mr. SEDES (France) was most gratified at the spirit of co-operation which had induced so many countries to join together in submitting the draft resolution set out in document 8C/DR/123, and he briefly explained how important it was.

(127) As the hour was late, it was agreed, at the CHAIRMAN's proposal, to postpone further discussion on document 8C/DR/123 until the afternoon meeting.

The meeting rose at 1.20 p.m.

# THIRTY-THIRD MEETING

*8 December 1951 at 3.30 p.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

Draft resolution 8C/DR/123: Consideration of measures to promote the use of means of mass communication to increase mutual confidence and understanding among the peoples of the world (continued)

(1) Dr. MUDALIAR (India) said that the resolution represented the culmination of the Conference's work; its submission towards the end of the session was evidence of the degree of unanimity reached among delegates and a token of the feeling which was rapidly spreading through Member States.
(2) The Conference had been an eventful one for several reasons. It had been attended by the largest number of Member States to date; new Members had been welcomed; and the resolution, if adopted, would go a long way towards demonstrating to Member States and the people of the world Unesco's true ideology. It was encouraging to see that the resolution appealed to the people of the world to use every effort, individually and collectively, to counteract attempts to undermine peace. It would be welcomed by Member States, and delegates would return home with evidence that, at the eighth session of Unesco's General Conference, a duty was imposed on every citizen to endeavour to interpret the spirit of the resolution, in the quest for happiness, well-being and the protection of human rights all over the world.

(3) Mr. FAUBLAS (Haiti) considered that, of all the resolutions submitted to the Conference, resolution 8C/DR/123 was perhaps the most deserving of delegates' attention. In the name of the Haitian people, the delegation of Haiti begged the other delegations to approve it unanimously, and indeed by acclamation. It hoped that the resolution would be effectively and honestly applied, so that it would have the force of law.

(4) Mr. DE SALIS (Switzerland) was sure that every delegation would have been pleased to sponsor the draft resolution. The text exactly expressed the feelings of the Swiss people with regard to peace. Freedom of information and objective commentaries on events were indeed essential features of the functioning of democracies. The Swiss delegate hoped that the resolution would be effectively implemented everywhere.

(5) Miss BOLLO (Uruguay) supported the proposal. Uruguay believed in complete freedom of information through the cinema, wireless and press, and the Uruguayan people would never resign themselves to censorship.

(6) She expressed her confidence that truth would spread throughout the world, thanks to freedom of information, and did not share the opinion of those who said that the press was governed solely by its own interests. Reference had also been made to women's mission in the world, and the Uruguayan delegate said that women believed in a peace founded on honour, liberty, respect for honest toil and consideration for human freedom.
(7) The Uruguayan delegation would vote in favour of the proposal.

(8) Mr. CARBONELL (Cuba) said that his delegation could accept no restrictions on the freedom of the press, which was one of the constitutional principles of his country. Liberty of the press was the buttress of peace. The more attention was paid to freedom of the press and to the free expression of ideas, the more easily would better understanding be achieved among men.

(9) Mr. LI U-YING (China) stressed the undeniable complexity of the question of peace. That morning the word "falsification" had even been used in that connexion. The Chinese delegate, however, would place the emphasis on the value of the guiding principles of freedom and sincerity. Recalling the words of a speaker at the previous meeting, he stressed the fact that to talk at length about culture was not enough. Culture was too often used as a means to other ends. He concluded by expressing his ardent desire for a free and genuine peace.

(10) Mr. HAYEK (Czechoslovakia) said that his delegation attached considerable importance to the draft resolution. In the course of recent history the interests and independence of the Czechoslovak people had been gravely threatened by pressure and attacks which had largely taken the form of a tendentious use of the media of communication. Similar campaigns had compromised the interests of other peoples and, indeed, the peace of the world.
(11) Mr. Hayek recalled that the National Assembly of his country had in 1951 passed a law prohibiting war propaganda. For that reason the Czechoslovak delegation was interested in any measures calculated to emphasize the peaceful purposes and genuine objectivity which should characterize all news services. It was anxious that the exchange of information and the comparison of ideas should be developed along those lines, in order to provide a basis for, and strengthen, mutual understanding, friendship and co-operation among the peoples of the world.
(12) The Czechoslovak delegation had accordingly given its support to the Soviet draft resolution and had taken part in preparing the draft under consideration.

It had been pleased to find that several delegations had put forward the same ideas and had agreed on the text. That went a long way towards reducing tensions in a matter in which Unesco could play a useful and perhaps decisive part. The Czechoslovak delegation therefore associated itself with all those who proposed the unanimous approval of the resolution.

(13) Mr. MICHALOWSKI (Poland) supported the resolution, in spite of the difficulty of combating the 24-hour daily stream of war propaganda being issued through mass communication media in some parts of the world.
(14) Doubts had been expressed during the discussion whether certain parts of the resolution might not interfere with the principle of freedom of information. In the opinion of the Polish delegation, however, Unesco's Constitution, the United Nations Charter and the resolution adopted by the United Nations in 1947 implied a plain duty to oppose the use of mass communication for the criminal purpose of spreading propaganda for hatred and war.
(15) It could be argued that such action would infringe the Declaration of Human Rights; but Article 29 of that Declaration provided that freedom of information was subject to restrictions defined by the regulations of State defence, public order, security, health and morals. Just as in trade there was no freedom for the sale of pornographic literature or traffic in persons, so in propaganda there must be no freedom to encourage hatred and war. Radio, which was one of the finest media for promoting culture, must not be used for the annihilation of man; and despite Unesco's limited possibility of influencing political propaganda, all means of mass communication at the disposal of Unesco and its Member States must be used to implement the resolution and promote Unesco's aims and the well-being of mankind.

(16) Mr. DUERING (Sweden) added the Swedish delegation's support to the important resolution, which he regarded as a promise for the future. He recalled that some years before there had existed in Europe a community of minds known as "the republic of letters". He had always hoped that Unesco would create a republic of free minds devoted to the promotion of culture, and he was convinced that culture must be based on the free flow and exchange of information.
(17) The Swedish delegation whole-heartedly supported the resolution.

(18) Mr. SHARIF (Pakistan) associated himself with the spirit of the resolution, which called for the use of all means of mass communication to promote peace and co-operation. He coupled his support with a wish and a prayer that the spirit be transformed into practice so that the resolution would not remain one of so many empty professions of faith.

(19) Mr. VO VAN LUA (Viet-Nam) was entirely in favour of the draft resolution, which was inspired by the highest sentiments of humanity and justice.
(20) He wished, however, to comment on the last paragraph but one. Although the Viet-Namese delegation was against any censorship of the press or of the various means of expressing ideas, it was none the less true that freedom of expression could be a two-edged weapon. For ten years Viet-Nam had been the victim of freedom of expression in certain forms. In some cases, moreover, even objective information could be tendentious.
(21) In the circumstances, the delegate of Viet-Nam wished the last paragraph but one to be amended as follows:
"...to take the necessary measures to assure freedom of expression in normal circumstances and to remove barriers to the free flow of objective and pacific information between Member States...".
(22) The last suggestion, incidentally, followed out one of the ideas voiced by the Czechoslovak delegate.

(23) The CHAIRMAN felt that the point raised by the Viet-Namese delegate was primarily a question of interpretation. He proposed that his comments be noted, but pointed out that it would be inadvisable at the last moment to redraft a text which had been worded after long and careful thought.

(24) Mr. FORSYTH (New Zealand) supported the comments of the Chairman. The resolution was the product of great labour and if conceived in sincerity, could be a turning point in world history. There must be no doubt that each signatory had the full support of his government, otherwise it could only be a farce.
(25) For his part, he accepted the resolution as a sincere expression of the combined efforts of the great nations whose names were attached to it, and he would be sorry to see it altered in any way.

(26) Mr. CARBONELL (Cuba) thought that, if the word "undistorted" were deleted, the draft could be unanimously approved.

(27) Mr. AMMOUN (Lebanon) said that his delegation was happy to be among the authors of the resolution, and was very pleased at the attitude of mind to which it bore witness. In his opinion, the text could form a common basis for all Member States in their work for freedom of thought and for peace.

(28) The CHAIRMAN thought he would be interpreting the feelings of the different speakers correctly if he proposed that the Commission adopt the draft resolution by acclamation.
(29) Draft resolution 8C/DR/123 was adopted unanimously by acclamation.

Draft resolution 8C/DR/104: Emergency aid to States afflicted by natural disasters.

(30) Mr. BRICHET (France) first reminded the Commission of the disaster which had just ravaged several countries in Latin America, and Haiti in particular. He pointed out that in such a situation the universal impulse to give aid might well take shape in the repairing of material damage, and added that the French delegation regretted that neither the United Nations nor the Specialized Agencies had any relief fund for meeting disasters of that kind. After commenting on his delegation's proposal, Mr. Brichet hoped that the Commission and the General Conference would adopt the resolution, which had no budgetary implications.

(31) Mr. CARBONELL (Cuba) seconded the proposal. His country had been the first to go to the aid of Haiti in the recent disasters suffered by its people. The assistance given had consisted in the provision of food, medical supplies and over $50,000. By virtue of his office he had himself been responsible for giving that aid, which had established permanent ties between Cuba and Haiti.

(32) The CHAIRMAN put the resolution to the vote and it was unanimously approved.

Draft resolution concerning the Future Programme (document 8C/BUD/2 Add. 1).

(33) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) said that document 8C/PRG/13 had been referred to the Advisory Committee after preliminary discussion by the Programme and Budget Commission. Three questions were to be studied

(1) the definition of general and special activities;

(2) criteria for selection and development of major projects within the future programme, and

(3) directives to the Director-General and the Executive Board for implementing the remodelled programme.

Draft resolution 8C/DR/86 had also been referred to the Committee.

(34) He recalled briefly the history of Unesco's efforts to concentrate the programme, which had started with the adoption at the fifth General Conference of a decalogue of ten major items of activity. The seventh General Conference had set up a working party to study the future programme, whose recommendations had been circulated to Member States for comment, and finally, during the past year, the Executive Board, after long discussion, both formal and informal, had drawn up document 8C/PRG/13, which was an invitation to the eighth General Conference to take practical steps towards the reorientation and the remodelling of Unesco's programme.

(35) The Advisory Committee had examined the questions referred to it and had realized that, while the Conference had to give specific guidance to the Director-General and the Executive Board for preparing the 1957-58 programme, it was important to leave room for freedom in the details of the programme. The Committee's conclusions were submitted in document 8C/BUD/2 Add. 1, which, while not a model of perfection, was at least a practical step forward. He hoped that the Commission would recommend the document for adoption by the General Conference.

(36) In conclusion, he paid a tribute to the Advisory Committee for its spirit of co-operation and its concern with the interests of the Organization as a whole rather than with those of individual Member States. The resolution which had been prepared was of great importance to Unesco's future and he formally moved its adoption.

(37) The CHAIRMAN, on behalf of all his colleagues, thanked the Advisory Committee and its Chairman for the detailed and thorough work they had performed for the Commission.

(38) Sir Ronald ADAM (Chairman of the Executive Board), speaking on behalf of the Board, paid a warm tribute to the Advisory Committee on Programme and Budget. He had been present during the discussions of the Committee and appreciated its concentration on the practical action which the Board had hoped would result from document 8C/PRG/13.

(39) Mrs. HEFFELFINGER (United States of America) supported both the resolution and the report, which, far from representing hastily considered action, were the implementation of ideas long discussed by the Secretariat, the Executive Board and the Conference. The debates during the present Conference had shown a spirit of co-operation in seeking to promote the welfare of the Organization and concern that Unesco was not making sufficient impact on the intellectual world or on the people, the document was the result of long-range planning to enable Unesco to take its proper place in the present-day world. While the gradual transformation of ideas into practical plans was not perfect, in her opinion it represented an admirable balance between the divergent, and sometimes conflicting, needs and interests of Member States.

(40) The resolution was a milestone in Unesco's history and, if adopted and accepted with good faith, could make the eighth General Conference a memorable occasion.

(41) Mr. JUNANKAR (India) supported the resolution, which had been formulated as a result of compromise and the practice of international understanding among members of the Committee.

(42) It had been necessary at the present juncture to take stock of the situation and for the first time it had been admitted that Unesco was not yet making sufficient impact on the intellectual world or on the masses. He hoped that in implementing the resolution a just balance would be struck between activities for the Organization and activities for the world in general. Permanent activities were not enough, for Unesco would be judged not on its work at headquarters, but on what it did within Member States, without which it could not gain the support of the people.

(43) For their spirit of give-and-take and international understanding he commended the report and the resolution for adoption by the Commission.

(44) Mr. VERONESE (Italy) said that his delegation supported the draft resolution and congratulated the Advisory Committee on its work. In particular, he stressed the importance of the document, which, with the resolution recently adopted on strengthening National Commissions, marked an important stage in Unesco's development. He asked all delegations to call the attention of their Governments to the importance of those directives.

(45) Mr. Veronese also wished to make it clear that the work contemplated in the document could be carried out only with the whole-hearted assistance and active support of Member States. He therefore asked them to facilitate the Director-General's work in preparing the 1957-58 programme.

(46) Mr. FRANCOIS (France) congratulated the Executive Board on document 8C/PRG/13, which was a real exercise in self-examination on the part of Unesco; he pointed out that the document had provided

the basis on which the Advisory Committee had drafted the resolution under consideration.
(47) The French delegation supported the resolution, more particularly for the following reasons:

(i) in answer to repeated demands for concentration, the Advisory Committee had produced a concise document, which was thus more likely to be read and understood.

(ii) the draft resolution also added a number of important ideas to document 8C/PRG/13; in particular, it accentuated the interdependence of the two parts of the programme, i.e., the general activities representing the Organization's permanent functions, which were of interest to all Member States, and the special activities designed to meet particular needs of Member States.

(48) The French delegation hoped that Unesco would continue to promote the growth of an international community of minds, and thought that it should not become a mere organ for distributing aid to Member States. It was therefore inadvisable to encourage one type of activity to the detriment of the other and, in particular, to develop special activities at the expense of general activities. If the Organization ever had larger funds, they should be equally divided between the two categories. Subject to those comments the French delegation enthusiastically supported the draft resolution.

(49) Sir Ben BOWEN THOMAS (United Kingdom) supported the resolution and hoped that it would be approved by the General Conference. He shared the sentiments of some of the previous speakers, especially the delegate of France, who had paid a tribute to the Executive Board. He wished especially to pay a tribute to the Chairman of the Board, whose long and extensive labours had contributed so greatly to the preparation of the report. At the end of his term of office he was leaving a testament for which all would be grateful.
(50) The United Kingdom delegation, however, did not believe, as the Chairman of the Advisory Committee had seemed to imply, that the Board's report was simply a new decalogue to replace the one submitted by the fifth General Conference; it was rather an effort to present in summary form the experience and experiments of the past nine or ten years.
(51) He congratulated the Chairman of the Advisory Committee on his excellent work.

(52) Mr. DUERING (Sweden) joined in the tributes expressed by the United Kingdom delegate.
(53) The Swedish National Commission was particularly interested in three items in document 8C/PRG/13.
(54) Firstly, while he did not intend to make a formal proposal, he hoped that clearing house activities would not be too limited in scope.
(55) Secondly, the National Commission had had doubts on the formulation of paragraph 68 of the document, but he felt that they had been satisfied by the discussions at the plenary meetings and in the Advisory Committee, which had resulted in a new definition of general and special activities.
(56) Thirdly, the most important part of the draft resolution in respect of Unesco's future was contained in paragraphs 10-13, which made it clear that the programme would no longer be presented as a reflection of the Secretariat's organization, and that projects would in future be presented not in accordance with the various disciplines, but in their entirety. Such an arrangement would facilitate the discussion of projects at future conferences.
(57) In conclusion, he expressed whole-hearted support for the resolution.

(58) Mr. FORSYTH (New Zealand) joined in the praise which had been accorded to the documents, but re-emphasized a previous statement that full use was not being made of the teaching profession in the planning of programmes. The teaching profession could be one of the most valuable instruments in implementing the aims set out in No. 4 of the resolution. He recalled the decision not to increase the subvention to the World Confederation of Organizations of the Teaching Profession and urged that, if there were any doubt about the merit of such organizations, it was the duty of Unesco to provide them with the stimulus and machinery necessary for improvement, since they could supply the answer to many of the Organization's problems.

(59) Mgr MAROUN (Lebanon) pointed out that the draft under examination was the result of long efforts by the Secretariat and the Executive Board, and he had personally seen the part played by the Chairman of the Board in preparing the document. He also wished to pay tribute to the work of the Advisory Committee and its Chairman, and to the Secretariat.
(60) The document marked out the path that Unesco was to follow in future. The inadequacy of the contacts between the Secretariat and Member States had often been deplored in the past, but some progress had been made, and the document under consideration asked the Director-General to maintain and develop the collaboration which had been established between the Secretariat, Member States and international non-government organizations. The document rounded off the already appreciable work accomplished by the Commission, and Mgr Maroun was happy to associate himself with the tributes paid to all who had helped to draft it.

(61) Mr. ABDEL-RAHMAN (Egypt) wished to associate himself with the appreciation expressed to the Executive Board and to all who had been concerned with the preparation of document 8C/PRG/13. The document represented a transition, and he hoped that co-operative work during the coming two years, by the Executive Board, the Secretariat and Member States, would produce a programme for 1957-58 which was still nearer to the desired objective.

(62) Mr. MAHIU (Assistant Director-General) first emphasized the importance that the Secretariat attached to the document, to the ideas it expressed, and the directives it contained. He assured the Commission that the Director-General and the Executive Board would spare no pains to follow those directives faithfully. He thought, however, that in a document of that kind the spirit was more important than the letter. Situations not expressly provided for would no doubt arise and would have to be dealt with in accordance with the spirit of the document.

(63) Mr. Maheu added that the Secretariat had noted all the suggestions and comments made during the discussions, and would certainly strive to strengthen the existing bonds between Unesco and the teaching profession, as suggested by the New Zealand delegate. It would also bear in mind the comments of the Swedish and French delegates.
(64) Mr. Maheu agreed with the Egyptian delegate that the document did not give a final definition of the rôle and future of Unesco; it marked a stage on a very long journey. Like all living things, Unesco was continually developing. But the document had the virtue of freeing Unesco from the tendency to conservatism and of opening up new paths for the Organization to follow.
(65) In conclusion, Mr. Maheu endorsed all the comments made about the part played by the Executive Board and the Advisory Committee, and emphasized that the Director-General attached great importance to the draft resolution, which was, in his eyes, the starting point for the Organization's future activities.

(66) The CHAIRMAN did not think that the Commission could act on the proposals, made by the Brazilian delegation in document 8C/DR/86, for the amendment of the report presented by the Executive Board (document 8C/PRG/13). He proposed, however, that the Brazilian delegation's comments be noted.

(67) Mr. MAHEU (Assistant Director-General) pointed out that the main points in the Brazilian delegation's proposals had been included in the draft resolution in document 8C/BUD/2 Add. 1.

(68) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) said that draft resolution 8C/DR/86 had been prepared after discussion in the Advisory Committee, and he understood that the Brazilian delegate was satisfied with the form in which it appeared.

(69) There being no seconder, the CHAIRMAN said that note would be taken of the resolution.

(70) The resolution contained in document 8C/BUD/2 Add. 1 was put to the vote and adopted unanimously.

The meeting rose at 5.20 p.m.

# THIRTY-FOURTH MEETING

*9 December 1954 at 10 a.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

(1) As there was no quorum, the CHAIRMAN decided to adjourn the meeting for ten minutes, in accordance with Rule 69 of the Rules of Procedure of the General Conference.
(2) Although there was still no quorum when the meeting resumed, the CHAIRMAN proposed that the meeting continue.

(3) Approved.

**APPROPRIATION RESOLUTION FOR 1955 AND 1956** (document 8C/BUD/6 rev. 2)

(4) The CHAIRMAN asked Mr. Gardner Davies, Chairman of the Advisory Committee on Programme and Budget, to submit the draft appropriation resolution for 1955-56.

(5) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) observed that document 8C/BUD/6 rev. 2 set out the work of the Advisory Committee in digestible form.
(6) He pointed out that, in the English text of the document, the figure for the total appropriation in Part I of Annex I should read $847,861.

(7) Mr. TOROCHESHNIKOV (Union of Soviet Socialist Republics) announced the intention of his delegation to vote against the appropriation for 1955-56. The reason was to be found in the Soviet delegation's objection, already expressed, to the adoption of a budget at such a high level.

(8) Mr. COWELL (United Kingdom) shared the view of the Soviet delegate on the budget total but expressed his intention of voting for the proposed appropriation. The General Conference had, by a majority decision, accepted the budget level and it was now necessary only to adopt the form which the appropriation was to take.

(9) The CHAIRMAN observed that the decision concerning the budget total was a matter for the General Conference, not the Commission.

(10) Mr. MAHEU (Assistant Director-General) thought the United Kingdom delegates observation was correct.
(11) His impression was that the Commission had embarked on its work with the understanding that, on the explicit instructions of the Conference, it was to keep to a given budget ceiling. To challenge the ceiling fixed was therefore contrary to those instructions.
(12) Mr. Maheu asked the delegate of the USSR to withdraw his statement and to put forward his observations at a plenary meeting.

(13) Mr. TOROCHESHNIKOV (Union of Soviet Socialist Republics) explained that he had wished to make clear the position of his delegation with regard to the figure adopted for the budget ceiling; his statement stood.

(14) The CHAIRMAN asked the Commission to vote on the appropriation resolution.

(15) Approved, with 6 votes against and 1 abstention.

**COMPOSITION AND TERMS OF REFERENCE OF THE ADVISORY COMMITTEE ON PROGRAMME AND BUDGET**

(16) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) said that, when the question of the advisability of setting up an Advisory Committee for the ninth session of the General Conference had been discussed in the Advisory Committee, views had been divided because of the governmental structure of the new Executive Board. The Committee had agreed, however, that it was impossible to know at the present stage what changes would arise as a result of that change in structure and, in order to make certain that it would be possible to have an Advisory Committee if necessary, had recommended that such a Committee should be set up by the General Conference and that it should be left to the discretion of the Executive Board whether and when to convene it.
(17) The Advisory Committee had submitted the following resolution: "The General Conference decides to set up an Advisory Committee on Programme and Budget, to be convened at such a time and for such purposes as may be recommended by the Executive Board."
(18) He moved the adoption of that resolution.

(19) Mr. SEDES (France) said that his delegation approved the draft resolution.
(20) It seemed to him that the work of the Advisory Committee during the Conference had made no contribution to the preparation of the programme, but had helped the Programme and Budget Commission considerably in examining special problems.
(21) The Executive Board should therefore decide to keep the Advisory Committee in being and work on that basis.

(22) The CHAIRMAN observed that it was not left to the Board to decide whether the Advisory Committee should be retained; the Board would merely decide what work it should do.

(23) During the last discussions in the Advisory Committee Mr. SEDES (France) had received the impression that the Board would be left a degree of freedom on that point.

(24) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) agreed that the question was important. In the course of discussion in the Advisory Committee, the opinion had been expressed that the Executive Board should be free to decide not to convene an Advisory Committee if it did not appear necessary to do so.

(25) The CHAIRMAN thought that it would be for the Executive Board to decide whether the Advisory Committee should meet before the opening of the ninth session of the General Conference, but that, once the session had opened, decisions regarding it would rest with the Conference.

(26) Mr. FAWZI (Egypt) considered that the work of the Advisory Committee during the Conference had been useful and constructive in certain matters, but, in others, had duplicated the work of the Programme and Budget Commission.
(27) He recalled that, when the Advisory Committee had been set up, by a decision of the General Conference at its seventh session, to replace the Budget Committee, the object had been to ensure greater concentration and from that point of view the Committee had proved useful. He therefore felt that the Committee should be kept in being, but that its work should be concentrated on certain essential problems.

(28) Mr. ABEYWICKREMA (Ceylon) thought that, even though the Commission did not always agree with the recommendations of the Advisory Committee, the Committee served a useful purpose. If the membership of the Advisory Committee were increased to include representatives of more Member States, the Committee would be even more useful, especially if it consisted of representatives of Member States not already represented on the new Executive Board.
(29) Referring to the resolution submitted by the Advisory Committee, he pointed out that, if the Committee were to be called between sessions of the General Conference, expenses would be greatly increased, whereas, by calling the Committee immediately prior to a session of the General Conference, extra travel costs would be avoided.

(30) Mr. ZAMORANO HERNANDEZ (Chile) said that his delegation supported the draft resolution submitted by the Chairman of the Advisory Committee on Programme and Budget, and asked, as the delegation of Ceylon had done, that the membership of the Committee be increased and, in particular, that representatives of countries not on the Executive Board be included.

(31) Mr. BROWNELL (United States of America) thought that one reason for duplication of work between the Advisory Committee and the Commission was that the Commission did not use the Committee as it was intended it should be used.
(32) Everyone hoped that the Executive Board and the Secretariat, in making plans for the ninth session of the General Conference, would attempt to see that the best possible use of available time was made and that duplication was avoided.
(33) In his opinion, the Advisory Committee had made a wise recommendation in providing the Executive Board with facilities for preparatory work for the ninth session. He supported the resolution submitted by the Advisory Committee.

(34) Mr. PHOTIADES (Greece) found the discussion interesting, but thought it should be remembered that, ever since Unesco began, the delicate matters of co-ordination and agreement had been the subject of many discussions, which had produced, successively, the Budget Committee, the Programme and Budget

Commission and, finally, the Advisory Committee on Programme and Budget.
(35) The Greek delegate wondered whether the work of co-ordination could not in future be carried out by the Executive Board, which was the best informed and most competent body to take decisions between sessions of the General Conference. He saw no need to set up a new body, whose members would be delegates of their respective governments and might not have sufficient background knowledge to do the work required of them.
(36) He urged that the Organization's working methods should be studied with a view to simplifying them.

(37) The CHAIRMAN did not think that the discussion could be continued without a representative of the Executive Board, and proposed that the meeting adjourn for a few minutes to enable the Board to send one.

(38) Agreed.

(39) On the arrival of Sir Ronald Adam, Chairman of the Executive Board, the meeting resumed.

(40) Mr. COWELL (United Kingdom) supported the resolution, though sharing the doubts expressed by the delegate of Greece.
(41) In his opinion, the creation of a Committee having a governmental structure, when the Executive Board had such a structure, would only mean a duplication of work. The need for duplication was less now than it had been formerly and he wondered whether it was necessary to have an Advisory Committee at all. The Executive Board held a position of trust and, if it were trusted, all the preparatory work for the next General Conference could be left in its hands.
(42) He would vote for the resolution submitted by the Advisory Committee as being the best compromise solution, but on the understanding that the Executive Board had powers not to convene the Advisory Committee before the next session of the General Conference if it so desired.

(43) Mr. JUNANKAR (India) did not see the force of the argument of duplication of work. It was always necessary for the General Conference to scrutinize the programme and budget and only a small body such as the Advisory Committee could carry out a detailed scrutiny successfully.
(44) He was of the opinion that, if the scope of the Committee's activities were widened, its work would be of greater use. He suggested that, in order to save time in the Programme Commission, the Executive Board and the Programme Commission should give the Advisory Committee a specific mandate.
(45) He thought that it would be worth while to have on the Advisory Committee representatives of Member States not represented on the Executive Board, especially if the work of the General Conference were reorganized.

(46) Mr. CALO (Italy) paid tribute to the very great assistance that the Advisory Committee had given the Programme and Budget Commission on certain points. But he felt that, on the whole, the work of the Advisory Committee had duplicated that of the Commission and had done something to cause indecision and difficulties. While recognizing that the Committee could help in effecting economies and introducing new methods, the Italian delegate thought that, in view of the new structure of the Executive Board, the continued existence of the Committee might lead to sharper and bitterer conflicts than in the past.
(47) He therefore proposed that, in the new version of Rule 25 of the Rules of Procedure, which had just been adopted by the Conference, the words "the Advisory Committee on Programme and Budget" be deleted.
(48) If his proposal did not meet with general agreement, the Conference could leave the decision to the Executive Board.

(49) Mr. LOEFFLER (German Federal Republic) endorsed the tributes paid to the Advisory Committee and said that he agreed with the United Kingdom delegate on every point.

(50) Mr. DE SALIS (Switzerland) also paid tribute to the work accomplished by the Advisory Committee; it seemed to him that the fears voiced about duplication were not really justified. In his opinion, the Executive Board, owing to its new structure, would in future have a heavier and more difficult task than in the past. It might wish to pass on to another body certain problems connected with figures and programme details, so as to concentrate on long-term work. It might also be glad to hear another independent opinion.
(51) The Swiss delegate therefore hoped that the resolution would be so drafted as to make the Advisory Committee an aid to the Executive Board between sessions of the General Conference and an organ of the Conference during sessions.

(52) Mr. THA HLA (Union of Burma) joined with other delegates in praising the services of the Advisory Committee.
(53) The Burmese delegation had supported the proposal for the changed structure of the Executive Board, because it felt that, by having a governmental structure, the Executive Board would be strengthened. The Executive Board was bound by the Constitution to act in the interests of all Member States. In spite of that, he thought that it was necessary to have an Advisory Committee on Programme and Budget in order to obtain a more representative opinion and he agreed with the delegate of Ceylon that the Committee should be composed of representatives of Member States not represented on the Executive Board.
(54) He disagreed with the proposal of the Advisory Committee that its existence should be at the discretion of the Board. The Advisory Committee should exist in its own right.

(55) The CHAIRMAN observed that the draft resolution submitted by the Chairman of the Advisory Committee gave no indication of the number of the Committee's members; the subject under discussion was the principle of keeping the Committee in being.

(56) Mr. SUZUKI (Japan) said that his delegation was prepared to approve the proposed draft resolution.

(57) Mr. MASSAQUOI (Liberia) was of the opinion that, as the Executive Board was now composed of government representatives, it would be a duplication of work to have an Advisory Committee also composed of government representatives. He thought that the Advisory Committee served a useful purpose and suggested that it should, in the future, be composed of experts.
(58) He would support the resolution submitted by the Advisory Committee if the character of the Committee were changed.

(59) Mr. BENDER (Netherlands) supported the proposal of the Advisory Committee and the remarks made by the delegate of the United Kingdom.
(60) The work done by the Advisory Committee was useful to the General Conference. If there was a danger of its work overlapping that of another body of the General Conference, its terms of reference could be changed.
(61) He suggested that an Advisory Committee should be set up by the General Conference as a transitional measure and that any decision as to its future should be left to the ninth session of the General Conference.

(62) Sir Roland ADAM (Chairman of the Executive Board) outlined the work done by the Executive Board in connexion with the programme and budget. In the November before a General Conference, the Director-General gave an outline of his proposed programme to the Executive Board. The Board discussed that programme in the following March and, in the following July, prepared its report on the programme, which report was sent to the Member States.
(63) The Executive Board followed the programme through all the stages of its growth and knew more about it than any committee could possibly know.
(64) In his opinion, the new Executive Board, representing twenty-two Member States, making a detailed report on the future programme, was in a much better position to judge its merits than any committee would be, even after a detailed scrutiny lasting two weeks.

(65) Mr. RAADI (Iran) said that, if the structure of the Executive Board had not been altered, he would be entirely in favour of retaining the Advisory Committee, provided that its working methods were changed to avoid duplication.
(66) He agreed with the United Kingdom delegate that in the existing circumstances it was the Commission which should vote for its abolition.
(67) However, as the Advisory Committee had gained some experience in the course of its work, he thought he might suggest a compromise: the Commission would agree to the abolition of the Advisory Committee in principle, but would decide that, at meetings of the Executive Board concerned with the preparation of the programme and budget, the existing officers of the Advisory Committee could be called upon to give their views in an advisory capacity; the final decision would be left to the General Conference at its next session.

(68) Mr. CALO (Italy) asked whether the decision taken by the Conference with regard to the new text of Rule 25 of the Rules of Procedure should be considered as definite and final.

(69) The CHAIRMAN thought so and wondered whether the Commission could reopen discussion on a decision of the General Conference.

(70) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) remarked that the decision of the General Conference obviously altered the situation. That decision would mean that the Executive Board did not have the power to suppress the Advisory Committee.
(71) The resolution submitted by the Advisory Committee would still be useful, however, as it would give the Board the opportunity of deciding the most appropriate time for convening the Committee as well as latitude with regard to its terms of reference.

(72) The CHAIRMAN said that the question of the Advisory Committee's existence was no longer at issue, but the Commission could consider how the Conference's decision was to be carried out.

(73) Mr. CALO (Italy) suggested that the Executive Board be instructed to decide upon the date at which the Advisory Committee should meet, as well as on its functions and responsibilities.

(74) Mr. BAUGNIET (Belgium) observed that, in view of the explanations given by the Chairman, the draft proposed by the Chairman of the Advisory Committee was no longer suitable.
(75) The Conference should be requested, not to set up the Advisory Committee, but to decide the date on which it should be convened.

(76) The CHAIRMAN thought that the first paragraph should read as follows: "The General Conference decides that the Advisory Committee shall be convened at such a time and for such purposes as may be recommended by the Executive Board", and that the second paragraph should deal with the membership of the Committee.
(77) The first paragraph was put to the vote and approved by 42 votes, with 1 abstention.

(78) The CHAIRMAN did not think it was for the Commission to decide which countries should be represented on the Advisory Committee - that was a matter for the Nominations Committee - but it could decide the size of the Committee's membership.

(79) Mr. ABEYWICKREMA (Ceylon) suggested that the Commission recommend to the Nominations Committee that, in nominating members for the Advisory Committee, representatives should be chosen from Member States not already represented on the Executive Board.

(80) Mr. RAADI (Iran) said that, in the opinion of his delegation, the resolution should mention that the Executive Board was responsible for clearly delimiting the respective tasks of the Advisory Committee and the Programme and Budget Commission.

(81) Mr. MAHEU (Assistant Director-General) thought

it would be advisable to make it clear that the Executive Board was responsible for reconsidering the functions and terms of reference of the Advisory Committee.
(82) He also reminded the Commission that the Advisory Committee had been set up by a decision of the Conference at its seventh session. The decision just taken on the subject by the plenary conference had been taken by default, as the question of the Committee's continued existence had not been raised, the amendment to Rule 25 being simply a verbal change.
(83) The Assistant Director-General thought that the question could therefore be reopened and that it was accordingly essential to make it clear that the Executive Board was not bound by the decision taken at the seventh session, but could re-examine the terms of reference and functions of the Advisory Committee.

(84) Mr. MASSAQUOI (Liberia), drew attention again to the character of the Advisory Committee, pointing out that, in his opinion, it should in the future be composed of experts, as the Executive Board was composed of government representatives. Priority should be given to representatives of Member States not already represented on the Executive Board.
(85) He questioned the legality of the resolution passed by the Plenary Conference, pointing out that the Programme and Budget Commission had not yet pronounced on the programme phase of the Advisory Committee's report when the resolution had been adopted. He thought that the matter should be taken up and the Plenary Conference asked to reconsider its decision.

(86) Mgr MAROUN (Lebanon) agreed with the Iranian delegate with regard to the competence of the Advisory Committee.
(87) The Committee had been set up at the seventh session of the Conference and its mandate should have ended with the eighth session. Owing to the changes made in the various conference organs, it was no longer so important, and the Executive Board should therefore define what it was to do.

(88) Mr. DE SALIS (Switzerland) also supported the Iranian delegate's proposal.
(89) With regard to the membership of the Advisory Committee, the Swiss delegate thought that members should not be government representatives but should act as experts or advisers to the Executive Board.

(90) Mr. CALO (Italy) explained that he had proposed raising the question of retaining the Advisory Committee because he had in front of him the record of the plenary Conference's discussions.

(91) Mgr MAROUN (Lebanon) observed that, according to the draft resolution submitted for the Commission's approval, the Conference would nominate the countries to be represented on the Advisory Committee; as the Committee was a technical one, however, he saw no need for nominating countries.

(92) Mr. SEDES (France) recalled that the Advisory Committee was responsible for assisting the Programme and Budget Commission in its work; he therefore considered that decisions concerning it were the business of the Commission.

(93) The CHAIRMAN asked delegates to vote on whether the question of the Committee's existence should be referred to the General Conference.
(94) It was decided, by 25 votes to 7, with 5 abstentions, that the decision to keep the Committee in being still stood.

(95) The CHAIRMAN wondered whether the first paragraph of the draft resolution submitted by the Chairman of the Advisory Committee should not be amended in accordance with the French delegate's suggestion.

(96) Mr. SEDES (France) explained what his comments implied; the Executive Board should be responsible for determining what the Advisory Committee was to do, but only after deciding upon the functions of the Programme and Budget Commission, and with reference thereto.

(97) Mr. DUERING (Sweden) thought that, although all delegations were agreed that it would not be necessary to hold a meeting of the Advisory Committee before the ninth session of the General Conference, it would be advisable to make arrangements for having such a Committee to help with the work at that session. The Advisory Committee had the important task of making adjustments to the budget and of balancing it.
(98) He supported the proposal to set up an Advisory Committee and of leaving it to the Executive Board to decide when it was to meet.

(99) Mr. FAWZI (Egypt) felt that the task of the Advisory Committee was to advise the Programme and Budget Commission.
(100) He agreed with the views expressed by the Burmese delegate concerning the selection of members of the Advisory Committee from among representatives of countries which did not belong to the Executive Board, and with the Liberian delegate's opinion that they should serve as experts. On the last point, he thought it would be advisable to choose people with experience of the various chapters of the programme.

(101) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) suggested the addition of the following paragraph:
"Requests the Executive Board, in considering the organization of the ninth session of the General Conference and in particular connexion with the Advisory Committee on the Programme and Budget, to make precise recommendations concerning the terms of reference of such an Advisory Committee."

(102) Mr. FORSYTH (New Zealand) considered that it would be better not to define the functions of the Advisory Committee in the second part of the resolution. The Administrative Commission was faced with difficult problems from time to time, which it referred direct to the Legal Committee. The Programme Commission could do likewise with the Advisory Committee, but only if the terms of reference of that Committee were not too closely defined beforehand.

(103) Mr. PHOTIADES (Greece) observed that the regulations in force authorized the Executive Board to call in qualified experts to assist it in its work. He therefore saw no need to call in new experts to review the work of the others.

(104) Mr. BROWNELL (United States of America), raising a point of order, said that, although the resolution would authorize the Executive Board to convene the Advisory Committee if and when necessary, reference had been made in the discussion to the fact that it would be unnecessary to convene it before the ninth session of the General Conference. If it was correct that the Committee would not be convened before the ninth session, he could see no point in the resolution. If the Committee was to meet prior to the ninth session, its composition, the time of its meeting and its terms of reference could be left to the Executive Board. He did not consider that such details could be determined by the Programme Commission at the present stage.

(105) Mr. MAHEU (Assistant Director-General) observed that the Advisory Committee was an organ of the General Conference, and at the next session it would be well to consider the expediency of retaining it as such.

(106) In his opinion, the Executive Board should be invited, when discussing the reorganization of the Conference's work, to submit recommendations to the Conference on the functions of the Committee and the need for its continued existence.

(107) The CHAIRMAN proposed that the discussion be adjourned to allow an exact text to be prepared, and submitted for approval by the Commission at its next meeting.

(108) Agreed.

The meeting rose at 1 p. m.

# THIRTY-FIFTH MEETING

*9 December 1954, at 3.30 p.m.*

*Chairman:* Mr. BOURGEOIS (Switzerland)

**RESOLUTIONS ON THE PROGRAMME AND THE BUDGET – REPORT OF THE RAPPORTEUR** (document 8C/PRG/30 (prov.))

(1) Mr. HOPE (Rapporteur) in presenting the document, said that the major and second part of the report consisted of an annex setting out the changes voted by the Commission in respect of the Proposed Programme and Budget for 1955-56. The first part contained his own comments on the Commission's actions, under three headings:

1. Introductory remarks.
2. A selection of the main events in the eight chapters of the 1955-56 programme, and in particular the new items introduced into it.
3. Observations on methods of procedure, made both inside and outside the Commission, which he had thought proper to summarize and place on record for the benefit of the Secretariat, the Executive Board and future participants in the Conference.

(2) A matter of some concern had been the fact that the Commission had not started work until six days after the opening of the Conference, and not until the twelfth day had it been provided with a budget ceiling on which to base its examination of the programme.

(3) The remodelled programme had been explained by the Chairman of the retiring Executive Board and debate on it had been postponed until completion of the study of the programme. After careful examination, and after hearing the report of the Advisory Committee, which satisfied previous doubts on the problem of general and special activities, the Commission had unanimously approved the remodelled programme.

(4) The Technical Assistance programme had been approved at an early stage of the Commission's work, and the Rapporteur wished to draw the attention of the Director of Technical Assistance to some of the excellent comments on his programme. In pointing out an error in the second line (page 2, No. 3 of the document) - the word "fortuitous" should be replaced by the word "fortunate" - he stressed the heavy work involved in preparing and amending documents and thanked the Secretariat for its great and valuable efforts in that respect. He hoped that the directors of departments would find time to read the many revealing and constructive comments made by delegates on programme activities.

(5) A tribute was due to the working parties and to the Chairmen and Rapporteurs for their excellent reports, all of which had been adopted unanimously. In that connexion, he had been struck by the zeal of members of the Commission, who, aware of the responsibility invested in them, had been determined to investigate each programme thoroughly and had been quick to oppose the delegation of their duties to working parties or the limiting of discussion to items on which there was disagreement. It was the more to be regretted, therefore, that because of the superabundance of documents they had not had time to carry out their intention.

(6) The Rapporteur then commented briefly on the different chapters of the programme.
(7) Education. He had been astonished to find, after the long debates, decisions and resolutions, that the programme as set out in document 8C/5 remained almost unchanged.
(8) Natural Sciences. There had been two points of serious controversy.
(9) First, the Campaign against Cancer. Now that the project had been adopted, he hoped that the heated discussions would be forgotten and that delegates, Member States and the Secretariat would make a success of it under its new title "Basic Research on Cellular Growths".
(10) Second, the determination to play a part in the use of atomic energy for peace. The project was, he considered, one which would attract wide attention and which would be well publicized through Unesco's channels of information.
(11) Mention should also be made of the Arid Zone and Humid Tropical Zone projects and of the section which referred to Oceanography.
(12) Social Sciences. Delegates had accepted the Social Sciences programme more readily than any other, thanks, perhaps, to its Director. He had been impressed by the Director's readiness to accept and act on suggestions, one of which had meant the deletion of a major activity, and another the speedy submission of revised and acceptable proposals.
(13) Of special significance was the resolution on peaceful co-operation (document 8C/DR/115), produced jointly by the delegates of the United States of America and Czechoslovakia and adopted unanimously.
(14) Cultural Activities. Regretting that his appointment as Rapporteur had prevented him from working on cultural activities, as he had intended to do, at the Conference, he had, perhaps, placed extra emphasis on that section of his report. Many delegates, however, had expressed great interest in the subject.
(15) A new project attracting considerable attention was the provision of books for new literates, and he had been impressed by the constructive contributions of delegates from a wide variety of countries. It had been asked why the project had not been placed in the chapter on Education; in his opinion it was an activity which transcended departmental barriers. He looked forward with great interest to seeing what books were produced.
(16) Other activities singled out for mention included the protection of cultural property in the event of armed conflict; international regulations for archaeological excavation; and an international competition in architecture; a new venture: the publication of a book commemorating the centenary in 1955 of the Polish poet Mickiewicz; and the preparation of a scientific and cultural history of mankind.
(17) Resolutions under the chapter had been too numerous, and he feared that some worthy ones had been overlooked.

(18) Mass Communication. The major development was the reorganization recommended by the working party and adopted by the Commission.
(19) A discussion had taken place on films, and hasty action in rejecting a film-making project, for which the Commission had already approved two new posts, had had to be corrected. The possibilities of television had also been discussed.
(20) The Rapporteur drew attention to two amendments to the document: first, at the end of the fourth paragraph under Mass Communication (page 7). The Director wished the following sentence to be inserted "In the field of information all projects relating to programme activities were adopted." Secondly, in the French text only, the last part of paragraph 1 under Information should read: "... qui propose une structure correspondant aux deux fonctions principales du Département de l'Information".
(21) The most important event in the chapter was the adoption of a resolution (document 8C/DR/123) on the use of the means of mass communication, which was destined, he believed, to make an impact on the world. Of special interest was the emphasis on implementation by Member States.
(22) Nothing of special importance was to be noted in respect of exchange of Persons and Documents and Publications.
(23) General Resolutions. The most important item under that chapter was the report of the Working Party on Decentralization, which, while approving the establishment in India of an office for co-operation with Unesco, and the extension and stimulation of activities of National Commissions, drew attention to the basic principle of universality in Unesco and gave a warning lest excessive decentralization should lead to disintegration.
(24) Finally, the Commission had accepted the recommendations of the Advisory Committee for making the revised programme fit the budget ceiling and had suggested that, if at any time the Secretariat should be able to make further economies, the Director-General should bear in mind the possibility of using them for the following purposes:

(a) to increase the subvention to the International Council of Scientific Unions by a maximum of $20,000 per annum for 1955-56;

(b) to increase the subvention to the International Council for Philosophy and Humanistic Studies by a maximum of $10,000 per annum;

(c) to raise by $32,650 the contribution to UNRWA for Palestine refugees.

(25) The Rapporteur then read in full the last five paragraphs on page 9 and the first paragraph on page 10 of the report, which referred to excessive documentation and made suggestions on the plan of work for the General Conference.
(26) Finally, in accordance with Rule 63 of the Rules of Procedure, the following paragraph should be inserted before the final paragraph of the Introduction:

"Resolutions adopted by the General Conference shall be communicated by the Director-General to the Members of the Organization within thirty days after the close of the session."

(27) The document under discussion was provisional and would be revised by the Secretariat before distribution to Member States. It would be necessary for the Commission to authorize the Director-General to modify the numbering of the resolutions and to do such editing as he saw fit.

(28) The CHAIRMAN paid tribute to the Rapporteur for the remarkable work he had performed, with the

help of Mr. Chevalier and all his colleagues.
(29) He suggested that the Commission confine its discussion to the introduction to the draft report, since the Annex was merely a list of decisions taken at previous meetings. Any typographical errors could, of course, be corrected by the Secretariat.

(30) Mr. JUNANKAR (India) pointed out that in the reference to resolution 8C/DR/115 on page 6, India had not been included among the sponsoring countries mentioned, although the original proposal had been made by the Indian Government. A similar omission occurred on page 5 in connexion with the resolution on atomic energy. He also asked that mention should be made, in the introductory section of the report, of the Brazilian proposal for an International Fund for Education, Science and Culture (page 33, resolution 10.2).

(31) The RAPPORTEUR regretted the omissions, which had been unintentional, and said that the necessary insertions would be made. He proposed to include a reference to the Brazilian resolution under chapter 7.

(32) Sir Ronald ADAM (Chairman of the Executive Board) objected to the wording of the second section of page 2 of the report. While the Board had considered at length the division of the programme into general and special activities, it had concentrated more on the major part of the programme, and it would be unjust to say that it had concentrated on the existing rather than the new.

(33) Mr. MAHEU (Assistant Director-General) suggested changing the first sentence of section 2, on page 2, to read: "The report of the Executive Board on the remodelling of the programme (document 8C/PRG/13) was based on the principle of aid to Member States; it drew particular attention to the distinction between 'general activities' and 'special activities', and to the advisability of adopting a few major projects."
(34) The fourth paragraph under "Natural Sciences", on page 5, would be improved by the deletion of the last part of the sentence from "and it was understood" onward. A decision to that effect had indeed been taken, but it was not advisable to mention it in the general introduction.
(35) Lastly, Mr. Maheu thought that the last sentence of the fifth paragraph, under the same heading, on page 5, should be reworded to read: "The Turkish delegate was assured by the Director-General that appropriate services to his country would be continued either by the central services at the Secretariat or under arrangements for aid to National Commissions."

(36) Mr. COWELL (United Kingdom) proposed that some reference should be included in the report to the speeches by non-governmental organizations, in order to show that there had not been only governmental voices at the Conference.
(37) With regard to the request of the Indian delegate, in his opinion it would be unwise to draw attention to the item in the introduction. The action taken was not very encouraging and might raise undue hopes.

(38) Mr. JUNANKAR (India) did not agree that a simple statement of fact would raise false hopes.

(39) Mr. HOPE (Rapporteur) asked if the delegates of India and the United Kingdom would draft a suitable sentence. With regard to the suggestion of the United Kingdom delegate, he intended to insert it not in the introduction but under Chapter 7 - General Resolutions.

(40) Mr. ZIMIN (Union of Soviet Socialist Republics) asked for a reference to be made to the fact that resolution DR/123 on the use of mass communication to increase mutual confidence and understanding, submitted jointly by eleven countries, was based on a resolution from the Soviet Government, which had been later amended by the delegates of the United States and other countries.

(41) The RAPPORTEUR noted the request.

(42) The Introduction was adopted unanimously.

ANNEX – PART I

(43) Adopted.

ANNEX – PART II

CHAPTER 1 – EDUCATION

(44) Adopted.

CHAPTER 2 – NATURAL SCIENCES

(45) Mr. SANDOVAL VALLARTA (Mexico) noted that on page 8 of the Annex, under resolution 2.41, Part B, paragraph 158 was said to be amended instead of paragraph 156. It referred to the work of the Science Co-operation Office for Latin America (Montevideo). Paragraph 158 had not been amended.

(46) The CHAIRMAN said that the necessary correction would be made.

(47) Chapter 2 was unanimously approved.

CHAPTER 3 – SOCIAL SCIENCES

(48) Unanimously approved without discussion.

CHAPTER 4 – CULTURAL ACTIVITIES

(49) Mr. CHEVALIER (Secretary of the Commission) pointed out two typographical errors. Project 4.35 (A), in the French text, "La croisade des musées" should read "Campagne en faveur des musées". Project 4.42, "Study of cultural relations" should read "Study of relations between cultures".

(50) Chapter 4 was unanimously approved.

CHAPTER 5 – MASS COMMUNICATION

(51) Mr. SANDOVAL VALLARTA (Mexico), referring to (167) resolution 5.52 (A) "Educational Film Institute for Latin America", under Section II, on page 23, said that, although the resolution was shown as approved, the Mexican delegation had made a reservation regarding the cost of the project.

(52) The CHAIRMAN said that note would be taken of the reservation.

(53) Chapter 5 was approved.

(54) Chapters 6, 7, 8, 9, 10 and 11 were unanimously approved without discussion.

(55) Mr. BROWNELL (United States of America) paid a warm tribute to the Rapporteur for his excellent and valuable work. His report had not only captured the essence of the delegates' aims and wishes, in spite of the discussion which sometimes obscured them, but had also enhanced the interest of the discussions themselves.

Document 8C/DIV/155: Draft text submitted by the Chairman of the Advisory Committee on Programme and Budget.

(56) The CHAIRMAN announced that before the Commission completed its agenda, it had still to consider document 8C/DIV/155, which embodied the proposals examined that morning. The last paragraph was identical with the draft resolution (document 8C/DR/127) submitted by the delegations of Ceylon, India and Liberia.

(57) The first and second paragraphs were unanimously approved.

(58) Mr. MENDIS (Ceylon), presenting the resolution, said that the figure of twenty-four had been proposed as being one-third of the total membership of Unesco; the suggestion concerning persons competent in the fields of education, science and culture had been included at the request of his delegation; finally, it had been thought advisable to include members of countries not represented on the Executive Board.

(59) Mgr MAROUN (Lebanon) fully appreciated the intentions of the authors of the proposal contained in the last paragraph. He feared, however, that the proposal might mean a repetition of the protracted discussions which had already taken place on the structure of the Executive Board. Moreover, there was no reason to limit the number of fields in which members of the Advisory Committee should be expert. It would surely be desirable to include specialists in finance or administration in the Committee.

(60) In the circumstances, Mgr Maroun would vote against the adoption of the text. Since the Executive Board was to lay down the Advisory Committee's terms of reference, there was no point in adding to the end of the resolution details which might hamper the Board. It would be better to retain only the first sentence of the last paragraph.

(61) Mr. MALAKUL (Thailand) proposed that the word "arts" in the fourth line of the resolution should be changed to "education".

(62) The CHAIRMAN noted the amendment.

(63) Mr. FORSYTH (New Zealand) said that, with an Executive Board of 24 and an Advisory Committee of 22 members, the 26 remaining Member States would not be short of advice.

(64) Mr. MENDIS (Ceylon), replying to the delegate of Lebanon, said that the wording of the resolution was not intended to limit membership of the Advisory Committee to persons competent in education, science and culture and would not preclude, for example, financial experts.

(65) Mr. FRANCOIS (France) could not support a text which seemed to him to contradict the first two paragraphs, already approved. Those paragraphs gave the Executive Board very broad powers so far as the competence and membership of the Advisory Committee were concerned. Moreover, the text would lead to a legally impossible situation. The Conference would simply nominate the States to be represented on the Committee. The individual members would then be chosen by the governments concerned. Lastly, Mr. François thought that the Advisory Committee should not have a membership of more than 15 to 20. The figure proposed seemed to him too high, in view of past experience of the working of smaller committees.

(66) The CHAIRMAN mentioned that the two paragraphs adopted referred to the date for convening the Advisory Committee and its terms of reference. So far, no decision had been taken about its membership.

(67) Mr. COWELL (United Kingdom) joined in the opposition expressed by the delegate of France, not only because of the effect of such an arrangement on the Executive Board and the Conference, but for the more important reason that advisory services should come from the National Commissions. The members of the Board, although government representatives, would be in close touch with National Commissions and the Board would thus have access to the best advice not only from 24 countries, but from all the Member States of Unesco. The National Commissions, which existed or were being created in every country, provided an unrivalled source of advice on all matters of education, science and culture, and he saw no reason to set up new machinery. He hoped that the resolution would be rejected as unnecessary.

(68) Another objection was the financial aspect, which had not yet been considered. The members of the Advisory Committee as at present constituted received neither expenses nor per diem; but the proposed new committee would have to be financed by the 24 countries selected for membership, who might be unwilling to support the cost of members of the Advisory Committee in addition to the upkeep of National Commissions.

(69) The CHAIRMAN emphasized that the Committee would not be permanent. All that was at issue was

its constitution for the ninth session of the Conference The General Conference could then take a decision on the advisability of retaining the Committee.

(70) Mr. MASSAQUOI (Liberia) was perplexed at the attempts to minimize the effects of the resolution. He could not see that the proposed membership was too large, bearing in mind that in 1951, when it had been fifteen, there had been only sixty Member States, whereas at the present time there were 72, including a whole new region of the world. As to the character of the Committee, he insisted that it should be determined by the Commission and not by the Executive Board, which was now a government body. With regard to financial considerations, nobody could expect advice without payment, and as to who should pay, whether it was the General Conference, the Organization or Member States, it would still fall to governments, since Unesco was an intergovernmental body.

(71) In his opinion, the question raised by the United Kingdom was immaterial to the problem before the Commission, which was whether the persons designated by Member States should be embassy or legation officials or experts in special fields. He would prefer the committee to be composed of experts in education, science, culture or finance.

(72) The CHAIRMAN considered that the definition set out in the last sentence of the final paragraph was at variance with the provisions adopted under paragraph 1. He thought, however, that it would be helpful to specify the number of members and possibly give some indication about the choice of States, to be represented on the Committee.

(73) Mr. SEDES (France) was in entire agreement with the Chairman. It was hardly possible to say, in one place, "The Conference decides....", and, in another, ".... the General Conference shall endeavour to include ....". In his opinion, the General Conference could not at one and the same time take decisions and give itself advice.

(74) Mr. JUNANKAR (India) said that there appeared to be some misunderstanding over the draft before the Commission. It had been intended to meet the different views expressed: namely, that an opportunity should be given to Member States not represented on the Executive Board to be associated with the preparation of the programme and budget; and that the committee should consist of persons expert in Unesco's various fields of work. It had never been intended that the General Conference should elect the experts; the meaning of the resolution was that the Conference should designate the 24 countries and that Member States should choose the experts. In spite of all that had been said, he was not convinced that the future of the Advisory Committee was affected by the change in the constitution of the Executive Board, since, if it were argued that governmental representation on the Board rendered the Advisory Committee unnecessary, the same could be argued for the General Conference itself. He could not see any financial problem, since experts could be included in delegations, whose expenses were always paid by Member States.

(75) In conclusion, he submitted the following revised draft of the resolution: "Decides that the Advisory Committee on Programme and Budget shall consist of 24 members. In electing the members of the Committee, the General Conference shall endeavour to include Member States not already included in the Executive Board. Member States elected to the committee shall nominate such members on the committee as are competent in the various fields of Unesco's activities."

(76) The CHAIRMAN pointed out that the members of the Committee would be chosen from the delegations of States designated by the Conference. In the text under discussion, it seemed to be assumed that such States might send to the General Conference delegates with no special qualification in the fields of interest to Unesco.

(77) Mr. FAWZI (Egypt) recalled that the Commission had that morning been called upon to examine two very simple proposals which had been approved. It was true that the delegations included specialists in various aspects of the programme. But, if the Committee were to meet before the Conference, each delegation would probably choose only one representative. He thought that the Advisory Committee should be regarded as an expanded working party, set up to examine the draft programme and budget as a whole. Moreover, it was unnecessary to specify that members of the Committee should be "persons competent in education, science and cultural activities..." as the delegations themselves were undoubtedly composed of people competent in the various fields of interest to Unesco.

(78) Mr. SHARIF (Pakistan) saw a confusion in the discussion. The Advisory Committee had been in existence for two or three years and its virtues and defects were now known. The Commission having decided to refer to the Executive Board the task of investigating the exact nature of the Committee's function in helping the General Conference, he doubted the wisdom of limiting the discretion of the Executive Board by suggestions of the kind put forward during the meeting. Suggestions could only be made after a report had been received from the Executive Board. Similarly, the number of members would depend on the exact nature of the Committee's duties. He therefore proposed that the decision should be a transitional measure and that the resolution should be amended as follows:

"Decides that, as a transitional measure for the Conference of 1956, the Advisory Committee on Programme and Budget shall consist of 24 members", with the addition of a reference to the inclusion of States not represented on the Executive Board, if desired. He would prefer to see 18 members instead of 24, but would not press the point.

(79) The CHAIRMAN reminded the Commission that the decision on the advisability of setting up an Advisory Committee on Programme and Budget for the ninth session of the General Conference had already been taken. It had also been agreed that the Executive Board might, if it saw fit, convene the Advisory Committee before the session opened.

(80) All that remained to be done was to settle how many Member States should be represented on the Committee and to make a recommendation regarding the choice of States. Since the principle of geographical distribution had always been observed in setting up small committees, there was no need to refer to it in the text. Finally, the Chairman considered it would be improper to cast any doubt on the competence of members of delegations.

(81) Mgr MAROUN (Lebanon) recalled that he had already proposed an amendment to delete the last sentence of the paragraph under discussion.

(82) Mr. FRANCOIS (France) proposed that the following be substituted for the last paragraph:

"The General Conference

Decides

That the Advisory Committee on Programme and Budget shall consist of 17 Member States, the majority of which shall be chosen from among those not represented on the Executive Board. Member States are invited to designate, as their representatives on this Committee, experts in education, science and cultural activities."

(83) Mr. PRATT (Australia) asked whether the Advisory Committee had expressed any opinion on the third paragraph in document 8C/DIV/155.

(84) The SECRETARY of the Advisory Committee on Programme and Budget explained that the first paragraph of the document in question had been approved by the Advisory Committee, as already stated by the Chairman of that Committee.

(85) The CHAIRMAN called for a vote on the figure proposed by the French delegate.

(86) It was decided, by 22 votes to 13, with 2 abstentions, that the Advisory Committee should comprise representatives of 17 Member States.

(87) Mr. FAUBLAS (Haiti) saw a great difference between "17 Member States" and "24 Members".

(88) Mr. SABA (Legal Adviser) stressed that the Commission had just taken a decision on the figure of 17 Member States. It could not, therefore, designate the individual members of the Committee, but it could invite the Member States which were designated by the Conference to select, as their representatives, people outstanding in fields of interest to Unesco.

(89) Furthermore, as the General Conference would have to designate the 17 Member States on the recommendation of the Nominations Committee, the proposal of the Indian delegation would require some slight amendment. The Commission might ask the Nominations Committee to give preference to Member States not represented on the Executive Board.

(90) Mr. BAUGNIET (Belgium) said that he had abstained when the previous vote was taken because he thought the discussion had been confused. There was a question of terminology still outstanding. At one time mention was made of "members" and at another of "Member States". The Rules of Procedure relating to the membership of the Conference committees, however, spoke only of "members", and it had always been understood that the Nominations Committee first designated Member States, while the delegations of those States thereafter selected persons qualified for membership of one or other Committee. He therefore thought there was a risk involved in introducing the notion of "Member States".

(91) The CHAIRMAN fully concurred in the opinion of the Belgian delegate.

(92) Mr. SABA (Legal Adviser) proposed that the decision just taken be phrased as follows:

"The General Conference decides that the Advisory Committee on Programme and Budget shall be composed of representatives of the following 17 Member States: .....", the list of Member States designated by the Conference later being inserted.

(93) The Commission might also recommend that members of the Advisory Committee be chosen, for preference, from among Member States not represented on the Executive Board and, if it saw fit, might make special mention of the particular qualifications required.

(94) The text proposed by Mr. Saba was approved.

(95) The CHAIRMAN then called for a vote on the proposal of the Lebanese delegate for the deletion of the last sentence of the third paragraph.

(96) The proposal was adopted by 27 votes to 8.

(97) Mr. ZAMORANO HERNANDEZ (Chile) agreed with the Legal Adviser. He thought it out of place to make special mention of the character and qualifications of those who were to be members of the Advisory Committee. If members were to be representatives of the Member States, it lay with those States to select delegates capable of performing their duties satisfactorily.

(98) Mr. FORSYTH (New Zealand) proposed that either one or two members of the Advisory Committee should also be members of the Executive Board, so that the committee could have the benefit of the Board's background knowledge and experience.

(99) Mr. PRATT (Australia) urged that, in considering the rôle of the Advisory Committee, the Executive Board should bear in mind its importance to the work of the Programme and Budget Commission, and take into account not only its past work, but also the effect which its work during the present session would have on the Commission's task at the ninth General Conference.

(100) Mr. FRANCOIS (France) was prepared to agree that the Advisory Committee should be mainly composed of delegates of Member States not represented on the Executive Board. It would be dangerous, however, to attempt to have a totally different membership in the two bodies, as that might give rise to unfortunate clashes between them. It would be very

much better if there were friendly collaboration between the Executive Board and the Advisory Committee.

(101) The French delegation accordingly proposed that the following sub-paragraph be added

"The Commission further recommends that the majority of members of the Advisory Committee be chosen from among Member States not represented on the Executive Board."

(102) Mr. MENDIS (Ceylon) supported the proposal of the delegate of New Zealand to include on the committee at least two members of the Executive Board.

(103) Mr. FORSYTH (New Zealand) proposed that the number should be definitely two.

(104) Mr. FRANCOIS (France) saw no reason to bind the Conference and the Executive Board in that way and thought that the procedure he had suggested would satisfy most Member States.

(105) Mgr MAROUN (Lebanon) felt that the Commission was going back on the decision it had taken when it deleted the last part of the third paragraph.

(106) The CHAIRMAN replied that the new proposal was concerned only with a recommendation of the Commission.

(107) Mr. MATIC (Yugoslavia) thought that the point called for very careful handling. He seconded the proposal of the New Zealand delegate, as he thought it would be helpful if the number of Member States represented both on the Executive Board and on the Advisory Committee were formally laid down. He added that the Executive Board would later be able to make a thorough examination of the programme as a whole, and that Member States not represented on the Board should also be given an opportunity of studying the draft programme in detail.

(108) Mr. BROWNELL (United States of America) supported the proposal of the French delegate, which allowed for flexibility in determining membership.

(109) Mr. AWAD (Egypt) urged acceptance of the French proposal; there was danger in too much precision.

(110) Mr. ZAMORANO HERNANDEZ (Chile) said that, where numbers were concerned, he did not favour flexibility. If it was thought that two members of the Executive Board should also sit on the Advisory Committee, it should be clearly stated.

(111) Mr. BAUGNIET (Belgium) suggested fixing the number of Executive Board members to take part in the work of the Advisory Committee at a maximum of 5.

(112) The proposal was seconded by Mr. PHOTIADES (Greece).

(113) Mr. SABA (Legal Adviser) pointed out one detail in the discussion which was not very clear. Was it desired to fix the number of members of the Executive Board who would also belong to the Advisory Committee, or the number of Member States to be represented on both bodies?

(114) Mr. FORSYTH (New Zealand) said that he would not dispute the number, as long as there was a small Executive Board representation for the reasons he had already stated. He did not think there was any danger of undue influence on the committee.

(115) Sir Ronald ADAM (Chairman of the Executive Board) said that the Executive Board had never in its history been represented on a committee. The rôle of the Board was advisory and, while its members could attend a committee when necessary, or be called on to give advice, they could never be elected to membership.

(116) Mr. FORSYTH (New Zealand) withdrew his proposal, which no longer had any point.

(117) The proposal of the French delegation was put to the vote and adopted by 16 votes to 14, with 5 abstentions.

(118) The CHAIRMAN thanked his colleagues for the confidence they had given him during the work of the Commission. He was glad that a new system was to be introduced at the next session, and thought it should work smoothly and well to produce satisfactory results.

(119) Mr. BAUGNIET (Belgium) had been struck by the Rapporteur's comments on the draft resolutions submitted during the session (document 8C/PRG/30 (prov.), page 9, sixth paragraph). If the Director-General were to have time to give his views on such proposals, the draft programme would have to be forwarded to Member States at an earlier date, for example, at the same time as to the Executive Board. As the document was prepared for the Executive Board, there should be no difficulty in carrying out that suggestion.

(120) Mr. Baugniet accordingly proposed the following text:

"The General Conference requests the Director-General to communicate to Member States the draft programme and budget which he submits to the Executive Board, in sufficient time to enable them to transmit to the Board any comments they may find it necessary to make on the draft, so that the Board may make use of those comments in considering the programme and the budget estimates."

(121) The CHAIRMAN thought it would be well to state exactly when the preliminary draft programme should be communicated to Member States. He also thought that the proposal should be referred to the Board, since it concerned the task it had been commissioned to do with regard to the reorganization of the Conference's work.

(122) The DIRECTOR-GENERAL said that there had been pressure on the Secretariat for some time to make the drafts available to Member States. There was, however, a danger of causing confusion to both

members of the Executive Board and Member States by a multiplication of documents.

(123) Nevertheless, if Member States wished to have the documents, he had no objection to sending them, but they could not be in any language other than the working languages of the Executive Board. The cost involved would not be very high.

(124) Mr. BAUGNIET (Belgium) was entirely satisfied with the Chairman's reply and pointed out that there was no clause prohibiting Member States from making suggestions to the Director-General and the Executive Board. He proposed that the draft programme and budget in its final form should be sent out to Member States at least six months in advance.

(125) The DIRECTOR-GENERAL said that to lay down in the regulations that documents must be sent out at least six months in advance would force the Executive Board to alter its rhythm of meetings, in order that its work should be completed at a sufficiently early date, and might well cause scheduling difficulties. It would be better, he thought, to send the first draft to Member States at least six months before the opening of the Conference and the amended version later; it would be unwise to insist on the amended version being sent six months in advance.

(126) Dr. MUDALIAR (India) said that it was difficult to deal with a resolution submitted at so late a stage that there was not time to give it proper consideration. He proposed that it should be treated as a recommendation from a Member State and not as a formal resolution.

(127) The CHAIRMAN asked whether Mr. Baugniet would be agreeable to submitting his proposal merely as a suggestion to the Director-General, without having a vote on it.

(128) Mr. BAUGNIET (Belgium) said he was quite satisfied with the suggestions made by the Director-General.

(129) the DIRECTOR-GENERAL expressed his willingness to follow the wishes of the Conference. He had no preference between a resolution and a recommendation, but he must have a definite decision from the Commission.

(130) The CHAIRMAN proposed that the Director-General be merely asked to consider the feasibility of communicating the draft programme to Member States, as suggested by the Belgian delegate.

(131) Approved.

(132) Mrs. PINTO DE VIDAL (Uruguay) said that, now that the Commission's business was finished, she wished, as a representative of Uruguay, where the Conference was being held, to congratulate the Chairman and the officers of the Commission as a whole on the success of their work. She endorsed the tribute paid by the representative of the United States of America to the work of the Rapporteur, who had had the most thankless task of all.

(123) She also extended her congratulations to the women who had taken part in the work of the Programme and Budget Commission, and wished to mention, in particular, Mrs. Myrdal and the representative of the Philippines.

(134) The CHAIRMAN expressed his appreciation of the remarks of the Uruguayan delegate.

The meeting rose at 7.15 p.m.

# ADMINISTRATIVE COMMISSION

## FIRST MEETING

*13 November 1954 at 3.30 p.m.*

*Chairman* : Mr. BEEBY (New Zealand)

(1) The CHAIRMAN opened the meeting and expressed appreciation of the honour of having been elected to preside over the Commission.
(2) He announced that he had been asked to draw members' attention to paragraphs 4 and 5 of Rule 78 of the Rules of Procedure of the General Conference.

**ITEM 9.1 OF REVISED AGENDA : ELECTION OF THE THREE VICE-CHAIRMEN AND THE RAPPORTEUR**

(3) The CHAIRMAN called for nominations for the three posts of Vice-Chairman.

(4) The delegate of the United Kingdom, seconded by Mr. MARTINEZ COBO (Ecuador), nominated Mexico.

(5) The delegate of Czechoslovakia, seconded by the delegate of Poland, nominated the Ukrainian Soviet Socialist Republic.

(6) Mr. SALIM (Hashemite Kingdom of Jordan), seconded by Mr. FRAGA IRIBARNE (Spain), nominated Egypt.

(7) The delegate of Switzerland nominated Israel.

(8) The CHAIRMAN announced that, as there were four nominations for only three posts, the Commission would have to vote by ballot.
(9) The result of the vote was as follows:

| | |
|---|---|
| Mexico | 32 |
| Egypt | 26 |
| Israel | 22 |
| Ukrainian Soviet Socialist Republic | 15 |

(10) As the absolute majority required under Rule 89 of the Rules of Procedure had been obtained by Mexico, Egypt and Israel, the Chairman proclaimed those countries elected to the posts of Vice-Chairmen and asked them to submit the names of their representatives in writing.
(11) The Chairman then called for nominations for the post of Rapporteur.
(12) Sweden, nominated by the delegate of the Netherlands, was elected to the post of Rapporteur.
(13) The Swedish delegation appointed Mr. Eriksson to act as Rapporteur.

**ADOPTION OF THE AGENDA (document 8C/1 rev.)**

(14) The revised agenda was adopted.

**ITEM 9.4.4 OF REVISED AGENDA - CONTRIBUTIONS: SCALE, CURRENCY AND COLLECTION OF CONTRIBUTIONS OF MEMBER STATES AND**

**ITEM 9.4.3 OF REVISED AGENDA - ESTABLISHMENT OF THE COMMITTEE ON CONTRIBUTIONS**

(15) The CHAIRMAN recalled that, in accordance with a resolution passed by the General Conference at its seventh session, the terms of reference of the Committee on Contributions were as follows:
(1) Scale of contributions for 1955 and 1956:
(a) consideration of basis for computing the scale of contributions;
(b) consideration of basis of assessment of Member States not members of the United Nations;
(c) examination of special cases;
(d) preparation of draft resolutions on the above points.
(2) Currency of contributions:
(a) determination of currencies in which contributions may be made;
(b) examination of special requests regarding currency;
(c) preparation of draft resolutions on the above points.
(3) Collection of contributions:
(a) examination of general situation;
(b) examination of methods of collecting contributions;
(c) consideration of special requests from Hungary, Poland and Czechoslovakia;
(d) determination of percentage of contributions estimated as being unreceivable for 1955 and 1956;
(e) preparation of draft resolutions on the above points.
(16) The Chairman was not sure what the position was with regard to China, but would take the

matter up with the General Committee at its next meeting.

(17) Mr. HARPER-SMITH (Comptroller) announced that the relevant documents were the following:

8C/ADM/8 - Part I : Scale of contributions
Part II : Currency of contributions
Part III: Collection of contributions
Part III, Add.1 - Request from the Government of Hungary.
Add.2 - Request from the Government of Poland.
8C/12 - Letter from the Government of Czechoslovakia.

(18) Since the table in document 8C/ADM/8, Part III, showing arrears on 10 November 1954, had been drawn up, the following contributions had been received:

$ 7,385 from Syria for 1953
$ 35,638 from Czechoslovakia.

(19) As all the above matters were to be discussed by the Committee on Contributions, the CHAIRMAN proposed its establishment forthwith. He recalled that, as it was a technical committee, it was preferable to keep it small. He suggested the following tentative list of eleven countries, selected: (a) from those likely to pay over 3% of the total budget for 1955-56; (b) on the basis of regional representation; and (c) with a view to representing Member States not members of the United Nations.
(a) Canada, France, German Federal Republic, Union of Soviet Socialist Republics, United Kingdom, United States of America.
(b) Colombia, Egypt, Pakistan, Thailand.
(c) Switzerland.
It was of course understood that the committee would discuss special cases with representatives of the countries concerned.

(20) The delegate of Australia, seconded by the delegate of the Netherlands, moved adoption of the Chairman's list.

(21) Mr. CHEN YUAN (China), seconded by the delegate of Belgium, proposed the addition of Japan to represent countries not members of the United Nations.

(22) The Chairman's list, with the addition of Japan, was adopted.

(23) The CHAIRMAN requested the Committee to elect its own Chairman, in accordance with the Rules of Procedure. He hoped that it would deal first with questions upon which the voting of Member States depended.

**ITEM 9.3.1 OF REVISED AGENDA - DRAFT AMENDMENT TO ARTICLE V OF THE CONSTITUTION (STRUCTURE OF THE EXECUTIVE BOARD) (documents 8C/ADM/1 and Annexes; 8C/ADM/1 Add. and 8C/ADM/3, Parts II and IV)**

(24) In view of the fundamental importance of the question of the structure of the Executive Board,

Mr. KOTSCHNIG (United States of America) thought that delegations should be given time to discuss the matter among themselves and establish contacts. He therefore moved that the item be deferred until the Commission's next meeting.
(25) The delegate of Japan seconded the United States proposal.
(26) While not opposing the motion of the United States delegation, Mr. NIELSEN (Denmark) drew attention to the fact that changes in the order of items were very inconvenient for small delegations.

(27) The CHAIRMAN assured the delegate of Denmark that he had every sympathy with his objection and would keep to the order of items whenever possible.
(28) The delegate of Belgium, seconded by the delegate of the Netherlands, proposed that the item be adjourned until Tuesday morning, 16 November.
(29) It was agreed, by 20 votes to 17, to take item 9.3.1 on Tuesday morning, 16 November.

The meeting rose at 6 p.m.

# SECOND MEETING

*15 November 1954 at 10 a.m.*

*Chairman*: Mr. BEEBY (New Zealand)

(1) The CHAIRMAN asked the Secretary to announce the names of the Vice-Chairmen: Mr. Huzayin (Egypt), Mr. Kibovy (Israel) and Mr. Gomez Robledo (Mexico).

**ITEM 9.4 OF REVISED AGENDA: FINANCIAL QUESTIONS. REPORTS OF EXTERNAL AUDITOR TO THE GENERAL CONFERENCE ON THE ACCOUNTS OF THE ORGANIZATION FOR THE YEAR ENDED DECEMBER 1952 AND 1953 RESPECTIVELY. (documents 8C/ADM/4 and addendum and 8C/ADM/5)**

(2) The CHAIRMAN explained that the task of the Administrative Commission was to recommend the reports to the General Conference.

(3) Mr. BENDER (Executive Board) said that the Finance Committee of the Executive Board and the Board itself had heard a verbal statement by the External Auditor. Their impression was that the accounts and finances of the Organization were in good order. The Board had made two comments on the report for 1952.

(4) Mr. PHOTIADES (Greece) proposed that the decision taken by the Executive Board should be immediately accepted.

(5) Mr. HARPER-SMITH (Representative of the Director-General) said that the Auditors had made two comments on the report for 1952 (document 8C/ADM/4): (1) On unpaid contributions, the report, made nearly 18 months ago, was largely out of date. Part II (document 8C/ADM/8), which dealt with the subject, would be taken up by the Committee on Contributions later. (2) On the Headquarters building preliminary expenses incurred were now being refunded by the French Government.
(6) On the Auditor's Report for 1953 (document 8C/ADM/5) he made four points. (1) The accounts represented the first part of a two-year period, therefore there was an unobligated balance included in the appropriations for 1954. (2) There had been an improvement in the arrears of contributions.
(3) In the liquidation of obligations the Financial Regulations had been contravened by the Director-General, but that had been done in the interests of the Organization, and had not been criticized.
(4) He drew attention to the existing state of affairs in the arrangements with the International Commission for the Scientific and Cultural History of Mankind.

(7) Miss LAISE (United States of America) appreciated the measures taken by the Executive Board to ensure stricter control over the payment of contracts. She queried the large transfer of funds to indirect personnel costs (1952). She also remarked, with reference to the arrangements made with the International Commission for the Scientific and Cultural History of Mankind, that stricter control appeared to be desirable, and suggested that a formula should be found by the Secretariat to cover the point raised, so that similar situations should not occur again.

(8) Mr. HARPER-SMITH (Comptroller) asked for time on the first question. On the second, he said there had been some discussion of the matter. In answer to a query by the Auditor, the Director-General had replied that the Commission, created as a result of a resolution proposed by the fifth session of the General Conference, was an independent entity, and should enjoy autonomy. There was no budgetary control by Unesco over its expenditure, as there was in the case of a number of other organizations with which Unesco had contractual arrangements. It was controlled by its own auditors, and their report, although not formally required, had been made available. Further control could take two forms: a more detailed study of the budget estimates and a more detailed report on the disposal of funds; and, more drastically, an examination of all the financial commitments of the Commission before they became facts, as took place in Unesco itself, where every project was thoroughly examined beforehand by the Comptroller. That was a duty which did not belong to Unesco, but to the Commission.

(9) Mr. BAUGNIET (Belgium) was sorry to note that a comparison between the Working Capital Fund statement of deposits for 1952 and 1953, relating to Member States' contributions, revealed a considerable increase in unpaid dues.

(10) Mr. HARPER-SMITH (Comptroller) said that the question raised by the delegate of Belgium would probably be considered as soon as the Committee on Contributions had presented its report.

(11) Miss LAISE (United States of America) said that, although the report as it stood could be approved, the Administrative Commission should call the attention of the Programme and Budget Commission to the statement of the Auditor, so that, when appraising the programme for the future, some alteration could be made in the arrangement with the International Commission for the Scientific and Cultural History of Mankind.

(12) That proposal, seconded by the delegates of Greece and Italy, was approved.

(13) The Administrative Commission agreed to recommend the two reports to the General Conference and, at the suggestion of the delegate of the United Kingdom, seconded by the delegate of Pakistan, to qualify them as very satisfactory.

**ITEM 8.4.8.1 OF REVISED AGENDA : EXPANDED PROGRAMME OF TECHNICAL ASSISTANCE (document 8C/ADM/28)**

(14) Mr. HARPER-SMITH (Comptroller) said that the audited accounts for 1952 were approved by the Executive Board, in accordance with the resolutions of the seventh session. It was necessary for those audited reports to be approved each year for forwarding to the United Nations. The 1953 accounts had not been submitted in time, owing to the clash in dates between the General Conference and the General Assembly.

(15) A resolution was proposed pro forma by the CHAIRMAN, and seconded by the United Kingdom, Greece, Israel, and Iraq, that the General Conference be recommended to authorize the Executive Board to examine and approve the report on the expenditure of technical assistance funds for 1955 and 1956.

(16) Agreed.

**ITEM 9.4.5 OF REVISED AGENDA. ADMINISTRATION OF THE WORKING CAPITAL FUND (document 8C/ADM/9)**

(17) Mr. HARPER-SMITH (Comptroller) summarized the contents of document 8C/ADM/9.

(18) The CHAIRMAN, taking each clause separately, moved a pro forma resolution recommending the General Conference to adopt the decision proposed under B (i) (page 2).

(19) The motion was seconded by the delegates of Belgium, the United Kingdom and France, and adopted.

(20) The CHAIRMAN then moved a similar resolution on B (ii).

(21) Miss LAISE (United States of America) asked whether it was essential to move a resolution before a subject could be discussed. She hoped a precedent would not be created. A number of issues were for information only.

(22) The CHAIRMAN explained that his method of proposing resolutions pro forma, in cases where they had not been presented by the Executive Board, was merely intended to speed up procedure, but that nothing could stop delegates from speaking on whatever they wanted to.

(23) Miss LAISE (United States of America), on (ii), objected to the use of the word unpredictable as being synonymous with unforeseen, and proposed its replacement by the word extraordinary. Secondly, she thought it was not possible to take a final decision on a resolution of that sort before all the programme items had been considered. Sub-paragraphs (a) and (b) related to specific activities.

(24) The first proposal by the delegate of the United States of America was adopted.

(25) It was decided to defer the discussion of sub-paragraph (ii).

(26) Mr. AMMOUN (Lebanon) pointed out that the use of the words objected to by the United States delegate need not prevent the Commission from adopting the resolution. For one thing, the word extraordinary, in connexion with the budget, had been in universal use for a long time. For another, rejection of the word unpredictable would leave the problem unchanged, since it would not affect the nature of such expenditure (which was useful precisely because it gave the Secretariat a free hand in its financial administration).

(27) The CHAIRMAN agreed that a decision had been taken too quickly on the word unpredictable in sub-paragraph (ii).

(28) Mr. HARPER-SMITH (Comptroller) said that what was unpredictable was not the event but the amount, for example in the case of salary adjustments.

(29) Miss LAISE (United States of America) saw the point but considered that the Working Capital Fund should not be used to create additional commitments unless the expenses were really extraordinary. It was not meant to cover cases of bad budgeting.

(30) Mr. KELLY (Australia) remarked that the resolution (sub-paragraph ii) was worded differently in the three languages. The Spanish referred to gastos imprevistos y extraordinarios, the English to unforeseen and unpredictable expenses, while the French talked of faire face à des dépenses imprévues ou à des dépenses dont le montant ne peut être évalué exactement. The French text was the most precise.

(31) Mr. EL-ZAYAT (Egypt) proposed that the three qualifying adjectives used in the different versions should all be included.

(32) That proposal was seconded by the delegate of South Africa and adopted.

(33) Mr. KELLY (Australia) raised a question of substance on sub-paragraph (ii). Why had special provision been made for salary adjustments from the Working Capital Fund for 1955-1956?

(34) Mr. HARPER-SMITH (Comptroller) said that that provision was linked with the common policy of the United Nations and Specialized Agencies in regard to salary adjustments due to rises in the cost of living index. A document on the subject would be debated later.

(35) Mr. HAGUIWARA (Japan) wondered why the Director-General had submitted a separate resolution for each year. Adoption of a two-year basis left more room for unforeseen factors. It would surely be more natural to insert the two paragraphs in question in the Financial Regulations for the subsequent financial years, rather than to submit a single resolution for 1955-56 as a whole.

(36) Mr. HARPER-SMITH (Comptroller) replied that the financial regulations of Unesco were drawn up on a common basis with those of the United Nations and Specialized Agencies. However, the Director-General could be asked to discuss the position with the other agencies to see whether a regulation of the kind suggested could be inserted in the general framework of all of them.

(37) The delegate of Japan accepted that solution.

(38) Mr. EL-ZAYAT (Egypt) supported the remark made previously by the Lebanese delegate. There could be no fear (as suggested by the delegate of the United States of America) that resolution (ii) could become a pretext for the Director-General to impose a heavier burden on Member States, since, prior to any commitments, the approval of the Executive Board would have to be obtained. The Director-General should be allowed a margin of error. That amounted to no more than 3% of the budget. The delegate of Egypt moved that the (slightly amended) text should be adopted.

(39) Mr. ARTHUR (United Kingdom), replying to the remark by the delegate of Japan, did not want to see provisions adopted by the Administrative Commission at that stage incorporated in the Financial Regulations. Each General Conference would wish to consider the use of the Working Fund.

(40) Mr. HAGUIWARA (Japan), in reply to a question from the CHAIRMAN, said that he would not go so far as to urge that the United Kingdom delegate's suggestion should become a formal resolution but hoped it would be passed to the Director-General for his consideration.

(41) Miss LAISE (United States of America) proposed that the resolution should not be definitely recommended until the end of the proceedings of the Administrative Commission, as it might still be affected by the discussion on the cost of living, and other discussions.

(42) The resolution was approved, with the provision that any member of the Commission could bring it up again for discussion at a later stage.

(43) The resolution contained in sub-paragraph B (iii) was proposed pro forma by the CHAIRMAN and seconded by the delegate of Thailand.

(44) Mr. POHL (Union of South Africa) enquired whether any time-limit had been set for the reimbursement of the advances mentioned in the sub-paragraph.

(45) Mr. HARPER-SMITH (Comptroller) agreed that that could be done. It had not been found necessary up to the present.

(46) Mr. MENDOZA (Guatemala) asked for a brief explanation of the kind of self-liquidating expenditures referred to, as he considered it essential for the Commission to have concrete information on the subject before it decided on a time-limit for the reimbursement of the advances in question.

(47) Mr. HARPER-SMITH (Comptroller) said that a number of items were met by the fund in connexion with work carried out with or on behalf of another United Nations Agency.

(48) Sub-paragraph B (iii) was adopted.

(49) Sub-paragraph (iv), moved pro forma by the CHAIRMAN and seconded by the delegate of the Philippines, was adopted.

(50) Sub-paragraph (v), seconded by the delegate of Lebanon, was adopted.

(51) The whole resolution (subject to the French text being found satisfactory) was adopted for recommendation to the General Conference.

**ITEM 9.4.6 OF REVISED AGENDA PROPOSED AMENDMENTS TO THE FINANCIAL REGULATIONS** (document 8C/ADM/10)

(52) Mr. BENDER (Executive Board) said that these amendments had been examined and approved by the Board.

(53) The delegate of South Africa proposed their adoption by the Administrative Commission and was seconded by the delegate of Iran.

(54) Mr. HARPER-SMITH (Comptroller) explained that surpluses arose on two occasions. At the end of each financial period there was a difference between the appropriations and the obligations entered into; and at the end of the period of time given for liquidation, another surplus arose: the difference between the amount disbursed and the amount recorded as an obligation. The original financial surplus was not distributed unless it was in cash. The distribution of a book surplus would create a sort of bankruptcy. The question was: should balances be returned to Member States and, if so, how? It had been done by deduction from the budget assessment, in the case of Member States who had paid their contributions. In the case of those who had not paid, it was distributed to them by reduction of their arrears. But the result of that procedure was that 100% was never collected.

(55) Mr. HARPER-SMITH went over the sample figures given in the annex to document 8C/ADM/10. It was proposed to alter the Financial Regulations so as to prevent the distribution of cash surpluses to members who had not paid. That would avoid the recurrence of failure to collect 100% in any given year.

(56) Mr. KELLY (Australia) appreciated the lucid

explanation given by Mr. Harper-Smith, but raised the question of a case in which a dispute over a trifling amount between a Member State and Unesco might show a small arrear from year to year which would prevent that State from receiving a share of a cash surplus. Was some form of pro rata distribution practicable? Could the Director-General amend his amendment in that sense?

(57) Mr. HARPER-SMITH (Comptroller) asked for time to think that over.

(58) Mr. AMMOUN (Lebanon) thought that sounded a very sensible arrangement but he would like to have a few more details. Did the resolution as it stood make it quite clear that Member States which had not yet paid their contributions in full could, once they had done so, be credited retroactively with their share of surplus cash distributed? To avoid any misunderstanding on the point, Mr. Ammoun proposed to add the following:

"Member States are entitled to receive their share of the cash surplus for any financial year, once they have paid the whole of their contributions relating to that same financial year".

(59) The proposed amendment was seconded by the Egyptian and Argentine delegates.

(60) Mr. HARPER-SMITH (Comptroller) considered that the wording of the text covered the suggestion by the delegate of Lebanon. The surplus was to be surrendered to any Member State who had paid in full, the moment he had done so.

(61) Mr. AMMOUN (Lebanon) pointed out that Regulation 4.4. referred to a twelve-month period dating from the end of a financial year, and suggested that such a time-limit might leave some doubt as to the general application of the arrangements.

(62) Mr. HARPER-SMITH (Comptroller) said that the date was that on which the amount was fixed, not that on which the distribution was made. Some surpluses dated back to 1947.

(63) The delegate of Lebanon withdrew his objection.

(64) Mr. ARTHUR (United Kingdom) supported the phrase proposed by the Director-General, in spite of the sound objections of the delegate of Australia, because it contained an exhortation to pay up.

(65) Mr. KELLY (Australia) was all in favour of such exhortations but did not think their right place was in an amendment to the Financial Regulations.

(66) Mr. HAGUIWARA (Japan) asked what was the practice in other international organizations on that question.

(67) Mr. HARPER-SMITH (Comptroller) said that after consideration he thought there could be no objection to a proportionate distribution of surpluses. Answering the delegate of Japan, he added that in spite of considerable effort they had not succeeded in making common financial regulations on that question, as the problems varied so much from agency to agency.

(68) Mr. MENDOZA (Guatemala) suggested that all questions of distribution of surpluses and contributions by Member States who had or had not paid in full, should be settled by adding the total amount of each surplus to the next budget, under the head of extra-ordinary revenue, as soon as it became available. Distribution of surpluses would thus become automatic, as the amount of the contribution decreased for the following year.

(69) Mr. HARPER-SMITH (Comptroller) said that that had actually been the procedure for the past two or three budgets, but it did not give Member States their due, in proportion to what they had contributed. Taking up the suggestion by the delegate of Australia of a pro rata distribution, he said that would lead to the same situation as that which the document under discussion was intended to meet. He suggested that, if there were a dispute over an amount due, the Conference could decide that a Member State should not pay, and the amount would have to be added to the next budget estimates. On the whole, the proposal was best as it stood.

(70) The delegate of Australia was satisfied with that explanation.

(71) The CHAIRMAN proposed that, as it had a complicated legal aspect, it could be left until Wednesday when surpluses in general were to be taken up.

(72) Mr. SALIM (Hashemite Kingdom of Jordan) suggested that surpluses be added to the Working Capital Fund.

(73) Mr. MENDOZA (Guatemala) stressed the fact that a surplus was the rightful property of the Organization, and not of the countries which had contributed to it. He therefore considered that, if the sum were not to be added to the next budget, it would be more logical for the Organization to make use of it in attending to one of its many pressing needs, such as technical assistance.

(74) Mr. HARPER-SMITH (Comptroller) said that that practice had been followed, for instance in the Food and Agriculture Organization, but was not appropriate where the full amount of working capital had been called up.

(75) Miss LAISE (United States of America) objected to the implications of the proposal by the delegate of Guatemala, which would involve a departure from the present Financial Regulations, whereby a surplus was credited to Member States.

(76) The resolution was adopted for recommendation to the General Conference.

**ITEM 9.4.7 OF REVISED AGENDA: REQUEST FROM THE GOVERNMENT OF IRAN FOR THE WRITING OFF OF THE SUM OF $4,915.15, BEING A LOSS INCURRED BY THE IRANIAN NATIONAL COMMISSION ACTING AS A DISTRIBUTING AGENCY FOR UNESCO COUPONS (document 8C/ADM/29)**

(77) Mr. RAADI (Iran) said that, in view of the detailed nature of the document under discussion, he would give no more than a brief summary of the subject. He pointed out that the circumstances which had led to an altered exchange rate for the rial in terms of the dollar were exceptional, and stressed the fact that the National Commission's budget was in any case not large enough to meet the resultant situation. He accordingly submitted a motion to the effect that "the Administrative Commission recommend that the General Conference authorize the Director-General to write off the sum of $4,915.15 to the Iranian National Commission acting as a distributing agency for Unesco coupons."

(78) That motion was supported by the Colombian, Chilean, Belgian, Egyptian, Israeli and Italian delegates.

(79) Mr. HARPER-SMITH (Comptroller) explained, further, that it was not always easy for Unesco to accept payment for Unesco coupons in the currency of the country in which they were issued, of which it often had no need. Occasionally that problem was solved by negotiations with other Specialized Agencies who could use the currency. That had been the case with Iran. The United Nations had accepted Iranian currency and repaid Unesco in French francs, but it had specified a date for receipt of payment on the part of the Iranian National Commission: 1 November 1952, when the rate was 41 rials to the dollar. The proceeds were only deposited on 31 August 1953, by which time the rate had moved and $4,900 were lost on the exchange.

(80) Mr. AVIDOR (Israel) was wholly in favour of the proposal submitted by the delegate of Iran, but wished it enlarged to cover similar losses incurred by other National Commissions ($5,700 had been lost in Israel, $1,600 in Yugoslavia in a similar manner).

(81) Mr. SALIM (Hashemite Kingdom of Jordan) thought that each case should be studied on its merits.

(82) Mr. EL-ZAYAT (Egypt) supported the motion in the case of Iran, but felt that, if the concession were made general, Unesco would be the loser.

(83) Mr. BENDER (Executive Board), in reply to a question by the delegate of Ceylon, said that the Board had not been informed of the cases of Israel and Yugoslavia.

(84) Miss LAISE (United States of America) thought that the real problem was to avoid the occurrence of similar incidents in the future. Should National Commissions be entrusted with the distribution of Unesco coupons unless underwritten by their governments? She proposed that the discussion be postponed until all the facts had been presented.

(85) That proposal was supported by the delegates of the Netherlands and Australia.

(86) Mr. RAADI (Iran) said that the proposal submitted by the United States delegate was equivalent to a request to the Director-General to fix future policy. He was not opposed to that idea, but, since the Iranian request, which had been prompted by exceptional circumstances very unlikely to recur, had already been carefully examined, he repeated his request that the question be discussed immediately.

(87) Mr. EL-ZAYAT (Egypt) moved an amendment to the motion for postponement. He suggested that deferment should apply to the other two cases. The case of Iran should be considered at once.

(88) Mr. AMMOUN (Lebanon) said he had no wish to complicate procedure, but he wondered whether it would not be helpful if any motion or draft resolution framed in the course of a meeting were submitted to the delegates in writing, so that they might have a definite text clearly in mind when they voted. If necessary, the mover might dictate slowly to his colleagues.

(89) Mr. RAADI (Iran) reminded the Commission that the question had only been brought before the Executive Board in order to obtain the latter's permission to include it on the Administrative Commission's agenda. He wanted to add, however, that after a study of that special case had been made, the Director-General had intimated, in the course of the discussion, that he would support the Iranian Government's request before the General Conference.

(90) Mr. FRAGA IRIBARNE (Spain) remarked that only the request of the Government of Iran figured on the agenda; those submitted by the delegations of Yugoslavia and Israel were not included; there was therefore no need to decide whether or not the former should be dealt with. The Commission should proceed with it at once.

(91) Miss LAISE (United States of America) feared that, if a decision were taken, the Commission might be creating a precedent. It was not yet known why the National Commission of Iran had not made the payment at the arranged time. A fair decision could not be taken at that stage.

(92) Mr. KELLY (Australia) said that the delegate of the United States of America had raised a question of principle. He moved that the discussion be deferred until the afternoon meeting.

(93) Agreed.

The meeting rose at 1 p.m.

# THIRD MEETING

*15 November 1954 at 3.30 p.m.*

*Chairman*: Mr. BEEBY (New Zealand)

**ITEM 9.4.7 OF REVISED AGENDA: REQUEST FROM THE GOVERNMENT OF IRAN FOR THE WRITING OFF OF THE SUM OF $4,915.15, BEING A LOSS INCURRED BY THE IRANIAN NATIONAL COMMISSION ACTING AS A DISTRIBUTING AGENCY FOR UNESCO COUPONS (document 8C/ADM/29) (continued)**

(1) As the Iranian request had already been discussed in the morning Mr. SALIM (Hashemite Kingdom of Jordan) moved that a vote be taken on it without further delay.

(2) The motion was seconded by Mr. BAUGNIET (Belgium).

(3) Mr. KELLY (Australia) was of opinion that the Iranian request raised a point of principle which called for a full discussion. He therefore opposed the motion for the closure of the debate.

(4) The Australian motion was seconded by Messrs POHL (Union of South Africa) and KOTSCHNIG (United States of America) on the grounds that they wished for further information.

(5) Mr. RAADI (Iran) thought that no decision need be taken on the closure motion; but if the latter were rejected he would be very willing to give the Commission additional explanations on the substance of the question, which had already elicited comment from previous speakers.

(6) The motion for the closure of the debate was put to the vote and rejected by 15 votes to 9.

(7) Mr. MENDOZA (Guatemala) said that he sympathized with the request from the delegation of Iran; a purely distributing agency, not working for profit, should not be responsible for losses if these did not arise from its own management methods. That was a question of principle, and the case of Iran should not be regarded as a special and separate one. There were other similar cases; and the Commission should be concerned to establish a precedent, not to act casuistically. A general principle should be established for resolving that or similar questions fairly.

(8) Mr. SALIM (Hashemite Kingdom of Jordan) did not consider it to be a matter of principle. The Iranian National Commission had simply been unable to make payment in time; there was no question of ill will.

(9) Mr. BLANCO ACEVEDO (Uruguay) said that the Commission should consider the request by the Iranian delegation sympathetically, but thought that the latter should explain in greater detail the sentence in the letter from the Iranian National Commission to the Director-General where it was said that the losses incurred by the Commission as distributing agency for Unesco coupons had been "unavoidable because of the administrative procedure applying, in Iran, to budgetary periods and dates of payment". The delegation of Iran should say exactly what those difficulties were.

(10) The case in point and others similar to it, should be settled in the light of the actual difficulties which had resulted in a loss of money that Unesco was being called upon to make good.

(11) Mr. KOTSCHNIG (United States of America) said that his delegation was very much in sympathy with the difficulties of Iran and its National Commission. There was obviously a principle at stake, however. There was also a matter of procedure, and the question which he wished to put was not to the Iranian delegation but to the Secretariat. Had the whole scheme been set up in such a way as to minimize the danger of such an occurrence? Were there any rules laying down a time-limit for payments? At a time when there was too much instability of currency, such rules should exist; if they did not, some authority, such as the Executive Board, should try to work out a procedure whereby countries in a state of inflation could be saved from the present embarrassing situation.

(12) Mr. ZUCKERMAN (Department of Mass Communication) explained that, as a general rule, payments for Unesco coupons were accepted only in United States dollars, French francs or pounds sterling. An exception had been made, however, in the case of three countries - Iran, Israel and Yugoslavia - which were unable to pay in those currencies. They were supposed to pay for coupons within a given time.

(13) In the case of Iran, a delay had occurred, but Unesco had not been informed at the time and had not been aware of the loss until the United Nations credited the Organization with a sum less by $4,915.15 than that expected. As far as the danger of creating a precedent was concerned, all three cases went back to 1952 and, since then, the turnover had been increasing. At present, the monthly turnover was $150,000.

(14) Mr. KELLY (Australia) felt that in cases where there had been considerable delay in paying on the

part of a National Commission, the latter, rather than Unesco, should bear the loss involved; otherwise, Unesco would find itself in the position of subsidizing a particular National Commission. If a National Commission incurred a loss, it should look first to its own government and people. Unesco should not have to pay for the administrative inefficiency of National Commissions.

(15) While in sympathy with Iran, Mr. POHL (Union of South Africa) was against prejudging the issue without sufficient evidence. If a country came to Unesco for relief, it should justify its request fully.

(16) Princess Souvanna PHOUMA (Laos) observed that the Iranian National Commission was not alone in having had to face financial difficulties resulting from currency devaluation in connexion with Unesco coupons. The National Commission of Laos, for instance, some time ago found itself in a similar position, from which it was able to escape only by great effor . The delegation of Laos was therefore keenly interested in the way the Iranian Government's request would be treated by the Conference.

(17) Although he was quite prepared to vote in favour of the request, Mr. HAGUIWARA (Japan) wished to know what steps the Secretariat intended taking to avoid other National Commissions having to make similar requests in future.

(18) Mr. ZUCKERMAN (Department of Mass Communication) replied that there had been devaluations since 1952, but that no loss had been incurred because it had been arranged that payment should be made in French francs. Further, National Commissions had been instructed not to issue coupons until they had actually been credited.

(19) Mr. RAADI(Iran) regretted that the Iranian Government had been obliged to bring before the General Conference a question to which the Commission had already devoted a fair part of its valuable time. But the Director-General himself had judged it advisable to submit the matter to the Conference.

(20) In reply to the various remarks made, Mr. Raadi observed that the problem facing the Iranian National Commission was in no way due to inefficiency on its part. For years, in fact, that Commission had succeeded in distributing Unesco's coupons under favourable circumstances. But it had recently been placed in an exceptional situation because the national budget had not been voted by the expected date, and the distributing agencies - which were mostly government organizations - had therefore been deprived of the funds which they needed to pay for the coupons forwarded to them.

(21) In any case, as Unesco coupons were designed to help institutions in certain countries to obtain books or material which they would normally have great difficulty in procuring, the Administrative Commission would only be showing itself faithful to the spirit of the system if it voted in favour of the Iranian request.

(22) The CHAIRMAN requested the Commission to vote on the following resolution:

"The Administrative Commission recommends that the General Conference accede to the request from the Government of Iran for the writing off of the sum of $4,915.15, being a loss incurred by the Iranian National Commission acting as a distributing agency for Unesco coupons."

(23) The resolution was adopted by 26 votes to 6.

(24) The CHAIRMAN observed that there was another request, and a further one was expected, but that there was no motion before the Commission. He therefore suggested that the Secretariat be asked to prepare a paper for a later meeting, covering both requests and showing the implications for future occasions.

(25) Agreed.

**ITEM 9.3.2 OF REVISED AGENDA DRAFT AMENDMENTS OF ARTICLE V AND ARTICLE VI OF THE CONSTITUTION, PROPOSED BY THE DIRECTOR-GENERAL** (document 8C/ADM/2)

(26) Mr. BENDER (Executive Board) introduced document 8C/ADM/2 and drew attention to the draft resolution on page 2.

(27) Mr. HUZAYIN (Egypt), supported by several delegations, moved approval of the Executive Board's resolution.

(28) Mr. POHL (Union of South Africa) stated that his delegation was entirely in favour of the principle involved, but was not satisfied with the wording. The words "since the last ordinary session of the Conference" at the end of the first paragraph were confusing, and the words if necessary in the fourth line of the second paragraph seemed inappropriate. He therefore proposed the substitution of the following words at the end of the first paragraph: "which he is required to prepare in accordance with the terms of paragraph 3 of Article VI", and the deletion of the words if necessary in the second paragraph.

(29) The CHAIRMAN remarked that the drafting would be considered by the Legal Committee.

(30) In reply to the observations just made, Mr. SABA (Legal Adviser) said that one of the Legal Committee's tasks would be to make sure that the terms of the proposed amendments were really in line with the intention underlying them. Referring to page 2 of document 8C/ADM/2, he observed that in the fifth line the words 'all but the first sentence of' should be replaced by 'all but the first sentence ..... amended to read as follows:'. He also thought that, in the penultimate line, the words if necessary need not be deleted. If the General Conference in fact met immediately after the end of the financial year, the additional report in question would not be required.

(31) Mr. Saba next recalled that the essential purpose of the proposed amendments was that the periods covered by successive reports of the

Director-General should correspond with the two financial years during each of which specific activities should be completed. Such a method, he thought, was all the more to be recommended because Unesco had in any case to submit annual reports to the Economic and Social Council for the period beginning 1 January and ending 31 December.

(32) Mr. WEST (United Kingdom) seconded the Board's proposed amendment to paragraph 9 of Article V, subject to any drafting changes which the Legal Committee might recommend. On the other hand, he was not sure that the proposed amendment to paragraph 3 of Article VI was necessary. He was against tying down the Secretariat to a period which might prove inconvenient in the future. His delegation therefore proposed that the intention behind the suggestion to amend paragraph 3 of Article VI be incorporated in a resolution of the General Conference. The Legal Committee could be asked to prepare the resolution for approval by the Commission.

(33) It was agreed to approve the Executive Board's resolution in principle, referring it to the Legal Committee, which would report back to the Commission.

**ITEM 9.3.3 OF REVISED AGENDA: DRAFT AMENDMENT TO THE CONSTITUTION, AND OTHER PROVISIONS, RELATING TO THE WITHDRAWAL OF MEMBER STATES (documents 8C/ADM/6 and 8C/ADM/6 Add.)**

(34) Mr. BENDER (Executive Board) outlined the main points in document 8C/ADM/6 and stated that Cambodia had been the only Member State to submit amendments (document 8C/ADM/6 Add.).

(35) Mr. RAADI (Iran), seconded by Mr. FERNANDEZ MORENO (Argentina) and Mr. VITO (Italy), moved approval of the Executive Board's resolution in paragraph 4 on page 2 of document 8C/ADM/6.

(36) Mr. HAGUIWARA (Japan) thought it very desirable that the question of withdrawal should be examined during the current session of the Conference. As no Member State was at the moment contemplating withdrawal from the Organization, the problem could be discussed freely - which was not the case at the seventh session and might not be at the ninth.

(37) If however, the Conference decided to postpone consideration of the question to the ninth session, Mr. Haguiwara felt that such postponement should not be based on any desire to await the revision of the United Nations Charter. The Constitution of Unesco was a separate and independent instrument, entirely different in character from the Charter of the United Nations - which, moreover, unlike Unesco, was a political institution.

(38) Mr. BENDER (Executive Board) pointed out that the Board's resolution contained no reference to the United Nations.

(39) Mr. POHL (Union of South Africa) was in broad agreement with the delegate of Japan. He also supported the preamble on page 1 of the document: "The General Conference, hoping that Unesco will continue to adhere etc....". However, as Unesco and WHO were the only two Agencies which had made no provision for withdrawal, he felt that the omission should be repaired as soon as possible. To refer the matter to the General Conference at its ninth session would mean further delay. He also agreed with the delegate of Japan that Unesco's decision need not depend upon that of the United Nations. He therefore moved that the Commission reject the Executive Board's proposal.

(40) Mr. BAUGNIET (Belgium) shared the views of the South African delegate. He thought it desirable that the question of withdrawal should be examined at a moment when it was not linked with any specific case.

(41) Mr. WEST (United Kingdom) seconded the remarks made by the delegates of Japan, the Union of South Africa and Belgium. He agreed that it was far better to discuss the problem when there was no case before the Conference.

(42) For the reasons given by previous speakers, Dr. MUDALIAR (India) and Mr. KOTSCHNIG (United States of America) were against postponing consideration of the problem.

(43) The Executive Board's resolution on page 2 of document 8C/ADM/6 was put to the vote and rejected by 19 votes to 10.

(44) The CHAIRMAN drew attention to the alternative clauses proposed by the Director-General at the top of page 2 and asked members whether they wished to refer them immediately to the Legal Committee, or to take a decision on the principle first.

(45) Mr. MENDOZA (Guatemala) said that, although the Administrative Commission might agree to refer the matter to the Legal Committee, it would be interesting to exchange impressions on the substance of the question in the Commission itself. It was the most delicate of all the matters before Unesco at the current session of the General Conference. The Government of Guatemala had studied it with great interest and care, after it had been apprised of the text of the document issued by the Executive Board.

(46) The Guatemalan delegation considered that the Constitution of Unesco, like the Constitutions of other organizations, should contain an article regulating the way in which a government might exercise the right to withdraw from the Organization when circumstances demanded it. The first alternative draft in document 8C/ADM/6 was, from that standpoint, acceptable. The withdrawal of a State was a unilateral act, as was its entrance to the Organization. The first alternative draft contained, however, one point which might cause difficulties - that the right to withdraw should be subject, in its execution, to a time-limit of 12 months, which had been established in the light of the biennial Conference system. If that proved an obstacle, a time-limit of two years could be substituted, or

a waiting period until the subsequent session of the General Conference.
(47) The second alternative draft was unacceptable, and that must be said with the greatest emphasis. It embodied a principle which affected the sovereign rights of States. The question of belonging or not belonging to an international organization could not be dependent on a vote, still less on a vote which, in order to be effective, required a two-thirds majority. An act of sovereignty could not be made subject to the results of a voting procedure of that sort.
(48) Furthermore, if a State did not wish to remain a member of an organization and there was machinery blocking its withdrawal, the upshot would be self-defeating and lacking in all sense. It would create a situation of rebellion, since a Member State that took no part and did not pay, could not be made the subject of legal sanctions which would oblige it to remain in the organization, collaborate with it, and contribute to its financial expenditure. Even if such sanctions existed, they would be ineffective, as those who were forced to co-operate never co-operated well. Collaboration with international organizations must be based on goodwill and spontaneity.
(49) Mr. Mendoza concluded by expressing anxiety as to the possibility of the second alternative draft or a proposal similar to that submitted by the delegation of Cambodia, being approved.

(50) Mr. KELLY (Australia) stated that his delegation was in favour of the first alternative, subject to the addition of the following words at the end of the first paragraph: "or shall affect the continuing legal force of agreements concluded by the withdrawing State with Unesco." The second paragraph would remain the same. His delegation considered that it would be completely unrealistic for the Constitution to try to bind States to membership against their will. Unesco was bound to assess all Member States whether they accepted their obligations or not, and experience had shown that the assessment of Member States not wishing to remain members of the Organization led to extremely complicated financial procedures.

(51) The CHAIRMAN reminded the Commission that amendments to the Constitution of a substantive nature had to be circulated six months in advance, and an amendment to an amendment, three months in advance.

(52) Mr. KELLY (Australia) pointed out tha his amendment was merely an enlargement of the last sentence of the proposed amendment, intended to make for greater clarity.

(53) Mr. FRAGA IRIBARNE (Spain) presented a motion solely relating to procedure. He thought it would be a tactical error to opt for one of the two extremes - i.e., that the two alternative drafts should not be discussed before the Legal Committee had been informed of them, and that they should not be sent to the Legal Committee without any comment at all. The Commission should take a decision of principle on them and, if any change of detail should arise, it too should be communicated to the Legal Committee for the latter to pronounce upon it.

(54) At the CHAIRMAN's suggestion, Mr. KELLY (Australia) moved the adoption of the first alternative in principle.

(55) Mr. FERNANDEZ MORENO (Argentina) said that his delegation had previously voted against taking up a position, so as to support the Executive Board's resolution: the Argentine delegation accepted however the Guatemalan representative's standpoint without reserve, and therefore considered that Member States had a prior right which could not be made subject to a vote.
(56) He supported the Australian delegation's proposal with regard to Article II.6.

(57) Mr. KOTSCHNIG (United States of America) agreed with the views so far expressed. Anything but the principle of unilateral withdrawal would run counter to international law and would, in any case, be unpractical, leading to financial complications. He therefore supported the Australian motion.

(58) Mr. HAGUIWARA (Japan) proposed that the Commission vote on the principle forthwith, leaving drafting amendments to the Legal Committee.

(59) Mr. BAUGNIET (Belgium) thought the Commission could approve in principle - subject possibly to a few amendments of detail - the text appearing at the top of page 2 of document 8C/ADM/6, under the title of "First alternative providing for withdrawal by the decision of the withdrawing State alone". He emphasized that it was hardly possible to force a country to remain, against its will, a Member State of Unesco.

(60) Mr. SALIM (Hashemite Kingdom of Jordan) pointed out that,as Unesco's aim was to be universal, it was desirable for it to have as many Member States as possible. It could happen that a Member State decided to withdraw from the Organization against the wishes of its own people, and such a situation should be guarded against. Further, from the financial point of view, if a State contributing a large sum to the budget decided to withdraw, it would have an adverse effect on Unesco's work. He was therefore in favour of the second alternative and of imposing a long period of notice between a government's request to withdraw and the acceptance of that request by the General Conference.

(61) Mr. HAGUIWARA (Japan), seconded by Mr. KOTSCHNIG (United States of America), moved the closure of the debate and the submission of the Australian motion to the vote.

(62) Adopted.

(63) The Australian motion to approve the first alternative in principle was adopted, with 1 abstention.

(64) The CHAIRMAN invited members to move the text of the first alternative in document 8C/ADM/6, or other amendments not contravening Rule 104 of the Rules of Procedure,

or resolutions for the guidance of the Legal Committee.

(65) Mr. KELLY (Australia) moved the amendment which he had proposed earlier.

(66) Mr. BAUGNIET (Belgium) suggested that, in the text at the top of page 2, the words "Such notice shall take effect one year after the date of its receipt..." should be replaced by "Such notice shall take effect at the end of the year following the date of its receipt..." A country which had informed the Director-General of its wish to withdraw would thus be obliged to fulfil its obligations as a Member State for more than one year subsequent to such notification.

(67) Mr. KOTSCHNIG (United States of America) moved the addition of another sentence, to follow on from that proposed by the delegate of Australia, namely: "The financial obligation to the Organization of a Member State or Associate Member State which has given notice of withdrawal shall include the entire financial period in which the notice takes effect".
(68) The adoption of that amendment would ensure that the two-year budget was not completely upset in the case of one of the larger contributors feeling unable to continue its membership. For example, if a country gave notice of withdrawal in April 1955, it would have to pay its contribution until the end of 1956.

(69) Mr. SOLDATOV (Union of Soviet Socialist Republics) wished to make it quite clear that, although his delegation was in favour of the principle of unilateral withdrawal, it could not consider itself bound by the considerations put forward since the vote on the principle had been taken.

(70) The CHAIRMAN explained that none of the suggestions at present being made was binding. They would all be referred to the Legal Committee and the Commission would have an opportunity to vote on them when the Committee reported back. With regard to the Belgian proposal that notice of withdrawal should not become effective until the end of the following year, he pointed out that a Member State giving notice, for example, in 1956, would have to contribute payment until the end of 1958.

(71) Mr. FERREIRO (Uruguay) said that his delegation had voted in favour of the question being postponed, in accordance with the line taken by the Executive Board. He thought that the problem could not be brought up at the present time, in view of the character of Unesco and the system by which Member States belonged to it.
(72) The question was being debated whether Member States could withdraw from the Organization unilaterally, when they thought it convenient, and not by a majority decision; but it should not be forgotten that such States would have contracted obligations prior to their decision to withdraw, and the Organization could require that such obligations be discharged.
(73) Article II of the first alternative was not correctly drafted; instead of saying "may withdraw from the Organization", it should read: "deciding to withdraw from the Organization, shall give notice ..." etc.
(74) Similarly, the proposal earlier submitted by the United States delegate represented a basic alteration to the draft. It could not be accepted, since Rule 104 of the Rules of Procedure stipulated that amendments of that kind must be presented at least three months before the opening of the General Conference. It was not a drafting or procedural amendment, but a basic amendment; and the Commission, therefore, could not examine it. Article II now being considered said that the withdrawal of a Member State should not affect the financial obligations owed by that State, and the United States proposal modified that substantially by fixing a time-limit of two years for the discharge of those obligations.

(75) Mr. NEVINSON (United Kingdom) proposed that the Australian, Belgian and United States' suggested amendments be submitted to the Legal Committee in writing, so that it could work out their implications and see whether they were compatible or incompatible and whether they were practicable.

(76) Dr. MUDALIAR (India) pointed out that notice of withdrawal was not tantamount to acceptance of it. The time element was therefore important. A Member State should be given time to reconsider its request to withdraw. With regard to the motions concerning financial obligations, he agreed that the Commission should not discuss them further until the Legal Committee had considered their admissibility.

(77) Mr. VILLALON GALDAMES (Chile) said that in the Spanish text of document 8C/ADM/6, where it spoke of the notice of withdrawal addressed to the Director-General, there appeared the word previa; that might give rise to doubts. The English text was clearer. In Spanish it was necessary to say no more than "mediante notificación al Director General" or "notificando al Director General", without including the word previa.

(78) The CHAIRMAN asked if the Commission would agree to the United Kingdom motion, worded as follows:

"The Administrative Commission resolves to inform the Legal Committee that it has approved in principle the unilateral withdrawal of Member States, and refers, without prejudice, notices of motion to it for consideration."

(79) The motion was seconded by several delegations and adopted.

The meeting rose at 6.30 p.m.

# FOURTH MEETING

*16 November 1954 at 10.30 a.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.3.1 OF REVISED AGENDA: AMENDMENT TO ARTICLE V OF THE CONSTITUTION (STRUCTURE OF THE EXECUTIVE BOARD) (documents 8C/ADM/1 and 8C/ADM/1 Add.)**

(1) The CHAIRMAN, introducing the documents, said that Annex 1 of document 8C/ADM/1 (proposal by the United States of America) had been withdrawn by its sponsors in favour of the amendment to Article V of the Constitution set forth in Annex 3, which amendment was also sponsored by Brazil, Australia and the United Kingdom. Annex 2 (draft amendment by Australia, the United States of America, Canada and Colombia) could be held over for later discussion.
(2) The Commission should therefore begin by considering Annex 3. The important question at issue was whether members of the Executive Board were to be private individuals acting on behalf of the Organization as a whole, as theretofore, or representatives of governments. Document 8C/ADM/1 Add. was an amendment by Japan to the proposed United States amendment to the Constitution. He reminded the Commission that any proposal for a change in the Constitution had to be adopted by a two-thirds majority.

(3) Mr. SHARIF (Pakistan), raising a question of procedure, thought it would be better to start with a general discussion of the Japanese proposal (document 8C/ADM/1 Add.) for an increase in the membership of the Executive Board from twenty to twenty-two. If the Commission considered that such an increase was desirable, it could then go on to consider the question of election procedures, travel and daily allowances for members of the Executive Board, etc.

(4) The CHAIRMAN observed that the Japanese amendment had been put forward as an amendment to the United States amendment. Therefore after the United States delegation had formally moved its amendment, the Japanese delegation would have to move its own amendment thereto, which would be voted on before the United States proposal. As regarded the question of election procedures and allowances, he understood that a change in the principles governing membership of the Executive Board might be acceptable to certain delegations, provided certain conditions were fulfilled. Delegations which took that line should therefore make their position clear during the debate. At the same time it was difficult to discuss subsidiary matters like allowances until the basic point at issue had been decided on.

(5) Mr. FRAGA IRIBARNE (Spain) proposed that the question of the membership of the Executive Board be taken first.

(6) The CHAIRMAN observed that any decision taken by the Commission had to be referred to the Legal Committee and was thus necessarily tentative.

(7) Mr. AVIDA (Israel) said that, in the Japanese amendment to the United States proposal, it was proposed that the membership of the Executive Board be increased from twenty to twenty-two. Would it be considered a substantive change if, in the course of the discussion, some other number were proposed?

(8) The CHAIRMAN referred the speaker to Rule 106 of the Rules of Procedure. It was for the Commission to decide whether a point of substance was involved, and for that the advice of the Legal Committee was required.

(9) Mr. KOTSCHNIG (United States of America) said that the draft amendment to the Constitution appearing in Annex 3 to document 8C/ADM/1 was being submitted on behalf of the Government of the United States of America, and with the full support of the United States National Commission, it was co-sponsored by the Governments of Brazil, Australia and the United Kingdom. Fundamentally, it was proposed that the Executive Board should no longer be composed of private individuals, but of government representatives, who would of course serve on behalf of the General Conference which had elected them and would be bound by its policies. An important consideration in favour of the proposal was that they would be aided by guidance and instructions from their governments. Even more important was the fact that governments would feel themselves committed by the actions of their representatives. Paragraph A.4 of the proposed amendment laid down that, in the event of death or resignation, a member of the Board should be replaced on the nomination of the government of the State the former member represented.
(10) Paragraph A.3 laid down that retiring members should be eligible for re-election. His Government felt that the Conference should not tie its hands and that in some cases re-election of the same government to membership of the Board might be desirable. At the same time, it strongly believed in the principle of rotation, holding as it did that in any democratically organized body every government should have the chance to serve. It was emphatically against the existence of permanent seats. It also believed that the cultural contribution of a small country might be

just as valuable as, or more so than, that of a large and powerful one. The best way of achieving rotation, in its view, was by informal agreement among the countries represented at the General Conference.

(11) Under B. Functions, the amendment proposed the deletion of paragraph 12 of Article V - the paragraph, namely, which specified that members of the Board should not act as representatives of their governments.

(12) Under C. Transitional Provisions, the United States amendment provided for the re-election of the entire Board at the eighth session of the General Conference.

(13) His Government could accept the Japanese amendment for an increase in the membership of the Board, with but slight amendments. But if the Conference rejected the United States amendment, the Japanese proposal, being an amendment to that amendment, would lapse too.

(14) There were several reasons for the proposal. In the first place, the responsibilities of the Board were very heavy, since it was responsible not only for the programme but also for the handling of administrative and financial matters, and might be faced with major political issues, such as the admission of new members. Since implementation of the programme was largely a matter for governments, it followed that a governing body enjoying the support of governments and able to draw on them for expert advice would be much better able to perform its task.

(15) The General Conference of Unesco met only every two years, and in an epoch of rapid change that was much too long a period over which to confide the fortunes of the Organization to a Board of individuals.

(16) The change proposed would make for greater stability and continuity. As it was, he had been disagreeably impressed by the number of recommendations made by the Board which had not been approved by the Conference. That reflected the fact that governments did not feel themselves bound by the decisions taken by the Board. The change proposed would mean that governments would feel a greater sense of responsibility for the Organization, since they would be represented in its key body, and would no longer consider it, as they had a tendency to do at present, as an unimportant step-child.

(17) His Government attached the very greatest importance to its proposal. The question of effecting a change in the membership of the Executive Board, on the lines just described, and the question of remodelling the programme were the two most important matters with which the Conference was faced. The whole future of Unesco might depend on them.

(18) He was fully aware of the anxiety felt in certain quarters lest the dead hand of bureaucracy descend on the Executive Board and men of lesser stature be appointed to serve on it. Those fears, he felt, were unfounded. If an unsuitable person were put forward as a candidate by any government, the Conference could always reject him. The United States Government, at any rate, would make every effort to put forward men of real eminence, and not just government officials. It was in fact putting forward a scientist and administrator of the very highest standing.

(19) It had been suggested that a decision on the matter be postponed another two years, but the issue had been raised as far back as 1951. Any further postponement would be highly undesirable.

(20) Mr. FRAGA IRIBARNE (Spain) stated that the Spanish delegation seconded the United States amendment in principle. It agreed to the substance of the proposal, since it considered that the Executive Board's hybrid legal status needed changing.

(21) It was essential to proceed with the greatest care in such matters, but there should be no hesitation in trying out new formulas until a suitable one was found.

(22) As things were, there was on the one hand the General Conference, a purely intergovernmental body, and on the other the Secretariat, which could and should be completely international; mid-way between them stood the Executive Board, which exercised many of the powers of the Conference between the latter's biennial sessions and acted as a permanent supervisory body on its behalf.

(23) He did not think the suggested change was a radical one; it was, rather, a question of bringing the practical machinery of Unesco into harmony with the spirit of the Organization.

(24) Various objections might be raised. For example, it might be urged that the Executive Board should consist not of civil servants, but of men of outstanding scientific and cultural merit. Yet it should not be overlooked that the Board was basically an administrative body, and that 99% of Unesco's resources were the resources of governments. Another frequent argument against the proposed amendment was the possibility of changes in the governments of the various countries. But that was really an argument in its favour.

(25) For those reasons, the Spanish Government and delegation considered that the change proposed by the United States of America was a good one. As regarded points of detail, the Spanish delegation supported the Japanese amendment. There were other more difficult problems; on the question of complete re-eligibility, for instance, the Spanish delegation had certain reservations to formulate and would speak on the subject again later.

(26) Mr. KELLY (Australia) said that when, the day before, the Commission had discussed the right of Member States to withdraw from the Organization, it had reaffirmed two principles: firstly, that there must be respect for national sovereignty and autonomy and, secondly, that co-operation, to be effective, depended on the assumption of international obligations not by individuals, but by Member States.

(27) He would therefore invite the Commission to carry those principles into practice by adopting the United States proposal that members of the Executive Board, while continuing to act on behalf of Unesco, should be responsible to the Member States appointing them. Nor did he doubt that their own distinctive traditions would lead the USSR and Poland to concur in that matter.

(28) The United States proposal, if carried, would in no way impair the rights of the General Conference. The privileges and rights of different cultures would continue to be safeguarded by Article V, paragraph

A.2, which set forth the considerations governing elections to the Board.
(29) He was not going to criticize the present Board for lack of integrity or capacity. Far from it. The point, to put it frankly, was that the Board was not representative in character; it was a body made up of individuals acting in their private capacity in an organization made up of States. No other Specialized Agency, except (he believed) the World Health Organization, tolerated such a state of affairs. It was high time to bring Unesco into line with the other international organizations.
(30) The Board was not comparable to the autonomous governing council of an autonomous world university. In Unesco, Member States framed the policy of the Organization and financed it, and were ultimately responsible for carrying it into effect. Therefore the Board should be chosen by, and responsible to, them.

(31) Mr. CARBAJAL VICTORICA (Uruguay) announced that the Uruguayan delegation opposed the amendments advocated by the United States delegation, because the experience so far gained by the Organization did not justify the introduction of such a change, and because, instead of remedying the defects which had been found in Unesco's functioning, it would merely aggravate them.
(32) The General Conference in London had been wise in providing scope, in an intergovernmental organization, for free expression of the trends of opinion among men who were devoting their lives to the cause of education, science and culture. The impression gained from a reading of the Constitution was not of undue emphasis on action by States. The question was, therefore, whether it was advisable to strengthen the position of the government authorities or to broaden the powers of the bodies representing society as a whole, and bringing their wisdom and experience to bear on the problems of science, education and culture.
(33) Moreover, there was no real cause for alarm about the action that the Executive Board might take. As a general rule, the Board was responsible for translating Unesco's programme and budget into practice. There seemed little likelihood that such administrative powers would offer scope for abuse. It was clear, on the other hand, that, although the rôle of the State was limited, they were still able to work effectively through Unesco.
(34) The distinction between society and the State was a fundamental tenet for Uruguay. The nation based its whole concept of sovereignty upon that idea. But sovereignty did not mean an absolute system of powers and authorities, subject to no control; sovereignty did not mean nationalism. The world had no need to strengthen the authority of government, for it was already suffering from the tragedy of unbridled authoritarianism. Delegates should consider carefully whether the influence of governmental authority within Unesco should indeed be further strengthened.
(35) The idea behind the United States proposal, he added, was sound enough. But the Uruguayan delegation did not consider that, since the competence of the Executive Board was quite clearly defined, its members needed to be government representatives. No Uruguayan could believe that the mainspring of creative action was authority; he would look for it, rather, in the free expression of public opinion. If there were any question of increasing powers, Uruguay would favour increasing those of the men who were working independently in the cause of culture. The powers of the Executive Board as it stood gave no cause for alarm. It had been suggested that two years was a dangerously long term. No doubt the principle of rotation in the membership of national and international bodies was a good one, but two years could hardly be considered an excessive period. Moreover, during those two years, the States were not out of touch with the conduct of affairs by the Executive Board.
(36) In the opinion of the Uruguayan delegation, members of the Executive Board should remain responsible only to the General Conference, working for the international community and not as the agents of States. For the rest, although it was proposed to delete paragraph 12 of Article V, that provision was not superfluous. It was, on the contrary, of the highest importance, it contained the legal safeguards of the independence of members of the Executive Board. Uruguay wished members to be independent of the governments that had helped to elect them, because it believed that all the members of Unesco should be respected as the servants of a cause which was of the greatest international significance.
(37) He considered that, far from being a step forward, the adoption of the reform proposed by the United States delegation would be a retrograde measure. It would aggravate the existing defects. The Uruguayan delegation would deeply deplore the transformation of Unesco into an Academy of Letters subject to despotic control.

(38) Mr. GOMEZ HOYOS (Colombia), seconded by Mr. FERNANDEZ MORENO (Argentina), proposed that discussion of the matter be adjourned for two days in order to enable delegations to consider the question amongst themselves.

(39) Mr. NIELSEN (Denmark) was against such adjournment, on the grounds that the views expressed in the Commission would guide delegations in their private deliberations.

(40) The CHAIRMAN observed that in any case no final decision could be taken until the views of the Legal Committee had been obtained.

(41) The Colombian proposal to adjourn debate for two days was put to the vote and rejected by 18 votes to 16, with 8 abstentions.

(42) Mr. GOMEZ HOYOS (Colombia), seconded by Mr. FERNANDEZ MORENO (Argentina), then proposed that no vote should be taken on the matter for the next two days.

(43) The CHAIRMAN observed that no final vote could in any case be taken before the matter had been referred back from the Legal Committee. Perhaps a vote might be taken on the principle involved, subject to any comments by the Legal Committee.

(44) Mr. SOLH (Lebanon) asked what the Commission meant by final vote and vote on the principle. He was not very clear on the difference between the two terms and wondered whether, once a vote on the principle had been taken, the Commission would have anything left to do but to put the final touches to the drafting.

(45) Mr. BAUGNIET (Belgium) was afraid that such a decision might curtail the discussions. It seemed to him that, if the Colombian delegate's proposal were adopted, it should be made quite clear that the discussion was to be continued at the meetings scheduled for that purpose, and at an additional meeting, if necessary.

(46) Finally, it was agreed by 29 votes to 1 that no vote should be taken on the major issue before the afternoon of Thursday, 18 November.

(47) Mr. NIELSEN (Denmark), a member of the existing Executive Board, said that the Danish Government, and the Danish National Commission, would prefer the existing status of the Board to be maintained. That status had been agreed to by a majority in 1945, when the Constitution was adopted, and the United States of America had given it vigorous support. It had been agreed that, even in the governing organ of Unesco, the various world cultures should be able to make their influence felt, and that the best way of ensuring that was to endow the Board with its present status.
(48) In certain quarters it had been doubted whether the members of the Board were really free from pressure on the part of their governments. All he could say was that his country had never tried to influence him, and the same, no doubt, was true of other members.
(49) Those in favour of the United States proposal had been careful to say that the change would involve no pressure from governments or National Commissions on members of the Board. But it was to be feared that, if the proposal were adopted, the Board would receive political briefing to such a point that any real discussion would become difficult or impossible. The Board would degenerate into the tool of national foreign ministries. Nor could he agree with the delegate of Spain that the Board was just an administrative organ; the proposals submitted to the Conference by the Board showed that it was more than that.
(50) The major part of Unesco's work was unpolitical, or ought to be. Besides, it was false to say that, under the existing arrangement, Member States were debarred from airing their views. The Director-General often went out of his way to invite their comments.
(51) There were, in addition, practical difficulties to be considered. Suppose the government of a member of the Board were replaced, for any reason at all; would that member continue to sit, and must he go on voicing the opinions of the defunct government?
(52) In Annex II of document 8C/ADM/1, paragraph B.11, it was stated that "although the members of the Executive Board are representatives of their respective governments, they shall exercise the powers delegated to them by the Conference on behalf of the Conference as a whole." That sounded fine. But would it mean anything in practice?
(53) The delegate of the United States of America had stressed the advantages accruing from the fact that governments would feel bound by the decisions of the Board if it were made up of their representatives. But would a government feel bound by a majority decision taken by the Board, if its own representative had voted against?
(54) He therefore continued to believe that, ideally, members of the Board should work together as a team in the interests of Unesco as a whole, and that they should not be briefed by individual governments.

(55) Mr. AMMOUN (Lebanon) said that he had found the arguments put forward during the discussion extremely interesting, but would be glad if the delegates of the United States of America and Spain would elucidate a point which he thought obscure. According to the proposed amendment to Article V of the Constitution, the Executive Board would be responsible to the Conference, but would be composed of representatives of various governments. The Lebanese delegate wondered whether the adoption of that principle might not lead to a deadlock. As an example, he asked the Commission to suppose that the Conference were to ask the Executive Board, which was responsible for drawing up the Conference agenda, to consider including some particular question, such as unemployment among intellectual workers; what would happen if all twenty or twenty-two members of the Board rejected the suggestion? Could the General Conference thus be controlled by a few governments who would, in that way, enjoy special privileges?
(56) The Lebanese delegate understood that other organizations, such as the Security Council, had circumvented that difficulty. He thought it imperative that, before the Commission came to a decision, it should consider closely whether the proposed amendment was legally compatible with Unesco's structure.

(57) Mr. KOTSCHNIG (United States of America) saw no contradiction in saying that a Board composed of government representatives would be bound by the decisions of the General Conference. It could not, in fact, fail to implement those decisions. It would be unthinkable, for example, that the Board should refuse to put a particular item on its agenda if it had been requested to do so by the Conference.
(58) The Security Council had very special functions, and was not a comparable body. The real parallel lay between the Executive Board and the Council of FAO or the Governing Body of ILO, which worked as bodies of government representatives along lines dictated by the conferences of those organizations.

(59) Mr. FRAGA IRIBARNE (Spain) pointed out that the amendment of paragraphs 3, 4, 12 and 13 of Article V of the Constitution did not involve amendment of the clauses contained in section B. Only the method of election and the representative status of members of the Board were affected, not the Board's powers or functions, in respect of which it was still responsible to the General Conference.

(60) Mr. MENDIS (Ceylon) said that the arguments in support of the proposal had been most ably presented by the delegate of the United States of America. There were three basic reasons for the amendment. Firstly, it was the governments of countries which applied for membership. Secondly, it was governments which nominated the delegates sent to conferences. In fact, in his delegation, he had a colleague who did not represent the government at all, but the National Commission and the university. Nevertheless, all were required to produce credentials from their governments. Thirdly, it was from governments that Unesco drew its funds, "no taxation without representation". Accordingly, he wholeheartedly supported the United States proposal.

(61) Mr. HAGUIWARA (Japan) gave his Government's reasons for submitting an amendment to the amendment to the original motion of the United States Government. The transitional provisions, set out in Section C of Annex III to document 8C/ADM/1, provided for the re-election by the Conference of all the members of the Executive Board, with the stipulation that the members should no longer be elected for their personal qualifications alone, but as representatives of their respective governments. The Japanese Government felt that such a measure perhaps went too far: the existing members of the Executive Board had been chosen from among the delegates of Member States, and were therefore persona grata with their governments and could be assumed still to enjoy their confidence; any of them who did not desire to continue in office as a representative of his government was free to resign. Election of all the Board members was therefore unnecessary; it would be perfectly possible to retain, in their new capacity, the ten members whose term of office did not expire in 1954, and to replace the ten outgoing members by electing 12 new members, to bring the total membership up to 22. That procedure would make the election easier and provide for continuity in the Board.

(62) The Japanese delegate also considered that his Government's proposal to raise the number of Executive Board members from 20 to 22 was justified by the increase in the number of Member States. In similar circumstances, other Specialized Agencies had already taken that consideration into account. If there were more Board members, it would be easier to ensure the representation of all groups of States and an equitable geographical distribution. Incidentally, the Chairman of the Executive Board himself had first mooted the suggestion, which had been supported by all the members when it had come up for discussion. Owing to the time-limits laid down by the Rules of Procedure for the submission of new proposals, it had had to be presented as an amendment to an existing proposal, but it was none the less of the utmost importance. Mr. Haguiwara thought that the change suggested in the number of members was not simply a drafting change. The Japanese delegation consequently hoped that its amendment would be accepted with the original proposal put forward by the four governments.

(63) Mr. BENDER (Executive Board) wanted a ruling on whether the Japanese amendment stood or fell with the United States proposal, or whether it might be taken separately.

(64) Mr. SHARIF (Pakistan) said that the Japanese amendment might be considered to stand separately, since it did not affect the substance of the United States proposal. The question should be carefully considered in the Legal Committee.

(65) Mr. AVIDA (Israel) said that the Legal Committee should also consider whether it would be in order to increase the membership of the Board if the motion were accepted.

(66) The CHAIRMAN said that the points in question would be referred to the Legal Committee.

The meeting rose at 12.45 p.m.

# FIFTH MEETING

*16 November 1954 at 3.30 p.m.*

*Chairman* Mr. HUZAYIN (Egypt)
*later:* Mr. BEEBY (New Zealand)

**ITEM 9.3.1 OF REVISED AGENDA: AMENDMENT TO ARTICLE V OF THE CONSTITUTION (STRUCTURE OF THE EXECUTIVE BOARD)** (documents 8C/ADM/1 and 8C/ADM/1 Add.) (continued)

(1) The CHAIRMAN called on the delegate of Switzerland.

(2) Mr. BARBEY (Switzerland) thought it would clarify the situation if, before dealing with the substance of the question, he explained that, even if the United States amendment were adopted, the Swiss Government would still nominate Professor Jean Piaget, the retiring member, who, although he preferred the status quo, would not decline re-election.
(3) His Government had instructed him, however, to defend the present system governing the composition of the Executive Board, on the grounds that followed.
(4) What would become of the privacy of certain Board meetings, if the Board were changed into a senate of government representatives obliged to report to their governments? Would that not mean a return to debates cluttered up with purely administrative considerations, which a recent decision had transformed into direct and fruitful discussions? Was not the present method the best, leaving, as it did, complete freedom to the members of the Board to speak on their own behalf as well as on that of their governments? The procedure now under consideration would surely compel them to come to the meetings armed with instructions from their own ministries. Lastly, was there anything in the Executive Board's existing set-up to prevent members from remaining in close touch with their governments, even if they were not in fact official government representatives?
(5) Room must be left for a certain measure of diversity, so as to give the Board's proceedings that non-political character which was basic to the success of Unesco.
(6) Weighing the proven advantages of the existing system against the risks of the new one proposed, Mr. Barbey wondered whether the General Conference really wished, or would be well advised, to attempt a constitutional reform at a time when, even if it were too early to know the tree by its fruits, the quality of the current programme, which gave prospects of good future programmes, showed that the Organization was constitutionally sound.
(7) Accordingly, the Swiss delegation, while not closing its mind to possible reforms which more prolonged experience might show to be desirable, favoured maintaining the status quo and would vote against the amendment presented by the United States of America.

(8) Mr. MENDOZA (Guatemala) supported the amendment submitted by the United States delegation, giving his reasons. Unesco was made up of Member States, and its organs - including the Executive Board - should therefore represent their governments. The Board's task was to interpret and give effect to the collective desire of the General Conference, within which the governments expressed their opinions. Members of the Board were not experts preparing and implementing a programme. Their nominations depended on the approval of their respective governments; indeed, the governments supported those nominations. Particularly in the intervals between General Conferences, the members of the Board were genuine representatives of their governments, and interpreted and followed out the policies which the latter laid down. The Board should be backed by the confidence of the General Conference, just as the Conference relied on the confidence of the Member States. Thus government confidence was extended indirectly to the members of the Executive Board, and influenced their activities. It was impossible to separate a member of the Executive Board from his government. The Board was an international body; the governments looked upon its members as their envoys and delegates. Furthermore, every member could be replaced by a substitute, who, however, was always drawn from the same nation as himself. The Guatemalan delegate explained that his support of the United States amendment was in respect of principle, since when the time to vote came he would do so in agreement with the Latin American countries. He expressed his agreement with the amendment submitted by the Japanese delegation, and added that he would even agree to the number of Board members being raised to 24; in that way, more adequate representation of the various countries of the world would be secured. His Government was opposed to re-election of members of the Executive Board, and to the holding of practically permanent positions there; it favoured a policy of election by rotation, so that all Member States should at some time be represented on the Board.

(9) Mr. SHARIF (Pakistan), on the understanding that voting would not take place until Thursday, deferred making a statement at the present stage. He asked, if the United States amendment were adopted, whether the members of the Executive Board

would be allowed to accept travel expenses from Unesco, or would governments be responsible for such expenses?

(10) The CHAIRMAN suggested that the issue should be settled first and problems of detail discussed later.

(11) Sir Kenneth GRUBB (United Kingdom) associated himself with the principle of the United States amendment. He recalled that the same principle had been advocated independently four years previously by the United Kingdom delegation. During those four years events had confirmed the opinion then expressed. Before attending the current session of the General Conference, he had carefully studied all questions relating to the Constitution and had been surprised to see how the Executive Board was constituted. He had not been able to see how Unesco could expect to carry out its work effectively when the members of the Executive Board did not have the official support of Member States. He thought that a Board composed of independent members, each having the official support of his government, would be the best source of help to the Director-General in his preparation of the programme. The General Conference was itself totally different from an Executive Board of official character and could prevent such an Executive Board from stifling the programme. He pointed out that the greatest enthusiasm for the work of Unesco was to be found amongst government officials, who, under the United States amendment, would be able to be members of the Executive Board.
(12) With reference to the remarks made by the delegate of Uruguay at the previous meeting, he thought that the argument put forward would only apply if there were a world federation. He would have less confidence in the United States amendment if Article V.A.2 of the Constitution were removed.
(13) Finally, he could see no valid reason for deferring discussion of the principle of the United States amendment indefinitely.

(14) Mr. POMPEI (Italy) first explained that the Italian Government had left members of the National Commission and of the Italian delegation the greatest discretion in regard to the question, which was so important for the future of the Organization. He then went on to say that those members had, after some hesitation, decided to vote for the amendment submitted by the United States of America.
(15) The question was in fact less crucial than appeared at first sight. It was not a matter of voting for States instead of individuals, but of electing candidates put forward by States, on the understanding that the candidates would be chosen from among persons distinguished in the various branches of culture, education and science, whose reputation and competence would be a guarantee against any attempt to replace them arbitrarily.
(16) The essential difference between the two methods lay in the fact that under the present system the decisions of Board members, who were elected with their governments' approval, did not commit their countries, whereas the object of the proposed amendment was to increase the responsibility of Member States. That point was very important indeed, for since the biennial conference system had been introduced it had become necessary for the Director-General (he himself had said so and put it in writing) to rely, more surely and directly than ever before, on the support of the Member States.
(17) It had been objected that it was difficult to reconcile the fact of Board members being government representatives with the fact of their receiving their mandate from the General Conference. But was the Conference itself not an Assembly of States? There was no incompatibility there, either legal or political.
(18) The Italian delegation had never lost sight of the desirability of having the various spheres of culture well represented on the Executive Board. That consideration was well to the fore in paragraph A.2 of the amendment, and the method of recruitment would not militate against it; if those elected were distinguished persons, it would be they who would influence their governments, not the reverse. If that were not to be so, could it be doubted that such persons would be independent minded enough to resign?
(19) For those reasons the Italian delegation would vote in favour of the proposed amendment.

(20) Mr. MAYER (France) reminded the Commission that the United States delegate, in submitting his amendment, had emphasized the extreme importance of the question, saying that the fate of the Organization would largely depend on the decision taken. He, Mr. Mayer, fully agreed that the problem was a serious one, and its seriousness was a prime factor in determining the French delegation to combat the proposal.
(21) Article V of the Constitution stated that "The Executive Board shall consist of twenty members elected by the General Conference from among the delegates appointed by the Member States .....". Was that not a sufficient guarantee, which should give complete satisfaction to the supporters of the amendment?
(22) What would be the practical consequences of electing members on a basis of rotation, as had been said could be done by means of unofficial agreements?
(23) If a candidate were nominated by his government, one of two things would happen: either the General Conference would give way to pressure, which would be all the more intolerable, the greater the nation that exercised it; or, by refusing, it would precipitate a painful conflict, from which the rejected candidate's country would retire humiliated.
(24) Under the terms of A.4 (in Annex III) which referred to nomination twice in the singular, such a conflict might well increase in seriousness. With one foot planted on the firm ground of scientific and cultural activities, and the other on the moving sands of fluctuating domestic policies, whom would such a member, representing at once Unesco and a single government, obey?
(25) There again the alternatives would be painful: if he were a weak character, he would be the tool of his government; if he were forceful, he would stand out against his orders, and be compelled to resign - and such a resignation could not fail to deal a blow to both the Executive Board and Unesco.
(26) Mr. Mayer then instanced grave eventualities, independent of the Organization, which might produce mass resignations; the General Conference might then, after placing its confidence in twenty

candidates, suddenly find itself faced with a Board of a completely different composition.
(27) Referring to the Italian delegate's statement that the adoption of the amendment would inspire greater confidence in the Organization on the part of governments, the speaker commented that what Unesco most needed was the confidence of the peoples, and independence of thought. Was sufficient importance being attached to the possible moral consequences of a change of structure, especially in countries possessing a large number of independent universities?
(28) Had not the Executive Board, moreover, already made it quite clear that it hoped for the rejection of the amendment? The Board should not be a piecemeal collection of State representatives; it should be an entity serving one and the same ideal, an ideal based on changeless cultural values, free from political passions and fluctuations.
(29) It was a question, Mr. Mayer concluded, not of converting Unesco into a supra-national authority, but of avoiding a return to the concept of the all-powerful State. In rejecting the change of structure proposed, the French delegation was satisfied that it was remaining faithful to the principles set forth in the preamble to the Constitution. It therefore proposed that the status quo be maintained; that system had stood the test of time, whereas the one now proposed carried within it the seeds of the indirect introduction of political factors which must inevitably constitute a danger for Unesco.

(30) Mr. FERNANDEZ MORENO (Argentina) was in favour of the United States amendment, both for reasons of law and principle and on practical grounds. The mandates of members of the Executive Board originated with the Member States; their credentials should therefore be those of their respective governments. They were elected "from among the delegates appointed by the Member States", in accordance with Article V of the Constitution. Paragraph 12 of the same Article, which stated that members of the Executive Board should exercise the powers delegated to them "on behalf of the Conference as a whole and not as representatives of their respective governments", contradicted earlier paragraphs of that Article. It would be unrealistic to imagine that members of the Board could break their ties with their respective governments. There was no fear that the United States amendment would destroy the international character of Unesco.
(31) The amendment made no mention of the rotation principle; but the latter had been explicitly advocated by the United States and Australian delegations, and should be incorporated into Clause 3 when the Legal Committee drew up the final text. The speaker agreed that the membership of the Board should be raised to 24. The present members should cease their functions forthwith, in order that a better representation of all countries should be arrived at.

(32) Mr. BARRIOS (Nicaragua) disagreed with the remarks made during the morning meeting by the delegate of Uruguay. It was unfair to suggest that the General Conference would deserve the name of Assembly of Despots if it approved the United States amendment. The General Conference could not set itself up as a judge of peoples and States so far as their internal systems were concerned. The Uruguayan thesis would lead to the issue of delegates' credentials not by the Foreign Ministers but by the National Commissions. Unesco had been created and was maintained by States and governments, not by scientists and thinkers. If the group of intellectuals composing the Executive Board did not propagate the atmosphere of freedom and human dignity that the world desired, the same danger would be present as with anti-democratic States. Governments should not be deprived of the possibility of maintaining close relations with the Organization through their representatives on the Executive Board.

(33) Mr. BAUGNIET (Belgium) expressed regret at having to oppose the amendment submitted by the United States delegate. But both the Government and the National Commission of Belgium considered that the change in structure would be calculated to imperil the Organization's very operation.
(34) If the members of the Executive Board were to become government representatives, they would clearly have to follow instructions and obey orders, instead of having only the interests of Unesco itself at heart. Even eminent figures in science, education and culture would find themselves bound by their obligations to the State. There was no doubt that men of truly independent intellectual and moral stamp would in many cases be unable to submit to that form of pressure.
(35) In any case, although Unesco by virtue of its Constitution was an organization of separate States, it did not follow that the Executive Board must of necessity consist of government representatives.
(36) On the contrary, Mr. Baugniet thought that the principle of State sovereignty found its place better in the existing system, which safeguarded more effectively the Member States not represented on the Board. It had been claimed that the present procedure might face a member of the Board with the dangerous necessity of having to take decisions contrary to his government's wishes. The proposed amendment would not change that, since a majority of members might take decisions at variance with those acceptable to a particular State, in which case the representative of that State would be placed in exactly the same position.
(37) Finally, the system proposed offered States not represented less assurance that they would not one day see a Board member forced to resign because of serious disagreement with his government, and be replaced by someone less independent.
(38) Before concluding, the Belgian delegate reminded the Commission that the confidence felt in Unesco, particularly in intellectual circles, was not unreserved. Would it not in the end create widespread mistrust if the Executive Board, instead of being a body of outstanding people responsible only to the General Conference, were converted into a group of government servants?
(39) In the light of the foregoing considerations, the Belgian delegation would vote against the adoption of the modifications proposed.

(40) Mr. CHENG CHI-PAO (China) supported the United States amendment. The substance of the motion was not revolutionary and did not constitute a marked

departure from past procedure. In the past, members of the Executive Board had been elected from delegations but no member had served without the confidence of his government. The United States motion made the concurrence of governments more specific, in order to strengthen the member's individual position and that of the Board as a whole. The Executive Board had not been as strong in the past as had been imagined and there was ample reason for strengthening it. He thought that the proposed rotation of representatives would provide a remedy for the objection that, if the Board were composed only of government representatives, then only the governments having members on the Board would be represented. The proposal submitted by the delegate of Japan to increase the number of members on the Executive Board would also help to allay fears. He hoped that it would be possible to increase the number even beyond that proposed by the delegate of Japan. The objection that no work could be done by the Executive Board without lengthy government consultations could be countered by the knowledge that there was always sufficient time to study the agenda. On any major matters arising, there would always be time for members to consult their governments.

(41) Mr. PAGE (Canada) indicated that the Canadian delegation had given much study to the question and stated that he fully supported the principle of the United States proposal. He supported the principle that the Executive Board should be responsible to the General Conference for the execution of Unesco's programme and would like to see that principle stated in a separate clause. There was no conflict between the two principles. What Unesco had accomplished had been done with the interest and support of Member States. The governments giving intellectual and financial help were responsible to their people for the proper use of that help. The only way of carrying out that responsibility effectively would be to have a representative on the Executive Board. Government representation would increase the interest of Member States in the work of Unesco. There was a distinction between the principle and its application, but the degree of application would not affect the principle. In his opinion, the concept of having permanent members on the Board was bad. He appreciated the arguments which had been put forward both for and against the motion, but urged that the Commission should accept the principle of government representation on the Board as being in the best interests of Unesco and its programme. He proposed that the proposal should be referred to the Legal Committee for study and subsequent recommendations concerning its application.

(42) Mr. STAHL (Sweden) supported the United States amendment. He thought that the main argument in favour of the amendment was that it would establish a stronger link between Unesco and individual governments.

(43) The CHAIRMAN then asked the meeting to decide whether the debate should be closed at that stage, or left open until Thursday.

(44) Mr. BAUGNIET (Belgium) preferred to close the debate at once and pass on to the voting on Thursday.

(45) Mr. KELLY (Australia) opposed the suggestion. The Commission should retain its right to hold an open discussion after the Legal Committee had reported on the two points which had been referred to it: (1) whether the proposal submitted by the Japanese delegation was a motion or an amendment; (2) whether an increase in the number of members of the Executive Board was a matter of form or a matter of substance.

(46) Mr. KOTSCHNIG (United States of America) pointed out that a general debate could be closed, while the discussion of specific items was left open.

(47) Mr. KELLY (Australia) moved that the general debate be resumed after receipt of the advice of the Legal Committee on Thursday afternoon.

(48) The motion was seconded by the delegate of Israel.

(49) Mr. FRAGA IRIBARNE (Spain), on the question whether the Japanese amendment should be taken separately or not, suggested that the Commission should follow Rule 85 and Rule 36, paragraphs 1 and 3, of the Rules of Procedure, under which it should be taken separately.

(50) The CHAIRMAN said it was important to decide whether the Japanese proposal was a motion or an amendment, for one reason only: if the amendment to the Constitution contained in the motion submitted by the United States and other delegations were rejected, the Japanese amendment would fall or stand on its own, according to the decision taken.

(51) Mr. SABA (Legal Adviser) explained that it was impossible to modify the structure of a Constitution approved by an assembly unless special considerations of procedure were observed.
(52) A substantive change had to be submitted six months before it was to be discussed by the Conference; the amendment proposed by the United States of America had fulfilled that condition. For an amendment to an amendment only three months' notice was necessary, and the Japanese motion had been submitted in accordance with that requirement.
(53) As to whether it was possible to take a word out of the Japanese amendment and transfer it to the American motion, while discarding the Japanese amendment as a whole, that point should be submitted to the Legal Committee, which would be glad to answer it, and any other relevant question which delegates wished to bring to its notice.

(54) Mr. KELLY (Australia) reminded the meeting that there was also a Canadian amendment to the four power proposal (document 8C/ADM/1, Annex II). In which order should those different motions be taken?

(55) The CHAIRMAN replied that no decision could be taken on the order of priority until it was known whether the amendment presented by the Japanese delegation was an amendment to the Constitution

or an amendment to an amendment of the Constitution.

(56) Mr. HAGUIWARA (Japan) was surprised that the Japanese amendment should call for so much legal consideration. Since the Legal Committee's answer could not be given immediately, even though it was most desirable that it be obtained as quickly as possible, Mr. Haguiwara asked for the Administrative Commission's meeting scheduled for the following morning to be cancelled.
(57) The Japanese delegate then stated that, in his Government's view, the amendment he was submitting was intended not to be independent but, on the contrary, to be very closely linked with the United States amendment; and that if the latter were rejected the other would ipso facto be rejected too.
(58) Should the Legal Committee voice the opposite opinion and treat the Japanese amendment in a way contrary to its author's intentions, Mr. Haguiwara would have to consult his Government in order to ascertain whether it would not prefer to withdraw its amendment altogether.

(59) Mr. KOTSCHNIG (United States of America) added that it would be very useful if the Legal Committee could supply the necessary answers on the following day. His delegation's opinion had been that it was not necessary to refer the question on the Japanese amendment to that Committee. The delegate of Japan had just confirmed the fact, already contained in document 8C/ADM/1 Add., that the promoters of the amendment looked upon it as an amendment to a motion, not as a motion in itself, since, if it were a motion, it could not be discussed until six months after it had been presented. Mr. Kotschnig thought the difficulties involved in the Canadian proposal could be solved if the one sentence in which it differed from the four power proposal were taken out and presented as an amendment to it (document 8C/ADM/1 Annex II, paragraph 4, "or when in special circumstances it becomes necessary for a Member State to change its representative on the Board"). If that were done, work on the proposal as a whole could proceed.
(60) There was a four power amendment to the Constitution, a Japanese amendment to it and a Canadian amendment to it. A decision on principle could be reached on those three proposals, which could then be sent to the Legal Committee for analysis and proper drafting. If additional amendments that did not apply to questions of substance were put forward in the meantime, they also could be referred to the Legal Committee, which would then formulate the precise texts to be voted on.

(61) Agreed.

(62) The CHAIRMAN asked for a reply to the motion put by the Australian delegate to adjourn the debate until Thursday. He announced that it had been arranged that the Legal Committee would be meeting the following morning.

(63) At the suggestion of the delegate of Japan, Mr. KELLY (Australia) agreed to propose adjournment not necessarily until Thursday, but until the Legal Committee had given its answers.

(64) Mr. MENDOZA (Guatemala) remarked that there was some confusion in the discussion, and asked for clarification. He had originally understood that the question would be referred to the Legal Committee; subsequently, that decisions of principle would be taken before such reference to the Committee. He wished to know what the Legal Committee was to be consulted about. He considered that the same procedure should be followed in regard to the amendment in question as in regard to other amendments. The Administrative Commission should decide its attitude to the United States amendment, and then consult the Legal Committee. It was not necessary to consult the Legal Committee on whether the Japanese amendment was or was not an amendment to the United States one. Nor did the Guatemalan delegate consider it necessary to consult that Committee on whether the membership of the Executive Board should be raised to 22. Accordingly, he wished to submit a formal motion.

(65) The CHAIRMAN regretted that it was impossible at that stage to discuss a new motion. The motion for adjournment had precedence.

(66) It was agreed to adjourn the debate until Thursday afternoon.

**ITEM 9.3.4 OF REVISED AGENDA: DRAFT AMENDMENTS TO THE RULES OF PROCEDURE OF THE GENERAL CONFERENCE** (documents 8C/ADM/3 (I) and 8C/ADM/3 (III))

(67) Mr. SABA (Legal Adviser) stated that Rule 106 of the Rules of Procedure had been frequently criticized for its lack of clarity. The text before the Commission (8C/ADM/3 (I)) was an attempt to improve its wording; the sense of the Rule remained, naturally, unchanged.

(68) Mr. KOTSCHNIG (United States of America) recommended that the discussion on document 8C/ADM/3 (I) be referred to the Legal Committee.

(69) Seconded by the delegate of Israel and adopted.

(70) At the request of the delegate of the United Kingdom, seconded by the delegate of Egypt, document 8C/ADM/3 (III) was also referred to the Legal Committee.

(71) It was agreed that the Commission would not meet on the following morning, and that the Legal Committee would be asked to deal with the questions referred to it by the Commission at that time.

The meeting rose at 6.20 p.m.

# SIXTH MEETING

*17 November 1954 at 3.30 p.m.*

*Chairman:* Mr. BEEBY (New Zealand)

(1) The CHAIRMAN announced that the main business for the day was to consider the Report of the Advisory Committee on Programme and Budget. He had hoped that the Commission would also be able to deal with the means of financing the budget, but unfortunately it had been found that the question was so closely connected with that of the scale of contributions that it was impossible to consider it until the report on the latter was available. The report on the scale of contributions had been promised for Friday morning and the Chairman suggested that, if the Commission agreed, it be considered on Friday afternoon (19 November).

(2) Agreed.

**ITEM 9.2 OF REVISED AGENDA: CONSIDERATION OF THE REPORT OF THE ADVISORY COMMITTEE ON PARTS I, III AND IV OF THE BUDGET, AND REPORT TO THE PROGRAMME COMMISSION** (documents 8C/5, 8C/5 Corrigendum, 8C/5 Corr.2 and 8C/BUD/1).

(3) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) presented the first report of the Advisory Committee, contained in document 8C/BUD/1, and drew attention to the points of direct concern to the Commission, to which Parts I, III and IV of the draft programme and budget were referred.
(4) After disapproving the adoption of Spanish as a working language of the Executive Board, the Committee had considered the use of Russian as a working language of the General Conference and of the Executive Board (documents 8C/DR/2 and 8C/DIV/78). It had been informed at its meeting that morning that the Soviet delegation did not intend to press for the immediate adoption of Russian as a working language of Unesco. The Committee had recommended that it be adopted as a working language of the General Conference on the same footing as English, French and Spanish, but not as a working language of the Executive Board. With regard to the publication of documents in Russian, the Committee had agreed that the best solution would be for the Soviet delegation to raise the question under each individual project.
(5) With regard to Part III, the Committee had discussed the staffing pattern of the Secretariat and had heard suggestions regarding the Office of the Director-General. It had been agreed to make no proposals, as the Director-General was to submit a paper on the subject at the appropriate time. The Committee had been glad to note that it would be possible to expand the Organization without increasing expenditure, but some concern had been felt at the administrative pattern, the Committee deprecated the division of the Secretariat into watertight compartments and the rigid symmetry of the programme departments. It recommended a saving of $23,000 on the total budget for staff costs.
(6) In conclusion, Mr. Gardner Davies paid tribute to the Secretariat's constructive collaboration throughout the Committee's discussions; the Committee's work had also been facilitated by its widened terms of reference. The aim of its report was to assist the Administrative Commission in examining certain items of its agenda, the most urgent being the scale of contributions and the method of financing the budget. The question of the use of Spanish and Russian as working languages was also urgent.

(7) The CHAIRMAN thanked the Chairman of the Advisory Committee for his extremely lucid and helpful report. He reminded the Commission that the item on the financing of the budget had not yet been formally referred to the Committee on Contributions.

(8) Mr. SIMSARIAN (United States of America), seconded by Mr. HUZAYIN (Egypt), moved that the matter be referred to the Committee on Contributions.

(9) Adopted.

(10) The CHAIRMAN remarked that the Committee on Contributions was considering the theoretical probable percentage of Member States not members of the United Nations. That afternoon would be the last opportunity for States which had not yet done so to make representations to the Committee. Turning back to the report of the Advisory Committee, the Chairman requested members to study it item by item, taking account also of the relevant sections of the main programme and budget documents.

**PART I – GENERAL POLICY** (document 8C/BUD/1, page 4)

**CHAPTER 1 – GENERAL CONFERENCE**

(11) As a Brazilian delegate, Mr. BERREDO CARNEIRO (Brazil) was very much in favour of accepting the Indian invitation and would vote for it,

but, as Chairman of the Headquarters Committee, he felt that the Committee should give the Commission some additional information on the building in Paris. He suggested that the Committee might meet on Monday morning (22 November).

(12) Mr. BENDER (Executive Board) stated that the general feeling in the Board had been that Unesco should be extremely grateful to India for its invitation. No other invitation had been received, so that the choice of the seat of the ninth session was limited to New Delhi and Paris. The difference between the estimates for a session in New Delhi and the estimates for a session in Paris was $214,042, so that, if possible, the session ought to be held in Paris. However, the Board had been informed by the Secretariat that the new building would not be sufficiently ready in 1956, which would mean that parts of the old building would still have to be used by the Secretariat. After some discussion, the Board had therefore decided to recommend acceptance of the Indian Government's generous offer.

(13) Mr. MONTAGNIER (Chief, Bureau of Conference Planning and General Services) gave the Commission the latest information - which was unlikely to change - received from the Headquarters Office responsible for following the progress of the work of construction. After recapitulating the difficulties involved in holding the General Conference's ninth session at the present headquarters, where there was insufficient space, he said that the buildings in the Place Fontenoy could not be erected and completely fitted up in time for all the services to be installed by October 1956. The work would probably not be finished before the first months of 1957. The Conference building, the whole of the basement, the ground floor and the Ségur wing of the Secretariat's building could be finished and fitted out by 30 September 1956 without additional outlay. In those circumstances, it would be impossible to install the whole of the Documents and Publications Service in the accommodation allotted to it on the first and second floors of the new buildings. Some services could be installed in the Ségur wing for the duration of the Conference, but they would have to be moved later to their permanent offices.

(14) The CHAIRMAN drew attention to an error in paragraph 3 on page 6 of document 8C/6: the additional cost of using a fourth working language in New Delhi would be $40,000 only. He asked if any delegation would move the adoption of the Advisory Committee's recommendation.

(15) Mr. BERREDO CARNEIRO (Brazil) thought it suitable that a representative of Latin America should propose a formal motion for acceptance of India's invitation. Representatives of distant countries had not hesitated to go so far afield as Montevideo, and it was now for Latin America to return their courtesy by enthusiastically accepting that invitation and showing the same desire for mutual acquaintanceship and assistance as those other representatives had displayed by going to Uruguay.

(16) The CHAIRMAN explained that under the Rules of Procedure the Brazilian delegate's proposal must be put as a formal recommendation from the Commission to the General Conference to accept the Indian Government's invitation to hold the ninth session at New Delhi.

(17) Mr. RAADI (Iran) was delighted that a representative of Latin America had made that suggestion, which he, on behalf of the Middle East countries, warmly supported. The General Conference had held sessions in every continent except Asia, and Unesco could not but be grateful to India for its invitation, which would enable the Organization to complete its tour of the world. Once the new buildings were finished, however, the Conference should invariably meet in Paris, although regional meetings of experts might be held elsewhere.

(18) Mr. BARBEY (Switzerland) thought that acceptance of the Indian proposal would afford Unesco an opportunity of acquiring a wider perspective and valuable experience, but that before coming to a decision it would be advisable to give some thought to the hesitations expressed by certain countries. An extra outlay of $300,000 within a period of two years might place too great a burden on the Organization. Although he was well aware of the difficulties involved in holding the Conference in Paris, he would like, before he made up his mind, to know whether the Indian Government would be prepared to postpone its invitation until 1958.

(19) Mr. HUZAYIN (Egypt) heartily supported the motion of the delegate of Brazil. He pointed out that financial considerations were far less important than the beneficial effect which a session held away from headquarters had both on Unesco itself and on the country and region concerned. Unesco needed to be known by the peoples of the world, and the Indian invitation provided a magnificent opportunity for Unesco to draw nearer to the peoples of South and South East Asia. Moreover, it would be of immense benefit for delegates and members of the Secretariat to see and understand something of India - its past and present and its great contribution to the common heritage of mankind. The delegate of Egypt therefore hoped that the invitation would be accepted with gratitude and enthusiasm.

(20) Mrs. HEFFELFINGER (United States of America) warmly seconded the proposal to accept the Indian invitation, but hoped that the tenth session of the General Conference would be held in the new headquarters building in Paris in the spring of 1958.

(21) Mr. SHARIF (Pakistan) stated that, since Unesco had held its sessions in almost all regions except Asia, the desire of the Asian countries to have a conference held in that region was understandable and, in view of the fact that the new buildings of Unesco in Paris would not be quite ready, he associated

himself with that proposal and recommended its acceptance.

(22) While feeling in some sympathy with the remarks made by the delegate of Egypt concerning the mutual impact of sessions abroad on Unesco and the region concerned, Mr. WEST (United Kingdom) recalled that his delegation had opposed the erection of a costly new headquarters building in Paris. That was past history; but, at the present time, his delegation felt that, as far as possible, sessions of the Conference should be held in that building, if only because of the considerable saving involved. However, if the building were not ready in 1956, he could think of no other place in the world where it would be more appropriate, valuable and pleasant to hold the Conference than in New Delhi. His own delegation would look forward with great pleasure to the contacts with the Indian Government and people which would be forthcoming.

(23) Mr. FERNANDEZ MORENO (Argentina) agreed that it would be impossible to hold the ninth session of the General Conference in Paris, and warmly accepted the invitation from the friendly peoples of the East. Their representatives had already paid a tribute to Latin America by taking the long road to Uruguay, and it would be only right and proper to make the return visit. The difficulties in the way of holding the next session in New Delhi could be easily overcome. Consequently, the Argentine delegation supported the Brazilian delegation's proposal.

(24) Mr. PETROVIC (Yugoslavia) supported the proposal to accept the Indian invitation, which would please not only India but all the Asian countries. Even if the new building were finished in time for the ninth session, it would be a good idea to hold it in New Delhi.

(25) The Brazilian motion to recommend acceptance of the Indian Government's invitation to hold the ninth session of the General Conference in New Delhi was put to the vote and adopted by 42 votes to 0, with 4 abstentions.

(26) On behalf of his Government, the Indian National Commission and the Indian delegation, Dr. MUDALIAR (India) expressed his gratitude for the generous manner in which the Commission had recommended acceptance of the invitation. He greatly appreciated the sentiments which had been expressed, and assured all members that the invitation came from the heart. Unesco would be warmly welcomed, for all that the Organization stood for was deeply appreciated by the sub-continent of India and neighbouring countries.

**CHAPTER 2 – EXECUTIVE BOARD**

(27) Mr. HAGUIWARA (Japan), referring to Chapter 2 and the adoption of the budget for the Executive Board, said that at the previous meeting, during the discussion on the possible change to be made in the composition of the Board, the Pakistan delegate had asked if acceptance of the United States amendment would entail any changes in the reimbursement of travel and per diem for the members of the Board. Mr. Haguiwara saw no point in raising that question, since with the acceptance of Chapter 2 of that part of the budget any misunderstanding on that point would be cleared up. Besides, in other international organizations with an executive board or some similar organ composed of government representatives, it was usual for the organization to defray members' travelling expenses. He concluded with the suggestion that the Commission ask the Secretariat for information at the following meeting about precedents existing in other Specialized Agencies.

(28) The CHAIRMAN replied that it would be possible to obtain the information requested by the following day.

(29) Mr. BENDER (Executive Board) explained that the Board had already examined the possibility of reducing the number of questions with which it had to deal, but had come to the conclusion that its burden could not be lightened unless previous decisions of the General Conference, various regulations and certain provisions of the Constitution were modified.

(30) Mr. SANDOVAL VALLARTA (Mexico) asked for an explanation of Chapter 2 of document 8C/BUD/1, which, in its present form, contradicted itself. While the first sentence said that "steps should be taken to lighten the Board's obligations", the last sentence asked for a reduction in the number of meetings.

(31) Mr. GARDNER DAVIES (Chairman of the Advisory Committee on Programme and Budget) said that the Committee hoped that the Administrative Commission would investigate the matter fully, seeing if it were possible to modify various regulations and previous decisions of the Conference, with a view to freeing the Executive Board from some of its responsibilities in the fields of administration and finance.

(32) Mr. BERREDO CARNEIRO (Brazil) reminded the Commission that the Executive Board kept that point constantly in mind. As it was quite impossible for the Commission to improvise any precise suggestions for an immediate modification of the Conference's rules of procedure or the Executive Board's responsibilities, he suggested that the Commission should ask the Board to make proposals for any changes or amendments which would satisfy both its own and the Organization's requirements. Workable suggestions could not be made without a close knowledge of the Board's responsibilities and functions.

(33) The CHAIRMAN's own feeling was that the item might be deferred until a decision had been taken on the structure of the Executive Board.

(34) Mr. BERREDO CARNEIRO (Brazil) did not

think that the situation would be modified by a change in the structure of the Board. He felt strongly that no decision should be taken by the Administrative Commission without previous consultation with the Board itself.

(35) At the suggestion of Mr. SHARIF (Pakistan), it was agreed to adjourn for half an hour to enable members to study the relevant parts of the Advisory Committee's Report. The items of direct concern to the Commission were the following:

Part I, Chapters 1 and 2 (page 4),

Part III, Chapters 1 and 3 (page 23),

Part IV, (39) - Remuneration of Secretary of Staff Association (page 23),

DR/50 - Creation of a post of Assistant Director-General (page 24),

document 8C/ADM/7 - Adoption of Spanish as a working language of the Executive Board (page 24),

The oral report of the Chairman of the Advisory Committee on the use of Russian as a working language.

(36) The meeting having reassembled, Mr. RAO (Acting Chief, Bureau of Programme and Budget) described the practice of other Agencies in respect of payment of travel and per diem to members of their governing bodies or executive boards.

FAO - Travel and per diem of members of the Executive Board paid by the Organization.

ILO - Governing Body divided into three sections (government representatives, workers and employers): travel and per diem of government representatives paid by governments; travel and per diem of workers and employers paid by the Organization.

United Nations - Travel and per diem of all delegates paid by governments. Travel and per diem of members of the Advisory Committee on Administrative and Budgetary Questions (members appointed in an individual capacity) paid by the Organization.

(37) With regard to the Brazilian motion, the CHAIRMAN pointed out that the Commission had no right to communicate direct with the Executive Board, but it could do so through the General Committee.

(38) It was agreed that the Chairman should bring the Brazilian proposal to the attention of the General Committee, with a request that it be referred to the Executive Board.

**PART III – GENERAL ADMINISTRATION**
(document 8C/BUD/1, page 23)

**CHAPTER 1 – OFFICE OF THE DIRECTOR-GENERAL**

(39) Mr. FARR (Chief, Bureau of Personnel and Management) referred members to pages 203-206 of document 8C/5, where the manning tables for the Office of the Director-General were set out. The first amendments to those manning tables were to be found on pages 27-29 of document 8C/5 Corrigendum. Those amendments involved the abolition of one P.D. and one D.1 post and provided for one post of Deputy Director-General and one post of Assistant Director-General. Document 8C/5 Corr. 2 contained one further and final proposal, namely that there should be no post of Deputy Director-General, but a second post of Assistant Director-General. There were no changes in any other part of the structure of the Director-General's Office. Paragraph 4 of document 8C/5 Corr. 2 showed the saving effected by the Director-General's final proposal.

(40) Mr. BERREDO CARNEIRO (Brazil) asked for an explanation of the machinery proposed for the replacement of the Director-General when absent; and which officer would assume his responsibilities?

(41) Mr. BAUGNIET (Belgium) said that he too felt concern at the successive changes involved. He wanted to know whether acceptance of the Director-General's proposal would mean a change in the regulations and what the new officer's exact title would be. Whereas in the draft programme and budget mention was made of a "Directeur général adjoint" (Deputy Director-General), the new proposal spoke of "Deux sous-directeurs généraux" (two Assistant Directors-General). There would have to be some agreement on terminology, and Mr. Baugniet, for his part, favoured "Directeur général adjoint".

(42) Mr. KELLY (Australia) agreed that there was a need for clarification of the duties of the two Assistant Directors-General, which seemed to lack precision and to overlap to some extent. He asked who replaced the Director-General in case of enforced absence.

(43) Replying to the delegate of Belgium, Mr. FARR (Chief, Bureau of Personnel and Management) said that the correct French title was "Sous-Directeur général". In the past, "Directeur général adjoint" had always been used for "Deputy Director-General".

(44) Mr. BAUGNIET (Belgium) remarked that the official to be named would be either the Director-General's deputy - i.e., the "Directeur général adjoint" - or someone below him, who would therefore not be required to replace him completely in his absence. In that case, according to the proposal, the official would be a "sous-directeur général", but Mr. Baugniet still felt that that unusual formula was unfortunate; as there was a post of Director-General, the title Director without any further qualification would be more appropriate.

(45) The DIRECTOR-GENERAL explained that his first idea had been to have two Deputy Directors-General; he had, however, subsequently yielded to the Executive Board's suggestion that the existing post of Deputy Director-General be abolished and that there be two posts of Assistant Director-General. He thought of both of them as highly placed assistants to himself in the fields described in document 8C/5 Corr. 2, who would concentrate all their time on duties above the level of Principal Directors. He had drawn the Board's attention to the fact that the Director-General and his two

Assistants would have to travel a great deal, attending meetings of ACC, the Economic and Social Council, TAB, TAC and the other Specialized Agencies. Therefore, taking account also of the need for vacations, it was impossible to run the Organization efficiently without two high level people in addition to the Director-General. As for the duties of the Assistant Directors-General, they could not be considered apart from the individuals concerned, and he was sure that the combination of duties proposed was the best for those in question. The creation of Mr. Maheu's post had been approved in Venice by the Executive Board, acting on behalf of the General Conference. It was a provisional arrangement effective only until the end of 1954 and its continuation thereafter would depend upon the approval of the General Conference. Mr. Adiseshiah's appointment would not take effect unless the Conference approved the relevant budgetary and organizational provisions. Mr. Maheu was to concentrate on the diplomacy of the Organization - relations with Member States, the United Nations family and governmental and non-governmental organizations. Mr. Adiseshiah would concentrate on the technical assistance programme, the integration of the technical assistance programme with the regular programme, and co-ordination of the administration of programme activities. It was quite clear that their duties were interlinked and that they would have to act as a team. As time went on, he intended to allocate certain duties to each of them which could be carried out without consulting the Director-General or the other Assistant Director-General. Both of them would have to give him advice, in consultation with Directors of Programme Departments, on the programme as a whole. When he himself was absent from headquarters, the two Assistants, in rotation, would take precedence over the Department Directors as Acting Director-General. If the Director-General and both Assistants were absent from Paris, the Directors of Programme Departments would, as in the past, serve in order of seniority, as Acting Director- General.

(46) Mr. SALIM (Hashemite Kingdom of Jordan) seconded the proposals in document 8C/5 Corr. 2 for three reasons: (a) because the arrangement was very economical; (b) because the Director-General advocated it and Mr. Salim had confidence in him as an administrator; (c) because Mr. Adiseshiah, with his profound knowledge of countries' needs, was eminently qualified to direct the new programme of technical aid designed to meet the felt needs of Member States.

(47) Mr. BAUGNIET (Belgium) thanked the Director-General for his explanations, from which it appeared that the new official for whom a post was to be created would act both as the Director-General's assistant and as his representative when he himself was unable to perform his functions. He concluded by formally proposing that the French text be amended so as to read "directeur général adjoint" instead of "sous-directeur général".

(48) Mr. HUZAYIN (Egypt) warmly supported the Director-General's proposals in document 8C/5 Corr. 2, and felt that the oral explanation which the Director-General had given should dissipate all doubts. Mr. Maheu had always rendered very valuable service to the Organization and was obviously well fitted for the post. Mr. Adiseshiah's immense activity and devotion to duty, coupled with his insight and understanding of the various countries' needs, qualified him admirably for the other post of Assistant Director-General.

(49) Mr. KHADRA (Saudi-Arabia) fully concurred with the delegates of Jordan and Egypt.

(50) Mr. BARRIOS (Nicaragua) said that, as the debate continued, the subject, which had initially been quite clear, was becoming more and more obscure. In his view the title of Assistant Director-General was suitable because it designated in all languages the officer holding powers equal to those of the Director-General whenever the latter authorized him to act in that capacity. He asked why, under paragraph 8, did the Director-General himself have to lay down the functions of the Assistant Director-General, without their having been fixed beforehand. The Director-General was at present entitled to have himself replaced during his absence in whatever way he thought most suitable without there being any need for a fixed roster of his subordinates to deputize for him.

(51) To avoid terminological difficulties, that officer could be called "Subdirector General" in Spanish, the "Directeur général adjoint" in French and by whatever was the most suitable title in English.

(52) Mr. POHL (Union of South Africa) wondered whether the question of who should serve as Acting Director-General in the Director-General's absence could not be dealt with under existing regulations; that was to say, the Director-General, before going away, would simply state who was to act in his place. As for the figures at the bottom of document 8C/5 Corr. 2, they seemed to Mr. Pohl to be almost too good to be true. He asked if the economy was to be a permanent one.

(53) The DIRECTOR-GENERAL replied in the affirmative. The economy was the result of bringing one post of Deputy Director-General down to the level of Assistant Director-General. He added that the staff regulations enabled him to do as the delegate of the Union of South Africa had suggested, but it was a matter of custom for the Programme Directors, in order of seniority, to serve as Acting Director-General, should the Director-General and Assistant Directors-General be absent at the same time.

(54) Mr. BERREDO CARNEIRO (Brazil) formally proposed that the Commission approve the Director-General's suggestion and leave it to the Executive Board, with the help of the Secretariat, to settle the question of terminology, which was difficult to decide in a meeting of the Commission.

(55) Mr. HAGUIWARA (Japan) seconded the Brazilian delegate's proposal. He too thought it futile to discuss questions of terminology in the

Commission. It was enough for the latter to decide on the substance of the proposal before it.

(56) Mr. KELLY (Australia) did not think that the new proposals really involved a saving. It seemed to him that it was merely a question of spending less money on one scheme than it had been proposed to spend on another, but that both estimates represented an increase over expenditure for 1953-54, when there had been no post of Assistant Director-General. He asked if his interpretation was correct.

(57) The DIRECTOR-GENERAL replied that the economy was a real one: two posts, namely D.1 - Head of External Relations - and P.5 - Director of the Office of the Director-General - had been suppressed and replaced by one post of Assistant Director-General and one P.5 executive officer. That operation had resulted in a saving. Thenceforth, it was proposed to abolish the post of Deputy Director-General and set up a second post of Assistant Director-General, which would entail a further economy.

(58) Mr. AL-HILLI (Iraq) supported the Director-General's proposals, for, as Unesco expanded, it seemed normal for the number of Assistant Directors-General to increase. He greatly approved the choice of Mr. Adiseshiah, who had great vision and looked after the needs of every country.

(59) Mr. BENDER (Executive Board) stated that the Director-General had consulted the Board in private meeting. The discussion had been very cordial and the Board had agreed to the new proposal before the Commission.

(60) The CHAIRMAN invited the Commission to vote on the proposal of the delegate of Jordan, seconded by several delegations, that the Director-General's proposals relating to his own Office, in documents 8C/5, 8C/5 Corrigendum and 8C/5 Corr. 2, be approved.

(61) Mr. BAUGNIET (Belgium) recalled that he had formally proposed amending the French text so as to use the term "directeur général adjoint". If the proposal were adopted, it was essential to decide on the proper title, and he would be glad of the French delegation's opinion on that point.

(62) Mr. GAYET (France) was definitely against the expression "sous-directeur général", which should be ruled out. It was not used in any administration to his knowledge. He thought that "adjoint au directeur général" would be the best expression. However, if that raised difficulties with the other United Nations Specialized Agencies, he was prepared to fall in with the Brazilian delegate's proposal and leave it to the Executive Board and the Director-General to find the title for those officials. He had no comment on the substance of the proposal.

(63) Mr. FRAGA IRIBARNE (Spain) stated that in correct Spanish and in view of very numerous precedents the expression "Vicedirector" was the most suitable for designating the Director-General's deputy.

(64) Mr. POHL (Union of South Africa) wondered if the delegates of Belgium and France would agree to ask the Director-General, in consultation with the Executive Board, to decide upon the terminology to be used.

(65) Agreed.

(66) The motion of the delegate of Jordan that the Commission recommend approval of the Director-General's proposals was adopted by 38 votes to 0.

**PART IV – COMMON SERVICE COSTS**

Paragraph 39

(67) The Advisory Committee recommended that the provision for remuneration of the Secretary of the Staff Association ($4,439 a year) be deleted.

(68) The DIRECTOR-GENERAL stated that the question had been raised whether it was good practice for an international organization to pay the salary of the secretary of its Staff Association, whose purpose was to negotiate with the administration on the subject of personnel matters, including some in which the Head of the Organization found himself in conflict with the Staff Association. There was precedent for the payment by the administration of the salary of such a secretary.

(69) The Director-General pointed out that a truly satisfactory, competent international civil service must be composed of people with an international spirit and a sense of security and just dealing; Unesco could not be successful unless it had a fine staff of international civil servants with the necessary machinery for the formulation of their views, and the feeling that their claims would be heard with an open mind. It would be an onerous charge upon the staff if the secretary's salary had to be paid by private subscription. If that were in posed on them, he suspected that the officers of the Staff Association would have recourse to the method of using the time of employees who should be working for the Administration, which would prove more costly to Unesco than a post for the secretary in the budget. Although the Staff Association and the Administration in Unesco had been in conflict over a number of matters, he did not wish that to obscure the fact that the Staff Association was an essential element in a good international civil service. It had been pointed out that it might seem to the public that, in paying the salary of the secretary of the Staff Association, the Administration was approving the latter's activities; but that was not a valid argument, for the Administration paid the salary of the secretary of the Appeals Board, but that did not mean that it took responsibility for the latter's activities.

The Director-General felt that it would be a gesture of confidence in the doctrine he had outlined, and

of faith that the Staff Association would respond to its high obligations, if the Conference accepted his recommendation, rather than that of the Advisory Committee.

(70) Mr. BAUGNIET (Belgium) thought that, in the light of the Director-General's explanations, the Conference would be wise to reject the Advisory Committee's proposal and to retain in the budget the amount proposed for the remuneration of the Staff Association's secretary.

(71) Mr. POMPEI (Italy) endorsed the Director-General's recommendations and was against the Committee's recommendation. Leaving aside any question of personalities, he had observed in his capacity of permanent delegate to Unesco that the post rendered great services not only to the staff but to the Organization as well, since thanks to it savings could be made far in excess of the salary involved, many disputes being amicably settled through its agency. Nor should it be forgotten that the secretary of the Staff Association also acted as secretary of the Appeals Board and thus worked directly for the Organization itself.

(72) Mr. BAUGNIET (Belgium) observed that he had formally proposed rejecting the Advisory Committee's recommendation and that his proposal had just been seconded by the Italian delegate.

(73) Mr. BERREDO CARNEIRO (Brazil) also seconded the Belgian delegate's proposal and suggested that the reasons given by the Director-General should be regarded as valid in that particular case, since circumstances differed in the different organizations.

(74) Mr. SHARIF (Pakistan) seconded the delegate of Belgium.

(75) In reply to a question from Mr. ARTHUR (United Kingdom), Mr. FARR (Chief, Bureau of Personnel and Management) stated that membership of the Staff Association was voluntary, and that members paid subscriptions ranging from 350 to 1,000 French francs a year. The funds were used for a great variety of welfare activities.

(76) Mr. GAYET (France) thought, after listening carefully to the Director-General's comments, that the Director-General's proposal should be accepted. The Staff Association, which had existed since 1948 and included 95 per cent of the staff, was in his opinion essential to the efficient working of the Bureau of Personnel, with which it closely collaborated. He concluded by emphasizing the necessity for constant contact between the Administration and the staff and thus came to the conclusion that the Advisory Committee's recommendation should be rejected.

(77) Miss LAISE (United States of America) asked if the post was a full-time job. She pointed out that the Staff Association of the United Nations, with a larger number of members, had a part-time secretary only. Her delegation agreed with the Director-General's remarks regarding the rôle of the Staff Association, but she pointed out that, if the Administration continued to pay for the post, Member States would have the right to expect staff members, individually and collectively through their Staff Association, to adhere to the standards of conduct laid down by the International Civil Service Advisory Board and, in that connexion, to refrain from action of a political character or action relating to issues which were solely within the jurisdiction of Member States.

(78) Mr. KELLY (Australia) proposed, with some regret, that the Advisory Committee's recommendation be retained. The Staff Association should be encouraged by its own members; he had been shocked to hear that many were paying less than 1,000 francs a year and that a great deal of the money was being spent on recreational activities.

(79) Mr. FARR (Chief, Bureau of Personnel and Management) explained that with a staff composed of people of 48 different nationalities, most of them living away from their home countries, the Staff Association did a great deal of welfare work, helping staff members to adjust themselves to their new environment. The money was not spent on recreational activities, but on various welfare services and on artistic activities, designed to help the staff to understand the culture of other countries. Moreover, representatives of the Staff Association served on many joint committees with the Administration, involving work for which secretarial assistance was necessary. The post of secretary was consequently a full-time one.

(80) The DIRECTOR-GENERAL said that he would call the attention of the officers of the Staff Association to the statement just made by the delegate of the United States of America.

(81) The motion to reject the recommendation of the Advisory Committee on Programme and Budget was adopted by 25 votes to 2, with 10 abstentions.

The meeting rose at 7.15 p.m.

# SEVENTH MEETING

*18 November 1954 at 3.30 p.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.3.1 OF REVISED AGENDA: AMENDMENTS TO ARTICLE V OF THE CONSTITUTION (STRUCTURE OF THE EXECUTIVE BOARD)** (documents 8C/JUR/1. 8C/ADM/1. Annex III and 8C/ADM/1 Add.) (continued)

**FIRST REPORT OF THE LEGAL COMMITTEE** (document 8C/JUR/1)

(1) Having announced the order of business for the afternoon, the CHAIRMAN called upon the Rapporteur of the Legal Committee to present the Committee's first report (document 8C/JUR/1).

(2) Speaking as Rapporteur of the Legal Committee, Mr. BAUGNIET said that the Committee had replied in the following way to the two questions put to it by the Administrative Commission:
(3) The Committee had expressed the opinion that a change in the number of members of the Executive Board could not be regarded purely as a matter of drafting.
(4) It had also expressed the view that the amendment communicated to the Director-General on 11 August 1954 by the Government of Japan constituted a draft amendment to the amendments sponsored jointly by the United States of America, Australia, Brazil and the United Kingdom (CL/943, Annex 1) and could not therefore be regarded as an independent amendment to Article V of the Constitution.
(5) The Legal Committee's first report which Mr. Baugniet read out, supplied incidentally all the supplementary information required on the subject.

(6) Having thanked the Rapporteur for his report, the CHAIRMAN reminded members that the decisions of the Legal Committee, which was an advisory body, were not binding on the Commission. If, however, it decided to disagree with the Legal Committee on the first point, for example, and say: "The Administrative Commission considers that the change in the number of members of the Executive Board can be regarded purely as a matter of drafting", the decision would have to be adopted by a two-thirds majority.

(7) In reply to a question from Mr. BERREDO CARNEIRO (Brazil) concerning the precedents which might be invoked and the procedure which had been followed when the number of members of the Executive Board was increased from 18 to 20, Mr. SABA (Legal Adviser) said that the draft amendment making that change in the Constitution had been communicated to Member States within the statutory time-limit, since the relevant circular letter (CL/639) had been despatched on 12 May 1952, six months before the seventh session of the General Conference opened.
(8) However, it would be remembered that a question of figures was raised at that seventh session in connexion with a draft amendment for changing the Article of the Constitution which stated that the General Conference could meet in extraordinary session at the request "of at least one-third of the Member States". Most of the delegates had then agreed that such an amendment could not be regarded purely as a matter of drafting.

(9) So far as concerned the Japanese amendment sent to the Director-General on 11 August 1954, Mr. MAYER (France) doubted whether Member States could have been communicated with three months before the opening of the eighth session of the General Conference, which, as was known, was convened to begin work on 12 November.

(10) Mr. SABA (Legal Adviser) said that the amendment had been sent to Member States by circular letter on 12 August. It was for the Commission to decide whether the three months' notice provided for under Rule 104 of the Rules of Procedure should be counted from the date of despatch of such a communication or from the date when it was received.

(11) Mr. KOTSCHNIG (United States of America) moved the adoption of the report of the Legal Committee in two parts, first, the adoption of opinion number (1) and then the adoption of opinion number (2).

(12) The motion was seconded by Mr. SANDOVAL VALLARTA (Mexico).

(13) After a prolonged discussion on (intricate) legal points, the CHAIRMAN invited the Commission to vote on the motion of the delegate of the United States of America.

(14) Opinion number (1) was adopted by 43 votes to 6, with 6 abstentions.

(15) Opinion number (2) was adopted by 51 votes to 0, with 5 abstentions.

(16) The whole of the report of the Legal Committee in document 8C/JUR/1 was adopted.

(17) The Commission then resumed discussion of

the United States' draft amendment in document 8C/ADM/1, Annex III.

(18) Mr. SHARIF (Pakistan) asked the delegate of the United States of America whether the adoption of his amendment would affect the Executive Board's budget.

(19) The CHAIRMAN remarked that, from the purely legal point of view, the passing of the amendment would not bind the Conference in any way in respect of the payment of delegates' expenses.

(20) Mr. KELLY (Australia) seconded the amendment of the United States delegation for the reasons which had already been so eloquently expressed at an earlier meeting. Further, in order to give small countries a greater chance of sitting on the Executive Board, the Australian delegation would support the Japanese proposal that the number of members of the Board be increased from 20 to 22.

(21) Mr. SOLDATOV (Union of Soviet Socialist Republics) stated that his delegation was not in a position to vote on the principle of the United States' amendment that day. He therefore hoped that the final vote on that principle would be adjourned until the following day.

(22) Mr. PETROVIC (Yugoslavia) said that the matter had been discussed at formal meetings and in the lobbies for several days, and his delegation, weighing both sides of the question, had come to the conclusion that there was no real need for the proposed changes. There were no sufficient reasons for changing the Constitution in that respect, and it was unnecessary to revert to the arguments which had already been put forward.
(23) The question was a practical one, and nothing would be gained by amending texts. There were no complaints about the functioning of the Executive Board in its existing form; it performed its task punctually and efficiently. It was unnecessary to reform an institution which was already working adequately.
(24) There were reasons for that view in Yugoslavia; since the reforms to the country's Constitution carried out a year and a half back, the State had intervened less and less in cultural and other activities. Complete autonomy had been granted to the relevant organizations and associations, which, taking the place of the Ministries, performed their tasks of leadership without State intervention.
(25) The Yugoslav delegate, therefore, opposed any change in the Constitution and supported the status quo.

(26) In reply to a remark by Mgr MAROUN (Lebanon) concerning the procedure suggested in paragraph C of the Japanese amendment (document 8C/ADM/1 Add., page 2), for elections to the Executive Board, Mr. SABA (Legal Adviser) said that those were purely transitional provisions, as was indicated by the heading of the paragraph in question.

(27) The CHAIRMAN requested the delegate of Lebanon to raise his point when the Japanese amendment came up for discussion.

(28) Mr. BRIGHT (Liberia) had received no definite instructions from his Government in connexion with the United States' amendment, but had been asked to try to ensure that certain principles were safeguarded. It seemed to him that the wisdom of the existing arrangement had been proved by experience of the past ten years, and he could see no reason to change it in a hurry. He proposed that, in order to give Member States more time for reflexion, the matter be adjourned until the ninth session of the General Conference.

(29) Replying to various questions raised both at the current and at earlier meetings, Mr. KOTSCHNIG (United States of America) said that, when he had submitted the amendment, he had tried to anticipate some of the arguments which would be advanced against it. He was sorry that he had not been sufficiently convincing. However, he was sure that neither those who were for the amendment nor those who were against it would wish him to repeat himself. He would therefore confine himself to two brief answers and two general observations.
(30) With regard to the question from the delegate of Pakistan, Mr. Kotschnig fully concurred with what the Chairman had said: his amendment would not entail a change in present practice, nor did he think that there should be a change.
(31) The delegate of Denmark had asked whether, in his view, governments would be bound by the actions of a Board composed of governmental representatives. Obviously a government would be bound by the statements of its own representative on the Executive Board, but governments would not be bound by the decisions of the Executive Board as a whole.
(32) It had been suggested by three speakers that, if the amendment were passed, Unesco would be invaded by power politics, that there would be more lobbying and compromising. Mr. Kotschnig submitted that the situation would not be really different from what it was at present. Preliminary discussions among delegations had to take place before elections; it had always been the practice and, whether the amendment were passed or not, it was unavoidable that it should continue, for it was necessary, under the Constitution, to ensure that members of the Board corresponded to certain standards and that there was an equitable geographical distribution. The amendment would not change those requirements. The delegate of Denmark had suggested that the Board, in its new form, would no longer reflect the various spheres which were Unesco's particular responsibility, namely, education, science and culture. The delegate of France had put the same idea differently, saying that the new Executive Board would reflect only the wishes of governments and not those of the peoples of the world. Mr. Kotschnig could not accept those views; the General Conference would still be voting upon individuals and, if it considered that a government was proposing an unsuitable candidate, it could vote against him. Secondly, even if members of the Board represented their governments, they could still represent education, science and culture also, for a truly democratic government reflected the achievements of

its educators, scientists, artists and writers. The United States delegation believed that the new Board would be even more representative than in the past, for it would represent no longer certain disciplines only, but the peoples of the world and their highest aspirations. Further, the new Board would be a stronger body, better able to advance the great aims of Unesco. That did not mean, however, that Mr. Kotschnig wished in any way to belittle the existing Executive Board; he considered that it had done excellent work for many years and that everyone should be grateful to it.

(33) With regard to the proposal that a decision be postponed until the ninth session, Mr. Kotschnig did not think it a sound suggestion. He reminded the Commission that the matter had been before the Conference for three and a half years, and it seemed to him that it should now be able to make up its mind.

(34) He therefore proposed that the Commission vote forthwith on the principle embodied in paragraph A.1, and applied again in paragraph A.4, namely, that the Executive Board be elected from among the delegates of Member States and that each member represent the government of his State. The question of the number of members would be decided when the Japanese amendment was considered.

(35) Mr. CARBAJAL VICTORICA (Uruguay) asked for a vote by roll-call, in order that those who supported the proposal should receive all the merit for it and that those who, like the Uruguayan delegation, opposed it, should accept the responsibility for their position.

(36) Mr. NIELSEN (Denmark) pointed out that, if there was to be a real vote on paragraph A.1, the Japanese amendment, being further from the original text, should be put to the vote first.

(37) Mr. HAGUIWARA (Japan) wondered whether closer consideration should not be given to the way in which the work of the Administrative Commission and that of the Legal Committee should be co-ordinated on the question at issue.

(38) In view of the numerous procedural problems which had been raised, the CHAIRMAN, with the Commission's approval, decided to suspend the meeting for a few minutes in order to allow delegates to confer with each other regarding the possible solutions which might be found for those problems.

(39) The meeting having reassembled, Mr. KOTSCHNIG (United States of America) suggested a change of procedure. He withdrew his original motion and proposed that the Commission vote, not on the principle, but on the entire text of his amendment. The wording could then be referred to the Legal Committee for approval. Proceeding in that way, the Commission would first consider the relevant amendments to each paragraph of the United States amendment, and would then vote on the paragraph as a whole.

(40) The above proposal was seconded by Sir Kenneth GRUBB (United Kingdom).

(41) Mr. BERNAL JIMENEZ (Colombia) said that the Japanese proposal was based on a consideration of principle. It was not incompatible with the amendments submitted, which should be studied and decided upon before the proposal itself was dealt with.

(42) It was agreed to proceed as proposed by the delegate of the United States of America and to vote on the amendment, paragraph by paragraph, taking first the relevant amendments to each paragraph.

(43) Mr. SANDOVAL VALLARTA (Mexico), referring to Article XIII, paragraph 2, of the Constitution, asked the Chairman whether he considered that the amendment about to be put to the vote came within the provisions of that paragraph, which stated: "The General Conference shall have power to adopt by a two-thirds majority rules of procedure for carrying out the provisions of this Article".

(44) The CHAIRMAN replied that the Article mentioned by the delegate of Mexico did not apply on that occasion, since the proposal did not modify the aims of the Organization or affect its basis.

(45) Mr. BERNAL JIMENEZ (Colombia) said that the proposal did not indeed affect the aims, administration or future trend of the Organization. The existing structure of the Executive Board was more dangerous than the reforms which had been asked for, since under the existing system difficulties might arise between countries' representatives and their respective governments. Acceptance of the change would cause those governments to display greater interest in the Organization and would not affect the quality of members of the Board, since the latter would be selected by delegations composed, one could be sure, of eminent men, effective defenders of the true interests of culture.

(46) The Colombian delegation would vote for the proposal to modify the structure of the Executive Board, and would also vote for the Japanese amendment increasing the number of Board members. The delegations that took that view were quite united and had no reason to fear a vote by roll-call.

(47) Mr. SOLDATOV (Union of Soviet Socialist Republics) wished to make it quite clear that his delegation would vote in favour of the Japanese amendment, but would be obliged to abstain if a vote on the paragraph as a whole were taken that afternoon.

(48) The CHAIRMAN reminded the Commission that it was open to any delegation to move that a vote be deferred.

(49) Mr. HAGUIWARA (Japan) moved a vote on the first paragraph of the Japanese amendment, increasing the number of members of the Executive Board from 20 to 22.

(50) That motion was seconded by Messrs. AVIDA (Israel) and BERREDO CARNEIRO (Brazil).

(51) Dr. MUDALIAR (India), seconded by Mr. SOENARJO (Indonesia) moved that the Commission vote on paragraphs 1, 3 and 4 together, as the principle in paragraph 1 affected the other two paragraphs.

(52) Rejected.

(53) Mr. POHL (Union of South Africa) recalled that, when it had been proposed to raise the number of members of the Board from 18 to 20, his Government had been in favour of retaining the number of 18. Similarly, at the present time, his delegation would be against increasing the number.

(54) Sir Kenneth GRUBB (United Kingdom) recalled that his delegation had been against an enlargement of the Board in the past. However, with the increased number of Member States, it was felt that an increase in the number of members would be justified. He accordingly supported the Japanese amendment.

(55) Mr. CHIRIBOGA TERAN (Ecuador) expressed his agreement with the Japanese proposal. It should, he thought, be considered not from a financial but from a cultural point of view. In other international organizations the executive boards usually consisted of one-third of the organization's membership. According to that principle, Unesco's Board should consist of 24 members, there being 72 Member States; but that was at present not possible, for reasons of procedure. The figure should however be raised to 22, in order that States which had recently joined Unesco should have access to the Board, and in the interests of a better geographical distribution of seats.

(56) Mr. MAYER (France) explained that, although the French delegation favoured increasing the number of seats on the Executive Board, it would abstain from voting on the proposed amendment, because the latter was bound up with what it considered a dangerous change in the method of election. That alteration could not fail to transform the very nature of the Board completely and, despite the explanations furnished by the United States delegate, the French delegation remained strongly opposed to such a change.

(57) If the text were rejected when put to the vote, however, the French delegation would be prepared to frame jointly with the Brazilian and Japanese delegations a new draft amendment for increasing the number of members of the Executive Board for submission in due time to the ninth session of the General Conference.

(58) Mr. PETROVIC (Yugoslavia) concurred with Mr. Mayer and said that he too would abstain from voting on the proposed amendment.

(59) Mr. NIELSEN (Denmark) did not agree with the delegate of France. He considered it perfectly logical to vote for the Japanese amendment but against the proposal as a whole, for, even if the Board became a governmental body, it would still be desirable to increase its membership.

(60) The Japanese amendment to paragraph 1 of the United States amendment, consisting of substituting the figure 22 for 20 in the second line, was adopted by 52 votes to 1, with 4 abstentions.

(61) It was agreed to proceed to a roll-call vote on paragraph 1 of the United States amendment, as amended by the Japanese delegation.

(62) The result of the voting was as follows:

Voted for: Argentina, Australia, Austria, Brazil, Burma (Union of), Cambodia, Canada, Ceylon, Chile, Colombia, Cuba, Dominican Republic, Egypt, El Salvador, German Federal Republic, Greece, Guatemala, Honduras, Indonesia, Iran, Iraq, Israel, Italy, Japan, Jordan (Hashemite Kingdom of), Korea, Liberia, Libya, Mexico, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Philippines, Saudi-Arabia, Spain, Sweden, Thailand, Turkey, Union of South Africa, United Kingdom, United States of America, Viet-Nam.

Voted against: Belgium, Denmark, France, Haiti, Switzerland, Uruguay, Yugoslavia.

Abstentions: Byelorussian SSR, Ecuador, India, Lebanon, Ukrainian SSR, Union of Soviet Socialist Republics.

Absent: Afghanistan, Costa Rica, Laos, Luxembourg, Monaco, Nepal, Panama, Peru, Syria, Venezuela.

(63) Paragraph 1 of the United States amendment, as amended by Japan, was thus adopted by 44 votes to 7, with 6 abstentions and 10 Member States absent.

(64) Mr. BARRIOS (Nicaragua) dissented from the paragraph in the United States amendment on the re-election of members of the Board who were due to retire. He considered that re-election ought not to be allowed more than once, in order that all countries might have the possibility of being represented on the Board.

(65) Mr. RIANO JAUMA (Cuba) referred to Article V of the Constitution, which laid it down that members of the Board "shall not serve consecutively for more than two terms". That provision had been made for reasons of geographical distribution. The thesis put forward at the seventh session of the General Conference referred to the appointment of members of the Board on their merits as individuals and not on grounds of nationality. That system made equitable geographical distribution impossible; it had incidentally borne hardly on Cuba, which, as a result of it, had never been able to achieve its ambition of being represented on the Board, despite the fact that it had been a founder member of Unesco.

(66) In reply to a question from Mr. SALIM (Hashemite Kingdom of Jordan), Mr. KOTSCHNIG (United States of America) pointed out that "members" of the Executive Board must mean individuals and not States, since paragraph 4 began with the words "In the event of the death or resignation of a member of the Executive Board..."

(67) Mr. AVIDA (Israel) pointed out that the words "Retiring members shall be eligible for re-election" (paragraph 3) was against the principle of rotation.

(68) Mr. MENDOZA (Guatemala) asked, in accordance with Rule 85 of the Rules of Procedure, for a separate vote on the last sentence of paragraph 3 of the proposal. His delegation was opposed to any form of re-election.

(69) The CHAIRMAN observed that it had been proposed to take two votes, the first on paragraph 3 without the last sentence, and the second on paragraph 3 with the last sentence.

(70) Mr. BARRIOS (Nicaragua) asked for a five minutes' suspension of the meeting, to enable delegates to exchange their views, as they had successfully done at an earlier stage.

(71) Mr. FRAGA IRIBARNE (Spain) asked for an explanation of the Chairman's views on the result of a separate vote, as asked for by the Guatemalan delegate. If the last sentence of paragraph 3 were rejected, while the rest of the paragraph were adopted, the vote would not make sense. Would paragraph 3, in that case, remain in force? If not, the result would be extremely confusing.

(72) The CHAIRMAN explained that the position was that, if the sentence were eliminated, it would leave the matter open; it might be possible, of course, to deal with it in the Regulations instead of having a provision in the Constitution.

(73) Mr. BERNAL JIMENEZ (Colombia) understood the anxiety shown by some of the delegates, in particular the delegate of Nicaragua, with regard to the last sentence of the paragraph under discussion. Nevertheless the fear that the new system might not permit the election of Member States in rotation, or that such rotation might not take place with sufficient speed, was unfounded. There was another aspect of the question to be taken into account - the need for continuity within the Executive Board, so that the more important States might go on being represented and continue to promote the progress of the Organization.

(74) Moreover, the election of members to the Board generally resulted from agreements between countries of a given cultural and geographical area, e.g. Latin America. Such private and internal agreements would facilitate the drawing up, every two years, of lists of candidates for the Board.

(75) The Colombian delegate concluded that the paragraph should be approved in its entirety.

(76) Mr. SABA (Legal Adviser) said that, under general principles of law, anything not expressly forbidden remained permissible and that therefore, in the absence of any rule concerning the re-election of former members, those members should normally be re-eligible.

(77) Mr. SANDOVAL VALLARTA (Mexico), referring to Article V.C. 13 (d) of the Constitution, asked how that provision would be affected if the last sentence of paragraph 3 were adopted. Would it continue in force?

(78) Mr. SABA (Legal Adviser) explained that the "*transitional provisions*" *which were the subject of* section C were intended to replace those contained in the existing text of Article V.

(79) Sir Kenneth GRUBB (United Kingdom), seconded by several delegations, moved the adjournment of the meeting.

(80) Adopted.

The meeting rose at 7.5 p.m.

# EIGHTH MEETING

*19 November 1954 at 10 a.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.3.1 OF REVISED AGENDA: DRAFT AMENDMENTS TO ARTICLE V OF THE CONSTITUTION (STRUCTURE OF THE EXECUTIVE BOARD) (documents 8C/ADM/1 and 8C/ADM/1 Add.) (continued)**

(1) The CHAIRMAN invited the Commission to resume its consideration of the draft amendments to the Constitution to revise paragraphs 1, 3, 4, 12 and 13 of Article V concerning the membership of the Executive Board, as submitted by the delegation of the United States of America in document 8C/ADM/1 Annex III and co-sponsored by the delegations of Australia, Brazil and the United Kingdom.

(2) Mr. KOTSCHNIG (United States of America) said he had reconsidered the matter and believed that the needs of the Organization would be better served if the proposal to amend paragraph 3 were withdrawn. The paragraph as contained in the Constitution meant that no individual member of the Executive Board could be elected for more than two consecutive terms of office; there was, however, nothing to prevent the Conference from electing as a member of the Executive Board a national of the

same country as the one of the outgoing member. The principle of rotation would be facilitated.
(3) He believed that the co-sponsoring delegations were not opposed to the withdrawal of the amendment, and made a formal proposal that it be withdrawn.

(4) Sir Kenneth GRUBB (United Kingdom) agreed that the proposed amendment should be withdrawn and expressed the hope that a similar solution would be adopted with regard to the proposal to amend Rule 96 of the Rules of Procedure.

(5) It was agreed to retain paragraph 3 of Article V unamended.

(6) Mr. FERNANDEZ MORENO (Argentina) expressed his delegation's agreement with the withdrawal of the amendment to paragraph 3 of Article V of the Constitution, as proposed by the United States delegation, the existing paragraph 3 remaining in force.
(7) He did not clearly see how the rest of the amendment would be drafted in regard to continuation of the membership of a country which had already been elected, there being, as he understood, no fresh text designed to modify the existing paragraph 3 in that respect.

(8) The CHAIRMAN pointed out that any final decision in the matter lay not with the Administrative Commission but with the General Conference. If there were no further objections, he would consider the amendment to paragraph 3 of Article V as having been withdrawn.

(9) Mr. MENDOZA (Guatemala) said that, in view of the official interpretation that Member States could be re-elected for more than two consecutive terms, his delegation must formulate the most explicit reservations.

(10) Mr. HAGUIWARA (Japan) stated in what way the word "resignation" in paragraph 4 should be interpreted.
(11) Although a member of the Board represented his Government, he should tender his resignation to the Board (which could accept or refuse it) personally, as a member of the Board, that resignation had nothing to do with the resignation a government representative handed in to his Government. It should be made clear that the resignation of a Board member could not be handed in by the member's government.
(12) Mr. Haguiwara asked for his statement to be recorded in the minutes.

(13) Mr. BERREDO CARNEIRO (Brazil) supported the Japanese delegate's statement and asked the Australian and United Kingdom delegates whether, as co-sponsors, they agreed with that interpretation.

(14) Mr. KELLY (Australia) thought that the new text of paragraph 4 as proposed was an improvement on the corresponding clause in the Constitution, since it contained an indirect reference to the considerations which should be taken into account when electing members to the Executive Board.

(15) Mr. BAUGNIET (Belgium) dwelt on the dangers inherent in the new provision. He thought that the existing text, of which one clause stipulated that the substitute would be chosen from among the former delegates of the State concerned, and another clause that the choice would be submitted to the General Conference at the following session, contained more safeguards for the Organization.

(16) The CHAIRMAN, in the absence of further comments, put to the vote the text of paragraph 4 of Article V of the Constitution as amended by the United States delegation.

(17) Paragraph 4, as amended, was adopted by 47 votes to 4 with 1 abstention.

(18) Mr. PAGE (Canada) said that his delegation had always pursued the aims of the Organization as a whole. Although his country was not represented on the Executive Board, his delegation was concerned with ensuring its smooth working. He thought the Constitution should state that the Executive Board exercised its powers on behalf of the General Conference. In that connexion he proposed that paragraph 12 should be replaced by the new text under B. Functions, as proposed by the delegations of Australia, Canada, the United States of America and Colombia in Annex II of document 8C/ADM/1.

(19) Mr. KOTSCHNIG (United States of America) thought the proposal of the Canadian representative reflected a majority opinion in the Commission. Subject to the agreement of the co-sponsors, he would be in favour of the Canadian proposal and would not insist on the deletion of paragraph 12.

(20) Mr. BAUGNIET (Belgium) supported the Canadian proposal, which he found entirely satisfactory.

(21) Mr. MARTINEZ COBO (Ecuador) supported the Canadian delegate. He felt that the amendment in question would lead to a better implementation of Unesco's programme.

(22) The CHAIRMAN put to the vote the Canadian proposal that paragraph 12 of Article V should be altered in conformity with the text proposed by the delegations of Australia, Canada, the United States of America and Colombia in Annex II of document 8C/ADM/1.

(23) The proposal was adopted by 51 votes in favour, with one abstention.

(24) The CHAIRMAN said the amended text of paragraph 13 proposed by the delegation of the United States of America was intended to replace entirely the existing text of the paragraph.

(25) Mr. BAUGNIET (Belgium) asked that the two paragraphs of the Japanese amendment should be considered, and voted on, separately.

(26) With regard to the Japanese amendment, Mr. HAGUIWARA (Japan) explained that the difference between documents 8C/ADM/1 Add. and 8C/DR/67 was purely a difference of drafting; it was for the Legal Committee to choose between the two.
(27) As it had been decided that members of the Executive Board should henceforth be government representatives, the most logical way of renewing the Board would possibly be to adopt the United States solution, whereby the whole of the Board would be changed.
(28) However, since the members of the Executive Board had received a four-year mandate from the General Conference at its seventh session, there was some objection to that course, even if it were legally practicable.
(29) It would perhaps be better to arrange for the non-retiring members, provided they were so authorized by their governments, to be able to remain on the Board for the transitional period. That policy would contribute towards continuity in the direction of the Organization, which was highly desirable.
(30) For those reasons, the Japanese delegation regarded the renewal, at present, of half the Board as the best solution.
(31) Reverting to the problem involved in the increase of the number of Board members, Mr. Haguiwara thought it would be preferable to elect twelve new members, of whom one, chosen by lot, would have a mandate expiring at the end of the ninth session (not the eighth, as erroneously stated in document 8C/DR/67).
(32) In answer to a question from the Belgian delegate, Mr. Haguiwara explained that paragraph (a) in document 8C/DR/67 only replaced paragraph (a) of the transitional provisions as they appeared in document 8C/ADM/1 Add.

(33) Sir Kenneth GRUBB (United Kingdom), while appreciating the arguments presented by the representative of Japan, was unable to agree with his proposal as a whole. The co-sponsored draft ensured continuity. Furthermore, there was nothing to prevent a government from nominating to the Executive Board another of its nationals who had thitherto been serving in another capacity.
(34) Also it would be inelegant to place a member of the Executive Board in the position of having to consider resignation from the Board merely because of the modification of its structure.
(35) Finally, the procedure outlined by the representative of Japan was too complicated.
(36) For the reasons he had stated he would urge the Commission to adopt the co-sponsored draft.

(37) Mr. SABA (Legal Adviser) drew the Commission's attention to certain problems raised by the proposed Japanese amendment.
(38) The purpose of the amendment was to give Board members whose terms of office had not yet expired an opportunity of remaining on the Board, but - and the point was important - in the capacity of government representatives.
(39) That amending effect on a vote previously given could only be legal to the extent that all parties concerned accepted it. The question therefore arose by what method the agreement between the governments and those concerned on the continuance of those mandates should be signified.
(40) If the agreement of the governments and the members concerned were given at once, the Conference could take note of it before voting on the renewal of half the Executive Board.
(41) The alternative was to consider that the silence of the governments and persons concerned implied consent, and that the Executive Board had only to appoint a substitute in the event of a member indicating that he was unable to continue in office. To avoid any difficulties in the future, the Administrative Commission would have to adopt a very clear position on the subject.
(42) Mr. Saba considered that the new paragraph (a) submitted in document 8C/DR/67 implied something more than a mere drafting change, since it entailed the drawing of lots between the twelve new members instead of between the two extra members.

(43) Mr. MENDOZA (Guatemala) concurred with the judicious remarks of the United Kingdom delegate. If the Japanese proposal were accepted, the Executive Board would become a mixed body, which would prove difficult to work. Half its members would represent the governments and the other half the General Conference, with resulting disadvantages for the attaining of Unesco's objectives.

(44) Mr. KELLY (Australia) agreed with the views expressed by the representatives of the United Kingdom and Guatemala. He believed that the Commission should recommend that the Executive Board be composed of representatives of Member States, but that it should be responsible to the General Conference. The latter should therefore elect the 22 members of the Executive Board.
(45) The Japanese proposal, if adopted, might give rise to conflicts within the Executive Board or between members of the Board and Member States. He therefore urged the Commission to adopt the revised text proposed jointly by the United States of America, Australia, Brazil and the United Kingdom.

(46) Mr. BAUGNIET (Belgium) thought it was a mistake to see in the new paragraph (a) more than a drafting change; on that point he disagreed with Mr. Saba.
(47) With regard to the implications of the Japanese amendment, he saw no legal obstacle to the simultaneous presence, on the Board, of members with two different kinds of mandate.
(48) Some people even considered that scheme preferable to the one which had finally been adopted.
(49) Consequently, Mr. Baugniet was opposed to the adoption of paragraph (b) of the Japanese amendment.

(50) Mr. DE LOS SANTOS (Philippines) supported the United States amendment, although he appreciated the helpful intentions of the Japanese delegation in submitting its own amendment. The latter, if voted, might result in legal complications.
(51) The United States proposal did not violate the principle of continuity in the Organization, since the Secretariat was permanent and maintained that continuity.

(52) Mr. FERNANDEZ MORENO (Argentina) joined the delegates of Guatemala, the United Kingdom and the Philippines in seconding the United States proposal. He considered that the rejection of the Japanese amendment would simplify the problem.

(53) Mgr MAROUN (Lebanon) thought the discussion was becoming involved with over-rigid principles. Realities must be kept in view: between the Board members representing their governments, and the National Commissions and various governmental bodies there would be close contact and practical working agreement, and that argued for a complete renewal of the Board.
(54) However the Monsignor did not deny the advantages of coexistence - assuredly peaceful - between two categories of members, as favoured by the Belgian delegate; and he recommended the adoption of paragraph (a) of the Japanese amendment.

(55) Dr. MUDALIAR (India) did not wish to go into the legal implications of the problem but thought it was important, if the structure of the Executive Board were to be modified, to determine the position of those of its members who had already served a number of years under the old system. In his opinion the procedure outlined by the Japanese representative should be adopted, since it recognized the principle of continuity and also introduced a greater element of fairness; it would, furthermore, contribute to the efficient working of the Executive Board.

(56) Mr. RAADI (Iran) stressed two important aspects of the question.
(57) Firstly, the United States proposal, unlike the Japanese amendment, was in the nature not of a transitional provision, but rather of a draconian measure.
(58) Secondly, the Japanese amendment was the only one likely to ensure a transition which would safeguard both the human aspect of the problem and the requirement that the Organization's new programme should be carried out under the part control of those who had played so large a part in drawing it up.
(59) Morevoer, the United States delegate himself favoured the Japanese amendment.

(60) In the opinion of Mr. BARRIOS (Nicaragua), the votes already registered required the changing of twenty members of the Board and the election of twenty-two. The changing, logically, should be complete and not partial, since a real constitutional reform had been carried out.

(61) Mr. TREJOS DITTEL (Costa Rica) thought that the Executive Board should be renewed completely, since in that way a fair and equitable geographical distribution would be achieved. In the nine years of Unesco's existence, the American continent, and more particularly Central America and the Antilles, had never been adequately represented on the Board.

(62) Mr. JARAMILLO ARANGO (Colombia), remarking that his delegation had followed the discussion with care, said that he appreciated the Japanese delegation's desire to maintain established tradition. He thought however that tradition could be preserved in other ways, and that it would be more logical to proceed to a complete renewal of the Board.

(63) Mr. KOTSCHNIG (United States of America) said that his delegation found itself in a somewhat difficult situation, since it fully appreciated the strong arguments put forward in favour of the Japanese proposal. It was true that the latter guaranteed the principles of fairness and continuity, but the proposal of the United States of America was less complicated. He firmly believed that, if the United States proposal were adopted, the principle of fairness would be safeguarded, but he would vote for the Japanese draft and would propose the United States text only if the former were rejected.

(64) Mr. KELLY (Australia), speaking as one of the co-sponsors of the text submitted by the United States delegation, said that withdrawal of United States support for the text did not imply that the co-sponsors were in agreement with that decision and were also willing to abandon their text.

(65) Mr. BERREDO CARNEIRO (Brazil), likewise speaking as a co-sponsor of the United States amendment, reminded the Commission that it had made its choice, by a big majority, between the two types of mandate, and that it should draw the logical consequences from that action.
(66) He thought it would be difficult for the Board to work harmoniously and effectively if it were composed of members with different responsibilities and votes of unequal weight, some members being freer and others more tied, although they would all have to answer to the General Conference in the same way.
(67) Mr. Berredo Carneiro agreed therefore with the Latin American delegates, and would not support the Japanese amendment.

(68) Mr. HAGUIWARA (Japan), emphasizing the need for transitional provisions, asked for the United States proposal to be adopted in the event of the Japanese amendment being rejected.
(69) He then reminded the Commission that, according to a resolution adopted by the General Conference at its seventh session, ten days' notice of elections to the Board should be given, in order to allow time for candidates to be put forward.
(70) Mr. Haguiwara wondered whether that provision was compulsory or not, i.e. whether it meant that no further candidates could now be nominated.
(71) Governments whose nationals on the Board were not due to retire would want to nominate candidates if the United States amendment were adopted as it stood. But, as some governments would have to consult the National Commission, or the ministry or university to which the proposed candidate belonged, a certain time would be required before he could be nominated.
(72) That could cause confusion when the election took place, and the governments that had already put forward their candidates would thus have an advantage over the others.

(73) Mr. Haguiwara asked whether that provision regarding the election of the Board was compulsory or not.
(74) He also asked for information as to the effect which the adoption of the United States amendment would have on the provisions governing re-eligibility.

(75) Mr. SABA (Legal Adviser) read out the resolution which the Japanese delegate had alluded to (7C/Resolutions, res. 42.2 - 42.24, p.107) and explained that it was only a recommendation, despite the fact that some delegations had wanted it to be otherwise at the time when it was discussed.
(76) In any case, Rule 95, paragraph 2 of the Rules of Procedure was perfectly clear: "Only delegates nominated ... before the ballot, may stand for election." Nominations could therefore be accepted up till the last moment.
(77) In connexion with re-eligibility, Mr. Saba considered that members of the Board could receive two successive mandates, no matter what the duration of those mandates happened to be. Under the existing texts, which the proposed amendments sought to modify, members who, under the transitional provisions, had had their mandates somewhat extended would not be re-eligible.
(78) Under the new transitional provisions, unless stated to the contrary, re-eligibility should be taken as meaning re-eligibility without any limit of time, no matter how long the previous term or terms happened to be.

(79) The CHAIRMAN recalled that paragraph (a) dealing with transitional provisions as submitted by the Japanese delegation in document 8C/DR/67 was intended to replace only paragraph (a) of the Japanese draft amendment contained in the Annex to document 8C/ADM/1 Add.
(80) He put paragraph (a), in its amended form, to the vote. It obtained 21 votes to 19 against, with 14 abstentions.

(81) The required two-thirds majority not having been obtained, the amended text of paragraph (a) as submitted by the Japanese delegation was not adopted.

(82) The CHAIRMAN said that, since paragraph (a) of the Japanese proposal had not been adopted, there was no need to vote on paragraph (b).
(83) He put to the vote the amended text of paragraph 13 of Article V as proposed by the United States of America in Annex III of document 8C/ADM/1, which obtained 47 votes against 1, with 5 abstentions.

(84) The required two-thirds majority having been obtained, paragraph 13, as amended, was adopted.

(85) The CHAIRMAN put to the vote the proposal of the United States of America (8C/ADM/1, Annex III) as a whole and as amended in the course of the discussion. The proposal received 46 votes in favour and 6 against; there was 1 abstention.

(86) The required two-thirds majority having been obtained, the draft amendment as a whole and as modified was adopted.

(87) The CHAIRMAN said that the Administrative Commission had still to consider the amendments to the Rules of Procedure consequential upon the amendments to the Constitution adopted by the Commission.

(88) Mr. KOTSCHNIG (United States of America) proposed that, since the amendments to the Rules of Procedure were entirely consequential upon the amendments to the Constitution adopted by the Administrative Commission, their consideration should be left to the Legal Committee. In order to facilitate such a measure his delegation agreed to withdraw its proposal to delete paragraph 3 of Rule 30 on the functions of the Nominations Committee (document 8C/ADM/3 (II)).

(89) Mr. FERRARA MARINO (Cuba) said that, in order to expedite matters, his delegation would also withdraw its proposed amendments to the Rules of Procedure (document 8C/ADM/3 (IV), Annex I).

(90) The CHAIRMAN said that the Administrative Commission would be in a position to adopt the Rules of Procedure as amended after the Legal Committee had considered the matter. If the Commission agreed that the amendments to the Rules of Procedure were entirely consequential upon the amendments to the Constitution it had adopted, he proposed that consideration of the amendments to the Rules of Procedure should be referred to the Legal Committee.

(91) It was so agreed.

The meeting rose at 1 p.m.

# NINTH MEETING

*20 November 1954 at 10.30 a.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.4.4 OF REVISED AGENDA: CONTRIBUTIONS: SCALE, CURRENCY AND COLLECTION OF MEMBER STATES CONTRIBUTIONS (document 8C/ADM/31)**

(1) *The Commission proceeded to the study of the* second interim report of the Contributions Committee (document 8C/ADM/31).

(2) Mr. BOW (Rapporteur of the Committee on Contributions) said that his Committee had been conscious of the desire of the Commission to consider the Committee's report at an early stage. It had also realized that it was under an obligation to protect the financial structure of the Organization.
(3) In the first place, the Committee had decided that the Unesco scale of contributions should be based on the United Nations scale.
(4) As regarded the question of a ceiling on contributions, the Committee had confirmed a decision taken at the third session of the General Conference, to the effect that, in principle, no single Member State should contribute more than one-third of the budget appropriations.
(5) The Committee had been of the opinion that the question of minimum contributions should be reconsidered at the ninth session of the General Conference.
(6) *It had decided that, for 1955-56, the principle* of a per capita limitation on the contributions by Member States should apply.
(7) As regarded special percentages, the Committee was recommending that Austria's theoretical percentage for 1955-56 be 0.33%, on the understanding that in 1957-58 it should be brought up to whatever was the full United Nations figure recommended for that period. China had requested that its contribution be reduced to $14,000 a year; the Committee had decided that the matter ought to be reconsidered at the ninth session of the General Conference.
(8) The Committee had decided to recommend that the contributions of Associate Members should be assessed at 60% of the minimum percentage assessment of full members.
(9) The above-mentioned principles had been applied in the draft resolution to be found on page 5 of the report. In paragraph 5 of the original draft resolution, it had been stipulated that the United States contribution should remain at 33.33% of the total. That stipulation had been deleted by the Committee.

(10) Mr. DE LOS SANTOS (Philippines), seconded by Mr. SANDOVAL VALLARTA (Mexico), then formally moved that the Commission should recommend the General Conference to adopt the resolution on page 5.

(11) Mr. SOLDATOV (*Union of Soviet Socialist* Republics) considered that the percentage contributions fixed for the USSR, the Ukrainian SSR and the Byelorussian SSR were too high, and that, in establishing them - as had occurred previously in the United Nations - three facts had been overlooked: (1) the enormous losses suffered by Soviet economy during the second world war; (2) the difficulties encountered by the USSR in procuring foreign currency; (3) the contribution made by the USSR to other Specialized Agencies or programmes of the United Nations (such as ILO and the Expanded Programme of Technical Assistance).
(12) The percentage contributions of the USSR and the Ukrainian SSR should not exceed 10% and 1% respectively, and that of the Byelorussian SSR should be 0.45% of the total budget figure decided by Unesco. There was, on the other hand, no reason for reducing the contribution of the United States of America.
(13) His delegation accordingly requested the Administrative Commission to bear that opinion in mind, and moved the amendment of the draft resolution put forward by the Committee on Contributions (document 8C/ADM/31).

(14) The Commission then proceeded to discuss the resolution paragraph by paragraph.

(15) Paragraph 1 was adopted and the meeting passed on to paragraph 2.

(16) Mr. DUDNIK (Ukrainian Soviet Socialist Republic), referring to the remarks made by the delegate of the USSR, emphasized the difficulties his country was experiencing in procuring foreign hard currency.
(17) He therefore asked that the scale of contributions in use at the United Nations should not be taken as the basis for the establishment of the scale of contributions applicable to the Member States of Unesco.
(18) He thought it right that his country's contribution should not exceed 1 per cent - the percentage accepted by the International Labour Office.

(19) Mr. KAVALEVSKY (Byelorussian Soviet Socialist Republic) endorsed the foregoing statement and, for the same reasons as those given by Mr. Soldatov, asked that his country's contribution should not exceed .45 per cent.
(20) He believed that every just measure was likely to contribute to international friendship and

understanding, even though it might apply in a field that was not of the highest importance.

(21) Mr. BERREDO CARNEIRO (Brazil) admitted the cogency of the arguments put forward by the delegates of the USSR, the Ukrainian SSR and the Byelorussian SSR; he was far from underestimating the efforts those countries were making to redress their national economies.
(22) However, it seemed to him that, in departing from the strict principles on which the United Nations scale was based, the Commission might find itself on the dangerous ground of arbitrary notions drawn from inaccurate statistics.
(23) For identical reasons, the Brazilian delegation would agree neither to the USSR proposal nor the United Kingdom proposal, whatever their respective intrinsic merits.
(24) The speaker wondered, however, whether it would not be possible, for the period 1955-56, to find a transitional compromise that would be satisfactory to the Soviet delegation whilst taking account of the United Nations scale, and to revert to the question at a later date when that organization's Committee on Contributions had had an opportunity of reviewing the existing scale on the basis of new data.

(25) The CHAIRMAN understood that the delegate of the Soviet Union was proposing a formal amendment to paragraph 2 of the resolution, to the effect that the contributions of the USSR, the Ukrainian SSR and the Byelorussian SSR should not represent more than 10%, 1% and 0.45% respectively of the total appropriations.

(26) Mr. BUSTAMANTE (El Salvador) admitted the weight of the reasons adduced by the USSR, the Ukrainian SSR and the Byelorussian SSR in support of their claim for a reduction of their contributions. He added, however, that a number of small countries which were in a position to use similar arguments had refrained from doing so because they were aware that a request of that kind would be disastrous for Unesco; it was to be hoped that the three delegations which had made the request realized its implications.

(27) Mr. POHL (Union of South Africa) said that he, too, understood the reasons for the Soviet amendment. It would, however, be a mistake to depart from the United Nations scale without fuller information.

(28) Mr. STERNBERGER (Chairman of the Committee on Contributions) said that the Committee had considered the points raised by the Soviet member of the United Nations Committee on Contributions (page 3 of the report). The Committee had agreed with the view expressed in the report by the United Nations Committee on Contributions, namely, that dislocation of a country's national economy due to the effects of war was reflected in that country's statistics for the national income. It had, therefore, by a majority vote, rejected the Soviet motion.

(29) Mr. BARRIOS (Nicaragua) thought that the Soviet proposal was illogical and that the contributions at present assigned should be maintained. If the small countries of Central America were making real sacrifices in order to pay their contributions, there was no acceptable reason why countries belonging to a continent in full economic development and master of its own fate should not be able to do so.

(30) Mr. SOLDATOV (Union of Soviet Socialist Republics) remarked that it was obvious that neither the Committee on Contributions of the United Nations - where the question of the contributions of the USSR had been debated in great detail - nor Unesco's Committee on Contributions had paid sufficient heed to the difficulties encountered by his country in procuring foreign currency, or to the fact that it was already contributing considerable sums towards the operation of other Specialized Agencies of the United Nations.
(31) The Soviet Union was of course aware of the economic and currency difficulties encountered by other countries, especially the smaller ones. But it trusted that the enormous difficulties and numerous problems that its people had had to face as a result of the second world war would be taken into account by the Administrative Commission.

(32) The CHAIRMAN thereupon put to the vote the *Soviet amendment to paragraph 2 of the resolution.* The amendment took the form of a motion: "That the Administrative Commission should recommend the General Conference to decide that the contributory shares of the USSR, the Ukrainian SSR and the Byelorussian SSR should be fixed at 10%, 1% and 0.45% respectively."

(33) The amendment was rejected by 37 votes to 3, with 5 abstentions.

(34) Mr. ARTHUR (United Kingdom) moved the inclusion of a paragraph to the effect that the United States contribution remain fixed at 33.33%.
(35) In deciding on the scale of contributions, Unesco should be guided by the highly technical work already done in the United Nations Committee on Contributions. That Committee had decided that the following factors should be borne in mind in assessing a country's contribution: (1) the comparative income per head; (2) any temporary dislocation to its economy caused by the second world war; and (3) its ability to procure foreign currency.
(36) If those criteria were applied, the United States contribution would be no less than 48%. The United Nations had arbitrarily decided to limit the United States contribution to one-third of the total on the general grounds that it was undesirable for any one State to finance an international organization to so great an extent.
(37) His delegation considered that the Commission should follow the United Nations example, and decide that the United States contribution should remain one-third of the total. Any reduction below that figure would obscure the relation between a country's contribution and its capacity to pay.
(38) In the Committee on Contributions, the delegate of France had said that it would be inequitable if the United States of America were the only country not

to benefit by a reduction of its percentage made possible by the admission of new Member States. But that point would only be significant if the new countries joining were not members of the United Nations. On page 4 of the report there was a list of such countries. Their total contribution amounted to 12.57% of the total. Even if 12.57 were subtracted from 48, the result still exceeded 33.33. Hence no arguments based on the fact that Unesco had more members than the United Nations would hold water.

(39) Mr. DE LOS SANTOS (Philippines) seconded the United Kingdom motion.

(40) Mr. BERREDO CARNEIRO (Brazil) recognized the merits of arguments put forward by the United Kingdom delegate. Nevertheless, he again urged the Commission not to open the door to considerations that were too far removed from the criteria hitherto applied.
(41) He was certainly not pleading in favour of the request from the United States of America for a reduction in the rate of their contribution - far from that - but it seemed to him difficult to yield at that juncture to arguments which, although they worked in the opposite direction, were nevertheless similar to those he had a short while ago opposed.
(42) He therefore would be glad if the Chairman of the Committee on Contributions or the Director-General's representative could give some explanations on the method of calculating the contributions, so that he could, if need be, revise his present interpretation.

(43) Mr. HARPER-SMITH (Comptroller) referred the Commission to the terms of reference of the United Nations Committee on Contributions. It was specified that, while United Nations expenses should be apportioned according to the capacity of the various countries to pay, it was, nevertheless, difficult to effect such an apportionment by statistical means; it was further stated that national income seemed to be the best guide, but that other factors (income per head, temporary dislocation due to the war, and ability to procure foreign currency) had to be borne in mind.

(44) Mr. POHL (Union of South Africa) said that, as regards the basic principles advanced by the delegate of the United Kingdom, he was in complete agreement. It was not appropriate for the Commission to revise the calculations already made by the United Nations, and it should therefore abide by the existing United Nations assessment.

(45) Mr. SCOTT (United States of America), as a newcomer, welcomed the opportunity of joining in the Commission's deliberations, and expressed his conviction, as a former aide to the President of the United States of America, that mutual understanding would lead to a lasting peace.
(46) He was much impressed by the thorough study underlying the recommendations now before the Commission. His interest in the point at issue was no mere academic one, since he would be called on to justify the decisions taken at the Conference before the Congress of the United States of America.
(47) The United States of America was glad to see, in the resolution before the Commission, that it had been possible to implement the principle that no country should pay a higher per capita contribution than the country paying the highest contribution.
(48) The lack of any specific mention of a percentage figure for the United States of America meant that the United States contribution would be adjusted to allow for the difference in membership between the United Nations (60 members) and Unesco (72). It would, that is to say, be reduced to 30% of the total.
(49) The delegate of the United Kingdom had proposed that, come what might, the United States of America, as the largest contributor, should always have to pay 33.33% unless there was a radical change in the relative capacity to pay. His arguments might seem plausible, but he (the speaker) agreed with the delegate of Brazil in thinking that they were seriously inequitable.
(50) While fully recognizing that capacity to pay was a relevant consideration, it was surely important that rights and obligations should be equitably shared and that no one country should have a preponderance of power in any international organization. It was for that latter reason that a ceiling of 33.33% had been set for the contribution of any one Member State, but there was no reason why that figure should not be reduced if there were a substantial increase in the membership of the Organization.
(51) If the United Kingdom proposal were adopted, and the United States contribution remained at 33.33%, then, if the budget stayed at the existing figure of $18,000,000 for two years, the contribution of every country would be reduced, except in the case of the United States of America and perhaps in the case of those countries the contributions of which were assessed at the minimum level of 0.04%. The United Kingdom contribution would be reduced from nearly $2,000,000 to roughly $1,400,000.
(52) If the budget were increased, as recommended by the Director-General, to approximately $21,000,000, only the United States contribution would be definitely increased, and that by more than a million dollars. At the same time the United Kingdom contribution would be reduced from nearly $2,000,000 to $1,550,000. He could supply figures to show the reductions for all other Member States.
(53) The adoption of the United Kingdom proposal could hardly be considered equitable, nor would it be in the interests of Unesco, since it would render Unesco considerably more dependent than in the past on the contributions of one country, the United States of America.
(54) It was important to realize that, if the proposal were adopted, the friends of Unesco in the United States of America would have great difficulty in justifying the Unesco budget before Congress and in securing the necessary funds.
(55) He earnestly hoped that the Commission and the Conference would be able to support the view that the United States of America should share in the adjustment of percentage contributions made possible by the accession of new Member States, i.e. that the United States contribution for the following two years should be reduced to 30% of the total budget. In so requesting, he was not asking that the ceiling figure of 33.33% should be abandoned - merely that the

United States of America should be allowed to benefit from an adjustment made possible by circumstances.
(56) Only if such an adjustment were made could his delegation accept any increase in the budget, having been given emphatic instructions to vote against any budget increase requiring a larger cash contribution from his country than was being made at that moment.

(57) Mr. HUZAYIN (Egypt) agreed with the points made by the various speakers who had opposed the United Kingdom proposal. It was impossible to separate the question at issue from the question of a possible increase in the budget. The fact that it would be exceedingly difficult or impossible for the United States delegation to accept any budget increase if the proposal were adopted had to be given due weight.

(58) Dr. MUDALIAR (India) said that the principle that no one Member State should contribute more than a third of the budget did not mean that a State could be compelled to pay a third of the budget no matter what the circumstances.
(59) Several new Member States had joined Unesco, with the result that every Member State, except those paying the minimum contribution, would enjoy some reduction in its contribution. Under the United Kingdom proposal, the only country not so affected would be the United States of America, which would be most unfair. There was no doubt about the United States capacity to pay, but at the same time it had to be borne in mind that the United States of America was spending a lot of money on purposes allied to those of Unesco, and that the very large United States contribution to the finances of Unesco was to some extent a voluntary one.

(60) Mr. SALIM (Hashemite Kingdom of Jordan) agreed with what had been said in favour of a reduction in the United States contribution.
(61) He was specially concerned by paragraph (b) on the first page of the report (minimum contribution). What were the reasons which had prompted certain members of the Committee to take the view that a contribution of less than 0.04% would be unreasonably small?
(62) His country's capacity to pay was very slight. Out of the total population of Jordan, nearly one-half were refugees, and, of them, only 11,000 could subsist without aid. Jordan was dependent on the United Kingdom for foreign currency, and Jordan's contribution to Unesco was frequently criticized in the Parliament of Jordan as being excessive. He very much doubted whether his Government would agree to pay a larger one.
(63) It was not fair to class Jordan with other countries which were richer and could better afford the minimum contribution.

(64) Mr. HARPER-SMITH (Comptroller) said that there was no minimum in the Unesco scale. The figure of 0.04% had been arrived at by converting the lowest United Nations figures into the Unesco scale in the same way as had been done for all the other Member States. The coefficient applied did not affect the smaller percentages as it did the larger ones.

(65) Mr. RIANO JAUMA (Cuba) was opposed to any increase in the scale of contributions, and supported the proposed adjustment, not only with regard to the United States of America but also with regard to other members which, like Cuba, were already contributing large sums.

(66) Mr. AMMOUN (Lebanon) asked whether the minimum rate of 0.04 per cent was at that time applied or whether it was simply a recommendation; whether, in other words, the percentage for certain countries was likely to be higher than the theoretical percentage obtained by calculation.

(67) Mr. HARPER-SMITH (Comptroller) referred the Commission to paragraph (b) on page 1 of the report. There was no fixed minimum percentage, although the Committee on Contributions had recommended that, for 1955-56, the minimum Unesco contribution should be reached by converting the minimum percentage (United Nations scale) into the Unesco scale.
(68) The first column in document 8C/DIV/83 showed the percentages in the United Nations scale for 1955. Column 3 showed the United Nations scale adjusted for per capita income. The figures in Column 3 had then been added to give a total of 111.06%, and in Column 4 had been converted into the Unesco scale (100%) by a process of simple mathematics. The coefficient applied to the figure 0.04% in Column 3 had not been sufficient to bring it down to 0.03%. He would repeat that the figure of 0.04% was not a fixed minimum; it had merely been arrived at by calculation.

(69) Mr. BRICHET (France) thought the suggestion made by the United Kingdom delegate extremely dangerous, for it was likely to jeopardize any increase in Unesco's budget.
(70) As he had already said in the Programme and Budget Commission, it would not be fair if the United States of America were the only country not to benefit from the general reduction made possible by the admission of new Member States.
(71) The French delegation's argument, however, was based on considerations peculiar to Unesco, and it should not be used as a precedent for the fixing of scales of contributions in other Specialized Agencies.
(72) Hence, the French delegation could not accept the USSR delegation's argument concerning parity with the International Labour Office.
(73) In conclusion, Mr. Brichet said that he would reject the motion submitted by the United Kingdom delegate and would approve the draft resolution contained in document 8C/ADM/31.

(74) Mr. BARRIOS (Nicaragua) remarked that, since the main issue to be considered was the life of Unesco itself, it would be best to maintain contributions at the present level, and to use the resources brought in by new Member States in order to strengthen the technical assistance activities.

(75) Mr. PRATT (Australia) said that there was already a great disparity between 48% and 33.33% and there was no justification for a further reduction

to 30% in the United States contribution. The proposal, if accepted, might well open the way for further requests for reductions at a later date.

(76) Mr. SALIM (Hashemite Kingdom of Jordan) said that, in estimating minimum contributions, the United Nations had not made use of any reliable survey of the national income in countries not members of the United Nations. He did not see why the Committee on Contributions had not carried its calculations to three places of decimals, which would have been fairer to the countries at the bottom of the scale.

(77) Mr. ARTHUR (United Kingdom) said that only the accession to Unesco of countries not already members of the United Nations might conceivably be used as an argument to justify a reduction in the United States contribution. That point, however, had been made by nobody.
(78) The Soviet proposal for a reduction in the contributions paid by the USSR and the Byelorussian and Ukrainian SSRs had at least invoked the principles adopted by the United Nations Committee on Contributions, namely, dislocation due to war, ability to pay, etc. He could not agree that his delegation was guilty of any inconsistency in opposing the Soviet proposal while at the same time opposing any reduction in the United States proposal.
(79) He sympathized with the difficulties experienced by the United States of America in securing funds for its contribution to Unesco. But if the United States of America were allowed to reduce its contribution other Member States might follow suit and say that they too, could agree to a higher budget if they were not required to pay more themselves.

(80) The United Kingdom amendment to paragraph 2, for the addition of the words "The United States contribution shall be fixed at 33.33%" was put to the vote and rejected by 34 votes to 15, with 2 abstentions.

(81) The CHAIRMAN said that any motion in connexion with minimum rates of contribution could appropriately be submitted.

(82) Mr. HAGUIWARA (Japan), referring to the passage in the report of the Committee on Contributions dealing with the Chinese Government's request for its contribution to be reduced to $14,000 a year, asked whether the Committee, when it had decided to defer examination of that question until the ninth session, had at least received an assurance of part payment.
(83) He also wished to know in which category of receipts that reduced contribution would be included.

(84) Mr. HARPER-SMITH (Comptroller) confirmed that the Chinese delegation had offered to pay a token contribution of $14,000 a year. Under the Financial Regulations, any payment from a Member State had to be to pay off the amount owed to the Working Capital Fund. That had been done with the $14,000 received for 1954.

(85) Mr. HAGUIWARA (Japan) reminded the Commission of the difficulties experienced in previous years owing to the considerable difference between the theoretical budget and the real budget of the Organization.
(86) Since it was expected that all the Member States except China would pay their contributions in full for the financial period 1955-56, the budget would be greatly simplified if it included the exact sum China could pay, and not its theoretical contribution.
(87) Mr. Haguiwara accordingly submitted a motion, in the form of an addition to paragraph 2 of the draft resolution, which read: "The contribution by China for 1955-56 shall be 0.16 per cent without prejudice to any decision that may be taken by the ninth session of the General Conference."

(88) The CHAIRMAN asked whether there were any seconders for that motion.

(89) Mr. BAUGNIET (Belgium), Mr. BERREDO CARNEIRO (Brazil), and Mr. SCOTT (United States of America) supported the motion.

(90) It was decided to resume discussion at the afternoon meeting.

The meeting rose at 1 p.m.

# TENTH MEETING

*20 November 1954 at 3 p.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.4.4 OF REVISED AGENDA: CONTRIBUTIONS: SCALE, CURRENCY AND COLLECTION OF CONTRIBUTIONS OF MEMBER STATES (documents 8C/ADM/31 and 8C/ADM/32) (continued)**

(1) The Committee continued its examination of the second interim report of the Committee on Contributions (document 8C/ADM/31).

(2) The CHAIRMAN read out the proposed amendment by the delegate of Japan to paragraph 2 of the resolution (English text p. 5 of the document), which had been submitted at the previous meeting:

"The contribution of China for the period 1955-56 shall be 0.16% without prejudice to any decision which may be taken by the ninth session of the General Conference."

(3) Mr. SCOTT (United States of America) supported the proposed amendment on the grounds that it would provide more money for the Organization. Although the reduction of China's contribution would mean a corresponding increase in the contributions of other members, Unesco would be given its anticipated working budget.

(4) Mr. EL-ZAYAT (Egypt) pointed out that the Financial Regulations would require that any contributions from China should be set against the advance from the Working Capital Fund, and at the rate of $14,000 it would take more than two hundred years to write off China's debt. If the Commission was going to recommend that China's arrears should be written off or frozen, it must be prepared to face requests for similar action in respect of other Member States.

(5) Mr. SANDOVAL VALLARTA (Mexico) said that the force of the proposal by the Committee on Contributions lay in the fact that it followed the same principle in assessing the contributions of all countries. He did not see why China should not be assessed on the basis of what it could pay.

(6) Mr. ARTHUR (United Kingdom) opposed the Japanese delegate's amendment. The Commission had already taken a decision to assess Member States on the basis of the United Nations scale, and it had been pointed out that it was not possible to take into account the ability of individual members to pay their contributions. He did not understand the argument of the United States delegate, since one member's contribution could be reduced only at the expense of other members.

(7) Mr. HU CHING YU (China) said that, as he understood it, the new assessment for China proposed by the Japanese delegate was a temporary measure and subject to review by the ninth session of the General Conference, the percentage of 0.16% representing the sum that the Chinese Government proposed to pay Unesco annually until it was in a position to meet its obligations in full. Its adoption would not therefore solve the problem facing the Commission. The Chinese Government had made two proposals to Unesco: one, that China's contribution should be reassessed and reduced to a figure not exceeding $14,000; the other, that payment of arrears should be subject to negotiation when China's financial position had improved. The Japanese delegate's amendment only dealt with the first.

(8) Nevertheless, if the Commission was prepared to adopt the resolution in order to give the Organization a more satisfactory budget, the Chinese delegation, although not benefiting by the proposal, would support it, in the wish to be co-operative.

(9) Mr. WIECHECKI (Poland) wanted to know if the proposal under consideration implied increasing the amount in dollars of each Member States's contribution or reducing the budget as a whole. The Polish delegation had already drawn the Conference's attention to the absurd fiction upon which China's representation rested. It could hardly approve a proposal that would result in the other States having to bear the financial consequences of that fiction.

(10) Mr. BERREDO CARNEIRO (Brazil) admitted that for several years the payments made by China had not corresponded with that country's quota. The General Conference had recognized the principle of token contributions in China's case. On the other hand, he did not think it would be possible to change China's United Nations quota.

(11) Nevertheless, he favoured the Japanese delegation's proposal. It seemed to him preferable to take some practical step rather than to make two calculations, one based on China's normal quota, one on the token contribution of $14,000 paid into the Working Capital Fund. The Japanese delegation's proposal would mean that that sum would be included in the normal budget, it being understood that it was only a token payment. China's unpaid contributions were another matter and had nothing to do with that proposal.

(12) Mr. POHL (Union of South Africa) said that there was a divergence of opinion on the implications of the amendment. He asked if the Secretariat could explain its effect on the contributions of other Member States.

(13) Mr. HARPER-SMITH (Comptroller) explained that a reduction in the percentage of China would cause a corresponding increase in the percentage of other members. In the case of the Union of South Africa, for example, the assessment would rise to 0.74%.

(14) Mr. SOLDATOV (Union of Soviet Socialist Republics) reiterated the view of the Soviet delegation, stated in the Credentials Committee, the Committee on Contributions, and the plenary meetings, that the Chinese delegation did not represent China. He accordingly opposed the amendment.

(15) Mr. THA HLA (Union of Burma) considered that the Japanese delegate's proposal concerning a country which had defaulted for many years would impose an unfair burden on other members. He therefore opposed the amendment.

(16) Mr. PRATT (Australia) also opposed it, because it was in direct contradiction to the procedure which the Commission had, after much discussion, agreed to adopt.

(17) Mr. ATTAGARA (Thailand) supported the amendment, provided it would not prejudice China's position in Unesco. It would be better, as the United States delegate had suggested, to maintain the budget ceiling of $18,000,000 and calculate on the contributions which the Organization was certain to receive, even though the percentages for other members than China would be increased.

(18) Mr. FORSYTH (New Zealand) opposed the amendment for the reason stated by the Australian delegate, namely that it had already been agreed to recommend assessment of China on the basis of the United Nations scale. However, he would favour consideration of how China might be given voting rights without paying her full contribution.

(19) Mr. DE HOOG (Netherlands) reminded the Commission that it had been decided to bring the United States contribution down to 30 per cent. Could the proposal under consideration affect the decision made at the morning meeting? Mr. de Hoog also wanted to know what the Netherlands' percentage would be if the proposal were adopted.

(20) Mr. HARPER-SMITH (Comptroller) said that the United States assessment would vary according to the assessment adopted for China, probably by about one per cent.

(21) In reply to the second question, if the Japanese amendment were adopted, the Netherlands quota would be 1.19% instead of 1.13%.

(22) Dr. MUDALIAR (India) appreciated the reasons for the Japanese proposal, but said that there were more important considerations to be taken into account. The proposal to reduce China's assessment to 0.16% raised the question how far it was possible for an unrealistic scale to be maintained without interference with the general principles adopted in laying down Unesco's scale of contributions. As the delegate of Egypt had pointed out, if Unesco accepted a change in the scale of assessment for one country, it could not refuse to do so for others. In an organization like Unesco, it was essential to keep to principles and he therefore opposed the amendment.

(23) In reply to the previous speakers, Mr. HAGUIWARA (Japan) drew attention to the data given in document 8C/DIV/93. On the basis of a percentage of 5.06 and a total budget of $18,000,000, China's contribution would be $910,800. But, as things were known to be, that sum would not be paid, and Unesco's budget would be brought down to $17,089,200.

(24) The Japanese delegation's proposal would change China's percentage, and consequently those of the other Member States. But the Japanese delegation thought that the real budget total ($17,089,200) should be taken as a basis of calculations, not the fictitious figure of $18,000,000. In that case, although the other Member States' percentages would be slightly raised, their actual contributions in dollars would be exactly the same, and the Organization would have the same budget as it had under the existing scheme.

(25) On the other hand, the Programme Commission might decide to adopt the higher budget ceiling. But the United States delegation had stated that its country could not pay more than it was paying already, i.e. $6,000,000 for the two years. The higher budget ceiling was approximately $21,000,000. If the United States percentage had to be 30, and if their contribution could not exceed $6,000,000 it would be impossible to take a total of more than $20,000,000 as a basis for calculations. From that sum, $1,000,000 representing China's contribution at the existing rate, would have to be deducted. That would leave a real budget of $19,000,000. It was on that basis that contributions should be calculated, at the percentages altered to take account of China's new coefficient. The Japanese delegation's proposal would therefore give the same results as would be obtained by the existing scale if applied to a total of $21,000,000.

(26) Accordingly, Mr. Haguiwara considered that, after the decisions that had been taken that morning, it would be best not to use the fictitious quota of 5.06 per cent for China. He admitted that his delegation's proposal entailed changing the percentages but he emphasized that the actual contributions depended on the budget ceiling decided on - as he had just shown. Moreover, that proposal was intended only to make budget and contributions easier to calculate, without prejudice to China's legal status.

(27) Mr. DE HOOG (Netherlands) found Mr. Haguiwara's explanations very valuable, and said he would be glad to have them confirmed by the Chairman and the Director-General's representative.

(28) Mr. HARPER-SMITH (Comptroller) explained that, if the contribution scale in document 8C/DIV/93 were adopted and the budget fixed at $18,000,000, the non-receipt of China's contribution of $910,000 would reduce the amount for spending to $17,000,000. If, on the other hand, China's contribution were reduced to 0.16% and credited to the current budget instead of against arrears, the percentage for other members would increase, but the spending budget would still be $18,000,000.
(29) Confirming a clarification by the delegate of Japan, if a ceiling of $17,000,000 were adopted, the percentages of contributions would remain more or less the same as in document 8C/DIV/93.

(30) The CHAIRMAN put the Japanese amendment to the vote and, the results being even, proposed a vote by roll-call in accordance with the provisions of Rule 84 of the Rules of Procedure.

(31) Mr. VILLALON GALDAMES (Chile) said that, as the result of the vote was not in doubt, but showed an equally divided vote, Rule 90, and not Rule 84, should be applied.

(32) In reply to the Pakistani delegate, who proposed an adjournment for consultation, the CHAIRMAN stated that, as a vote had been taken, the Commission must act in accordance with either Rule 90 or Rule 84 of the Rules of Procedure.

(33) Mr. VILLALON GALDAMES (Chile) pointed out that, if there had been any doubt, the officers of the Commission would have said so; as they did not, action must follow Rule 90.

(34) A vote was then taken by roll-call and the results were as follows:
Voted for: Argentina, Belgium, Brazil, Cuba, Dominican Republic, France, German Federal Republic, Guatemala, Haiti, Japan, Korea, Lebanon, Netherlands, Nicaragua, Thailand, United States of America, Yugoslavia.
Voted against: Australia, Burma (Union of), Byelorussian SSR, Canada, Ceylon, Chile, Denmark, Egypt, India, Iraq, New Zealand, Pakistan, Sweden, Ukrainian SSR, Union of South Africa, USSR, United Kingdom.
Abstentions: Austria, Italy, Mexico, Spain, Switzerland, Uruguay.
Absent: Afghanistan, Cambodia, Colombia, Costa Rica, Ecuador, Greece, Honduras, Indonesia, Iran, Israel, Jordan (Hashemite Kingdom of), Laos, Liberia, Libya, Luxembourg, Monaco, Nepal, Norway, Panama, Peru, Philippines, El Salvador, Saudi-Arabia, Syria, Turkey, Venezuela, Viet-Nam.

(35) As the voting was 17 in favour, 17 against, with 6 abstentions and 27 delegations absent, the CHAIRMAN ruled that, in accordance with Rule 90 of the Rules of Procedure, a second vote would be taken in the course of the next meeting of the Commission.

(36) On behalf of the delegate of the Hashemite Kingdom of Jordan, who was unable to be present, Mr. AL-HANI (Iraq) moved the following proposal:
"That the scale of contributions be calculated to the third decimal figure instead of the second decimal figure."

(37) The proposal was seconded by the delegate of Egypt.

(38) In reply to a question from the delegate of New Zealand, Mr. HARPER-SMITH (Comptroller) said that the effect of the proposal would be to reduce the percentage for the Hashemite Kingdom of Jordan from 0.04% to 0.036%, which, on a budget of $18,000,000, would represent an amount of $6,480 instead of $7,200; a reduction of $720 for the two years or $360 for each year.
(39) He pointed out, however, that such a basis of calculation would have an adverse effect in the case of certain countries, as one country could only benefit at the expense of another.

(40) Mr. HAGUIWARA (Japan) did not think that the proposal would make much difference to the country concerned. The United Nations figure was already a round one, but it would be preferable to adopt a minimum scale of 0.035 per cent, while taking the other figures to two decimal places only.

(41) Mr. HARPER-SMITH (Comptroller) said that in that case the total scale would not reach 100%, since twelve countries were involved. The change could only be made in respect of all members.

(42) The proposal of the delegate of Jordan was put to the vote and rejected by 13 votes to 7 with 14 abstentions.

(43) The Commission passed on to paragraph 3.

(44) In reply to a question from the delegate of Japan, Mr. HARPER-SMITH (Comptroller) said that adoption of the theoretical percentages in the United Nations scale would not prejudice his proposal concerning China's contribution. The calculations for the Unesco scale would be affected, but, as could be seen from document 8C/DIV/93, the United Nations percentages were necessary as the basis of calculation for the Unesco scale.

(45) Mr. HAGUIWARA (Japan) reminded the Commission that at the seventh session of the General Conference the Committee on Contributions had inserted the following clause in its report:
"In view of the consultations which had been undertaken by the United Nations but not yet completed in connexion with these theoretical probable percentages, it was agreed that in those cases where the Director-General is notified prior to 1 January 1953 of a change in these percentages, such changes will be taken into account in computing the Unesco scale for 1953 and 1954." (7C/Resolutions, page 85, paragraph V. (d)).
(46) Mr. Haguiwara wanted to know whether the consultations between the appropriate United Nations body and non-Member States were over. If not, he thought that a provision similar to the one adopted at the

seventh session should be included in the Conference's resolutions.

(47) Mr. STERNBERGER (Chairman of the Committee on Contributions) said that the report of the United Nations Committee on Contributions stated that the rates of contribution for Unesco members who were not members of the United Nations were subject to consultation with the respective governments. The subject had been included in the agenda of the Administrative Commission, because no information had yet been received on the progress of such consultations.

(48) The proposal of the delegate of Japan, seconded by the delegate of Ceylon, was adopted.

(49) Paragraph 3 was approved.

(50) The Commission went on to examine paragraph 4.

(51) Mr. ARTHUR (United Kingdom) asked whether the reduction of the United States contribution from 33.33% to 30% would affect the per capita limitations.

(52) Mr. HARPER-SMITH (Comptroller) said that the figures in paragraph 4 were correct in accordance with the new United States percentage.

(53) Mr. HAGUIWARA (Japan) asked whether the figures would be affected by the fact that the United States percentage would be 31% instead of 30% as a result of the deletion of the Chinese contribution.

(54) Mr. HARPER-SMITH (Comptroller) said that it would be difficult to reply definitely, but he thought there would be no alteration, because the contributions of other Member States would be increased at the same time.

(55) Paragraph 4 was approved.

(56) Paragraphs 5, 6 and 7 were approved without comment and the Commission passed on to paragraph 8.

(57) Mr. POHL (Union of South Africa) had no objection to the proportion of 60% of the minimum percentage assessment proposed for Associate Members but disapproved of their contributions being accounted for as Miscellaneous Income. Associate Members were a new feature of Unesco, and in breaking new ground it was important to start off with the right procedure, even if the initial sums involved were small. He proposed that paragraph 8 should be amended by deleting the last five words and substituting: "included for the purpose of calculating the scale of contributions for Member States".

(58) The proposal was seconded by the delegate of Belgium.

(59) Mr. SANDOVAL VALLARTA (Mexico) asked for an explanation of paragraph 8, in which the minimum contribution of Associate Members was laid down as 60% of that of Member States.

(60) Mr. HARPER-SMITH (Comptroller) said that it was not possible to work out what 60% of the minimum percentage of 0.04 would be until the Unesco scales had been calculated on the basis of the United Nations scale. For that reason the last Conference had decided to exclude them from the scale.

(61) Mr. HAGUIWARA (Japan) reminded the Commission that the question of Associate Members would have to be examined again when another document included on the Commission's agenda was discussed. Could the decision they were about to make prejudice that discussion?

(62) Mr. Haguiwara also wanted to know whether adoption of the South African proposal would mean that Associate Members' assessments would be reduced to the basic percentage before the balance was distributed amongst the Member States.

(63) Mr. HARPER-SMITH (Comptroller) proposed that discussion be postponed until the legal implications had been investigated.

(64) Mr. POHL (Union of South Africa) did not consider that the legal status of Associate Members could be affected by the way in which their contributions were dealt with.

(65) Mr. ARTHUR (United Kingdom) agreed with the South African delegate. As to the financial implications, it would have to be borne in mind that, if the contributions were placed in Miscellaneous Income pending calculation, they would not be made use of until the succeeding financial period; and that, if they were fitted into the Unesco scale, they would cause a slight reduction in the figures which had been approved for full Member States. The amount involved, however, was so small that there would be little difference either way.

(66) Mr. HARPER-SMITH (Comptroller) pointed out that, even if the contributions were placed under Miscellaneous Income, they would be used in the current financial period, since allowance was made for them in the budget.

(67) The proposal of the South African delegate was put to the vote and rejected by 18 votes to 10 with 5 abstentions.

(68) Paragraph 8 was approved.

(69) Mr. CHEN YUAN (China), observing that there was no reference in the report of the Contributions Committee to the statement by his delegation on China's right to vote, wanted to know when that question would be discussed by the Commission.

(70) Mr. STERNBERGER (Chairman of the Committee on Contributions) replied that the Committee had decided not to deal with the question of the right to vote. In reply to a question from the CHAIRMAN, the reference in the First Progress Report of the

Contributions Committee concerned the possibility of that Committee pronouncing on certain financial conditions on which the right to vote might depend.

(71) After some discussion, in which it was explained by the representative of the Secretariat that the question of China's right to vote was a matter relating to Unesco's Constitution and could only be dealt with by the full Commission and the Plenary Conference, Miss LAISE (United States of America) proposed that the question of the right to vote of all members whose rights were under consideration should be included in the agenda of the next meeting of the Commission.

(72) Mr. SOLDATOV (Union of Soviet Socialist Republics), referring to his previous statement, said that the Soviet delegation did not recognize any lawful representative of China in Unesco. He asked if the States to which the United States delegate's proposal referred could be named, and a vote taken on each one separately.

(73) Miss LAISE (United States of America) amended her proposal as follows: "That the question of voting rights for China should be taken up on Monday morning."

(74) The proposal of the United States delegate was adopted by 28 votes to 3, with 2 abstentions.

(75) Mr. VILLALON GALDAMES (Chile) proposed that the Secretariat should obtain the necessary information and draw up a chart comparing the contributions made to Unesco by Member States and their respective national incomes and, if possible, another chart comparing the contributions with the currency availabilities of each State. For many countries, he feared, the payment of their contribution to Unesco meant doing without a new school, a hospital or a tractor.

(76) Mr. HARPER-SMITH (Comptroller) said that it had been stressed during past Conferences and in the present Contributions Committee that Unesco did not possess the machinery for examining the statistical data necessary to establish the capacity of a Member State to pay its contributions. The responsibility was left to the United Nations statistical office and every effort was made by Unesco to see that Member States knew where to submit their problems in that field. Several members had already availed themselves of the services of that office.

(77) Mr. VILLALON GALDAMES (Chile), explaining his proposal, said that, as Unesco had to be paid in hard currency, the currency availability of each Member State or, in other words, the dollars at its disposal, should be known.

(78) Miss LAISE (United States of America) asked whether the delegate of Chile could hold back his proposal until a further report had been received from the Contributions Committee, since the question of setting up a committee to deal with such problems was under discussion.

(79) It was agreed that the delegate of Chile should submit his proposal in writing to the Rapporteur of the Contributions Committee and refer it back to the Commission if he was dissatisfied with the action taken.

(80) The Commission next examined the Report of the Committee on Contributions on Methods of Financing the Budget (document 8C/ADM/32).

(81) Mr. BOW (Rapporteur of the Committee on Contributions) said that the Committee had considered how the budget for 1955-56 could be financed and had agreed that the two principal methods were: (1) in accordance with the Financial Regulations and (2) under special financing measures. It had decided to recommend the first method in principle but to point out that there would be a low assessment for 1955-56 compared with 1957-58 and to suggest that the Commission might wish to consider holding over all or part of the contributions received from new members in 1953-54, to avoid such exceptional fluctuations in contributions.

(82) Mr. ARTHUR (United Kingdom) moved that the budget be financed in accordance with the Financial Regulations in practice as well as in principle. The practice suggested by the Committee in paragraph 6 of the document would not benefit Member States in the long run, and in the view of the United Kingdom delegation the variation was not large enough to justify a departure from the Financial Regulations.

(83) The proposal of the United Kingdom delegate to delete the words "in principle" in the second line of paragraph 6 (page 3, English text) was seconded by the delegate of Australia and supported by the delegates of Belgium and Mexico.

(84) Mr. POHL (Union of South Africa) said that it was incumbent on the Organization to apply the Financial Regulations, which were the same for all Specialized Agencies and which had been drawn up for good reasons. The spreading over of contributions was less important than adherence to the Regulations and, moreover, involved two dangers: first, it might induce those framing the budget to exceed priorities; and, secondly, it might make Member States less concerned about paying their contributions.

(85) Mr. BERREDO CARNEIRO (Brazil) said that he had not had time to study the document in detail, for it had just been distributed. Nor did he know what the Committee on Contributions or the Advisory Committee on Programme and Budget had decided should be done with the contributions of States admitted during the financial years 1953-54. There were several possible courses:

To use those funds to finance 1954 expenditure.

To redistribute them amongst Member States.

To set up a special fund, to be put at the disposal of the Executive Board for unforeseen requirements.

(86) Mr. HARPER-SMITH (Comptroller) said that the contributions from new Member States for 1953-54, as set out in paragraph (b) on page 3 of the document, amounted to $1,228,216. If the recommendation of

the Contributions Committee were adopted, that sum, together with the other items in paragraph (b), would be deducted from the total budget estimates before calculating the assessments of Member States.

(87) Mr. BERREDO CARNEIRO (Brazil) wanted to know whether there were any provisions in the regulations for the use of those funds, or whether exceptional income could be used as was thought fit.

(88) Mr. HARPER-SMITH (Comptroller) quoted Financial Regulation 5.2, in accordance with which the sum in question, together with miscellaneous revenue, would be deducted from the budget appropriations for 1955-56.

(89) Mr. CARRERA MOLINA (Guatemala) proposed that the miscellaneous revenue and budget surpluses mentioned on page 3 of the document should be earmarked for financing technical aid and covering the expenses of technical experts attached to institutions within the technical aid programme.

(90) Mr. KOTSCHNIG (United States of America) asked whether, without prejudice to the proposal of the United Kingdom delegate, the Guatemalan delegate could recommend that for the time being the sum in question should be placed in a reserve fund, the purposes of which should be decided by the Contributions Committee in accordance with the Regulations, and might include, for example, repayment of the loan from the French Government for the new headquarters building.

(91) The CHAIRMAN said that the wording of the Guatemalan delegate's proposal referred to miscellaneous revenue and budget surpluses, but made no mention of contributions from new members.

(92) Mr. CARRERA MOLINA (Guatemala) accepted the suggestion of the United States delegate that the Contributions Committee should decide the purposes for which the funds in question should be used.

(93) Mr. BERREDO CARNEIRO (Brazil) said that he had had in mind a proposal similar to that of the Guatemalan delegate, which he was seconding, pending consideration by the Contributions Committee of possible uses of those funds other than their redistribution amongst the Member States.

(94) Mr. BRICHET (France) said that his delegation too was not in favour of redistributing funds amongst the Member States. It might be a good idea to set up a reserve fund for repayment of the loan made to Unesco for the building of its new headquarters.

(95) Mr. HAGUIWARA (Japan) emphasized that the last sentence of paragraph 6 indicated that many members of the Committee on Contributions had considered placing the whole or part of those $1,228,216 in a reserve fund. Moreover, it constituted exceptional revenue. As the main problem facing the current session of the Conference was the remodelling of the programme, and as the Executive Board had been in favour of stabilizing continuing activities and extending activities in Member States, it might be advisable to use those credits for strengthening that part of the programme.

(96) Mr. POHL (Union of South Africa) was doubtful whether the action being considered was not contravening the Financial Regulations, which gave specific instructions. It would be more correct to discuss the matter in connexion with a proposal to amend the Regulations.

(97) Mr. HARPER-SMITH (Comptroller) said that, while the statement made by the South African delegate was to the point, it had been the practice in the past two financial years for the Conference to make decisions which were contrary to the provisions of the Financial Regulations. The summary records of the seventh session of the Conference would show that it had done so to finance the budgets for 1952, 1953 and 1954.

(98) Mr. POHL (Union of South Africa) cited the legal axiom that the fact of having made a mistake once was no justification for doing so again.

(99) Mr. HARPER-SMITH (Comptroller) pointed out that the Financial Regulations were not part of Unesco's Constitution: they were drawn up by the Conference and could therefore be amended by it.

(100) Mr. BERREDO CARNEIRO (Brazil) explained that he was not thinking of any illegal step. It was because the Conference was entirely free to decide how funds would be used that he had taken the liberty of seconding that proposal.

(101) Mr. VILLALON GALDAMES (Chile) suggested that the Guatemalan delegate's proposal might be amended to include also the other item given on page 3 (Assessments on new Member States), in which case the total obtained would be $2,221,430.

(102) Mr. CARRERA MOLINA (Guatemala) accepted the suggestion of the delegate of Chile.

(103) Mr. BERREDO CARNEIRO (Brazil) supported the proposal of the delegate of Guatemala as amended by the delegate of Chile.

(104) Mr. GIUSTINIANI (Italy), while favouring the use of the funds to repay the debt to the French Government, pointed out that unforeseen needs might arise during the coming two years and that the final decision should therefore be left to the next General Conference.

(105) Mr. EL-ZAYAT (Egypt) supported the proposal for a special reserve fund and the reference of the question to the Committee on Contributions, to be studied in consultation with the Director-General. He hoped that the Committee would, in particular, examine ways of using the special fund to help Unesco in projects connected with technical aid during the coming two years.

(106) The CHAIRMAN pointed out that the Contributions Committee would have to report back to

the Commission since it had no direct contact with the General Conference.

(107) Mr. PRATT (Australia) asked whether the proposal of the Guatemalan delegate was an amendment to that of the United Kingdom delegate or a substantive proposal.

(108) Mr. ARTHUR (United Kingdom) said that the Commission had been asked to make recommendations to the Plenary Conference on the financing of the budget. The Guatemalan delegate's proposal appeared to be in direct opposition to that of the United Kingdom delegation, and the suggested submission to the Contributions Committee would delay presentation of recommendations to the Plenary Conference. He proposed that a decision should be taken immediately.

(109) Mr. MAHEU (Assistant Director-General) wondered how a special reserve fund could be set up without a specific object. Moreover, it was difficult to recommend that such a fund should be used for any particular project. Finally, the Committee on Contributions could hardly make recommendations on that subject - for which the Programme and Budget Commission was responsible. The proposal was vague, and serious doubts could be maintained as to the Contributions Committee's competence in the matter.

(110) It was finally decided, on a motion of Mr. FORSYTH (New Zealand), to adjourn the discussion until the following meeting.

The meeting rose at 7 p. m.

# ELEVENTH MEETING

*22 November 1954 at 10 a.m.*

*Chairman* Mr. BEEBY (New Zealand)

**TRIBUTE TO THE MEMORY OF Mr de THIBAULT (OF THE BELGIAN DELEGATION)**

(1) The CHAIRMAN said it was his painful duty to announce the sudden death, in tragic circumstances, of Mr. de Thibault, of the Belgian delegation.

(2) The Commission rose as a gesture of respect.

(3) Mr. BAUGNIET (Belgium) expressed his delegation's appreciation of the gesture.

**QUESTION RAISED BY THE ADVISORY COMMITTEE ON PROGRAMME AND BUDGET IN CONNEXION WITH THE DUTIES OF THE EXECUTIVE BOARD**

(4) The CHAIRMAN said that he had been asked by the Commission to refer to the Executive Board, through the General Committee, a question raised by the Advisory Committee about ways and means of reducing the burden on the Board. The General Committee had said that the Director-General had been asked to prepare a report on the matter, also that the question could more appropriately be referred to the new Board elected in accordance with the recently adopted amendments to Article V of the Constitution. The General Committee would take the necessary action to that end when the new Board was in being.

**ITEM 9.3 OF REVISED AGENDA LEGAL QUESTIONS** (document 8C/JUR/2: Second Report of the Legal Committee)

(5) Mr. BAUGNIET (Rapporteur of the Legal Committee) stated that, at its meeting of 19 November 1954, the Legal Committee had completed the drafting of amendments to Article V of the Constitution, and of the alterations in Rules 95, 95a and 98 of the Rules of Procedure of the General Conference which were necessary as a result of the new arrangements.
(6) The Committee had agreed that there was no contradiction or opposition between those Rules as amended and the Constitution or the Rules of Procedure, and had no comments to make from a substantive point of view.
(7) Regarding the wording, the Committee had merely collated the texts in the three languages, and had deleted the word "remodel" from paragraph C.13 of Article V.
(8) The Committee's Rapporteur then read out the texts in question in their new form.

(9) Mr. SANDOVAL VALLARTA (Mexico), on behalf of his delegation, proposed the adoption of the Legal Committee's report.

(10) Mr. AMMOUN (Lebanon) said that he did not consider the French word "portion" a particularly legal expression, and suggested replacing it by the word "durée".

(11) Mr. BAUGNIET (Rapporteur) explained that the word had been used because it occurred in the

original text. He saw no objection to replacing it by "durée".

(12) Mr. FERNANDEZ MORENO (Argentina) disagreed with the wording of paragraph 4, Article V of the Constitution, as given by the Legal Committee in its report (document 8C/JUR/2). That passage mentioned only two possible occasions when a substitute might be required for a member of the Executive Board: the event of death or resignation.
(13) Such provisions generally took into account the possibility of physical or legal inability to serve, but the texts submitted by the Legal Committee made no mention of those eventualities.

(14) Mr. BAUGNIET (Rapporteur) replied that that aspect of the question had not been overlooked by the Legal Committee.
(15) They had, however, come to the conclusion that they were not entitled to make substantive changes in the texts submitted to them, any more than it was for the Administrative Commission to propose amendments to the Constitution.
(16) Mr. Baugniet reminded the Commission that changes of the kind mentioned should take the form of a proposal to amend the statutes of the Organization, submitted with due notice.

(17) Mr. CARRERA MOLINA (Guatemala) agreed with the Argentine delegate.

(18) Mr. BUSTAMANTE (El Salvador), also signified his agreement.

(19) The CHAIRMAN said that, having considered the matter most carefully, he would have to rule that the change desired by the delegate of Argentina would be a change of substance requiring three months' prior notice and could not, therefore, be discussed at that session of the Conference. However, under Rule 106 of the Rules of Procedure, the Commission could always decide, by a two-thirds majority, that the proposal was one of form and not of substance.

(20) Mr. KOTSCHNIG (United States of America) said that the point was to some extent covered by Rule III, paragraph 11 (1) of the Rules of Procedure of the Executive Board.

(21) Mr. FERNANDEZ MORENO (Argentina) did not believe that the question was cleared up by the statement of the United States delegate. The United States delegate had quoted a clause which applied to temporary admittance to meetings, but not to a member unable to attend the Executive Board.
(22) In the view of the Argentine delegation, that change in the Constitution was one of form and not of substance and could therefore be considered forthwith.

(23) Mr. HAGUIWARA (Japan) thought that the wording of Article V, paragraph 3, which had been left unchanged, could be differently interpreted.
(24) He suggested that when its legal standing had been completely changed, the Executive Board with all its members newly elected could be considered a completely new body, having no link with the old one; and he asked whether, in that event, it would not be more logical to conclude that the bar on re-election only applied to consecutive terms of office after reorganization. Or he asked, should the view prevail that the old and the new Boards were in fact linked, merely in respect of paragraph 3? In that case, the members of the new Board could be considered re-eligible, by virtue of the fact that a member who had served on the old Board had done so in a personal capacity. In any case, it was desirable that the Commission should adopt an exact definition on the basis of a report by the Legal Committee.

(25) Mr. BAUGNIET (Rapporteur) thought that the purpose of paragraph 3 was to avoid a member's serving on the Board too long.
(26) It would therefore seem that neither the new method of nominating candidates nor the forthcoming general election should affect that interpretation.

(27) Mr. HAGUIWARA (Japan) wanted the question submitted to the Legal Committee in order that the Commission might receive its report, if possible before the Board held its elections and, in any case, not later than the close of the present session of the Conference.

(28) The amendments to Article V of the Constitution, as given in document 8C/JUR/2, were then approved as a whole by 45 votes to 6.

(29) Mr. MERMINOD (Switzerland) was surprised that a vote should have been taken on the whole of the amendments to Article V of the Constitution, before delegations had been given a further opportunity to express their views on such an important question.
(30) He recalled that the Belgian, French and Yugoslav delegations had already voiced their grave apprehensions at the increasingly political colour of the Organization.
(31) If members of the Executive Board were to be forced to choose between their responsibilities to their government and their responsibilities to Unesco, the result would be to confront them with a tragic conflict of loyalties.
(32) Mr. Merminod also pointed out that, with regard to the amendments to Article V of the Constitution, both sides, i.e., those who had voted in favour and those who had voted against, had acted in accordance with instructions from their governments. Did not that prove conclusively that the change was ill-advised?

(33) In accordance with the proposal by Mr. SANDOVAL VALLARTA (Mexico), seconded by Mr. FERNANDEZ MORENO (Argentina), the amendments to the Rules of Procedure for election of members of the Executive Board (document 8C/JUR/2, page 2) were then adopted.

**ITEM 9.4.4 OF THE REVISED AGENDA: CONTRIBUTIONS: SCALE, CURRENCY AND COLLECTION OF CONTRIBUTIONS OF MEMBER STATES.** (documents 8C/ADM/31 and 8C/ADM/32) (continued)

(34) The CHAIRMAN recalled that, at the last meeting, a Japanese amendment to paragraph 2 of the draft resolution on page 5 of document 8C/ADM/31 had been put to the vote, and that the result had been a tie. Under Rule 90 of the Rules of Procedure, there would have to be an immediate vote on the Japanese amendment and, unless there was a majority in favour, it would be considered rejected.

(35) Mr. JARAMILLO ARANGO (Colombia), seconded by Mr. VILLALON CALDAMES (Chile), proposed that discussion of the Japanese amendment be reopened.

(36) The Colombian motion was put to the vote and rejected by 42 votes to 4, with 2 abstentions.

(37) Mr. HAGUIWARA (Japan) regretted that the words "without prejudice to any decision that may be taken by the ninth session of the General Conference" had been omitted in the report by the Conference Journal and that Saturday morning's minutes had not yet been distributed.

(38) A vote by roll-call was held on the Japanese amendment to paragraph 2 of the draft resolution on the scale of contributions with the following results:

Voted against: Australia, Burma (Union of), Byelorussian Soviet Socialist Republic, Canada, Ceylon, Chile, Denmark, Egypt, India, Indonesia, Iran, Iraq, Israel, Libya, New Zealand, Norway, Pakistan, Saudi-Arabia, Sweden, Syria, Ukrainian Soviet Socialist Republic, Union of South Africa, Union of Soviet Socialist Republics, United Kingdom.

Voted for: Argentina, Belgium, Brazil, Cambodia, Colombia, Dominican Republic, France, German Federal Republic, Greece, Guatemala, Haiti, Italy, Japan, Korea, Laos, Liberia, Netherlands, Nicaragua, Philippines, Spain, United States of America, Yugoslavia.

Abstentions: Costa Rica, Hashemite Kingdom of Jordan, Mexico, El Salvador, Switzerland, Uruguay, Viet-Nam.

Absent: Afghanistan, Austria, Cuba, Ecuador, Honduras, Lebanon, Luxembourg, Monaco, Nepal, Panama, Peru, Thailand, Turkey, Venezuela.

(39) The Japanese amendment was thus rejected by 24 votes to 22, with 7 abstentions.

(40) Mr. PETROVIC (Yugoslavia) explained that his delegation had voted for the amendment for purely technical reasons: to facilitate the work of the Conference by making the budget simpler.

(41) Mr. SOLDATOV (Union of Soviet Socialist Republics) said that his delegation had already expressed its views on the resolution as a whole. If paragraph 2 were put to the vote separately, he would vote against.

(42) Paragraph 2 was put to the vote and adopted by 48 votes to 3, with 1 abstention.

(43) The draft resolution in document 8C/ADM/31, as a whole, was put to the vote and adopted by 47 votes to 3, with 2 abstentions.

(44) The Commission returned to the Report by the Committee on Contributions - Methods of financing the budget (document 8C/ADM/32).

(45) The CHAIRMAN recalled that the United Kingdom delegation had made a proposal that the budget for 1955-56 should be financed in accordance with the Financial Regulations. An amendment had been moved by the delegation of Guatemala, as follows: "The delegation of Guatemala moves that the sums derived from miscellaneous sources (budget surplus of former years, miscellaneous revenue, and the contributions of new members for 1953-54, in accordance with the recommendations made by the special committee of the Executive Board and the views expressed by delegations in the Budget Commission) should be used to finance the extraordinary projects proposed at this session in relation to technical aid in basic education and in the provision of reading material for people learning to read."

(46) Mr. CARRERA MOLINA (Guatemala), referring to the draft recommendation which had just been read out, pointed out that the proposed measure was an extraordinary one. He added that several countries had put forward specific recommendations dealing with technical aid, and that they should not be underestimated. His country took a great interest in technical aid and in the fundamental education programme.

(47) The CHAIRMAN said, that, after much reflection, he had come to the conclusion that the proposal by Guatemala could not be considered an amendment to the United Kingdom proposal, in the sense given to the word "amendment" in Rule 86, paragraph 4, of the Rules of Procedure, and would have to be considered as a new proposal. The United Kingdom proposal would therefore have to be put to the vote first. If it were decided to abide strictly by the Financial Regulations, the motion by Guatemala would lapse, and the United Kingdom proposal would be adopted. If it were decided otherwise, then the United Kingdom proposal would be rejected, and the way would be open for the delegate of Guatemala to submit his proposal.

(48) Mr. AMMOUN (Lebanon) wondered why a decision taken by the Commission on Rule 86 of the Rules of Procedure should affect the provisions of the Financial Regulations. Could the two motions not be discussed together as they stood? If not, the Guatemalan delegation should be given time to draft a text which would meet all requirements.

(49) Mr. PHOTIADES (Greece) wished to know the order of priority of the two motions.

(50) The CHAIRMAN replied that the Rules of

Procedure which he had to observe only concerned the order in which voting should take place. The rule dealing with amendments to proposed amendments did not apply in the present instance, as the Guatemalan motion was not of that kind.

(51) Miss LAISE (United States of America) said that it was not for the Commission to decide for what purposes funds should be used. In so far as it made definite proposals for the use of funds, the proposal by Guatemala was out of order.
(52) The United Kingdom was proposing that, in accordance with the Financial Regulations (see document 8C/ADM/32, page 1), two sources of income, namely, miscellaneous revenue for 1955-56 and contributions assessed on Member States for 1953-54, should be used to finance the budget. The proposal by Guatemala, if she understood it right, was to the effect that three sources of income (the budget surplus of former years, miscellaneous revenue, and the contributions of new members for 1953-54) should be used. Thus there was a sense in which the proposal by Guatemala could be considered an amendment to the United Kingdom proposal.

(53) Mr. ARTHUR (United Kingdom) said that the United Kingdom was proposing that the three sources of income mentioned by the previous speaker should be used as laid down in the Financial Regulations. The Commission might be reluctant to decide that all those three sources of income should be so used, therefore he would be prepared to frame his proposal in a form which would make it possible to suggest amendments without rejecting the proposal outright, i.e. he would propose that the budget be financed in accordance with the Financial Regulations, paragraphs 4.3, 4.4, and 5.2.
(54) Since the delegate of Guatemala was proposing that funds should be used for purposes none of which were in accordance with the Financial Regulations, the proposal by Guatemala could only be considered as a direct negation of the United Kingdom motion.

(55) Mr. POHL (Union of South Africa) said that the proposal by Guatemala entailed the ear-marking of funds for certain specific purposes. It was difficult for the Commission to discuss the proposal without also discussing the financing of the whole programme.

(56) The CHAIRMAN agreed that the Commission was not called upon to decide how money should be spent. That was for the Programme and Budget Commission. He would therefore suggest that the delegate of Guatemala should amend his proposal in such a way as to make no reference to how money should be spent. Otherwise it would be out of order.

(57) Mr. FRAGA IRIBARNE (Spain) announced that his delegation intended to move that from then on no decision taken by the General Conference would be valid if it were opposed to the Financial Regulations and that, in order to modify or suspend them, the approval of at least two-thirds of its members would be required.

(58) The reason for his proposal was that, in his opinion, the Financial Regulations had been repeatedly violated at recent meetings.

(59) Mr. ARTHUR (United Kingdom) thought that it would be better for the Commission to vote on a straightforward issue - whether the budget should be financed in accordance with the Financial Regulations or not. The proposal by Guatemala was, he felt, a direct negation of his own.

(60) Mr. BERREDO CARNEIRO (Brazil) thought that, as it stood, the Guatemalan proposal raised too many technical difficulties.
(61) It was impossible not to follow the Financial Regulations with regard to "miscellaneous revenue" and "budget surpluses from former years".
(62) On the other hand, an exception could be made in the case of the contributions of new members, provided that the use to which such sums were put were of value to them, e.g. to finance the publications of Unesco in their respective languages.
(63) Any surplus could be used by the Director-General, without touching the 1955-56 budget, for other expenditure in connexion with fundamental education.

(64) Mr. HUZAYIN (Egypt) would, in principle, support the proposal by Guatemala and considered that a valuable purpose would be served if the Director-General were allowed to establish a special reserve fund for extraordinary projects, such as the question of making Unesco publications available to the newer countries, or in connexion with basic human rights, such as the right to a basic education. The Conference might decide what those extraordinary projects should be, or it might delegate special powers to the Director-General and Executive Board.

(65) Mr. LOISEAU (Haiti) recalled that, at a recent meeting of the Commission, the Guatemalan delegate had proposed that such funds should be added to the technical aid budget, whereas the United States delegate had suggested using them to repay the debt owed to the French Government.
(66) Mr. Loiseau thought that that one source - the contributions of new members - might be used for both purposes, in equal proportions, and that it was for the Administrative Commission to decide.

(67) Mr. PHOTIADES (Greece), thought that, on the contrary, to do so would be to encroach on the preserve of the Advisory Committee on Programme and Budget.
(68) He asked the Chairman to state, in the case in question, what it was in order for the Administrative Commission to discuss.

(69) Mr. CARRERA MOLINA (Guatemala) agreed that the discussion of the special purposes for which funds should be used was a matter for the Programme and Budget Commission, and he therefore suggested a short recess during which he could amend his proposal accordingly.

(70) The CHAIRMAN said that the Chairman of the

Committee on Contributions wanted the Commission to give a ruling on the question of the rights of States in arrears with their payments, but it was not quite ready to do so.

(71) Mr. SOLDATOV (Union of Soviet Socialist Republics) wanted the Commission to decide forthwith on the voting rights of Poland, Hungary and Czechoslovakia.

(72) Mr. KOTSCHNIG (United States of America) said that consideration of the voting rights of China appeared on the agenda of the meeting and should therefore be considered at once.

(73) Mr. AMMOUN (Lebanon) proposed that the voting rights of all four countries should be dealt with.

(74) Mr. HAGUIWARA (Japan) proposed that the voting rights of China should be considered there and then, and those of the other three countries at the afternoon meeting.

(75) Finally, a motion by Mr. SOLDATOV (Union of Soviet Socialist Republics) for immediate adjournment and continuation of the discussion on voting rights at the afternoon meeting was put to the vote.

(76) The motion was adopted by 33 votes to 10, with 5 abstentions.

The meeting rose at 1.10 p.m.

# TWELFTH MEETING

*22 November 1954 at 3 p.m.*

*Chairman* Mr. BEEBY (New Zealand)

**VOTING RIGHTS OF CHINA**

(1) Opening the meeting, the CHAIRMAN announced that the Commission had two items to consider: (1) the voting rights of China, and (2) the report of the Committee on Contributions on the voting rights of Poland, Czechoslovakia and Hungary. The Chairman of the Committee on Contributions had expressed the view that it would be unwise for the Commission to discuss the second point until members had the written report before them. The item would accordingly be deferred until the report was available.

(2) Miss POLICARPIO (Philippines) pointed out that the arrears in the payment of China's contribution were due to circumstances beyond that country's control, and the fact that it had made a token payment of $14,000 was proof of a sincere desire on China's part to co-operate in the execution of Unesco's programme. She therefore moved the following resolution:

"The Administrative Commission recommends to the General Conference that it decide to permit China to vote during the eighth session of the General Conference of Unesco in accordance with paragraph 8 (c) of Article IV of the Constitution."

(3) The motion was seconded by Mr. HAGUIWARA (Japan).

(4) Mr. HU CHING-YU (China) observed that while, under paragraph 8 (b) of Article IV of the Constitution, China was undoubtedly debarred from voting at the eighth session of the General Conference, the Conference could have recourse to the remedy provided in paragraph 8 (c) of the same Article. It was on the strength of that provision that China had been permitted to vote at the sixth and seventh sessions of the General Conference. Unfortunately China's financial situation had not improved since 1952, and the Chinese delegation again requested the Administrative Commission to recommend to the General Conference that it permit China to vote during the eighth session, on the grounds that failure to pay was due to circumstances beyond that country's control.

(5) Mr. SOLDATOV (Union of Soviet Socialist Republics) recalled that it had been stated several times by several delegations that no representatives with authority to vote for China were present at the Conference. A decision in the sense advocated by the delegation of the Philippines would therefore be incorrect and would not further the cause of better understanding and real co-operation between States for the fulfilment of the high principles proclaimed in Unesco's Constitution. On those grounds the delegation of the Union of Soviet Socialist Republics would vote against the motion of the delegation of the Philippines.

(6) Mr. KOTSCHNIG (United States of America) recalled that the motion to reduce China's contribution temporarily during 1955-56 had been defeated that morning by a very narrow margin of 24 votes to 22; that vote showed that a large proportion of the Conference felt that China should

be given every opportunity to participate actively in Unesco's programme. To enable China to do so, however, the Conference must decide either to reduce that country's contribution temporarily or to make full use of the clause in paragraph 8 (c) of Article IV of the Constitution. Mr. Kotschnig very much hoped that an overwhelming majority would show itself in favour of the second solution. The United States delegation accordingly seconded the motion of the delegation of the Philippines.

(7) The motion of the delegation of the Philippines was adopted by 28 votes to 12, with 2 abstentions.

(8) The CHAIRMAN stated that the report of the Contributions Committee on the voting rights of Poland, Czechoslovakia and Hungary would be included in the agenda for the following morning.

The meeting rose at 3.30 p.m.

# THIRTEENTH MEETING

*23 November 1954 at 10.15 a.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.4.4 OF REVISED AGENDA: CONTRIBUTIONS SCALE, CURRENCY AND COLLECTION OF CONTRIBUTIONS OF MEMBER STATES** (documents 8C/ADM/30 Add.1 and 8C/ADM/32) (continued)

(1) Mr. STERNBERGER (Chairman of the Committee on Contributions), introducing the addendum, said that his Committee had been called upon to decide how the arrears of three countries (Poland, Hungary and Czechoslovakia), which had withdrawn from Unesco and had recently declared their readiness to co-operate once more with it, could best be paid.
(2) In the initial stages of its deliberations, the Committee had been faced with letters from those three countries claiming more or less full cancellation of their arrears. The Committee had declined to accept that, but all concerned had been prepared for further negotiation. The resolutions now before the Commission represented the fruit of ten days' arduous deliberation.
(3) Although negotiations necessarily had to cover a wide field, the Committee had not been empowered to decide that the three countries should be granted the right to vote. Thence the onus of advising the General Conference to adopt the last paragraph of each resolution (on that point) lay on the Administrative Commission itself.
(4) It had been agreed in the Committee that the three countries should pay by instalments over varying periods.
(5) The three countries had claimed that they had not been members of Unesco during 1953. That was a legal point which the Committee had not felt competent to decide. Accordingly, in the case of two of those countries, it had merely considered the question of contributions due for the years before 1953, so that the resolutions relative to Poland and Czechoslovakia covered the period up to 1952 inclusive. Hungary, however, had expressed willingness to pay arrears incurred up to and including 1953.
(6) All three countries had wished to be allowed to make their payments in their national currencies (see I (ii) in each resolution).
(7) An important point was that in I (iii) of the resolutions, the Director-General was asked to report on the implementation thereof.

(8) Dr. MUDALIAR (India) expressed his appreciation of the work done by the Committee and, seconded by Mr. SOLDATOV (Union of Soviet Socialist Republics), moved adoption of the resolution relative to Czechoslovakia, including the last paragraph, recommending that Czechoslovakia should enjoy full voting rights at the eighth session of the General Conference.

(9) The DIRECTOR-GENERAL suggested that it would be wise to amend the first line of i (iii) in each resolution to read: "instructs the Director-General to report to each ordinary session of the General Conference ...".

(10) Dr. MUDALIAR (India) and Mr. SOLDATOV (Union of Soviet Socialist Republics) accepted the amendment.

(11) In reply to an enquiry by Mr. ARTHUR (United Kingdom), Mr. VANECEK (Czechoslovakia) said that the Government of Czechoslovakia had authorized his delegation to accept the settlement.

(12) Mr. SZABO (Hungary) stated that, in the course of the discussions on the subject, his delegation had expressed its willingness to pay its arrears as assessed.

(13) Mr. MICHALOWSKI (Poland) said that his Government found the resolution relative to Poland acceptable. His intention was to announce that fact in the Plenary Conference and to write to the President of the Conference to that effect.

(14) Mr. KOTSCHNIG (United States of America) paid a warm tribute to the Committee on Contributions. He fully shared the general desire to regularize the position of the three countries. But the results of the Committee's negotiations had been less satisfactory than he had hoped.
(15) The period allowed for payment of the arrears was excessive - twice as long, in fact, as the period over which the debts had been incurred.
(16) In addition, too high a proportion of the arrears was to be paid in national currencies. Either much of the currencies so acquired by Unesco would prove to be unusable, or Unesco, in order to use the money, would be obliged to engage in programmes deviating from those proposed by the Director-General.
(17) The International Labour Organization (an organization with long experience in such matters), when faced with a similar problem in connexion with one of the three countries in question, had rejected the solution proposed.
(18) There were, however, certain redeeming features about the proposed settlement, especially the provision that the Director-General should report to each session of the General Conference on the progress made and on the extent to which he had been able to use the national currencies in question.
(19) For those reasons the United States delegation, not wishing to obstruct a settlement, but at the same time not being able to give its whole-hearted approval, would abstain in any vote on the draft resolutions.

(20) Mr. BERREDO CARNEIRO (Brazil) was gratified at the agreement reached between the Contributions Committee and the Hungarian, Polish and Czechoslovak delegations.
(21) He reminded the Commission that Unesco had from the very beginning shown a special interest in those three countries, and had set up a Committee for Cultural Reconstruction, of which he had been chairman.
(22) He was glad that purely practical considerations had yielded to others of a loftier character and thus opened the way for genuine collaboration.
(23) He was convinced that the small material drawbacks that might result were negligible by comparison with the great advantage of a friendly settlement accepted by both sides.

(24) Mr. HAGUIWARA (Japan) agreed with the Brazilian delegate's statement, and likewise expressed his pleasure at the settlement of that delicate question.
(25) The Japanese delegate then asked to have two points explained to him:

(1) Did not the Financial Regulations provide that arrears paid by a Member State should be distributed among the other Member States?
(26) If such arrears were to be incorporated in the 1955-56 budget, should not a resolution be passed to that effect?
(27) (2) Was he correct in thinking that, according to the three resolutions, the three Member States regained their rights because their arrears were no longer regarded as due under the terms of Article IV of the Constitution, paragraph 8b, and not because it was recognized that "failure to pay" was "due to conditions beyond the control" of the Member States in question, under the terms of paragraph 8c of the same Article.

(28) Replying to the first question raised by the Japanese delegate, Mr. SABA (Legal Adviser) did not think that a resolution could alter the application of payments made by Member States.
(29) With regard to the second question, Mr. Saba explained that, once Member States had been given time to pay, they could no longer be required to settle their debts instantly.
(30) Therefore, in assessing arrears, so as to determine whether or not a Member State had the right to vote, the only amounts which counted were those which were immediately payable. In the present instance, paragraph 8 b was the operative clause.
(31) Paragraph 8c applied only when the delay in payment could be attributed to exceptional circumstances over which the Member State in question had no control.

(32) Mr. HAGUIWARA (Japan) said that he was satisfied with the latter explanation, and then put his first question in another form: would the contributions of the three Member States (60% in national currency and 40% in foreign currencies stipulated by the General Conference) be incorporated in the 1955-56 budget or not?

(33) Mr. HARPER-SMITH (Comptroller) explained that the amounts paid in by the States concerned in settlement of their arrears would become budget surpluses for the years in which those arrears were incurred. Thus the oldest debt, incurred by Poland, dated from 1947; the amounts paid in by that country would constitute a budget surplus for 1947 and would be available for distribution to Member States at the ninth session. Payments made for 1955-56 would of course be used to finance the budget for those years, like any other contribution.
(34) The national currencies acquired would be used, as far as possible, for the normal expenditure provided for in the budget for 1955-56. Otherwise an attempt would be made to exchange it for other currencies, so that the equivalent would be available for distribution to Member States in the normal way.

(35) Mr. POHL (Union of South Africa) said that, in all Specialized Agencies where members were in arrears, his Government had taken the line that such members should be penalized by loss of the vote. But in the cases under consideration, there were certain special features.
(36) He wished to pay tribute to the Committee on Contributions, and also to the delegations of the three countries. The resolutions proposed went a long way towards a satisfactory solution of the problem. At the same time, it would be most dangerous for Unesco if a precedent were to be created. Therefore, although recognizing that a genuine effort had been made to seek a settlement, his delegation would abstain from voting on the resolutions.

(37) Mr. PHOTIADES (Greece) pointed out that no account had been taken of the disadvantages resulting for certain Member States who had paid their contributions regularly from the beginning.
(38) He had listened with interest to the statements of the Brazilian delegate, but could not refrain from mentioning that Greece had suffered catastrophes of which everyone was aware and which would give it grounds for requesting a similar arrangement.
(39) The Greek delegation would accordingly abstain from voting, reserving its position until conversations had taken place on the subject between his Government and Unesco.

(40) Mr. CABOUAT (France) considered that the negotiations with Hungary, Poland and Czechoslovakia had satisfactorily resolved the difficult problem of arrears.
(41) The French delegation was particularly anxious that the use of national currencies in the course of future financial years should on no account play a decisive rôle in the preparation of future programmes.
(42) Subject to close observance of that principle, the French delegation would vote for the resolutions in question.

(43) Mr. VILLALON GALDAMES (Chile) asked Mr. Harper-Smith to explain the statement that the contributions to be paid by the States in question were to be assessed in accordance with the Financial Regulations, unless otherwise decided by the General Conference.
(44) Mr. Villalon also asked for an explanation of document 8C/ADM/32, which had not yet been adopted and in which the methods of financing the budget were laid down.

(45) Mr. HARPER-SMITH (Comptroller) explained that, under the arrangements made in the resolutions the first payment of arrears would be made in 1955, and the second in 1956. The amounts so received would be reported to the ninth session as surpluses. It would be for that Conference to decide whether they were to be distributed in accordance with the Financial Regulations. In any case, these payments of arrears could not be used for the 1955-56 budget.

(46) Mr. HUZAYIN (Egypt) paid a tribute to the Committee on Contributions for the solution it had found to a prickly problem. He welcomed the spirit shown by those speakers who, while unable fully to approve the resolutions, would nevertheless abstain rather than vote against them. It was much better for an organization such as Unesco to settle the problem once and for all.
(47) At the same time, the case of the three countries which were returning to the fold was a very special one, and he was emphatically of the opinion that it must not be allowed to create a precedent.

(48) Dr. MUDALIAR (India) was happy to note that there had been so little opposition to the resolutions, which he felt safeguarded the important principle that Unesco should suffer no loss in collecting arrears.

(49) Since the three countries concerned had already shown such readiness to co-operate, perhaps they could together review the methods whereby they would make their payments, with the best interests of the Organization in view.
(50) He entirely agreed with the delegate of Egypt that the solution found must not constitute a precedent.

(51) The DIRECTOR-GENERAL suggested that the last sentence in the first paragraph on page 2 "Whilst it was understood that every effort ..." should be amended to read: "Whilst it was understood that every effort . . . should not be a determining factor either in implementing the current programme or in formulating future programmes of the Organization."

(52) The Indian motion for adoption of the resolution relative to Czechoslovakia was thereupon put to the vote and adopted by 35 votes to 0, with 15 abstentions.

(53) Dr. MUDALIAR (India), seconded by Mr. SOLDATOV (Union of Soviet Socialist Republics), then moved adoption of the resolutions relative to Hungary and Poland.

(54) The resolution relative to Hungary was adopted by 34 votes to 0, with 15 abstentions.

(55) The resolution relative to Poland was adopted by 34 votes to 0, with 15 abstentions.

(56) Mr. KOTSCHNIG (United States of America) called for a vote on the introductory part of the report and for a vote on the report as a whole.

(57) Mr. BAUGNIET (Belgium) requested that before a vote was taken on the first part of the report, the text of the last sub-paragraph but one should be altered to cover the Director-General's observation on the use of national currencies both for the current programme and for future programmes.

(58) Mr. KELLY (Australia) suggested that some addition be made to the introduction to cover the point made by the delegates of Egypt and India, i.e., that the arrangement made should in no sense constitute a precedent.

(59) Mr. HUZAYIN (Egypt) proposed that the words "Neither should such an arrangement constitute a precedent" should be added to the last paragraph but one (page 2) of the introduction.

(60) This proposal was adopted.

(61) It was unanimously agreed to recommend the General Conference to adopt the introduction to the report, with the amendments proposed by the Director-General and Mr. Huzayin.

(62) Document 8C/ADM/30 Add.1, as a whole, was then put to the vote and adopted by 40 votes to 0, with 10 abstentions.

(63) The CHAIRMAN said he had been delighted to note the tributes paid to the Committee on Contributions

and to its Chairman. In addition, the countries concerned had displayed a most praiseworthy readiness to co-operate. He was convinced that the Committee, under the splendid leadership of Mr. Sternberger, had made a real contribution to international understanding.

(64) Mr. STERNBERGER (Chairman of the Committee on Contributions) spoke with some diffidence as a newcomer to the General Conference. The Committee had merely done its duty. He was deeply grateful for the tributes paid to the Committee and to himself.

(65) The Committee then passed on to consideration of document 8C/ADM/32: Report by the Committee on Contributions - methods of financing the budget.

(66) The CHAIRMAN said that, when the discussion of the above document had been discontinued, the Commission had been confronted with a United Kingdom motion to the effect that the 1955-56 budget should be financed in accordance with three specific provisions of the Financial Regulations.
(67) The delegation of Guatemala had submitted an amendment to that proposal; he had been obliged to rule that the motion by Guatemala constituted a separate proposal.
(68) The delegate of Guatemala had now so altered his proposal that it could be considered an amendment to the United Kingdom proposal. He also understood that the Japanese delegation had suggested an amendment which had been accepted by Guatemala and embodied in its own amendment.

(69) Mr. CARRERA MOLINA (Guatemala) announced that for two reasons his delegation had decided to withdraw the proposal it had submitted the day before: firstly, in order to facilitate discussion on many of the subjects still before the Commission, and secondly because it had accepted suggestions made by certain delegations which had originally supported the proposal, but had afterwards asked for its withdrawal.
(70) It had nevertheless joined the Mexican delegation in submitting a new draft resolution, proposing that contributions assessed on new Member States should not be incorporated in the present budget.

(71) The CHAIRMAN had understood that the delegation of Guatemala was changing the wording of its resolution to adopt that suggested by Japan. But the proposal just read out differed from the Japanese proposal.

(72) Mr. HAGUIWARA (Japan) said that he was not opposed to the substance of the resolution submitted jointly by the Guatemalan and Mexican delegations; with regard to the wording, however, he wished to point out that his own amendment seemed clearer.

(73) The CHAIRMAN felt convinced that the only way for the Commission to avoid an inextricable muddle was to adjourn forthwith, leaving a small working party, made up of the countries concerned, to clarify their differences, in order to present a proposal or proposals at the afternoon meeting. He would suggest that the following countries be represented on the working party: Egypt, United Kingdom, United States of America, Guatemala, Brazil, Mexico and Japan.

(74) Mr. CABOUAT (France) said that his country would like to be represented too.

(75) Mr. VILLALON GALDAMES (Chile) asked the Chairman to explain the difference between the two methods of financing the budget. One was according to the Financial Regulations; the other was by special financial measures. He would like the point made clear.

(76) The CHAIRMAN believed that nothing would be gained by a discussion in the Commission until the points at issue had been clarified. A certain group of delegations wanted provision to be made for certain funds to be used in 1955-56, if it were found that they could be used, and wanted the funds not so used to be carried forward to 1957-58. But there were grave procedural difficulties, into which he would not go further at that stage.

(77) Mr. HAGUIWARA (Japan) thought it would be useful if the Rapporteur of the Committee on Contributions could take part in the work of the party suggested.

(78) It was agreed to adjourn until the afternoon, and that a small working party (Egypt, United Kingdom, United States of America, Guatemala, Brazil, Mexico, Japan, and the Rapporteur of the Committee on Contributions) should meet forthwith.

(79) The DIRECTOR-GENERAL wished to comment on statements made by him in the draft programme and budget documents. Recommendations had been made therein to the effect that, as an exception to the Financial Regulations, certain income now accruing should be used for the 1957-58 budget. The idea he had had in mind was that if, in 1954, all the money available were used, with an assessment level that would not cause Member States to pay more in 1955-56 than in 1953-54 (except, of course, in the case of new Member States), the funds available would be more than sufficient for the budget proposals he had submitted. He had proposed that, because a special situation would obtain at the 1956 Conference, the assessment level of Member States should not be lowered (except for such slight adjustments as might be made in accordance with the United Nations scale of contributions, and with the possible exception of the United States of America) and that money should not be returned to Member States. Whatever the assessment level in 1955-56, the level would have to be raised in 1957-58 to maintain the same spending level, unless part of the funds now accruing were carried forward to 1957-58.
(80) The expenditure decided on at the eighth session (use of Russian; decision to hold the ninth session in New Delhi) had modified the situation to some extent.
(81) His statements must not be allowed to influence the judgment of the Commission in deciding on the United Kingdom proposal to abide by the Financial Regulations. The interests of Unesco were taken care of by the proposals before the Commission, and it was for the Commission to decide.

The meeting rose at 12.10 p.m.

# FOURTEENTH MEETING

*23 November 1954 at 3 p.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.4.4 OF REVISED AGENDA: CONTRIBUTIONS: SCALE, CURRENCY AND COLLECTION OF CONTRIBUTIONS OF MEMBER STATES** (documents 8C/ADM/32 and Addenda 1 and 2) (continued)

(1) Mr. RAO (Acting Chief, Bureau of Programme and Budget) read out, at the Chairman's request, the United Kingdom proposal (8C/ADM/32 Add. 1) and the amendment proposed by the delegations of Brazil, Egypt, France and Japan (8C/ADM/32 Add. 2).

(2) Mr. BERREDO CARNEIRO (Brazil) explained that the amendment proposed by his delegation introduced no new principle; he understood that it was in line with a practice already adopted on different occasions by the General Conference, and he would be glad if the Secretariat would give him some details concerning those precedents.

(3) Mr. HARPER-SMITH (Comptroller) said that a decision to use the surplus for financing projects in the period 1955-56 would be in accordance with decisions taken at the sixth and seventh sessions of the General Conference; but it had never before been agreed to withhold surpluses pending a decision on their use by a later Conference.
(4) He replied in the affirmative to a further question from the Brazilian delegate whether there was a precedent for applying surpluses to a future Unesco budget instead of returning them to Member States.

(5) Mr. POHL (Union of South Africa) referred to a statement by the Director-General at the previous meeting that his reasons for formulating the proposals for applying the surplus were no longer valid. The only point of dispute between the two proposals before the Commission was the use of the sum of $603,600 and, as there was no longer any need for it to be held over until the 1957-58 period, he saw no reason why it should not be set against future expenses in accordance with normal business procedure.

(6) Mr. RAO (Acting Chief, Bureau of Programme and Budget) confirmed that the only point of controversy between the original proposal and the amendment was whether or not the $603,600 should be returned to Member States. The Director-General's object in proposing that the contributions from new Member States should be carried forward was to avoid undue fluctuations in the level of contributions.

(7) Dr. MUDALIAR (India) said that, while he believed that, in principle, the Financial Regulations should be adhered to and in normal circumstances he would have supported the United Kingdom delegate's proposal, the exceptional circumstances of the current year justified a departure from customary practice. It was essential to see the financial position as a whole. There were three points to be considered: miscellaneous income, contributions from new members, and the return of the 1947-51 surplus to Member States.
(8) The assessment level for 1955-56 showed a reduction for nearly every country, and, even at the maximum possible level proposed, the total contribution of any Member State would not exceed the amount paid in 1953-54, which worked out at one-half of a cent per head of the population. He could not understand why delegates of high calibre should spend so much time discussing details of the budget while there was so much other work to be done. He believed it would be contrary to the ideals of Unesco to reduce contributions because of an entirely fortuitous circumstance. Many speakers, in plenary and other meetings, had deplored the restriction of activities in important fields, and any additional funds available should be used for implementing Unesco's programme. A fund on the lines of that created by the United Nations for the furtherance of educational projects would be favoured by many countries - even those which had difficulty in meeting their contributions - because they would benefit by an expansion of activities.
(9) He therefore supported the amendment, expressing the hope that the Conference would agree to base 1955-56 contributions on the normal level, and apply the additional funds, amounting to over $2,100,000, to expanding Unesco's activities, possibly to include financing the new headquarters building. Those who believed in Unesco's ideals and the impact of its work on the world as a whole would surely recognize the error of remitting such funds to member governments.

(10) Mr. THA HLA (Union of Burma) said that, if the surplus were distributed among members, even the largest contributors would receive a comparatively insignificant amount. If, however, the sum were kept intact, it could be used effectively in the 1955-56 programme, for which the budget provision was manifestly inadequate. He proposed that it should be placed in a reserve fund, to be used for cultural activities, the headquarters building or any other purpose which the General Conference might decide.

(11) Following a point of order raised by the United Kingdom delegate, the delegate of Brazil formally proposed the amendment in document 8C/ADM/32 Add. 2.

(12) Mr. C.W. CARTER (Canada) supported the United Kingdom delegate's proposal for five reasons: 1. The action proposed was in the best interests of Unesco as an organization and of its programme; 2. The members of the Commission were for the time being a part of Unesco and would be judged by the way in which they conducted Unesco's affairs; 3. The Commission had the double responsibility of enhancing Unesco's prestige throughout the world and inspiring faith and confidence in the Organization; 4. The Canadian delegation was convinced that it would be in the best interests of Unesco to adhere strictly to the rules and regulations laid down in respect of the budget; 5. The strongest argument in favour of the proposal was the confusion at the past three meetings caused by the potential departure from sound practice.
(13) The Financial Regulations had been established expressly to avoid such confusion, and to ignore them would lead Unesco to a similar situation. If the Regulations did not meet the circumstances, they could be revised.

(14) Mr. HARPER-SMITH (Comptroller), in reply to a question from the delegate of Byelorussia, said that the surplus would be returned to the Member States who had contributed in the years during which it arose; members who had joined Unesco subsequently, or who were in arrears, would be excluded.

(15) Mr. HUZAYIN (Egypt) wished, as one of the sponsors of the amendment, to reply to the points raised by the Canadian delegate.
(16) Point 1. Since Unesco was about to start on a transitional period of activity leading to a new orientation of its programme, it would be in the interests of the Organization to set aside a sum for use after the ninth session of the General Conference.
(17) Point 2. The best way to further Unesco's aims was to provide more funds for the programme.
(18) Point 3. Unesco's prestige was more likely to be enhanced by programmes which were certain to be implemented. Return of the surpluses to Member States would imply theoretical rather than practical support for Unesco's work. As to how the funds were to be used, they could be applied to fundamental education, production of reading primers, or financing the headquarters building; but the final decision should be left to the General Conference at its ninth session.
(19) Point 4. The Financial Regulations were not part of Unesco's Constitution and were therefore not binding.
(20) Finally, with as many as seventy-two Member States, confusion was unavoidable, but out of confusion clarity emerged. The amendment proposed by four Member States was not only a commendable effort to dispel the confusion but was also an offer of a compromise which he hoped the United Kingdom delegate would reciprocate.

(21) Like the delegate of India, he hoped that financial considerations would not obscure Unesco's mission to humanity.

(22) Mr. BAUGNIET (Belgium) thought there was a mistake in the table given on page 5 of document 8C/ADM/32. Under the heading, "Total Appropriation", the following details were given:

| | | |
|---|---|---|
| Deduct: | Miscellaneous Revenue | $389,614 |
| | Budget Surpluses available for distribution | $603,600. |

Since the latter figure was identical with the budgetary surplus referred to in the draft amendment under discussion, that would appear to be a mistake either of wording or in the figures.
(23) Mr. Baugniet stated, however, that his delegation supported the draft amendment under consideration. It could not have agreed to any measure dealing with larger amounts, but thought it wise to reserve the sum in question, $603,600, for the financial year 1957-58.

(24) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said he could not give an immediate reply to Mr. Baugniet's question but, since the Belgian delegate approved the draft amendment before them, he would provide him with the required information when the meeting was over.

(25) Mr. SALIM (Hashemite Kingdom of Jordan) had hesitated to enter the discussion because he represented a country whose contribution was small. In his view, while the larger contributors were within their rights in wishing to receive back surpluses, such action was contrary to the interests of Unesco. He therefore supported the proposed amendment, which would give the ninth session of the General Conference an opportunity to apply the surplus to the budget of the Organization, and allow time for consideration of the best ways in which it might be used.

(26) Mr. VILLALON GALDAMES (Chile) supported the amendment, which was in keeping with the spirit of Unesco. The sum in question could be used to further the Organization's aims. In industry and commerce, the new financial year began with the transfer of the balance from the old. To give that sum back to Member States would not be the best way of sharing the benefits. It would be far better that Unesco should announce one day that through its efforts the number of illiterates had decreased or the death rate throughout the world had been reduced. That was what the peoples expected of the Organization.

(27) Mr. ARTHUR (United Kingdom) agreed that the amendment had greatly simplified the Commission's work. Nevertheless, many of the arguments, and in particular those of the delegates of India and Egypt, were more appropriate to the Programme and Budget Commission, which had to approve the programme, than to the Administrative Commission, which had to approve a commensurate budget. If delegates wished to support specific projects, the correct procedure was to submit them as draft resolutions and support them in the Programme Commission.

(28) Speaking or behalf of the four delegations whose draft amendment was before the meeting, Mr. CABOUAT (France) stated that they were fully aware of the need to observe the rules of orthodox finance in all but exceptional circumstances. At that time, Unesco had a surplus of over $2,000,000. Was it wise to use up the whole amount at once, when heavy expenses would probably have to be met within the following two years? The amendment before the meeting offered a sensible solution and would keep the contributions payable by Member States as stable as possible.
(29) In two years' time the sum of $603,600 that it was suggested should be set aside, would enable a considerable number of activities to be successfully accomplished. Moreover, the sacrifice involved for Member States would be insignificant, since, if the surplus were distributed, each State would receive only a very small sum. On the other hand, it would be a satisfactory solution for those delegates who were anxious not to allow the total amount of contributions to undergo too many fluctuations.

(30) A vote was taken on the draft amendment contained in document 8C/ADM/32, Add. 2, which was adopted by 31 votes to 9, with 9 abstentions.

(31) The United Kingdom proposal (document 8C/ADM/32 Add. 1), thus amended, was then unanimously adopted.

**ITEM 9.2 OF REVISED AGENDA : CONSIDERATION OF THE REPORT OF THE ADVISORY COMMITTEE ON PARTS I, III AND IV OF THE BUDGET, AND REPORT TO THE PROGRAMME COMMISSION (document 8C/BUD/1) (continued)**

**PART I – GENERAL POLICY**

**CHAPTER 2 – EXECUTIVE BOARD**

(32) The CHAIRMAN pointed out that the change in the composition of the Executive Board required formal approval of the increase in membership from 20 to 22, involving an additional budgetary provision of $12,000 for the period 1955-56; and a decision on whether Unesco should continue to pay both travel and per diem.

(33) A formal proposal was made by the delegate of Japan and seconded by the delegate of the Philippines that the Commission approve the addition of $12,000 to Chapter 2, Part I of the budget.

(34) Mr. KOTSCHNIG (United States of America) was willing to support the proposal if the Executive Board would endeavour to cut down both the length and the number of sessions. If that were done, the additional $12,000 might not ultimately be needed.

(35) Mr. BAUGNIET (Belgium) thought that the Executive Board should try to cut down the number as well as the length of its sessions, and he proposed that the Commission assent to the opinion given on that point by the Advisory Committee on Programme and Budget (document 8C/BUD/1 (page 4)).

(36) Mr. KOTSCHNIG (United States of America) asked whether the following wording would meet the wishes of the Belgian delegate: "that every effort be made by the Executive Board in co-operation with the Director-General to reduce as far as possible the number and length of sessions of the Executive Board."

(37) The delegate of Belgium signified his acceptance.

(38) Mr. PHOTIADES (Greece) reminded the Commission that Article V, B.8 of the Constitution, which had been in force up to that time, stipulated that "the Executive Board shall meet in regular session at least twice a year". Since Conference sessions were to be held biennially, it would perhaps be useful to arrange for five sessions of the Executive Board during each two-year period. Mr. Photiades thought that solution might satisfy the delegate of the United States of America.

(39) The CHAIRMAN said that the two sessions each year for the Executive Board were laid down in Article V, B.8 of the Constitution, amendments to which would require six months' notice.

(40) Mr. PHOTIADES (Greece) considered that the provisions regarding the number of sessions of the Board could be included in the Board's Rules of Procedure.

(41) Mr. BAUGNIET (Belgium) thought there was no need to oblige the Executive Board to hold a minimum of five sessions in every two-year period, since the Board might well decide that the twice yearly sessions provided for under the Constitution were sufficient.

(42) Mr. LAUGIER (representing the Executive Board) recalled that up to that time the agenda of the Executive Board apart from one or two exceptions, had included only questions arising from provisions of the Constitution or from resolutions of the General Conference. The only noteworthy departure from that rule had been the preparation of the report on the remodelling of the future programme of the Organization.
(43) Furthermore the Executive Board had already asked the Bureau of Legal Affairs to enquire into the possibility of reducing its agenda, from which it had transpired that the only way to shorten the Executive Board agenda was to release the Board from some of its responsibilities. Mr Laugier did not think that was what the Commission had in mind, and therefore thought that all that could be done was to invite the Board to make its sessions as short as possible.

(44) Mr. PHOTIADES (Greece) concurred wholeheartedly in the views of the Executive Board representative.

(45) Mr. KOTSCHNIG (United States of America) agreed that it would be unwise to attempt to exceed the provisions of the Constitution, but favoured a

strong appeal for reducing sessions. The numbers envisaged - three in 1955 and five in 1956 - were excessive and the Executive Board might well follow the example of the Economic and Social Council in cutting down its agenda.

(46) The DIRECTOR-GENERAL said that the Executive Board had itself expressed the hope that the Conference would endeavour to lighten the burden which it placed on the Board, and he had asked whether the Board could help him to study the matter over the coming two years, with a view to submitting proposals to the next session of the Conference for amending the Regulations in that respect. A formal resolution from the Conference would be necessary, and the Administrative Commission would be the appropriate body to move it.

(47) Mr. KOTSCHNIG (United States of America) suggested an addition to the proposal: "In this connexion the Conference requests the Executive Board, in co-operation with the Director-General, to study ways and means designed to achieve this end and to submit recommendations to the ninth session of the General Conference."

(48) This again was accepted by the delegate of Belgium.

(49) Mr. MERMINOD (Switzerland) said that it would be putting the cart before the horse to cut down the number and length of the Executive Board sessions before reducing its burden of responsibility. However, the proposal of the United States delegation should satisfy the whole Commission, so long as it was understood that the possibility of curtailing the work of the Executive Board would be examined before attempting to reduce the number and the length of its sessions.

(50) The CHAIRMAN read the proposal of the delegate of Belgium, as amended by the delegate of the United States of America.

(51) The proposal was adopted.

(52) The CHAIRMAN then recalled the proposal of the Japanese delegate that the Director-General be authorized to include an additional amount of $12,000 in Chapter 2 of the budget to meet the cost of the two new members of the Executive Board. He asked whether the following wording would be satisfactory:

"That the Director-General be instructed to make provision in the budget for paying the expenses of the additional members."

(53) Mr. PETROVIC (Yugoslavia) considered that the travel expenses of members of the Executive Board should be defrayed by the Organization, whereas their per diem expenses should be defrayed by the governments they represented.

(54) Mr. HAGUIWARA (Japan) recalled that the matter in question had already been thrashed out at the sixth meeting of the Commission, and he had imagined it was already settled. He then read the record of his statement, as given in the minutes of the meeting, adding that at the same meeting Mr. Rao had given details of the procedure in use at the United Nations, ILO and FAO.

(55) Mr. Haguiwara further thought that, if the Commission wanted to economize, the new Executive Board could review its Rules of Procedure and might, for example, abolish payment of per diem to deputies, or whenever the Board's sessions coincided with those of the General Conference. He doubted, however, if it were good policy to abolish the payment of travel and living expenses, since that might tempt governments not to send their appointed representative but to replace him by a deputy residing where the Board was meeting.

(56) In those circumstances, Mr. Haguiwara maintained his proposal to increase the Executive Board budget by $12,000. If that proposal were rejected, he thought the Board should be left free to work out its own solution, since it was preferable that the General Conference should not intervene too often in the internal affairs of the Board.

(57) Replying to the delegate of Japan, the CHAIRMAN quoted the summary records, which, in conformity with his own recollection, showed that a decision still had to be taken on Chapter 2. He asked whether the delegate of Japan would agree to the following form for his proposal:

"That the Organization continue to pay full travel and per diem expenses for members of the Executive Board and that the Director-General be authorized to add $12,000 to the budget item for 1955-56 to meet the cost of the two extra members."

(58) Mr. HAGUIWARA (Japan) said that, while the Conference could vote a credit, the Executive Board, under its Rules of Procedure, apportioned the credit. He therefore wished to see the sum of $12,000 added to the amount provided under Part I, Chapter 2, paragraph 21, of the budget: "Travel of members of the Board." If his proposal were rejected, he hoped that the Board would either change its Rules of Procedure or find other ways of meeting the cost of the two additional members.

(59) The CHAIRMAN accordingly presented the original proposal of the delegate of Japan.

(60) Mr. BERREDO CARNEIRO (Brazil) was glad the Yugoslav delegate agreed that travel expenses for members of the Board should be defrayed by Unesco. As for the per diem expenses, though it was true that the sum involved was never a very large one, Mr. Carneiro thought it was best not to depart from the principle that expenses incurred by a national civil servant on a tour of duty with an international organization such as the Executive Board of Unesco, which was called upon to carry out certain tasks prescribed by the General Conference, were the responsibility of the Organization.

(61) Mr. MARTINEZ COBO (Ecuador) disagreed with the delegate of Yugoslavia. The amendment would affect the attendance of some members of the

Executive Board who belonged to smaller countries. The suggested procedure would make them dependent upon their respective governments to an undesirable extent. As the United Kingdom delegate had pointed out, members of the Board would continue to exercise the powers delegated to them by the General Conference, and in its name, and therefore the Organization should pay for all the expenses consequent upon their attendance at meetings.

(62) Mr. FERNANDEZ MORENO (Argentina) agreed with the delegate of Japan. He fully concurred in the remarks of the delegate of Ecuador to the effect that members of the Board, in accordance with Article V.12 of the Constitution, continued to act "on behalf of the Conference" and that the Organization was therefore bound to defray expenses incurred through attending meetings of the Board. Approval of the Yugoslav amendment would mean doing an injustice to the smaller countries. The speaker was also opposed to the United States proposal. The Executive Board should be allowed complete freedom in deciding the number and duration of its sessions.

(63) The CHAIRMAN said that the number of sessions had been agreed; the only problem now under discussion was the method of finance.

(64) Mr. KOTSCHNIG (United States of America) was strongly opposed to the Japanese delegate's proposal, which was superfluous: if the Board applied itself seriously to the recommendation to limit its sessions, the $12,000 necessary to meet the additional cost could easily be found.
(65) He had reconsidered the proposal of the Yugoslav delegate and was willing to support it. The Executive Board would now have a double responsibility - to Unesco and to the privileged governments - and it was only fair that the expenses should be shared. If the Organization assumed the cost of travel, there would be no discrimination, since governments would be contributing equal amounts for per diem. The resultant savings, which amounted to approximately $35,000, were far from insignificant and could be applied with great effect to programme activities.

(66) Sir Ben BOWEN THOMAS (United Kingdom) said that the implications of the Yugoslav proposal were more important than they had seemed at first sight, and time was needed to consider its administrative repercussions for both the Organization and member governments. He therefore supported the proposal of the Japanese delegate, with the provision that the Executive Board should be asked to report to the next General Conference on methods of meeting the travel and per diem of members of the Executive Board. That would permit of more careful discussion than was possible at present.

(67) The delegate of Japan accepted the addition to his proposal and the CHAIRMAN read out the final wording:

"That the Director-General be authorized to add $12,000 under Chapter 2 of the budget to meet the cost of the two additional members of the Executive Board and that the Executive Board be asked to report to the next General Conference on proposals for meeting the travel expenses and per diem of Executive Board members."

(68) Mr. BRICHET (France) considered that the amendment of the Yugoslav delegate carried the decisions of the Conference regarding the membership and character of the Executive Board to their logical conclusion. It would, however, be a disservice to Member States with limited resources to ask them to defray the expenses of their representatives on the Executive Board.
(69) Mr. Brichet pointed out that, at the United Nations, five members of each delegation received their expenses out of the Organization's budget; that step had been taken so as to ensure that even the smallest countries should be fittingly represented. It might be desirable to apply a similar rule to the members of the Executive Board of Unesco. Mr. Brichet accordingly asked that per diem expenses for members of the Board should be defrayed by Unesco.

(70) Mr. HAGUIWARA (Japan) stated that he had accepted the reservation of the United Kingdom because he felt sure that the Executive Board would work out a plan for effecting economies. It must, however, be given time to carry out the necessary enquiries: a decision taken by the Commission in undue haste was unlikely to be a sound one.
(71) Mr. Haguiwara reminded the Commission that he had sat on the Executive Board for two years while officially employed by the Ministry of Foreign Affairs of his own country, which had funds for covering travel expenses. Had he been a university professor, the university authorities would no doubt have been hard put to it to find the necessary credits.
(72) Mr. Haguiwara thought that two years should be quite adequate for studying changes in the present procedure, and that the Board should be asked to report on the matter to the Conference at its ninth session.

(73) Mr. PETROVIC (Yugoslavia) considered that all countries had an interest in sending a representative to the Board and would readily agree to defray the cost involved. The stipulation that travel expenses should be paid by Unesco removed a possible source of inequality and it seemed only fair that other expenses should be borne by the governments concerned.

(74) Mr. KOTSCHNIG (United States of America) said that there appeared to be a contradiction between the resolution already adopted, which called for economies on the part of the Executive Board, and the proposal under discussion, which authorized additional expenditure.

(75) The CHAIRMAN pointed out that the first resolution called for resolutions to be submitted to the ninth session of the General Conference, and it could not be taken for granted that they would be adopted. There was therefore no direct contradiction.

(76) The Chairman asked for a vote on the following amendment to the Japanese delegate's proposal, submitted by the delegate of Yugoslavia:

"That the Administrative Commission recommends that the Organization pay for the travel expenses of members of the Executive Board from and to their home countries by the direct route to the seat of the Executive Board sessions and that Member States pay the per diem and subsistence allowances, and the Commission requests the Executive Board to amend its Regulations accordingly."

(77) The amendment was rejected by 36 votes to 7, with 2 abstentions.

(78) The proposal of the delegate of Japan: "That the Director-General be authorized to add $12,000 under Chapter 2 of the budget to meet the cost of the additional members of the Executive Board and that the Executive Board be requested to make proposals to the ninth session of the General Conference on the question of travel and per diem expenses of its members" was adopted by 32 votes to 8 with 5 abstentions.

**ITEM 9.8.1 OF REVISED AGENDA: ADOPTION OF SPANISH AS A WORKING LANGUAGE OF THE EXECUTIVE BOARD** (document 8C/ADM/7)

(79) Mr. MARTINEZ COBO (Ecuador) opened the debate on document 8C/ADM/7, proposing the adoption of Spanish as a working language of the Executive Board. It was a language spoken by 20 countries and by 200 million people, the discovery of America had been announced in that language; some of the most important works of the world had been written in it. The draft resolution asked that one more step should be taken towards declaring Spanish a working language of Unesco. It could not be objected that expenditure would thereby be increased, since the cost was insignificant. In fact, the use of Spanish as a working language of the Board would mean the publication of fewer documents in French and English with a consequent reduction in costs. Unesco was a universal organization, and should accept as a working instrument of its Executive Board a language so widely spoken as Spanish. Moreover, the Director-General had announced that funds were available to meet expenses arising out of the adoption of the proposal.

(80) Mr. HUZAYIN (Egypt) seconded the proposal because of the intrinsic virtues of the Spanish language, its contribution to the human heritage and its value in linking the old world with the new. His delegation and those of other Arab-speaking countries had always favoured the use of Spanish as a working language. Its adoption for the Conference had proved of great benefit to Unesco's work and the additional funds required for its use at the Executive Board were small.

(81) Mr. FRAGA IRIBARNE (Spain) seconded the draft resolution submitted by the delegate of Ecuador. He thanked the Egyptian delegate for his remarks. Spanish was the language in which Cervantes, St. John of the Cross, Ruben Dario, Caro, Cuervo, Bello and Sarmiento, among others, had written. There had been speakers from the United Kingdom, Yugoslavia and Greece, who had spoken in Spanish at that very Conference. The fact that sessions of the General Conference had been held in Mexico and in Uruguay, and that the Organization had Centres in Havana, Montevideo and Patzcuaro, confirmed the importance of that language. It was necessary to consider not so much the number of people who spoke it as the number of countries whose native language it was. More than a quarter of the Member States of Unesco spoke Spanish, and a very large number of groups of officials and National Commissions found it necessary in handling the documents of the Organization. There were four Spanish-speaking members on the Executive Board, and that number would probably be increased in the future. The Board itself had allowed its members to speak in Spanish even though, up to that date, speeches had not been interpreted in that language. Moreover, as the delegate of Ecuador had pointed out, if Spanish were declared a working language of the Executive Board, there would be fewer documents published in French and English, which would reduce the general cost of the Documents and Publications Service.

(82) Mr. FERNANDEZ MORENO (Argentina) agreed with the delegates of Ecuador and Spain. The International Labour Office and the Food and Agriculture Organization had already adopted Spanish as a working language. He proposed that the draft resolution be adopted unanimously.

(83) Mr. BERREDO CARNEIRO (Brazil) warmly approved the proposal of the delegate of Ecuador. He thought it the natural and inevitable consequence of the decision already taken to adopt Spanish as a working language of the General Conference. He also pointed out that the step would not only prove useful for the delegations of Spanish-speaking countries but also for those using a sister language.

(84) Mr. NOGUEIRA (Uruguay) supported the proposal of the delegate of Ecuador. The Executive Board had been using Spanish unofficially in its discussions for some time, but the moment had come to extend the use of Spanish in Unesco officially.

(85) Mr. RIANO JAUMA (Cuba) declared that the unanimous adoption of the proposal would be an act of justice towards all the States of Latin America, which were members of Unesco and co-operated actively in its work.

(86) Mr. BRICHET (France) recognized that the adoption of the proposal would entail considerable expenditure, but, considering the noble history of the Spanish tongue and the place it held in Latin America, the French delegation gave its sympathetic approval to the proposal of the delegate of Ecuador.

(87) The proposal was warmly supported by the delegates of Israel, USSR and Czechoslovakia.

(88) Mr. HAGUIWARA (Japan) fully agreed with the

proposal of the delegate of Ecuador, which had been recommended by the Executive Board. Since, however, the question of the working languages of the Board depended on the Rules of Procedure of that body, he thought it better to leave the final decision to the Executive Board itself.

(89) Mr. Haguiwara accordingly proposed that the Commission word its recommendation as follows: "The General Conference recommends that the Executive Board take the necessary steps to adopt Spanish as a working language of the Board." Since the Board had already expressed its approval, it would certainly accept such a recommendation.

(90) Mr. LAUGIER (Executive Board) reminded the meeting that the Board had unanimously adopted a recommendation in favour of Spanish as a working language. The Commission could therefore confine itself to approval of the Board's recommendation and invite it to take the necessary steps to carry it into effect.

(91) Mr. ENVERGA (Philippines) supported the proposal of the delegate of Ecuador and said he would vote in favour. He hoped the delegates would give a unanimous vote.

(92) Mr. KOTSCHNIG (United States of America) strongly supported the proposal and hoped that it would be unanimously adopted by the Conference.

(93) Mr. WEST (United Kingdom) regretted that, for administrative and financial reasons, his delegation could not support the proposal. Their attitude was not in any way a reflection on the language or the people of Spain, for both of which the United Kingdom had the highest regard.

(94) Mr. ATTAGARA (Thailand) also supported the proposal and pointed out that nearly one-third of the countries represented were Spanish speaking.

(95) Mr. DURAN MASIS (Costa Rica) fully concurred in all that had been said by the delegates in favour of the draft resolution moved by Ecuador. The Executive Board was about to have more Spanish-speaking members. The proposal was a step towards placing the Spanish language on the same footing in Unesco with French and English. Spanish-speaking delegates had to lose a great deal of time reading the large number of documents sent to them in French or English.

(96) Mr. VILLALON GALDAMES (Chile) expressed his deep regret at the attitude of the United Kingdom delegate. The amount involved was very small compared with expenditure on certain items which were of less importance.

(97) Mr. MARTINEZ COBO (Ecuador) was unable to accept the amendment submitted by the Japanese delegate to the draft resolution of Ecuador. Further, the Executive Board had recommended that the resolution be approved. He expressed his gratitude to all delegates who had declared themselves in favour of the use of Spanish as a working language of the Board. They had conferred an honour on all Spanish-speaking people, but he thought their decision also did credit to themselves.

(98) The Ecuadorean proposal (document 8C/ADM/7) was approved by 42 votes to 2 with 1 abstention.

(99) Mr. HAGUIWARA (Japan) said that he had voted in favour because he was in complete agreement with the substance of the proposal concerned. He would, however, have preferred some other wording since he thought it best to avoid too frequent interventions by the Conference in the internal affairs of the Board.

**ITEM 9.8.2 OF REVISED AGENDA : ADOPTION OF RUSSIAN AS A WORKING LANGUAGE OF UNESCO** (document 8C/BUD/1 Add.)

(100) Mr. SOLDATOV (Union of Soviet Socialist Republics) said that the use of Russian as a working language of the Conference and the Executive Board was highly important to the Soviet and other Russian-speaking delegations. The cost involved was very small compared with the total contributions paid by those countries. He agreed with the Chairman of the Advisory Committee on Programme and Budget, who, in presenting his report to the Commission, had referred to the need for economy in the translation of official documents in Russian and he pointed out that the Soviet delegation was not raising the question of the use of Russian outside the General Conference and the Executive Board.

(101) In stressing that the introduction of Russian as a working language would enable the Russian-speaking delegations to participate effectively in the meetings of Unesco, Mr. Soldatov said that he would like to see Unesco follow the practice of the United Nations, in all of whose constituent bodies Russian was an official and a working language, speeches and documents alike being translated into and from the language. While recognizing that such comprehensive action was not, at the present juncture, practicable in Unesco, he hoped that it might be possible to translate at least the basic official documents into Russian.

(102) He regretted the decision of the Advisory Committee and hoped that the Commission would be able to adopt a favourable decision, since on it would depend the fruitful co-operation of the Russian-speaking countries.

(103) He formally proposed the following resolution:

"The General Conference resolves that the Russian language shall be a working language of the General Conference and of the Executive Board of Unesco".

(104) Mr. STEPANEK (Czechoslovakia), supporting the proposal of the Soviet delegate, stressed the importance of the Russian language not only to the USSR but to all Slav countries in Eastern and Central Europe.

(105) Mr. KAVALEVSKY (Byelorussian Soviet Socialist Republic) warmly approved the proposal of the Soviet Union delegate. He pointed out that Russian was currently used by many of the peoples of the world, and he emphasized the importance of

Russian literature. By adopting his proposal Unesco would assuredly enhance its prestige, facilitate the work of Russian-speaking delegates, and promote the interests of the Organization.

(106) Mr. DUDNIK (Ukrainian Soviet Socialist Republic) said that his delegation wanted to see the Executive Board working as efficiently as possible. Viewed in that light, the question of working languages was of considerable importance. The Ukrainian delegation had supported the adoption of Spanish as a working language of the Executive Board, and considered it unfair not to include Russian among the Board's working languages. It accordingly gave its full support to the proposal of the delegation of the USSR.

(107) Mr. TAMAS (Hungary) supported the proposal of the delegate of the USSR. Russian was the language in which Pushkin, Tolstoi, Gorki, Mitchurin and Chernishewski had written. It would be to Unesco's advantage to adopt the language spoken by 200 million human beings. In addition, it was employed in the conduct of diplomatic, cultural and scientific affairs by a great many people, and to use it would add to Unesco's prestige.

(108) Mr. WIECHECKI (Poland) wished to avoid repeating the very telling arguments already put forward in favour of the adoption of Russian as a working language. He merely wanted to add that the Polish delegation, whose mother tongue belonged to the Slav group of languages, whole-heartedly supported the proposal of the USSR delegate.

(109) Mr. CHEN YUAN (China) strongly opposed the resolution. The United Nations have five official languages and, if their precedent were followed, Unesco would have seven, since Arabic and Hindustani would have to be included. For reasons of time and economy it was not possible to adopt that practice.

(110) He had supported the adoption of Spanish as a working language, because there were twenty Spanish-speaking Member States. If another language were to be adopted, however, it should certainly be Arabic in preference to Russian, since there were more Arabic-speaking members. He saw no justification for the expense of adopting Russian as a working language for the Conference, and there was no case at all for the Executive Board, since it had no Soviet member.

(111) Mr. KOTSCHNIG (United States of America) moved that the resolution be dealt with in two parts. With regard to the Executive Board, his delegation considered that action would be premature, bearing in mind that the Russian-speaking countries had only recently joined Unesco, whereas the Spanish-speaking countries had been members for eight years before their language was adopted.

(112) Mr. WEST (United Kingdom) supported the proposal of the United States delegate to deal with the resolution in two parts, but opposed the adoption of Russian as a working language of the Executive Board, bearing in mind that there were many other languages whose claims for adoption would be equally justifiable on the reasons given. His opposition should not, however, be taken as reflecting on the merits of Russian as a language.

(113) Mr. BERREDO CARNEIRO (Brazil) approved the suggestion to deal with the USSR proposal in two parts. He was ready to agree to the inclusion of Russian among the working languages of the General Conference. Since the USSR had decided to join Unesco, there was every reason to believe that it had assumed the obligations embodied in the Constitution, including that of allowing Unesco publications to be distributed freely throughout the USSR. It was, therefore, in the hope of enabling Unesco publications to be distributed among Russian-speaking peoples, that he supported that part of the Russian proposal.

(114) On the other hand, he wished, for the time being at least, to make certain reservations regarding the use of Russian by the Executive Board. It was not yet known how the Executive Board would be composed. Mr. Carneiro hoped that the USSR would be represented on it, but he also hoped that the USSR delegate would be able to use one of the present working languages of the Board, as did those of his colleagues whose mother tongue was not among the present working languages, or, if that were not possible, that he would have recourse to an interpreter.

(115) Mr. BRICHET (France) called for the application of Rule 85 of the Rules of Procedure.

(116) Mr. SOLDATOV (Union of Soviet Socialist Republics) said that the importance of Russian as a working language had been adequately stated before the Executive Board and the General Conference. He only wished to repeat that the financial and practical objections were not valid. He referred to his comparison of the cost to the Organization with the amount of the contributions of the Russian-speaking Member States. He regretted that the Spanish-speaking countries had had to wait so long for the adoption of their language but considered that it was irrelevant to the adoption of Russian. If the problem were viewed in relation to Unesco's work, irrelevant and political considerations would be eliminated; it was a matter on which each delegate must vote according to his conscience.

(117) The CHAIRMAN asked for a vote on the first half of the proposal, namely the adoption of Russian as a working language of the General Conference.

(118) The proposal was adopted by 34 votes to nil with 6 abstentions.

(119) The remainder of the proposal, that Russian be adopted as a working language of the Executive Board, was rejected by 22 votes to 5 with 14 abstentions.

(120) The proposal, as amended, was adopted, it being understood that the Director-General would be authorized to make the necessary budget changes.

(121) The CHAIRMAN pointed out that certain regulations would require amendment, and it was agreed that the Legal Committee should deal with that aspect of the matter.

ITEM 9.2 OF REVISED AGENDA (continued)

(122) The Commission resumed its consideration of document 8C/BUD/1.

PART III – GENERAL ADMINISTRATION

CHAPTER 3 – BUREAU OF PERSONNEL AND MANAGEMENT

(123) Mr. KOTSCHNIG (United States of America) moved that the paragraph contained in document 8C/BUD/1, page 23, be adopted as the Commission's recommendation.

(124) The proposal was seconded by the delegate of Israel, supported by the delegates of France and Belgium, and adopted.

The meeting rose at 7.30 p.m.

# FIFTEENTH MEETING

*25 November 1954 at 10 a.m.*

*Chairman:* Mr. BEEBY (New Zealand)
*later:* Mr. AVIDA (Israel)

REQUEST FROM THE DELEGATION OF ISRAEL FOR THE WRITING OFF OF THE SUM OF $5,714.30 BEING A LOSS INCURRED BY THE ISRAELI NATIONAL COMMISSION ACTING AS A DISTRIBUTION AGENCY FOR UNESCO COUPONS (document 8C/ADM/20 Add.1)

(1) The CHAIRMAN invited the delegate of Israel to introduce his Government's request for writing off the loss incurred in the distribution of Unesco coupons.

(2) Mr. AVIDA (Israel) said that there was not much to be added to the information contained in the document before the Commission. He recalled that during the discussion of the similar request submitted by Iran the delegation of the United States of America had asked for an assurance that such cases would not recur. It had been stated that the Director-General had taken the necessary steps in that connexion and therefore he, the representative of Israel, requested the Commission to adopt the draft resolution contained in the last part of his Government's request.

(3) Mr. HUZAYIN (Egypt) said that, when the request of Iran had been discussed, the Commission had decided that it should not constitute a precedent, and that individual cases should be judged on their merits. In the case of the Iranian request there had been time to study the available evidence. For the Israeli request there was both insufficient time and not enough available data to give the matter the necessary consideration from the point of view of Unesco, and he therefore proposed that the request should not be discussed.

(4) Mr. BAUGNIET (Belgium) did not share the views of the Egyptian delegate, although he agreed that the previous decision in favour of the Iranian Government did not constitute a precedent to be invoked in every case. The members of the Commission were, however, aware of the facts behind the Israeli delegation's request; they were similar to those adduced by the Iranian delegation. Those facts, which had been confirmed by the Director-General, justified the Israeli Government's request, with the difference that the lapse of time was shorter than in the case of Iran. The loss had occurred because payment was made only 10 days after the change in the rate of exchange. The sum involved was not likely to disturb the balance of Unesco's budget, and its payment to the Israeli Government would satisfy the demands of justice.

(5) The Israeli delegate's proposal was adopted by 37 votes to 2, with 3 abstentions.

REQUEST FROM THE NATIONAL COMMISSION OF THE FEDERAL PEOPLE'S REPUBLIC OF YUGOSLAVIA FOR THE WRITING OFF OF THE SUM OF $1,666.67, BEING A LOSS INCURRED BY THE COMMISSION ACTING AS A DISTRIBUTING AGENCY FOR UNESCO COUPONS (document 8C/ADM/29 Add.2)

(6) Mr. PETROVIC (Yugoslavia) requested the Commission to approve a resolution, similar to that just adopted at the request of the Israeli delegation, in favour of the National Commission of the Federal People's Republic of Yugoslavia. The sum to be written off was the equivalent of $1,666.67.

(7) In reply to a question from the delegate of the

Union of South Africa, Mr. Petrovic said that,according to the Secretariat's comments on the requests presented by the Governments of Yugoslavia and Israel concerning losses incurred in the sale of Unesco coupons (document 8C/ADM/29 Add.3),the last instalment of the Yugoslav payments was made in August 1952, but in fact it went back to January 1952. As the United Nations account in Belgrade had been utilized, there had been some lapse of time before Unesco was informed.

(8) The Yugoslav proposal was put to the vote without further discussion and adopted by 37 votes to 1, with 3 abstentions.

(9) Mr. BEEBY (New Zealand), Chairman, then vacated the Chair, which was then taken by Mr. AVIDA (Israel), Vice-Chairman of the Administrative Commission.

**ITEM 9.6 OF REVISED AGENDA: RESOLUTIONS AND RECOMMENDATIONS OF UNITED NATIONS ORGANS CONCERNING UNESCO (document 8C/ADM/19)**

(10) Mr. MAHEU (Assistant Director-General) explained that document 8C/ADM/19 ("Resolutions and recommendations of interest to Unesco, adopted by organs of the United Nations") was purely informative and was intended to supplement the Report of the Director-General (documents 8C/3 and 8C/3 Add.), which had already been discussed by the General Conference in plenary meeting.
(11) The document showed that co-operation between Unesco and the various organs of the United Nations was becoming increasingly close and fruitful.
(12) Mr. Maheu wished to make two special observations.
(13) Part I of the document related to Unesco's Annual Report to the United Nations, which was examined each year by the Economic and Social Council. The Council had discussed the Report at its session in July 1954 and, for the first time, had unanimously approved it.
(14) The second observation concerned Part II of the document: Unesco's relations with the Trusteeship Council. Although strictly technical in character, the Organization's co-operation appeared to be highly appreciated by the Trusteeship Council.

(15) As the Commission was not required to take any decision on document 8C/ADM/19, it took note of it and proceeded to the next item on its agenda.

**ITEMS 9.6.2 AND 9.6.3 OF REVISED AGENDA: QUADRENNIAL REVIEW BY THE EXECUTIVE BOARD OF THE EMPLOYMENT OF SUBVENTIONS (1950-1953) (document 8C/ADM/20) AND QUADRENNIAL REVIEW OF THE DIRECTIVES CONCERNING RELATIONS WITH INTERNATIONAL NON-GOVERNMENTAL ORGANIZATIONS (document 8C/ADM/21)**

(16) Mr. VERONESE (Executive Board) pointed out that the document submitted to the Commission came from the Executive Board. The General Conference had instructed the Board to examine the employment of subventions granted to non-governmental organizations. The report covered the activities of those organizations during the past four years, which had been reviewed at the Board's thirty-eighth session.
(17) Mr. Veronese summarized the four conclusions and the six recommendations set out in Section I of the document. In particular, he drew the Commission's attention to the following facts:

(1) The co-operation of the non-governmental organizations with Unesco, and the subventions granted to them by the Organization had yielded results which the Secretariat could not have achieved alone.

(2) The percentage of the budget granted to non-governmental organizations as a whole tended to remain stable, but it was impossible to stabilize the proportion allotted to each field of work.

(3) Unesco was naturally particularly interested in the non-governmental organizations set up under its auspices; they enabled the Organization to save considerable sums of money.

(4) There were financial difficulties in the way of extending the geographical scope of organizations; moreover, certain highly specialized scientific organizations had great difficulty in finding national or even regional specialists in all countries.
(18) Mr. Veronese drew the Commission's attention to the recommendations of the Executive Board, in particular to the last two:

(v) The information contained in document 38 EX/7 should be used as a basis for the preparation of an appropriate publication designed to impart to the general public a fuller knowledge of the work accomplished in the field of international co-operation with the help of Unesco's subventions.

(vi) In preparing the next quadrennial review of the employment of subventions, it would be desirable to consider making use of the evaluation techniques used in the social sciences.

(19) Mr. RAADI (Iran) expressed his approval of the document in general and of the Executive Board's conclusions in particular. He drew the Commission's attention to the need for extending the geographical scope of non-governmental organizations to cover the whole world. He believed that the organizations made Unesco's work easier, and that, being non-governmental, they helped to give a proper balance to Unesco, which itself was a purely intergovernmental organization.
(20) Most of the non-governmental organizations were found in highly developed countries. The delegation of Iran recognized that to be unavoidable for the time being, but hoped that the state of affairs would not persist; the subventions granted by Unesco to non-governmental organizations should be proportionate to their endeavours to form national leaders. The Iranian delegate added that additional efforts should be made to ensure a larger attendance by delegates from distant countries at conferences held under the auspices of non-governmental organizations.

(21) Mr. MAHEU (Assistant Director-General) assured the Iranian delegate that the problem of geographical representation in the organizations was a major concern of the Secretariat, whose efforts had already produced appreciable results.
(22) He explained that there were 49 non-governmental organizations in receipt of subventions from Unesco. Twenty-seven of them were represented in

more than 20 countries and some of them in over 40 countries. That was particularly remarkable since 21 non-governmental organizations established under Unesco's auspices were founded very recently.

(23) Mr. ABEYWICKREMA (Ceylon) was in agreement with the views expressed by the Assistant Director-General and by the representative of Iran. He was prepared to support the recommendations contained in the Executive Board's review.
(24) It was a fact that a large number of scientific organizations were centred in Europe and held their conferences in European countries. That was possibly unavoidable, but it made it very difficult for certain distant and less highly developed countries to send representatives to those conferences, and to benefit from them fully. He therefore supported the suggestion that some proportion of the subventions granted to those organizations should be made available to small countries to cover the cost of participating in their work.

(25) Mr. POHL (Union of South Africa) recalled that his delegation had always been in favour of a concentration of efforts and a stabilization of the Organization's programme. He agreed that much valuable work could be achieved by the granting of subventions to non-governmental organizations. Strict control should, however, be exercised over the granting of the subventions and in that connexion the activities of the organizations in question should be subjected to the most thorough scrutiny to ensure that they were being carried out in a sufficiently important field and that they were of value to Unesco. The international organizations should be given financial assistance, but he was opposed to Unesco taking upon itself the greater part of the burden of supporting them.

(26) Mr. TUNCEL (Turkey) expressed his satisfaction with the report presented by the Executive Board. He thought the co-operation established between Unesco and the non-governmental organizations was of the very greatest importance and hoped that the organizations would be called upon to assist in planning some of Unesco's programme projects, as well as in carrying them out. He urged that the problem should be studied anew with a view to drawing up Unesco's future programmes.

(27) Dr. MUDALIAR (India) said that his delegation was much interested in the question of subventions for non-governmental organizations. Such organizations, in order to receive subventions from Unesco, should, however, be international in membership and in their activities. He approved the principle of broader geographical representation advocated by the Executive Board. If it was true, for historical and other reasons, that most of those organizations were in one continent, they should nevertheless, when convening conferences, attempt to meet in other parts of the world as well. That would give their activities greater publicity and would contribute to the broadening of their membership. He suggested for example that the International Association of Universities should embody national unions of universities and not merely individual universities.
(28) Although Unesco was responsible for the setting up of a number of the international organizations in question, it was nevertheless imperative that the latter acquire financial stability and learn to stand alone as soon as possible. He did not object to the granting of contracts, but thought it wrong to encourage absolute reliance on subventions from Unesco.
(29) Finally, some non-governmental organizations had their head offices at Unesco headquarters in Paris. In certain cases that arrangement had proved inconvenient; there was also a danger that it might have an adverse effect on the work of the Organization as a whole, and more particularly the Secretariat. He believed that it should be made clear to the organizations in question that Unesco would not be able to give them indefinite shelter. Their moving to other premises might require financial aid from Unesco, but action in that respect would have to be taken by the Executive Board and the Director-General.
(30) He paid a tribute to the work done by the Executive Board in connexion with the review before the Commission. His delegation fully supported the principles on which the Executive Board proposed to pursue its work.

(31) Mr. BENCHENEB (France) agreed with the Executive Board's recommendations but pointed out that most of Unesco's activities received insufficient publicity, and that, in particular, the assistance Unesco furnished to non-governmental organizations was passed over unmentioned. He asked what sort of publication was contemplated by the Executive Board in recommendation (v); if it was to be a pamphlet, he thought that it would not be the most useful type of publication. He considered that Unesco's activities needed constant publicity in the press, on the air and in films. In particular he felt that Unesco's efforts in that direction, unlike those of other international organizations, which received constant publicity, were reasonably effective only during sessions of the General Conference, which occurred only every two years.
(32) Referring to the Indian delegate's remarks, Mr. Bencheneb thought it out of the question that Unesco should grant aid to non-governmental organizations on a purely temporary basis; that would, in his opinion, be limiting Unesco's operations in an arbitrary fashion. He recalled that certain non-governmental organizations, older than Unesco, had served it as models when it was established.
(33) The French delegate urged that, on the contrary, Unesco's assistance should be permanent. It was true that the increase in non-governmental organizations might entail financial dangers, but they could be avoided by grouping the organizations into international associations.

(34) At the CHAIRMAN's request, Mr. BENCHENEB (France) explained that he was not submitting a formal proposal for the time being, but would like his observations to be included in the minutes of the meeting.

(36) In reply to a question by the representative of the Executive Board, Mr. Bencheneb also intimated that he was not referring to the wording of recommendation (v) but, more generally, to the interpretation of the term "publication".

(36) Mr. KELLY (Australia) thought that, in the case of nearly all the organizations reviewed, the Executive Board had been insufficiently critical. That could probably be explained by lack of time. On the face of it, reports on organizations failed to reveal in a number of cases that they were truly international in scope and in intention.
(37) With regard to the lack of international character, a number of organizations had clearly done nothing to establish contacts outside Europe. It was necessary to define the term "international organization" and to devise new criteria for the guidance of the Executive Board.
(38) In the case of the organizations set up by Unesco, and which could be considered as its children, some had been stillborn, some existed only on paper, while others submitted no reports on their activities for long periods at a stretch.
(39) In view of those considerations he proposed that the Commission, instead of pursuing the discussion, adopt the following resolution:

"That the recommendations before the Commission in document 8C/ADM/20 (including especially the reports on the subsidized organizations) and document 8C/ADM/21 be referred to a working party of nine members for a report to this Commission, the working party to consist of the representatives of India, Egypt, United Kingdom, Argentina, Colombia, Canada, France, Denmark and the Philippines".

(40) If, as he understood, the representative of France was unable to take part in the working party, he would propose the representative of Italy as an alternate.

(41) Mr. PAGE (Canada) supported the proposal to refer the matter for further study. It would be necessary to find out in greater detail about the achievements of the various organizations. Some had done good work, while others had shown few concrete results.
(42) There was a danger in merely listing organizations by countries since in some countries some were possibly not represented by more than one member. If such were the case, it was clear that no subvention could be granted.
(43) A further point was that many of the organizations did nothing to give publicity to the work and aims of Unesco.
(44) In conclusion, he said that it was possible to scan the whole field of human activity and find gaps where no international organization existed, but there was no need for such an organization in any given area, then surely there was no need to create one.

(45) Mr. VERONESE (Executive Board) recommended that the Commission examine the document as a whole without, for the time being, either formulating directives for the Secretariat regarding future subventions or examining each subvention separately.
(46) As the representative of the Executive Board, he had nothing to say with regard to the Australian delegate's proposal that a working party be set up to study the question of subventions, but he believed that the Commission should make a comprehensive study of all the documents on subventions before taking a decision on the proposed working party.

(47) Mr. FERNANDEZ MORENO (Argentina) seconded the Australian delegate's proposal.

(48) Mr. BAUGNIET (Belgium) considered that it would be premature and rash to adopt the Australian delegate's proposal and set up a working party of the Administrative Commission at that stage of the discussions, for it would not know how to organize its work. It was also doubtful whether it could secure better results in a few hours or a few days than had been achieved by the Executive Board. The working party could scarcely do more than discuss the few documents submitted to the Commission, whereas the Executive Board had had much fuller and more comprehensive information at its disposal.
(49) If a working party were in due course set up, the question of the accommodation of certain non-governmental organizations at Unesco headquarters could be submitted to it. The same decision could not be taken on each of those organizations; for some of them constantly needed to refer to information assembled by the Secretariat, which, in turn, could use their documentation daily.
(50) As the French delegate had declined to serve on the proposed working party, his place would be taken by the Italian delegate.

(51) The Australian delegate's proposal was rejected by 18 votes to 9, with 13 abstentions.

(52) The general discussion therefore continued.

(53) Mr. KOTSCHNIG (United States of America) said that his delegation was most interested in improving as far as possible, the relations between Unesco and the non-governmental organizations. The contributions of the latter to Unesco's work could be most valuable, but unless the relationship between them were sound, and unless the greatest care were taken in choosing the organizations to be subsidized, Unesco would be running a serious risk of squandering its funds. He supported the views expressed by the representatives of South Africa, Australia and Canada that the organizations subsidized should be alive and viable. Their normal overhead expenses, including such items as travelling and publicity, should be covered by their own resources.
(54) His delegation agreed that funds should be made available to bring eminent representatives of small but distant countries to conferences, but they should not go to cover the administrative expenses of the organizations in question, particularly the travelling expenses of administrative staff.
(55) Under the existing directives for the granting of subventions, the recipient organization had to provide a substantial proportion of the funds needed before obtaining a subvention. In that connexion, the review of the Executive Board provided no information, and he feared that a detailed analysis of the facts would show that some nine-tenths of the funds of the organizations were provided by Unesco. If that were the case, it was highly regrettable, since subventions should only be granted until such time as the organizations were able to provide their own resources.
(56) He did not know which non-governmental organizations had their head offices in the Unesco headquarters building in Paris and thought that some

measure of decentralization could be agreed upon. If their head offices were moved, Unesco should not carry the major burden of their administrative costs. Unesco subventions should be devoted exclusively to constructive activities.

(57) Mr. PHOTIADES (Greece) first emphasized the importance of the document submitted by the Executive Board. He thought that Mr. Veronese had made it clear that the Board had given much attention to the question. It was obvious that the Board and the Secretariat considered the problem of geographical representation in non-governmental organizations to be extremely important.
(58) Another no less serious problem arose - the control of the funds granted to non-governmental organizations. The Greek delegate urged that the Assistant Director-General should see that the reports submitted by the organizations were carefully checked by the Secretariat. The auditors also should supervise the use of the funds with the greatest vigilance.
(59) The delegate of Greece thought that a new, concise report on non-governmental organizations - and, in particular, on some of them - should be drawn up by the Executive Board. It was essential for the Board to sift them thoroughly, and for that purpose adequate information was required.
(60) The Greek delegate asked that his comments be included in the minutes.

(61) Mr. MARDONES RESTAT (Chile) wished to comment on the recommendations set forth in the Executive Board document, 8C/ADM/20. He was in agreement with the first. With regard to the second, he felt that the word "harmoniously" was too vague. He would prefer it to be stated that "greater support would be given to cultural activities", and asked for the inclusion of a statement to that effect.
(62) He was not in favour of the stabilization of subventions, as he considered such a course would be a mistake. There were organizations receiving subventions of more than $40,000 while others had no more than $1,000. Stabilization would perpetuate the existing allotments although it might be better to change them as time passed. With regard to the third recommendation, he urged that some criterion should be established for classifying non-governmental organizations by categories. Such a criterion should be applied, for example, to library organizations. In connexion with the fourth recommendation, he stressed the desirability of maintaining contact with the different regions. It was not enough for a non-governmental organization to be in touch with the Unesco Secretariat; it would be most useful for the members of non-governmental organizations to establish contacts with the National Commissions in their own countries. In that way, it would be easier to see whether the activities of the member or members in question, and of their organization, were really useful. He agreed with the French delegate's contention that subventions should not, as a rule, be temporary or partial. No limit should be placed on subventions so long as considerations of efficiency, or other circumstances, required them. At the request of the Chairman, the delegate of Chile said that he would present a document containing his suggestions to the Secretariat.

(63) Mrs. PATRONETTO VALIER (Italy) remarked that the Executive Board's report brought out the differences between the various non-governmental organizations. Their diversity was explained by the fact that some of them were purely scientific, while others, such as youth organizations, represented an important section of public opinion.
(64) The delegate of Italy was in agreement with the Executive Board's recommendations about the proposed publication. In her view, the document could be cast in such a form as to provide the critical study requested by certain members of the Commission. The publication might then act as a stimulus to non-governmental organizations as a whole.
(65) The delegate of Italy drew attention to certain anomalies in the Executive Board's report. A careful reading of the document showed that certain organizations had received the same subvention twice, that others had been active during 1951 and 1952, but had largely discontinued their work during later years, while, lastly, there were organizations which made entirely false claims that they had representatives in certain countries. The delegate considered that anomalies of that kind were sure to come to light if the Commission decided to set up a working party on the subject.

(66) Sir Charles WEBSTER (United Kingdom) was under the impression that a number of those taking part in the discussion did not appear to know a great deal about the non-governmental organizations and he thought that some of the charges made against the system as a whole were not justified.
(67) The non-governmental organizations were of the greatest importance to Unesco and vice versa. He personally had had a great deal of experience of their work and, without the assistance given them by Unesco, a great number would never have existed, particularly in the new world.
(68) Unesco was using the non-governmental organizations to an ever greater extent for implementing its projects. They provided valuable knowledge which would otherwise only be available to the Organization at much higher cost.
(69) With regard to the geographical expansion of their spheres of activity, it had frequently been difficult to find in other parts of the world corresponding institutions with which contact could be established. A fair degree of success had been achieved in the countries of Latin America, but in Canada, for example, progress had been much slower.
(70) He thought that those organizations which were doing valuable co-ordinating work should be allowed to retain their premises at Unesco headquarters; otherwise the work which Unesco would be compelled to do itself would be practically doubled. If on financial grounds such co-operation were prevented, considerable damage might result.
(71) He agreed that publicity as a whole was inadequate, and thought that the publication of a yearly handbook on the work of the non-governmental organizations would do much to obtain co-operation from abroad.

(72) Mr. FERNANDEZ MORENO (Argentina) remarked that some of the previous speakers had started by praising the work of the Executive Board, and had gone on to make criticisms and reservations. Perhaps, after hearing what had been said later, somebody would like

to correct that impression. He agreed with the statements of the delegates of India, Australia and the United States of America. In fact, 25 of the non-governmental organizations set up at Unesco's instigation had their headquarters in Paris, 9 in the United Kingdom, 3 in America, 1 in Switzerland, 1 in Belgium and 1 in the Netherlands. It would be better if headquarters were set up in different parts of the world. He endorsed the remarks of the delegate of Chile and asked, further, that a working party be set up.

(73) Mr. NOGUEIRA (Uruguay) was particularly in sympathy with the views of the delegates of the United States of America and Greece. He made a distinction between non-governmental organizations set up by Unesco, such as the Theatre Institute, and those which had applied to it for aid. Unesco had some responsibility for the existence and successful work of the former. A distinction should be drawn between different types of expenditure, between travel and administration costs, on the one hand, and expenditure on publications and fellowships, on the other. Account should also be taken of the non-governmental organizations which contributed their own funds.

(74) Mr. SANDOVAL VALLARTA (Mexico) wished to propose a draft amendment. With the Chairman's consent, he suggested that a working party be set up to study and report on non-governmental organizations, their practical usefulness, and whether or not they should continue to receive subventions.

(75) The delegate of Peru seconded the proposal.

(76) Mr. RIANO JAUMA (Cuba) asked that a study be made of the importance and usefulness of international non-governmental organizations, and of the extent to which the co-operation they furnished offset the subventions they received. He supported the delegate of Chile's views and seconded the draft resolution proposed by the delegation of Mexico. He agreed with the opinions expressed by the delegates of the United States of America and Greece.

(77) Mr. MORAZE (France) referred to the remarks already made by Sir Charles Webster, who represented a country which was not in the habit of taking justification for expenditure lightly. If the work done by the non-governmental organizations were put in the hands of experts employed directly by Unesco, the cost would be enormous. He therefore concluded that the non-governmental organizations, 25 of which had their headquarters in Paris, enabled Unesco to make considerable savings.
(78) Mr. Morazé would be the first to recommend an equitable geographical distribution of non-governmental organizations if world-wide travel became simple and well organized.
(79) He drew the Commission's attention to the fact that certain scholars were not particularly anxious to take part in work organized by Unesco itself and preferred to co-operate with non-governmental organizations, established well before Unesco, which had chosen their headquarters quite freely, and without reference to fair geographical distribution.
(80) The delegate of France added that administrative expenses should not be confused with direct programme costs. In fact, the more administrative expenditure was cut, the more money would be available for action. It would also be inadvisable to compel organizations which had been in existence only a few months, to extend their geographical scope too soon. Similarly, it would be unwise of the Secretariat to encourage the formation of non-governmental organizations at a great distance from its own headquarters.
(81) The delegate of France agreed with the United Kingdom delegate's view that a resolution should not be lightly adopted without a proper appreciation of all its consequences or a thorough investigation of the machinery which it was desired to change. He would deplore any decision taken by the Commission which might be interpreted as showing lack of confidence in the Executive Board. The discussion should be based on the report presented by the Board.
(82) Mr. Morazé also suggested that, if the Committee wished a special study to be made of the geographical distribution of the headquarters of non-governmental organizations, it could be carried out by the working party.

(83) Mr. RIEGNER (Vice-Chairman of the Conference of Non-Governmental Organizations having consultative status with Unesco) thanked the Director-General and the Executive Board for their assessment of the work of the non-governmental organizations, and the Assistant Director-General for the explanations he had given the Commission; he assured the Commission that the non-governmental organizations would not fail to make a close study of the criticisms advanced during the debate. He warned the Commission against over-generalization, which he did not believe could have good results. For that reason, he was grateful to the delegations of the United Kingdom and France, which had defended the non-governmental organizations and explained the difficulties that they had to overcome. The organizations had no fear of financial supervision with regard to the subventions they received from Unesco, but, on the contrary, thought it desirable. They were doing useful work and were proud of the confidence shown in them by the General Conference of Unesco in giving them financial assistance; and were fully aware of the responsibility towards States which that confidence imposed upon them.
(84) In connexion with widening the geographical scope of non-governmental organizations, or the idea of making them world-wide, Mr. Riegner said that the organizations realized that they should one day cover the whole world. There were various reasons, chiefly financial, which prevented their doing so for the time being. He asked for increased assistance, which the organization could devote entirely to establishing themselves in the continents where they were not yet represented, or to bringing people from such regions to their international conferences, for they were in a real sense centres for work and propaganda in support of Unesco.
(85) Mr. Riegner said that the Director-General had called the representatives of non-governmental organizations together for consultation on Unesco's programme; at that consultation the organizations had made a number of observations. They had also noted with regret that the subventions and contracts coming under the Department of Education mounted to a lower

total than those under other Departments, such as the Department of Natural Sciences. Mr. Riegner added that it would be very useful to bring representatives of remote countries to conferences on education.

(86) In comparing the usefulness of contracts with that of subventions, the representatives of the non-governmental organizations had been anxious, above all, to avoid refusing any type of aid. Even the smallest subventions invariably produced good results as a whole.

(87) Finally, the speaker stressed the importance that the non-governmental organizations attributed to the Executive Board's recommendation (v). The Conference of Non-Governmental Organizations had been unable to take a formal decision on that proposal. But he wished to inform the Commission that, at previous conferences, many organizations had expressed a hope that the contribution of the non-governmental organizations to the work of the United Nations and Unesco would be better publicized. There was no doubt that the organizations would welcome an objective, critical study designed to evaluate their contribution.

(88) Mr. MAHEU (Assistant Director-General) said that he had not yet spoken during the discussion because the document being examined was issued by the Executive Board. But he could no longer keep silent in a discussion which involved Unesco's general policy of promoting international co-operation by assistance to non-governmental organizations.

(89) Mr. Maheu wished to remind the Commission of certain basic facts. The Executive Board's review of the employment of subventions (document 8C/ADM/20) was a critical study dealing with the past, while the quadrennial review of the Directives concerning relations with non-governmental organizations (document 8C/ADM/21) dealt with the future; or, in other words, considered possible amendments to the Directives concerning the grant of subventions. Some of the criticisms made in the Commission were answered in the second document, and the Director-General considered that those replies were satisfactory.

(90) Mr. Maheu was surprised that certain members of the Commission had complained that the quadrennial report submitted by the Executive Board was not adequate; he observed that, of all the documents which the General Conference had to consider, the review came next in bulk after the proposed programme and budget and the Director-General's Report. Nevertheless, not all the material which the Executive Board had used in drawing it up was included in the document. The Board kept constant watch over the working of the non-governmental organizations, and its report was the result of the very close contacts always maintained, particularly in that field, between the Secretariat and the Executive Board.

(91) Replying to a question asked by the delegate of the Union of South Africa on the increased in subventions in the Proposed Programme and Budget for 1955-56, Mr. Maheu explained that the increase, which amounted to $96,000, was exactly equivalent to the sums allocated to the Unesco Institutes in Germany. The appropriations would thenceforward appear as subventions, whereas previously they had been granted by way of contracts. There was, therefore, no question of increasing the budget, but simply of transferring funds from one category of expenditure to another.

(92) In reply to the comment made by the delegate of India in connexion with the International Association of Universities, which, in the delegate's view, should include not only universities, but also national unions of universities, Mr. Maheu said that each non-governmental organization was free to adopt its own statutes. That freedom was one of the privileges of the non-governmental organizations. The Secretariat no doubt had some moral influence over them and frequently gave them advice; but any pressure going beyond the limits of suggestion and persuasion would be directly contrary to the aims pursued by Unesco in co-operating with the organizations.

(93) With regard to the remarks made by the delegate of India, and endorsed by the delegate of the United States of America, concerning the fact that certain non-governmental organizations were housed in Unesco's headquarters in Paris, Mr. Maheu said that the number of organizations involved was very small (about 10), and, with one or two exceptions, they had made agreements with Unesco under specific resolutions of the General Conference.

(94) In reply to the delegate of Australia, Mr. Maheu said that the non-governmental organizations set up by Unesco, which might be called Unesco's "children", were not arbitrary creations of the Secretariat, but had been established in pursuance of explicit resolutions of the General Conference. Their working or their usefulness might be re-examined, but there could be no doubt of their origin. Some of them had been alleged to be "still-born"; the Assistant Director-General would like to know which. Some of the children were very young but undoubtedly sturdy. As far as the organizations said to exist only "on paper" were concerned, Mr. Maheu considered that the previous statements by the delegates of France and the United Kingdom, who had had wide personal experience of the work of the organizations, had adequately answered the allegations, which were, to say the least, somewhat rash. Mr. Maheu knew of no non-governmental organization which could be said not to have submitted a report and accounts to Unesco.

(95) Like the delegate of Greece, Mr. Maheu was in favour of a new study of non-governmental organizations if it were carried out on a selective basis. But, referring to what the delegate of the United Kingdom had said, he warned the Commission against hasty generalizations likely to upset the whole policy with regard to the organizations.

(96) In conclusion, he considered that the establishment of a working party would be necessary only if there were real uneasiness on the subject; but, frankly, he could see no objective justification for it. In any case, the working party on the decentralization of Unesco's activities could not be made responsible for carrying out that further task, because the Advisory Committee on Programme and Budget was awaiting the working party's recommendations in order to draw up its report for the Programme and Budget Commission, which was already very much behind in its work.

(97) Mr. VERONESE (Executive Board) said that the Executive Board might be gratified that the discussion

on the documents concerning non-governmental organizations had been so wide. He endorsed the Assistant Director-General's suggestion that the survey of the past, set forth in document 8C/ADM/20, could not be divorced from the proposals for the future appearing in document 8C/ADM/21. In conclusion, he thought that all the work done would serve to provide general directions and more exact references for the future Executive Board of Unesco.

(98) Sir Charles WEBSTER (United Kingdom) would not object to the whole matter being referred to a working party for further consideration if that could help the Conference. The subject, however, was a most complicated one, and there was a tremendous need to study as much of the evidence as could be made available. It was not a good plan to take hurried decisions on such an important question and he therefore proposed that the salient points of the discussion be made known to the Executive Board, which might then devote further study to the matter with a view to producing in two years' time fresh conclusions on the basis of new evidence.

(99) The CHAIRMAN proposed that the discussion be pursued at the next meeting.

(100) It was so agreed.

The meeting rose at 1.20 p.m.

# SIXTEENTH MEETING

*25 November 1954 at 3.30 p.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEMS 9.6.2 AND 9.6.3 OF REVISED AGENDA: QUADRENNIAL REVIEW BY THE EXECUTIVE BOARD OF THE EMPLOYMENT OF SUBVENTIONS (1950-1953) (document 8C/ADM/20) AND QUADRENNIAL REVIEW OF THE DIRECTIVES CONCERNING RELATIONS WITH INTERNATIONAL NON-GOVERNMENTAL ORGANIZATIONS (document 8C/ADM/21) (continued)**

(1) Mr. SANDOVAL VALLARTA (Mexico) said that, in view of the satisfactory explanations given by the representatives of the Director-General and the Executive Board, and as it was clear that there was no need to set up a special working party to consider documents 8C/ADM/20 and 8C/ADM/21, the delegation of his country withdrew the draft amendment it had proposed at the previous meeting.

(2) Sir Charles WEBSTER (United Kingdom) thanked the delegate of Mexico for having reconsidered his attitude. The discussion in the Commission had been of great interest and many points of view had emerged, but it was clear that if the problem were submitted to a working party it would not be possible for the Commission to submit a report to the present Conference. He therefore moved the following proposal:

"The General Conference, having considered the voluminous reports on international non-governmental organizations submitted in document 8C/ADM/20, approves the resolutions in document 8C/ADM/20 and refers back to the Executive Board the suggested changes in document 8C/ADM/21 to be reconsidered in the light of the discussions in the Administrative Commission, and where necessary with the assistance of special experts appointed by the Executive Board. The Executive Board should also refer the above documents, with the report of the discussions in the Administrative Commission, to the National Commissions and invite them to forward their comments to the Executive Board for its consideration. In the light of the above information and the comments of the National Commissions, the Executive Board will make a further report on the suggested changes in the directives to the ninth session of the General Conference".

(3) The proposal was seconded by the delegate of the Philippines and supported by the delegates of Belgium, Argentina, France and the United States of America.

(4) Mr. KELLY (Australia) said that the proposal of the United Kingdom delegate went a long way towards meeting the views expressed at the previous meeting by the delegates of Australia, Canada, Mexico, India and Argentina. He supported the proposal and submitted the following criteria, to be borne in mind when granting subventions to international organizations and institutions:

1. Were the constitution and work of the organization truly international in character and scope?
2. Were the constitution and work of the organization in accordance with the aims, ideals and programme of Unesco?
3. Was Unesco the most appropriate body to provide assistance?
4. Did the organization require the proposed assistance for its continued and effective contribution to the aims of Unesco?

(5) The third and fourth points were especially important and he proposed that all four should be included in the Summary Record for the guidance of the Executive Board.

(6) Mr. POHL (Union of South Africa) asked whether adoption of the United Kingdom delegate's proposal would preclude furtner discussion of document 8C/ADM/21.

(7) The CHAIRMAN said that there could be no further discussion at the present juncture, since the Organization would continue to work under existing directives for the next two years. In reply to a further question from the South African delegate, the Secretariat would welcome recommendations for improving on the draft alterations in document 8C/ADM/21.

(8) Dr. MUDALIAR (India) supported the proposal of the United Kingdom delegate. With regard to the four criteria suggested by the Australian delegate, while Unesco had no intention of interfering in the affairs of non-governmental organizations, it had an obligation to see that certain fundamental principles were fostered by the organizations to which it proposed granting subventions. The Secretariat no doubt had means of conveying the views of the Conference to those organizations without impinging on their freedom. He hoped that the Executive Board's proposed alterations would not be entirely ignored during the coming two years, since he was not in favour of the existing directives remaining in force unchanged. The Executive Board must be given some latitude in that respect.

(9) Mr. MAHEU (Assistant Director-General) stressed the importance of the question raised by the delegate of India. The United Kingdom delegate's proposal, as it was worded, meant that the existing directives would remain in force until the ninth session of the Conference. According to that proposal, the Executive Board was to reconsider the question and engage in extensive consultations, which would lead to a new report, on which the ninth session of the Conference would have to take a decision. The Indian delegate's proposal would leave the Executive Board some latitude to make transitional arrangements in the light of the Commission's discussions and the results of its own consultations. If that proposal were accepted, the point would have to be made clear in the draft resolution, which, as it stood, asked only that a still fuller report should be submitted to the Conference at its ninth session.

(10) Mr. KOTSCHNIG (United States of America) found himself, for the first time, in opposition to the delegate of India: the question was too important to admit of any lack of precision. The United Kingdom delegate's proposal provided specifically for the current regulations to remain in force for two more years and, if the Executive Board were to be given the latitude desired by the delegate of India, the Commission would have to undertake a detailed study of document 8C/ADM/21, since not all the proposed alterations were acceptable.

(11) Dr. MUDALIAR (India) had not intended to advocate too wide a latitude for the Executive Board. He nevertheless withdrew his suggestion in view of the objections of the delegate of the United States of America.

(12) Mr. MAHEU (Assistant Director-General) explained that he had been trying to point out that the United Kingdom delegate's proposal meant that the existing directives would continue to apply, since only the Conference could alter them.

(13) Referring to document 8C/ADM/21, Mr. Maheu drew attention to the proposed amendment to clause 2 of Section B (Beneficiaries) (page 11), the purpose of which was to cover more adequately the variety of bodies set up in implementation of resolutions of the General Conference - such as the Unesco Institutes in Germany. As the Programme and Budget Commission, at its meeting that morning, had approved the subventions to those three institutes, the amendment to the Directives was necessary to make that decision legal. He therefore asked the Commission, as an exception, to accept the following new provision for the period 1955-56: "subventions may be granted to non-governmental bodies set up in implementation of a resolution of the General Conference".

(14) Sir Charles WEBSTER (United Kingdom) supported the request of the Assistant Director-General, but suggested that it should be included in a separate resolution.

(15) The first proposal of the United Kingdom delegate was adopted by the Commission.

(16) The delegate of the United Kingdom then submitted a second proposal: "That the Administrative Commission approves the action with regard to the three institutes in Germany, the problem having already been fully considered by the Programme and Budget Commission".

(17) The proposal was duly seconded and adopted.

**ITEM 9.6.4 OF REVISED AGENDA : RECOMMENDATIONS OF THE EXECUTIVE BOARD REGARDING APPLICATIONS BY INTERNATIONAL NON-GOVERNMENTAL ORGANIZATIONS FOR ADMISSION TO CONSULTATIVE ARRANGEMENTS**
(Documents 8C/ADM/22 and Annexes 1 and 2; Addenda to document 8C/ADM/22 and to Annex 1 of that document)

(18) The CHAIRMAN invited the representative of the Executive Board to introduce the documents.

(19) Mr. VERONESE (Executive Board) explained that the Executive Board, at its thirty-ninth session, had considered applications for admission to consultative arrangements from 28 international non-governmental organizations, and the comments of Member States on those applications. The results were set forth in document 8C/ADM/22, Add.2. The Executive Board recommended the General Conference to admit 21 of those organizations to consultative arrangements. It had recommended refusal in only one case - that of the World Chess Federation - but recommended that the decision on six other organizations be postponed until the ninth session. The Board considered that it had insufficient information about the Académie Internationale de la Céramique, the International Humanist and Ethical Union and the Union Internationale pour la Liberté d'Enseignement to make a recommendation either for or against the

admission of those organizations, while, as the applications from the International Union of Students, the World Federation of Democratic Youth and the International Student Movement for the United Nations had not arrived by the prescribed date, they could not be submitted for prior consideration by the Member States, and therefore had to be postponed.

(20) The CHAIRMAN invited discussion on the Appendices to document 8C/ADM/22, bearing in mind the Executive Board's recommendations in document 8C/ADM/22 Add.2.

Appendix 1: Conference of Internationally-Minded Schools

(21) Approved without comment.

Appendix 2: Co-ordinating Secretariat of National Unions of Students

(22) Approved without comment.

Appendix 3: International Association for Liberal Christianity and Religious Freedom

(23) Approved without comment.

Appendix 4: International Association for Vocational Guidance

(24) Approved without comment.

Appendix 5: International Catholic Film Office

(25) Approved without comment.

Appendix 6: International Confederation of Professional and Intellectual Workers

(26) Approved without comment.

Appendix 7: International Council for Educational Films

(27) Approved without comment.

Appendix 8: International Federation of Catholic Youth

(28) Approved without comment.

Appendix 9: International Federation of Senior Police Officers

(29) Mr. SOLDATOV (Union of Soviet Socialist Republics) asked what relation that organization bore to Unesco.

(30) Dr. MUDALIAR (India) quoted the following extracts from the comments submitted by the Government of India in a letter to Unesco dated 1 July 1954 (document 8C/ADM/22, Annex II, page 2): "Some of the organizations appear to have been established recently and, unless we have an opportunity of observing their work for some time, it would be difficult to say whether the organizations should receive consultative status with Unesco". "In addition, these organizations should not confine their activities to particular religious or racial groups".
(31) He enquired to what extent and in what manner Unesco proposed to co-operate with the International Federation of Senior Police Officers.

(32) Mr. MAHEU (Assistant Director-General) said that the Executive Committee of the International Federation of Senior Police Officers had repeatedly expressed its interest in Unesco's programme and its desire that the police should be used not only for the punishment, but also for the prevention of crime, especially among juveniles. The Committee considered that the police had an important part to play in society in that respect and that the International Federation of Senior Police Officers could help materially in solving the problem of juvenile delinquency - a tragic problem, which no one concerned with education could disregard. Mr. Maheu concluded that it would be advantageous to extend the collaboration that already existed between Unesco and that organization.

(33) Mr. VERONESE (Executive Board) said that the discussions in the Board had dealt with the same point. The Board's recommendation was based on two considerations: in the first place, the Federation was not an international police organization, but an international federation of senior police officers whose object was to supply its members with studies bearing on the social aspects of their difficult work; in the second place, if Unesco co-operated with the Federation, both parties would be able to benefit from the exchange of information.

(34) Mr. DE HOOG (Netherlands) had attended the congress held by the Federation at The Hague in 1951, and the leaders of the organization had shown the keenest interest in Unesco's activities. He had given a lecture lasting an hour, and the lively discussion that ensued had lasted still longer.

(35) Mr. BENCHENEB (France) pointed out that the senior police officers had a profound knowledge of society and of the means of diagnosing the causes of the evils afflicting it. They were, in their way, philosophers, who wished to give their colleagues in other States the benefit of their experience. Their fundamental aim was to make mankind better - and that was also Unesco's aim.

(36) Dr. MUDALIAR (India) said that his request for information had not been made in a spirit of levity. As to the activities of the Federation, the mental health of children was surely not the concern of police organizations but came within the domain of the World Health Organization, which was performing valuable work in that field.

(37) At the request of the delegate of the USSR, the proposal to admit the International Federation of Senior Police Officers to consultative status was put to the vote and adopted by 18 votes to 12 with 9 abstentions.

Appendix 10: International Federation of the Periodical Press

(38) Approved without comment.

Appendix 11: International House Association and Alliance Internationale des Anciens de la Cité Universitaire.

(39) Mr. BAUGNIET (Belgium) was in favour of admitting those two associations, but considered that it would be more appropriate to admit them separately.

(40) Mr. VERONESE (Executive Board) explained that the Board had thought the proposed procedure would have the advantage of giving both associations consultative status, while facilitating their relations with Unesco. The Board had indeed recommended that the procedure be adopted generally.

(41) Mr. BAUGNIET (Belgium) still thought that each of the associations, which was a distinct legal entity, should assume its own responsibilities towards Unesco, though they could, if they found it more convenient, make one person, representing them both, responsible for correspondence with Unesco.

(42) Mr. KOTSCHNIG (United States of America) said that the Economic and Social Council had for many years been endeavouring to foster liaison between comparable organizations and to grant group consultative status. Progress had been limited, but where successful, as with the International Touring Association and the International Touring Alliance, it had proved of great convenience from the administrative point of view, and valuable in bringing about closer co-operation between non-governmental organizations. Unesco, whose consultative relations were, to some extent, modelled on those of the Economic and Social Council, should therefore accept and not oppose such a request.
(43) He supported the application.

(44) Mr. SANDOVAL VALLARTA (Mexico) saw no reason for admitting the International House Association and the Alliance Internationale des Anciens de la Cité Universitaire separately, since in paragraph 8 of Appendix 11 (document 8C/ADM/22, Annex I, page 23) it was clearly stated that the two organizations had concluded an agreement "by which members of one association are considered as members of the other". That meant that approval of one organization would adequately cover the other.

(45) The application was approved.

Appendix 12: International Labour Assistance

(46) Approved without comment.

Appendix 13: International League for the Rights of Man

(47) Mr. AFTALION (Argentina) maintained that the recognition and admission of organizations to consultative status always entailed some risk to Unesco's prestige. From that point of view, the Directives so far in force seemed to be somewhat inadequate; the Government of India had indeed stated, in an official document, that Unesco should lay down definite criteria on the question.
(48) In the particular case of the International League for the Rights of Man, the only material available for forming an opinion of its activities was that contained in paragraph 7 of Appendix 13 (document 8C/ADM/22, Annex I, page 26). But a close perusal of the second part of paragraph 7 immediately revealed that the protest meetings organized by the League, and referred to in the above-mentioned document, were not in keeping with the guiding principles of Unesco, although neither the League nor its affiliated bodies might take part in street demonstrations with political aims.
(49) For that reason, the delegation of Argentina felt obliged to oppose the recognition sought by the International League for the Rights of Man; and if his opposition was not considered to be sufficiently well founded, he requested that more information about the "main activities" of the League be collected, for the prestige of Unesco was at stake.

(50) Mr. BENCHENEB (France) reminded the Commission that the aim of the League for the Rights of Man was well known. The League was trying, by all means in its power, to give man a higher sense of his dignity. In many countries, it had had to fight to gain recognition of its point of view, and it had done so with great dignity. The French delegation was sorry to find that, though deeds of courage were rewarded on the battlefield, they were not rewarded in time of peace. The League for the Rights of Man had consultative status with the Economic and Social Council; it enjoyed a high reputation and did not seek to cause disturbances; its activities were exactly in line with those of Unesco; and the French delegation was strongly in favour of its admission.

(51) Sir Charles WEBSTER (United Kingdom) said that his Government had investigated the organization and whole-heartedly supported its application.

(52) The application was approved by 30 votes to 2 with 5 abstentions.

Appendix 14: International Social Science Council

(53) Approved without comment.

Appendix 15: International Union for Protecting Public Morality

(54) Approved without comment.

Appendix 16: Société européenne de Culture

(55) Approved without comment.

Appendix 17: Universal Esperanto Association

(56) Approved without comment.

Appendix 18: World Chess Federation

(57) Mr. STEPANEK (Czechoslovakia) asked what were the Executive Board's reasons for rejecting the application.

(58) Mr. VERONESE (Executive Board) said that the application from the World Chess Federation had given rise to lengthy discussions in the Board. Arguments

involving history and educational theory had been adduced, and two currents of opinion had emerged: one side regarded chess as a form of recreation, whereas the other considered that it could contribute to cultural and intellectual development. The former school of thought had prevailed, and the majority had decided against admitting the World Chess Federation.

(59) Mr. STEPANEK (Czechoslovakia) disagreed with the views of the Executive Board. Chess was an important intellectual activity and helped to develop and strengthen co-operation between nations. He moved that the application be accepted.

(60) The proposal was seconded by the delegate of Spain and supported by the delegates of the USSR, the United Kingdom and Nicaragua.

(61) Mr. KOTSCHNIG (United States of America) supported the views of the Executive Board. After careful consideration, he could find no reasons for supporting the application or any ways in which the Federation could contribute to the aims and activities of Unesco. None of its activities - which he quoted - qualified it for consultative status with Unesco, and the argument that it provided mental training might equally well be applied to Latin or Bridge. It was essential to set a limit to the organizations which could be admitted to consultative status.

(62) Mr. POHL (Union of South Africa) associated himself with the opinions of the United States delegate. The privilege of consultative status should be granted sparingly and only to organizations which were well known and were believed capable of making a practical contribution to the work of Unesco. A limit must be set, to prevent Unesco from becoming an instrument for encouraging innumerable organizations with sectional interests.

(63) Sir Charles WEBSTER (United Kingdom) supported the application. Chess was a cultural exercise and as such was entitled to a place in the programme along with other forms of culture on the agenda. It was, moreover, a very special kind of exercise, with a long history of association with the cultures of many countries, and had played a great part in the intellectual deve'opment of mankind.

(64) Mr. WIECHECKI (Poland) asked on what criteria the applications of non-governmental organizations were accepted or refused. The Commission had just agreed to admit the International Federation of Senior Police Officers, whose aims he reread. Mr. Wiechecki could not see in what way the World Chess Federation, which organized international meetings for cultural purposes, was less suitable for admission than the International Federation of Senior Police Officers.

(65) Dr. MUDALIAR (India) opposed the application. The Indian Government felt that Unesco was not sufficiently discriminating in its admission of organizations to consultative status, and shared the opinion of the delegate of Argentina that some organizations only wished to use Unesco as a stepping stone to enhance their position within Member States. He asked how many organizations were already associated with Unesco and urged that before adding to the number a set of firm criteria for admission should be drawn up, studied by the Executive Board and submitted to the next General Conference.

(66) In reply to the Indian delegate's question, Mr. HERCIK (Secretariat) said that Unesco had consultative arrangements with 105 international non-governmental associations.
(67) In reply to the Polish delegate, he mentioned the four criteria for admission to consultative arrangements, which were contained in the Directives issued by the General Conference at its fifth session and were still in force (cf. document 8C/ADM/21, page 4).

(68) The CHAIRMAN asked for a vote on the proposal to admit the World Chess Federation to consultative status with Unesco.

(69) The proposal was rejected by 20 votes to 17 with 7 abstentions.

Appendix 19: World Movement of Mothers

(70) Approved without comment.

Appendix 20: Académie internationale de la Céramique

(71) Mr. HELLER (Académie internationale de la Céramique) said that the organization which he represented was not only carrying out a programme entirely in keeping with resolutions 4.321 and 4.322 of the Proposed Programme and Budget for 1955-56, but was also, by its very structure, a small-scale model of Unesco, as its members were appointed by their respective governments.
(72) Up to 1 June 1954, the governments of 43 countries had given it their support, and it was clear, from the list of those countries (paragraph 5, Appendix 20, Annex I. Add. 1 to document 8C/ADM/22), that the Academy was neither a private nor a restricted organization, but represented thousands of teachers and workers in ceramics throughout the world.
(73) Therefore, in consideration of the aims and activities it pursued, the Academy requested that Unesco admit it to consultative arrangements.

(74) Mr. VERONESE (Executive Board) stated that the Board proposed to defer action on the application, on the grounds that the Académie internationale de la Céramique covered a rather narrow specialized field; the Board would more readily approve the admission of a broader organization of decorative artists, which could be established within the Association of Artists, founded with Unesco's help.

(75) Mr. PAGE (Canada) agreed with the views of the Executive Board. He asked in what way the Canadian Government had supported the Académie internationale de la Céramique.

(76) Mr. HELLER (Académie internationale de la Céramique) having replied that the Canadian Department of Education had appointed a representative to his organization, Mr. PAGE (Canada) denied that that was the case and deplored the many similar inaccuracies

which had come to light during the discussion of non-governmental organizations.

(77) Mr. KOTSCHNIG (United States of America) said that the organization under discussion had great potentialities which might justify its admission to consultative status at the proper time. It was clear, however, from the preceding remarks that its organizational situation was at present somewhat obscure. The Académie had been set up very recently, and delegates had not had time to ascertain its relations with their own countries. He therefore proposed that action be postponed until the next General Conference and hoped that by then there would be sufficient justification for whole-hearted support.

(78) The proposal of the United States delegate was adopted.

Appendix 21: International Federation of Children's Communities

(79) Mr. FRAGA IRIBARNE (Spain) noted that Spain appeared in paragraph 5 of Appendix 21 (document 8C/ADM/22, Annex I. Add.), although his country's National Commission had not yet been able to discover who was its representative on the International Federation of Children's Communities. He therefore asked for the name of the said representative.

(80) Mr. HERCIK (Secretariat) stated that the International Federation of Children's Communities was represented in Madrid by a correspondent, Professor Bosch Marin. The Federation was composed partly of communities and partly of groups of communities.

(81) Mr. FRAGA IRIBARNE (Spain) said that the information given confirmed what he had thought, as the person just named was not the Director of any institute of that kind in Spain. As, in addition, the Children's City (Ciudad de los Muchachos) in Madrid, which was the most important organization of its kind in Spain, was not represented in the Federation, he asked that a vote be taken on the item.

(82) On the proposal of the delegate of Spain, a vote was taken on the admission of the International Federation of Children's Communities.

(83) The application was approved by 16 votes to 5 with 16 abstentions.

Appendix 22: International Federation of Women Lawyers

(84) Miss POLICARPIO (Philippines) said that, although small in membership, the Federation's function was as important as that of other organizations whose applications had been accepted. It was essential to give women the opportunity to participate in the work of Unesco and she supported the application for admission.

(85) Mr. MARDONES RESTAT (Chile) felt that the general features of the professions for which university training was necessary did not justify an internal division into men and women; and that, contrary to the implications of the application of the International Federation of Women Lawyers (document 8C/ADM/22, Annex I. Add.), it would be more logical to have one organization for such professions, so as to avoid such difficulties.

(86) Miss POLICARPIO (Philippines) agreed with the delegate of Chile on the need for concentration in professions but pointed out that not every woman lawyer had the opportunity to practise, and many, like herself, were teachers.

(87) Mrs. HEFFELFINGER (United States of America) warmly supported the Federation, whose objects included the protection of children, the promotion of opportunities for women in industry, business and professions, and the securing of equal rights for women.

(88) The application was approved.

Appendix 23: International Humanist and Ethical Union

(89) It was decided to recommend that a decision be postponed until the ninth session of the General Conference.

Appendix 24: International Union for the Liberty of Education

(90) It was decided to recommend that a decision be postponed until the ninth session of the General Conference.

Appendix 25: World Union of Catholic Teachers

(91) Approved without comment.

Appendix 26: International Union of Students

(92) Replying to a question from the Czechoslovak delegate, who wished to know why a decision on the application of the International Union of Students had been deferred, Mr. VERONESE (Executive Board) stated that, as he had already mentioned, the Board had recommended that action be postponed (as in the cases of the World Federation of Democratic Youth and the International Student Movement for the United Nations) on the ground that the organizations' applications had not been submitted by the date stipulated, in time for Member States to express their opinions.

(93) Mr. HAYEK (Czechoslovakia) did not consider the Executive Board's recommendation was justified. He pointed out that the International Union of Students had submitted its application for membership to the Secretariat on 18 September 1954, at the same time circulating full details of its work to Member States. Document 8C/ADM/22, Annex I. Add. 2 had been distributed on 21 October 1954. It was now 25 November, and the Czechoslovak Government considered that there had been time enough for Members to form an opinion on the aims and activities of the Union, particularly as the application was not a new one, but a request for review of a decision taken by the General Conference at its seventh session. That decision had been based on arguments which, in the opinion of the

Czechoslovak Government, did not accurately reflect the facts; it had been alleged that the International Union of Students had taken too little interest in Unesco's aims and activities, while in fact, in that same year (1952), the Union had taken part in the deliberations of a working party organized in consultation with Unesco. He thought it no more than justice to right a decision taken on the basis of insufficient information, and said it was in the interests of Unesco itself that the Czechoslovak Government recommended that the Union, which had been established almost simultaneously with Unesco and the United Nations, and whose programme faithfully mirrored the fundamental ideas of those two organizations, be accorded consultative arrangements. The maintenance of the closest possible relations with United Nations bodies, and with Unesco in particular, was mentioned in the Union's constitution as being one of its permanent activities. The Czechoslovak delegate considered that, among the applications submitted at the current session of the Conference, the Union and the World Federation of Democratic Youth were the organizations most deserving of having consultative arrangements with Unesco. He pointed out that the membership of the International Union of Students was world-wide, and mentioned its various activities, including the organization of world festivals, which did much to spread and foster the ideas Unesco stood for; thanks were due to the Union for having made the ideal of international understanding between young people a reality. In conclusion, the Czechoslovak delegate felt that the Commission knew enough about the Union's activities and its past record of co-operation with Unesco to recommend that the Conference grant it consultative arrangements.

(94) Mr. TAMAS (Hungary) maintained that the organization and activities of the International Union of Students and the World Federation of Democratic Youth (document 8C/ADM/22, Annex 1. Add. 2) were in entire conformity with the conditions which international non-governmental organizations were required to fulfil (document 8C/ADM/21). He recalled that when the World Confederation of Organizations of the Teaching Profession had sought admission to consultative arrangements in 1952, the postponement then recommended by the Executive Board to the seventh session of the General Conference, which was similar to the postponement suggested in the cases under consideration, evoked an energetic protest from the delegate of the United States of America. He therefore proposed that the applications of the two organizations be approved.

(95) Mr. PAGE (Canada) moved that consideration be postponed until the next session of the General Conference, first because the Commission had already approved the application of a student organization - the Co-ordinating Secretariat of National Unions of Students; and secondly, because of the lack of adequate information to support the application at the present juncture.
(96) He recalled the discussions at the seventh session of the General Conference, when he had been Chairman of the working party set up to deal with the problem. Since that time he had acquired additional information on the International Union of Students, and he quoted figures which showed that, while on paper representation appeared to be adequate and well distributed geographically, many of the affiliates were in fact fragmentary organizations in no way representative of their respective countries or of university students.

(97) Sir Charles WEBSTER (United Kingdom) strongly supported the Canadian delegate's proposal, not only on technical grounds, but because of the character of the organization, which appeared to be more political than educational. He reminded the Commission that the Economic and Social Council had withdrawn its consultative rights.

(98) Mr. MAHEU (Assistant Director-General) reminded the Commission that the papers submitted to it were dated 21 October; on the same date, in accordance with the Rules of Procedure, the Director-General had circulated them for information to the Member States, some of which had forwarded comments. Those comments had arrived after the final date, 10 November, too late for inclusion in the printed document. They had been received on 16 November, after the Conference had opened, and had been communicated verbally to the Executive Board, and duly noted. A number of Member States had supported the Union's application (Hungary, Czechoslovakia, USSR, Ukraine and Byelorussia), while two States had opposed it (United Kingdom and United States of America).

(99) Mr. SOLDATOV (Union of Soviet Socialist Republics) said that, if it were granted consultative status, the International Union of Students could make an important contribution to Unesco's work for international understanding in education and culture.
(100) He supported the application, and regretted that the opposition expressed by certain delegates seemed to be based on political grounds rather than on the facts concerning the organization's activities.

(101) Mr. KOTSCHNIG (United States of America) supported the Executive Board's recommendation to postpone until the next General Conference a decision on the International Union of Students, the World Federation of Democratic Youth and the International Student Movement for the United Nations, the application in each case having been received too late to permit of the careful consideration which was necessary. The case quoted by the delegate of Hungary was an entirely different matter: the delay had been caused by an unfortunate oversight on the part of the Secretariat and it had been agreed not to penalize the organization in question.
(102) The delay on the part of the International Union of Students and the World Federation of Democratic Youth was especially serious, as it was not likely to encourage confidence in organizations which were applying for consultative rights previously withdrawn and, moreover, did not allow time for the acquisition of information which might lead to a reversal of opinion.

(103) Mr. HAYEK (Czechoslovakia) said that the last statement by the United States delegate showed that certain delegations regarded the question not in the

light of Unesco's interests, but of their own purely political likes and dislikes.
(104) He recalled that a Committee, elected by the Third Conference of Non-Governmental Organizations had, on 5 December 1952, noted with regret the proposal to withdraw consultative status from certain organizations which had shown a keen interest in Unesco's programme and had taken part in conferences which Unesco had convened. The Committee had hoped that the decision would be reconsidered by the appropriate organs of Unesco. One of the organizations so excluded had been the International Union of Students. The Czechoslovak delegate remarked that the arguments put forward by the delegate of the United States of America were at variance with his previous statements, already referred to by the Hungarian delegate; the United States Government seemed to have found time enough to give a negative reply on political grounds which were only too clear. Finally he reiterated his proposal to recommend that the International Union of Students be approved for consultative arrangements.

(105) The CHAIRMAN asked for a vote on the amendment proposed by the delegate of Canada: "That consideration of the application of the International Union of Students be deferred until the ninth session of the General Conference".

(106) The amendment was adopted by 26 votes to 6 with 6 abstentions.

Appendix 27: World Federation of Democratic Youth

(107) Mr. HAYEK (Czechoslovakia) proposed that the Commission recommend that the World Federation of Democratic Youth be approved for consultative arrangements; the arguments in favour of his proposal regarding the International Union of Students had even more force in the case of the World Federation of Democratic Youth.

(108) The motion was supported by the delegates of Poland and the USSR.

(109) Mr. MAHEU (Assistant Director-General) informed the Commission of the comments received from Member States since the opening of the Conference. Those in favour of admitting the Federation were Hungary, Czechoslovakia, USSR, Ukraine and Byelorussia; those against its admission were the United Kingdom and the United States of America.

(110) Mr. BLOCH (World Federation of Democratic Youth) said that the Federation he represented, and the International Union of Students, were the two largest youth organizations in the world, and that their aims were essentially the same as those of Unesco, since both organizations were working for international understanding and were seeking to give thousands of young students in colonial, semi-colonial and underdeveloped countries opportunities for education and culture.
(111) Neither of them was, as had been alleged, a political organization. Their only loyalty was to the cause of international peace and co-operation. And those who today gave the name of democracy to what only recently they had called fascism, could certainly not level accusations against them.
(112) Up to the seventh session of the General Conference, both organizations had had consultative status. The Executive Board, by recommending that they should not be admitted until the ninth session of the General Conference, showed that it had not taken into account the recommendation made in 1952.
(113) The question of date under discussion was very important to the organizations, for if their admission were postponed for another two years, they would be prevented from co-operating more closely with Unesco. The World Federation of Democratic Youth therefore requested that account be taken of the fact that the organizations' applications were prompted by the contribution they could make to the work of Unesco, and also asked for it to be borne in mind that Unesco should not exercise discrimination.

(114) Mr. VERONESE (Executive Board) wished to make one point clear. The representative of the World Federation of Democratic Youth had just asserted that the Executive Board had taken no account of the discussions at previous sessions of the General Conference, in which it had been agreed that any association from which consultative status had been temporarily withdrawn was entitled to submit a fresh application. The Executive Board had never disputed that right, but it had felt that the way in which the Federation's request had been submitted made its recommendation impossible.

(115) Mr. PAGE (Canada) said that he had listened with great interest to the statement of the representative of the World Federation of Democratic Youth and agreed with him that the problem needed careful study. From his own experience of the organization, he did not believe that it was representative of more than ten per cent of the Member States listed in paragraph 5 of Appendix 27; he recalled that one of the criteria for admission to consultative status was that national representation should be truly national and not fragmentary. The Canadian delegation was not prepared to support the application at the present time.

(116) Mr. KELLY (Australia) moved that the recommendation of the Executive Board be adopted. The tardy submission of the application was evidence of inefficiency, and because of that inefficiency he had been unable to obtain precise instructions from his Government.

(117) Mr. TAMAS (Hungary) said that his delegation warmly supported the application of the International Union of Students and the World Federation of Democratic Youth. He compared the attitude of the United States delegation on the question at the seventh session of the General Conference and at the current Conference, and asked why, if the space of two months had been sufficient in 1952, it was no longer so in 1954, in order to approve the admission of the two organizations in question.

(118) Sir Charles WEBSTER (United Kingdom) seconded the proposal of the Australian delegate. He had followed the eloquent appeal of the representative of the World Federation of Democratic Youth with

careful attention to see if it provided any reasons which might justify him in departing from his Government's instructions. Unfortunately it had only confirmed those instructions. He opposed the application for the same reasons as he had opposed that of the International Union of Students - which, he reminded the Commission, had in 1950 expelled Yugoslavia as a traitor to the cause of peace and democracy.

(119) Mr. BAUGNIET (Belgium) moved the closure of the debate, since all the members of the Commission were well aware of the arguments which could be adduced on either side.

(120) Mr. HAYEK (Czechoslovakia) reiterated that the entire discussion had confirmed what he had said from the beginning of the consideration of the application of the International Union of Students; the proposal to postpone a decision on the applications of the two organizations was prompted by purely political considerations; and that, from Unesco's point of view, was a great pity. The Hungarian delegate had shown that certain delegations, and the Executive Board, applied the regulations concerning the time-limits for the receipt of applications differently for different organizations, and gave unfair treatment to those which had incurred certain governments' disfavour by reason of their work for peace, thereby seeking to disqualify youth organizations whose support would be invaluable in bringing knowledge of Unesco to the great bulk of the younger generation all over the world. Mr. Hayek urged the Commission to take time for thought before members allowed themselves to be inveigled into a course of action contrary to Unesco's principles. In conclusion, he moved that the Commission recommend the General Conference to approve the World Federation of Democratic Youth for admission to consultative arrangements.

(121) Mr. KOTSCHNIG (United States of America), replying to a question which had been asked earlier in the discussion, said that he had already explained the facts relating to the case referred to by the delegate of Hungary. He requested that his explanation should be included in the Summary Records.

(122) Mr. VERONESE (Executive Board) deplored the suggestion made by the delegation of Czechoslovakia that the Executive Board had acted under pressure. That had never been the case.

(123) The CHAIRMAN asked for a vote on the Australian delegate's proposal that the Commission should recommend postponement of the question until the ninth session of the General Conference, taken as an amendment to the proposal of the Czechoslovak delegate.

(124) The amendment was adopted by 28 votes to 6 with 3 abstentions.

Appendix 28: International Student Movement for the United Nations

(125) Mr. KELLY (Australia) moved the adoption of the Executive Board's recommendation.

(126) The proposal was seconded by the delegate of the Philippines and supported by the delegate of Turkey.

(127) The CHAIRMAN announced that the representative of the World Federation of United Nations Associations had requested permission to address the Commission. He proposed to grant the request, under the provision in Rule 68 of the Rules of Procedure that observers of international non-governmental organizations could make statements on matters within their respective competence.

(128) Mr. ARIAS-PEREZ (World Federation of United Nations Associations) said that approval of the recognition of the organization he represented would simply mean giving legal recognition to a situation which had already more than five years' sanction in practice.
(129) The organization was the only international movement among young people in universities throughout the world which was designed to support the principles of the San Francisco Charter. In that respect, its co-operation in the work of Unesco had been very considerable.
(130) If the organization were refused consultative status on grounds of strict legal considerations and without taking into account other more human considerations, the present enthusiasm of thousands of students would be damped.
(131) He therefore asked that the question should be thought over fairly and calmly before a decision was taken on the admission of the Movement to consultative arrangements with Unesco.

(132) Mr. BAUGNIET (Belgium) asked exactly when the International Student Movement for the United Nations had applied for admission.

(133) Sir Charles WEBSTER (United Kingdom) had no objection to the organization, but thought that the same procedure should be applied to it as to other organizations in the same position, i.e. those whose applications had arrived too late to be examined by the Member States.

(134) Mr. BAUGNIET (Belgium) agreed; he personally could express no opinion, as he had not had the time to consult the Belgian National Commission.

(135) A vote was taken on the proposal to defer the decision on the application of the International Student Movement for the United Nations, which was approved by 28 votes to 0, with 7 abstentions.

**ITEM 9.6.3 OF REVISED AGENDA: RENEWAL OF FORMAL AGREEMENTS CONCLUDED WITH NON-GOVERNMENTAL ORGANIZATIONS (8C/ADM/23 and Addenda)**

(136) Mr. MAHEU (Assistant Director-General) then presented document 8C/ADM/23 and Addenda, dealing in particular with the renewal of the formal agreements concluded with 8 non-governmental organizations, which were due to expire on 31 December 1954. The General Conference was asked to prolong them until 31 December 1955, as the Executive Board was

competent to take the necessary action for 1956. The Member States consulted had raised no objections, except that the Australian Government had commented on the premises made available to the organizations. Mr. Maheu recalled that he had already stated at the previous meeting that, apart from two other organizations, those mentioned were the only ones housed in Unesco's headquarters. It had been decided that the whole question should be reconsidered by the Executive Board, since the Australian delegate had not insisted that it be discussed by the Commission.

(137) The Executive Board had also approved a draft formal agreement to be concluded with the International Social Science Council, which was accordingly submitted to the General Conference for ratification.

(138) The CHAIRMAN drew attention to the fact that, in accordance with Section A, paragraph 4 of document 8C/ADM/23, the eight formal agreements at present in force were submitted to the General Conference for review and renewal until 31 December 1955.

(139) Mr. POHL (Union of South Africa) moved that the Commission recommend the renewal of the agreements.

(140) The proposal was seconded by the United Kingdom delegate.

(141) Mr. MARDONES RESTAT (Chile) enquired whether the conclusion of the agreements meant that the non-governmental organizations in question would receive increased or altered subventions.

(142) Mr. MAHEU (Assistant Director-General) said that it would not; the question had no bearing on that of subventions.

(143) The Commission passed to the discussion of the Draft Formal Agreement with the International Social Science Council (8C/ADM/23 Add. 1).

(144) The CHAIRMAN asked for comments on the ratification of the draft agreement.

(145) Sir Charles WEBSTER (United Kingdom) moved that the Commission recommend the General Conference to ratify the Draft Formal Agreement with the International Social Science Council.

(146) The proposal was seconded by the delegate of the Union of South Africa, supported by the delegates of Haiti and Belgium and adopted.

The meeting rose at 7.20 p.m.

# SEVENTEENTH MEETING

*29 November 1954 at 10 a.m.*

*Chairman:* **Mr. BEEBY (New Zealand)**

**ITEM 9.5.6.1 OF REVISED AGENDA: MEDICAL BENEFITS SCHEME (document 8C/ADM/15)**

(1) Mr. HARPER-SMITH (Comptroller), introducing the report of the Director-General on the Unesco Medical Benefits Fund, said that it had two main proposals. The first (paragraph 4) was in connexion with the contributions to be paid into the Medical Benefits Fund by the Organization and by the staff members. The second (paragraph 7) dealt with the methods whereby contributions were calculated.

(2) Until 1953, the contributions paid in by the Organization had been equal to those paid by the staff. It had then been found that income was not sufficient to meet needs, and the Director-General thought that the contributions by the staff should be increased, those by the Organization remaining the same.

(3) The Director-General was now proposing to revert to the old system, but with a new scale of contributions (paragraph 9). The new scale had five contributory levels instead of three (see Annex II) and took much more accurately into account the real number of dependents enrolled in the fund.

(4) As regarded the second proposal, the calculation of contributions, the practice had hitherto been for contributions paid by staff to be deducted from their basic salaries. But it was the practice in all Specialized Agencies to include certain specific allowances paid to staff in the General Services Category in the pensionable remuneration on the basis of which contributions were paid. Accordingly, the Director-General was asking for authorization to do the same thing.

(5) The rest of the report was a detailed account of the operation of the fund up to the end of 1953.

(6) Mr. AMMOUN (Lebanon, seconded by Mr. ARTHUR (United Kingdom), moved adoption of the resolution in paragraph 9.

(7) Mr. KELLY (Australia), while in sympathy with the resolution, asked why allowances were included in the amount on which contributions were calculated only in the case of staff in the General Services Category.

(8) Mr. HARPER-SMITH (Comptroller) said that, for staff in the Professional categories, there were no pensionable allowances and therefore the calculation was made on basic salary.

(9) Miss LAISE (United States of America) said that, when the matter was discussed in 1952, her delegation had expressed anxiety lest, with so high a level of benefits, the fund might run into difficulties. Those fears had been borne out, as shown by the document now before the Commission.
(10) The proposals made in the report would put the fund on a sound financial basis, but at greater cost both to the Organization and to individual members.
(11) It was important, she felt, that any scheme for medical benefits should not vary from agency to agency. No mention was made in the report of negotiations with other agencies with a view to evolving a common plan.
(12) In general, her delegation favoured the system in force within the United Nations, i.e., a scheme with a sliding scale for contributions by the Organization, so that the Organization would pay an amount varying in inverse proportion to the salary of the individual contributor.

(13) Mr. HARPER-SMITH (Comptroller) said that the Consultative Committee on Administrative Questions had discussed the question of providing coverage to bridge the gap between a short illness and permanent invalidity. In Unesco, there were such provisions in the Medical Benefits Scheme, members falling ill being put on half pay, after exhaustion of sick leave, for a period not exceeding eleven months in respect of the same illness. That amply fulfilled the spirit of the Pension Fund Regulations, which laid down that, to qualify for a disability pension, a member had to be ill for at least nine months.
(14) In the United Nations, and in FAO, the contribution by the Organization decreased as salaries grew higher, but elsewhere the two contributions were the same. Within the Consultative Committee, it had been agreed to compare notes on the experience acquired. In fact, FAO had recently expressed much interest in the Unesco scheme. So Unesco had in the past co-operated, and would continue to co-operate, with the other organizations.

(15) The resolution in paragraph 9 of document 8C/ADM/15 was unanimously adopted.

**ITEM 9.5.6.2 OF REVISED AGENDA: COMPENSATION FUND FOR SERVICE-INCURRED RISKS (document 8C/ADM/16)**

(16) Mr. HARPER-SMITH (Comptroller) said that a corrigendum would be issued affecting the French text of paragraph 4.
(17) At the seventh session of the General Conference, the Director-General had been authorized to operate a provisional common benefits plan and had been instructed to submit final proposals for approval at the eighth session.
(18) In 1953 and 1954, he himself had taken part in discussions, within the Consultative Committee on Administrative Questions, on how such a plan should be financed. The actuary of the United Nations Joint Staff Pension Fund had submitted a report showing that the cost of a common fund would far exceed the commercial premiums then being paid by the Specialized Agencies. In addition, the creation of such a fund would have encountered administrative difficulties. For that reason all representatives of the Specialized Agencies had agreed that their particular part of the scheme should operate independently. The independent Unesco scheme would continue to operate in 1955 and 1956, although continuous contact would be maintained with the other agencies.
(19) The proposal made in Annex I did not call on Member States for further contributions. The point was that the small annual budget appropriation requested to meet risks of that type would be totally inadequate in the event of a disaster.
(20) It was therefore proposed that a special Staff Compensation Fund should be set up, into which the unused portion of the $8,000 provided in 1953 should be paid, as also any amounts similarly left over in future years. Unused balances would thus be carried forward from year to year. Any compensation paid by third parties in the case of injury or death of a staff member would also be paid in.
(21) In document 8C/ADM/16 (Annex I) it was suggested that the fund might be built up until it amounted to some $15,000 - $20,000, and that then, for future years, the sum requested would be only such amount as had been actually spent in the immediately preceding two years. In fact, that figure would probably be too low.
(22) He would therefore submit the following resolution:

"The General Conference:

Resolves:

1. That a Staff Compensation Fund, for service-incurred death and disability, shall be established, into which shall be paid: (a) sums appropriated for this purpose in the budget; (b) the proceeds of any commercial insurance effected by the Director-General; (c) compensation payable by any third party (up to the maximum payable under the rules of the Compensation Plan).

2. This Fund shall be carried forward from one financial period to another up to a maximum of $50,000. Any balance above this sum at the end of a financial period shall be credited to the General Fund.

3. This Fund shall be used to pay for compensation awarded under the rules of the Staff Compensation Plan.

(23) In two years time more experience would have been gained, and a report could then be submitted at the ninth session".

(24) Mr. MENDIS (Ceylon), seconded by Mr. AMMOUN (Lebanon), moved adoption of the resolution.

(25) Mr. KELLY (Australia) congratulated the Director-General on producing a report which was obviously the fruit of much careful study. But while not lacking in sympathy for the staff, he was not convinced of the advantages of the proposal made.
(26) What would be the effect of the creation of such a fund on the amounts annually paid to Lloyd's in the form of premiums?
(27) There would be no difficulty, he felt, in securing money from the General Conference to meet any emergency that might arise.

(28) At a time when the plans made by other agencies were under review, it might not be desirable to adopt any final scheme. While not anxious to press his point, he wondered whether the Director-General could not at least amend his motion to the effect that the matter be reviewed at the ninth session.

(29) Mr. HARPER-SMITH (Comptroller) emphasized that the proposal was in no way designed to secure large appropriations to cover risks insured against by the United Nations and by all the Specialized Agencies. It was merely intended to ensure that the money left over from a "good" year, such as 1953 (when nearly $8,000 were left unexpended) was used to create a fund which could cope with a sudden grave emergency. Otherwise the amounts left over in that way would revert to Member States in the form of surpluses.
(30) The proposal had been made precisely to avoid having to appeal to the General Conference in the way suggested by the delegation of Australia.
(31) That very year Unesco was faced with the problem of providing compensation for the accidental death of a staff member. To buy an annuity for his widow would be exceedingly expensive ($50,000), and to meet the cost a supplementary budget estimate would be required. With a fund amounting to some $20,000, another $30,000 could be paid in from the proceeds of commercial insurance with Lloyd's, and no doubt the airline company would be called upon to pay a substantial sum, with the result that an annuity could be easily purchased.
(32) The annual appropriation mentioned in the proposal was hardly more than a token figure. If another two years had to elapse before a final decision could be taken, quite different figures would have to be submitted.

(33) Mr. POHL (Union of South Africa) said that the aims of the proposal were laudable enough, but had the other Specialized Agencies been consulted? Was the Director-General satisfied that he had found the best way of financing such a fund?

(34) Referring to the remarks made by the Australian and South African delegates, Mr. AMMOUN (Lebanon) said he was not in favour of leaving to the General Conference the task of determining at each session the amount of appropriations that should be used for compensation. That would entail subordinating payment of indemnities - which should be regarded as obligations - to the decisions of the General Conference. If any accident occurred immediately after a session of the General Conference, the payment of compensation could be delayed for nearly two years.
(35) Mr. Ammoun would therefore be prepared to support the Director-General's proposal, which appeared to ensure i mediate and automatic payment of such compensation.

(36) Mr. HARPER-SMITH (Comptroller) explained that joint studies had in fact been made by the United Nations and the Specialized Agencies, and it had been agreed that it would be best for each organization to work out for itself the most satisfactory way of financing its scheme. Other agencies had shown a keen interest in the Unesco idea of having a fund partly constituted by appropriations. Unesco would of course keep in touch with what was being done elsewhere.
(37) The proposal was not designed to do more than provide provisional machinery.

(38) Miss LAISE (United States of America) said that the Comptroller had justified the proposal to have a large fund on the grounds that it would be expensive to buy annuities. But was that the best way of meeting such obligations as the Organization might have in the circumstances? In the regulations for the compensation plan there were definite rules governing the grant of annuities.

(39) Mr. HARPER-SMITH (Comptroller) said that in the particular case he had alluded to no decision had yet been taken. Every case had to be judged on its merits.

(40) It was agreed to add a final clause to the resolution to meet the point raised by the delegate of Australia:
"The Director-General is requested to present a report on the operation of the Fund for review at the ninth session".

(41) Thus amended, the resolution was unanimously adopted.

**ITEMS 9.5.7 AND 9.5.8 OF REVISED AGENDA: ANNUAL REPORT OF THE PENSION BOARD TOGETHER WITH REVISED REGULATIONS AND RULES OF THE PENSION FUND AND ELECTION OF REPRESENTATIVES OF MEMBER STATES TO THE UNITED NATIONS JOINT STAFF PENSION FUND (documents 8C/ADM/17 and 8C/ADM/17 Corr.1)**

(42) The CHAIRMAN observed that the Committee was merely called upon to take note of the documents attached to document 8C/ADM/17 (Annual Report of the United Nations Joint Staff Pension Board), and of the amendments to the Regulations and Administrative Rules of the Pension Fund, which were attached to document 8C/ADM/27 (Unesco Staff Rules).

(43) Mr. HARPER-SMITH (Comptroller) said that document 8C/ADM/17 dealt with the appointment of representatives of Member States to the Unesco Staff Pension Committee. At the seventh session, the three members and the three alternates named in paragraph 2 had been appointed. Their term of office expired at the end of the eighth session. Incidentally, three of them had been obliged to resign in the course of 1953.
(44) The Director-General was suggesting that members be nominated from among the permanent delegations in Paris, and that they hold office until the end of the ninth session.
(45) The proposal had been made in order to facilitate attendance at meetings of the Pension Committee.
(46) Article XXXV of the regulations for the United Nations Joint Staff Pension Fund laid down that the Joint Staff Pension Board should submit an annual report on the operation of those regulations to the United Nations General Assembly and to the Member organizations. The Joint Staff Pension Board was also called upon to draw up the administrative rules

necessary for the carrying out of those regulations and to report thereon to the competent authority of each Member organization.
(47) That annual report, and the latest set of administrative rules, were accordingly annexed to document 8C/ADM/17. No action was required by the General Conference.
(48) Part III of document 8C/ADM/17 dealt with recognition by Unesco of the competence of the United Nations Administrative Tribunal in respect of pension matters - a question discussed separately in document 8C/ADM/18.

(49) Mr. BENDER (Executive Board) said that the Executive Board had always taken a warm interest in medical benefits, staff compensation, and the Unesco staff pension scheme. He would be interested to know what sort of benefits would accrue to individual members under the regulations for the Pension Fund.

(50) Mr. DE LOS SANTOS (Philippines) warmly commended the Director-General's proposals for appointment of members of the Pension Committee, and moved adoption thereof.

(51) Miss LAISE (United States of America) seconded the motion, but asked that, before a final election took place, an enquiry be made among delegations in order to ascertain who was likely to come forward as a candidate. Then a list of names should be distributed, and time should be allowed for the Conference to consider them at leisure. She attached great importance to having persons of first-class abilities to represent their governments on the Pension Committee.

(52) Mr. DE LOS SANTOS (Philippines) could accept an amendment to his motion on the lines suggested by the delegate of the United States of America.

(53) The CHAIRMAN suggested that delegations interested in submitting names should get into touch with him, and that final consideration of document 8C/ADM/17 should be deferred.

(54) It was so decided.

(55) Mr. HARPER-SMITH (Comptroller) said that the Pension Fund Regulations provided for benefits on the withdrawal of a staff member before the age of sixty, on retirement at sixty, and in the case of permanent disability and death.
(56) The benefits were, roughly speaking, as follows: If a member withdrew before he had completed five years' service, he received his own contribution plus compound interest thereon at two and a half per cent.
(57) If he left after more than five years' service, he received the actuarial equivalent of the pension he would have received had he retired at 60.
(58) If he retired at 60, he received one-sixtieth of the final average remuneration over the past ten years for every year he had spent in Unesco. Thus, if he had spent ten years in the Organization, he would get one-sixth of the final average remuneration, if twenty years, one-third.
(59) On his death, his widow would as a rule be entitled to one-half the disability benefit he would have received (three-tenths of the salary at the time of death). She would thus get three-twentieths of that salary.

**ITEM 9.5.1 OF REVISED AGENDA: PERSONNEL RECRUITMENT STANDARDS AND METHODS (document 8C/ADM/11)**

(60) The DIRECTOR-GENERAL said that the General Conference had often expressed the wish that the geographical distribution of staff should be widened to the greatest possible extent consistent with the high standards of competence laid down in the Constitution.
(61) He himself considered that, if Unesco was to become really effective, a broader geographical distribution of staff was required than that so far attained. It was important that there should be, within the Secretariat, persons representing different cultures, equipped with a thorough knowledge of the problems peculiar to those parts of the world from which they came.
(62) It was always easy to give lip-service to the ideal of broad geographical distribution.
(63) He had felt under an obligation to suggest definite methods whereby that ideal, about which so much had been said in the past, might be attained. Hence the proposed new paragraph 4.6 on page 8.
(64) Under the existing system, staff members from the under-represented areas were continually being offered important posts in their home countries, so that staff had to be recruited more and more from the under-represented areas in order to prevent the situation from getting worse.
(65) The other important point he had to make was the following. According to paragraph 4.5.1 of the Staff Regulations, members of the staff were appointed either for an indeterminate period or in the light of programme requirements.
(66) How were the words "in the light of programme requirements" to be interpreted?
(67) He understood them to mean that he was obliged to award permanent contracts to persons in certain categories unless, in the light of programme requirements, he was justified in not so doing. In considering programme requirements, was he expected to bear in mind the current programme, or to take a longer view? The words "in the light of programme requirements" tied his hands, and he was strongly in favour of their deletion.
(68) As regarded permanent appointments, the best solution, he felt, was to aim at a target figure, as set forth in paragraph 19 of the document. The percentages he had suggested there, were, he considered, reasonable.

(69) Mr. BENDER (Executive Board) said that the Board had often discussed the question of staff and contracts, and in July had adopted a resolution calling the attention of the Conference to the need for clear guidance as to indeterminate contracts and improvement of geographical distribution.
(70) It had also called on the Conference to recommend Member States to second national civil servants to Unesco for limited periods, and to safeguard the rights of such persons during their employment with Unesco.

(71) The CHAIRMAN said that the best course would be for the Commission to have a general discussion on the principles involved, before considering the Staff Regulations in detail.

(72) Mr. AMMOUN (Lebanon) hoped that the Director-General would furnish some details concerning paragraph 4.5.1 of the Staff Regulations, which dealt with the renewal of contracts for fixed periods (document 8C/ADM/11, page 8).

(73) The DIRECTOR-GENERAL said that, under the existing paragraph 4.5.1 of the Staff Regulations, he was under an obligation to renew a contract for an indeterminate period (provided the person satisfied all the requirements), unless he could invoke programme needs as a reason for not doing so.

(74) Mr. AMMOUN (Lebanon) thanked the Director-General for his explanations. He considered, however, that the Director-General's interpretation of paragraph 4.5.1 was not the only possible one. In any case, he asked to be given information on the way in which particular problems arising from the renewal of contracts had been solved in the past and on previous decisions that might be taken as precedents.

(75) The DIRECTOR-GENERAL said that it was not in the interests of Unesco that he should be faced with the alternative of either letting a staff member go when his contract expired or else giving that staff member a permanent contract. Something intermediate was required.
(76) Who could say what programme requirements would be thirty years thence?

(77) Mr. ARTHUR (United Kingdom) wondered whether the words "in the light of programme requirements" were in fact so difficult to interpret. If the words were transferred to the end of the sentence in paragraph 4.5.1, the position became clearer. The paragraph could then be taken to mean that the Director-General could either reappoint for an indeterminate period or for some fixed period, and that programme requirements would determine the exact period of re-engagement - one, two, three, four, or five years.

(78) The DIRECTOR-GENERAL said that that was not his interpretation.
(79) There were certain items, such as fundamental education, which had appeared in Unesco's programme for a long time, and a staff member engaged in that field should enjoy the maximum tenure. But tenure was not the only factor; there was the question of personal suitability too.
(80) His own view was that, except for a small number of highly specialized posts, the aim should be to build up a corps of people who could be used no matter what changes might be made in the programme. The aim should be to acquire the services of persons capable of a certain flexibility. That was why he preferred to set a percentage for the number of permanent contracts in the organization. It was better to proceed like that than to take each individual post and to estimate the likelihood of its occupier being required by Unesco thirty years thence.

(81) Mr. AMMOUN (Lebanon) wondered who could be authorized to decide what were "programme requirements".

(82) Miss LAISE (United States of America) said that, in the view of her delegation, there was a contradiction between the proposal made in paragraph 19 (fixing percentages to represent the proportion of permanent contracts) and the proposed new paragraph 4.6 of the Staff Regulations.
(83) She seriously questioned the desirability of both those proposals. Although she recognized that it was desirable to achieve stability, surely it was unwise to set definite target figures at a time when the question of remodelling the programme was under discussion and when there must be continued efforts to improve the quality and the geographical distribution of the staff.
(84) She doubted whether the proposed paragraph 4.6 should be included in the Staff Regulations. Her country was gravely under-represented in the staff of Unesco, so she could not be accused of special pleading in saying that the primary aim must be to secure the services of staff offering the highest standards of efficiency and integrity. Paragraph 4.3.1, she felt, was sufficient. Inclusion of the proposed 4.6 would lay undue stress on the importance of a broad geographical distribution. It was important not to sacrifice competent staff members merely because they did not come from under-represented areas.
(85) She understood that a suggestion had been made in the Executive Board for a solution of the problem of geographical distribution. If so, she would be glad to know what it was.

(86) Referring to page 7 of document 8C/ADM/11, Mr. SOLDATOV (Union of Soviet Socialist Republics) said that his delegation was absolutely against eliminating paragraph 4.2.1, which excluded from the Organization persons compromised by their relations with Fascism, Nazism or militarist aggression. To eliminate that prohibition would be contrary to the letter of the Constitution, since it would enable persons guilty of barbarous acts or the destruction of valuable literary works and other cultural property to be admitted to the Secretariat. Mr. Soldatov also observed that the Executive Board, at its thirty-eighth session, had declared that it did not recommend eliminating the paragraph in question, and had embodied its views in the resolution reproduced in document 8C/ADM/14.
(87) Mr. Soldatov said he would reserve a number of observations he had to make on other suggested changes till later. However, he wished to emphasize at that stage that he did not think it desirable to extend the Director-General's existing powers with regard to the recruiting of staff.

(88) Mr. BENDER (Executive Board), referring to the statement made by the delegate of the United States of America, said that another scheme had indeed been put forward in the Executive Board, but various views had been expressed and no full agreement had been reached. The minutes of the meetings of the Board would provide fuller information.
(89) As regarded the point raised by the delegate of the Soviet Union, he could confirm that the Board had not recommended deletion of paragraph 4.2.1.

(90) Mr. MARTINEZ COBO (Ecuador) disagreed with the delegation of the United States of America on the question of equitable geographical distribution of staff. The geographical criterion was a strictly fair one; existing methods led to a most irregular position, as was shown by figures: out of 385 staff members, a bare 20 belonged to the Latin American countries, which formed one-third of the Member States of the Organization. Yet there were countries who had 73 and 96 officials on the staff.
(91) Costa Rica, Cuba, El Salvador, Guatemala, Honduras and the Dominican Republic, which between them formed a highly cultured group, were not represented on the Secretariat by a single member.
(92) The delegate of Ecuador disagreed with the Soviet delegate and supported the Director-General's proposal for the suppression of the paragraph under discussion (4.2.1). It was dangerous to allow the Director-General a completely free hand in dismissing officials under political pretexts. The danger lay not in the admission of officials with certain political tendencies, but in the possibility that those officials might afterwards carry on a political activity from their post.

(93) Mr. JUVIGNY (France) agreed with the Lebanese delegate that, for a better interpretation of paragraph 4.5.1., it would be well to rely on the way in which the Appeals Board and the international administrative tribunals had in the past settled disputes arising from the renewal of contracts.
(94) Then, again, Mr. Juvigny wished to emphasize that, without opposing the principle of geographical distribution, as laid down in the United Nations Charter and the Unesco Constitution, the principle should not under any circumstances be applied as a hard-and-fast rule. The aim of that principle was to give men of all countries the same chances of entering the international public service and to ensure that the most diverse cultures were represented on the Secretariat. It was an ideal to be upheld, but, if it were put into practice too hastily, it might impair the Organization's efficiency. If the principle of geographical distribution were applied too strictly, the Organization would be obliged to part with people who had served it well in the past and also acquired useful experience, which newcomers would lack, at least for a time. It would also constitute a threat to many of the staff and adversely affect their work. It might even lead to the resignation of the ablest among them. Moreover, in practice it was hard to see what criteria could be used to ensure a really fair geographical distribution. Would the total contributions paid by the different Member States be taken into account?
(95) Any provision intended to enforce a rigid and impersonal application of the principle of geographical distribution might, in certain cases, facilitate arbitrary dismissals. Therefore the French delegation was against the proposed texts.

(96) Mr. NOGUEIRA (Uruguay) considered that long-term contracts were essential to efficiency. Officials needed the guarantee of stability and a suitable pension at the conclusion of their working days. If officials were not afforded the protection of sufficiently long contracts, there was little chance of their renouncing national fields for international work. It was not enough to study their salaries; the system of long-term contracts renewable after 5 or 7 years should be made general. It should also be possible to transfer officials from one department to another, according to the requirements of the service. Otherwise, instead of an international civil service, the Organization would find itself staffed by a body of persons holding scholarships or travelling bursaries.
(97) The delegation of Uruguay would vote for the Italian draft resolution (document 8C/DR/74), with an amendment to the effect that the years spent in the Organization by a staff member should count for pension purposes.
(98) In its 1935 Pensions Law, the speaker added, his country had laid down that League of Nations employees should be placed on the same footing as national civil servants.

(99) Mr. HENQUET (representing the Staff Association) thanked the Chairman and the Commission for their generosity in allowing him to put the staff's point of view before them.
(100) He first reminded the Commission that the Staff Association's function was not only to represent the staff and protect their interests, but also, in certain cases, to give the Director-General its advice. Its advisory capacity, established in the Staff Regulations, had already been recognized by the General Conference and the Executive Board. Thus the Association had taken part in the appointment of staff representatives to the joint committees which the Director-General was required to consult whenever he proposed to make any important changes in the Staff Regulations. Yet those committees, he said, had not been consulted about the changes envisaged in document 8C/ADM/11. The changes affected the criteria for the renewal of fixed-term contracts. Sixty per cent of staff members belonging to the Professional category held such contracts. Accordingly, the provisions that might be made concerning the renewal of those contracts would apply to the great majority of the staff in that category. Again, there was no absolutely clear distinction between a permanent contract and a contract for a fixed period; the jurisprudence of the United Nations administrative tribunal, for instance, was based on the idea that any official who had performed his duties satisfactorily could reasonably expect to have his contract renewed unless the post were suppressed. The Unesco Appeals Board had recently confirmed the reasonable presumption of renewal of contracts for officials whose services had been satisfactory.
(101) Analysing the Director-General's proposals, Mr. Henquet said that the Staff Association fully subscribed to the considerations set forth in paragraph 18 of the document, dealing with the necessity of ensuring the stability of the Secretariat and security of employment for the staff. But it wished to make some observations concerning the new texts proposed for paragraphs 4.2, 4.5.1 and 4.6 of the Regulations.
(102) With regard to Number 4.2, Mr. Henquet drew the Commission's attention to the problems that might arise if the criterion of "integrity" were to be applied to staff that had been in the service of the Organization for a considerable time.
(103) With regard to paragraph 4.5.1, he said that the Staff Association was worried over the subjective

criteria of interpretation, proposed in paragraph 27 of the document, for judging aptitude for international civil service.

(104) In connexion with paragraph 4.6, Mr. Henquet stressed the dangers of including in the Staff Regulations a text strictly applying the principle of geographical distribution. The International Civil Service Advisory Board had recognized the necessity of a certain elasticity in the implementation of that principle, and neither the staff regulations of the United Nations nor those of the other Specialized Agencies contained any hard-and-fast rule in that matter. The Staff Association was very anxious for the administration not to invoke that principle when renewing contracts, but only when recruiting new staff.

(105) The DIRECTOR-GENERAL, answering the question raised by the delegate of Lebanon, said that the only person who could decide what exactly programme requirements involved, as far as staff contracts were concerned, was the Director-General. It stood to reason that the Director-General would always keep programme requirements, in the general sense, in mind, but the phrase "in the light of programme requirements" was open to no wholly satisfactory interpretation, and he therefore recommended its deletion.

(106) The delegate of the United States of America had said that the proposal he had made in paragraph 19 ran counter to his proposal for a new paragraph 4.6. In that paragraph, he was proposing that contracts expiring on or before 31 December 1956 should not be renewed, in cases when their renewal would militate against improved geographical distribution of staff. The authority given him to take such action would expire at the end of 1956. Even if the proposed new paragraph 4.6 were adopted, he would still award many indeterminate contracts, so that in the next two years steady progress would be made towards the target figures set forth in paragraph 19.

(107) During the years 1955-56, but especially in 1956, he would recruit from the under-represented areas, and persons appointed early in 1956 would have two years of service before the General Conference met in 1958, by which time the percentage of permanent posts would have approached even more closely the figure proposed in paragraph 19.

(108) He had submitted his proposals because he believed that better geographical distribution was necessary for Unesco, and that such geographical distribution could not be achieved without changes in the Staff Regulations. There could be no decisive improvement in that respect with the number of vacancies now occurring. Some of those vacancies, in addition, were of so responsible and specialized a nature, that a few countries only were likely to be able to provide suitable candidates.

(109) As regarded his proposal to delete paragraph 4.2.1, the reasons were set forth in document 8C/ADM/14.

(110) He wished to make it clear that he desired to obtain the services of staff of the highest standards of competence and integrity, and also to improve geographical distribution. If the new paragraph 4.6 were adopted, it was his intention, after 1956, to lay less stress on geographical distribution when considering how posts should be filled. But adoption of that paragraph was essential if a proper balance was to be obtained at the outset.

The meeting rose at 1 p.m.

# EIGHTEENTH MEETING

*29 November 1954 at 3.30 p.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.5.1 OF REVISED AGENDA: PERSONNEL RECRUITMENT STANDARDS AND METHODS (document 8C/ADM/11) (continued)**

(1) The Commission renewed its examination of proposed amendments to Staff Regulations 4.2 to 4.6.

(2) Mr. ATTAGARA (Thailand) moved the adoption of the proposed amendment to Regulation 4.2.

(3) Mr. SHARIF (Pakistan) suggested that Regulation 4.2 be linked to Regulation 4.3.1 by adding the following words at the end of Regulation 4.2:

"Due regard shall be paid to recruiting staff on as wide a geographical basis as possible".

The amendment would thus bring Regulation 4.2 into line with the corresponding regulation of the United Nations.

(4) Mr. SOLDATOV (Union of Soviet Socialist Republics) stated that, in his delegation's opinion, the principle of geographical representation should override all others.

(5) Sir Ben BOWEN THOMAS (United Kingdom) agreed with the Soviet delegate that geographical distribution was an extremely important consideration, but the United Kingdom delegation felt that it should not take precedence over the aim of securing the highest standards of efficiency, competence and integrity. He

therefore proposed the addition of the following sentence at the end of Regulation 4.2: "and shall pay due regard to the desirability of achieving as wide a geographical distribution of staff as possible".
(6) The above amendment would presuppose the withdrawal of the existing Regulation 4.3.1 and the proposed new Regulation 4.6. The United Kingdom delegation considered that two years were too short a time in which to achieve a geographical redistribution of the Secretariat; to aim at that might lead to injustices; the delegation was therefore against tying the Director-General down, either in time or in the matter of percentage.

(7) Mr. SUNDARAM (India), drawing attention to the chart in Annex I to document 8C/ADM/11, which showed the distribution by nationality of members of the Secretariat, pointed out that vast underdeveloped areas of the world were under-represented on the Secretariat, while a number of small and advanced countries were over-represented. It was true that underdeveloped countries could not afford to release their key people for service in international organizations, but, even if less efficient people were recruited in the interests of geographical representation, with experience they would gradually attain the highest standards of efficiency and competence. In promotion and renewal of appointments, as well as in initial recruitment, geographical distribution should be the main consideration, provided that efficiency were not sacrificed. The Indian delegation therefore moved the addition of a sentence to Regulation 4.2, which would read roughly as follows: "In the matter of promotion and renewal of appointments, other qualifications being equal, geographical considerations should be kept very much in view".

(8) Mr. HUZAYIN (Egypt) paid tribute to the Director-General and his staff for having tried to present a practical scheme to the Conference, with a view to redressing the bad balance of geographical distribution within the Secretariat. Geographical distribution was not a political, but a cultural issue; even cultures which did not seem as developed as others had something to contribute to Unesco. Further, at a time when Unesco was launching a programme of practical projects designed to meet the felt needs of Member States, it was important that the countries with the greatest needs should be represented on the Secretariat.
(9) With regard to the United Kingdom amendment, the Egyptian delegation felt that the wording needed strengthening and would prefer to substitute for "and shall pay due regard to the desirability of achieving..." the words: "and shall also aim at achieving...". Although he agreed that the amendment made Regulation 4.3.1 unnecessary, he thought that Regulation 4.6, which related to a temporary measure, should be kept.

(10) Sir Ben BOWEN THOMAS (United Kingdom) agreed to withdraw his proposal to delete Regulation 4.6.

(11) The CHAIRMAN, seconded by Mr. AMMOUN (Lebanon), proposed that the Commission adjourn for a few minutes to enable the delegations of Pakistan, the United Kingdom, India and Egypt to reach agreement on a joint amendment to Regulation 4.2.

(12) Mr. VILLALON GALDAMES (Chile) thought it might help the discussion if the original text of the proposed amendments to the Staff Regulations were carefully examined. The various sections of that text were perfectly interrelated, and they all dealt with the problems then under discussion. The principle of geographical distribution was taken into account in Regulations 4.3.1 and 4.6 (in the latter, in respect of the renewal of contracts). Those two regulations were complementary to the general stipulations contained in Regulation 4.2, with regard to the other criteria for the appointment, transfer or promotion of staff.
(13) A study of that text might simplify the discussion and prevent the submission of somewhat improvised amendments, aimed at settling points already dealt with in the text itself.

(14) Mr. KELLY (Australia) was not convinced that the recruitment of staff "on as wide a geographical basis as possible" would achieve the desired result, unless it were made clear that the connexion between a national and his country should not merely be a legal one. A Frenchman, for example, might be born in France, but live all his life in Patagonia. The Director-General should also ensure that staff recruited were truly representative of their countries. If a new formula could be substituted for "geographical basis", the Australian delegation would be satisfied.

(15) The DIRECTOR-GENERAL did not think that the Secretariat was competent to decide whether or not an individual was representative of his country, but he pointed out that, before any candidate was appointed, his government was asked to comment on him. The Director-General assumed that no government would recommend a candidate who had spent most of his life in another country.

(16) Mr. TREJOS DITTEL (Costa Rica) supported the proposals made by the United Kingdom and Egyptian delegates. He said that the Secretariat had made considerable efforts to apply the principle of fair geographical representation, but there was still room for improvement. Central America had never been represented on the Secretariat and, although it consisted of small countries, that geographical zone possessed people who were sufficiently qualified to work as officials of Unesco.
(17) A Unesco official was a publicity agent for the Organization in his own country. That was a good reason why geographical distribution should be improved along general lines that would render it more effective.

(18) Mr. RIAÑO JAUMA (Cuba) agreed that the Director-General should be empowered to secure a fair geographical distribution, in regard both to the recruitment of staff and to the renewal of contracts.
(19) He pointed out that in the statistics published in document 8C/ADM/11, Cuba was shown, in 1952, with a representative on the Secretariat, who had later disappeared without any reason being given. The nationality of officials on the Secretariat should be

defined more clearly, in order that they should not appear as the nationals of a country to which they were attributed but to which they did not actually belong.

(20) Mr. RAADI (Iran) reminded the Commission that the discussion bore on a text submitted by the Director-General, to which several amendments had been proposed. The authors of those amendments were about to try to work out a joint text, and it would therefore be useful to know whether the spirit of the amendments was in keeping with the Director-General's wishes, or nearly so. If those amendments were approved by the Commission, would the Director-General be able to carry out his wishes?

(21) Although the United Kingdom - Egyptian amendment did not quite correspond to what he had in mind, the DIRECTOR-GENERAL would be prepared to agree to it, if it were acceptable to the majority of members of the Commission.

(22) Mr. VILLALON GALDAMES (Chile), on a point of order, thought it would be useful to adjourn the meeting in order to allow the authors of the amendments to come to an agreement over the wording of their text.

(23) The point of order involved a question of procedure, namely, that, whatever the text agreed upon, it should not include anything on the geographical distribution of the staff until Staff Regulations 4.3.1 and 4.6 had been dealt with.

(24) The CHAIRMAN pointed out that Regulation 4.6 was not yet at issue, as the delegate of the United Kingdom, at the request of the delegate of Egypt, had withdrawn his proposal to delete it. The only Regulations at issue, therefore, were 4.2 and 4.3.1 and the motion to combine the substance of 4.3.1 and 4.2 was perfectly in order.

(25) Mr. FRAGA IRIBARNE (Spain) took the view that the Chilean delegate was invoking Article 85 of the Rules of Procedure of the General Conference; in other words, that he had called for a separate vote on the terms of the draft resolution under discussion. The Spanish delegate joined the delegate of Chile in making that request.

(26) The CHAIRMAN remarked that the point of order raised by the delegate of Spain was not the same as that of the delegate of Chile. He would therefore first take account of the latter.

(27) Mr. BAUGNIET (Belgium) said that his wishes were similar to those of the Chilean delegate. He hoped it might be possible to vote on the proposed amendment in separate parts. If the text submitted by the Director-General, to which several amendments had been proposed, were accepted, there would have to be a provision covering the acquired rights of staff members whose contracts were due to be renewed.

(28) The CHAIRMAN asked members of the Commission to take the point raised by the delegate of Belgium into consideration, since it seemed likely that they would be asked to vote on the two parts separately.

(29) The meeting adjourned for ten minutes to enable the delegations of Pakistan, the United Kingdom, India and Egypt to prepare a joint amendment.

(30) The meeting having reassembled, the following joint amendment to Regulation 4.2 was submitted for consideration:

"In appointing, transferring or promoting staff members, and in renewing appointments, the Director-General shall aim at securing as wide a geographical distribution as possible and the highest standards of efficiency, competence and integrity".

(31) Mr. von GRAEVENITZ (German Federal Republic) considered that, in matters of staff recruitment, Unesco must establish a balance between two criteria: that of the highest standard of efficiency, which could be best assured by continuity of service, and that of a fair geographical distribution of posts between the Member States. Clearly, continuity could only come into play when the programme was concentrated round a small number of long-term projects. In the view of the German delegation, those two criteria were of equal importance; neither should be regarded as prevailing over the other. The speaker noted with regret that the resolutions of the seventh session of the Conference had accorded priority to the first of those criteria - that of continuity - by placing too great an emphasis on indeterminate appointments; the second requirement had accordingly been only partially met. However, no blame attached to the Director-General in that connexion; he had, on the contrary, done all he could in the circumstances. Paragraph 23 of 8C/ADM/11 ran: "The present geographical distribution of the Secretariat is not satisfactory and special action by the General Conference is necessary if the Director-General is to be able to improve it quickly and satisfactorily". Assuming that there were general agreement on that statement, it was necessary to redress the errors which had brought about such a situation, but it was not by reversing the relationship between the two criteria - i.e. by giving priority to geographical distribution - that the situation could be put right or the necessary compromise achieved. The mistake had been to lay too much stress on the idea of continuity at a time when the programme had reflected a certain discontinuity. Now that Unesco was assuming greater long-term obligations, it would be inadvisable to allow too much fluctuation in the staff. That reason carried all the more weight since Unesco was faced with an additional task - for which the Conference had repeatedly pressed - that of evaluating certain of the programme projects undertaken by Unesco in the light of critical and detailed observations. The sooner past errors could be rectified on the basis of such an evaluation, the better it would be for Unesco's reputation.

(32) In conclusion, the speaker said that the foregoing ideas were reflected in the proposed amendment, which accordingly had his approval.

(33) Mr. PHOTIADES (Greece) agreed with the delegate of the German Federal Republic, but would like

an explanation on one point. Was the expression "geographical distribution" to be interpreted in terms of territories and frontiers or - as it should be - in terms of joint efforts in the realm of science, education and culture, on the basis of which the Director-General should make his choice?

(34) Mr. GOMEZ ROBLEDO (Mexico) asked whether, if the amendment were approved, Regulations 4.3 and 4.6 would still stand. He agreed with the United Kingdom proposal, because he understood it to imply the deletion of Regulation 4.6, but it now appeared from the discussion that that Regulation would be maintained. The powers of the Director-General were thereby considerably increased, and the not altogether fair criterion of geographical distribution was introduced as an important factor in the recruitment of Unesco officials. The amendment would be logical if Regulation 4.6 were deleted. If that Regulation were maintained, there was no point in the amendment.

(35) The DIRECTOR-GENERAL observed that, even if the amendment to Regulation 4.2 were passed, it would still be essential to maintain Regulation 4.3 (selection without distinction of race, sex or religion) which was not covered by 4.2. He had understood that Regulation 4.6 was to be discussed separately.

(36) Mr. BROWNELL (United States of America) sympathized with any misgivings which the Director-General might have at the idea of operating under the joint amendment proposed to 4.2. In interpreting the amendment, there would certainly be many pressures as to whether geographical distribution or the highest standards of efficiency, competence and integrity should have priority. To make the Director-General's task easier, therefore, he proposed the deletion of the word "and" and the substitution of the words: "without sacrifice to". The sentence would thus read: "... as wide a geographical distribution as possible, without sacrifice to the highest standards...".

(37) At the DIRECTOR-GENERAL's suggestion, Mr. BROWNELL (United States of America) agreed to accept the more usual form of wording: "without prejudice to".

(38) Mr. HUZAYIN (Egypt) thought that both considerations should be given equal weight and would therefore prefer the word "and" to be maintained.

(39) The CHAIRMAN drew attention to paragraph 4 of Article VI of the Constitution, where it was laid down that the highest standards of integrity, efficiency and technical competence should be given paramount consideration.

(40) Mr. JUVIGNY (France) much regretted that the suggestions of the United States delegate had not been accepted, subject to drafting changes, at least in the French version. The text of the amendment submitted jointly by a number of delegates read: "In appointing, transferring or promoting staff members..... the Director-General shall aim at securing as wide a geographical distribution as possible and the highest standards of efficiency, competence and integrity". (41) He pointed out that, whereas in the text of the Staff Regulations of the United Nations, as in the text proposed by the Director-General, emphasis was laid in the first place on professional qualifications, efficiency and integrity - the need for recruitment on a wide geographical basis being stipulated in the second place only - the new text reversed this order, and required the Director-General, in recruiting the staff of the Organization, to give first thought to geographical distribution in the light of high policy considerations based on quantitative values, assigning a secondary place to competence and integrity. The speaker thought that the text had perhaps gone beyond the intentions of its authors. Whilst agreeing with the principle, he therefore recommended, with a view to dispelling that unfortunate impression, that a form of words similar to that proposed by the United States delegate should be used.

(42) Mr. BAUGNIET (Belgium) said that, after listening carefully to the remarks made by the United States and French delegates, he was of the opinion that to adopt the joint amendment would be to violate one of the fundamental provisions of the Constitution. Paragraph 4 of Article VI, the terms of which he recalled, would have to be modified by the Conference before that amendment could be accepted. All that the Commission could do was to propose the insertion in the Staff Regulations of a sentence which would be a mere repetition of what was stipulated in the Constitution.

(43) The DIRECTOR-GENERAL said that he personally would interpret the joint amendment to mean that the highest standards of efficiency, competence and integrity should take precedence over geographical distribution, but, if the Commission wished to make the position clearer for some other Director-General, it should adopt the amendment proposed by the United States delegate. He drew attention to the fact that, in Regulation 4.2, the appointment of staff was more important than transfers or promotions.

(44) Sir Ben BOWEN THOMAS (United Kingdom) regretted to say that, when he had consulted with the delegations of Pakistan, India and Egypt, he had not been aware of Article VI, paragraph 4 of the Constitution. In order not to be inconsistent with that provision, he felt obliged to ask his colleagues if they would accept the United States amendment.

(45) Mr. SUNDARAM (India) thought that acceptance of the United States amendment would be equivalent to reverting to the status quo, whereas, in his delegation's view, slightly more importance should thenceforth be attached to geographical distribution than to the other considerations.

(46) Mr. HUZAYIN (Egypt) thought that the joint amendment was complementary, but not contradictory, to the Constitution.

(47) Mr. RAADI (Iran) thought that the discussion might have taken an uneasy turn because there was a tendency to contrast the notion of efficiency with that of geographical representation. But the two notions

should not in fact be set against one another. If an official was to work competently and effectively, he must have a clear idea of the conditions obtaining in different parts of the world and understand the factors that enabled Unesco to have a real influence in the world; in the minds of the authors of the Constitution, competence and geographical distribution had been parallel ideas.

(48) With regard to Article VI, paragraph 4. of the Constitution to the effect that "subject to" a combination of the highest standards of integrity, efficiency and competence, staff should be recruited on as wide a geographical basis as possible, that sentence could also be taken to mean that the widest possible geographical basis was at once an essential and desirable condition, subject to, etc. The speaker thought that those were purely legal considerations which could be left out of account; in his view, the proposed compromise amendment might provide a basis for immediate agreement, and to depart from it was to run the risk of reopening the question of the priority of the aforesaid two notions, which would lead to interminable discussions.

(49) At the proposal of Mr. SHARIF (Pakistan) it was agreed that the Commission should again adjourn for a few minutes to enable the sponsors of the draft amendment either to reamend it or to withdraw it in favour of the Director-General's original proposal.

(50) The meeting having reassembled, Mr. HUZAYIN (Egypt) announced that he and his colleagues had decided to withdraw their amendment.

(51) The CHAIRMAN observed that the Commission should therefore vote on the original motion of the delegate of Thailand to adopt the amendment to Regulation 4.2 proposed by the Director-General.

(52) Mr. BAUGNIET (Belgium) said he would abstain from voting on Regulation 4.2 since, unless a reservation on the acquired rights of staff were included, it was unacceptable to him.

(53) The amendment to Regulation 4.2 proposed by the Director-General in document 8C/ADM/11 was put to the vote and adopted by 26 votes to 0, with 14 abstentions.

(54) The CHAIRMAN drew the Commission's attention to section 15 on page 7 of document 8C/ADM/14 (Regulation 4.2.1).

(55) Mr. SOLDATOV (Union of Soviet Socialist Republics) recalled that his delegation had already had an opportunity to state its point of view, namely, that Regulation 4.2.1 should be maintained. He therefore moved acceptance of the Executive Board's opinion that the regulation should not be deleted.

(56) Mr. JUVIGNY (France) reminded the Commission that the Executive Board's opinions on Regulation 4.2.1 were set out in 8C/ADM/14, referred to in the document at present under discussion (8C/ADM/11); apart from the delegations of the USSR and Ecuador, no delegation had given its views on that matter, and Mr. Juvigny preferred to reserve comment on Regulation 4.2.1 until 8C/ADM/14, which contained the justifications, was discussed.

(57) The CHAIRMAN asked if the Commission wished to consider Regulation 4.2.1 forthwith, or at a later stage in connexion with document 8C/ADM/14.

(58) Mr. SOLDATOV (Union of Soviet Socialist Republics) stated that his delegation attached a great deal of importance to Regulation 4.2.1 and that its retention or deletion would determine the Soviet delegation's attitude towards a series of other questions. He did not think that it would be correct procedure to jump from one document to another, and therefore proposed that the Commission decide at once whether or not to delete Regulation 4.2.1, examining the question in document 8C/ADM/14 at a later stage.

(59) Mr. BAUGNIET (Belgium) regretted he could not share that view. As regarded the order of discussion, texts should be examined according to the documents prepared by the Director-General. Regulation 4.2.1 should be considered when document 8C/ADM/14 came before the Commission.

(60) The Soviet motion to discuss Regulation 4.2.1 forthwith was put to the vote and rejected by 22 votes to 6, with 19 abstentions.

(61) It was thus agreed to discuss Regulation 4.2.1 at a later stage in connexion with document 8C/ADM/14.

(62) The Commission agreed to maintain Regulation 4.3 and passed on to Regulation 4.3.1.

(63) In order to meet the intention of the major portion of the original United Kingdom amendment, the DIRECTOR-GENERAL proposed the following wording:

"Without prejudice to the terms of Regulation 4.2, the Director-General shall strive to secure a staff distributed on as wide a geographical basis as possible".

(64) Such an amendment would make Regulation 4.6 unnecessary.

(65) The Director-General's proposal was seconded by several delegations.

(66) Mr. BAUGNIET (Belgium) failed to see how that draft amendment, as he understood it, differed from the text proposed; he would be glad to know where the distinction lay.

(67) The DIRECTOR-GENERAL explained that the difference was that Regulation 4.3.1 limited the question to recruitment, whereas his amendment also covered transfers, promotion and renewal of appointments.

(68) Mr. AMMOUN (Lebanon) said that the wording now proposed: "The Director-General shall strive to recruit his staff on as wide a geographical basis as possible", enabled the Director-General to express his views on the substance of the problem.

(69) The DIRECTOR-GENERAL pointed out that the correct wording was: "Le Directeur général s'efforcera d'obtenir un personnel....".

(70) Mr. SABA (Legal Adviser) acknowledged that it was difficult to evolve a sound French text at the meeting itself. He suggested the following: "Le Directeur général s'efforcera d'assurer que le personnel représente une distribution géographique aussi large que possible", but that would need polishing.

(71) Mr. AMMOUN (Lebanon) replied that the substance of his remarks would not be affected by the difficulty of finding a suitable way of expressing a notion that was quite clear. The wording "shall strive to secure" in effect expressed a wish, whereas the present text was an imperative which would be weakened by the change proposed. He only pressed that point because he thought that the heart of the matter had not yet been touched.

(72) The DIRECTOR-GENERAL agreed to strengthen his amendment by altering it to read: "shall ensure a staff distributed on as wide a geographical basis as possible".

(73) Mr. AMMOUN (Lebanon) agreed that that text was clearer, but thought that it brought the debate back to its starting-point and still left the substance of the problem untouched, since all the difference lay in the form used. Mr. Ammoun was aware of the Director-General's difficulties, who, in order to take into account the two aspects of the problem (indeterminate contracts and equitable geographical representation), had to reconcile two often contradictory conditions. The whole point was that he must be empowered not to renew indeterminate appointments. The staff representative had referred to tribunal decisions based on jurisprudence, and he would like to have details of that; had there been any legal decisions on that particular point, the non-renewal of contracts? The point should be studied very closely. Perusal of the General Conference resolutions showed that the Conference had never recommended that a text be modified, but only that methods be changed, for the better implementation of principles already incorporated in the Constitution and the Staff Regulations. After hours of discussion a text had emerged which stated: "The Director-General shall strive". Mr. Ammoun urged that a serious study of that question be placed before the Commission. In conclusion, he assured the Director-General that he fully sympathized with him in his perfectly justifiable attempts to redress a situation which left him with his hands tied.

(74) Sir Ben BOWEN THOMAS (United Kingdom) asked if the Director-General would accept the substitution of "constituted" for "distributed" on as wide a geographical basis as possible.

(75) The DIRECTOR-GENERAL thought it a great improvement.

(76) Mr. BERNAL JIMENEZ (Colombia) agreed, in general, with the Lebanese delegate. Regulation 4.6, as originally drafted in the proposal, was more expressive than the amendment which purported to strengthen it. The phrase: "in order to achieve more equitable geographical distribution within the Secretariat" should be maintained. The aim was to rectify a lack of equity. Paragraph 4 of Article VI of the Constitution was clear, but there had been a discrepancy between constitutional principle and actual practice. That was no new state of affairs but one which had recurred since the foundation of Unesco.

(77) If the amendment were accepted, the above-quoted phrase of Regulation 4.6 in the proposed amendments to Staff Regulations should be maintained.

(78) The DIRECTOR-GENERAL, who said that he had merely been trying to help the Commission to reach agreement, would not insist on his amendment.

(79) In reply to a question from Mr. KELLY (Australia) concerning the interpretation of the word "selection", the DIRECTOR-GENERAL said that he would interpret it to mean recruitment only in Regulation 4.3.1. In 4.3.2, it might mean recruitment only. In 4.3, he would take it to apply also to transfers, promotions, renewal of appointments, and all other personnel matters.

(80) Mr. JUVIGNY (France) seconded the remarks of the Lebanese delegate, which he himself had touched on in two of his own statements. He hoped the Secretariat would take them into account and study the points raised by the Lebanese delegate from a legal point of view.

(81) Mr. SABA (Legal Adviser) stated that to his knowledge there was no legal provision for the case of non-renewal of contract for the purpose of assuring better geographical distribution, although the Administrative Tribunal of the United Nations and the Unesco Appeals Board had had to give decisions in cases of non-renewal of contracts. Those authorities had decided that staff members were entitled to a reasonable expectation of renewal and they had held themselves to be competent to pronounce upon the reasons for which a contract had not been renewed. The Legal Adviser personally considered that the right not to renew contracts on expiration was strictly a prerogative of the Director-General, who had full discretion in the matter; but in view of the precedents established by the appeals authorities in that connexion, and of the fact that those precedents might be applied to non-renewal in the interests of better geographical distribution, the Director-General had wished for a clear and precise decision on the matter.

(82) Mr. TUNCEL (Turkey) saw no obstacle in the way of adopting Regulation 4.3.1, which was merely the logical sequel to Regulation 4.2 as it had been amended on the proposal of the Director-General. Regulation 4.3.1, which had been rather vague in its original form, had become more precise as a result of the amendments proposed by the United Kingdom delegate and the Director-General. He accordingly supported those amendments.

(83) Mr. SHARIF (Pakistan) wondered if the amendment proposed by the Director-General would give him the same powers as under Regulation 4.6. If Regulation 4.3.1 were approved, he would later propose an amendment to Regulation 4.6.

(84) Mr. SABA (Legal Adviser) presumed that what the delegate of Pakistan wished to know was whether the amendment to Regulation 4.3.1 proposed by the Director-General would give the latter the same rights as those deriving from the proposed amendment to Regulation 4.6. He explained that, since the idea of selection was to be replaced by a more general wording, to the effect that "The Director-General shall secure as wide a geographical distribution as possible", it was perfectly clear that that covered appointments proper, as well as renewal or non-renewal of contracts. However, there was a difference of degree in the force of the two articles, Regulation 4.6 as proposed being by far the more categorical; also, non-renewal was explicitly mentioned in Regulation 4.6 but was only implicit in Regulation 4.3.1.

(85) In reply to a question from the CHAIRMAN, Mr. SHARIF (Pakistan) said that he had received an answer to his question from the Legal Adviser. There was a difference in degree, but the Director-General did have the same power under both Regulations to ensure geographical distribution when it came to renewing appointments. If necessary, he would later move an amendment to Regulation 4.6.

(86) On a point of order, Miss LAISE (United States of America) drew attention to the fact that Unesco's own Staff Rules and Regulations clearly specified that there was no presumption of the renewal of a contract when it expired, and that the United Nations Regulations and jurisprudence were not relevant.

(87) Mr. AMMOUN (Lebanon) asked whether the Director-General thought the proposed wording would suffice to eliminate any difficulty of interpretation in cases of non-renewal of contracts, and whether he thought it would cover the case of all Unesco staff members. If so, the speaker was prepared to vote for the proposed text without further discussion.

(88) The DIRECTOR-GENERAL believed that, as the machinery for appeal existed, the text proposed would provide the maximum protection both for Unesco and for its staff members.

(89) Mr. JUVIGNY (France) observed that, if he understood aright the Legal Adviser's explanation, the proposed text would leave the Administrative Tribunals with practically no control, since the equitable geographical distribution clause would in fact give the Director-General arbitrary powers - a situation which seemed to him somewhat difficult to accept. Account must be taken of the legal decisions taken by Administrative Tribunals, from which common principles had emerged. The proposed wording, by giving the Director-General full power, might cover a number of other reasons (the officials conduct, etc.) and, in extreme cases, the geographical reason might well be used to conceal others.

(90) The speaker gave a second reason, of a practical nature. Supposing that there were, in one department of the Secretariat, four or five officials with the same grade and the same nationality, the Director-General would be obliged to choose which of them should be sacrificed in the interests of better geographical distribution - and that choice ought not to be purely arbitrary. It would therefore be necessary to adopt objective criteria, such as the standard of service rendered by those officials; the Appeals Board, and later the Administrative Tribunal, would thus be enabled to apply a material test (comparison of reports on the officials in question). Mr. Juvigny thought such jurisdictional controls would still be necessary, even if the proposed new text were adopted, as they were an essential safeguard for staff members.

(91) The DIRECTOR-GENERAL understood as well as any member of the Commission that the gift of power placed a heavy responsibility on a Director-General and inescapably provided the possibility of the abuse of power. That was why he had told the General Conference in a plenary meeting that he would always be ready to give a reason when he refused to renew a contract, although he was not obliged to give such reason. That gave the tribunal an opportunity to evaluate his reason and provided staff members with maximum protection against the exercise of arbitrary power. He had, for example, given a reason for his recent refusal to renew four contracts.

(92) The CHAIRMAN called for a vote on the amendment to Regulation 4.3.1, as proposed by the Director-General:

"Without prejudice to the terms of Regulation 4.2, the Director-General shall ensure a staff constituted on as wide a geographical basis as possible".

(93) The amendment was adopted by 42 votes to 0, with 5 abstentions.

(94) Mr. MARTINEZ COBO (Ecuador) asked for an explanation regarding Regulation 4.3.2. He wished to know whether the statement that staff should be selected "on a competitive basis" meant that the selection was to be made by a comparison of their merits or by examination. The situation would vary according to the method used.

(95) The DIRECTOR-GENERAL replied that either method could be employed, the main point being to ensure that the best person secured the position.

(96) It was agreed to maintain Regulation 4.3.2 and the Commission passed to Regulation 4.4.

(97) It was agreed to maintain Regulation 4.4 and the Commission passed to Regulation 4.5.

(98) The DIRECTOR-GENERAL explained that, since the document had been prepared, he had asked the Conference for permission to suppress the post of Deputy Director-General and to appoint two Assistant Directors-General. If the Conference agreed to his proposal, the text of Regulation 4.5 would have to be amended accordingly.

(99) Subject to the Director-General's reservation, the proposed new text of Regulation 4.5 was approved.

(100) The adoption of the proposed amendment to Regulation 4.5.1 was moved and seconded by several delegations.

(101) Mr. BAUGNIET (Belgium) pointed out that the present wording of Regulation 4.5.1 as given in document 8C/ADM/11 was not in accordance with the French text adopted by the General Conference and given on page 122 of the Resolutions (French) of the 1952 session of the Conference, which provided for the renewal of certain contracts "pour des périodes déterminées d'un an au moins et de cinq ans au plus"; the text given in document 8C/ADM/11 read "not less than one year up to a maximum period of service of five years". There was an appreciable difference between the two, as the text adopted by the Conference in 1952 allowed of several five-year contracts in succession, whereas the text submitted to the Commission might be interpreted as meaning that all higher officials would have to go after five years' service if they had not been granted indeterminate contracts.

(102) The DIRECTOR-GENERAL explained that the original text, adopted by the Conference in 1952, had been written in English; the error was merely one of French translation. He was certain that the text in document 8C/ADM/11 was correct and reflected the intention of the Conference at its 1952 session.

(103) Mr. JUVIGNY (France) asked that note should be taken of the abstention of the French delegation; he asked whether the text meant that the Director-General could not renew a contract that implied the retention of an official in his post for more than five years.

(104) The DIRECTOR-GENERAL explained that, taking 1 January 1952 as a starting-point, a person in continuous service could not serve the Organization beyond 1 January 1957 without having an indeterminate contract; on all successive dates after 1 January 1952 the same principle would apply.

(105) The amendment to Regulation 4.5.1 proposed by the Director-General was adopted by 43 votes to 0, with 3 abstentions.

The meeting rose at 7.10 p.m.

# NINETEENTH MEETING

*30 November 1954 at 10 a.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.5.1 OF REVISED AGENDA: PERSONNEL RECRUITMENT STANDARDS AND METHODS (document 8C/ADM/11) (continued)**

(1) The Commission turned to the examination of paragraphs 19 and 24.

(2) The DIRECTOR-GENERAL said that it was highly desirable for the General Conference to give him definite guidance as regarded the proportion of fixed-term and indeterminate appointments within Unesco.
(3) The principles set forth in paragraph 19 had been endorsed two years before by the Administrative Committee on Co-ordination.
(4) Some time would necessarily elapse before the percentages indicated in that paragraph were achieved. That was why he had proposed that the date by which those figures should be attained should be 1958. He would, of course, report on progress made to the ninth session.
(5) All he was doing in that paragraph was to ask the Conference to set target percentages and a target date by which they should be attained, leaving him free to decide, with the best interests of the Organization in mind, how to set about attaining them.
(6) The adoption of the principle set forth in paragraph 24 would considerably strengthen his hand in dealing with applications for employment.

(7) Mr. BROWNELL (United States of America) sympathized with the Director-General. In any organization it was difficult to decide what the proportion of fixed-term and indeterminate appointments should be. But he was not sure that the Commission would be assisting the Director-General by adopting a resolution on the lines suggested. To lay down fixed percentages for such posts might not be in the best interests of Unesco.
(8) Accordingly he would propose the following motion:

"The Commission recommends that the General Conference authorize the Director-General to continue his efforts to build up a permanent cadre of Unesco officials in the interests of continuity and stability, and request him to report to the next session on the progress made".

(9) The DIRECTOR-GENERAL, answering a question by Mr. HUZAYIN (Egypt), said that about 40% of staff in the Professional categories were at that moment in possession of permanent contracts.

(10) Sir Ben BOWEN THOMAS (United Kingdom) had been reassured by the wording of paragraph 19, in which it was stated that the Director-General's aim would be to achieve the figures in question. In such matters it was always dangerous to be too explicit in setting target figures. He supported the United States motion.

(11) The United States motion was put to the vote and adopted by 32 votes to 0, with 8 abstentions.

(12) Mr. FRAGA IRIBARNE (Spain), seconded by Mr. Huzayin (Egypt) and Mr. de Los Santos (Philippines), moved that the Commission recommend the General Conference to instruct the Director-General in accordance with paragraph 24.

(13) Mr. SHARIF (Pakistan) said that, during the discussions of the day before, the point had been made that the Director-General had, under the Staff Regulations, full power to renew or not to renew a contract with an eye to obtaining the highest possible standards of efficiency and integrity, coupled with an equitable geographical distribution of posts. That had also been the view of the Legal Adviser.
(14) In view of the new paragraph 4.3.1, did the Director-General feel that there was a need for any more specific authorization, such as would be given under paragraph 4.6?

(15) The DIRECTOR-GENERAL said that in paragraph 24 he was not asking for further powers. All he was requesting was that the Conference should give him instructions which he could invoke when dealing with applicants from over-represented countries.
(16) Admittedly it was difficult to define what an "over-represented" country was. Generally speaking, he did not absolutely require the instructions asked for, although they would be of assistance to him.

(17) Sir Ben BOWEN THOMAS (United Kingdom) was inclined to trust the Director-General in implementing the Staff Regulations. He was deeply suspicious of hard-and-fast instructions and definite percentages, and thence considered paragraph 24 superfluous.

(18) Mr. SUNDARAM (India) said that the day before, the Director-General had expressed his willingness to give his reasons for not renewing a contract.
(19) If the Director-General terminated, or refused to renew, a contract, and gave as one of his reasons that the individual concerned came from an over-represented country, would any appeal against that decision be sustained by the Appeals Board?

(20) The DIRECTOR-GENERAL said that in some cases he might indeed give that as one of his reasons, but, unless the principle of paragraph 24 were adopted, he would not give as his reason that any particular Member State was over-represented. He felt that the Appeals Board could hardly fail to uphold his decision if that decision were honestly arrived at and were in accordance with the facts.

(21) Mr. JUVIGNY (France) reminded the Commission that he had already informed them the previous day of the French delegation's attitude towards the principle of geographical distribution. He would therefore merely express his reactions to the actual terms of paragraph 24.
(22) First of all, he called the Commission's attention to the unsuitable use of the word "represented" in the part of the sentence which read "of nationals from Member States which are over-represented in the Secretariat". He pointed out that the idea of "representation" was a very precise one, and to consider the Secretariat officials as "representative" of Member States was contrary to the fundamental principle of international organizations.
(23) The French delegation was equally unable to accept the words "unless he judges that to do so is essential to the efficient administration of the Organization". It felt very strongly that the efficient administration of the Organization should always, and in all circumstances, be one of the major aims of the Director-General.

(24) The CHAIRMAN observed that the Director-General would not insist on his proposal.

(25) Mr. HUZAYIN (Egypt) said all would agree that the primary consideration was to obtain staff of the highest possible efficiency and integrity. The point of the Director-General's proposal in paragraph 24 was as follows: if there were two candidates for a particular post, one of them from an over-represented, the other from an under-represented, country, then, all else being equal, the latter candidate would be chosen. That was surely very reasonable.

(26) The Commission decided, by 20 votes to 3, with 13 abstentions, to recommend the General Conference to instruct the Director-General in accordance with paragraph 24 and passed on to paragraph 4.5.2.

(27) The DIRECTOR-GENERAL said that there were occasions when he wished to prolong an appointment beyond the normal term without making a temporary appointment, pending the recruitment of a successor.
(28) For example, the contract of the Director of the Mass Communication Department expired on 31 December. He (the Director-General) might wish to ask the official in question to stay on until a successor was found. The alternative was to abolish the post and to create a temporary appointment for a fixed period. The change requested was a matter of convenience for the Secretariat.

(29) Mr. FRAGA IRIBARNE (Spain), seconded by Mr. POHL (Union of South Africa), moved adoption of paragraph 4.5.2 as proposed by the Director-General.

(30) The Spanish motion was put to the vote and unanimously adopted.

(31) The DIRECTOR-GENERAL then withdrew his proposal in connexion with paragraph 4.6.

(32) Mr. ERIKSSON (Rapporteur) said that, in paragraph A.1, document 8C/ADM/11 quoted a resolution by the seventh session, calling on the

Director-General to aim at a better geographical distribution of staff and at added efficiency. Had the Director-General anything to say on the action taken to achieve added efficiency?

(33) The DIRECTOR-GENERAL said that at the seventh session he had been Chairman of the Administrative Commission, which had framed the resolution. The feeling there had been that equitable geographical distribution automatically entailed increased efficiency as far as Unesco was concerned. That was his view, and hence there was no separate report on the steps taken to attain added efficiency.

(34) Mr. AMMOUN (Lebanon) pointed out that the Lebanese delegation, while not opposed to the modifications which had just been approved, doubted if in fact they altered the present situation to any great extent. However, it felt quite sure that it would be to the advantage of all to give effect to the idea set out in paragraph 28 (a) in the following terms:

"The Director-General believes that it will be in the long-term interests of the Organization to recruit for junior professional posts young persons with good academic qualifications with a view to giving them within the Secretariat the training in languages and in civil service methods which they lack. He believes that this should be done within the framework of the approved programme and not by the creation of special training posts".

(35) Mr. Ammoun suggested that the method proposed might even be extended to include the General Service categories.

(36) He also protested strongly against certain unjustified statements, such as that which appeared in the first sentence of paragraph 28 (a): "It is difficult to find candidates from Member States which are not English- or French-speaking who combine professional qualifications with a good knowledge of one of these languages, which is clearly necessary for efficient service to the Organization". It seemed to him that the representatives of English- or French-speaking Member States should be the first to contest that statement, which showed that it was not realized how widely spread those two languages were. For his part he would be glad if the Rapporteur would kindly mention that in his report.

(37) The CHAIRMAN said that the Commission had now finished its consideration of document 8C/ADM/11.

**ITEM 9.3 OF REVISED AGENDA: LEGAL QUESTIONS (document 8C/JUR/3) (continued)**

(38) Mr. BAUGNIET (Rapporteur of the Legal Committee) presented document 8C/JUR/3, which set forth the recommendations of the Legal Committee on the various questions referred to it by the Administrative Commission. He wished, first, to draw the Commission's attention to the changes recommended by the Committee in respect of Articles V, 9 and VI, 3 of the Constitution (page 1).

(39) The proposed new wording of Article V, paragraph 9, was approved unanimously.

(40) The proposed new wording of Article VI, paragraph 3, was approved unanimously.

(41) Mr. BAUGNIET (Rapporteur) next submitted the draft resolution given in paragraph 4 (c) (pages 1 and 2).

(42) Replying to a question from the delegate of the Union of South Africa, he explained that the point of the words "if necessary" in paragraph (2) of the draft resolution was to avoid tying the Director-General down, even if the General Conference met in the early months of the year, to preparing a report which could only cover a very short period and would in all probability be of little interest.

(43) Mr. POHL (Union of South Africa) thought too much was being asked of the Director-General's discretion. The Commission should give some indication of how often a report was required.

(44) The DIRECTOR-GENERAL said that his intention was to take the advice of the Executive Board. He was prepared to accept an amendment whereby the words "if necessary" would read: "if considered necessary by the Executive Board".

(45) Mr. JUVIGNY (France) expressed willingness to approve the draft resolution in question with whatever drafting change might be made to meet the wishes of the South African delegate.

(46) Mr. SALIM (Hashemite Kingdom of Jordan) said that distant countries often received, almost simultaneously, reports for two consecutive periods. One report only, for the whole period, should be distributed to Member States. Perhaps the Director-General might report to the Executive Board every six months.

(47) The DIRECTOR-GENERAL said that to report every six months would lay a great burden on the Secretariat. He realized that sometimes reports for consecutive periods were received at almost the same time, but would try to arrange things so that Member States would receive a report for any year within the first three months of the following one.

(48) In view of the foregoing discussion, Mr. BAUGNIET (Rapporteur) proposed rewording paragraph 2 of the draft resolution as follows:

"..... in those years during which the General Conference shall meet in ordinary session, and if the Executive Board deems it necessary, an interim report covering the activities of the Organization from the end of the preceding year".

(49) This amendment was adopted.

(50) The draft resolution thus amended was approved.

(51) Mr. BAUGNIET (Rapporteur) went on to inform the Commission of the Legal Committee's proposals on item 9.3.3 (Draft amendment to the Constitution, and other provisions relating to the withdrawal of Member States) (paragraphs 5 and 6, page 2).

(52) Proposed by Sir Ben BOWEN THOMAS (United Kingdom) and seconded by Mr. AFTALION (Argentina),

the text recommended by the Committee as paragraph 6 of Article II of the Constitution was unanimously approved.

(53) Mr. BAUGNIET (Rapporteur) then proceeded to the Legal Committee's recommendations in respect of item 9.3.4 (Proposed amendments to the Rules of Procedure of the General Conference). Some of those amendments were solely designed to bring the Rules into line with the new situation which had arisen as a result of the admission of "Associate Members" to the Organization.

(54) Mr. DE HOOG (Netherlands) drew attention to Rule 19, paragraphs 1 and 2, pointing out that the English text should be corrected to read "or Associate Member" instead of "and Associate Member".

(55) Subject to that correction, the amendments proposed by the Legal Committee in respect of Rules 6 to 24 of the Rules of Procedure (document 8C/JUR/3, pages 3 and 4) were approved.

(56) Mr. BAUGNIET (Rapporteur) then presented Rules 25, 26 and 28, which referred to the organization of the Conference.

(57) Speaking in connexion with the proposed rewording of Rule 25, paragraph 2, and apart from the general reservation of approval by the General Conference in plenary session, Mr. POMPEI (Italy) wished to make a special reservation concerning the inclusion of the Advisory Committee on Programme and Budget in the list of Committees of the General Conference. He thought that the work of the present session had not yet gone far enough to warrant an attempt to determine whether or not that Committee should be retained at future sessions.

(58) The CHAIRMAN said that a decision taken by the Commission at that stage would not bind the Conference, if the Conference saw fit to make any changes later.
(59) The Chairman proposed that Rule 25 should read "The Commissions or subsidiary bodies", instead of "The Commissions and subsidiary bodies".

(60) Subject to that alteration, the new wording of Rules 25 and 26 was approved.

(61) The proposed change in Rule 28 was also approved.

(62) Referring to Rule 30, Mr. BAUGNIET (Rapporteur) said the Legal Committee had decided that the draft resolution submitted by the delegation of Chile for the amendment of Rule 30, paragraph 1 (document 8C/DR/65) was not within the Committee's jurisdiction and should first be studied by the Administrative Commission. The only proposals the Legal Committee wished to make in respect of Rule 30 were those given on page 4 of document 8C/JUR/3.

(63) Mr. VILLALON GALDAMES (Chile) said that his delegation was withdrawing the preamble it had included in its draft amendment to paragraph 1 of Rule 30 (document 8C/DR/65), but wished to maintain the proposed modification in substance: it accordingly suggested that the phrase "On information received from the Executive Board" be deleted, since, although that expression was quite clear in theory, it had in practice given rise to false interpretation and difficult situations.

(64) Mr. WEST (United Kingdom) was gratified to observe that the delegate of Chile was in agreement with the United Kingdom delegation in holding that Rule 30, paragraph 1, with its existing wording, did not commit the Nominations Committee to accepting only the list submitted by the Executive Board
(65) The delegate of Chile had apparently not been satisfied that all delegations would accept that interpretation.
(66) His own impression of what had gone on in the Nominations Committee was that nobody had in fact maintained that the Committee had no option but to accept the list submitted by the Board. Certainly his delegation, for one, had said that not to accept the Board's list might make the task of the Committee more complicated, since the way would be thrown open for the submission of many different lists. His delegation had pointed out that the Executive Board was under an obligation to give most careful thought beforehand to the proper distribution of Conference offices, and that, though it might be unwise, it would certainly not be wrong, to depart from the Board's recommendations.
(67) He assumed that the Chilean amendment to paragraph 1 tended to eliminate the part played by the Executive Board. Thence he was not sure he could agree that the deletion of the first words of the paragraph was a drafting amendment only. A serious issue was being raised.

(68) Mr. NOGUEIRA (Uruguay) proposed the compromise wording "Without obligation to follow the report, if any, of the Executive Board....", which was agreed to by the delegation of Chile.

(69) There followed some discussion on the Chilean proposal between the delegates of Argentina, Chile, the United Kingdom, Uruguay and the Union of South Africa, and after a short interval the CHAIRMAN submitted the following text (agreed upon by the delegations concerned) for approval by the Commission:

"The Nominations Committee, after receiving the report from the Executive Board, and without any obligation to accept its recommendations, shall determine and submit to the General Conference the list of nominations for the posts of President and of the ten Vice-Presidents of the General Conference".

(70) This resolution was put to the vote and adopted by 33 votes to 0, with 1 abstention.

(71) The recommendation by the Legal Committee for the insertion of another sentence at the end of paragraph 1 (Rule 30) was adopted unanimously.

(72) The recommendation by the Legal Committee for a new paragraph 4 to be added to Rule 30 was adopted unanimously.

(73) The CHAIRMAN then submitted the proposed new wording of Rule 40 (Acting President) (document 8C/JUR/3, page 5).

(74) Mr. SOLDATOV (Union of Soviet Socialist Republics) stated that his delegation saw no need to change the existing wording of Rule 40, and would therefore vote against the proposed alteration.

(75) Mr. BROWNELL (United States of America) said that the proposal was based on experience acquired at past sessions and he supported it. Paragraph 1 of Rule 40 provided for short absences, but there should be some system to cope with the event of accident or illness.

(76) Mr. SOLDATOV (Union of Soviet Socialist Republics) saw no reason why the President needed in his absence to be replaced by one and the same Vice-President for the whole time. He would have thought that the various Vice-Presidents could take turns to serve as Acting President.

(77) Mr. WIECHECKI (Poland) said that no provision had been made for the case of the President of the General Conference being away for more than one meeting, but less than two days.

(78) The CHAIRMAN thought that in that case the provisions of paragraph 1 would apply. In other words, the President would be replaced by the Vice-Presidents in turn.

(79) Mr. SABA (Legal Adviser) concurred.

(80) The Legal Committee's proposals in respect of Rule 40 were put to the vote and carried by 20 votes to 6, with 4 abstentions.

(81) The proposed amendments to Rules 47, 59, 63, 69, 73, 74, 75 and 76 were then approved one after the other.

(82) Mr. BAUGNIET (Rapporteur) then proceeded to Rule 92, which set out the Legal Committee's recommendation that a clause be inserted to deal with Associate Members.

(83) Mr. FRAGA IRIBARNE (Spain) thought that the expression "the Member State or other authority having responsibility" in the revised text of Rule 92 should be made clearer so as to cover the case of States not Members of Unesco applying for membership on behalf of territories or groups of territories for which they were responsible.

(84) In reply to the Spanish delegate, Mr. BAUGNIET (Rapporteur) said that the proposed wording took all such possibilities into account. For his own part he saw no objection to substituting the single word "State", for the words "Member State" in paragraph 2.

(85) Mr. FRAGA IRIBARNE (Spain) said that what he wanted to know was whether a State which was not a Member of Unesco could apply for membership on behalf of a territory or a group of territories under its jurisdiction.

(86) Mr. SABA (Legal Adviser) said that the revised text merely repeated the words used in Article II of the Constitution. It was for the Commission to decide whether it now wished to discuss how that Article should be interpreted.

(87) Mr. FRAGA IRIBARNE (Spain) explained that he did not wish to present a formal motion, but only to raise the point for the time when the Legal Committee should be ready to examine it.

(88) Mr. WIECHECKI (Poland) pointed out that the words "or other authority having responsibility for their international relations" could be applied to non-Member States just as well as to Member States.

(89) Mr. WEST (United Kingdom) said that the formula used had a definite meaning in other international organizations. It was designed to provide for cases in which the United Nations might accept responsibility for a trust territory.

(90) The Legal Committee's recommendation on Rule 92 was adopted unanimously.

Rules 103, 104 and 105

(91) The CHAIRMAN pointed out that in Rules 103, 104 and 105 the words "Associate Members" had to be added.

(92) The amendment to Rules 103, 104 and 105 was adopted unanimously.

(93) Mr. BAUGNIET (Rapporteur) then submitted the proposed amendment to Rule 106.

(94) Adopted.

(95) Paragraph 8 of document 8C/JUR/3 was likewise approved.

(96) Document 8C/JUR/3 was then adopted as a whole subject to the amendments previously agreed upon.

The meeting rose at 1.15 p.m.

# TWENTIETH MEETING

*30 November 1954 at 3 p.m.*

*Chairman:* Mr. BEEBY (New Zeland)

**ITEM 9.3 OF REVISED AGENDA: LEGAL QUESTIONS**
(continued)

(1) Opening the meeting, the CHAIRMAN said that he had omitted that morning to thank the Chairman, Rapporteur and members of the Legal Committee for their extremely useful report. Before finally leaving the Rules of Procedure, he drew attention to the fact that paragraph 2 of Rule 86, concerning the procedure for voting on amendments, had given rise to a great many difficulties at sessions of the General Conference. The possibility of changing that Rule might be considered for the future.

(2) The Spanish delegation had submitted a draft resolution (document 8C/DR/90) containing a proposal that a two-thirds majority be made necessary for the adoption of amendments to the Financial Regulations. The Chairman proposed that the resolution be referred for advice to the Legal Committee.

(3) Agreed.

**ITEM 9.4.4 OF REVISED AGENDA: CONTRIBUTIONS: SCALE, CURRENCY AND COLLECTION OF CONTRIBUTIONS OF MEMBER STATES (documents 8C/ADM/34 and 8C/DR/87)**
(continued)

(4) Introducing the final report of the Contributions Committee, Mr. BOW (Rapporteur of the Contributions Committee) explained that it was divided into three parts: (1) currency of contributions; (2) collection of contributions; and (3) draft resolution submitted by the delegation of Chile (document 8C/DR/87). On the first page, the only alteration in the resolution on the currency of contributions was the provision to meet the request of Switzerland to pay, at its choice, in United States dollars, pounds sterling or French francs. As far as collection of contributions was concerned, the Committee had noted a decided improvement in the payment both of contributions and of arrears. A list of contributions receivable from Member States at 26 November 1954 was annexed to the report.

(5) Sir Ben BOWEN THOMAS (United Kingdom), seconded by Mr. WENK (Switzerland) and Mr. SANDOVAL VALLARTA (Mexico), moved adoption of section 1 - Currency of contributions.

(6) Mr. STEPANEK (Czechoslovakia), referring to his delegation's negotiations with the Contributions Committee, said that it had disputed its obligation to pay in respect of 1953 and part of 1954 - during which time Czechoslovakia had been out of the Organization. He noted that the Committee had disregarded that in its report, even though in another instance it had reserved its decision pending legal decision. The Czechoslovak delegation wished the point to be noted.

(7) The CHAIRMAN observed that the matter raised by the delegate of Czechoslovakia concerned the Contributions Committee, but he assured him that the point would be noted.

(8) Section 1 was adopted.

2. Collection of Contributions

(9) Adopted.

3. Draft Resolution submitted by the Delegation of Chile (document 8C/DR/87)

(10) Adopted.

(11) The whole report was adopted.

(12) Mr. STERNBERGER (Chairman of the Contributions Committee) wondered if the Commission wished to discuss the question whether or not to have a Contributions Committee at the ninth session of the General Conference. There was a suggestion that the work of the Contributions Committee might in future be taken over by the Executive Board.

(13) Mr. ABEYWICKREMA (Ceylon) recalled a feeling expressed that the Executive Board should meet less often. If it took over the tasks of the Contributions Committee, it would probably not be possible for it to hold fewer sessions.

(14) Mr. WIECHECKI (Poland) pointed out that page 4 of the Annex to the Contributions Committee's Report showed Poland as owing a sum of $159,898 for 1954, whereas, according to his information, Poland had paid $160,000 as its contribution for that year.

(15) Mr. HARPER-SMITH (Comptroller) replied that it was true that the sum had been paid by the Polish Government, but, under the Financial Regulations still in force, the payment had to be credited first to the Working Capital Fund and then against the contribution next due, which, in the present case, was that due in respect of 1953.

(16) Mr. WIECHECKI (Poland) took note of the Comptroller's explanation, while reserving the right to comment on it later if it did not concur with the

arrangement made by the Contributions Committee.

(17) Mr. STERNBERGER (Chairman of the Contributions Committee) had no definite recommendations to make on behalf of the Contributions Committee and did not know how much work the Executive Board had before it; but he was sure that the Committee, if so desired, would be very glad to serve again at the ninth session.

(18) Sir Ronald ADAM (Chairman of the Executive Board) had not consulted the Board on the subject, but, personally, believed that the Board, which would be able to study the question of contributions over a period of two years, would discharge the task far better than a committee set up at short notice during the General Conference.

(19) Sir Ben BOWEN THOMAS (United Kingdom), seconded by several delegations, moved that the future of the Contributions Committee be referred to the Executive Board for consideration, particularly when it came to the task of making plans for the organization of work of the ninth session of the General Conference.

(20) The proposal was adopted.

(21) Mr. STERNBERGER (Chairman of the Contributions Committee) wished to make one final remark. Everyone had paid tribute to the work of the Contributions Committee, but it would not have been able to settle any of the matters submitted to it, had it not had the very skilful and efficient help of the Secretariat.

(22) The CHAIRMAN was sure that the Commission would wish to place on record its appreciation of the fine work done by the Contributions Committee.

**ITEM 9.5 OF REVISED AGENDA: STAFF QUESTIONS (continued)**

Legal guarantees to be provided nationally for the staff of the Secretariat (document 8C/DR/74)

(23) Mr. POMPEI (Italy) submitted the Italian delegation's draft recommendation to give the staff of the Secretariat legal guarantees in addition to those already examined in document 8C/ADM/11 (Personnel recruitment standards and methods). The General Conference had asked the Director-General, at its seventh session, if, in the interests of continuity and stability, he could build up a permanent cadre of Unesco officials, but there was a second class of officials not to be overlooked, who worked for only a few years at Unesco, and then returned to resume their careers in their home country. Mr. Pompei said he would not dwell on that document, as it had already been brought before the Commission by the representative of the Executive Board; he would merely draw attention to the advantages of the guarantees provided in the draft recommendation: the recruitment of candidates for non-permanent posts would be given wider scope and in that way candidates would reach a high enough standard to comply with the Director-General's recommendations as to competence and efficiency. The draft recommendation, if accepted, would make it less awkward to terminate the contracts of officials, by doing away with certain personal and human aspects. The element of security would have a favourable effect on the official during his engagement, comparable to that of a permanent contract. Mr. Pompei wanted to make it clear that all that the Italian delegation wanted at present was a recommendation to Member States, since it did not think the time was yet ripe to ask them to take any more binding step; all that could be done for the moment was to appeal to their moral sense. The position of such officials varied a good deal from one country to another, which might cause a certain amount of difficulty; it should be possible to overcome that problem by taking suitable administrative steps, without resorting to special legislation. All that Member States were being asked to do at present was to ensure that, when their nationals returned home after occupying a temporary post at Unesco, they obtained a position at least equal to that held before they joined Unesco. Mr. Pompei thought the question had already been studied by other Specialized Agencies of the United Nations. He personally had been called upon to deal with situations of the kind, and had obtained satisfaction for Italian officials; his task would have been much easier if there had been a recommendation of that kind in existence. He concluded by stressing the fact that the Italian delegation was merely bringing the problem to the notice of Member States.

(24) Mr. NOGUEIRA (Uruguay) confirmed the remarks made on the previous day by his delegation, requesting Unesco to offer its officials long-term contracts for 5, 6 or 7 years. He thought it advisable for Member States to extend insurance and retirement provisions granted to national civil servants, to those of their nationality who discharged the functions of international officials. The Italian delegation's draft recommendation did not go so far as the legislation of Uruguay on that matter. All things needed time to mature. His delegation would support the Italian draft recommendation.

(25) While sympathizing with the point of view of the Italian delegation, Mr. BROWNELL (United States of America) thought that the resolution would be more likely to produce the desired results if Member States were asked, not to guarantee certain conditions, but to go as far as they could in the matter. He therefore suggested the following redraft of the resolution:

"Member States which release their officials to take up employment with the Secretariat should make every effort to see that, at the end of their service with Unesco, those officials are restored to a position in the Government service equal or equivalent to the position they previously held, and that, if possible or relevant, their service with the Organization should count for the purposes of seniority. For the same purpose, Member States should encourage private institutions or establishments, where appropriate, to give similar assurances to their members."

(26) The above amendments were acceptable to Mr. POMPEI (Italy) and Mr. NOGUEIRA (Uruguay).

(27) Sir Ben BOWEN THOMAS (United Kingdom) stated that the matter was one of considerable interest to his delegation, which was very much in favour of the Italian proposal. He was happy to say that the United Kingdom had never been unwilling to release personnel, but had always considered individual applications on their merits. The question was whether the aim of the Italian resolution was to voice an aspiration or to start effective action. It seemed to him that both the Italian resolution and the United States amendment merely voiced an aspiration and would not produce any considerable or far-reaching results. He therefore moved that:

"The Administrative Commission ask the Director-General to report to the General Conference at a future session on the practice of Member States of Unesco in sanctioning the secondment of civil servants, members of the staffs of universities and educational institutions to the United Nations and Specialized Agencies".

(28) When that information had been collected, the Conference would be in a better position to make recommendations to Member States.

(29) Mr. C.W. CARTER (Canada) moved that the advice of the Legal Committee be sought before the Commission took any decision on the draft resolution in document 8C/DR/74

(30) Mr. KELLY (Australia) seconded the Canadian motion.

(31) Mr. DE HOOG (Netherlands) wondered whether it was really necessary to refer the resolution to the Legal Committee; if it were adopted, its results would only be felt at national level, so that it did not appear necessary to bring it before an international committee. He was accordingly opposed to that suggestion.

(32) The motion to adjourn the debate on document 8C/DR/74 until the Legal Committee had reported on it was put to the vote and adopted by 17 votes to 13, with 9 abstentions.

Measures to be taken to provide an in-service training programme (document 8C/ADM/12)

(33) The CHAIRMAN explained that no action was demanded on the document.

(34) Mr. SOLDATOV (Union of Soviet Socialist Republics), referring to paragraph 8 of document 8C/ADM/12, proposed that staff members be helped to acquire or increase their proficiency in Russian as well as in English and French.

(35) Mr. FARR (Chief, Bureau of Personnel and Management) suggested that the Soviet delegation's proposal be referred to the Secretariat committee referred to in paragraph 9, which had been set up to advise the Director-General on linguistic training.

(36) Mr. BAUGNIET (Belgium) asked that the International Civil Service Advisory Board report, referred to in paragraph 2 of 8C/ADM/12, be made available to members of the Commission.

(37) Mr. FARR (Chief, Bureau of Personnel and Management) replied that a limited number of copies of the report, in English and French, had been circulated to all delegations the preceding Friday (26 November).

(38) Document 8C/ADM/12 was received.

Report on salary adjustments for staff in the Principal Officer and Director and Professional categories (document 8C/ADM/13)

(39) At the proposal of Mr. BAUGNIET (Belgium) the report was adopted.

Personnel policy, obligations and rights of staff members: proposed amendments to the Staff Regulations (document 8C/ADM/14)

(40) Introducing document 8C/ADM/14, the DIRECTOR-GENERAL drew attention to the resolution on the first page, adopted by the General Conference at its second extraordinary session in July 1953. It would be remembered that, at that session, there had been an extensive discussion of certain aspects of the Organization's personnel policy and the Conference had finally passed the aforesaid resolution.

(41) It was impossible at the present time for Unesco to follow the policy of the United Nations and other Specialized Agencies, for the simple reason that there was no identically common policy. He had therefore decided to follow, in general, the policy of the United Nations; the aim of most of the recommendations in document 8C/ADM/14, therefore, was to bring Unesco's regulations into line with those of the United Nations. In developing the proposals before the Commission, the Secretariat had watched developments in the United Nations, studied papers presented by the Secretary-General to the General Assembly, and kept in touch with the other Specialized Agencies. The Director-General had decided to march with the United Nations and not to respond to incidents, involving problems for the Organization, as they might occur. He emphasized that point, because the incidents which had occurred in connexion with a United States national bore no relation to the proposals in document 8C/ADM/14. Therefore, in the case of Unesco, as in the case of the United Nations, the statement of the Secretary-General in paragraph 3 on page 2 was a true one, namely: "My proposals .... are, however, based on considerations of a general nature, and they are in no way adjusted to special circumstances prevailing at a particular time or in relation to a particular country". There had been no special circumstances prevailing at the time when the Director-General had drafted his proposals and submitted them to the Executive Board.

(42) It was desirable to introduce the word "integrity" as that was contained in paragraph 4 of Article VI of the Constitution. It was also desirable to make explicit reference to "independence" and "impartiality" as being qualities required of international civil servants which found their counterpart in the obligation of Member States, under the Constitution, not

to interfere with the work of members of the Secretariat.
(43) Similarly, in Regulation 1.7, it was proposed to adopt the United Nations text.
(44) With regard to Regulation 9.1, it was proposed to keep the text in the right-hand column of paragraph 4 (c). That would be followed by sections 9.1.1, 9.1.2, 9.3 and 9.3.1, as explained in paragraph 8 on pages 5 and 6 of document 8C/ADM/14.
(45) The deletion of Regulation 4.2.1 was proposed as that provision did not exist in the regulations of the United Nations or other Specialized Agencies.
(46) In conclusion, the Director-General emphasized again that one of his objectives was to develop a staff which was competent, efficient, loyal, impartial in dealings with Member States and independent of pressures of Member States - a staff of men and women willing to subordinate themselves to the interests of the Organization. Such staff members, in the conduct of their official business, would always be able to count upon the strong protection of the Director-General. The argument had been advanced that he did not need to change the wording of the Staff Regulations, because he could act under paragraph 4 of Article VI of the Constitution, but he had construed the first sentence of that paragraph broadly to mean that all his powers, in dealing with the staff, derived from the Staff Regulations. In his view, therefore, it was necessary to amend them.

(47) Mr. BENDER (Executive Board) thought it superfluous to say that the Executive Board had always been extremely concerned with the well-being of the staff, and particularly with their morale, which conditioned their capacity to serve the Organization to the best of their ability. In its discussions on personnel policy, the Board had always heard comments from a representative of the Staff Association, and he believed it very important that such a representative should be allowed to put the views of the staff.
(48) The question was one of the utmost importance, because the success of Unesco depended to a large extent upon the morale of the staff, and upon their liberty as international civil servants. The Administrative Commission would have to decide whether the amendments to the Staff Regulations proposed by the Director-General were in accordance with the principle of liberty proclaimed in paragraph 5 of Article VI of the Constitution. The Executive Board itself had been sharply divided, so that Mr. Bender would merely draw the Commission's attention to the Board's comments in Annex II on page 16 of document 8C/ADM/14.

(49) The CHAIRMAN asked the Commission if it would allow a representative of the Staff Association to make a statement.

(50) Agreed.

(51) Mr. HENQUET (representing the Staff Association thanked the Chairman and the Commission for giving him that fresh opportunity to put the views of the staff and said that the comments which he wished to make on behalf of the Staff Association were outlined in Annex I to document 8C/ADM/14.
(52) He wanted it made clear that, although the staff had been deeply disturbed by the proposed amendments to the Staff Regulations, its confidence in the Director-General himself remained unshaken. It fully appreciated the patient attention he had given to staff suggestions and grievances and his readiness to leave the staff free to state their point of view while giving his own personal opinion equally frankly.
(53) Mr. Henquet then retraced the basic principles called in question by the proposed amendments, referring in turn to the general conditions governing an international civil service, the legal aspect of such a service and the historical background to the proposals now being submitted. The basic principle was that of the absolute independence of international civil servants; that had been formally upheld on many occasions and was embodied in Article 100 of the Charter and Article VI of the Unesco Constitution. As it currently stood, from an administrative standpoint, the Secretariat was in fact a genuine international civil service manned by a team of officials with a stable structure, working for the furtherance of the common good, and independent of any one country.
(54) The second principle was that of security of tenure; the international civil service must be based on the idea of a career, and a career in its turn on permanent employment; that principle of security and stability of tenure had been officially recognized ever since the report prepared by the experts of ILO and the League of Nations had appeared. Mr. Henquet pointed out that, whereas successive staff difficulties encountered by the League of Nations had been due to the lack of a sufficiently well developed international spirit, United Nations difficulties and those which threatened Unesco were due to national loyalties.
(55) The Staff Regulations had arisen from the need to guarantee the principles outlined above, and to ensure that they would be effectively carried out. Mr. Henquet recapitulated the history of the idea of such regulations, pointing out that the body of the regulations in its way constituted the common law of international administration, and he added that, while not wishing it to be regarded as unchangeable, the Staff Association was agreed that amendments must be based solely on the needs of the particular international organization in question, and should take due account of its nature, composition and structure. Unesco's Staff Regulations could not be amended simply because those of the United Nations had been changed; guarantees and obligations, where officials were concerned, could not be altered without good reason, and some assurance was needed that the reasons which were valid in New York also held good in Paris, and that did not appear to be the case. Mr. Henquet made it clear that in the case in point the Staff Association thought it doubtful whether the proposed amendments really were based on permanent considerations, and felt that there was every reason to believe that events in New York had played a dominant rôle in their preparation. That was a direct outcome of the crisis suffered by the international civil service, and he thought a brief historical outline was called for. He referred to the proposals put forward by the Secretary-General of the United Nations, which were the basis of the present proposals, pointing out that one of the

reasons given for proposing the amendments was that the term "integrity" was covered neither by that of "unsatisfactory service" nor by that of "misconduct", so that the lack of integrity would not in itself constitute ground for dismissal, particularly as interpreted by the Administrative Tribunal. In order to demonstrate that the measures in question were dictated by special circumstances which obtained in a given country at a given time, Mr. Henquet reminded the Commission that twenty-one officials had been dismissed, in most cases because they refused to answer questions put to them by an Investigation Board or Parliamentary sub-Committee in their own country.

(56) On a point of order, Mr. KELLY (Australia) thought that the representative of the Staff Association should be asked to confine his remarks strictly to matters before the Commission and not to go into questions of concern only to Member States.

(57) The CHAIRMAN asked the representative of the Staff Association to bear the point in mind.

(58) Mr. HENQUET explained that he had no intention of dealing with the question of relations between international civil servants and their own countries, but merely wished to draw the Commission's attention to the position of international civil servants vis-à-vis the Organization to which they belonged in the light of the duties which devolved upon them and guarantees granted to them by the Staff Regulations. He had felt compelled to refer to the position of the New York civil servants, because the proposed amendments were almost identical with those introduced into the United Nations Staff Regulations as a result of the fifth General Assembly.

(59) Mr. Henquet then proceeded to analyse the Director-General's proposals, reminding the Commission that the grounds for dismissal which the Director-General could invoke under the Staff Regulations were the following: abolition of the post, staff reductions, unsatisfactory service, ill-health, serious misconduct - all of which were traditional in the administrative laws of civilized countries. The Staff Regulations in that way circumscribed the Director-General's discretionary powers and in that restriction lay officials' most precious guarantee of independence and security.

(60) The proposed amendments set out in document 8C/ADM/14 were designed to supplement those recognized grounds by adding others of which subjectivity was the keynote, thereby adding considerably to the Director-General's discretionary powers. While there remained the possibility of appeal, that increase in discretionary powers reduced the value of such checks as existed.

(61) The proposed amendments covered standards of integrity, political activity, and an extension in the Director-General's discretionary powers. The first item, integrity, occurred in both the Charter and the Constitution, and in the eyes of the Staff Association there could be no serious objection to incorporating it in the Staff Regulations, if it were understood in a precise and generally recognized sense; taking the term in the sense of incorruptibility, dignity, professional conscience, there could be no objection to including it in the rules of conduct or recruitment standards for the Secretariat. Unhappily, experience of the United Nations proved that there was a close connexion between, and an inevitable overlapping of, the concept of integrity and that of loyalty, and it had been all the more difficult to define the concept since it had to be construed in such a way as to cover the special position of the international civil servant. Mr. Henquet recalled that the Executive Board had advised the Conference not to insert that expression in the Staff Regulations without a precise definition - and that had not been given. The Director-General was proposing to insert the term "integrity" in Regulation 1.4 (rules of conduct) and in Regulation 9.1 (reasons for termination of appointment). The reasons for that were quite clear. Above all, it was, as in the United Nations, a way of avoiding conflict between the administrative and the legal points of view. The boundary line between administrative considerations on the one hand and those of a strictly legal nature on the other was very vague and only thinly veiled its object: that of encroaching openly on the jurisdiction of the administrative authorities and making room, in the relations between the Organization and its officials, for a special preserve, within which the administration would enjoy discretionary powers. The Staff Association was very much disturbed by those proposals, which might well have a serious effect on staff morale, and it hoped that the Conference would reject them or at least give an exact definition of the word "integrity".

(62) Mr. Henquet then drew attention to the proposal to amend Regulation 1.7, prohibiting any political action, other than voting, which might reflect upon the independence and impartiality required of members of the Secretariat. That amendment was worded in far more general terms than the text at present in force and would not fail to raise a delicate problem of interpretation. Mr. Henquet recalled that the Executive Board had advised the Conference to adopt the amendment only if a suitable definition were given of the words "political activity". While it considered that the present wording of Regulation 1.7, interpreted in the light of Regulation 1.4, would suffice to safeguard the Organization's interests, the Staff Association hoped that, if the Conference saw fit to alter the text, it would take into account the recommendations of the Executive Board or of the Advisory Council on Personnel Policies, which suggested a narrower definition.

(63) Mr. Henquet pointed out that the body of the amendments proposed would result in a considerable increase in the Director-General's discretionary powers, since in addition to the accepted grounds for dismissal he asked the Conference to recognize his right to dismiss officials on the grounds of: (a) lack of integrity; (b) facts anterior to the appointment of a staff member and relevant to his suitability which would have precluded his appointment; (c) the interests of the good administration of the Organization. The Staff Association maintained that the reasons at present embodied in the Staff Regulations were such as to enable the Director-General to encompass the objects laid down in the Constitution while guaranteeing the independence and security of officials. It held that the proposed amendments were dangerous to the Director-General himself, who could not, after

all, always be in a position to resist outside pressure. With regard to the criterion of integrity, what had already been said on that subject was seen to be all the more to the point since the reasons for termination of appointment, even more than the rules of conduct, should be stated with precision and objectivity. The criterion of facts anterior to the appointment was, he submitted, unacceptable because of its subjectivity and because it bore the seed of general insecurity. Mr. Henquet accordingly pointed out that the Executive Board had advised the Conference not to adopt that text. With regard to the clause dealing with the good administration of the Organization, that proposal had resulted from the compromise reached during discussions held by the Fifth Committee of the General Assembly of the United Nations; that text, taken in conjunction with the Director-General's right to increase by 50% the amount of the termination indemnity payable (Regulation 9.3.1), looked very much like bargaining or at least an arrangement very different indeed from the traditionally accepted usage of public law and, in that case again, the Staff Association hoped that the General Conference would adopt the recommendation of the Executive Board to reject the proposal.

(64) Mr. Henquet then went into the motives behind the draft amendments, the aim of which, he said, was quite clear: what the promoters of those proposals had in mind was to make possible the dismissal of three officials whose loyalty to the Government of a Member State had been called in question; the fixed contracts of four civil servants had already terminated and had not been renewed for the same reasons, and the proposed reforms obviously aimed at increasing the powers of the Director-General, and at enabling him to dismiss permanent officials. Mr. Henquet hastened to assert that the Staff Association had no desire to take sides in a question of the relations of civil servants with the Government of their own country, and that all it wished to do was to maintain certain principles regarding the attitude of the authorities towards its officials.

(65) The recent decision of the Appeals Board on the non-renewal of the contracts of the four officials referred to was extremely interesting in that connexion. The Appeals Board had seen fit to enquire into the validity of the grounds for the Director-General's decision: in the case in point, to decide whether the fact of refusing to appear before an Investigating Committee of a political kind did or did not constitute a lack of integrity.

(66) The Board had decided that the refusal to appear did not in itself constitute a lack of integrity, and that, to preserve that integrity intact, those officials had no need to account to an Investigating Committee for acts of which they had not been given precise details. It had likewise considered that there was no proof that their refusal to appear had been contrary to the interests of the Organization, or incompatible with a desire to serve such interests.

(67) It had concluded, therefore, that the Director-General was not justified in refusing to renew the contracts of the officials concerned.

(68) If the Director-General did not adopt the recommendations of the Appeals Board, he would probably soon find himself condemned by the Administrative Tribunal to pay an indemnity to the staff members whose contracts had not been renewed. The same would apply a fortiori, were three permanent officials to be dismissed for the same reasons.

(69) It was not for the Staff Association to say whether such decisions, which had caused irreparable damage to the careers of seven officials of unquestioned competence and experience, were likely to uphold the prestige and serve the long-term interests of Unesco.

(70) Finally, Mr. Henquet wished to state that, in the view of the Staff Association, the present wording of the Staff Regulations was satisfactory, and that it would be well to call to mind, before altering it, that the changes in the United Nations Staff Regulations were provisional, and were to be reviewed at the United Nations General Assembly in 1955; he also pointed out that the attitude of the other Specialized Agencies such as WHO and ILO should not be overlooked, and that they had not seen fit to alter their regulations, even though they too, like Unesco, had been obliged to reconsider their basic texts in the light of those in force at the United Nations. If it were resolved to modify the Regulations at all costs, the Staff Association considered that due consideration must be given to the recommendations of the Executive Board.

(71) The Staff Association offered its comments to the Administrative Commission, in the belief that it was true to the underlying principles of a genuine internationalism, which must combine international loyalty with the national attachments of every international civil servant. A truly international spirit could not be created with words; it called for the harmonization of an international outlook with the traditional idea of nationalism - a harmonization which obviously became more difficult at times of ideological conflict; and that was why the creation of a suitable psychological climate was so important. It was in that spirit that the Staff Association had presented its views.

(72) The CHAIRMAN asked members of the Commission if they would approve the following procedure: (1) that there should be a general discussion on document 8C/ADM/14; (2) that the Chairman should refuse to accept any resolution or amendment relating to individual rules; (3) that he should not give priority to any member giving notice of a motion after the close of the general debate.

(73) The above procedure was approved.

(74) Mr. BROWNELL (United States of America) stated that, in the view of his delegation, the issue under discussion was of very great importance and far more fundamental than it might appear: the future of the entire Organization was at stake, and it was a matter of grave concern to his Government and country. The problem, however, transcended one country or group of countries and its solution would require real statesmanship.

(75) No organization could rise above the level of its secretariat, so that the quality of Unesco's staff members must be of the highest, or the confidence of all those who supported the Organization would be shaken or destroyed. The founders of the post-war international organizations had been fully aware of

the problem, as was evident from that fact that they had conferred special privileges and immunities upon their secretariats, at the same time calling for staff members conforming to the highest standards of integrity, efficiency and technical competence. Acting under their Charters and Constitutions, all those organizations had established staff regulations, setting forth in greater detail those privileges and immunities and squarely placing upon the executive heads the responsibility of maintaining the high standards required. Unesco's Staff Regulations had closely followed those of the United Nations, until the latter were amended in 1953. But those amendments were not designed to change the exacting standards for international civil servants, but merely to amplify those standards. Different interpretations of the original regulations had led to disputes between the Secretary-General and the Administrative Tribunal, and the regulations had therefore been amended to prevent further conflicts and clarify the original intent. While the United States Government had contested the Administrative Tribunal's interpretation of the regulations, it had supported those clarifications in order to dispel future doubts regarding the power of the Secretary-General.

(76) Now similar amendments to Unesco's Staff Regulations had been proposed, and the United States delegation could support them. On the other hand, the United States delegation continued to maintain that the amendments were not necessary to the discharge by the Director-General of his responsibility. As far as dealings with his staff were concerned, the powers he needed were inherent and explicit in the Constitution. The United States delegation was convinced that no adjustment or amendments to the Staff Regulations would ensure the maintenance of the highest standards of integrity, efficiency and technical competence required of international civil servants, unless, in the first place, the meaning of those standards was clear and, in the second, the Director-General was ready to enforce them. As far as the meaning of those standards was concerned, it was true that they did not lend themselves to strict legal definitions, and the executive head would have to use his best judgment in dealing with inefficiency or lack of competence. "Integrity" was even more difficult to define, but that was not a reason for discarding it. Perhaps the best definition, although not a strictly legal one, was to be found in paragraph 4 of the International Civil Service Advisory Board's Report on Standards of Conduct in the International Civil Service (document COORD/CIVIL SERVICE/5 - 1954). The same report contained many other passages, such as paragraph 20, designed to define integrity. All the standards laid down in the Report were explicit and should be upheld, or created if they did not exist. The confidence of Member States, and thence the very existence of Unesco, were at stake. If the standards were disregarded or their interpretation narrowed down, the Secretariat of Unesco would be turned into a self-serving institution, a refuge for misfits and dissidents, and that would be unfair to the Organization and particularly to the large number of staff members who were faithful, hard-working and frequently inspired individuals, doing their utmost to serve the best interests of Unesco and putting those interests above their own.

(77) The task of enforcing those high standards was incumbent upon the executive head of each organization and he could not shift that responsibility to any other body or find comfort in legal definitions and interpretations. There would always be a need for enlightened judgment on the part of the executive heads. They required sound judgment, tact, a keen grasp of the need to maintain the confidence of Member States, a courage which did not shrink from difficult decisions, and the will to act at all times in the best interests of the organizations of which they were the guardians. Appeals machinery existed to safeguard the individual against arbitrary decisions, but it should not paralyse executive action when the interests of the organization required such action.

(78) In conclusion, the delegate of the United States of America was convinced that, if all were clear on the points he had mentioned, a solution could be found. His delegation, for one, was perfectly willing to continue the discussions until a meeting of minds on the fundamentals of the situation had been achieved.

(79) Mr. CARBAJAL VICTORICA (Uruguay) said that discussion turned upon the rights and duties of Unesco officials. He trusted everyone would agree that the citizen of a given country should not be deprived of human rights merely because he had become an international official. The Universal Declaration of Human Rights allowed those rights to all men. It was sometimes suggested that an official lost all rights except those granted to him by the statutes under which he worked. The speaker did not accept that postulate. On the contrary he upheld the rights of the individual, and maintained that an official could not, by reason of his office alone, lose the rights that were common to all mankind. Such rights must be harmonized with the duties his office imposed on him. When Minister of the Interior, the speaker had issued a decree recognizing the basic human rights of civil servants. Exceptions might arise when the exercise of such rights went against the rights of an official's function. For instance, in the matter of his right to free expression in public, in the press or over the air, an official bore a responsibility towards his function. He could not be false to the duties of his office. For instance, he could not publish any fact that had come to his knowledge through his acquaintance with secret documents. A publication of that kind would be the equivalent of stealing documents that did not belong to him as a private individual. The official was a servant of the public, and ought therefore to be scrupulously honest, able, industrious and loyal. Officials of Unesco were bound to fulfil such obligations. The delegate of the United States of America had attempted to interpret the concept of integrity. He himself would define it as "moral rectitude" governing not only an official's exercise of his functions, but also his private life. On the other hand, impartiality should not be carried too far, it was not desirable to turn an international official into a spiritual eunuch. The question was to harmonize individual rights with the duties and obligations of office.

The meeting rose at 7 p. m.

# TWENTY-FIRST MEETING

*1 December 1954 at 10 a.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.5.4.2 OF REVISED AGENDA: PERSONNEL POLICY, OBLIGATIONS AND RIGHTS OF STAFF MEMBERS: PROPOSED AMENDMENTS TO THE STAFF REGULATIONS (document 8C/ADM/14) (continued)**

(1) The CHAIRMAN invited the Commission to pursue the general discussion of the proposed amendments to the Staff Regulations as contained in document 8C/ADM/14.

(2) Mr. HAGUIWARA (Japan) stated that his delegation was ready to support the Director-General's proposals for amendments to the Staff Regulations, and based its attitude on contractual agreements which had been in force for a considerable time and made it incumbent on Unesco to bring its Staff Regulations into line with those of the United Nations. In that connexion, he referred to Article XIII of the Agreement between the United Nations and Unesco dealing with Personnel Arrangements, paragraph 1 of which read:

"The United Nations and the United Nations Educational, Scientific and Cultural Organization recognize that the eventual development of a single unified international civil service is desirable from the standpoint of effective administrative co-ordination, and with this end in view agree to develop common personnel standards, methods and arrangements designed to avoid serious discrepancies in terms and conditions of employment, to avoid competition in recruitment of personnel, and to facilitate interchange of personnel in order to obtain the maximum benefit from their services".

(3) Under paragraph 2 (b) of the same Article, the two Organizations agreed to:

"Consult together concerning other matters relating to the employment of their officers and staff, including conditions of service, duration of appointments, classification, salary scales and allowances, retirement and pension rights and staff regulations and rules with a view to securing as much uniformity in these matters as shall be found practicable".

(4) Mr. Haguiwara further pointed out that the Agreement which he had just quoted had been based on the provisions of the Constitution itself, more particularly on the following passage in Article X:

"This Organization shall be brought into relation with the United Nations Organization as soon as practicable, as one of the Specialized Agencies referred to in Article 57 of the Charter of the United Nations. This relationship shall be effected through an agreement with the United Nations Organization under Article 63 of the Charter".

(5) Mr. Haguiwara repeated that it was in order to carry out the spirit of those different texts that the Japanese delegation would support the amendments to the Staff Regulations proposed by the Director-General in document 8C/ADM/14.

(6) Sir Ben BOWEN THOMAS (United Kingdom) regretted the unavoidability of discussing such matters as the one before the Commission. His delegation was somewhat concerned at the periodical appearance of such professional questions on the agenda, since it was not indicative of good health in the Organization.

(7) It was also his belief that there was no need, under the resolution of the General Conference, to revise the Staff Regulations, but merely to submit a report.

(8) With regard to the recasting of the Unesco Staff Regulations, he attached particular importance to the principle of the singularity of the Organization, which, he thought, should be reflected in its Staff Regulations. There were certainly a number of points in common between Unesco, the United Nations, and the other Specialized Agencies and it was important to be informed about developments there. But Unesco should not be bound by what had happened or might happen in those Organizations.

(9) The Staff Regulations should reflect the fact that political considerations were of less importance than in certain other organizations; they should also to a certain extent reflect the background of the host country of the Organization; they should recognize the essential responsibility of the Director-General and ensure that the life of the staff members was conceived in generous and liberal terms in keeping with the spiritual ideals of the Organization.

(10) Mr. KAVALEVSKY (Byelorussian Soviet Socialist Republic) wished to know if there had been any conflict between the Director-General and members of the staff which, under the existing Staff Regulations, the Director-General had not been able to settle in accordance with the interests of the Organization as a whole.

(11) The DIRECTOR-GENERAL said that the development of the proposals to amend the Staff Regulations had taken place over a period of several months independently of any specific cases awaiting solution, and to which the proposals referred. After the elaboration of the proposals and almost simultaneously with the issuing of the document under consideration, three cases had arisen which he had been unable to solve under the existing Staff Regulations. The members of the staff involved were still employed, although he thought they should no longer be employed, and he wished in that connexion to

obtain the necessary authority to terminate their contracts.

(12) Mr. SOLDATOV (Union of Soviet Socialist Republics) wished to reiterate the views of his delegation on two important points.
(13) He was firmly opposed to the exclusion from the Staff Regulations of Regulation 4.2.1, which instructed the Director-General to take the necessary steps to ensure that no persons who had discredited themselves by their activities or connexion with Fascism, Nazism, or militarist aggression, were appointed to the Secretariat. That provision was in keeping with the Constitution of the Organization and would contribute greatly to achieving maximum co-operation between all the countries concerned in the development of education, science and culture. It was inconceivable that the Organization, which had been set up following victory over the forces of Fascism, Nazism and aggression, should now accept representatives of those evil tendencies. His delegation would never accept such a decision, and he felt convinced that his views were shared by others. It was not sufficient to say that the provision in question was no longer to be found in the statutes of other international organizations; the main consideration to be taken into account was the attitude of the peoples whose representatives were present and who would never admit the partisans of Nazism, Fascism and aggression into Unesco.
(14) The Soviet delegation also saw no reason for increasing the powers of the Director-General, especially as the Staff Regulations in their present form had never prevented him from discharging his duties in the interests of the Organization. The three cases the Director-General had mentioned were individual cases which did not need to be taken into account from the point of view of enlarging his terms of reference.

(15) Mrs. KOCH (Denmark) agreed that the fundamental principle of freedom was involved, but thought it would be difficult to embody it in any one paragraph. Putting aside the detailed consideration of individual paragraphs, the Danish representative thought that the Staff Regulations were satisfactory in so far as they gave the Director-General sufficient authority to ensure the effective working of the Secretariat, and should therefore be retained without modification.She agreed also that the matter was of such importance that the future of the Organization depended on the decision that might be taken. It was dangerous, however, to accept the standards of any one of the Member States in order to base upon them the regulations of the Organization. It was the responsibility of the Director-General to settle staff matters and, even if it were not always possible to agree with him on individual points, the Organization had to respect the authority it had vested in him. She therefore proposed that the Staff Regulations be retained in their present form and any revision of those Regulations be postponed until the next General Conference in two years time.

(16) Mr. KAVALEVSKY (Byelorussian Soviet Socialist Republic) said that his delegation was deeply concerned with the question of the Staff Regulations. The Staff Regulations depended not on the composition of the Secretariat, but on the spirit within the Secretariat. Any broadening of the powers of the Director-General would, in fact, increase the powers of a certain number of people, while what was needed was more authority for the Organization as a whole. His delegation would oppose any change in the Staff Regulations.
(17) His delegation would also oppose any proposal to omit Staff Regulation 4.2.1. His country had had proof enough during the last war of the terrible dangers of Fascism, Nazism and the horrors of military aggression. He would only add to the arguments already put forward by the representative of the USSR, that a decision to admit to the Organization persons advocating Fascism, Nazism or military aggression, would strike a fatal blow at the prestige of Unesco.

(18) Mr. TAMAS (Hungary) said that possibly some delegations did not attach much importance to the problem involved in the revision of Regulation 4.2.1 of the Staff Regulations, because it was obvious that the Director-General would not engage persons with Fascist or Nazi antecedents, or in anyway committed to military aggression. The Hungarian delegation however considered the matter to be of the greatest importance. Anything which had a bearing on Fascism, Nazism or military aggression should be taken very seriously. Hungary had suffered greatly from the Nazis; Budapest had been almost entirely destroyed. Ten years had not removed the traces of that destruction. If the Regulation under discussion were suppressed, it would mean that from then on it would be possible to engage staff who were connected with such ideologies and codes of behaviour. There should be no mistake about so vital a question.

(19) Mr. WIECHECKI (Poland) stated that his delegation was opposed to the deletion of Regulation 4.2.1, which was designed to debar from Unesco any persons who had discredited themselves by their connexion with Fascism, Nazism, or military aggression. The Regulation was not based on political considerations, but solely on the desire to safeguard humanity and culture. To delete it would be contrary to the very spirit of the Constitution, which explicitly stated that "the great and terrible war which has now ended was a war made possible by the denial of the democratic principles of the dignity, equality and mutual respect of men, and by the propagation, in their place, through ignorance and prejudice, of the doctrine of the inequality of men and races".
(20) The Polish delegation had accordingly decided to concur in the recommendations of the Executive Board and to vote against the deletion of Regulation 4.2.1.

(21) Mr. TVETERAS(Norway) said that the questions of staff policy in the United Nations and Unesco had caused some concern in Norway. In his country it was established that civil servants were entitled to enjoy all human rights as well as freedom of conscience. However, in view of the very different social and economic structures of the Member States, it was clearly difficult to know to what extent the freedom of the national of a country was compatible

with that of an international civil servant. If the primary aim of an international organization was effective administration, special claims would have to be made on the international civil servant. There was no need for the Staff Regulations of Unesco to be an exact copy of those adopted in the United Nations, but there were good reasons why they should be as close to the latter as possible. On the whole the Director-General had established a good balance between the effective functioning of the Organization and the fundamental rights of staff members. If staff members needed to be guaranteed maximum protection, it was also necessary for the Director-General to know if he trusted the staff. The delegation of Norway would therefore, subject to a few reservations on the lines of those made by the Executive Board, vote in favour of the proposals before the Commission.

(22) Mr. VAN SUCHTELEN (Netherlands) thought that Regulation 4.2.1 ought to be maintained in its present form. The Netherlands delegation and authorities recognized the right of each people to choose the government or regime it considered most appropriate to its national character. He considered that the time had not yet come for Unesco to admit staff with antecedents that could be included in the terms of the Regulation in question. Countries that had not directly suffered from the last war might not be able to understand that. The suppression of the Regulation might be acceptable in theory, but under present circumstances it was not yet possible to carry it out.

(23) Mr. KELLY (Australia) said that Australia in principle agreed with the proposals advanced by the Director-General, on the grounds that the highest standards of integrity, competence and efficiency should be observed by members of the staff of the Secretariat and that uniformly high standards should obtain in the United Nations and in the Specialized Agencies.
(24) In the course of discussion too much emphasis had, he felt, been placed on the political autonomy of members of the staff and too little on their responsibilities to the Organization. It had to be remembered that a decision to accept responsible employment, whether in a trade union, a private corporation, a government department or an international body, not infrequently involved, on the part of the person concerned, a decision to forgo the public exercise of some of his political rights. The free acceptance of such employment involved the free renunciation of certain forms of political activity. That social fact gave rise to a principle of conduct, applicable in Unesco - the principle that no member of the staff should engage in political activity of a nature such that it tended to undermine the very character of Unesco. If members of the staff felt bound in conscience to engage in forms of political activity inconsistent with the circumstances of their employment as servants of an organization of Member States, those members of the staff were free to resign their employment.
(25) While the concept of integrity was a lucid concept and laid down a fundamental principle of conduct, it was clearly neither possible nor desirable to give such a concept or principle precise definition. It was for the staff to work in the light of that concept and for the Director-General to take action when he found members of the staff lacking in integrity. It was the speaker's impression that the Staff Association had failed to see all the implications of integrity. The suggestion by the Staff Association that the adoption of the Director-General's recommendations "might well have an effect on staff morale" was, he felt, an attempt to intimidate the Commission and was not an expression of the principle of integrity.
(26) His delegation was in favour of the proposal to amend the Staff Regulations.

(27) Mr. STAHL (Sweden) thought that many of the difficulties connected with staff matters might have been avoided if the actions of the parties involved had been guided by clearer principles. The greatest care should be exercised in dealing with such matters, particularly as regarded the distinction to be made between the national of a country as such, and the international civil servant.
(28) There had not been time for the international organizations to establish their own traditions of justice. No one Member State should impose its own criteria in that respect, but all should contribute to establishing the tradition. That would take time and patience. In the meantime, a modus vivendi was needed.
(29) Although some of the arguments against adopting the staff regulations of the United Nations were for the time being valid, the modus vivendi would nevertheless eventually have to be based on uniform regulations for all international organizations. It was illogical for regulations to vary in accordance with geographical location or membership.
(30) The modus vivendi would have to be based on a proper balance between the duties of the Director-General with regard to the effective working of the Organization, on the one hand, and the security of the staff members, on the other.
(31) The principle should also be adopted that the head of the organization was responsible for its work and should be in a position to select his collaborators in accordance with the staff regulations or, in certain cases, with the interpretation given to those regulations by the Appeals Board or the Administrative Tribunal of the International Labour Organization.
(32) Such restrictions and guarantees were adequate and the Swedish delegation was therefore, in principle, prepared, subject to minor reservations, to support the amendments proposed by the Director-General.

(33) Mr. AMMOUN (Lebanon) stated that in many respects he shared the views expressed on the previous day by the United States delegate. He questioned whether the majority of the amendments proposed in document 8C/ADM/14 would make very much difference to the present state of affairs, either by lightening the task of the Director-General, or by lessening his responsibilities in staff questions. It would still lie with the Director-General to decide whether or not an official's conduct was such as to endanger the basic principles of the Organization and, where necessary, to take whatever disciplinary measures appeared to be called for. It still remained

open to the official in question to take his case to the Appeals Board and the ILO Administrative Tribunal, and those bodies would continue to base their decisions on an examination of the facts. The introduction of a notion such as that of integrity would therefore, in Mr. Ammoun's view, merely complicate the task of those Boards unnecessarily.
(34) Mr. Ammoun was anxious to pay tribute to the frankness with which the Director-General had explained exactly why he wished to terminate the contracts of the three officials whose cases had been brought to the notice of the Appeals Board. If he had not gone into those reasons, said Mr. Ammoun, the Director-General could have by-passed the Appeals Board altogether; his present attitude seemed therefore most praiseworthy.
(35) Mr. Ammoun further indicated that the Lebanese delegation did not agree with the proposals submitted by the Director-General regarding the deletion of Regulation 4.2.1, or with the text given on page 6 and suggested as a new Regulation 9.3.1.
(36) While he thought that the insertion of provisions such as 4.2.1 might have been dispensed with from the start, the Lebanese delegate took the view that, in the present circumstances, the cause of peace would best be served by the deletion of that regulation.
(37) As regarded 9.3.1, the aim of that regulation was to empower the Director-General to pay an increased indemnity to any staff member whose appointment he wished to terminate, without the disgrace of a cancelled contract or disciplinary measures. However, the publicity such a provision would entail, if included in the Staff Regulations, would inevitably defeat its purpose. A staff member who had been dismissed in the circumstances outlined above would be no more free from suspicion than if he had had his contract cancelled or been subjected to disciplinary measures.
(38) Mr. Ammoun concluded by stressing the difficulty of giving a precise definition of the term "integrity", and the danger of proceedings which might well result from the ill-considered use of such an indefinite criterion.

(39) Mr. RIAÑO JAUMA (Cuba) said that the Director-General had pointed out in document 8C/ADM/14 that the Staff Regulations of the United Nations and other Specialized Agencies contained no regulation covering the provisions of Regulation 4.2.1, the suppression of which was under discussion. That was an important consideration. The Cuban delegation believed that the measure had been a salutory one, but that Regulation 4.2, which also dealt with the matter, would suffice at that stage to settle whether or not an official might be employed in the Secretariat.
(40) The remarks made by the delegates of Hungary and Poland might be taken into account, but his delegation would support the suggestions set forth by the Director-General in his document, which deserved thorough consideration, as they were aimed at rising above a policy of prejudice, tension and cold war, which was contrary to the basic ideals of Unesco.
(41) The development of an Organization existing to foster peace and culture should not be hindered by political considerations. The Director-General should be supported in the matter, and the Cuban delegation was prepared to second his proposal to suppress the Regulation. The idea of classification on a moral or ideological basis for the selection of required staff was not only difficult; it was impossible. The selection could be made easier, without prejudice to Unesco. The Administrative Commission should study the question in the light of new ideas and in a liberal spirit.
(42) The Cuban delegation considered that the Director-General ought to be empowered to eliminate any legal difficulty that arose in the carrying out of his functions. In its early stages Unesco had tried to avoid employing anyone who might be labelled a Nazi. That policy had been the right one at the time, since Nazism had aroused the hatred of the whole free world, but it was no longer justified.
(43) The words of José Marti, the Apostle of Cuba, famed in Uruguay for having, as a great American, served that country well at the time of its financial reorganization, should be remembered in these crucial days of world division; they should indeed become a golden rule for Unesco: "With all and for the good of all". That should be Unesco's motto, the motto of an organization that through the co-operation of men was working for human welfare.

(44) MR. HUZAYIN (Egypt) did not think the proposals involved a new principle, but were rather an amplification of what was already contained in the Constitution and the Staff Regulations.
(45) The Director-General had spoken of integrity, but he had added two further important criteria: independence and impartiality, for which there was much need. He had furthermore shown a spirit of great toleration, without which the representative of the Staff Association would not have been able to make known his views in the way in which he had done. In that spirit of impartiality it would be possible to reconcile the rights of staff members with their duties.
(46) It was right that staff members should be entitled to freedom of convictions, but the same hardly applied where action was concerned, since, if all were free to take what action they pleased, the Director-General would be unable to ensure the effective work of the Organization. In order to obtain harmony of action the Director-General needed a set of regulations upon which to act. The Commission could examine those regulations in detail, but at the present stage the Organization needed a spirit of moderation coupled with a will to act. In that respect he disagreed with the representative of Denmark, who had proposed to defer consideration of the Staff Regulations to the next General Conference; that would only render more embarrassing the situation in which the Director-General, his staff and the Member States might find themselves. The Commission should agree to share the responsibility of the Director-General and not shrink from considering the proposals he had placed before it.

(47) Dr. MUDALIAR (India) appreciated the work the Director-General had accomplished in the interests of the Organization and commended his frankness and the freedom he had given the Staff Association to express its views.
(48) With regard to integrity, he agreed that it was

difficult to give a precise definition of the term, although an attempt to do so had been made in the Report on Standards of Conduct in the International Civil Service. More important than the work, however, were the conventions that grew up around it.
(49) He disagreed with one point made by the representative of the Staff Association. While all persons were entitled to enjoy fundamental human rights and freedom of conscience, it was not so in the case of freedom of speech, which could vary in accordance with the importance of the post occupied by the person in question.
(50) He also believed that the political rights of the international civil servant should be restricted.
(51) With regard to Staff Regulation 4.2.1, his delegation, while representing a country which had not been as closely affected by the last war as the countries of Europe, nevertheless agreed with the representative of the Netherlands that the regulation in question should be retained, and the matter given further consideration.
(52) Finally, the question of the revision of Staff Regulations was one which required maximum agreement, whereas the Executive Board had been unable to accept a number of the proposals made. In view of that fact, he was inclined to support the establishment of a small group to discuss the amendments to the Staff Regulations with a view to furthering the fundamental objectives of the Organization.

(53) Mr. DE LOS SANTOS (Philippines) supported the suppression of Regulation 4.2.1. The Philippines had suffered a great deal in the last war, but it should not be forgotten that men and women were subject to error but did not necessarily remain in error: they could repent and, if they did, Unesco might admit them to its staff, despite their regrettable antecedents. In such cases the question of integrity and impartiality should also be taken into account. If, in the opinion of the Director-General, an applicant had changed his views, he should be free to engage that applicant, provided the requirements in respect of those qualities were fulfilled. Naturally, those who continued in their past errors should be excluded.

(54) Mr. DUDNIK (Ukrainian Soviet Socialist Republic) agreed that the staff of Unesco should be trusted by all the Member States. They could acquire that trust by their efforts to further the ideals and aims of the Organization. However, people who had been discredited by their activities in connexion with Fascism, Nazism or militarist aggression could only expect contempt, and the Organization should ensure that they had no access to it. He had been astonished to hear the proposal of the representative of the Philippines to delete Staff Regulation 4.2.1, and stated that his delegation would support the decision of the Executive Board and all those delegations which insisted on Regulation 4.2.1 being retained as it stood.

(55) Mr. HAYEK (Czechoslovakia) stated that the Czechoslovak delegation saw no need for the amendments to the Staff Regulations proposed in document 8C/ADM/14. Many of the delegates who had spoken in favour of those amendments had advanced one argument only: in their submission, Unesco was obliged to co-ordinate its actions with those of the United Nations. The Czechoslovak delegation was by no means convinced of the validity of that argument. The amendments introduced by the United Nations in its Staff Regulations were too recent for their results to be assessed, and it would in any case be impossible for Unesco to follow the same path without incurring very serious criticisms from its Staff Association. In Mr. Hayek's opinion, Unesco was under no obligation to follow the lead of the United Nations so closely. What really mattered was to secure for Unesco the services of a competent staff whose members would combine devotion to the cause of humanity with adherence to the countries of their origin in a way that could not fail to benefit the Organization. The various provisions of the Staff Regulations should be fashioned to that end. It was very important to make them sufficiently stable and precise and Mr. Hayek thought that some of the proposed amendments were at variance with that requirement. He cited as an instance the proposed revision of Regulation 1.7.
(56) Mr. Hayek then emphasized that the Czechoslovak delegation could on no account accept the deletion of Regulation 4.2.1. It should not be thought that that Regulation owed its existence to political motives, or to a desire for discrimination or for revenge. It was merely a very natural precaution designed to debar from Unesco those who had collaborated with the criminals sentenced at Nuremberg. Contrary to the assertions of certain delegates, it was by deleting, not by retaining, that provision, that the atmosphere of international co-operation which had hitherto reigned at the General Conference was most likely to be clouded. Mr. Hayek accordingly called on all those delegates who had declared themselves in favour of that deletion to think again.

(57) Mr. JUVIGNY (France) had two preliminary remarks to make before discussing the substance of the proposed amendments.
(58) He wished first of all to stress the fact that, as stated by the Director-General, the new arrangements had not been worked out as a solution to problems arising out of certain recent events. It might be that they inevitably called to mind certain concrete cases, but, even so, they were in fact designed to be applied permanently and impersonally to all members of the Secretariat, whoever they might be. With that in view their possible consequences should be studied very closely.
(59) Mr. Juvigny also wished to draw the Commission's attention to the fact that, although the closest possible co-ordination between Unesco's regulations and those of the United Nations was desirable, Unesco was under no written or positive obligation in the matter. The Director-General had, moreover, recognized that neither WHO nor ILO had seen fit to modify their Staff Regulations to bring them into line with those of the United Nations, and that, in staff matters, no common policy had been adopted by the United Nations and its Specialized Agencies. Accordingly, in examining the Director-General's proposals, his delegation was resolved not to allow itself to be influenced by any act on the part of the United Nations. In so doing, his delegation would

be conforming to the Director-General's wishes, since, in his report to the Executive Board (37 EX/32), he had called upon that body to consider only the intrinsic merit of those proposals.

(60) Mr. Juvigny then turned to the substance of the proposed amendments, which, he said, might have such serious consequences for the staff, or place the Director-General in such a delicate position, that they must be examined with great care.

(61) He spoke first of the difficulty of giving an exact definition of the word "integrity". Whereas that word, to the majority of French-speaking people, was synonymous with incorruptibility or probity, there was sometimes a tendency to broaden its sense and include in it a number of ideas such as those of dignity, professional conscience or general conduct. However, in the view of the French delegation, the general conduct of a staff member could only be invoked as grounds for dismissal if that charge were substantiated by a number of definite facts, for which evidence of time and place could be given. That led the French delegation to regard as dangerous the introduction of the word "integrity" into the Staff Regulations unless a more precise definition were found for it than that given on pages 3 and 4 of the report drawn up by the International Civil Service Committee.

(62) The Director-General had, moreover, in paragraph 11 of document 8C/ADM/14 explicitly acknowledged that, if the amended Regulation 9.1.1 were adopted, it would be necessary to instruct the staff as to the construction to be placed on the word "integrity" in that paragraph. There was no question of laying down fixed and unbreakable rules, or of giving a definition which would not leave out the slightest detail, but the notion did need the most thorough investigation. The action which the Director-General proposed to take after the amendments had been voted, should, in the opinion of the French delegation, be taken beforehand.

(63) That was not all, however. Mr. Juvigny pointed out that the desiderata for international civil servants under the amended Regulation 1.7 would also require closer definition. Paragraph (b) of the amended Regulation 9.1.1 raised a question of past activity which should be looked into very closely. The last words of Regulation 1.7 ("or might reflect upon") might well give rise to legal proceedings if the greatest care were not taken. Lastly, the provision of the amended Regulation 9.3.1, which empowered the Director-General, instead of dismissing a staff member, to terminate his employment by paying him an indemnity greater than the normal indemnity, might ultimately prove contrary to the aim attributed to it under paragraph 12 of document 8C/ADM/14, and to the Director-General's intentions as set forth in his different statements. If the aim of the proposed procedure was to conceal the blot which would otherwise appear on the staff member's file, there was no cause to grant him extra payment in addition to his normal indemnity. If, on the other hand, it was in the interests of the official to place his case before the Appeals Board and the Administrative Tribunal, he should not lend himself to a procedure which in practice would mean surrendering his right of appeal. The proposed amendments were incompatible with the staff member's freedom of consent.

(64) To sum up, Mr. Juvigny said that the amendments proposed in document 8C/ADM/14 raised a host of very important problems which required more thorough study than they had been accorded so far. While appreciating the efforts of the Director-General to safeguard the Organization's interests, while at the same time affording staff members the necessary guarantees, the French delegation could not wholly agree unless the draft amendments set out in document 8C/ADM/14 were first more closely studied and defined. The French delegate ended with an appeal to the delegates and to the Director-General to dispel whatever doubt remained as to the scope of the proposed texts. If the general discussion failed to reveal a fair measure of consent one way or another, his delegation would welcome, or even sponsor, any proposal which might lead to a satisfactory solution and assist the Director-General and the Conference both at present and in future.

(65) The CHAIRMAN thanked the French delegate for his statement, and proposed to close the meeting as it was getting late.

(66) Mr. PHOTIADES (Greece) asked if at the beginning of the next meeting those passages from the Agreement between the United Nations Organization and Unesco dealing with staff arrangements might be read out.

(67) The CHAIRMAN took note of Mr. Photiades' request.

The meeting rose at 1.15 p.m.

# TWENTY-SECOND MEETING

*1 December 1954 at 3 p.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.5.4.2 OF REVISED AGENDA: PERSONNEL POLICY. OBLIGATIONS AND RIGHTS OF STAFF MEMBERS: PROPOSED AMENDMENTS TO THE STAFF REGULATIONS (document 8C/ADM/14) (continued)**

(1) The CHAIRMAN asked if it was the Commission's wish that countries should be allowed to speak for a second time during the general discussion of document 8C/ADM/14.

(2) It was agreed by 13 votes to 7, with 7 abstentions, that there should not be a second round of speeches during the general discussion.

(3) Mr. PHOTIADES (Greece) reminded the Chairman that he had asked, at the end of the morning, if the Legal Adviser would read Article XIII of the United Nations - Unesco Agreement.

(4) Mr. SABA (Legal Adviser) read out the article.

(5) Baron VAN DER STRATEN WAILLET (Belgium) said that his delegation's attitude to the proposed amendments to the Staff Regulations was based on two aims, to safeguard the independence of the international administration vis-à-vis the governments of Member States, and to respect the acquired rights of staff members.
(6) It was therefore unable to support any amendment which would either confer discretionary powers on the Director-General or lessen his independence. The first question which arose was how far the proposed amendments were compatible with observance of those principles, and the speaker confessed that the Secretariat's explanations had not altogether removed the doubts felt by the Belgian delegation, which could not but support those, among them the Indian and French delegates, who had asked for further elucidation of that point.
(7) A second question which would determine the way in which his delegation would vote was the significance to be assigned to the argument derived from the Resolution passed by the General Conference at its Second Extraordinary Session that the staff system in Unesco should be in accord with that used in the United Nations and the other Specialized Agencies. In his delegation's view, being in accord did not signify being identical; each organization had its own special considerations, and those might justify differences in the various systems. Moreover, in the present context, that resolution was unavailing, since it referred both to the Staff Regulations of the United Nations, which had been changed, and to those of Specialized Agencies, e.g. WHO and ILO, which had not.
(8) In addition, as had already been rightly pointed out, the United Nations General Assembly had decided, when modifying its Staff Regulations, to review those amendments at its next session, in the light of further experience.
(9) Baron van der Straten Waillet therefore concluded that the Director-General's argument was not quite sound and might equally well be used to propose that the Conference postpone the vote until after the United Nations Tenth Session, i.e. until it knew what action the United Nations had decided to take in the light of experience.
(10) The third question which would decide his delegation's vote was whether the proposed amendments would in practice do what the Director-General hoped, i.e. whether they would strengthen his powers or give them better definition and whether they would prevent a repetition of the events that everyone had in mind. His delegation had to admit that it had not found the Director-General's statement altogether convincing on that point either. The Belgian delegate remarked that, after the proposed changes had been made, the responsibility for interpreting the Staff Regulations would still lie with the Director-General himself and that the repetition, in Regulations I and IX, of general terms which were already present or at least implied in Article VI of the Constitution and Chapter I of the Regulations, would not release him from that obligation; afterwards, as before, he would be obliged scrupulously to honour acquired contractual rights; his decisions would moreover still be liable to be contested or invalidated by the authorities concerned with administrative law, since they necessarily retained the right to interpret any and every Regulation, should a dispute arise. Accordingly, the Belgian delegation thought little real advantage was to be gained by the Director-General from his proposed amendments, and would only agree to vote for them if it could be proved that the future of the Organization depended on their acceptance.
(11) As regarded the deletion of Regulation 4.2.1, it recognized that any such enumeration must inevitably be incomplete, but at the same time feared that its deletion at the present juncture would be construed, whether in good or in bad faith, as indicating that it was open to Unesco, or even that Unesco intended, to engage people who had been connected with Fascism or Nazism. That was of course out of the question. The Belgian delegation therefore considered it inadvisable to delete that regulation at present. It wished, however, to make it quite clear that it interpreted the list of activities as an illustration and not in a restrictive sense. In conclusion his delegation regarded Regulation 4.2 as an adequate safeguard against the employment of anyone

who had been guilty of activities or relations incompatible with the service of the rights and principles for which Unesco stood.

(12) Mr. MATIĆ (Yugoslavia) said that his delegation agreed with those speakers who stressed the importance of the matter under discussion, and of the consequences for the future development of the Organization of the decision which the Commission was about to take. It therefore considered that the amendments to the Staff Regulations proposed by the Director-General should receive leisurely and very careful consideration. His delegation had attentively weighed the arguments put forward the previous day, both by the Director-General and by the representative of the Staff Association. The first thing to decide was whether the Staff Regulations did in fact require modification, or whether they did not already lay down in clear and precise enough terms the qualities and duties demanded of an international civil servant, and the nature of his relations with his own country. Did the Regulations, as they stood, provide adequate guarantees against any possible activity on the part of a staff member not in keeping with his status as an international official? And did they give the Director-General effective powers to protect the Organization and safeguard its prestige, in such an event?
(13) The Yugoslav delegation thought that satisfactory answers to all these questions were to be found in Article VI, paragraph 5, of the Constitution and Staff Regulation 1.4. Those two clauses were a clear statement of the principle of independence and of the strictly international character of such officials, as required by the aims and duties of the Organization.
(14) A further important point which arose from the discussion of the proposed amendments to the Staff Regulations was whether those changes added to the clarity and precision of the existing text. His delegation did not think so. The addition of notions as ill-defined as integrity, independence, impartiality, political activity and good administration, far from clarifying the present provisions, might on the contrary open the way to the most varied interpretations. The proposed changes would arouse feelings of insecurity and apprehension among staff members, which would be detrimental to their work and to the Organization's future. The representative of the Staff Association had informed the Commission of the views which were shared by almost the entire staff, whose important task it was to give effect to the Organization's programme, and he had emphasized the danger of allowing an atmosphere of fear and uncertainty to develop in the Secretariat.
(15) The Yugoslav delegation was also unable to subscribe to the proposal to delete Staff Regulation 4.2.1, viz. the clause debarring persons discredited by their activities or connexion with Fascism, Nazism or militarist aggression, from appointment to the Secretariat. The Yugoslav delegation reserved its right to make a further statement on that particular matter when the Regulation came up for discussion.
(16) Mr. Matić drew attention to the fact that the Yugoslav point of view, which had been clearly stated at the General Conference held in Paris in 1953, remained unchanged.
(17) The Yugoslav delegation was of the same opinion as the Executive Board on the matters he had mentioned, and would vote accordingly, in the conviction that in doing so it would be best serving the Organization's interests, and helping to achieve the fundamental aim of Unesco: international collaboration and understanding for the furtherance of world peace.

(18) Mr. MERMINOD (Switzerland) observed that in the last hundred years his country had been the seat of various international organizations - at one time of the League of Nations, and now, of the European Office of the United Nations, ILO, WHO, the Universal Postal Union, the International Telecommunication Union, and many others. The Swiss Government attached the very greatest importance to the independence of the international civil service, and would resist any interference by States that might detract therefrom. It would therefore, as it always had done, oppose any measure which would restrict the freedom of the staff of international organizations. In its view, the decisive factor in the conduct of an international official was loyalty and faithful service to the Organization. Mr. Merminod believed that in Staff Regulation 1.4 the reticence and tact rightly to be expected of an international official were stated in both moderate and felicitous terms. Should a staff member be in any doubt as to the propriety of his private activities, he had only to consult his superior, as was suggested in the Report of the International Civil Service Advisory Board.
(19) Regulation 4.2.1 contained certain notions which had given rise to a great variety of opinion and some very muddled thinking; moreover, they amounted to criteria of a political nature and the Swiss Government had always been firmly opposed to the introduction of politics into the Organization; it therefore agreed with the Director-General's recommendation on that point.
(20) Switzerland having in due time taken steps to suppress extremist agitations which were a threat to public order, the Swiss delegation's vote for the deletion of Regulation 4.2.1 could not be misconstrued.

(21) Mr. CHEN YUAN (China) stated that his delegation was not in favour of the deletion of Regulation 4.2.1, but not for the same reasons as those given by other delegations. The Chinese delegation was in favour of retaining it because it contained the words "militarist aggression", for, while Nazism and Fascism were dead and it was time to forgive and forget, militarist aggression was still rampant.
(22) The Chinese delegation would vote in favour of the rest of the amendments proposed by the Director-General, as it felt that they would strengthen his hands and enable him to make the Organization work more smoothly. Mr. Chen Yuan did not understand why there was so much feeling about terminology; the word "integrity" had always existed in the Constitution, and certain other words might be difficult to define, but that was no reason for discarding them.

(23) Mr. POHL (Union of South Africa) agreed wholeheartedly with what the delegate of Egypt had said that morning, namely, that it was a matter requiring a practical and positive approach. The

Commission had been debating what kind of Secretariat it wanted, and that was a vital question, because the Secretariat was not only the creation and instrument of the Member States; it was the Member States themselves. The Director-General, in dealing with his staff, was guided by a body of regulations laid down by the General Conference; he was therefore quite right in coming to the Conference for advice if he felt that they needed clarification, and it was for the Conference to help him. The delegation of the Union of South Africa was consequently in favour of approving document 8C/ADM/14 as a whole, subject to reservations in respect of some of the proposed amendments.

(24) Mr. KELLY (Australia) asked the Legal Adviser how far the Commission was bound by Resolution 10.12, adopted by the General Conference at its Second Extraordinary Session.

(25) Mr. SABA (Legal Adviser) replied that the General Conference was a sovereign body; while any decisions it took at one session should normally be followed by some action or other, it was always free to decide that it would not continue with a plan of action decided on at a previous session. In short, it was bound by its resolutions only logically and in principle. He then read out Resolution 10.12, which the General Conference had adopted at its Second Extraordinary Session, and which laid down the extent to which it had decided to fall in with the measures passed by the United Nations. The reservation with regard to the Constitution could not prevent the Conference from adopting provisions in keeping with those adopted by the United Nations, but required that such provisions be adopted by the appropriate bodies in Unesco. It further stated that the United Nations, as the parent body, had already adopted certain provisions, while the other Specialized Agencies had not so far altered their Regulations.

(26) The DIRECTOR-GENERAL warmly thanked delegates who had spoken kindly of his intentions, and also thanked the representative of the Staff Association, who had referred to the good relations existing between the Director-General and his staff.
(27) Referring to Resolution 10.12 on page 1 of document 8C/ADM/14, he agreed that he had not been required to make proposals, but he had been asked to submit a report on action taken to ensure that Unesco's policy as regarded the rights and obligations of staff members accorded with that of the United Nations and other Specialized Agencies. He had therefore thought that, in cases where it was impossible to follow the policy of the United Nations and other agencies, he should explain the reason why that was the case to the General Conference and make practical proposals. In dealing with the very important legal problems involved, he had decided to be guided by legal counsel, which he trusted. He was informed of how the United Nations Administrative Tribunal interpreted the various terms, such as "integrity", "misconduct", "serious misconduct" etc. He had decided to construe those terms in a manner favourable to the employee, whenever he had a serious doubt in mind. In some cases, he could have given a broader sense to "unsatisfactory services", but his conscience had prevented him from doing so; he had felt, with the Secretary-General of the United Nations, that executive heads should not abuse any of the legal concepts in order to escape from difficulties, but should wait and seek any necessary authority from their governing bodies.
(28) His difficulty was that the existing Staff Regulations were not adequate to enforce the requirements of the Constitution. Obligations were imposed upon staff members, but the Director-General did not have the power to ensure that staff members fulfilled those obligations. Many delegations seemed to think that the problem was to protect the Secretariat from interference by Member States, but that was not so. No Member State had interfered with the rights of members of the Secretariat. Demands of Member States were sometimes involved, but the Director-General clearly had the power not to respond to requests or demands from Member States, unless he felt that they were justified under the Constitution and Staff Regulations.
(29) It had been suggested that the proposed amendments to the Staff Regulations would prevent incidents, but of course they would not; if they could, there would be no need for the Administrative Tribunal or the Appeals Board. However, he wished to point out that all incidents so far had arisen under the existing Staff Regulations, and not under the amendments which he was at present proposing.

(30) The CHAIRMAN invited the Commission to consider each of the proposed amendments in detail.

Staff Regulation 1.4 (Section C, paragraph 6 on page 4 and Section B, paragraph 4 (a) on page 2)

(31) The DIRECTOR-GENERAL recalled that he had already explained that the result of the proposed amendment would be to add integrity, independence and impartiality to the qualities required of international civil servants. He drew attention to a slight misprint: in paragraphs 6 and 7 on page 4, the words "(See Section B 1 (a))" and "(See Section B 1 (b))" should read "(See Section B 4 (a))" and "(See Section B 4 (b))".

(32) Mr. KELLY (Australia), seconded by Messrs. CHEN YUAN (China) and DE LOS SANTOS (Philippines), moved approval of the proposed amendment to Regulation 1.4.

(33) The proposed amendment was adopted by 34 votes to 3, with 10 abstentions.

Staff Regulation 1.7 (Section C, paragraph 7 on pages 4 and 5, and Section B, paragraph 4 (b) on page 3)

(34) The DIRECTOR-GENERAL explained that the Secretary-General of the United Nations had issued a Staff Rule making contributions to political parties allowable. If the amendment to Regulation 1.7 were adopted, he would be prepared to issue a similar rule.

(35) Mr. DE LOS SANTOS (Philippines), seconded by Messrs. C.W. CARTER (Canada) and FERNANDEZ

MORENO (Argentina), moved adoption of the proposed amendment to Regulation 1.7.

(36) Adopted by 36 votes to 0, with 11 abstentions.

Staff Regulations 9.1 and 9.3 (Section C, paragraph 8, pages 5 and 6, and Section B, paragraph 4 (c) and (d) on pages 3 and 4)

(37) The proposed amendment to Regulation 9.1 was adopted.

(38) The CHAIRMAN requested the Director-General to present Regulations 9.1.1, 9.1.2, 9.3 and 9.3.1.

(39) The DIRECTOR-GENERAL explained that the first point under Regulation 9.1.1 was that termination of an appointment should be accompanied by a statement of reasons, challengeable in terms of honesty and adequacy by the Appeals Board and Administrative Tribunal. In another document, he had requested that relations with the Tribunal be extended by vote of the General Conference.
(40) Under 9.1.1 (a), he drew attention to the fact that the word "conduct" was used; he thought it a good word to maintain, as it appeared in the Report of the International Civil Service Advisory Board (ICSAB). If the Commission desired, he would be prepared to extend the second line to read: "..highest standards of integrity required by Article VI, paragraphs 4 and 5 of the Constitution of Unesco".
(41) Regulation 9.1.1 (b) simply meant that he would be able, but would not be obliged, to terminate an appointment, if certain facts anterior to that appointment came to his knowledge. He would have to give reasons for such a termination.
(42) The next paragraph (unnumbered) was in accordance with the United Nations proposal. The Director-General would withhold action until he had obtained the advice of a special advisory board. He proposed to follow the plan of the United Nations and to ask the President of the International Court of Justice to nominate a chairman of the advisory board; he himself would then select its remaining members, in consultation with the Staff Association. The only purpose of the proposed new regulation was to enable him to ensure that the staff met the highest standards required under the Constitution.

(43) Mr. KELLY (Australia) moved approval of the whole of Regulation 9.1.1, on the understanding that there would be a specific reference to paragraph 5 of Article VI of the Constitution in sub-paragraph (a).

(44) The DIRECTOR-GENERAL replied that in that case, as "integrity" was mentioned only in paragraph 4 of Article VI, it would have to be deleted in sub-paragraph (a) of Regulation 9.1.1. The Commission might wish to refer simply to Article VI, but it should also add a reference to Chapter I of the Staff Regulations. Sub-paragraph (a) would thus read:
"...highest standards required by Article VI of the Constitution of Unesco and Chapter I of the Staff Regulations".

(45) Mr. JUVIGNY (France) asked that a vote on Regulation 9.1.1 be taken, paragraph by paragraph, beginning with the first part down to the end of paragraph (a), continuing with paragraph (b) and then taking the last paragraph.

(46) The CHAIRMAN replied that the voting would be taken as requested by the delegate of France.

(47) Regulations 9.1.1 and 9.1.1 (a) as amended by the Director-General were adopted by 33 votes to 5, with 10 abstentions.

9.1.1 (b)

(48) Mr. TVETERAS (Norway) thought that more emphasis should be laid on present integrity, rather than on past facts. He therefore proposed the following amendment:
"If facts anterior... come to light which have been purposely concealed and which, if they had been known, etc."

(49) Sir Ben BOWEN THOMAS (United Kingdom) agreed with the intention behind the Norwegian delegate's proposal, but would prefer the following wording:
"If facts anterior to the appointment of the staff member and relevant to his suitability, and which reflect on his present integrity come to light which, if they had been known, etc.".

(50) Mr. TVETERAS (Norway) withdrew his amendment in favour of that of the United Kingdom delegation.

(51) The United Kingdom amendment was adopted by 32 votes to 2, with 11 abstentions.

(52) Regulation 9.1.1 (b), as amended, was adopted by 32 votes to 13, with 6 abstentions.

Last paragraph of Staff Regulation 9.1.1(unnumbered)

(53) Mr. ABEYWICKREMA (Ceylon) pointed out that, as the paragraph was worded, a staff member could still assert that the advisory board had been set up in an arbitrary manner. He therefore proposed that the paragraph be extended to include the explanation given earlier by the Director-General.

(54) The DIRECTOR-GENERAL thought that it would be sufficient to have his statement in the records of the General Conference. He was against inserting it in the Regulations, as that would be tantamount to obliging the President of the International Court of Justice to nominate a chairman. He added that the first line should be amended to read: "No termination... shall take effect until the matter...".

(55) Mr. ABEYWICKREMA (Ceylon) accepted the Director-General's explanation, but would nevertheless like the words "in consultation with the Staff Association" to be added at the end of the paragraph.

(56) The DIRECTOR-GENERAL had no objection to that addition.

(57) Mr. JUVIGNY (France) felt that the paragraph in question would in fact provide Unesco officials with an additional guarantee; the special advisory board was clearly not meant to hinder the operation of the normal legal channels, viz. the Appeals Board and the Administrative Tribunal.
(58) He had been about to ask the same question as that just put by the delegate of Ceylon, but in view of the Director-General's explanations, and in the absence of any indication as to its composition, he could not regard such a body as a guarantee; would its members be chosen by the Director-General, or would it be a joint body? Alternatively, would it be made up of independent members? It was not impossible that the Board would be an independent body up to a point, but, as from the explanations given he could not be sure that it would not merely be an emanation of the Director-General, he would be unable to vote for that clause.

(59) Sir Ben BOWEN THOMAS (United Kingdom) was against restricting the Director-General's consultations by adding the words "in consultation with the Staff Association", as he thought that the Director-General should also consult the Executive Board.

(60) Baron VAN DER STRATEN WAILLET (Belgium) agreed with the delegates of Ceylon and France. To mention a special advisory body in a text incorporating a staff rule, without giving a precise definition of that body in the rule, would be a cause of difficulty. A special paragraph setting out the composition and functions of the Board was, he thought, essential.

(61) Mr. HUZAYIN (Egypt) pointed out that the Conference had given the Director-General its confidence, so that it could trust him to set up the advisory board in the way he had described. It was unnecessary to insert the Director-General's statement in the Staff Regulations. He moved approval of the paragraph, with the slight drafting change mentioned by the Director-General.

(62) The paragraph, with the word "effect" substituted for "place" in the first line, was adopted by 32 votes to 3, with 12 abstentions.

(63) Regulation 9.1.1 as a whole, as amended, was adopted by 34 votes to 10, with 5 abstentions.

Staff Regulation 9.1.2

(64) The DIRECTOR-GENERAL expressed appreciation of the profound attention which the Commission had given to his proposals and said that, in a spirit of understanding and compromise, he was prepared to withdraw the proposed Regulations 9.1.2 and 9.3.1.

(65) Regulations 9.1.2 and 9.3.1 were thus withdrawn.

Staff Regulation 9.3

(66) Adopted unanimously.

Staff Regulation 4.2.1

(67) The DIRECTOR-GENERAL explained that, for the reasons which he had already given, he thought it preferable to delete Regulation 4.2.1. Not only was it not in the regulations of the United Nations and other Specialized Agencies, but the question of defining "militarist aggression" might give rise to additional problems. However, he realized that, whether it were deleted or not, some countries would not be satisfied. He would therefore withdraw his proposal to delete Regulation 4.2.1 on the understanding that any delegate who so desired could move that it be deleted.

(68) Since no delegation moved its deletion, Regulation 4.2.1 was maintained.

(69) The DIRECTOR-GENERAL announced that he was prepared to submit a report to the ninth session of the General Conference, accompanied by any comments which the Executive Board might wish to make, on measures taken to implement the amended Regulations and on action taken by the United Nations General Assembly at its Ninth and Tenth Sessions.

(70) The CHAIRMAN announced that the Commission had completed its consideration of document 8C/ADM/14.

(71) Mr. JUVIGNY (France) enquired whether it was necessary or customary to vote on the whole set of provisions which had been voted and approved seriatim.

(72) The CHAIRMAN pointed out that it was, in reality, a question of a series of separate regulations, accompanied by explanations given by the Director-General. If the Commission voted on the document as a whole, it would be voting, not only on the amendments, but also on the explanations. However, he would do whatever the Commission desired.

(73) Mr. JUVIGNY (France) said he would not press the point; he would fall in with the practice and rules of the Conference if that was how they should be interpreted.

(74) Mr. AMMOUN (Lebanon) thought the Commission could rely on the Chairman's wisdom. It was not the Regulations as a whole that were being modified, but only some clauses in them. In explanation of his vote he referred to his statement at the previous meeting.

(75) Mr. JUVIGNY (France), without pressing for a vote on the document as a whole, wished to explain his vote.
(76) It seemed to him that, whereas the measures adopted resulted in increased powers, the guarantees had been weakened or diminished, and his delegation had consequently been compelled to refrain from voting on some items. He wished however to thank the Director-General for having voluntarily withdrawn the most controversial of his proposals.

The meeting rose at 6.0 p.m.

# TWENTY-THIRD MEETING

*3 December 1954 at 10 a.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.7.1 OF REVISED AGENDA: REPORT OF THE HEADQUARTERS COMMITTEE AND PROGRESS REPORT OF THE DIRECTOR-GENERAL (documents 8C/ADM/24 and 8C/ADM/24 Add.)**

(1) Mr. BERREDO CARNEIRO (Chairman of the Headquarters Committee) said that, while little comment was required on document 8C/ADM/24, he would draw attention to the proposal on page 2 of document 8C/ADM/24 Add., authorizing the Director-General to continue negotiations with ICAO in connexion with the installation of its Europe-Africa Office in the Unesco Headquarters Building, and to reach a satisfactory agreement.

(2) Mr. ARTHUR (United Kingdom), seconded by Mr. JUVIGNY (France), said that the resolution was a most satisfactory one, and he moved its adoption.

(3) The resolution on page 2 was unanimously adopted.

(4) Sir Ronald ADAM (Chairman of the Executive Board), referring to paragraph 7 on page 3 of document 8C/ADM/24 Add. (building for the Executive Board), said that the original proposal had been for a separate building to accommodate the Executive Board, but on closer consideration he had come to the conclusion that the necessary space could be found within the headquarters building itself.

(5) Mr. ARTHUR (United Kingdom), seconded by Mr. SUNDARAM (India), moved a recommendation to the effect that the Director-General be authorized not to proceed with the erection of a separate building for the Board.

(6) The recommendation was unanimously adopted.

(7) Mr. JUVIGNY (France), seconded by Mr. ARTHUR (United Kingdom), proposed that the Commission take note, with approval, of documents 8C/ADM/24 and 8C/ADM/24 Add.

(8) The proposal was unanimously adopted.

**ITEM 9.7.2 OF REVISED AGENDA: REPORT ON THE HEADQUARTERS AGREEMENT BETWEEN THE FRENCH GOVERNMENT AND UNESCO (document 8C/ADM/25)**

(9) Mr. ARTHUR (United Kingdom), seconded by Mr. DE LOS SANTOS (Philippines), moved adoption of the report.

(10) This proposal was adopted.

(11) The CHAIRMAN said that the speed with which the report had been adopted indicated the Commission's faith in the Headquarters Committee. All owed a debt of gratitude to the French Government for its remarkable generosity.

(12) Mr. CABOUAT (France) thanked the Chairman for the tribute he had just paid to his country, and stated that the Headquarters agreement was in course of ratification by the French Parliament. He hoped to be able to inform the Director-General of ratification within the next few weeks.

**ITEM 9.5.5 OF REVISED AGENDA: RULES OF THE APPEALS BOARD (document 8C/ADM/26)**

(13) Mr. FARR (Chief, Bureau of Personnel and Management) said that it was laid down in the Staff Regulations that the Director-General should set up machinery for appeals. Such machinery was set up in April 1948 and the provisional rules of the Appeals Board were approved by the Executive Board and the General Conference. At each successive session of the Conference, a resolution had been passed carrying forward those provisional rules for another two-year period.

(14) In June 1953, in accordance with a resolution adopted at the seventh session, the Acting Director-General had entered into an agreement with the ILO Administrative Tribunal, with the approval of the Executive Board, accepting the jurisdiction of that body.

(15) The Director-General had considered it desirable to bring the statutes of the Appeals Board into line with those of the ILO Administrative Tribunal. The Executive Board had approved the draft statutes now before the Commission and recommended their adoption by the Conference. The new rules were generally very similar to the old ones.

(16) In paragraph 5 of the new statutes, the Appeals Board was authorized to consider appeals against an administrative decision or against any disciplinary action where a staff member alleged that it conflicted either in substance or in form with the terms of his contract, or with any Staff Regulation or Staff Rule relevant to his case. Thus the Appeals Board would consider appeals of exactly the same nature as those made to the ILO Administrative Tribunal.

(17) In paragraph 6, provision was made for a staff member, with the Director-General's consent, to appeal to the ILO Administrative Tribunal direct,

without passing through the Appeals Board.
(18) Paragraph 23 laid down that paragraphs 5 and 6 could be amended only by the General Conference, and the remainder of the statutes by the Executive Board only. The Director-General had taken the view that, since he himself was a party to appeals, some such measure was only just.

(19) Mr. FRAGA IRIBARNE (Spain) drew attention, in connexion with paragraph 23 of the Statutes of the Appeals Board, to paragraph 2: the same measure should be adopted in the reform of paragraph 2 as in that of paragraphs 5 and 6, since, with reference to the composition of the Board, paragraph 2 had the same judicial importance.
(20) Paragraph 2 (c) provided that not more than three of the ten members in each group should be of the same nationality. That number should be reduced from three to two, because the representatives of two nationalities might come to form a majority within a particular group.

(21) Mr. KELLY (Australia) enquired whether the Staff Association had concurred.
(22) What was meant by the words "inefficiency or relative efficiency", in paragraph 5 (b)?
(23) He agreed with the suggestion made by the delegate of Spain in connexion with paragraph 2.

(24) Mr. JUVIGNY (France) pointed out that the Appeals Board was not, properly speaking, a judicial body, even though the word "jurisdiction" did occur in the first line of paragraph 6 of its Statutes. That body was not in fact a tribunal, but its decisions were delivered in the form of quasi-legal verdicts.
(25) It was moreover to be seen, from the general trend of the Appeals Board, that it was becoming more and more a quasi-legal body. That was shown in the opinion delivered in 1952 by the International Institute of the Administrative Sciences, which was composed of eminent lawyers from many lands.
(26) The Statutes of the Appeals Board enabled it to examine in a truly independent spirit all cases submitted to it. It was the first instance of appeal to which the Unesco staff might resort, the second being the Administrative Tribunal of the International Labour Organization.
(27) Since the aim of the Appeals Board was to provide the staff of Unesco with certain guarantees, it had very properly been recognized that its jurisdiction could only be defined by the General Conference. Further, the French delegate thought there were no grounds for granting the Executive Board sole responsibility for altering the rules of procedure of that body.
(28) The questions of composition and procedure were very important indeed. If the composition of the Appeals Board were not laid down satisfactorily, the Board would be in danger of losing its independence. The fact that the appellant was allowed a hearing, on the other hand, afforded him a very sound guarantee which certainly ought to be retained.
(29) It might be maintained that the provisions of paragraph 23 had been approved by the Executive Board, but the Executive Board that had studied those draft regulations, was not the same as the Board, with its members representing 22 governments, that would be called upon, if necessary, to modify them.
(30) The Commission had already dwelt on the need to achieve equitable geographical distribution in the Secretariat. In conformity with that policy, the Secretariat would tend more and more to open its doors to officials from an increasing number of Member States. The guarantees offered to those staff members should consequently emanate from the General Conference alone.
(31) To avoid prolonged discussion of the different Rules, the French delegate proposed that the following sentence be substituted for paragraph 23:
"The present Regulations may be amended only by the General Conference".
(32) That new text should not be taken to mean that the Executive Board would lose all authority in the matter. It would still have the option of recommending to the Conference any changes it deemed desirable.
(33) The French delegation also had certain remarks to make regarding paragraph 6, whose provisions were much the same as those of the provisional regulations. Mr. Juvigny did not question the practical value of that clause, since it enabled the procedure to be speeded up.
(34) In questions such as those submitted to the Appeals Board, however, the Director-General was one party and the appellant (the staff member) the other. But the two parties were not truly equal, since the Director-General possessed powers which enabled him, in all good faith, to influence the appellant. Such a clause might therefore well be regarded as deceptive.
(35) On the other hand, there was no doubt that the Appeals Board enquired very seriously indeed into cases submitted to it. The verdicts of the Administrative Tribunal of the International Labour Organization had acknowledged the value of the decisions of the Unesco Appeals Board, which served as a tribunal of first instance. The work carried out by the Appeals Board was therefore of considerable assistance to the Administrative Tribunal judges. In the circumstances, the French delegation considered that paragraph 6 might be abolished, and he moved that a separate vote be taken on the point.
(36) In conclusion, Mr. Juvigny remined the Commission that the Director-General had emphasized the fact that all his decisions might be examined by the Appeals Board and by the Administrative Tribunal, and that he was ready to grant staff all necessary guarantees. The French delegation was of the opinion that the modifications it suggested would give more weight to the Director-General's intentions.

(37) Miss LAISE (United States of America) was somewhat concerned at the turn the discussion was taking.
(38) As the delegate of France had said, the Appeals Board was intended to be a piece of internal machinery, not a judicial body duplicating the work of the Administrative Tribunal.
(39) The Appeals Board was designed to provide the Director-General with assistance in reaching carefully considered decisions.
(40) The proposed statutes, if compared with those

of the very effective United Nations Appeals Board, showed considerable room for improvement. In Unesco, the appeals procedure was exceedingly cumbersome and appeals might drag on for months.
(41) Thus, since the General Conference met but once every two years, there ought to be some provision whereby the rules governing the operations of the Board could be reviewed and if necessary amended in the light of experience.
(42) For that reason she was emphatically against the French proposal, to the effect that the General Conference only should be empowered to amend the statutes of the Board.

(43) Mr. PHOTIADES (Greece) agreed that the Appeals Board was not, strictly speaking, a tribunal, but pointed out that its very name proved that it was an instance of appeal. On the other hand, although it was true that the Director-General had to appoint members to the Board, the Board would only be able to give sound opinions if it could base them on an adequate knowledge of the legal factors involved.

(44) Mr. FARR (Chief, Bureau of Personnel and Management) pointed out a typographical error in the first line of paragraph 4 of the French text. The English text: "The Bureau of Personnel and Management and the Staff Association..." was correct.
(45) As regarded the question raised by the delegate of Australia in connexion with paragraph 5 (b) (inefficiency or relative efficiency), the idea was that the Director-General might decide not to renew an appointment, or to terminate an appointment, because the staff member concerned had not given satisfaction, or had given less satisfaction than might have been expected.
(46) It had been asked why authority was being given to the Executive Board to change the statutes of the Appeals Board. The point was that under the previous rules certain practical difficulties had arisen (for example, it might not be possible to find people of the right nationality to serve on the Board). Accordingly, it was undesirable to have to wait two years until the General Conference could change the statutes.
(47) The delegate of Australia had asked whether the Staff Association had concurred in the proposals. Yes, it had.

(48) Mr. KELLY (Australia) said that, since the Staff Association had expressed itself favourably, he could accept the whole of the Statutes, including paragraph 23, and he would move their adoption.

(49) Mr. NOGUEIRA (Uruguay) supported the two proposals submitted by the French delegation for the suppression of paragraph 6 and the amendment of paragraph 23. Now that the structure of the Executive Board had been altered, the French proposal was all the more important, and should be taken into account.

(50) Sir Ronald ADAM (Chairman of the Executive Board) said that the Board had discussed paragraph 6 at some length. The opinion of the majority had been that the staff member ought to be quite free to appeal to the ILO Administrative Tribunal direct, if advised to do so by the Staff Association. The initiative must come from the staff member, not from the Director-General.

(51) Mr. FRAGA IRIBARNE (Spain) pointed out that it would be more logical to call that body "Consejo" in Spanish rather than "Junta". The document under discussion had been translated from the English, but it was preferable to take the Spanish version from the French. Apart from etymological reasons, the word Junta was, historically speaking, not unexceptionable. The proposed body should be called in Spanish: Consejo de Apelación.

(52) The CHAIRMAN replied that the Secretariat accepted the proposal of the delegate of Spain.

(53) Paragraph 1 was adopted unanimously.

(54) Mr. FRAGA IRIBARNE (Spain) formally submitted his amendment to paragraph 2 (c), according to which the last line should read: "Not more than two of the ten members in each group shall be of the same nationality".

(55) The amendment was adopted.

(56) Paragraph 2, as amended, was adopted unanimously.

(57) Paragraphs 3, 4 and 5 were adopted unanimously.

(58) Mr. JUVIGNY (France) moved the deletion of paragraph 6.

(59) Mr. KELLY (Australia) asked what was meant by saying that a staff member could "waive the jurisdiction of the Board", in paragraph 6. He would propose the following wording: "Waive his right of recourse to the Board".

(60) The DIRECTOR-GENERAL was willing to accept the change proposed.

(61) The amendment was adopted.

(62) Paragrapn 6, as amended, was put to the vote and adopted by 28 votes to 2, with 9 abstentions.

(63) Paragraphs 7 and 8 were adopted.

(64) Mr. BOW (Canada) moved the deletion of the last sentence ("Evidence shall be voluntary".) in paragraph 15. It was clear that the Board had no power to compel a witness to give evidence, and the effect of the sentence might merely be to frighten the timid.

(65) Mr. JUVIGNY (France) thought that the last sentence served a purpose. While the Chairman of the Appeals Board could require a staff member to appear, the refusal to do so could not carry with it any sanction. He thought that that should allay the fears of the Canadian delegate.

(66) Mr. BAUGNIET (Belgium) thought there was no idea of compelling an official to give evidence. The Chairman of the Appeals Board could only question

witnesses who came forward. In the circumstances, he did not understand either the comments of the Canadian delegate nor the reply of the French delegate.

(67) The DIRECTOR-GENERAL said that a statement to the effect that evidence should be voluntary might give the impression that he was unable to oblige staff members to testify. In fact, it was important that he be empowered so to do.

(68) Mr. JUVIGNY (France) thought it desirable that both parties should enjoy equal privileges. It would not be very easy to require witnesses brought forward by the Director-General to testify if those of the appelant were at liberty to appear or not as they chose. It was therefore better to accept the fact that there was no right of compulsion.

(69) The DIRECTOR-GENERAL said that there appeared to be some misunderstanding. He ought to be able to compel a staff member to give evidence if the appellant so desired. Not for one moment had he wished to suggest that he should be authorized to call witnesses on his own behalf only.

(70) Mr. ABEYWICKREMA (Ceylon), having enquired what the Staff Association thought about the proposal, it was agreed to interrupt discussion on paragraphs 9-20 until a representative of the Staff Association could be present.

(71) Mr. JUVIGNY (France) warmly appreciated the generous interpretation of the clause in question just given by the Director-General. He thought, however, that if it were decided to alter that paragraph, it should be so worded as to leave no ambiguity of meaning.

(72) The Commission passed to paragraph 21.

(73) Miss LAISE (United States of America) asked whether there was not some contradiction in sub-paragraphs (a), (b) and (c). How could the proceedings of the Board be confidential if appellants could examine previous reports?

(74) Mr. FARR (Chief, Bureau of Personnel and Management) said that the confidential records of the Board dealt with what was said by the Board, meeting in camera. The word "report" was the Board's final considered judgment on a case, and was not the same as a summary record of its proceedings. Experience had shown that it was helpful if an appellant could examine the reports on previous similar cases in deciding whether or not to go forward with his appeal.

(75) Paragraph 21 was adopted.

(76) Mr. BOW (Canada) proposed, in respect of paragraph 22, that the words "the appellant may nevertheless attend..."in the last line but one, should read "the appellant has a right nevertheless to attend...".

(77) This amendment was adopted.

(78) Mr. MERMINOD (Switzerland) wondered whether it would not be fairer to empower the Chairman of the Appeals Board to decide whether the appellant should be present.

(79) Mr. PHOTIADES (Greece) approved the Swiss delegate's suggestion.

(80) The DIRECTOR-GENERAL said that, since the Board was merely an advisory body, to give the Chairman of the Board such authority would be going too far.

(81) Mr. MERMINOD (Switzerland) thought justice required that the decision be left with the Chairman of the Appeals Board. His proposal in no way implied lack of confidence in the Director-General; it merely aimed at providing a procedural guarantee.

(82) The DIRECTOR-GENERAL said that, if the Swiss proposal were adopted, and a case were pending in Paris, the Chairman of the Appeals Board would be able to recall the entire Secretariat from Montevideo if he saw fit.

(83) Miss LAISE (United States of America) moved the following amendment: "If the Director-General, after consultation with the Chairman of the Appeals Board, decides that the presence....".

(84) Mr. ARTHUR (United Kingdom) supported the United States amendment. The Appeals Board was merely an advisory body. Since the Director-General was ultimately responsible for the finances of the Organization, it was only just that he should have the final decision.

(85) In view of the changes proposed by the United States delegation to the amendment to paragraph 22, and of the comments of the United Kingdom delegate, Mr. PHOTIADES (Greece) supported the United States text.

(86) Mr. MERMINOD (Switzerland) said he would not press the point, and withdrew his proposal.

(87) The DIRECTOR-GENERAL said that, if a staff member appealed to the ILO Administrative Tribunal against a decision by the Board, and the Tribunal decided that his presence was necessary, he would always be sent.

(88) The United States amendment was adopted.

(89) Paragraph 22, as amended, was adopted.

(90) The Commission then resumed its study of paragraphs 9-20.

(91) Mr. HENQUET (representing the Staff Association) stated that the Staff Association was in favour of retaining the last sentence of paragraph 15, which guaranteed that witnesses' evidence should be voluntary.

(92) Mr. ARTHUR (United Kingdom) said that the sentence "Evidence shall be voluntary" was ambiguous

It might be interpreted as meaning that the Director-General could not compel staff members to give evidence. It was obviously desirable that he should have such authority. Or it could be interpreted as meaning that a staff member was not compelled to answer questions put to him by members of the Appeals Board.

(93) The DIRECTOR-GENERAL said that, as he interpreted the paragraph, he would still have authority, even if the last sentence were deleted, to compel staff members to appear before the Board. But a staff member could not be compelled to answer all conceivable individual questions which might be put to him by the Board.

(94) Mr. FRAGA IRIBARNE (Spain) asked for an explanation of the last sentence in paragraph 15. It should provide that a staff member was compelled to appear before the Board, but not to give evidence. A distinction should be made between the obligation to appear, and the non-obligation to answer questions. He added that the Spanish word "deponer" should be replaced by the word "declarar".

(95) Mr. BOW (Canada) said that, in view of the explanations given, he would withdraw his proposal.

(96) Paragraphs 9-20 (procedure for appeal) were adopted.

(97) The CHAIRMAN recalled that the delegate of France had proposed that paragraph 23 read: "The present regulations may be amended only by the General Conference".

(98) The DIRECTOR-GENERAL said that, with the amendment adopted in paragraph 2 (c) the whole scheme might become inoperative. Nearly all staff members in the General Service category were French or British, with some Belgians and Swiss, since they were locally recruited. Thus it might be impossible to ensure that not more than "two of the ten members in each group" should be of the same nationality.
(99) It was precisely to cope with such difficulties in the intervals between sessions of the General Conference that provision was made in paragraph 23 for the Executive Board to amend the statutes of the Board, apart from paragraphs 5 and 6.

(100) Mr. JUVIGNY (France) agreed that the amendment adopted in paragraph 2 (c) might occasion material difficulties which had not been foreseen. However, the substantive arguments he had put forward remained intact. He felt he should reopen discussion of that amendment, since not all its consequences had been pointed out at the time of its adoption. Mr. Juvigny therefore wondered whether the Spanish delegate would agree to the following version of paragraph 2 (c):

"of the ten members in each group, a maximum of two members shall be of the same nationality, unless this is materially impossible".

(101) Mr. FRAGA IRIBARNE (Spain) would accept any reasonable formula, such as that proposed by the French delegate. As an alternative he suggested that the officials of the same nationality in Group I should be fixed at two, while those in Group II were maintained at three. He left the choice to the Director-General.

(102) The DIRECTOR-GENERAL said he had merely given an example of the sort of thing that might make a change in the statutes desirable.
(103) Unkind things had been said about the new Executive Board. In its old form, the Board had exercised powers of the kind described in paragraph 23 with outstanding fairness, and he was sure that the new one would do so too.

(104) Mr. JUVIGNY (France) pointed out that the French delegation had no intention of adopting a rigid attitude which would paralyse the work of the Appeals Board. The jurisprudence of most countries distinguished between "basic provisions" and "incidental formalities". There was clearly always room for a liberal interpretation of certain dates and formalities when there was no threat to the appellant's basic guarantees. What was really important was to ensure that those guarantees were not liable to be questioned at any moment.

(105) The CHAIRMAN observed that he could not receive amendments to paragraph 2 as adopted, unless somebody formally moved that the Commission revert to that paragraph.

(106) Mr. KELLY (Australia) moved that a vote be taken forthwith on paragraph 23.

(107) The CHAIRMAN ruled that the Australian motion had priority.

(108) Mr. FRAGA IRIBARNE (Spain) announced that he accepted the priority of the French proposal. If that were rejected, the Spanish delegation would move that the General Conference be empowered to amend not only paragraphs 5 and 6 of the statutes, but also paragraph 2.

(109) The French amendment to paragraph 23 (to the effect that the statutes of the Appeals Board might be amended by the General Conference only) was rejected by 19 votes to 7, with 14 abstentions.

(110) Mr. FRAGA IRIBARNE (Spain) again submitted his amendment as previously announced: the first sentence of paragraph 23 should read: "Paragraphs 2, 5 and 6 may be amended only by the General Conference". Paragraph 2, which dealt with the composition of the Board, was just as important as paragraphs 5 and 6, and should be subject to the same terms of amendment.

(111) Mr. BAUGNIET (Belgium) seconded the Spanish delegate's proposal.

(112) The Spanish amendment to paragraph 23 ("Paragraphs 2, 5 and 6 may be amended only by the General Conference...") was adopted by 16 votes to 11, with 11 abstentions.

(113) Mr. HAGUIWARA (Japan) thought that the

General Conference had the right to amend all the paragraphs in the statute, and that, in drafting paragraph 23, the aim had certainly not been to grant the Executive Board the sole right to amend certain clauses. The main object of those arrangements had been to stipulate that the Director-General should not be authorized to alter the statutes. Accordingly he moved that the words "or by the General Conference" be added at the end of paragraph 23.

(114) Mr. BAUGNIET (Belgium) thought it should be enough to remove the negative and to read: "The remainder of the statutes and the Appendix may be modified by the Executive Board".

(115) Mr. HAGUIWARA (Japan) maintained his proposal as being perfectly explicit.

(116) The amendment proposed by Mr. Haguiwara was approved.

(117) Paragraph 23, as amended, was finally approved by 35 votes to nil, with four abstentions.

(118) Mr. FRAGA IRIBARNE (Spain) said that, in view of the explanations given by the Director-General, he accepted the principle of including no more than two officials of the same nationality in Group I, and no more than three of the same nationality in Group II.

(119) Mr. HAGUIWARA (Japan) thought that there need be no hesitation in restoring the original wording of paragraph 2 (c), since the principle of equitable geographical distribution was clearly stated in the following sub-paragraph (d).

(120) Mr. ARTHUR (United Kingdom) preferred the original text of paragraph 2 (c) as proposed by the Director-General, under which there was no danger of inequitable geographical distribution of members of the panel. He was, however, prepared to vote in favour of the Spanish amendment. In view of the difficulties invoked by the Director-General, he could not support the Japanese amendment.

(121) The Spanish amendment to paragraph 2 (c) was adopted by 30 votes to 0, with 9 abstentions.

(122) Paragraph 2, as amended, was adopted.

(123) Mr. FRAGA IRIBARNE (Spain) did not see any need to submit the Appendix to the Commission for its approval. It was an administrative formula, not a legal text, and there was no call for such a proceeding.

(124) The CHAIRMAN ruled that the Appendix should be submitted to the Commission for its approval, as paragraph 23 read "The remainder of the statutes and the Appendix may be amended only by the Executive Board", which meant that the Commission's approval of the Appendix was also required.

(125) The Appendix was adopted.

(126) Document 8C/ADM/26 as a whole was put to the vote and adopted by 39 in favour, none against and 2 abstentions.

**ITEM 9.5.9 OF REVISED AGENDA: RECOGNITION OF THE COMPETENCE OF INTERNATIONAL ADMINISTRATIVE TRIBUNALS (document 8C/ADM/18)**

(127) The DIRECTOR-GENERAL said that the purpose of the document was merely to extend for another two years the authorization given to the Director-General to arrange for the ILO Administrative Tribunal to hear cases of the sort mentioned in the document.
(128) It was also proposed that the jurisdiction of the United Nations Administrative Tribunal be permanently accepted in appeals by Unesco staff members alleging non-observance of Pensions Fund Regulations.

(129) Mr. ATTAGARA (Thailand), seconded by Mr. POHL (Union of South Africa), moved that the Commission recommend the Conference to adopt the resolution in paragraph 6.

(130) The proposal was unanimously adopted.

(131) The DIRECTOR-GENERAL said that adoption of the resolution raised an incidental problem.
(132) The Administrative Tribunal had recently awarded a few hundred dollars to a Unesco staff member. He had assumed that acceptance of the jurisdiction of that Tribunal would automatically involve authorization to spend money to pay such awards. The auditors, however, had questioned the regularity of such a decision. Although they had eventually accepted his explanations, he needed some authorization to cover cases of that kind.
(133) No provisions were made in the budget for such awards, and it was exceedingly difficult to estimate in advance how much money would be required for the purpose.
(134) There was a possibility of using the Working Capital Fund; that could be done by adding a clause to the resolution on extraordinary and unforeseen expenditures.
(135) Alternatively, the Conference could amend its resolution carrying forward a surplus of $600,000 to the ninth session. That, to him, seemed the more attractive course. But he would like advice from the Commission before the question was raised in the General Committee, since it was a serious matter to reopen a decision already taken by the Conference.

(136) Mr. POHL (Union of South Africa) asked whether there were any cases pending.

(137) The DIRECTOR-GENERAL: No.

(138) Mr. HAGUIWARA (Japan) thought the procedure whereby such awards would be paid from budget surpluses was too complicated. It would be simpler to consider such outlays as unforeseen expenditure and to pay them from the Working Capital Fund.

(139) The DIRECTOR-GENERAL said that such a

procedure would involve submitting a resolution to the ninth session to the effect that the money be repaid to the Working Capital Fund.

(140) Miss LAISE (United States of America) said that she had abstained in the vote on document 8C/ADM/26.
(141) As regarded the matter under discussion, she would point out that the Working Capital Fund belonged to governments and had to be replenished. It seemed simpler to have recourse to a system which would not entail reimbursement.

(142) Mr. ARTHUR (United Kingdom) said that the Conference had already decided not to apply the Financial Regulations to budget surpluses, i.e. to carry those surpluses forward pending a decision at the ninth session. If, now, the eighth session used such surpluses for the payment of awards, the ninth session would be unable to use them in accordance with the Financial Regulations. Its hands would be tied.
(143) The Working Capital Fund seemed the obvious source for such payments, but the problem was a difficult one, needing further study. He would therefore abstain in any vote on the matter.

(144) Mr. HAGUIWARA (Japan) enquired what would be the maximum expenditure for any one case. Could it be covered by transfers effected by the Board?

(145) The DIRECTOR-GENERAL could give no idea of the amount of such awards. There might be no awards at all. Nevertheless, he required an authorization to make such payments.

(146) Miss LAISE (United States of America) agreed that more time was needed. Account should be taken of experience acquired by the United Nations, which was setting up a fund for such purposes, to be financed out of the Staff Assessments Scheme.

(147) Mr. POHL (Union of South Africa) suggested that the Commission decide in favour of the principle involved, and consider later where the money should come from.

(148) Mr. JUVIGNY (France) pointed out that it was impossible to foresee how many such cases might come before the Administrative Tribunal, in how many the administration might be declared liable, and the amount it might be required to pay. It seemed to him moreover that, once Unesco had recognized the jurisdiction of the Administrative Tribunal, it must likewise accept the possible outcome of that decision. The opinion expressed on 13 July 1954 by the International Court of Justice left no doubt on the point.
(149) Mr. Juvigny proposed therefore that the Commission first take its decision of principle, and leave till later the question how payment should be made.

(150) Mr. BAUGNIET (Belgium) concurred in the comments of the South African and French delegates. He suggested that the Conference should authorize the Director-General to pay any amounts which Unesco might be required to pay as a result of a verdict delivered by an administrative tribunal recognized by the Organization. The Director-General would have the right to use the Working Capital Fund for the purpose, subject to a decision to be taken by the Conference at its ninth session on ways of reimbursing the Working Capital Fund.

(151) Miss LAISE (United States of America) was against taking any such decision. The regulations of the ILO Administrative Tribunal made provision for further appeal to the International Court, and it might in certain circumstances be argued that Unesco had no obligation to pay. It would be better merely to authorize the Director-General to use certain funds to meet such expenditure, if any.

(152) Mr. BAUGNIET (Belgium) said that at the afternoon meeting he would submit a written proposal to the effect that the Director-General be authorized to draw on the Working Capital Fund for such purposes.

The meeting rose at 1.05 p.m.

# TWENTY-FOURTH MEETING

*3 December 1954 at 3.30 p.m.*

*Chairman:* Mr. BEEBY (New Zealand)

**ITEM 9.4.3: ADMINISTRATION OF THE WORKING CAPITAL FUND (document 8C/ADM/9) AND**

**ITEM 9.5.9 OF REVISED AGENDA: RECOGNITION OF THE COMPETENCE OF INTERNATIONAL ADMINISTRATIVE TRIBUNALS (document 8C/ADM/18) (continued)**

(1) The CHAIRMAN announced that the delegate of Belgium wished to make a proposal amending document 8C/ADM/9.

(2) Mr. BAUGNIET (Belgium) returned to the proposal he had submitted at the previous meeting, the text of which he had now revised in consultation with the Comptroller of the Organization.
(3) His proposal was that a sub-paragraph (c) be inserted in document 8C/ADM/9 (Administration of the Working Capital Fund), under B (ii), to read as follows:
"(c) awards of compensation ordered by the Administrative Tribunal of the International Labour Organization".
(4) He further proposed to delete the last paragraph of that section of the document, and to substitute the following:
"The Director-General shall report to the next ordinary session of the General Conference all advances made under this clause and the circumstances relating thereto. At the same time he shall submit proposals for the reimbursement of such advances to the Working Capital Fund".

(5) Miss LAISE (United States of America) asked if any items being discussed by the Programme and Budget Commission were likely to affect the Working Capital Fund resolution.

(6) The DIRECTOR-GENERAL replied that he would find out from the Secretary of the Programme and Budget Commission what the position was.

(7) Mr. BAUGNIET (Belgium) pointed out that the question raised by the United States delegate did not concern the current session of the Conference, since reimbursement of the Working Capital Fund would only come up for discussion at the next session.

(8) Miss LAISE (United States of America) recalled that the unforeseen and unpredictable expenses which could be met by drawing from the Working Capital Fund were strictly limited to: (a) those arising from requests from the United Nations; (b) salary adjustments; (c) awards of compensation. Unesco might, for example, wish to draw on the Working Capital Fund to meet the cost of co-operating with the United Nations in its scheme for the peaceful use of atomic energy. That item would either have to be earmarked in the budget, or covered by funds drawn from the Working Capital Fund; if the latter solution were to be adopted, Section II, 2A (page 1 of document 8C/ADM/9) would have to be broadened.

(9) The DIRECTOR-GENERAL explained that the Programme and Budget Commission had been given a work plan for co-operation with the United Nations in its scheme for the peaceful use of atomic energy, involving expenditure of $40,000, which was included in the budget. It was believed that that was a reasonable proposal in terms of the resolution adopted by the committee of the General Assembly. However, plans might change during the two-year period, and it might be wise to provide for the possibility of drawing on the Working Capital Fund, in case Unesco were called upon to shoulder additional responsibilities.

(10) Mr. ARTHUR (United Kingdom) moved adoption of the Belgian amendments.

(11) The Belgian amendments in document 8C/ADM/9 were adopted.

(12) Mr. NOGUEIRA (Uruguay), on a question of procedure, remarked that neither the Spanish-speaking delegates nor interpreters could follow the discussion in detail since the words which had been added to the original text had not been given out in Spanish. He pointed out with all due respect that, to avoid similar difficulties, the Commission ought not in future to discuss documents which had not been distributed in all the working languages.

(13) The CHAIRMAN pointed out that the Belgian amendments had been proposed in the course of the meeting and there had not been time to translate them into Spanish. He apologized to the delegate of Uruguay.

**ITEM 9.5.4.1: STAFF REGULATIONS AND STAFF RULES (document 8C/ADM/27)**

(14) Mr. BAUGNIET (Belgium) stated that the changes in the text were not clearly brought out in document 8C/ADM/27; he recalled the discrepancies already noted between the original English text and the French version, some of which had far-reaching implications. It would have been better to arrange the document in two columns, one giving the original text, and the other the text as amended.

(15) Mr. FARR (Chief, Bureau of Personnel and Management) explained that the divergencies discovered in 1953 between the English and French texts related to the Staff Regulations and not to the Staff Rules. With the exception of the divergency in Regulation 4.5.1, mentioned by the delegate of Belgium, all were minor, drafting differences. Amendments to the Rules had not been indicated because, as stated by the Director-General in his Annual Report, the amended Rules had been completely revised to bring them into line with the amended Staff Regulations and with the Rules of the United Nations and other Specialized Agencies.

(16) Mr. BAUGNIET (Belgium) was satisfied with the explanation given by the Secretariat.

(17) The Commission decided to take note of document 8C/ADM/27.

(18) Mr. FARR (Chief, Bureau of Personnel and Management) recalled that under the new Regulation 9.1.1, adopted by the Commission at its previous meeting, the Director-General was to set up a special advisory board and to ask the President of the International Court of Justice to nominate a chairman. In order to provide for payment of that chairman, Mr. Farr asked if the Commission would agree to add an entry in paragraph 39 of Part IV of the Budget; the entry would be $840 in 1955 and $840 in 1956 to cover the chairman's honorarium and expenses.

(19) Mr. DE LOS SANTOS (Philippines) moved adoption of the Secretariat's proposal.

(20) Adopted.

**ITEM 9.3 OF REVISED AGENDA: LEGAL QUESTIONS (document 8C/JUR/6)**

(21) Mr. BAUGNIET (Rapporteur of the Legal Committee) presented the first part of the Fifth Report of the Legal Committee, referring to the interpretation of Article V, paragraph 3, of the Constitution (re-eligibility of members of the Executive Board).

(22) Mr. JUVIGNY (France) proposed that the interpretation given by the Legal Committee be accepted.

(23) Mr. ARTHUR (United Kingdom) seconded the proposal, which was adopted.

(24) Mr. BAUGNIET (Rapporteur) then presented the second part of the Report, dealing with amendments to the Rules of Procedure resulting from the adoption of Russian as a working language of the General Conference. He explained that the point of the revised title to Rule 53 was merely to enable the language of the country where the General Conference was being held to be used during that session.

(25) Mr. POMPEI (Italy), supported by Mr. SOLDATOV (Union of Soviet Socialist Republics), proposed that that part of the Report be adopted.

(26) Adopted.

(27) Mr. BAUGNIET (Rapporteur) then proceeded to the third part of the Report: "Amendments to the Financial Regulations" (Draft Resolution submitted by the Spanish delegation (document 8C/DR/90)). He read out the suggested wording which the Legal Committee was submitting to the Administrative Commission for inclusion in its Report, saying that the wording satisfied the Spanish delegate and had been unanimously accepted by the Legal Committee.

(28) The CHAIRMAN asked if the Legal Committee had foreseen at what stage there would be a change in the Financial Regulations.

(29) Mr. BAUGNIET (Rapporteur) replied that a proposal to that effect must be filed by a Member State or by the Director-General in time for it to be submitted to the General Conference at its next session.

(30) The CHAIRMAN explained that the proposal was that the Director-General should study the proposals and submit a report to the General Conference at its ninth session.

(31) Mr. FRAGA IRIBARNE (Spain), seconded by Mr. COLOMBO (Argentina), moved adoption of the third part of the report.

(32) Adopted.

(33) Mr. BAUGNIET (Rapporteur) submitted the last part of the report: "Legal guarantees to be provided nationally for the staff of the Secretariat", a draft recommendation submitted by the Italian delegation (document 8C/DR/74) and amended by the United States delegation (document 8C/DR/74(rev.)). The Legal Committee had decided that a second draft resolution, submitted by the United Kingdom delegation (document 8C/DR/113), was not an amendment to the Italian recommendation and should be dealt with as a separate proposal.

(34) The CHAIRMAN hoped that the Commission would accept the opinion of the Legal Committee that the United Kingdom motion was not an amendment of

the Italian motion, as amended by the United States delegation, but a separate motion. He would put them to the vote in the order in which they had been presented. He asked the delegates of Italy and the United States of America whether they had any objection to the change in the title.

(35) Mr. POMPEI (Italy) was happy to accept the conclusions of the Legal Committee, which he found reassuring; his motion was only a recommendation to Member States and its object was moral rather than legal. He agreed to the new title proposed by the United Kingdom delegation, which left out the word "guarantees". He asked the Chairman to put the Italian proposal to the vote, as amended by the United States delegation.

(36) Mr. ARTHUR (United Kingdom) announced that his delegation would withdraw its motion in favour of that of Italy, as amended.

(37) The Italian resolution, as amended by the delegation of the United States of America, was adopted.

(38) In reply to Mr. C.W. CARTER (Canada), who asked whether the Administrative Commission had examined the Fourth Report of the Legal Committee, Mr. BAUGNIET (Rapporteur) explained that that report had been passed directly to the General Committee and not to the Administrative Commission, which had no call to discuss it; the report was solely concerned with nominations.

(39) Mr. GOMEZ ROBLEDO (Mexico) asked that note be taken of the Mexican delegation's wish to refrain from participating in the decision taken on Draft Resolution 8C/DR/74 (rev.).

**UNESCO JOINT STAFF PENSION FUND – REPORT BY THE DIRECTOR-GENERAL (document 8C/ADM/17)**

(40) The CHAIRMAN explained that the Commission had two duties to perform in connexion with document 8C/ADM/17; (1) to pass the draft resolution in paragraph 4 on page 3; and (2) to elect three representatives and three alternates to sit on the Unesco Staff Pension Committee. As a result of consultation with governments, the names of six Member States with permanent representatives in Paris who would be willing to serve on the Committee had been received. Those States were: Australia, France, Italy, Japan, Lebanon and the United States of America. Other countries could, however, be proposed from the floor.

(41) Miss LAISE (United States of America), seconded by Messrs. C.W. CARTER (Canada), ABEYWICKREMA (Ceylon) and DE HOOG (Netherlands), proposed that the first three countries in alphabetical order be elected as members and the three others as alternates.

(42) The proposal was adopted.

(43) Mr. C.W. CARTER (Canada), seconded by Messrs. ABEYWICKREMA (Ceylon) and DE HOOG (Netherlands) moved adoption of the resolution in paragraph 4 on page 3.

(44) Adopted.

(45) The CHAIRMAN announced that the Commission had concluded its business. He requested it to meet on Monday morning, 6 December, at 10 a.m. to consider its report, which would be distributed to members on Monday morning at 9 a.m.

The meeting rose at 4.50 p.m.

# CHAPTER VI

# ADVISORY COMMITTEE ON PROGRAMME AND BUDGET

## FIRST MEETING

*1 November 1954 at 10.30 a.m.*

*Chairman* Mr. GARDNER DAVIES (Australia)

(1) As the Committee had not yet elected its Chairman, the meeting was opened by the Head of the Bureau of Conference Planning.

(2) Mr. MONTAGNIER (Head, Bureau of Conference Planning and General Services) began by reading the list of the 15 Member States nominated by the seventh session of the General Conference to send representatives to the Advisory Committee on Programme and Budget, and welcomed all present. He then paid a tribute to the late Mr. Hodson, Chief of the Bureau of Programme and Budget, who had played a most active part in the drafting of the Proposed Programme and Budget for 1955-56 and had lately been killed in a tragic accident.

(3) Mr. Montagnier went on to recall that the terms of reference of the Committee were set forth in resolutions 13.1 and 13.5 of the seventh session of the General Conference, which he then read. The Committee would have to give its opinion on the new draft resolutions submitted by Member States. Some 30 drafts had so far reached the Secretariat and 13 had been reproduced under the reference numbers 8C/DR/1 to 8C/DR/13.

(4) The Agenda of the Committee was given in Section II of document 8C/1, items 7.1 to 7.7. Mr. Montagnier proposed that the Committee should proceed to elect its officers. In that connexion it would be remembered that, in accordance with Rules 34 and 35 of the Rules of Procedure, the Chairman of the Advisory Committee on Programme and Budget or, in his absence, the Vice-Chairman, would serve as an ex officio member of the General Committee of the Conference.

**ITEM 7.1: ELECTION OF THE CHAIRMAN, VICE-CHAIRMAN AND RAPPORTEUR**

(5) Miss LAISE (United States of America) seconded by Mr. JUNANKAR (India), proposed that Mr. Gardner Davies (Australia) be elected Chairman of the Advisory Committee.

(6) The proposal was adopted and Mr. Gardner Davies took the Chair.

(7) The CHAIRMAN expressed his deep appreciation of the honour that was being conferred upon his country and himself. First of all, he wished to thank the Uruguayan Government and people for their hospitality and kindness in receiving the Conference in their country and allowing it to meet in the imposing precincts of the "Palacio Legislativo". Secondly, he wished to join in the tribute which had been paid to Mr. William Hodson, whose death left all those connected with Unesco with a very real sense of personal loss; the draft programme and budget for 1955-56 was the result of his able and devoted service to the Organization over a period of years and the Conference would miss him very sorely indeed.

(8) The Chairman then called for nominations for the posts of Vice-Chairman and Rapporteur.

(9) Mr. JUNANKAR (India), seconded by Mr. SILLER (Mexico), proposed the name of Professor Sommerfelt (Norway) as Vice-Chairman.

(10) The proposal was adopted.

(11) Mr. JUNANKAR (India), seconded by Miss LAISE (United States of America), proposed that Mr. Cabouat (France) be elected Rapporteur.

(12) The proposal was adopted.

**ADOPTION OF THE PROVISIONAL AGENDA:** (document 8C/1, Annex I, Section II, page 4)

(13) Subject to the Committee's right to add items or change the order of existing items in the course of its work, the Agenda in Section II of Annex I of document 8C/1 was adopted.

**ITEM 7.2: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION** (documents 8C/5 and 8C/5 Corr.)

(14) The CHAIRMAN proposed first to ask the Assistant Director-General to make a general statement on

the programme and budget policy embodied in document 8C/5, and then to ask Mr. Rao to give a brief technical explanation of its preparation. The Committee would then hold a general discussion on programme policy and the budget practice implemented in the programme.

(15) Mr. MAHEU (Assistant Director-General) conveyed to the Committee the regrets of the Director-General, who had had to remain in Rio de Janeiro and had asked him (the speaker) to present on his behalf the Proposed Programme and Budget for 1955-56 as given in document 8C/5 and amended in part by document 8C/5 Corr.

(16) In the first place, as directed by the General Conference, the budget for the proposed programme was drawn up at two levels. As would be seen from paragraph 17 of the Introduction to document 8C/5 and from the comments of the Executive Board (8C/5 Add. 1, paragraph 22), the "present budgetary level" and "higher budgetary level" were notions which could be given at least two different interpretations, of which one, if adopted, would have brought about a considerable rise in the level of expenditure; it was the other - involving a smaller increase only - which the Director-General had in fact adopted.

(17) Mr. Maheu went on to explain that the Director-General had conceived his programme as a single whole and that, in his view, the projects included at higher budgetary level were no less important than those coming within the limits of the present budgetary level. Incidentally, the Executive Board in its comments (8C/5, Add. 1, paragraph 24) had expressed the view that the total proposed programme at both levels can and should be carried out .

(18) It should also be pointed out that almost the whole of the sums requested at the higher budgetary level were intended for programme operations, 4.40% of them only being expendable for general administration and common service costs. Considering the budget as a whole (after deduction of expenses for the General Conference and the Executive Board), it would be seen that the appropriations for general administration and common service costs, which had amounted to 24.43% in 1953-54, had dropped to 20.92% in the present proposed programme.

(19) Lastly, though the Director-General did not desire in any way to influence the decisions of the General Conference, he had felt that the only data he could use for his estimate of income were:

The United Nations scale of contributions for 1954, allowance being made for the number of Member States in Unesco;

The anticipated percentage of unpaid contributions accepted by the General Conference at its seventh session for the 1953-54 budget.

(20) Turning to the structure of the programme, the Assistant Director-General pointed out that the division into chapters corresponding to Unesco's main fields of action - Education, Natural Sciences, Social Sciences, Cultural Activities, Mass Communication, etc. - had been retained. Each of these chapters had, however, been arranged in accordance with a uniform plan which brought out the sub-division into two sections that was a feature of the whole programme and constituted the framework upon which it had been built. The Executive Board had expressed its satisfaction with that innovation (8C/5 Add. 1, paragraph 7).

(21) Section I comprised the general activities of the Organization and Section II the special activities. Among the special activities, a distinction had to be made between planned undertakings and technical aid supplied to Member States at their request. Those two kinds of activities, although inspired by the same desire to adapt the Organization's efforts as closely as possible to the diversity of conditions encountered, were, in fact, representative of materially different types of operations. Fuller details could be found in paragraphs 56 to 65 of the Director-General's Introduction.

(22) As regards the actual content of the programme, each section was sub-divided into projects. Each project was headed by a title and preceded by a budget summary and one or more resolutions. There were 69 projects altogether, compared with 242 in the programme for 1953-54, which meant that considerable concentration had been effected by the systematic regrouping of activities. That concentration had notably simplified the programme and budget document; it should also greatly facilitate the work of the Advisory Committee and of the General Conference.

(23) The Assistant Director-General went on to explain briefly the main considerations which the Director-General had had in mind in drawing up the programme before the Committee. Firstly, he had been concerned to develop the practical side of Unesco's work. No less essential was the desire to bring the Organization's work more closely into line with the needs, aspirations and resources of Member States. Much effort had also been devoted to the task of accentuating the concentration. Not only had the number of projects been notably reduced, but in some instances a more or less close connexion had been established between several projects appearing in different chapters. The programme had thus been concentrated to a far greater extent than might appear from a first reading of the document, and the Director-General, in pursuance of the Executive Board's recommendations (document 8C/PRG/13, paragraphs 48 to 60), was prepared to embark upon a still more radical concentration. He did not, however, feel entitled to do so until the General Conference had debated the matter in full knowledge of the facts and consequences, and had provided him with clear-cut instructions.

(24) Lastly, the proposed programme before the Committee was a collective work, in which all the main specialists of the Secretariat, in addition to the Heads of Departments, had taken a share. It bore the stamp more especially of the late William Hodson, to whose memory the speaker paid heartfelt tribute.

(25) The CHAIRMAN thanked Mr. Maheu for his clear statement. Before calling on Mr. Rao, he wished to welcome Professor Secco Ellauri and to ask him to transmit the Committee's greetings and gratitude to the Government of Uruguay.

(26) Mr. RAO (Acting Chief, Bureau of Programme and Budget) expressed his own sorrow and that of his colleagues at the death of Mr. Hodson, which had shaken Unesco to its foundations. Members of the Bureau of Programme and Budget felt that they had

lost, not only a guide and a friend, but almost a member of the family. Mr. Rao said that he had brought with him Mr. Hodson's copy of the Programme and Budget, which had in it several notes made by him, so that although he (Mr. Rao) would be speaking, the thoughts behind his words would be Mr. Hodson's.

(27) Mr. Rao pointed out that, in preparing the budget estimates for 1955-56, the Secretariat had kept in mind two guiding principles: firstly, the Director-General had endeavoured to carry out the various recommendations of the Budget Committee of the seventh session of the General Conference and, secondly, in the light of several opinions voiced at previous sessions of the Conference, an effort had been made to simplify the document by cutting out all unnecessary details, while maintaining the elements essential to an examination of the programme. For example, the large number of summary tables which appeared in previous budget documents were now reduced to the essential ones - summaries by major objects of expenditure and by major projects for each department or service.

(28) The budgetary standards adopted in the computation of the budget estimates were based on past experience and had been tested in the light of the 1953 expenditure records. In some instances, however, when it was possible to have actual facts, the estimates were calculated on the basis of these facts rather than by applying the standards.

(29) Mr. Rao pointed to the use of two new methods not employed in previous years' budget documents. Firstly, it had been considered very useful to try to distribute staff costs among the various resolutions to which they related, rather than give such details as the salaries of each staff member. Secondly, an effort had been made to compare the budget estimates for the major projects for 1955-56 with corresponding ones in 1953-54. Certain difficulties arose from the fact that it was not always possible to equate the projects between the two financial periods, but the figures in the 1953 and 1954 columns indicated the approximate budgetary relationship between 1953-54 activities and those proposed for 1955-56.

(30) Mr. Rao then enumerated the various methods by which the specific recommendations of the Budget Committee of the seventh session of the General Conference had been incorporated. In passing, he mentioned that for easy reference the paragraphs of each department had been serially numbered in the right-hand column of each page; the delegates would find it easy to refer to all three versions by reference to these paragraph numbers.

(31) In conclusion, Mr. Rao assured the Committee that, although various details were not given in the draft programme and budget, every care had been taken to ensure that the estimates were reasonable and accurate; the Secretariat would be only too glad to provide any additional information.

(32) After thanking Mr. Rao, the CHAIRMAN invited the Committee to hold the general discussion on the draft programme and budget, reference being made to the Executive Board's Report on the Remodelling of Unesco's Future Programme (document 8C/PRG/13).

(33) On behalf of the United States Government, Miss LAISE thanked the Government of Uruguay for its hospitality. Also on behalf of her Government, and as a friend of William Hodson, Miss Laise expressed sorrow at his death, but confidence in those responsible for carrying on his work.

(34) With regard to the draft programme and budget, the task of the Advisory Committee and of the Conference would be made much easier by the improvement in its presentation and content. The United States delegation regretted, however, that the calculation of this higher budgetary level had been based on estimated contributions forthcoming from new Member States. She agreed with Mr. Maheu that, in examining the work plans, the Committee should keep its discussion fairly general, querying proposed plans in the light of past experience and the need for concentration of efforts. The Committee should avoid dwelling on detail, since experience had shown that the Secretariat, in implementing a two-year programme, must retain flexibility and be able to change details in the course of the two years. In its discussion, the Committee should take account of the previous recommendations of the Budget Committee, the Executive Board's report on the remodelling of the programme and the Auditor's comments. Some matters of expenditure would, however, have to be considered, and the United States delegation wished the Secretariat to supply, if possible, the following information:

(1) a chart containing up-to-date information on surpluses;

(2) a chart showing 1954 obligations for the first three quarters of the year;

(3) a statement of actual 1952 expenditures by object of expenditure;

(4) a chart showing the number of established posts and their level and indicating how many had been filled;

(5) estimates for draft resolutions and supplementary items as soon as possible.

(35) She hoped that, as a result of its deliberations, the Advisory Committee would submit a report to the Commissions, emphasizing the major programme and budget issues, so as to facilitate the work and decisions of the Commissions.

(36) Mr. JUNANKAR (India) associated himself with the deep regret expressed at the death of Mr. Hodson. He had been a pillar of the budget and would be greatly missed. The delegate of India also warmly thanked the Government of Uruguay for its hospitality.

(37) The Proposed Programme and Budget for 1955-56 was briefer and more intelligible to Member States and represented a real effort to meet their needs more effectively. Its salient feature was the division into permanent services and special activities; as far as the underdeveloped countries were concerned, it was the series of major projects designed to meet the needs of Member States which should become the pivot of Unesco's activities. Unesco had catered long enough for the needs of the intellectual aristocracy and should henceforth concentrate on the needs and aspirations of the common people, the majority of whom were still steeped in ignorance. It was necessary to form an effective system of priorities, calculated to achieve tangible results in the foreseeable future and, with that end in view, the Government of India had sent a series of draft resolutions

indicating a number of basic tasks. The following questions, for example, were considered to be of primary importance: the establishment of an International Educational Development Fund, research on the utilization of nuclear energy, and the spreading of knowledge of Eastern culture in the West.

(38) In conclusion, the delegate of India emphasized the need for Member States to make larger resources available to Unesco. The Organization would not survive unless its basic purposes could be fulfilled within a reasonable time, and that could not be done without a larger budget. An appeal should therefore be made to Member States to divert money used for destructive purposes towards building up the constructive activities of Unesco.

(39) Mr. SECCO ELLAURI (Uruguay) asked the Committee's forgiveness for his late arrival, which had been due to circumstances beyond his control. He had been detained by the Minister of Education to discuss Unesco business.

(40) Turning to the proposed programme and budget, he recalled that he had himself taken part in the preparatory work for it in the Executive Board and, broadly speaking, found it acceptable. He approved the innovations which the Board had made in it. The proposed programme and budget had been drawn up when Unesco was passing through a period of difficulty and to some extent of financial crisis. The Director-General had remarked on one occasion that they might be "spreading the butter on too much bread"; what they were now doing was to reduce the amount of bread to get a better and smoother spreading of the butter. Unesco's suit might, at the moment, perhaps be on the tight side and not a perfect fit, but it was such that the Organization could wear it without sacrifice of dignity or effectiveness.

(41) Mr. Secco Ellauri supported the requests made by the representative of the United States of America. He drew attention to the excellent work done by the Secretariat, in co-operation with the Executive Board, in introducing in the draft programme the changes already mentioned.

(42) He was in favour of the method suggested by the Chairman to ensure the effectiveness of the Committee's proceedings, namely, to begin with a general discussion and then go on to a more detailed study.

(43) The speaker wished to associate himself with the tributes paid by other members to the memory of the late William Hodson, who had met a tragic end in the Shannon accident. Mr. Hodson had combined drive and great ability with exceptional personal modesty. The circumstances of his death made the loss of him more grievous still.

(44) Mr. Secco Ellauri thanked the Chairman for his friendly references to the Uruguayan authorities and people. However, they were still only on the threshold of the Conference: Uruguay's attentions and courtesies would increase steadily as the work of the Conference progressed. The holding of the General Conference in Montevideo was a great honour for Uruguay. And there was evidence that Unesco's presence in the capital had already begun to yield fruit. In no more than a single month, there had been a notable increase in awareness of Unesco's principles among the general public. The Conference would undoubtedly make the aims and objects of the Organization more widely known. Lastly, the speaker explained to delegates that they would only remain foreigners to the extent that they themselves wished; by the people of Uruguay they would quickly be accepted as friends and brothers. As time went by, these links would grow stronger, and, as Unesco and Uruguay got to know one another better, a true affection would develop between them.

(45) Mr. CABOUAT (France) thanked the Committee for the honour it had done him in electing him Rapporteur. He expressed the gratitude of the French delegation to the Government of Uruguay for the generous hospitality it was extending to the General Conference in Montevideo. He also associated himself with the tributes paid to William Hodson and suggested that a message be sent to Mrs. Hodson conveying the Committee's condolences.

(46) As regards the proposed programme and budget, Mr. Cabouat said that the Director-General and the Secretariat were to be congratulated on having produced a document which, as a working tool, would prove far superior to those of previous years. The French delegation was prepared to approve the main lines of the programme proposed in that document and noted with satisfaction the reduction in the proportion of administrative costs to programme expenditure. However, in the view of the French Government, the projects both at the higher and at the present budgetary level should be examined on their merits and not in the light of the more or less extensive additional resources that might become available to the Organization through the accession of new Member States. The total figures for each of the two budgetary levels should, in his opinion, be regarded simply as guide marks, between which the total figure of the budget voted could be determined.

(47) With regard to the sub-division of the programme into two sections, relating to general activities and special activities, the speaker pointed out that, whilst Unesco might use two different methods to attain its ends, both methods should serve the same ideal. Thus, in the final count, the object of both general and special activities should be the same - to raise the cultural level of all the countries in the world. This fundamental unity of all Unesco's activities should, in his view, be strongly emphasized, and close relations should be established between the officials or services concerned with those in either category.

(48) Mr. Cabouat drew particular attention to the help Unesco could secure from international non-governmental organizations towards the execution of its programme. To his mind, such organizations should be still more closely associated, not only in the permanent activities of Unesco but also in those projects designed to afford direct aid to Member States.

(49) Without wishing for the moment to go into the detail of the proposed programme, the French delegation greatly regretted that no provision was made for carrying further the investigations undertaken in earlier years into ways in which the subjects taught in schools could contribute to international understanding. These investigations had aroused the liveliest interest in educational circles and it was extremely regrettable that they were thus being broken off.

(50) Having thanked Mr. Cabouat for his statement, the CHAIRMAN requested the Committee to consider its programme of work. He tentatively suggested that it meet in the mornings from 10 a. m. to 12.45 p. m. and in the afternoons from 3.30 to 7 p. m. In view of the Committee's heavy agenda, he emphasized the need for punctuality.

(51) The times of meeting suggested by the Chairman were approved.

The meeting rose at 12.30 p. m.

# SECOND MEETING

*1 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION** (continued)

(1) Discussion being resumed on Item 7.2 of the Agenda, the CHAIRMAN called upon Mr. Sommerfelt.

(2) Mr. SOMMERFELT (Norway) thanked the Committee for the honour done to his country in electing him Vice-Chairman. He associated himself with the reference made at the morning meeting to Mr. Hodson.
(3) The Norwegian Government agreed on the whole with the new form in which the programme had been drafted and with the programme itself. While wholeheartedly in support of the Indian delegate as to the necessity of helping underdeveloped countries, he recalled that Unesco's other aims in the field of international collaboration should not be overlooked. He also supported the view of the French delegate on the necessity for collaboration between the important non-governmental organizations, especially in the fields of science and culture.
(4) With regard to subventions, he thought that it would be wise for the Committee to advise the General Conference as to amounts, since, if no limit were fixed, discussion on totals would be duplicated.

(5) Mr. AVIDOR (Israel) said that, owing to the limitations of the budget, it would be necessary to compromise on the programme. The fields of activity would have to be limited but not to a point at which the aims and purpose of Unesco were defeated. The Indian delegate had advocated concentrating on the masses in underdeveloped countries. It was obvious that Unesco must work in those countries but it was also necessary for it to work amongst educated peoples.
(6) Referring to the remarks made by the French delegate, he agreed that Unesco could not be a Ministry of Education for the whole world. It could advise countries on education but could not do their work for them. It should attempt to make underdeveloped countries aware of their own responsibility in developing culture amongst their people.

(7) There being no further speakers at this stage, the CHAIRMAN asked the Committee how it wished to proceed in its examination of the programme and budget. The delegate of the United States, he added, had already made suggestions in that matter.

(8) Mr. MAHEU (Assistant Director-General) said that the Secretariat would probably be able to supply on the following day the information requested that morning by the United States delegation. As regards the order of the discussion, the directors of Departments were prepared to adopt whatever order was preferred by the Committee. However, they thought it advisable to begin with the programme of the Education Department, since that would, in their view, afford the best means of understanding the way in which various aspects of the programme had been linked up.

(9) The Committee agreed to begin with a detailed examination of the Chapter on Education and then to decide in what order the other Chapters should be taken.

(10) The CHAIRMAN said that the question raised by the Norwegian delegate on consideration of the budget total came within the competence of the Committee in its advisory capacity, but he suggested that such consideration should be postponed until a scrutiny had been made of the budget proposals.

(11) Agreed.

**CHAPTER 1: EDUCATION** (document 8C/5)

(12) The CHAIRMAN suggested that the Deputy Director of the Department of Education should be asked to give a brief account of what the department was proposing to do and that members of the Committee should then be asked to comment generally on his statement. Following this general discussion, the Committee would discuss each proposal in detail.

(13) Agreed.

(14) Mr. GUITON (Deputy Director, Department of Education) first drew the Committee's attention to document 8C/5 Corr., page 7, which contained a correction to the chapter on education, paragraph 94 (English text only). He went on to describe the broad outline of the education programme, in the light of the explanations given by the Assistant Director-General on the sub-division of each chapter into two main sections: general activities and special activities. In the previous programme, a distinction had been made between general activities, which were grouped under the heading "improvement of education through the exchange of information", and activities relating to "extension of education". That distinction had been discontinued, as being purely artificial: exchange of information was necessary to the extension of education no less than to its improvement. In the programme for 1953-54 two separate aims had been assigned to special activities: extension of education and education for living in a world community. That arrangement had been somewhat illogical and had done little to assist co-ordination between different projects undertaken in pursuit of both these aims. Fundamental education, for instance, seemed to be treated as a matter apart from education for living in a world community. Adult education appeared to relate exclusively to the first aim, and work with youth to the second. Such a separation was in line neither with Unesco's chief concerns nor with educational practice. In Article 26 of the Universal Declaration of Human Rights, the one aim prescribed (that laid down in paragraph 2) was the extension and improvement of education so as to promote international understanding and co-operation. In the proposed programme for 1955-56, which had been planned with that sole aim in view, the only distinction made was between two forms of education: pre-school and school education on the one hand, and education out of school on the other. In each of these two sections, mention was made of long-term objectives and short-term objectives (1955-56).

(15) The budget estimates for general activities - about $700,000 - amounted to one-fifth of the total sum provided for education, and a little over a quarter of the estimates for special activities. The latter included, in each of the above-mentioned fields of action, an important project the cost of which was estimated at about a million dollars for the two years: development and improvement of school systems, and fundamental education.

(16) The CHAIRMAN congratulated the Secretariat on the clear presentation of document 8C/5. In the absence of a member of the Executive Board at the Committee's meeting, he drew attention to a general remark by the Board in paragraph 11 of document 8C/5 Add. 1 and suggested that a member of the Board might be asked to enlarge on it at a later date. He called for observations on Chapter 1 as a whole.

(17) Mr. LEE (United States of America) praised the Secretariat for its presentation of Chapter 1. He thought that the projects to be included or excluded were also commendable and welcomed the emphasis given in the document to the programme on education.

(18) He drew the attention of the Committee to the fact that a meeting was at present taking place in Paris on the question of education for international understanding and co-operation for living in a world community and wondered whether the Committee would not be well advised to postpone decisions on the question until it was seen whether any decisions were taken on it in Paris.

(19) Mr. MAHEU (Assistant Director-General) said that the Secretariat hoped soon to receive the report of the Committee of Experts which was then meeting in Paris. However, that report could not reach Montevideo before 11 November. The Committee could therefore decide either to postpone consideration of that particular question or to have a preliminary discussion, subject to a more detailed study in the light of the experts' recommendations.

(20) The CHAIRMAN suggested that the Committee should proceed with its examination of the question, reserving the right to return to it if necessary.

(21) Mr. JUNANKAR (India) welcomed the introduction to the chapter given by Mr. Guiton. It expressed clearly and categorically what he himself had tried to say that morning. He had not intended that Unesco should be a super Ministry of Education nor had he meant to suggest that Member States should sit back and expect Unesco to do their work for them. He had meant that Unesco should act as a catalyst, that it should give help to all Member States when required and that it should popularize the Declaration of Human Rights by implementing it.

(22) In his opinion, Chapter 1 was sound in principle. If it could be effectively carried out, great progress would be made. He welcomed the scheme for assisting national fundamental education centres. With regard to the subvention to the International Association of Universities, he understood that members were recruited from individual universities and wondered whether it would not be better to grant a subvention to an association which recruited members from assimilated bodies.

(23) The CHAIRMAN asked Mr. Junankar to remind the Committee of this point when the projects were discussed in detail.

(24) Mr. AVIDOR (Israel) thought that the terms "in school" and "out of school" were not sufficiently precise and asked whether the term "school-age education" could not be substituted for the term "in school".

(25) Mr. MAHEU (Assistant Director-General) pointed out that fundamental education was also intended for school-age children who had no opportunity of attending school. In that case, education was "out of school" for school-age children. In his opinion, it was very difficult to work out an entirely satisfactory terminology.

(26) The CHAIRMAN appreciated the preoccupation of the delegate of Israel and suggested that the Secretariat should be asked to bear in mind that greater precision in terminology would make for greater understanding by Member States.

(27) Mr. CABOUAT (France) stated that the French delegation was satisfied with the efforts made by Unesco for the promotion of co-operation with non-governmental organizations. He noted that the subventions in the Education chapter had increased from $32,000 in 1954 to $103,500 in 1955 and in 1956. Mr. Cabouat thought, however, that international and even national associations of teachers could play a yet more important part in the implementation of Unesco's programme. The French Government noted with satisfaction that Unesco proposed to continue its subventions to the Institutes for Education and for Youth in Germany, which were also receiving financial support from France. Mr. Cabouat thought the time had come to make those institutes effective instruments of international co-operation by granting them the necessary assistance. The French delegation was satisfied with the programme submitted, in so far as fundamental education was concerned. In regard to the International Advisory Committee on the School Curriculum, that body's responsibilities should be more clearly defined, and in that connexion use might be made of the example offered by the International Advisory Committee on Research in the Natural Sciences programme. Mr. Cabouat reminded the meeting that in the morning he had already explained his delegation's opinion with regard to education for international understanding. The French delegation intended to ask for larger funds to be allocated, particularly for the promotion of co-operation with youth movements, trade unions and teachers.

(28) There being no further comments of a general nature on Chapter 1 of document 8C/5, the CHAIRMAN proposed that the Committee proceed to a detailed study of the contents of the Chapter.

Project 1.11 (document 8C/5)

(29) The CHAIRMAN called upon Mr. Guiton for introductory remarks.

(30) Mr. GUITON (Deputy Director, Department of Education) mentioned that document 8C/PRG/19, which was to be distributed very shortly, contained a detailed account of the financial situation of Unesco's Institutes in Germany.

(31) The CHAIRMAN called for comments on paragraphs 15-19.

(32) Mr. BOW (Canada) remarked that from the document it appeared that there had been no clear evaluation of the comparative values of projects as a whole or as between the various chapters of the programme. After consideration of the programme and budget as a whole, the Canadian Government would like to see a priority allocated to each project in each chapter. Such an allocation would be of great assistance to the General Conference in making decisions on the various projects. The indispensable integration between departments and the chapters of the programme made it necessary to co-ordinate the programme carefully.

(33) The project under discussion provided an example of a lack of evaluation and of the need to allocate a priority. The Canadian Government had no clear conception of the value of each project and was unable to make any considered decision with regard to them. Criteria existed for the allocation of subventions, one of which was that an organization should be truly international in character. The Canadian Government had misgivings about the truly international character of some of the organizations to which it was proposed to grant subventions. While realizing the limitations of the Secretariat in the matter of its programme and budget, he wondered whether the criteria used were always satisfied and whether the proposed activities were of immediate value to Unesco in the field of international understanding. In each case, full consideration should be given to whether the organization in question met the established criteria.

(34) The CHAIRMAN said that the two questions now raised were whether or not the Committee thought it would be desirable to allocate priorities to the various projects and what were the present criteria governing the allocation of subventions. With regard to the first question, he thought that a useful purpose might be served if the Committee allocated priorities to the different projects, though only experience would tell whether a system of priorities was practicable. The second question might be answered by asking for information from the Secretariat during the detailed discussion of each project.

(35) Mr. MAHEU (Assistant Director-General) thought that the delegate of Canada had raised two important questions of general interest. With regard to the desired justification, he pointed out that delegates would find in the Director-General's Report for 1953-54 precise information on the assistance the organizations receiving subventions had given Unesco in the execution of its programme, and in document 8C/ADM/20, full particulars regarding each of the organizations - its membership, headquarters, aims, amount of the subventions granted and use made of those subventions. The latter document was intended mainly to assist the discussion of item 9.6.2 of the agenda: quadrennial review by the Executive Board of the employment of subventions (1950-53). The Secretariat could also supply delegates with additional information on any particular organization. The Joint Committee of International Teachers' Federations, which had just been mentioned, was a confederation of several international organizations with a total of four million members from all parts of the world.

(36) In regard to the question of priorities, the Assistant Director-General thought it impossible to take a decision during the first examination of the projects. The Committee could reject projects which it considered unsatisfactory, but it could not assess the relative value of each project until it had studied the whole programme.

(37) The CHAIRMAN thought that the suggestion of the Assistant Director-General was wise and provided the only practicable solution. At the end of its detailed discussion, the Committee should recommend projects for higher or less high priority.

(38) Mr. BOW (Canada) said that, as the Committee would be unable to allocate priority by evaluation, the suggestion of the Assistant Director-General would meet his point. The Canadian Government felt that a grading of priorities should be a standard operation.
(39) The introduction to document 8C/ADM/20 provided an example of the point he had made with regard to subventions and criteria. It showed that the criteria were very wide and ambiguous and that it would be very difficult to decide the value and nature of an organization. The wording of the document was ambiguous and vague. He also wondered if attention was being paid to whether certain non-governmental organizations would gradually become self-supporting.

(40) Mr. SOMMERFELT (Norway) was of the opinion that the term "international" should not be used. Unesco might be interested in putting forward ideas in a certain part of the world and might want to assist an organization to put forward those ideas although that organization was not of an international nature. That had happened in the case of the Unesco institutes in Germany.

(41) The CHAIRMAN asked the Assistant Director-General to remind the Committee of the general policy on criteria.

(42) Mr. MAHEU (Assistant Director-General) said that the Administrative Commission had to consider, under item 9.6.2. of the agenda, the employment of subventions during the past four years, and also, under item 9.6.3, the directives concerning relations with international non-governmental organizations. That question had already been given most careful consideration at two sessions of the Executive Board. He thought that the members of the Committee would wish to study those documents and take them into account during their discussions.
With regard to the criteria governing the allocation of subventions, the Assistant Director-General said that, for the first time, the membership of the organizations receiving subventions was indicated in the proposed programme and budget. It was therefore possible to ascertain their international character. The second criterion concerned the services rendered to Unesco, either directly, or because the activities of the organization in question made it unnecessary for Unesco to take action in a particular field. With regard to the incomes of the organizations, he felt sure that many private associations of intellectuals giving valuable assistance to Unesco would never be entirely self-supporting. Any reduction in the subventions they received from Unesco would be liable to destroy their efficiency and Unesco would, in the long run, have nothing to gain from taking such a decision. Admittedly, some organizations were better endowed, but it has to be remembered that, apart from any consideration of financial needs, the Constitution expressly stated that Unesco should encourage co-operation among the nations in all branches of intellectual activity.
The Assistant Director-General thought that the Secretariat had scrupulously applied the criteria in force and that it was for the Administrative Commission and not for the Committee to consider whether they should be altered. Lastly, he said that the Secretariat had reached the conclusion that, for a subvention to be effective, it should amount to at least $2,000; any smaller sum was liable to have no more than a token value.

(43) The CHAIRMAN said that the remarks of the Assistant Director-General were very useful and that, as it would be impossible for the Committee to go through document 8C/ADM/20, he suggested that discussion should be resumed.

(44) Mr. SECCO ELLAURI (Uruguay) said that, in connexion with the allocation of subventions, a distinction had to be made between the criterion adopted for the award of subventions and the application of that criterion. The criterion might be satisfactory but its application unsatisfactory. As had been explained by the Assistant Director-General, there was a criterion according to which subventions could be granted to organizations that had a spiritual kinship with Unesco and were engaged in activities in keeping with its universal character. Organizations covering only regional or national fields of interest to Unesco were also included in that criterion and deserved to be granted subventions.
(45) There was yet another criterion, enabling subventions to be granted to institutions through which Unesco put its programme into effect at less expense than it would do by carrying out the activities itself. The aim here was to lighten Unesco's task and to organize its work more efficiently and economically.
(46) A danger that might arise out of the Canadian delegate's proposal was that subventions might be granted and later withdrawn. Subventions should be allocated for a sufficient length of time if they were to yield useful results for Unesco. It was unthinkable that any State should withdraw subventions from the concessionnaire of any service so long as that service was maintained.
(47) Another matter for consideration was the application of the criterion to existing situations. It was the Committee's responsibility to exercise financial supervision and, with the utmost vigilance, to ensure that the sums granted were used in accordance with the criterion governing each particular case.

(48) Miss LAISE (United States of America) shared the opinion of the Canadian delegate on the question of the method used to determine projects for the programme and suggested that the Committee should call the attention of the Director-General to their dissatisfaction on this point and express the wish that he should institute a work programme which would eliminate projects shown by the value of their past activities to be unproductive, and which would advise governments on the usefulness of projects. The United Nations had instituted a committee to undertake such a task and on its basis the Secretary-General had made constructive proposals to the Economic and Social Council for eliminating activities and rationalizing work in the economic and social fields. That initiative had been welcomed by governments. It should be possible for Unesco to make a similar self-evaluation. She concluded by asking whether it was to be assumed that all the organizations

to which it was proposed to give subventions were above mediocrity level.

(49) Mr. MAHEU (Assistant Director-General) after replying in the affirmative to Miss Laise's last question, said that he could not help being a little alarmed by the remarks of the United States delegate. The Economic and Social Council had indeed taken action to lighten work connected with reports and documentary studies, but it had taken no decisions concerning subventions. Furthermore, as the delegate of France had pointed out at the morning meeting, Unesco was bound, under its Constitution, to encourage co-operation among the nations in all branches of intellectual activity. The award of subventions had proved one of the least costly ways of taking action in that respect. The Economic and Social Council had, of course, granted priority to the development of the underdeveloped countries. The General Conference of Unesco, at its last session, had also recognized that priority, and the Secretariat had endeavoured to maintain it in the proposed programme. But the speaker questioned whether there was any ground for supposing that greater assistance would be given to the underdeveloped countries by abolishing or reducing subventions to international organizations. On the contrary, he thought that one of the best services that could be rendered to the underdeveloped countries was to make use of subventions - many of them small - for the purpose of bringing together intellectuals of these countries, who were only too often working in isolation and encouraging them to join the large existing organizations. It might even be possible to make more systematic and widespread use of subventions to help intellectuals in the underdeveloped countries to attend international congresses of specialists. Thus, any proposal to reduce subventions would run counter to Unesco's aims. As the whole question of subventions was to be considered by the Administrative Commission, it seemed a little rash for the Committee to put forward any recommendations at that stage.

(50) The CHAIRMAN pointed out that, although it might not be inappropriate for the Committee to make recommendations to the Administrative Commission on the question of subventions, it would be better to discuss such recommendations after a detailed study of the programme.

(51) Mr. AVIDOR (Israel) proposed that the discussion should be postponed in order that members of the Committee might study document 8C/ADM/20. He proposed that the Committee should proceed to discuss the programme item by item.

(52) Miss LAISE (United States of America) said that she was willing to postpone discussion if the Committee would agree to come back to this point later.

Paragraphs 20-22 - Chapter 1 of document 8C/5

(53) No comments.

Paragraphs 23-25 - Chapter 1 of document 8C/5

(54) Miss LAISE (United States of America) suggested that, to speed up work, the Committee should consider the section as a whole up to and including paragraph 62.

(55) In reply to a question from Mr. AVIDOR (Israel), Mr. GUITON (Deputy Director, Department of Education) explained that the International Federation of Organizations for School Correspondence and Exchanges was carrying out work which would devolve upon Unesco if the Federation did not exist. The sum of $3,000 allocated to it did not reflect the value of the services rendered, but indicated the importance Unesco attached to them.

(56) The CHAIRMAN wondered whether the payment involved here was not rather by way of contract.

(57) Mr. GUITON (Deputy Director, Department of Education) said that it was sometimes difficult to distinguish between a special service requested of an organization that was engaged in many other activities and services rendered by an organization that existed for a single purpose. In the case under consideration, a subvention seemed to be involved.

(58) Mr. RAO (Acting Chief, Bureau of Programme and Budget) pointed out that, at its seventh session, the General Conference had asked the Director-General to keep funds for subventions and contracts separate. Subventions were given to non-governmental organizations to carry out programmes of their own which were of interest to Unesco, whereas contracts were placed with organizations to do specific work for and on behalf of Unesco.

(59) Mr. SILLER (Mexico) enquired whether the subvention under discussion fell under the heading of contracts.

(60) Mr. MAHEU (Assistant Director-General) explained that the subvention contributed towards the general expenses of the Federation's work. IFOSCE was an organization performing useful work in a field of interest to Unesco.

(61) Mr. SOMMERFELT (Norway), referring to paragraphs 45-47 of Chapter 1 of document 8C/5, concerning the International Association of Universities, asked whether the subvention of 14,000 dollars was the amount requested by the Association and whether the Association was satisfied with the amount.

(62) Mr. GUITON (Deputy Director, Department of Education) thought that the organization in question was satisfied.

(63) Mr. MAHEU (Assistant Director-General) said that organizations usually asked for more than they finally received. In the case under consideration, the amount proposed seemed to be a reasonable compromise between the amount requested and Unesco's resources.

(64) Speaking as delegate of Australia, the CHAIRMAN

wished to know why the Secretariat proposed the same subventions for each of the years 1955 and 1956, whilst paragraph 47 stated that the General Conference of the Association would involve additional expenditure.

(65) Mr. MAHEU (Assistant Director-General) explained that the conference would be held in 1955, but its proceedings would not be published until 1956. If necessary, a transfer would be made from one year to the next, in accordance with the financial regulations in force.

(66) Miss LAISE (United States of America) considered that throughout the section no new subventions were justified, and moved that, with the exception of the subvention for the Unesco institutes in Germany, proposals for the granting of new subventions should be suppressed.

(67) Mr. MAHEU (Assistant Director-General) said that Miss Laise's suggestion amounted to a request to maintain the status quo within each Department in the matter of subventions. The different Departments had not, however, all developed their subventions policy at the same pace. Some, like the Natural Sciences Department, had resorted extensively to that method from the outset. The Department of Education, on the contrary, had lagged behind in that respect. The Director-General had thought it advisable gradually to alter the situation, as it would be regrettable to have fewer contacts with teachers than with scientists. The Secretariat proposed accordingly to allocate to the Joint Committee of International Teachers' Federations an annual subvention of $2,000, equal to that granted to the World Confederation of Organizations of the Teaching Profession.

(68) Miss LAISE (United States of America) recalled that she had said no new subventions except in the case of the Unesco institutes in Germany. If the principle of selection was to be followed, it would have to take into consideration the overall need. Available information did not justify taking on new subventions. The question was not one of justice but of obtaining the best results.

(69) The CHAIRMAN said that the United States proposal was to suppress the subventions proposed in paragraphs 34, 37, 40 and 54 of Chapter 1 of document 8C/5.

(70) Mr. CABOUAT (France) noted that the United States delegation's proposal was that no new subventions should be granted to organizations, even though they were serving the main purposes of Unesco. In the case under consideration, there were two organizations which, although they were pursuing similar aims, would be given different treatment, if Miss Laise's proposal were adopted.

(71) Miss LAISE (United States of America) said that it was really a matter of criteria. No new subventions should be allocated unless there was adequate justification for them. It appeared that there was no real justification in the two cases mentioned, either because they did not offer the best method of carrying out the work or because their work duplicated or overlapped that of other organizations already receiving subventions.

(72) Mr. CABOUAT (France) supposed that the Secretariat had acted on information justifying the new subventions proposed.

(73) Mr. GUITON (Deputy Director, Department of Education) pointed out the difficulty of ascertaining which were the really specialized organizations in the field of education. There were, of course, large numbers of groups having some concern with education. The Secretariat had considered it essential to keep in close touch with teachers and particularly with those responsible for adult education. It had thought it necessary to recognize the services rendered to Unesco by the International Federation of Children's Communities, whose work lay in a field in which Unesco had, at the outset, taken a special interest. Lastly, the International Association of Vocational Guidance was in a position to give valuable assistance in connexion with development of the underdeveloped countries.

(74) Mr. BOW (Canada) seconded the United States motion. He had found the discussion very interesting as it had illustrated the vagueness with which subventions were allocated. It was for this reason that he supported the motion.

(75) Mr. CABOUAT (France) presumed that the programme was the outcome of detailed study; it had already been twice considered by the Executive Board. He thought it premature to take an immediate decision on Miss Laise's proposal. He himself would vote against that proposal, and he regretted that a vote should be taken in such circumstances.

(76) The CHAIRMAN said that the decision lay with the Committee. If the United States delegate did not withdraw her motion, he would put to the vote that the Committee should recommend in its report that the proposals for subventions contained in paragraphs 34, 37, 40 and 54 should be suppressed.

(77) Miss LAISE (United States of America) in reply to the French delegate, said that she was prepared to postpone bringing her motion to the vote until later.

(78) Mr. CABOUAT (France) enquired whether the adoption of Miss Laise's proposal should be interpreted as a decision of principle, applicable to all chapters of the programme. No specific criticism had actually been levelled against any particular organization.

(79) The CHAIRMAN explained that the motion put forward by the United States delegate referred only to the four subventions contained in paragraphs 34, 37, 40 and 54 of Chapter 1 of document 8C/5.

(80) Mr. JUNANKAR (India) reminded the Committee that the whole question of subventions was to be discussed by another body.

(81) The CHAIRMAN put to the vote the United States motion, which was rejected by 2 votes in favour, 6 against and 1 abstention.

(82) Mr. SECCO ELLAURI (Uruguay) thought that proposals such as that put forward by the United States representative should be accompanied by figures showing the cost involved in the previous and present budgets and the financial repercussions of acceptance or rejection of the proposal. All such suggestions should be assessed in that way, so that their financial importance could be more clearly realized.

(83) Mr. MAHEU (Assistant Director-General) reminded the Committee that a general table of proposed subventions was contained in Annex I of the Proposed Programme and Budget.

(84) He agreed with Mr. Secco Ellauri that any new proposal should be accompanied by exact figures showing its budgetary repercussions.

The meeting rose at 6.30 p. m.

# THIRD MEETING

*2 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION (continued)**

(1) The CHAIRMAN welcomed the delegates of Indonesia and the United Kingdom, and asked Mr. Maheu to reply to some of the questions put by members of the Committee the previous afternoon.

(2) Mr. MAHEU (Assistant Director-General) said that he would not attempt to reply forthwith to the points raised the day before by various delegations concerning the proposed programme and budget. He would prefer to give explanations of concrete cases when they arose during consideration of the document, so as to make it clear, for instance, that the difference between the present and higher budget levels was not based on any idea of priorities and to show how the Director-General had intended Sections I and II to be closely linked and carefully balanced. Of the five specific points raised by the United States delegation, the first four were answered in a document then being distributed. Information on the fifth had been requested in Paris.

(3) He also drew attention to document 8C/PRG/21, containing the observations of non-governmental organizations having consultative status with Unesco on the proposed programme for 1955-56. It was the first time that those organizations had been so closely associated by the Director-General in the preparation of the programme; their representatives had been convened to two meetings, one at an early stage in the drafting of the programme, and the other in September last, when the programme had reached its final stage; the document before the Conference was the report of the latter meeting.

(4) In conclusion, the Assistant Director-General proposed, as an experiment, discussing fundamental education projects irrespective of the programme chapter in which they were included (Education, Social Sciences, Cultural Activities, Mass Communication, Exchange of Persons). That method would bring out the close interdependence of the programme chapters. Of course, after discussing the fundamental education projects as a whole, each would be taken up in its appropriate chapter, so as not to interfere with the inner cohesion of each of the programme chapters. The Assistant Director-General emphasized that it would be an experiment, an exceptional measure, but one worth trying out.

(5) With reference to document 8C/PRG/21, containing the observations of non-governmental organizations on the draft programme, the CHAIRMAN asked the Secretary to draw the Committee's attention to points relating specifically to subjects under discussion, as they arose, and also to inform the meeting of any comments made on them by the Executive Board. He fully supported the proposal by the Assistant Director-General that the projects on Fundamental Education should be followed through the various chapters of the budget document and requested the Secretariat to prepare a document showing the points which would have to be taken up.

(6) The Chairman opened the discussion of Project 1.12: Clearing House and Advisory Services. He asked the Committee whether it would address its remarks to the project as a whole, or whether it would prefer to split it up into its three sections: the introduction and section A; section B; section C.

(7) Mr. BOW (Canada) asked for a fuller explanation of the proposed expenditure shown under higher level estimates in paragraph 63.

(8) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that this expenditure referred to staff costs. It was not possible to distinguish

between staff time on the present, and on the higher budgetary levels, but a certain part of staff costs had been attributed to the latter.

(9) Mr. ARTHUR (United Kingdom) drew attention to paragraph 402, where two additional posts were mentioned, and asked whether it was to be inferred that they were in the higher level.

(10) Mr. RAO (Acting Head, Bureau of Programme and Budget) referred to the staff tables given in paragraphs 411-414. An attempt had been made to attribute a certain percentage of staff time to the present level, and another to the higher.
(11) The two additional posts mentioned were without reference to the budgetary level. Throughout the document as a whole 10% of staff time had been attributed to the higher level.

(12) Mr. ELVIN (Director, Department of Education) pointed out that there were projects in the higher budgetary level elsewhere in the Chapter which, if accepted, would have to be serviced by the clearing house.

(13) Mr. AVIDOR (Israel) wished to know how any savings on staff could be effected if the higher level were not adopted.

(14) Mr. ARTHUR (United Kingdom) found it difficult to see how, if the higher level were not voted, 10% of a staff member could be dismissed.

(15) Mr. RAO (Acting Chief, Bureau of Programme and Budget) was glad that point had been raised. When the Conference had finished examining the programme and budget, there would not be a present and a higher level budget but only one integrated budget. Whatever reductions in the proposed staff posts might be necessary, they could not be foreseen until that stage had been reached.

(16) Project 1.12 was approved.

(17) The CHAIRMAN opened discussion of project 1.21, the development and improvement of school systems and school teaching (paragraphs 112 to 142), and asked Mr. Elvin to introduce the subject.

(18) Mr. ELVIN (Director, Department of Education) said that the Director-General had felt it was time that Unesco, so often asked to encourage a particular branch of studies, looked into the balance of the work of schoolchildren as a whole.

(19) Mr. LEE (United States of America) said that his delegation regarded this section as one of the most important of the entire programme. It was essential that the Director-General should know the views of the delegations on the way in which the three resolutions should be carried out.
(20) The United States delegation had some criticisms to offer with regard to terminology, procedures and subjects for international conferences, which were too broad in scope.
(21) He suggested that Member States or groups of Member States should be invited to take more resolute measures to help themselves, by making long-range plans and setting schedules for the achievement of specific goals, with sufficient precision for the Director-General to take them into account as criteria in his extension of assistance.

(22) The CHAIRMAN asked for further comments of a general nature on the section under discussion.

(23) Mr. BOW (Canada) agreed with the remarks by Mr. Lee but was opposed to the implication in the draft budget that technical aid to Member States could only be given if the higher budgetary level were adopted.

(24) Mr. MAHEU (Assistant Director-General) thought that an exchange of views would be more useful when sections B and C were being discussed, but he could forthwith assure the United States delegate that the Secretariat shared his views on the substance of the problem and thought that international assistance should not relieve States of the need for taking action at the national level. International action was intended to supplement, promote and co-ordinate national activities, but not to take their place, and the more carefully those activities were planned, the easier it would be to integrate international action with them. Speaking to the delegate of Canada, the Assistant Director-General explained that it was along those lines that the Secretariat had planned s technical aid to Member States, auxiliary action pending on proper planning. That was the very reason why that project had been shown under the higher budgetary level, like all other technical aid activities, which accounted for 60% of that level. The project had been placed on that level, not because of its degree of importance but because it presuppose planning. The distinction thus established was purely one of logic. That also was why the first two resolutions had been placed on the present level and the third on the higher budgetary level. The question of priorities was entirely unaffected and the Assistant Director-General pointed out in that connexion that the Canadian delegate's question had been answered by the United States delegate, when he had expressed the view that all the activities in question should be given priority, though he might subsequently indicate which projects he regarded as less important.

(25) Mr. ARTHUR (United Kingdom) had understood that the idea of dividing the programme into two budgetary levels had been adopted in order to avoid the difficult task of deciding what to cut out, if a lower budget were voted. In that case, items on the higher level could be disposed of, and the Conference would still have a complete programme before it. But if, once again, the programme, on a higher or lower budgetary level, was to form an integrated whole, it would be faced with the same problem as in the past. The United Kingdom approved the plan formulated by the Assistant Director-General, of dividing the programme into three sections: continuing services, special activities carried out by Unesco, and technical aid to Member States, but maintained that the division should not be tied to present and higher budgetary levels as they had been.

(26) The CHAIRMAN stressed the importance of that point, which would have a bearing on the discussions of the next ten days.

(27) Mr. MAHEU (Assistant Director-General) reminded the meeting that in the United Kingdom delegate's absence he had set forth the Director-General's views in his introductory statement and tried to show along what lines the latter had planned his programme; he had also drawn attention to the fact that the Executive Board had unanimously approved that stand and had regarded it as a perfectly sound interpretation of the General Conference's instructions. According to the Director-General, the programme was a single whole; the two budget levels did not correspond to different degrees of priority. Consequently, if the budget passed by the General Conference should happen to be below the Director-General's total reductions (i.e. total of the two budgetary levels) and if it were therefore found necessary to cut the programme, such cuts could not be automatically made at the higher level. Admittedly, that concept was opposed to the view adopted for the 1953-54 programme, according to which the higher level carried priority B. But that did not mean that the Director-General had misinterpreted the intentions of the working party set up by the General Conference at its seventh session to study the future programme and development of Unesco. Far from it. Indeed, when selecting certain items which might be adopted if the budget were increased, the working party had clearly chosen the most important projects, those that would be given super-priority. The Director-General, in declaring that the projects on the higher level were at least as important as the others, had thus been true to the spirit of the working party's report. The General Conference and the Committee would no doubt be obliged to make a choice; if, however, they were not given a chance of making a choice and using their discretion, they might rightly feel that they had been faced with an accomplished fact. It was out of deference to the General Conference and, more especially its Advisory Committee on Programme and Budget, that the Director-General had made a point of granting them greater latitude for establishing the priorities to be given to the various projects at the two budgetary levels.

(28) The CHAIRMAN considered that a discussion of the theoretical question arising out of a difference of interpretation between the United Kingdom delegation on the one hand, and the Director-General and the Executive Board on the other, would not be fruitful at that stage. The Committee would have to propose its own order of priorities. He suggested that it should first commend certain activities and draw attention to those that were less useful, and then go over the programme again in order to eliminate some of them, if necessary.

(29) Mr. ARTHUR (United Kingdom) wanted to know, if the programme was looked upon as a whole, what was the point of dividing it into present and higher levels at all.

(30) Mr. MAHEU (Assistant Director-General) reminded the meeting that, whilst the Conference had requested the Director-General to draw a distinction between two budgetary levels, it was nowhere said that those levels had to correspond to different degrees of priority. However, a reading of the working party's report showed that the higher level had been reserved for the most important projects. For his part, Mr. Maheu did not see why an expansion of the programme should consist exclusively of secondary projects. For all those reasons, he felt justified in saying that the Director-General, faced with ambiguous instructions, had acted perfectly correctly.

(31) The CHAIRMAN thought it logical that, if the budget were voted at the present level, the projects actually adopted should be those put forward by the Director-General at the lower level.

(32) Mr. MAHEU (Assistant Director-General) emphasized that, in any case, the Committee had to make some choice, and, as the competent authority, to establish priorities which it was not for the Secretariat to prejudge, the main function of the General Conference being precisely to discuss the programme. Apart from the Director-General's proposals, delegations had put forward proposals; 33 draft resolutions had already been submitted and there would surely be others. It was for the Committee to assess their merits, and the Assistant Director-General saw no reason why such an assessment should not be extended to include the entire programme. If the higher budget were not adopted by the General Conference, the Director-General would still be entitled to propose cuts in order to help the Committee, but only at the end and in the light of the discussions of the Programme and Budget Commission; any such proposals would bear upon both budget levels.

(33) Miss LAISE (United States of America) proposed that, since it was difficult to evaluate priorities in the General Conference, the Committee should facilitate Conference action by making recommendations on what might be given priority if the present budgetary level were adopted. The Secretariat could then be asked to formulate specific proposals in figures.

(34) Mr. MAHEU (Assistant Director-General) thought that that was the only proper way to proceed. During its preliminary discussion, the Committee could already indicate what it considered important without taking a final decision. Only on completion of that preliminary discussion and discussion of the draft resolutions submitted by delegations - could the Committee put forward recommendations concerning the relative priorities of projects in the programme. The Secretariat was naturally at the Committee's disposal to assess the budgetary repercussions of its evaluation of the various parts of the programme. It would be dangerous to go further.

(35) Mr. AVIDOR (Israel) supported the proposal. There might be other possibilities, besides the present or higher level budgets.

(36) Mr. JUNANKAR (India) agreed that it would be wrong to prejudge the budgetary level at that stage.

(37) Mr. CABOUAT (France) said that the French delegation's interpretation of the two budgetary levels was roughly the same as that of the United Kingdom delegate, and that it proposed to ask for some projects to be transferred from one category to the other, thus linking the idea of priority with that of level. However, in view of what had been said, Mr. Cabouat, on behalf of the French delegation, supported the Israeli delegate's view. Speaking as Rapporteur, he hoped that the report would include all the factors which would enable them to form an opinion on the relative importance of projects.

(38) The CHAIRMAN said that, as the Committee was agreed on the method of procedure, it would pursue the discussion of section A, paragraphs 137-142.

(39) Mr. LEE (United States of America) wished to convey the dissatisfaction of the Education officials of his country with the conduct of the international conferences convened by the International Bureau of Education. A great deal of time was wasted on formal discussion of matters that were well known, without anything very useful being achieved.

(40) The CHAIRMAN, speaking as Australian delegate, mentioned the suggestion by his delegation that reports on developments in Education should be made to the International Bureau of Education not yearly, but every two, three or four years, while reports from Member States on a specific aspect of education could be furnished in the interval, with more fruitful results. Could Mr. Elvin take this suggestion into account in his reply to the delegate of the United States of America?

(41) Mr. ELVIN (Director, Department of Education) reminded the meeting that the conferences were convened jointly by Unesco and the International Bureau of Education. He added that the conferences always considered a major and a minor topic of international importance, in addition to the reports of Member States. The suggestion by the Australian delegate would be studied by the next meeting of the joint committee of the two bodies.
(42) He suggested that the criticisms by the delegate of the United States of America referred perhaps to earlier conferences, since at the last meeting the United States participants had declared themselves satisfied with the improved arrangements made. The recommendations by those conferences were often considered platitudinous by countries which enjoyed an advanced system of education, but they were illuminating for the less fortunate in this respect. Many countries had made plans for educational development after the conferences. However imperfect, Mr. Elvin felt there had been a marked improvement in these conferences.

(43) Mr. LEE (United States of America) thought that the Conference should change from a reporting to a working conference.

(44) The CHAIRMAN enquired whether the delegate of the United States of America wished his remarks to appear in the report or in the records only.

(45) Mr. SILLER (Mexico) asked for more information. He gathered that the 1951 Conference on Public Education had dealt with general problems concerning the extension of school education, the 1952 Conference with equal access of girls and women to education, the 1953 Conference with the training and status of primary school teachers, and the 1954 Conference with the problem of secondary school teachers. He wished to know if he had been correctly informed.

(46) Mr. ELVIN (Director, Department of Education) said that the main subject at each of the conferences had been connected with the extension of school education.

(47) Mr. SILLER (Mexico) thanked Mr. Elvin and said that he had regarded the work of the International Conference on Public Education as consisting mainly in the submission of official reports on the progress made in education in the various States.

(48) Mr. ARTHUR (United Kingdom) agreed that the conferences had improved considerably and considered that much of the United States criticism had been met. Their value lay not so much in the resolutions as in the work that went into the making of them.

(49) The CHAIRMAN asked the Rapporteur to include some references to the foregoing remarks by members of the committee.

(50) Mr. CABOUAT (France) speaking as Rapporteur, thought that the report should mention the United Kingdom delegate's view that some working methods had improved, and the hope expressed by the United States delegate that the conferences would to an increasing extent become working conferences instead of meetings where reports were heard on the situation in various countries.

(51) Section A was adopted.

Section B (paragraphs 143-146)

(52) Mr. MAHEU (Assistant Director-General) pointed out that the Executive Board's attitude was clear; it had voted for the principle underlying project B, and had also considered that the form it might take should depend on whether it could be carried out. He explained that the United Nations had an important project for setting up a special Economic Development Fund, which could be partly used for educational development. The representative of the Secretary-General of the United Nations would no doubt have an opportunity to lay this matter before the General Conference. But, though it seemed very unlikely that the project could be carried into effect in the near future, it was quite possible that other forms of assistance might be put into operation before very long. Detailed measures were already under consideration. The situation might be expressed as follows: Unesco had gone as far as it could with technical studies and the publicizing of information. In addition, technical aid was provided for States requesting it, but experience had shown that shortage of funds was essentially the obstacle to the development of education in the underdeveloped countries.

Expert advice would not solve the problem; hence the idea of setting up a special international fund to assist countries which lacked the resources necessary for that purpose. Should the United Nations fund or other forms of direct assistance materialize in the near future, Unesco would gladly drop its plan for an International Educational Fund, but the Director-General wondered whether the Organization should continue large-scale propaganda in favour of primary education if there was no chance of adequate international financial support. It was a matter of deep concern to him, for hopes might be raised only to be bitterly disappointed. Mr. Maheu concluded by saying that the project which the Director-General was submitting to the General Conference was essentially a political and moral question.

(53) Mr. JUNANKAR (India) agreed with Mr. Maheu that the crucial question at the basis of the entire project was that of financial resources. The proposed international fund could be the pivot of the education programme. It had been adopted by the first conference of the Indian National Commission, in January.

(54) Mr. Maheu had put a difficult question: if you raise hopes and cannot fulfil them, what happens? It was desirable, whatever the response, to focus attention on the problem. Public opinion must be mobilized by means of an intelligent campaign.

(55) Mr. LEE (United States of America) agreed that the matter was of the highest importance, but regretted to find a small work plan proposed for such an important problem.

(56) Mr. MAHEU (Assistant Director-General) explained that the proposal under discussion was to consider, in conjunction with the United Nations, the possibility and expediency of setting up an Educational Development Fund and not to raise the fund itself. A report would be submitted to the next session of the General Conference which would thus have more precise and detailed proposals before it.

(57) Mr. ARTHUR (United Kingdom) supported the delegate of the United States of America on the question of the actual budgetary entry. What exactly was proposed to be done with the sums mentioned?

(58) Mr. ELVIN (Director, Department of Education) replied that the modest sum mentioned was intended for travel to the United Nations and its organs to spur them on to including education as an object of expenditure in any more general fund, and for a pamphlet to launch the idea. The question was whether Unesco should continue with that line of propaganda as a separate movement.

(59) Mr. MAHEU (Assistant Director-General) pointed out that comments by the Secretary-General of the United Nations and by certain Specialized Agencies on the Proposed Programme and Budget for 1955-56 were contained in document 8C/PRG/20. Annex II, reproducing a letter dated 15 September 1954 from the Secretary-General of the United Nations to the Director-General, established the link between Unesco's project and the project of the United Nations.

(60) Mr. AVIDOR (Israel) understood the budgetary difficulties, but, as a member of the committee, he would like to see a more forceful recommendation for the creation of such a fund.

(61) Mr. MAHEU (Assistant Director-General) sympathized with the Committee. The project was too important, even if planned to keep expenses down, to be reduced to a single paragraph in Unesco's programme, but the General Conference could express its views on the basis of a draft resolution. He believed the Indian delegation was preparing a proposal on the subject.

(62) The CHAIRMAN understood Mr. Maheu to propose that the report should put forward a text indicating the importance members of the Committee had attached to the proposal. He requested the Assistant Director-General to prepare a text for discussion, and opened the debate on section C, paragraphs 147-152.

(63) Mr. MAHEU (Assistant Director-General) thought that that project might afford an opportunity of giving effect to the general ideas previously expressed by the United States delegate. The primary purpose of a conference such as that proposed for Latin America might be to get Ministers of Education in that region to set realistic targets and frame detailed plans for development at the national level. Those plans would then be considered by Unesco at the international level and from the technical point of view. Once those conditions obtained, other countries might very well supply additional funds. A combination of these three methods - national action, international technical aid and assistance from other countries - would very possibly overcome the financial obstacle referred to earlier.

(64) Mr. ELVIN (Director, Department of Education) pointed out that this would be the third Regional Conference on Free and Compulsory Education convened by Unesco. At the end of 1952 there had been one in Bombay, another was to be held in two months' time in Cairo.

(65) Mr. ARTHUR (United Kingdom) wondered whether it would be wise to hold the Regional Conferences at such short intervals, and whether it would not be preferable to wait until practical results achieved by the previous ones had shown their value. He suggested that the proposed Regional Conference should be postponed until 1957 or 1958.

(66) Mr. MAHEU (Assistant Director-General) pointed out that, unless a different way could be found for dealing with the financial problem, he would be inclined to agree with the United Kingdom delegation. If the conference was to be a repetition of the one held in Bombay, it would probably be satisfactory from the technical angle, but, if no outside financial help were forthcoming, it seemed pointless to speed up a purely technical action. Furthermore, as the Organization of American States was intending to convene a conference of Ministers of Education, Unesco's failure to participate would hardly be understood. In conclusion, the Assistant Director-General

hoped that a new procedure, such as he had outlined, would emerge.

(67) Mr. LEE (United States of America) looked on the approach suggested by the Assistant Director-General as a far better solution of the question.

(68) Mr. MAHEU (Assistant Director-General), in view of the Committee's attitude towards project A (International Conference on Public Education) and project B (International Educational Development Fund), thought it necessary to maintain project C. He asked the United Kingdom delegate if he would be willing to withdraw his proposal for the postponement of a regional conference on free and compulsory education.

(69) Mr. AVIDOR (Israel) proposed a compromise: regional conferences should not take place too frequently. The Latin American Conference could be held in 1955 or 1956 and the African one in 1957.

(70) Mr. ELVIN (Director, Department of Education) remarked that, from the point of view of the region in which it was held, the Conference was always the first. Mr. Arthur had said that time was necessary in order to evaluate its usefulness. The results of the Bombay Conference could only be known until the financial question had been settled, but there were other effects, in particular those arising from a better acquaintance with the practice of neighbouring countries.

(71) Mr. SILLER (Mexico) pointed out that the Conference of Ministers of Foreign Affairs of the American countries would be meeting early in 1955. Although that meeting and the proposed regional conference on free and compulsory education in the Latin American States would be dealing with different subjects, he thought it would be advisable to hold the latter conference at the end of 1956 so as to leave as much time as possible between the two meetings.

(72) Mr. LEE (United States of America) referred back to section B. He wished to make certain that the resolution called for would be framed to give the Director-General authority and latitude, but without prejudging an answer.

(73) The CHAIRMAN replied that that was the type of draft text he and the Director-General had in mind. He asked whether the delegate of the United Kingdom could not withdraw his suggestion of delaying the proposed conference for a couple of years.

(74) Mr. ARTHUR (United Kingdom) would not press his point although he considered a delay would be wiser.

(75) Mr. JUNANKAR (India) saw no reason to refrain from holding a conference where it might be as useful as previous ones had been.

(76) Mr. ELVIN (Director, Department of Education) thought the meeting should recognize the fluidity of a position which developments in the next year (such as a Conference organized by the Latin American States) might modify. The item should be marked as neither a high nor a low priority one.

(77) Section C was adopted.

(78) The CHAIRMAN asked for a reference in the Committee's report to the views of the United States delegation on the type of conference to be held, and to the reservation made by the delegate of the United Kingdom.

Section D: paragraphs 153-159

(79) Mr. ELVIN (Director, Department of Education) introduced the section, saying that, in reply to a criticism made at the last General Conference, certain aspects of child development had been put in this section of the programme. He referred to the establishment in Thailand, in 1953-54, with considerable assistance from the Thai Government, of an Institute designed, firstly, to introduce this relatively new concept in that country and, secondly, to show Member States how methods could be successfully transferred from one country to another (document 8C/PRG/20).

(80) Mr. ARTHUR (United Kingdom), referring to paragraph 158, enquired how far the Secretariat had tried to discover what was at present being done to prevent overlapping.

(8) Mr. ELVIN (Director, Department of Education) replied that it was not Unesco's intention to embark on a new study, but to bring an international point of view to bear on subjects often well studied in depth.

(82) Section D was adopted.

Section E: paragraphs 160-162

(83) Mr. ELVIN (Director, Department of Education) said that this section attempted to meet the feeling that fundamental education work and the work of school-teachers were closely linked. The future village school teacher could become aware of the problems of fundamental education. A pilot project was proposed for the modification of some teacher training institutes through work in association with a fundamental education centre.

(84) Mr. ARTHUR (United Kingdom) asked whether the Secretariat had any particular training institute in mind.

(85) Mr. ELVIN (Director, Department of Education) said they had not started with any particular institute in mind, although they had received suggestions. The sum of $1,000 was intended for one long journey to a country distant from Paris.

The meeting rose at 12.45 p. m.

# FOURTH MEETING

*3 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION (continued)**

(1) The CHAIRMAN welcomed Sir Ronald Adam, Chairman of the Executive Board, and the Director-General.

(2) The DIRECTOR-GENERAL said that he intended to attend meetings of the Advisory Committee whenever his presence was not required at the Executive Board. The Advisory Committee, in the setting up of which he had participated as a member of the United States delegation, had an important part to play in the activities of the Conference, and the Secretariat would give it full co-operation in performing its work.
(3) The Secretariat was trying to base its ideas on the needs and possibilities of Member States. To that end it was necessary to know the situation in each country and to have a more realistic and less theoretical outlook. In fact it was hoped to make Unesco more of a Specialized operating Agency without lessening its guiding character - a difficult balance to achieve. The plans set out in the Proposed Programme and Budget for 1955-56 were not intended to be permanent: it might later on be found necessary in some cases to expand, or in others to retract; it was for the delegates of Member States to give instructions.
(4) He wished to pay tribute to the part played by the Executive Board in the preparation of the new programme, reflecting a trend which had started at the Executive Board's session of November 1953 and been confirmed at the session in March/April 1954, in which the Board had considered the first draft programme and budget.
(5) Much help and information had been gained from discussions with member governments during visits by the Director-General and members of the Executive Board, especially to countries in Latin America and Asia.
(6) The General Conference was the occasion when Member States expressed their wishes, and the Secretariat was ready to give all possible assistance in the discussions.

(7) The CHAIRMAN thanked the Director-General and said that the Advisory Committee, with the help of the Secretariat, would do everything possible to ensure that its consideration of the programme was of use to the Programme and Budget Commission.

(8) Sir Ronald ADAM (Chairman, Executive Board) expressed his regret that no member of the Executive Board had so far attended the Advisory Committee; the member appointed in his place had not been able to be present. He hoped that it would be possible for a representative to attend future discussions and said that he himself would like to participate in the discussions on remodelling the programme. He stressed the importance of the Advisory Committee's work.

(9) The CHAIRMAN asked for the detailed discussion of the programme and budget to be resumed.

1.2 Pre-school and school education

Project 1.21: The development and improvement of school systems and school teaching (continued)

Paragraphs 163-167

(10) Mr. ELVIN (Director, Department of Education) said that he had nothing to add to his statement at the previous meeting. The Director-General considered that, although there had been many suggestions on subjects to be taught in schools, it was Unesco's responsibility to study the problem of the school curriculum as a whole.

(11) The CHAIRMAN drew attention to the Executive Board's comment in paragraph 10 of document 8C/5 Add. 1.

(12) Mr. COWELL (United Kingdom) said that the matter had been carefully considered by the National Commission in his country, which was aware of the difficulties described by Mr. Elvin. The United Kingdom was, however, in a rather special position, since the paragraph in question implied a degree of State control of school curricula which was not the practice in that country. An international Advisory Committee on the School Curriculum would not, therefore, be as useful to the United Kingdom as it might be to other countries.
(13) Considering the matter from the financial angle, he wondered whether an international advisory committee was really necessary, since the school curriculum seemed to be a national rather than an international problem; alternatively, if it were really necessary, need it meet twice a year? In his view it would be better for such a committee to meet once a year and for $26,530 to be saved.

(14) Mr. ELVIN (Director, Department of Education) explained that Unesco had not the power to change the school curricula of Member States; what was envisaged was an interchange of experience and practice in different countries, which would

surely be of interest to the United Kingdom.

(15) With regard to the number of meetings, there was much work to be done, and studies for submission to the 1957 and 1958 international conferences on public education would have to be prepared well in advance. In his view it would be necessary for the international advisory committee to meet twice, in the first year at least.

(16) Mr. AVIDOR (Israel) pointed out that the Advisory Committee had already, under paragraph 141, agreed to recommend the allocation of funds for a study by the International Bureau of Education of the school curriculum, and was now being asked, under paragraph 166, to approve the setting up of an international advisory committee on the same subject.

(17) Mr. ELVIN (Director, Department of Education), in reply, said that the International Bureau of Education study would be based on the replies of governments to questionnaires, whereas the studies proposed under paragraph 166 would be based on the views of the teaching profession.

(18) Mr. AVIDOR (Israel) still considered that there would be duplication of work, since the international advisory committee would also, no doubt, use questionnaires.

(19) Mr. ELVIN (Director, Department of Education) said that both aspects of the problem - government educational practice and the professional view - were important and neither should be overlooked.

(20) Mr. LEE (United States of America) wished to associate himself with the remarks of the United Kingdom delegate. With regard to the questions raised by the delegate of Israel, he hoped that use would be made of the work done by the Education Clearing House, since there had already been a considerable amount of research on school curricula.

(21) Mr. ELVIN (Director, Department of Education) assured Mr. Lee that the resources of the Education Clearing House would be at the disposal of the international advisory committee. It was true that much work had been carried out on the curriculum problem, and the committee would have to co-ordinate the results. While the problem had been given much attention in such countries as the United States of America, in other countries, for example India, there were still difficult problems to be faced, and studies and comparisons of national practice would be valuable.

(22) The CHAIRMAN, speaking as the delegate of Australia, asked Mr. Elvin whether he was satisfied that the setting up of an international advisory committee was the most satisfactory method of dealing with the problem. Since the question was to be considered on an international level at the Conference on Public Education, he wondered whether it might not be more useful at the present stage for the Secretariat to prepare the necessary material on the basis of information supplied by the National Commissions or experts in Member States.

(23) Mr. ELVIN (Director, Department of Education) said that, while the Secretariat would not oppose any suggestions made by members of the Advisory Committee or during the Conference, the international advisory committtee appeared so far to be the best solution. Some National Commissions were ready and able to make studies requested by the Director-General or the Conference, but the same could not be said of all countries.

(24) Mr. COWELL (United Kingdom) proposed that the funds allocated for a meeting in 1955 be deleted from the programme and budget and that during that year further studies should be made on the lines suggested by the Australian delegate, with the help of the National Commissions and the international non-governmental organizations.

(25) The DIRECTOR-GENERAL drew attention to an important point which had not yet been considered, namely, that the international advisory committee would, after one or two years' work, be able to advise individual countries on the most suitable educational systems. He instanced certain Asian and Latin American countries which had provided education unsuited to the careers available and wanted advice on reorganizing their educational systems to suit the country's economic needs, advice which was difficult to give, involving as it did such aspects as effect on human character. If the international advisory committee could have the participation of leaders in curriculum-making, and experts to study the needs of countries, and did not confine its interests to the preparation of publications based on special studies, it could become a world curriculum adviser and help in the development of education generally.

(26) The CHAIRMAN suggested that it might be logical for the Advisory Committee to emerge from the Conferences on Public Education. He asked for comments on the Director-General's statement.

(27) Mr. LEE (United States of America) said that he would need a more detailed statement before making a decision. His interpretation of the word "curriculum" was rather more restrictive than that of the Director-General.

(28) The DIRECTOR-GENERAL said that the essence of his remarks was contained in the second sentence of paragraph 166, which said that the function of the committee would be to advise the Director-General as to the co-ordination of all Unesco activities bearing on the school curriculum, whether at Headquarters or through its experts in the field. Many parts of Unesco's programme had a bearing on the school curriculum, but, to keep the document short, it had not seemed advisable to list them in detail. If the Committee desired, further paragraphs could be added.

(29) The CHAIRMAN asked whether the United Kingdom delegate wished to amend or withdraw his proposal.

(30) Mr. COWELL (United Kingdom) replied that on

the contrary the Director-General's words reinforced his views on the need for preparatory studies. He therefore maintained his proposal. In reply to a further question from the CHAIRMAN, he did not think a large budgetary allocation would be necessary.

(31) The DIRECTOR-GENERAL found himself in a difficult position in relation to the Advisory Committee and the Programme and Budget Commission. He did not consider that he could accept, at this stage, changes recommended by the Advisory Committee. Member States not represented on the Committee might show interest in certain projects in their original form, and he, for one, would prefer to await the discussions of the Programme and Budget Commission to consider changing his proposals.

(32) The CHAIRMAN said that the Director-General had raised an important point. The Committee could not expect the Director-General to agree to recommendations which would preclude his submitting his proposals to the Programme and Budget Commission. However, it was the task of the Committee to submit to that Commission its views on the proposals which were before it.

(33) Mr. SOMMERFELT (Norway) understood that the Advisory Committee was competent to speak on programme as well as on budget matters.

(34) The situation was clarified by the CHAIRMAN, the DIRECTOR-GENERAL and Mr. SOMMERFELT (Norway) to the effect that the Advisory Committee on Programme and Budget could make recommendations but could not at the present stage bind the Director-General or prejudice his freedom of action in relation to the Programme and Budget Commission

(35) The CHAIRMAN asked for comments on the United Kingdom delegate's proposal, and the delegates of Norway and the United States of America expressed their support.

(36) It was agreed that the Rapporteur should record approval of the United Kingdom delegate's proposal.

(37) Miss LAISE (United States of America) hoped that the decision would not prevent the Committee from having the advice of the Director-General on programme priorities and other important questions.

(38) The CHAIRMAN also hoped that the Director-General would give advice to the Committee even if he might not agree with its final recommendations.

(39) The DIRECTOR-GENERAL assured the Committee that it would have the benefit of the Secretariat's views.

Paragraphs 168-173: Improvement of school education in certain fields

(40) Mr. ELVIN (Director, Department of Education) said that the Director-General had sent copies of the proposed programme and budget to the United Nations and the Specialized Agencies; and the International Labour Organization and the Food and Agriculture Organization had both expressed interest in paragraph 169 concerning a conference on vocational and technical education in schools for the Arab States of the Middle East. A joint meeting of representatives of those organizations had been held and provisional plans made subject to agreement of the respective governing bodies. The objectives of the conference were to make the participating countries aware of the importance of vocational and technical education in furthering the interests of workers and the community; of its place in the scheme of general education; of the material needs and requirements of such education; and of its co-ordination with the needs of employers and in relation to national plans for economic development.

(41) The CHAIRMAN asked whether the conception of a tripartite conference would have budgetary repercussions.

(42) Mr. ELVIN (Director, Department of Education) said that the ILO representative had considered Unesco's initial budgeting seriously inadequate, since considerable funds would be needed for equipment. He thought, therefore, that the budget estimate should not be reduced, even though Unesco would be responsible only for a proportion of the total cost. In reply to a question from the CHAIRMAN, he could not at present say when a decision might be expected from ILO and FAO, as he did not know when their governing bodies would next be meeting.

(43) Mr. COWELL (United Kingdom) asked whether Member States in the areas concerned would contribute to the cost of the conference.

(44) Mr. ELVIN (Director, Department of Education) replied that Unesco would pay per diem allowances for the duration of the conference, but not the cost of travel.

(45) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that the budget estimates covered thirty-five days' per diem for thirty participants.

(46) Paragraphs 168-173 were approved.

Paragraphs 174-175: Evaluation of national pilot projects in school education

(47) Mr. COWELL (United Kingdom) said that the National Commission in the United Kingdom considered that such projects were useful, but their value depended on where they were carried out and by whom. He asked what the Member States concerned would contribute.

(48) Mr. ELVIN (Director, Department of Education) said that the contribution of Member States would be in the form of participating in the work.

(49) Paragraphs 174 and 175 were approved.

(50) Mr. CABOUAT (France) in reply to the CHAIRMAN, who had opened paragraphs 176 to 196 to general discussion, said that the French

delegation was specially interested in the development of activities which were of particular value in fostering international understanding and co-operation. He was glad to see that Unesco attached great importance to those activities - a point which, incidentally, emerged also from the comments of the Secretary-General of the United Nations on the proposed programme and budget of Unesco. Work for the development of international understanding and co-operation was concerned not only with the development of the teaching of languages of wide communication, the improvement of textbooks and teaching materials, teaching about the United Nations, and the scheme of experimental activities, but also with the activities listed under the higher budgetary level and in other parts of the chapter dealing with the Department of Education. Other projects designed to achieve the same purpose appeared in the programmes of other departments.

(51) Because of the importance of that branch of Unesco's work, Mr. Cabouat was surprised that the administrative unit dealing with all those projects had been abolished. There was, for instance, a close connexion between the co-ordination of school curricula and the production of reading materials for people who had just learnt to read.

(52) He wondered what was the object of abolishing a co-ordinating body which was already in existence and had been responsible for administrative liaison between the various activities concerned. He therefore asked the Director-General to state: (1) the range of all the activities relating to the development of international understanding and co-operation; and (2) the measures he intended to take within the Secretariat in order to secure the co-ordination of all those activities.

(53) Mr. ELVIN (Director, Department of Education) said that activities relating to international understanding or education for international understanding were distributed throughout the programme and were the basis of Unesco's work, and it was difficult to define precisely which activities came within that category and which did not. References could be found throughout the programme and budget, and detailed elaboration was unnecessary.

(54) Administrative and staffing arrangements were largely the responsibility of the Director-General and it was not always practicable to have separate staff or units to deal specifically with international understanding. For example, under education, the staff member concerned with improving textbooks would automatically take account of international understanding.

(55) The DIRECTOR-GENERAL said that the Advisory Committee on Education for Living in a World Community had made a recommendation on co-ordination at its first session, but no action had been taken as yet, since the matter needed careful consideration and the Secretariat wished to have the reactions of the Conference. The Committee was at present holding its second session in Paris, and was likely to make recommendations on the subject. He understood unofficially that certain members were in favour of a special committee being set up under the Director-General's guidance to ensure co-ordination of activities, an idea which he would view favourably.

(56) The CHAIRMAN asked whether the Director-General's remarks satisfied the French delegate.

(57) Mr. CABOUAT (France) welcomed Mr. Elvin's explanations. He added that Unesco's very existence, and all its activities, helped to promote international co-operation and understanding. He was not asking for a special section to be inserted in the Education Chapter or for a special unit to be set up in the Department. He was very glad, however, that the Director-General intended to set up a co-ordinating committee to take special charge of activities relating to the development of international understanding and co-operation throughout the Organization.

(58) Mr. LEE (United States of America) said that he too had been concerned at the lack of adequate emphasis on education for international understanding and with the necessity for achieving co-ordination. It was a theme which should permeate the activities of Unesco by virtue of its mandate, and he was not entirely satisfied that that was the case.

(59) The CHAIRMAN asked for consideration of paragraphs 176-178.

Paragraphs 176-178: Developing the teaching of languages of wide communication

(60) Mr. SOMMERFELT (Norway) asked whether the Secretariat had any special country in mind with which to make a contract.

(61) Mr. ELVIN (Director, Department of Education) said that, while it would not be proper to state names, at least one country was known to have an institution ready to collaborate in such work.

(62) The CHAIRMAN said that it would be inappropriate to ask for the information at the present time, before the Executive Board had considered the matter.

(63) Paragraphs 176-178 were approved.

Paragraphs 179-185: Textbooks and teaching materials

(64) Mr. COWELL (United Kingdom) thought that better progress would be made by bilateral discussions than by international conferences. In the interests of budgetary economy he proposed suppressing one of the suggested conferences.

(65) Mr. ELVIN (Director, Department of Education) said that, considering the nature of the proposed conferences, it would be difficult to decide which to cancel.

(66) The CHAIRMAN suggested that it would be better to retain the two conferences, but to defer one to a later budgetary period.

(67) Mr. COWELL (United Kingdom) agreed with the Chairman's suggestion and was supported by Mr.

AVIDOR (Israel). He asked for information on what had been achieved in Asia, since, after several years' study, little progress had been made in Western Europe.

(68) Mr. SILLER (Mexico) asked which of the two conferences it would be more convenient to hold.

(69) Mr. ELVIN (Director, Department of Education) said that the project would be ruined if one conference were suppressed: the Committee must decide whether or not it was a high priority project.

(70) Mr. LEE (United States of America) said that there was already more work than could be done within the limits of Unesco's budget, and suppression of a project did not reflect on its merits. If priorities were being considered, he would favour the conference which would promote the most speedy understanding of the East by the West.

(71) Mr. ELVIN (Director, Department of Education) said that there were eight participating countries from Asia, namely: India, Israel, Japan, Nepal, Pakistan, Ceylon, Iran and Iraq, and ten in the West, namely: German Federal Republic, Belgium, Greece, Canada, Sweden, Switzerland, Austria, United States of America, France, Norway.

(72) The CHAIRMAN said that the United Kingdom proposal was supported by the Israeli and United States delegates and asked the Rapporteur to record that the Committee recommended deferment of one of the conferences.

(73) Mr. CABOUAT (France) in his capacity as Rapporteur, asked the delegate of the United Kingdom to say which of the two conferences he proposed to cancel for the 1955-56 budgetary period.

(74) Mr. COWELL (United Kingdom) considered that the Asian conference should be postponed, since more work had been done in Europe.

(75) Mr. MAHEU (Assistant Director-General) stated that the Secretariat regarded the two proposed conferences as interdependent. The idea was to make a comparison between the two regions. If one of them was simply dropped, the whole project would lose its point. If Mr. Cowell's proposal were adopted, it would no longer be possible to make a comprehensive report to the General Conference at its ninth session. It would be better to arrange for experts from both regions to hold a single joint meeting. Fewer facilities would be available and it would therefore produce less satisfactory results, but it would have the advantage of enabling the desired comparison to be made between East and West.

(76) Mr. COWELL (United Kingdom) said that he would approve the Assistant Director-General's suggestion, but asked whether it would involve any financial saving. In reply to a remark from Mr. ELVIN, he said that that was not the main consideration, but it was always the duty of the Committee to watch for ways of economizing.

(77) The CHAIRMAN said that the Committee was obliged to consider financial aspects and to make savings where possible with a view to increasing allocations for more important activities. In reply to a question from Mr. ELVIN, there was no question at the present time of cutting down ceiling expenditure.

(78) Mr. JUNANKAR (India) supported the Assistant Director-General's proposal. With regard to the United Kingdom delegate's question on what had been done in Asia, work was already in progress on the improvement of textbooks in India.

(79) Mr. CABOUAT (France) wished to add something to what the Indian delegate had said; there had been several bilateral discussions between governments in Europe and extensive bilateral contacts within the framework of the Council of Europe. The French National Commission had done a great deal of work on the development of international understanding and co-operation and it would be regrettable if Unesco's appropriations for activities in that field were reduced. The French delegation would support the compromise proposal made by Mr. Maheu; it would like either to have both conferences held or to have one conference of experts, covering the whole world, convened.

(80) A vote was taken on Mr. Cowell's proposal, which was rejected by 7 votes to 4.

Paragraphs 186-192: Teaching about the United Nations and Human Rights

(81) The CHAIRMAN drew attention to the remarks of the Secretary-General of the United Nations set out in document 8C/PRG/20.

(82) Mr. COWELL (United Kingdom) stressed the need for more emphasis on national effort and described an experiment in the form of a model Unesco Conference which had been carried out by students in his country. A particularly valuable aspect was that students had had to impersonate representatives of other countries, which was an aid to international understanding.

(83) Mr. ELVIN (Director, Department of Education) referred to paragraphs 214, 215 and 216 of the draft programme and budget, in which it was proposed to give assistance to six national seminars. Unesco was planning to spend less on international seminars and intended, for example, to finance one instead of two for the World Federation of United Nations Associations, while devoting more to the teaching of international affairs through the International Association of Universities.

(84) Paragraphs 186-192 were approved.

Paragraphs 193-196: Scheme of Co-ordinated Experimental Activities in Education for International Understanding and Co-operation

(85) Approved.

Paragraphs 197-213: Technical aid to Member States, for the development of school education

(86) Mr. ELVIN (Director, Department of Education) said that, in meeting requests from Member States, the Secretariat had favoured areas where the need was most urgent. A list of priority subjects had been drawn up and appeared in paragraph 208. The total allocation of funds was large in order to meet expected requests.

(87) Mr. LEE (United States of America) suggested that an additional criterion in deciding priorities should be the encouragement of countries which already showed a positive approach to the problem.

(88) Mr. CABOUAT (France) thought that the proposal for technical aid to Member States for the development of school education was a new project in the history of Unesco. In that connexion he agreed with Mr. Lee's views.

(89) The CHAIRMAN said that the suggestion by the representatives of the United States of America and France was a good one.

(90) Mr. MAHEU (Assistant Director-General) confirmed that the project for technical aid was a new departure to which the Director-General attached particular importance. Mr. Maheu drew attention to the two criteria mentioned in paragraphs 207 and 208, and said that the Secretariat would observe a third, which was not mentioned in the proposed programme and budget document, namely, assurance of success. Member States asking for aid from Unesco must be doing work at the national level in the field in question, work with clearly specified aims; and at least some initial results must already have been achieved, to serve as a basis for international aid.

(91) Mr. Maheu explained that the aid in question would be supplied on much the same lines as technical assistance for economic development, but on lines that would extend beyond the economic sphere to every aspect of social progress. They would include the despatch of experts, the award of fellowships for the training of specialists, and the supply of the equipment needed by the experts for training national specialists.

(92) Two important points should be noted. Firstly, the Executive Board would no doubt be called on to pronounce upon the requests sent in by Member States. As the Board would thus be performing the functions that TAB exercises in the programme of technical assistance for economic development, it would naturally be the final authority for taking decisions on projects involving not only technical questions, which came within the purview of the Secretariat, but also political questions. Secondly, there should be close contacts between the staff responsible for supplying technical aid and the permanent services of the Secretariat. Experts had a certain amount of freedom in their dealings with governments but they should constantly benefit by the experience acquired by the Secretariat, and their services to Member States should be tied in with the work of the permanent services and planned undertakings of the Organization. In the Director-General's view, Unesco could not supply technical aid efficiently unless it placed at the disposal of the experts its own experience and the skills available to it through its contacts with non-governmental and other international organizations. Technical aid was a natural extension of established services and planned activities.

(93) The CHAIRMAN thanked the Assistant Director-General and, in view of the large sums involved, asked Mr. Rao to give an outline of budgetary procedure.

(94) In reply to a question from Mr. CABOUAT (France), the ASSISTANT DIRECTOR-GENERAL explained that the Organization could make service contracts with competent non-governmental organizations. But it could not shift all its responsibilities to them for carrying out agreements made with governments.

(95) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that there were two types of expenditure: the cost of engaging experts and the cost of equipment. In calculating the former, there were many unknown factors, such as the country of origin, or the number of dependents. It was also necessary to conform to the technical assistance rules in engaging experts; for example, on a mission for six months or more, an expert was entitled to bring his dependents at the Organization's expense provided that they stayed with him for six months at least. Experts were allowed an installation allowance, but were not entitled to pension or medical benefits. The average figure arrived at was set out in Annex VI, page 254 of the programme and budget. Standard figures had been used throughout the document and every effort had been made to keep costs to a minimum. Another factor was that the receiving country had to bear certain expenses, such as local transport, office and lodging. With regard to equipment, it should in most cases not exceed 10% of the whole project.

(96) Mr. JUNANKAR (India) said, in connexion with the various forms in which technical assistance was provided, for example by experts, equipment or fellowships, that there would, he hoped, be sufficient elasticity to allow for adjustment of the proportions to suit the needs of the countries concerned.

(97) Mr. ELVIN (Director, Department of Education) said that in general there was that elasticity. Unesco had tried to learn from past experience. Thus, in the early stages, experts were sent to give advice, and the country was left to follow the advice or not. That practice was changed, and three methods were indicated in paragraph 210: the assigning of a permanent expert to a region; the sending of an expert for a specific piece of work; the provision of assistance to Member States for setting up their own workshops or training courses.

(98) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that there was also the provision of fellowships to implement technical aid in the exchange of persons programme, for which $60,000 was provided for 1955 and $140,000 for 1956.

(99) Mr. COWELL (United Kingdom) asked whether, in considering the rather costly but very important item of technical assistance, it would be useful to have a list of individual projects to facilitate consideration in the event of the budgetary provision having to be cut down.

(100) The CHAIRMAN asked if the Secretariat could provide a list of the projects concerned.

(101) Mr. MAHEU (Assistant Director-General) mentioned that, in a document which would probably be issued the following day, the Secretariat would list all the technical aid projects, stating their scope and cost. It would show how technical aid fitted in with the planned undertakings and permanent services of Unesco. The Committee might, if it wished, attach that document to its report.

Paragraphs 214-216: Assistance to national regional seminars on school education for international understanding and co-operation

(102) Approved.

Paragraphs 217-244: Project 1.22: Emergency Educational Assistance

(103) Mr. ELVIN (Director, Department of Education) said that discussions had recently taken place between the Director-General and the new Director-General of UNRWA, and he was not fully informed of the situation. In previous years Unesco's contribution of $90,000 had formed a very small proportion of the total educational budget of UNRWA, and it was now proposed to use it for the payment of certain staff members of Unesco working in the field under the responsibility of UNRWA. A request had been made for three staff members in addition to the existing four, and he felt that the correct action was to report the request.

(104) Mr. MAHEU (Assistant Director-General) remarked that the request put forward by the United Nations Relief and Works Agency (UNRWA) raised a question of quality rather than quantity. The Agency's programme of educational assistance would exceed $3,000,000 in the current year and Unesco was in charge of the technical side of this large-scale programme. That was an excellent example of co-operation between two international organizations of different types.

(105) UNRWA had asked for all senior educational officials to be supplied by Unesco. Unesco would have to recruit, pay and second seven specialists instead of the four mentioned in paragraphs 235. Although he had no formal proposal on the matter to submit at the moment, the Director-General was anxious that, if budget cuts were made elsewhere, an additional sum of $25,000 should be released in 1955, and $26,000 in 1956, in order that the request could be fully met. It was less a question of giving a little more money than of tidying up the administrative position. Moreover, the money would represent an insiginificant sum compared with the total of UNRWA's educational budget.

(106) Mr. COWELL (United Kingdom) asked whether the request from the Director-General on UNRWA would be presented to the Conference as a document; whether the request had been approved by the governing body of UNRWA, on which governments were represented; and whether the three new posts were permanent or temporary.

(107) Mr. MAHEU (Assistant Director-General) clarified three points: (1) in order not to put the Director-General in an awkward position, the Director-General of UNRWA had made his request orally. If the Committee felt it was necessary, the Agency could be asked to confirm its request officially in writing; (2) the request had not been approved by a governing body of UNRWA because there was no such body; UNRWA had no Executive Board but an advisory commission of four members, the Director-General of UNRWA was directly responsible to the General Assembly of the United Nations; (3) the proposed posts were temporary because the Agency itself was temporary, being prolonged from year to year by the United Nations General Assembly. They were, however, shown as "established" in the budget in accordance with customary administrative terminology, but the operation itself was temporary.

(108) The CHAIRMAN said that it would be difficult for the question to be discussed by the Committee unless it were taken up by a member, as no formal proposal had been submitted by the Director-General. He suggested that the Committee take note of the information given by the Director-General and of his statement that he would be interested in making a formal proposal if funds were found available at a later stage.

(109) It was so agreed.

(110) The CHAIRMAN proposed that paragraphs 238-244 and project 1.31 should be postponed until the next meeting.

(111) Mr. MAHEU (Assistant Director-General) explained that the document dealing with project 1.31, fundamental education, was not long but that all the directors of departments had to help in drafting it. It would be distributed during the afternoon meeting and could be more usefully discussed at the meeting to be held the next morning, when members had had time to study it.

(112) The proposal was approved.

The meeting rose at 12.45 p.m.

# FIFTH MEETING

*3 November 1954 at 3.45 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION (continued)**
**DOCUMENT 8C/5, CHAPTER 1: EDUCATION (continued)**

(1) Discussion was resumed on the projects proposed by the Department of Education for the period 1955-56.

Paragraphs 238-244 - Emergency educational assistance to Korea

(2) Mr. ELVIN (Director, Department of Education) drew the attention of the Committee to the fact that, as a result of the recommendations of the Unesco mission to Korea to study educational reconstruction, it was proposed to create three educational posts in Korea. The first was that of educational adviser having a D.1 grade, the second, that of Director of the Fundamental Education Centre, a post which had already been filled on a temporary basis, and the third was that of technical education officer, which post would be filled in 1956. The educational adviser would be administratively responsible to the United Nations Korean Reconstruction Agency and technically responsible to Unesco.
(3) There were no further comments on paragraphs 238-244.

(4) The CHAIRMAN recalled that the Committee had decided to postpone discussion of project 1.31 until the following day and he proposed continuing the discussion with project 1.32.

Paragraphs 313-336

(5) No comments.

Paragraphs 337-339

(6) No comments.

Paragraphs 340-350

(7) The CHAIRMAN drew the attention of the Committee to Annex II of document 8C/PRG/20, which contained a letter from the Director-General of ILO to the Director-General of Unesco on the subject of collaboration with Unesco in the matter of technical aid to Member States, and he asked Mr. Elvin if he could give the Committee any clarification on this point.

(8) Mr. ELVIN (Director, Department of Education) said that his Department had taken for granted that it would have the collaboration of ILO on this project and had therefore not mentioned such collaboration specifically in document 8C/5.
(9) There were no comments on paragraphs 340-350.

Project 1.33 - paragraphs 351-371

(10) The CHAIRMAN drew the attention of the Committee to the letter from the Secretary-General of the United Nations contained in document 8C/PRG/20 and asked Mr. Elvin whether Unesco had collaborated with the United Nations in its youth work.

(11) Mr. ELVIN (Director, Department of Education) replied that, although there had been no specific collaboration with the United Nations in this field, there had been contacts between the two organizations, and the Department of Education would be happy to extend collaboration at any time.
(12) There were no comments on paragraphs 351-371.

Paragraphs 372-384

(13) Mr. ELVIN (Director, Department of Education) said that it had been difficult in the past to focus the work on youth activities. The framework for the proposed Associated Youth Enterprises would be similar to that of the Associated Projects Scheme in the field of fundamental education. Members of the Associated Youth Enterprises would be encouraged to carry out work which was of interest to themselves and to Unesco and through them it was hoped to achieve some unity in the field of youth activities.

(14) Mr. FREY (German Federal Republic) doubted whether the Associated Youth Enterprises would yield practical results and feared that it might only produce a crop of officials.

(15) Mr. ELVIN (Director, Department of Education) replied that an attempt would be made to see that the work of the Associated Youth Enterprises did not overlap with work done by other organizations and would be of some practical use. He emphasized the experimental nature of the programmes contemplated (paragraph 376).
(16) There were no further comments on paragraphs 372-384.

Paragraphs 385-395

(17) Mr. ELVIN (Director, Department of Education) explained that paragraphs 385-395 were concerned only with Unesco's liaison with the Unesco Youth Institute at Gauting in Germany.

(18) Mr. BOW (Canada) said that, although it might not be appropriate to say so at this stage of the discussion, he would like the Committee to know that, after careful study of all available information, his Government had grave misgivings about the value, in relation to the whole programme of Unesco, of the three Unesco Institutes in Germany, particularly in the case of the Institute for Social Sciences in Cologne. He agreed that the work done by these institutes was important and interesting but wondered whether it was of sufficient urgency to justify expenditure by Unesco when its budget was so limited.

(19) In reply to a question from Mr. ELVIN (Director, Department of Education) whether Mr. Bow's remarks were for general discussion, the CHAIRMAN said that, as the meeting was informal, the Committee could discuss them.

(20) Mr. BOW (Canada) pointed out that the only proposal his Government had to make in regard to the three institutes was that they should be given a lower priority in Unesco's programme than other projects.

(21) Mr. SOMMERFELT (Norway) said that, before he could judge about priority, he would require more information.

(22) Mr. ELVIN (Director, Department of Education) gave a brief outline of the history of the three institutes. They were the outcome of a resolution passed by the fifth session of the General Conference of Unesco, which had been inspired by the thought that, in the process of re-educating Germany, the results of setting up such institutes in that country would be more fruitful than if they were set up elsewhere. As Western Germany was then occupied by the forces of three other countries, it had been thought advisable to set up the institutes in three different towns. The three institutes had had varied degrees of success. The Hamburg Institute had been particularly fortunate and soon became a centre for educational contacts, particularly for Europe and North America. The Youth Institute had been less fortunate and the question whether continued support should be given to it had been raised by the Executive Board, which had appointed a committee of investigation. This committee had reported its feeling that the Youth Institute was a worth-while project and should be allowed to continue for the immediate future. It had continued in close collaboration with the Department of Education and had established itself in a suitable building. He felt that it would be bad to abandon such an excellent organization, especially as it was now on its feet and did not duplicate the work being done by the Youth Section of Unesco's Department of Education. He felt that the question of future priority would have to be decided but warned the Committee that, if the project were abandoned, Unesco would lose prestige. (23) With regard to the financial aspect, there had been, in previous years, no contribution from Unesco's normal budget. One P.4 and one P.1 official and a secretary had been employed to help raise money for the institutes but this was no longer the case. The institutes could carry on if Unesco provided one-third of their total budget.

(24) In answer to a question from Mr. BOW(Canada) why Unesco's support had been withdrawn, Mr. ELVIN said that it had not been completely withdrawn. In the past surplus funds from the United States and French occupational authorities had been available for the institutes but they were no longer so. An effort had been made to replace those sources (8C/PRG/19), but so far contributions had not been sufficient.

(25) Mr. LEE (United States of America) said that his views corresponded to those of Mr. Elvin. The National Commission of the United States of America had made enquiries and felt that, as the institutes were so young, it would be a pity to withdraw support from them. It thought, however, that it would be desirable to evaluate the performance of the institutes so that, at the next session of the General Conference, consideration could be given to a means of gradual withdrawal by Unesco. The American Government wished to see the international character of the institutes maintained.

(26) Mr. ELVIN (Director, Department of Education) reminded the Committee that a substantial contribution to the institutes was made by the German Federal Republic. He doubted, however, whether the institutes could continue without a contribution from Unesco. In addition, if Unesco support were withdrawn, it would be more difficult to collect funds because it would be thought that Unesco did not think the projects deserving. The General Conference would have to decide whether it wanted the institutes to continue, whether it wanted to withdraw its support gradually or whether it thought highly enough of them to continue giving them its support.

(27) Mr. LEE (United States of America) thought that the Committee would not want to make a clear-cut decision without more information from the Secretariat. He was not prepared to ask questions because he was not in a position to make an evaluation at the moment.

(28) Mr. MAHEU (Assistant Director-General) said that the Secretariat had already made such an evaluation and, on that basis, had drawn up a proposal which it considered just and reasonable. The Director-General had proposed allotting $32,000 a year to each of the Institutes because he thought they deserved it. The previous September, he had sent a member of the Secretariat to see on the spot how the Youth Institute, which was the one that had aroused most doubt, was working. The Director-General himself had also been to Germany, where he had visited the three institutes and obtained additional information from the German

authorities. From those enquiries, he had concluded that the Institutes deserved support to the extent of $32,000 a year each - representing about a third of their total budget. The Secretariat was at the disposal of the Committee if fuller information were needed about any special points relating to the work of the Institutes.

(29) Mr. FREY (German Federal Republic) stressed that the Unesco Institutes in Germany were not German institutes. The German Federal Republic had also doubts about the institutes, especially in regard to personnel, but had decided that, as they were research institutes, it would be necessary to give them five or six years to show whether they were to be really worth while. There was a real need for the work done by the Youth Institute on a world basis and not only in Germany. The Institute was international but not sufficiently so and required an international staff. The German Federal Republic was concerned with international development of the institutes and would require international help. There would never be overlapping between the work done by the institutes and Unesco's work.

(30) Mr. COWELL (United Kingdom) asked whether it would not be wise at this stage to hear what Mrs. Myrdal had to say about the Unesco Institute for Social Sciences.

(31) The CHAIRMAN agreed.

(32) Mrs. MYRDAL (Director, Department of Social Sciences) pointed out that it took time to lay a foundation for research in social sciences. The Unesco Institute in Cologne was staffed mostly by German personnel and had, up to now, made studies of German problems. In the future, it was planned to make comparative studies in the countries bordering on Germany. A seminar had been held on comparative studies in family sociology and had resulted in the setting up of a preliminary international committee on family problems under the chairmanship of Professor Burgess of Chicago. The Institute had arranged that the results of the seminar would be brought to the attention of a large international meeting to be organized by a non-governmental organization. A further seminar was planned for January 1955, in which the Institutes of Hamburg and Cologne were to collaborate.
(33) Although the activities of the Cologne Institute were limited by its modest resources, Mrs. Myrdal was convinced that it would find a place in the international picture.

(34) Mr. CABOUAT (France) said that the French organizations and government circles concerned, which had followed the work of the Institute for Social Sciences in Cologne, had found that it seemed to be working in a watertight compartment and that its activities were less international than those of the other two Unesco Institutes in Germany. However, on account of its geographical position, France was called upon to take part in the work of the three Institutes, particularly in that of the Youth Institute at Gauting - the only international institution in that field. The French delegation was therefore strongly in favour of approving the proposed appropriations for the Institutes for 1955 and 1956.

(35) The CHAIRMAN indicated that there were two proposals before the Committee. The proposal by the Canadian delegate was that a lower priority should be accorded to the projects concerning the Unesco Institutes in Germany than to other projects in the Department's programme, and the proposal by the United States delegate was that Unesco continue support of the Unesco Institutes in Germany for the present, but should evaluate the usefulness of their work before the next General Conference, in order to decide whether or not Unesco should continue its support of these Institutes.

(36) Mr. COWELL (United Kingdom) supported the United States proposal. He was afraid that the Canadian proposal, if adopted, might mean that the Institutes would be abandoned if the General Conference decided to cut the proposed budget.

(37) Mr. BOW (Canada) stressed that, in putting forward the proposal that the Unesco Institutes in Germany be accorded a lower priority than other projects, the Canadian Government had no intention that the projects should be completely cut off from Unesco support.

(38) There being no support for the Canadian proposal, the CHAIRMAN put the American proposal to the vote. The motion was adopted.

Paragraphs 396-398

(39) Mr. ELVIN (Director, Department of Education) drew the attention of the Committee to document 8C/PRG/12, which related to this section. He did not think that it was particularly appropriate for the Committee to discuss this project at length, as it was not intended to spend any money on it. The Department of Education intended to invite those Member States which had expressed interest in the scheme, to make an analytical report on the rôle of sport in education.

(40) Mr. CABOUAT (France) mentioned that the French National Commission and the government departments concerned were greatly interested in Unesco's activities on behalf of sport in education. He was sorry that the wording of the item in the draft programme, as given in the document submitted to the Executive Board, had been changed and proposed that the earlier wording should be restored. The French National Commission was in favour of the project mentioned in paragraph 397, in which three to five Member States were to be invited to undertake a comparative study of the place of sport in the education of young people, either in school or out of school, and was quite prepared to undertake such a study. France and its overseas territories offered a wide field for experiment and had a whole network of officials responsible for organizing sports activities.
Mr. Cabouat said that the French Government was prepared to make a financial contribution to a study of the kind proposed. The French National

Commission had prepared a memorandum, suggesting that a series of activities without budgetary implications be included in the programme, such as contacts with the Olympic Committee and international sports federations which had shown interest in Unesco's studies, the exchange of detailed information among Member States about the place occupied by sport in those States, discussions on the educational value of sport, and the publicizing of basic principles. Provision might be made for the inclusion in the programme of a whole series of activities involving no additional expenditure. The Secretariat might study those suggestions and make appropriate proposals.

(41) Mr. ELVIN (Director, Department of Education) said that the references mentioned by the French delegate could be used in writing to Member States. He accepted his other suggestions in general terms.

(42) Mr. LEE (United States of America) was in favour of the French delegate's suggestion that Unesco should ask for voluntary help from National Commissions.

(43) There were no further comments on paragraphs 396-398.

Paragraphs 399-415

(44) There were no comments.

(45) The CHAIRMAN said that, subject to consideration of the section on fundamental education, the Committee had completed its study of the Chapter on Education. He thanked Mr. Elvin for the help he had given the Committee and suggested, after consultation with the Secretariat, that the Chapter on Cultural Activities should be studied next.

**CHAPTER 4: CULTURAL ACTIVITIES**

(46) The CHAIRMAN welcomed Mr. Thomas (Director, Department of Cultural Activities) and asked him to introduce the Chapter.

(47) Mr. THOMAS (Director, Department of Cultural Activities) introducing the draft programme of his Department, pointed out that, like those of the other Departments, it was divided into two sections, the first containing established service activities of universal interest which were necessary for the development of international cultural co-operation and, the second, an action programme of projects designed to furnish advice and assistance to Member States. He gave a rapid survey of both sections, drawing attention to changes as compared with previous years. With regard to subventions to non-governmental organizations, the only increase proposed, which was for the International Council of Museums, was a small one. On the other hand, the Secretariat had sought, whenever possible, to convert subventions into contracts, with the result that the total amount of subventions for 1955-56 was slightly lower than that for 1953-54. So far as bibliographical services were concerned, Mr. Thomas drew the Committee's attention to an amendment to paragraph 405, contained in document 8C/5 Corrigendum, relating to the Index Translationum. The part of the programme dealing with activities relating to international agreements already concluded or on which preparatory work was being done contained no new proposals. The first section ended with a number of paragraphs relating to the Unesco library.

(48) In the second section, dealing with the action programme, efforts had been made to group cultural activities under three main headings, covering ten major projects. The first heading was the preservation of the cultural heritage of mankind (artistic, historic and scientific records, monuments and collections of universal interest) and the programme provided for direct or indirect aid to Member States for the preservation of that heritage, direct aid being given by sending out expert missions. The second main division, headed 'Culture and Education', made provision for cultural activities forming a necessary development and extension of the educational programme at all levels; it covered four main projects: humanistic studies in culture and education, education through the arts and the crafts, the development of libraries for all stages of education and for research, and the development of museums and their contribution to education. A new project, which was likely to make considerable progress, aimed at providing help for Member States in preparing reading materials for people who had recently learnt to read through fundamental education programmes; that project was being planned in close co-operation with other Unesco Departments: Education, Social Sciences, Mass Communication and Natural Sciences. Finally there was a third main heading - Culture and International Understanding, under which the proposed activities were designed to develop exchanges between the cultures of East and West and, especially since 1952, relations between the Old World and the New. Provision was made for artistic exchanges through reproductions, travelling exhibitions, recordings of the music of different peoples, etc. It was an enormous programme, in full course of development, and concentrated mainly on cultural exchanges between East and West. The project for the translation of great books representative of the genius of the various peoples included a series devoted to the literatures of Asia. Mr. Thomas concluded by saying that he had drawn attention particularly to activities which marked a strengthening of the programme compared with previous years.

(49) The CHAIRMAN thanked Mr. Thomas for his statement and commented on the clarity with which this Chapter had been presented. He asked for comments of a general nature on the Chapter as a whole.

(50) There being no general comments, a detailed discussion was opened.

Paragraphs 23-26

(51) The CHAIRMAN, in his capacity as Australian delegate, asked for an explanation of the provision for staff travel in paragraph 26, pointing out

that each project had also a provision for staff travel.

(52) Mr. THOMAS (Director, Department of Cultural Activities) pointed out that paragraph 26 referred to the travel of the Director and Deputy Director of the Department, whereas the provision made under the individual projects was for travel by the Department's specialists.

(53) The CHAIRMAN, speaking as the delegate of Australia, expressed the opinion that the only criterion should be whether the travel was absolutely necessary for the carrying out of the projects.

(54) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that travel costs appearing under the heading of the Office of the Director of a Department were to enable the Directors to carry out missions covering a number of projects at the same time.

(55) Mr. COWELL (United Kingdom) asked whether the sum mentioned for staff travel and hospitality in the draft budget for 1955-56 was responsible for the increase in the budget over that for 1953-54.

(56) Mr. RAO (Acting Chief, Bureau of Programme and Budget) replied that the increase was due rather to the increase in staff costs caused by annual increments.

(57) There were no further comments on paragraphs 23-26.

Paragraphs 27-71 - Project 4.11

(58) Mr. COWELL (United Kingdom) asked the meaning of the first sentence in paragraph 31. Was it intended that new organizations would not receive subventions?

(59) Mr. THOMAS (Director, Department of Cultural Activities) explained that, for 1955 and 1956, it was not proposed to grant subventions to any organizations other than those on the list of subventions for 1953 and 1954.

(60) Mr. SOMMERFELT (Norway) asked whether, if new organizations were affiliated to already established organizations, they would also come under this provision.

(61) Mr. COWELL (United Kingdom) asked for a closer definition, as the present one did not make it clear whether reference was only being made to the period 1955-56 or whether it applied also to the future.

(62) Mr. MAHEU (Assistant Director-General) drew attention to an error in translation which might be responsible for Mr. Cowell's remarks; further organizations should be substituted for new organizations.

(63) Mr. COWELL (United Kingdom) said that he would be satisfied with the substitution of the word further.

(64) Mr. THOMAS (Director, Department of Cultural Activities) pointed out that the International Society for Education through Art was already in existence in 1953-54; it was included in paragraph 31 among the organizations to which a starting subvention had been granted in 1953-54; it was now proposed that contracts be concluded with those organizations for 1955 and 1956, and information about them was given in the appropriate paragraphs of the programme.

(65) In answer to a question from Mr. AVIDOR (Israel) whether all the organizations included in document 8C/ADM/20 would be discussed by the Administrative Commission, the CHAIRMAN said that the Administrative Commission would only review them in connexion with their past performance. The Committee could discuss them from the point of view of granting subventions.

(66) Mr. AVIDOR (Israel) thought that there would be some contradiction if the Committee recommended subventions for the period 1955-56 and then the Administrative Commission decided that a project should be discontinued on the basis of its past record.

(67) Mr. MAHEU (Assistant Director-General) mentioned that the Committee had received documents 8C/ADM/20 and 8C/ADM/21 and considered them from a different point of view from that of the Administrative Commission, which had to take decisions on Unesco's general policy with regard to such organizations, in the light of the last four years' experience, whereas the Committee had to satisfy itself that the Secretariat had duly observed the existing directives and criteria.

(68) Mr. AVIDOR (Israel) presumed that the Administrative Commission discussed the principles of continuing or undertaking a specific project and wondered how the Committee could possibly discuss the amounts of subventions before the principles had been agreed upon.

(69) Mr. MAHEU (Assistant Director-General) observed that Mr. Avidor's remark would be justified if the programme were entirely new, but, in point of fact, there were scarcely any changes in the new programme from previous years, and those were generally in the nature of reductions.

(70) Mr. SOMMERFELT (Norway) proposed that the Committee in its report should suggest that the proposed subvention for the International Council for Philosophy and Humanistic Studies was insufficient. The Council was still growing and its affiliated associations were not all included in the list contained in paragraph 32.

(71) Mr. COWELL (United Kingdom) associated himself with the remarks made by Mr. Sommerfelt.

(72) It was agreed to make a recommendation to the effect that the subvention proposed for the International Council for Philosophy and Humanistic Studies was insufficient.

(73) Mr. BOW (Canada) indicated that on the whole, Canada supported the cultural programme.
(74) There were no further comments on paragraphs 27-71.

Paragraphs 72-83 - Project 4.12

(75) Mr. THOMAS (Director, Department of Cultural Activities) mentioned that project 4.12 (co-ordination of bibliographical services and exchanges of information) marked a natural continuation and extension of activities whose usefulness had already been proved. The Co-ordinating Committee was going to assess the value of Unesco's bibliographical activities and give its views on the Organization's work in that field; it was also concerned with the co-ordination of national and international services, and many States had already made considerable progress in that respect.
(76) Mr. Thomas also drew the Committee's attention to the corrigendum (paragraph 83) relating to the Index Translationum published before the war by the International Institute of Intellectual Co-operation and revived by Unesco, which had undertaken its annual publication with the co-operation of Member States. At the outset, the Secretariat had been doubtful, not about the value or form of the Index, but about the cost of production; publishing this work placed a considerable burden upon the Secretariat and no more than 700 copies were sold annually. Questions about the need for continuing the publication had been asked in the Executive Board, and it had been decided to discontinue it. The Committee on Bibliography had discussed the question and had unanimously requested the Director-General to reconsider that decision.
(77) The Director-General had investigated the matter, with encouraging results: experts had pointed out that the sales level could be considered satisfactory and that it would be a pity to discontinue the publication now that an increased number of countries figured in it. The Director-General left it to the General Conference to decide whether the Index Translationum should continue as a regular feature of the programme or should be discontinued at the end of 1955.

(78) The CHAIRMAN, referring to paragraph 14 of document 8C/5 Add.1, (submission of the Proposed Programme and Budget for 1955-56 by the Executive Board) asked whether the work connected with the Index Translationum was done under contract or whether it was done by the Secretariat of Unesco.

(79) Mr. THOMAS (Director, Department of Cultural Activities) replied that the work was done mainly by the Secretariat, which consulted the National Commissions and specialized services of Member States. For certain countries, the information obtained was inadequate and had to be supplemented or revised by specialists, especially as concerned languages which were not widely spoken.

(80) The CHAIRMAN asked for comments on project 4.13

Paragraphs 84-117, Project 4.13

(81) Mr. THOMAS (Director, Department of Cultural Activities) pointed out that the corrigendum entailed no material change or budgetary implications; the work plans relating to copyright were simply presented in a more satisfactory form, in accordance with the recommendations of the Provisional Committee.
(82) There were no further comments on paragraphs 84-117.

Paragraphs 118-121 - Project 4.14

(83) Mr. AVIDOR (Israel) asked why the amount proposed for travel in paragraph 121 was so high.

(84) Mr. THOMAS (Director, Department of Cultural Activities) said that the provision for travel was to enable the Unesco librarian to attend meetings of the co-ordinating committee of librarians of the United Nations and Specialized Agencies.

(85) The CHAIRMAN, speaking as the delegate of Australia, said that the Australian Government had always doubted whether the amounts spent on travel were justified and he asked whether business could not be carried out just as satisfactorily by correspondence.

(86) Mr. THOMAS (Director, Department of Cultural Activities) answered that the bulk of the work was done by correspondence; the librarians of the United Nations and the Specialized Agencies met once a year and, if the budget item in question were deleted, the Unesco librarian would be the only one absent from the meeting. The meetings were extremely useful and provided an opportunity of making detailed arrangements for the exchange of documents.

(87) The CHAIRMAN replied that the contacts made by travel were obviously useful but he considered that travel was a luxury when the budget was restricted. He suggested that meetings could be held perhaps once every two years instead of annually or, alternatively, that only half the amount be spent on travel for annual meetings.

(88) Mr. THOMAS (Director, Department of Cultural Activities) replied that the figures were based on actual expenditure in past years.

(89) Miss LAISE (United States of America) asked whether it was logical to include the Unesco library in the programme for the Department of Cultural Activities. The library provided an administrative service for the whole of Unesco and not only for this Department.

(90) Mr. MAHEU (Assistant Director-General) thought Miss Laise's point a good one. Though there were arguments for showing the appropriations for the library under the Department dealing with libraries, there were also arguments for showing

them under the administrative services. It was a question of the administrative organization of the Secretariat, which might, it seemed, be left to the Director-General.

Paragraphs 122-147 - Project 4.2

(91) The CHAIRMAN asked for comments.

(92) Mr. THOMAS (Director, Department of Cultural Activities) mentioned that the project for an international centre for the preservation and restoration of monuments and museum objects, with which the Conference was already familiar, was now being put into effect. The centre, which would be at the service of all Member States, would come into being in the near future. The Director-General had taken the view that it would be well to begin with organizations which were already in existence and had proved their worth, and he had received offers from the Governments of Belgium and Italy.

(93) Mr. COWELL (United Kingdom) drew attention to paragraph 131, which included an amount of $900 for contracts; he asked for information concerning this sum.

(94) Mr. THOMAS (Director, Department of Cultural Activities) reminded the meeting that the Executive Board would have to give its views on the location of the proposed centre. Legal regulations would have to be drawn up to establish its international status, and the Secretariat had felt that, for that purpose, the advice of experts would be needed. In reply to a query from the delegate of the United Kingdom, Mr. Thomas explained that the budget estimates were based on the remuneration of an expert, for six weeks, at $150 a week, which was the usual rate for an expert of that category.

(95) Mr. COWELL (United Kingdom) asked whether the sum of $900 represented the cost of the preparation of draft agreements.

(96) Mr. THOMAS (Director, Department of Cultural Activities) remarked that the centre would be an important international institution, comparable in its own field with the International Laboratory for Nuclear Research in Geneva, an international organization in whose work all countries wishing to do so could take part.

(97) Mr. COWELL (United Kingdom) asked whether the document could not be prepared by the Bureau of Legal Affairs.

(98) Mr. MAHEU (Assistant Director-General) explained that, in the case of the European Council for Nuclear Research, the work had been done by the Bureau of Legal Affairs. He pointed out, however, that the Bureau was too small to include specialists in every field. In the case in point, the services of an expert with technical as well as legal knowledge were required.

(99) Mr. COWELL (United Kingdom) thought that, as a matter of principle, the cost was too high.

(100) Mr. MAHEU (Assistant Director-General) repeated that the Bureau of Legal Affairs played a part in all the Organization's legal work; but its staff of officials numbered only four and could not have specialized knowledge in every field, whence the need for calling in an outside expert. With regard to the estimated cost, the Secretariat was, of course, quite prepared to use the services of a British expert if one could be secured at a lower rate.

(101) Mr. COWELL (United Kingdom), referring to paragraph 132, asked whether use would be made of the experience gained by members of the Egyptian Excavation Fund.

(102) Mr. THOMAS (Director, Department of Cultural Activities) replied that it would. The Secretariat had taken advice and, by a decision of the Executive Board, a mission had been sent to Egypt to make a detailed study in preparation for the missions that were to be organized in 1955 and 1956. The project would not be begun until a very careful preparatory investigation had been completed.

Paragraphs 148-171 - Project 4.31

(103) Mr. JUNANKAR (India), referring to paragraph 151, asked whether it was the intention of Unesco to consult oriental countries as to which orientalists were to undertake this work. The normal procedure would be to confide in the Member States of areas in which it was proposed to work.

(104) Mr. THOMAS (Director, Department of Cultural Activities) pointed out that the project was still at a very early stage. Unesco had begun by asking ICPHS for advice; the Council had set up a working party consisting of representatives of the International Union of Orientalists and the International Federation of Societies for Classical Studies, which had drawn up a questionnaire to be sent out to all the countries concerned.

(105) Mr. COWELL (United Kingdom) proposed that projects A, B and C in paragraphs 153-164 should be given a very low priority. He was of the opinion that they were not of sufficient importance at the present time.

(106) Mr. BOW (Canada) supported the United Kingdom proposal. He did not mean that the projects were not good in themselves, but supported the allocation of a low priority.

(107) Mr. CABOUAT (France) could not support the proposals made by the United Kingdom delegation. The projects in question were a central part of cultural activities and the French delegation proposed to submit a draft resolution requesting the Director-General to encourage experiments in educational television, which, like broadcasting, was proving a most effective means of spreading ideas and techniques, especially in rural areas. He was therefore in favour of giving a high priority to the project mentioned in paragraph 161 of the programme.

(108) Mr. LEE (United States of America) was in favour of projects A, B and C having a low priority especially in relation to project D, which, he felt, should be given a high priority.

(109) The CHAIRMAN put to the vote the United Kingdom proposal that the Committee should recommend that projects A, B and C be allocated a low priority in relation to the other projects in the programme of the Department of Cultural Activities.

(110) The motion was adopted by 6 votes in favour, 4 against and 1 abstention.

(111) Mr. MAHEU (Assistant Director-General) pointed out that, in view of the differences in priority recommended for projects A, B and C, on the one hand, and project D, on the other, it would be necessary to amend resolution 4.31.

(112) The CHAIRMAN asked Mr. Maheu to draw the attention of the Committee to this point later, when the question of overall priorities was being discussed.

Paragraphs 172-184 - Project 4.32

(113) Mr. THOMAS (Director, Department of Cultural Activities) mentioned that he had already said in his general statement that project 4.32 was continuing. Seminars had been organized, including a recent one in Japan, at which the problem of crafts, which was of great importance in many countries of the Far East, had been raised. It was probable that the technical aid to Member States, for which provision was made in paragraphs 182, 183 and 184, would be concerned with the crafts.

(114) Mr. COWELL (United Kingdom), referring to paragraph 172, expressed the opinion that the staff costs were too high. In his opinion, a great deal could be done at a lower cost.

(115) Mr. THOMAS (Director, Department of Cultural Activities) remarked that two questions had been raised: (1) cost and (2) staff. With regard to the cost, it was proposed, in paragraphs 177 and 178, that contracts be concluded with two international associations - the International Society for Education through Art and the International Society for Music Education - which had recently been established as a sequel to conferences organized by Unesco. Those contracts would take the place of the starting subventions granted in the past. Much of the expenditure provided for under paragraphs 182, 183 and 184 was to be devoted to technical aid in the form of missions sent out in response to specific requests.

(116) The staff had not been increased, and consisted of a specialist in the teaching of the visual arts, with an assistant who was an expert on the questions involved in the teaching of music. Probably, increasing demands would have to be met in that field. It was a minimum programme with the smallest possible staff. Mr. Thomas concluded by saying that, if he had known the results of the Tokyo Seminar in time, he would probably have put forward a broader, and therefore more costly, programme.

(117) Mr. LEE (United States of America) said that the United States Government regarded project C (paragraphs 182-184) as having considerable significance and proposed that it should be given a higher priority than projects A and B (paragraphs 177-181). In submitting this proposal, he understood that the higher budgetary level was not being taken into account.

(118) Mr. CABOUAT (France) observed that the proposal of the United States delegation raised a question of principle, since requests for higher priorities for projects classed as special services might entail cuts in projects classed among the established service activities.

(119) Mr. MAHEU (Assistant Director-General) did not think that the proposal of the United States delegation would mean dropping anything else. It was indeed a pleasant innovation to accord positive rather than negative priorities.

(120) Mr. CABOUAT (France) asked again whether the proposal of the United States delegation could be accepted without its having automatic repercussions on the established service activities.

(121) Mr. MAHEU (Assistant Director-General) left it to Mr. Thomas to answer that particular case, but thought that, generally speaking, Mr. Cabouat's fears arose from pushing logic rather too far. The established service activities formed a sound enough foundation to support such increase of technical aid without there being a need for increased appropriations therefor.

(122) Mr. CABOUAT (France), while acknowledging that some flexibility was necessary, drew attention to the need for preserving a balance between the two sections of the programme.

(123) Mr. LEE (United States of America) explained that, in making his proposal, he had only wanted to emphasize one part of the programme. He had not intended to suggest that the other two projects should be abandoned.

(124) As the United States proposal was not seconded, the CHAIRMAN ruled that the projects up to paragraph 184 were to be considered as having equal priority.

The meeting rose at 6.30 p.m.

# SIXTH MEETING

*4 November 1954 at 10 a.m.*

*Chairman* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION** (continued)

(1) The CHAIRMAN drew the attention of the meeting to document 0809 4784, setting out the technical aid projects throughout the programme, and opened the debate on fundamental education, on the basis of document 8C/DIV/30, upon the production of which he congratulated the Secretariat.

(2) Mr. MAHEU (Assistant Director-General) explained that document 8C/DIV/30, 'Fundamental Education: Reference to various chapters of the draft programme and budget for 1955-1956, represented a first experiment to control interdepartmental co-ordination in a specific field of work. The principle of selection, which had inspired the drafting of the document had led to the elimination of a large number of related activities and to the retention only of those most directly connected with fundamental education. It had not seemed desirable to draw up a list of activities merely by juxtaposition, following the same order as the chapters of the Proposed Programme and Budget for 1955-1956. On the contrary, effort was directed towards setting out in their sequence the questions relating to the problem of fundamental education and to show for each of them the action taken or to be undertaken by Unesco.

(3) The Assistant Director-General said that such action was envisaged in the first place from the angle of a scientific study of the social problems of fundamental education; thus it came under the Department of Social Sciences (Section I).

(4) Section II was concerned with the techniques to be used for improving methods. It mentioned, in particular, projects of the Department of Education.

(5) Section III represented direct action by Unesco for the training of specialists. The production of reading material for the newly literate was a new departure and should be inserted, as Section IV, after Section III.

(6) The former Section IV of the document (now Section V) was general aid to fundamental education projects. It represented a limited activity by Unesco, depending essentially upon Member States. With the exception of the Gift Coupon Scheme, it was the concern of the Department of Education.

(7) The final section, now renumbered VI, was a new item: the Secretariat felt that in future any action taken by Unesco should be completed by a phase of evaluation.

(8) The Assistant Director-General added that the total budget for the projects relating to fundamental education set out in document 8C/DIV/30 amounted for the two years 1955 and 1956 to $2,000,000, half of which came under the Education chapter, and the other half was spread over the remaining Department concerned. The total figure represented approximately 15% of the sums budgeted for the execution of the programme, excluding the Documents and Publications Service. (Proposed Programme and Budget for 1955-1956, Part II).

(9) Mr. COWELL (United Kingdom) expressed his delegation's approval of the work on fundamental education, but feared there was a tendency on the part of Unesco to go beyond the original conception in its relations with the Associated Projects.

(10) Mr. JUNANKAR (India) commended the projects, with special reference to the production of reading material for new literates.

(11) Mr. LEE (United States of America) felt that a high priority should be accorded to the projects on fundamental education. It was important to evaluate these, with a view to remodelling the programme. He approved the stress laid on education for international understanding. Another pleasing aspect of the programme was the participation of women and the effort to do away with all racial and other forms of discrimination.

Statistical data (Social Sciences, paragraphs 98 and 99)

(12) Mrs. MYRDAL (Director, Department of Social Sciences) informed the meeting that the Statistics Division provided regular data on illiteracy as part of its routine activities. An historical survey of the dramatic changes in the field of literacy (paragraph 98) would prove more interesting. It was hoped to have this document ready by 1955.

(13) Paragraphs 98 and 99 were adopted.

Social Studies (Social Sciences, paragraphs 201 and 211-13)

(14) Mrs. MYRDAL (Director, Department of Social Sciences) explained that community development was the term which covered all local self-help projects. Knowledge of the basic conditions of local community structure had been

found to be lacking and it had therefore been proposed, in close co-operation with the United Nations, to make a world-wide survey of types.

(15) Mr. SOMMERFELT (Norway) questioned why, if that work was to be printed in 1956, a sum should be allocated to staff travel during that year.

(16) Mrs. MYRDAL (Director, Department of Social Sciences) replied that details of travel would depend on the countries most interested in co-operating. As it could not be planned in advance, the allocation had been made in that approximate form for budget reasons.

(17) Mr. COWELL (United Kingdom) asked whether it would be possible at that stage to indicate what professional scientific organizations would receive the contracts mentioned in paragraph 211.

(18) Mrs. MYRDAL (Director, Department of Social Sciences) said that the International Political Science Association was interested, and that Unesco would probably have the co-operation of the International Union of Local Authorities.

(19) Mr. LEE (*United States of America*) reaffirmed his delegation's view that such surveys should be strictly limited to facts bearing a real relationship to programmes, and should rely for research largely on the National Commissions, non-governmental organizations, etc.

(20) The CHAIRMAN, speaking as delegate for Australia, supported Mr. Lee's suggestions.

(21) Mrs. MYRDAL (Director, Department of Social Sciences) said that the budget envisaged did not suffice for obtaining all the information needed, and Unesco was relying on the co-operation of Member States and non-governmental organizations. She added that the study was of great value to the programme of fundamental education, as well as to the whole United Nations Community Development programme.

(22) Mr. SILLER (Mexico) said that the Mexican National Commission had asked Unesco to undertake a study of the social repercussions of agrarian reform in his country.

(23) Mrs. MYRDAL (Director, Department of Social Sciences) pointed out that the work on community development in Mexico had been connected with land reform.

II. Improvement of Methods and Techniques of Fundamental Education

1. *Diffusion of Technical Information on Fundamental Education* (Education, paragraphs 76 and 107 and 108)

(24) Mr. ELVIN (Director, Department of Education) said that this was one of the most important aspects of the work. Unesco relied on it for briefing its field workers, supplying them with preparatory information, and assisting Member States in reaching conclusions on fundamental education problems. He added that the word complete in the first line of the English text (paragraph 76) was misleading. It would be more appropriate to say full. The quarterly bulletin (paragraph 107) was a useful link between workers in the field and officials in ministries. Six thousand copies appeared in English, 3,000 in French, apart from the regional versions now undertaken.

(25) Adopted.

2. Methods of teaching how to read and write (Education, paragraph 268)

(26) Mr. BOW (Canada) highly commended the kind of practical activity proposed in this paragraph.

(27) Adopted.

3. The use of a language of wide communication in relation to the use of vernacular languages in fundamental education (Education, paragraphs 274-279)

(28) Mr. ELVIN (Director, Department of Education) explained that these paragraphs dealt with a difficulty that arose in many parts of the world. On principle it was best to teach people to read and write the language they spoke, but where their vernacular was not widely spread or had only recently acquired an alphabet, they might prefer to learn a language in world use. Two phases had therefore been planned.

(29) Mr. SOMMERFELT (Norway) expressed approval of the project.

(30) Agreed.

4. Rôle of libraries in fundamental education Seminar on public library development in Asia (1955) (Cultural Activities, paragraphs 212-215)

(31) Mr. THOMAS (Director, Department of Cultural Activities) drew attention to the role of public libraries in the development of fundamental education; their effectiveness was indisputable. The experiment they made at the Delhi Public Library would be completed in the current year. For 1955, the intention was to extend this experiment to 30 librarians from 12 other Asian countries so that the good results already obtained might be repeated throughout the region.

(32) Mr. COWELL (United Kingdom) supported the idea.

(33) Mr. JUNANKAR (India) commended it highly. The project in Delhi had done very good work for the last five years.

Pilot project for library development in Africa (Cultural Activities, paragraphs 219-222)

(34) Mr. THOMAS (Director, Department of

Cultural Activities) described the main features of the pilot project for the development of public libraries in Africa. A seminar had been held in Nigeria the previous year and librarians and educators had attended it. A member of the Secretariat had gone to the region during 1954 and should soon be handing in his report on public libraries in Africa and on the recommendations made at the Ibadan seminar, especially as concerned the planning of the pilot project. The General Conference would be asked to decide on the choice of country and on the desirability of organizing a centre for servicing the mobile libraries.

(35) Mr. COWELL (United Kingdom) favoured a high priority for this project.

Education for librarianship in Arab States (Cultural Activities, paragraphs 244-251)

(36) Mr. THOMAS (Director, Department of Cultural Activities) said that the difficulty arose from the complete absence in these States of librarians acquainted with modern methods. What they now had to do was to tackle the problem methodically from 1955 onwards with the co-operation of the Sirs-el-Layyan Fundamental Education Centre.

(37) Approved.

Technical aid to Member States (Cultural Activities, paragraphs 257-263)

(38) Mr. THOMAS (Director, Department of Cultural Activities) had little to say about technical aid in the development of libraries in rural areas. The task would be principally one of advising and aiding Member States at their request and giving them the advantage of the experience gained by the Organization in other regions.

(39) Paragraphs 257-263 were approved.

5. Rôle of museums in fundamental education (paragraphs 296-298)

(40) Mr. THOMAS (Director, Department of Cultural Activities) compared this pilot project for an educational museum in the Patzcuaro Fundamental Education Centre with the project for training qualified librarians at the Sirs-el-Layyan Centre. Its object was to adapt to fundamental education the technical methods used in museums, by establishing a small educational museum in the Centre itself and organizing a number of travelling exhibitions. The scheme would also provide an opportunity for training specialists.

(41) Mr. SILLER (Mexico) said that his Government was not opposed to the pilot project's being conducted at Patzcuaro by the museums expert but suggested that it be given a lower priority. The expert was dealing with Tarascan art, with which he was possibly insufficiently acquainted. Mr. Siller therefore thought that these efforts might be more effectively directed towards other projects.

(42) Mr. AVIDOR (Israel) supported the suggestion by the delegate of Mexico.

(43) Mr. THOMAS (Director, Department of Cultural Activities) said it was not clear to him why the delegates of Mexico and Israel were asking for a lower priority. He explained that there was not the slightest intention of opening yet another museum at Patzcuaro - there were already two which were functioning very well and the Centre could rely on their co-operation. What they were trying to do was to use, for the development of fundamental education, the visual methods employed in museums and to disseminate these methods by training a certain number of specialists for the other countries.

(44) Mr. ELVIN (Director, Department of Education) in support of the proposal made in the document, said that the existing museum at Patzcuaro did not fulfil the function for which the museum expert was provided, i.e. to use museum techniques in order to improve the basic education of a community.

(45) Mr. BOW (Canada) supported the suggestion of the delegate of Mexico.

(46) The motion for reducing the priority of this activity was carried by 8 in favour, 2 against.

Regional seminar on the use of museum techniques in fundamental education (1956) (Cultural Activities, paragraphs 299-301).

(47) Approved.

Paragraphs 304-311

(48) Mr. THOMAS (Director, Department of Cultural Activities) observed that the idea behind the seminar provided for in paragraphs 304-311 was the same as in the case of the project just discussed. The Brooklyn and Athens seminars had provided lessons which should be turned to account. It was particularly important to provide for the training of specialists for the travelling exhibitions (museo-buses), which might circulate in countries where there were no regular museums.

(49) Mr. COWELL (United Kingdom) asked for reconsideration of this scheme. There were other things more important than mobile museums, such as the training of museum curators, research into the preservation of museum objects under tropical conditions, etc. A considerable reduction of expenses might be effected here. If, however, the revision were not undertaken, he would like to see a mention of the International Council of Museums, whose services should be made use of.

(50) Mr. THOMAS (Director, Department of Cultural Activities) thought Mr. Cowell had made an important point. No mention had been made of the International Council of Museums in connexion with the project, but they were of course counting on its collaboration. It was the only body of its kind for which an increased subvention was made in the Proposed Programme and Budget for

1955-56 in the Chapter on Cultural Activities.
(51) Some misunderstanding had perhaps crept into the discussion: the purpose of the museobus was not to preserve the cultural heritage of Member States but to develop fundamental education by taking exhibitions formed for that purpose to the spots where they were needed.

(52) Mr. LEE (United States of America) supported the suggestion of the United Kingdom delegate. The activity should be given a low priority.

(53) Mr. JUNANKAR (India) said that the use of museums as a medium of education was beginning to be appreciated in India. Travelling exhibitions were very successful in largely illiterate populations as a part of adult education programmes. He opposed giving this activity a low priority.

(54) Mr. AVIDOR (Israel) supported the delegate of India. In areas where there were no museums such work could meet a basic need.

(55) The CHAIRMAN asked the delegate of the United Kingdom whether, in the light of what had been said, he could formulate his proposal in terms of low priority only, or whether he wished for a modified project.

(56) Mr. COWELL (United Kingdom) could not at that stage work out a modified project. He therefore asked that the scheme be given low priority.

(57) Mr. SILLER (Mexico) explained that he was opposed to the pilot project, not on grounds of principle, but on account of the special circumstances in that case. Accordingly, if the Indian delegate thought that the project for South East Asia should be proceeded with, the Mexican delegation would support it.

(58) Mr. CABOUAT (France) thought that travelling exhibitions would be useful even in countries with well developed regular museums, like the countries of Western Europe. Over and above their specific purpose - the development of fundamental education - mobile museums would awaken interest in Unesco and its activities among the general public. In conclusion he wished to express his hearty support of the proposal put forward by Mr. Junankar.

(59) A vote was then taken on the motion of reducing the priority of the seminar workshop on the building of travelling exhibitions and a mobile museum for South East Asia (paragraphs 304-311) which was rejected with 4 in favour and 7 against.

6. Rôle of teaching of arts and crafts in fundamental education (Cultural Activities, paragraphs 182-4)

(60) Mr. THOMAS (Director, Department of Cultural Activities) observed that the Committee had already discussed the rôle of the arts and crafts in fundamental education from the standpoint of technical aid to Member States.

(61) The CHAIRMAN replied that technical aid to Member States had been examined from a vertical perspective, it would now be taken from a horizontal one.

(62) Approved.

7. Use of the means of communication for fundamental education (Education, paragraph 280 and paragraphs 165-183 of Mass Communication)

(63) Mr. DESJARDINS (Department of Mass Communication), speaking of the use of mass media for fundamental education and particularly of the production of films for that purpose (paragraphs 165-176) observed that these projects would have to be carried out in full agreement with Member States. Nevertheless the local production of films had been mainly in the form of silent 16 mm. reels and it was not at present possible to judge the results on the spot since the countries where the films had been shot had no laboratories. A very simple type of mobile development kit would need to be made available to film units at low cost through some form of hiring.
(64) Another difficulty, both financial and linguistic, was the production of sound films in local languages. There were nevertheless grounds for hoping that the current projects would lead to the formation of independent low cost local production centres, with the aid of the standard magnetic process. In 1956, there was to be a pilot project upon which would be based a detailed report and precise conclusions on the practical possibilities.

(65) Mr. LEE (United States of America) made a criticism, which however he hoped was no longer valid, on the lack of co-ordination between education specialists and specialists in mass communication.

(66) Mr. MAHEU (Assistant Director-General) assured the United States delegate that there was full co-ordination between the services of the Departments of Mass Communication and of Education in the matter of fundamental education; without such close co-operation the proposed programme could not be carried out.

(67) Mr. ELVIN (Director, Department of Education) added that his Department had always received excellent co-operation from members of the Department of Mass Communication. He quoted the Messina Seminar as a particularly fruitful example.

Visual aid kits for fundamental education (Mass Communication, paragraphs 177 and 178)

(68) Mr. DESJARDINS (Department of Mass Communication) explained that these kits had been put together as a result of the Messina Seminar; they were packed in eight strong cases which could be lent to Member States on request. Four other cases were to be made up on slightly different subjects.

(69) Mr. COWELL (United Kingdom) supported the

project, but thought that the Organization of American States should be asked to co-operate.

(70) Mr. MAHEU (Assistant Director-General) said that, on 20 October 1954, the Director-General had signed in Washington an agreement between the Organization of American States and Unesco for the development of fundamental education in Latin America. The purpose of the agreement was to continue the arrangements - due to expire in 1954 - which had enabled the Patzcuaro experiment to take place and to extend the experiment to the whole of Latin America.

(71) The project for visual aid kits was approved.

Influence of educational broadcasts (paragraphs 179 and 180)

(72) Mr. DESJARDINS (Department of Mass Communication) explained that through lack of funds the educational influence of radio broadcasts had not been adequately exploited in the underdeveloped countries. Pilot projects, like the one already carried out in Colombia, were planned for Egypt and that should make it possible to work out the necessary techniques (paragraphs 179 and 180).

(73) The project was approved.

(74) Continuing, Mr. DESJARDINS (Department of Mass Communication) made some explanatory remarks about the production of reading material for new literates (paragraphs 181 and 182 of the Chapter on Mass Communication and Section IV of document 8C/DIV/30). He pointed out that the Department of Mass Communication was merely carrying the work of the Department of Education a stage further (paragraph 311 of the Chapter on Education). His Department's project provided for direct action in the shape of a contract to be concluded with the Graphic Arts Foundation of the United States of America. The aim was to compensate for the complete absence of a daily press in some countries and of a press suitable for new literates in others.

(75) Paragraphs 181 and 192 were approved.

Regional Film Library for the Middle East (Mass Communication, paragraphs 184 and 185)

(76) Mr. DESJARDINS (Department of Mass Communication) reported that the Ford Foundation and the University of Syracuse (United States of America) had undertaken to collect the material for a report which was expected to reach Unesco in the near future. The scheme provided for an expert to be placed at the disposal of the Film Library to get it into working order. There would also be provision for visual aids.

(77) Paragraphs 184 and 185 were approved.

Use of television for fundamental education (Mass Communication, paragraphs 186 and 187)

(78) Mr. DESJARDINS (Department of Mass Communication) explained this project, quoting the experience acquired in a country where broadcasting was technically backward. The proposal was to organize group listening with the assistance of Member States and to study the results secured, paying special attention to the solution of local difficulties regarding the maintenance of equipment.

(79) Mr. MAHEU (Assistant Director-General) observed that a pilot project had been carried out in France and could be extended to Japan, where television was developing rapidly.

(80) Mr. AVIDOR (Israel) supported the idea so far, as concerned radio, but thought that the project for Asia in 1956 based on television should be postponed. It was too early to use television as a means of education in that continent.

(81) Mr. COWELL (United Kingdom) seconded the suggestion by the delegate of Israel.

(82) Mr. MAHEU (Assistant Director-General) considered that with regard to the attitude to be adopted towards television, a new phenomenon, there arose a question of principle. Unesco could acquire an influence in that sphere not possible for it to attain in media such as press and radio, where the pattern was already set. Would it not be wise to grasp that opportunity when television was still only feeling its way? In two years' time it might be too late.

(83) Mr. AVIDOR (Israel) thought that the point made by the Assistant Director-General would apply just as well in 1958 or later.

(84) Mr. COWELL (United Kingdom) was also unconvinced. How many television sets were there in Japan?

(85) Mr. SOEBROTO (Indonesia) seconded the proposal by the delegate of Israel.

(86) Mr. LEE (United States of America) suggested that the project, instead of being suppressed, should be classed as a low priority one.

(87) Mr. AVIDOR (Israel) did not accept that suggestion.

(88) Mr. JUNANKAR (India) said that the proposal was being examined in his country by the Ministry concerned with the television experiment in Bombay.

(89) Mr. DESJARDINS (Department of Mass Communication) explained that the use of television would develop in India following the experiment carried out in Bombay. He then read out a list of countries, including some in Asia, which had asked Unesco to co-operate in the project.

(90) The amendment of the delegate of the United States of America was not seconded. The motion put forward by the delegate of Israel, seconded by the United Kingdom and Indonesian delegates, that the Committee recommend deferment of the

project contained in paragraphs 186 and 187 was put to the vote and adopted with 8 in favour and 3 abstentions.

Development of the radio forum as a means of fundamental education (Mass Communication, paragraphs 188 and 189)

(91) Adopted.

III. The Training of Fundamental Education Specialists

1. International Fundamental Education Centres (Education, paragraphs 290-304)

(92) Mr. ELVIN (Director, Department of Education) said that two out of the four fundamental education training and production centres decided on by the General Conference four years ago had now been under way, Patzcuaro for four years and Sirs-el-Layyan for two. It had been difficult to finance them adequately on the budget now ending, particularly owing to the uncertainties of technical assistance. As continued existence on a sound financial basis was looked upon as vital, it was proposed to rely no longer on technical assistance for the maintenance of students, but to provide out of the normal budget not only for those of the host countries but for all students. Forty thousand dollars were being contributed by the Organization of American States. The work of both institutes was in good shape. A reorganization had taken place recently at Patzcuaro.

(93) Mr. AVIDOR (Israel) thought it opportune at that stage to propose that no conference, seminar or other activity should be organized by or with the support of Unesco in a region inaccessible for political reasons to any Member State. Israel, with her Arabic schools and educators, was interested in learning from and contributing to the Centre in Egypt, but had been discouraged from doing so, and subsequently the Director-General had stated at a press conference that Israel had not pressed for a share in the activities of that Centre.

(94) He read the following statement:

"I wish to bring to the Committee's attention the following statement on behalf of my Government: When it was proposed, at the sixth session of the General Conference in 1951, to establish a fundamental education centre in the Middle East, my delegation indicated its interest in such a centre and proposed that it be established in a place accessible to all Member States. When the centre was about to be established in Egypt we brought the matter up before the Secretariat and the Executive Board, and were assured by the Secretariat, in writing, that the Egyptian centre would be accessible to Israeli educators.

Our interest in this centre is indeed great, for we could both learn from it and contribute to it. We have in Israel an Arab-speaking population and a network of government schools conducted in Arabic, and we also have in Israel a small but important group of educators who are Arabists well versed in Arabic and also intimately familiar with the Arab way of life and Arab mentality.

We had made all necessary preparations to send a team of educators to the centre in Egypt when it was hinted to us that our request might embarrass Unesco. When the Director-General visited Israel several months ago he was asked at a press conference why Israel was not participating in the Egyptian Centre. His brief answer was that Israel had not pressed for it. The Director-General was our guest, and I, who was present at the press conference, preferred not to elaborate on the matter.

My delegation will support all efforts to improve education in the Middle East, including further support for the Egyptian Centre, but I wish, on this occasion, to request the members of the Committee to convey to their delegations our earnest request - and I want especially to impress it on the Secretariat and all its departments and sections - that no conference, seminar or any other activity of a regional nature shall be organized by or with the support of Unesco in places that are inaccessible, for political reasons, to any Member State of this Organization."

(95) Mr. MAHEU (Assistant Director-General) thought that there was little he could say about Mr. Avidor's statement. The delegate of Israel had made his Government's position clear. He (Mr. Maheu) could but confirm that all Unesco's regional or local undertakings were subject to regulations which provided in particular that they should be open to observers of all the other Member States.

(96) Currently, Mr. Maheu added, the Secretariat was tending to revise its policy on the setting up of international and regional fundamental education centres. The original idea had been to create a world network of regional centres following the success achieved in Latin America. But Unesco had, at the very beginning, come up against the problem of finance in bringing the network into being. Moreover, there were few regions linguistically and politically homogeneous enough to ensure the success of a regional centre. For all these reasons, the Secretariat was disposed in future to concentrate rather on the development of national centres of fundamental education.

(97) Mr. LEE (United States of America) said that the question of principle raised was an important one and should be taken note of, but that the Committee was not the appropriate place for action to be taken on it.

(98) Mr. AVIDOR (Israel) merely wished that such things should not occur again in the future.

(99) The CHAIRMAN said that the statement by the delegate of Israel would appear in the records.

(100) Mr. SILLER (Mexico) asked whether there was any connexion between the reorganization mentioned and the new agreement concluded with the Organization of American States.

(101) Mr. ELVIN (Director, Department of Education) said he referred merely to an internal

administrative change. Training of students and production work at Patzcuaro were to be merged in order to give the studies greater unity and efficiency.

(102) Mr. COWELL (United Kingdom) asked if it would not be possible to seek further assistance from outside. Was $40,000 the last word of the Organization of American States? The Institutes had done well enough without the sums Unesco proposed to allocate to students. Were these essential?

(103) The CHAIRMAN, speaking as delegate of Australia, on policy rather than on budget, wondered whether it was psychologically right to assure the maintenance of students whose costs should really be met by the participating countries.

(104) Mr. ELVIN (Director, Department of Education), answering Mr. Cowell's question first, said that the figure of $40,000 was the highest the Organization of American States could give directly, but they were also contributing through a newly instituted Bureau for the Production of Materials for Fundamental Education in Latin America. Other resources might be found, but it would be most unwise to budget on hopes. In reply to Mr. Cowell's other remark, he said that the Centres had not got on well without the proposed allocation from the budget.

(105) In answer to the Chairman's point, he said that Member States already maintained the students' salaries at home, and paid for their travel. Enquiries had been made, and it was probable that in the Middle East, where fundamental education had been virtually unknown before, there would be very few students if Member States were required to pay for them, while in Latin America, where the idea was more widespread, only a few States would be willing to do so.

(106) Mr. COWELL (United Kingdom) asked if the measure might be looked upon as a temporary one, taken in order to fill a gap.

(107) Mr. ELVIN (Director, Department of Education) replied that it could concern only the next two years.

(108) Mr. LEE (United States of America) said that the foregoing remarks showed how important it was to make every effort to develop national centres. The United States of America would give high priority to such efforts.

(109) Mr. ELVIN (Director, Department of Education) pointed out that Mr. Cowell's objections were met by paragraph 300, which stated that Member States after 1957 would have to meet maintenance costs either from their own funds or from funds ear-marked in their technical assistance programmes.

(110) Mr. SILLER (Mexico) was against any change in the present system of contributions, on the grounds that it would lead to complications and delay in payments and might also bring about changes in the agreement signed with Mexico.

(111) Mr. ELVIN (Director, Department of Education) agreed that such a policy would involve many complications both for the students and for the Member States concerned.

(112) The paragraphs on international fundamental education centres were adopted.

2. Aid to national fundamental education centres (Education, paragraphs 305-7)

(113) Mr. ELVIN (Director, Department of Education) said that the Secretariat was strongly in favour of giving direct assistance to promote the creation and upkeep of these centres, in view of the difficulty of starting any new international ones.

3. Scholarships in fundamental education (Exchange of Persons, paragraphs 32, 53, 55, 57, 59, 60)

(114) Mr. W. CARTER (Head, Exchange of Persons Service) explained that the purpose of the fellowships was to give the opportunity to highly qualified experts in Member States to make comparative observations.

(115) Sir Ronald ADAM (Chairman of the Executive Board), at the request of the Chairman, said a few words on his recent visit to Patzcuaro. What had impressed him most was the spirit of the students. There was one disturbing factor: groups of students, full of enthusiasm at the end of a course, were dispersed upon their return home. That was a regrettable waste of all the resources that had been spent on their training. He suggested that a meeting of Latin American Ministers of Education should be called at Patzcuaro to find a solution to that question. He also stated that the posters produced at the Centre could be improved.

The meeting rose at 12.50 p.m.

# SEVENTH MEETING

*4 November 1954 at 3.30 p.m.*

*Chairman*: Mr. GARDNER DAVIES (Australia)

**FUNDAMENTAL EDUCATION (document 8C/DIV/30) AND PROPOSED PROGRAMME AND BUDGET FOR 1955-56 (8C/5) (continued)**

**IV. PRODUCTION OF READING MATERIAL FOR NEW LITERATES**

(1) The CHAIRMAN invited discussion on Education: paragraphs 310-312.

(2) Mr. ELVIN (Director, Department of Education) said that the paragraphs under discussion related to studies in methods of teaching adults to read and write. Such efforts would be of little use unless followed by the provision of reading material, which for many Member States was difficult. It was therefore proposed to give financial assistance, at their request, to national and regional institutions conducting experiments as a result of the Unesco study in 1953 and 1954.

(3) No comments were made and projects 310-312 were thus approved.

Cultural Activities, paragraphs 186-201

(4) Mr. THOMAS (Director, Department of Cultural Activities) drew attention to the grave problem met with by many Member States in making reading matter available to new literates, since vernacular literature was all too often lacking. Unesco had therefore concluded contracts on a very modest scale with certain Indian institutions with a view to the production of booklets dealing with national and social life. It was intended to help or encourage Member States to produce simple, attractive and inexpensive publications so as to keep alive the desire for reading and prevent those who had benefited by literacy campaigns from falling back into their former ignorance. Various working methods had been proposed, and, if these were to be effectively carried out, close co-operation between the different departments of Unesco was essential. During 1955 on-the-spot studies would be undertaken in various countries with the collaboration of National Commissions and local authorities. Paragraphs 191 to 200 listed modes of action, both direct and indirect, designed to solve this vast problem, which was destined, alongside that of fundamental education, to become one of Unesco's main tasks.

(5) Replying to a question by the delegate of the German Federal Republic, Mr. Thomas said that the plan was to begin with three or four countries specially interested in the problem. The National Commissions and the education authorities would give guidance to Unesco missions, whose job it would be to make an inventory of existing resources. There were two problems - that of selection and that of printing. There were likely to be considerable opportunities of obtaining assistance in choosing contemporaneous works that lent themselves to adaptation. In addition, certain publishers had expressed readiness to collaborate with Unesco in the printing and distribution of attractive and inexpensive works.

(6) Mr. COWELL (United Kingdom) asked what methods were used in the important and difficult task of judging the material provided.

(7) Mr. THOMAS (Director, Department of Cultural Activities) said that the National Commissions of the countries concerned were the bodies best qualified to advise Unesco through systematic consultation. Methods of action should be worked out on the spot, in close liaison with these Commissions and the national authorities, by selecting a few countries to which the problem was of immediate concern. On the basis of the data thus assembled, Unesco would be able to put forward a working plan for one or two years. Works belonging to world literature could be selected, translated and published in cheap editions. Well-known authors could also be asked to write booklets on various subjects specially intended for this class of reader. In addition to such direct action, the programme also envisaged the offer of prizes to encourage production of this kind. Finally, there was provision for Unesco aid to enable governments and National Commissions to launch a system of distribution and production. Each country had its own problems and no hard-and-fast method could be laid down.

(8) Paragraphs 186-201 were adopted.

Mass Communication, paragraphs 181 and 182 and Social Sciences, paragraph 128

(9) No comment.

V. General Aid to Fundamental Education Projects

1. Servicing associated projects (Education, paragraphs 282-289)

(10) Mr. ELVIN (Director, Department of Education) said that the system of associated projects was

expanding, there were at present fifty in seventeen different countries. It was now proposed to link associated projects with an expert mission on fundamental education and to appoint two experts who would spend the greater part of two years visiting the regions concerned and giving constant advice and supervision in the development of the various projects. Paragraph 284 contained a new and significant proposal. It was felt that regional centres in fundamental education would not be justified unless their graduating students were subsequently given suitable work in their own countries, and it was therefore proposed to encourage co-operation by sending to a country which guaranteed to employ students graduating from the Sirs-el-Layyan Fundamental Education Centre, an expert entrusted with the setting up of a fundamental education centre.
(11) A propos an earlier question by the United Kingdom delegate in connexion with paragraph 285, Unesco did not in any way intend to direct associated projects; its function was rather to advise and act as a catalyst. Unesco was, however interested in the status of women and in seeing remedied the inequalities which existed in the field of education.

(12) Mr. COWELL (United Kingdom) thanked the Director of the Education Department for his reassurance; the speaker had perhaps misunderstood the term urged. He had been concerned because there were fourteen associated projects in territories connected with the United Kingdom.

2. Fundamental education within the framework of the educational programme for Palestine refugees (Education, paragraphs 232-235)

(13) Mr. ELVIN (Director, Department of Education) drew attention to the fact that the students at the Sirs-el-Layyan Centre would include a team of five from the project on education of Palestinian refugees.
(14) There was no comment.

3. Emergency Educational Assistance to Korea (Education, paragraphs 241 and 242)

(15) Mr. ELVIN (Director, Department of Education) said that, following a recommendation made by UNKRA, it was proposed to send a fundamental education expert to start a centre in Korea.

(16) Mr. COWELL (United Kingdom) asked whether the provision for staff travel was really necessary.

(17) Mr. ELVIN (Director, Department of Education) explained that it was difficult to keep in touch with work in Korea. Some contact had been made by staff members who had managed to visit Korea from Tokyo, but it would be wise to make provision for staff travel.

4. Gift Coupon Programme (Mass Communication, paragraphs 211-221)

(18) Mr. MAHEU (Assistant Director-General), pointing out the reference made to the Unesco Gift Programme, suggested that the discussion on coupons should be opened when they came to examine the chapter on Mass Communication

(19) The CHAIRMAN approved this suggestion.

VI.1. Evaluation of Literacy Campaigns (Education, paragraphs 271 and 272)

(20) Mr. ELVIN (Director, Department of Education) said that these paragraphs reflected the general feeling that Unesco should review its efforts and help Member States to assess the methods used. The criterion of success in the literacy campaign was not how many people were still attending classes after three months but how many were reading worth-while literature after one year. It was proposed that an evaluation should be carried out by two experts: one an expert in teaching adults how to read and write, and the other an educationalist with a sociological background, who would work in a selected region. At Headquarters close collaboration would be maintained between the Departments of Social Sciences and Education.

VI. 2. Evaluation of the results of fundamenta education projects (Social Sciences, paragraphs 232-235)

(21) Mrs. MYRDAL (Director, Department of Social Sciences) said that an initial survey was being conducted in 1954 by the Department of Cultural Activities in collaboration with the Department of Social Sciences, on the value of a public library set up in Delhi. It was hoped that the evaluation would be carried out in 1955 by local research teams in India, with foreign assistance, if requested.
(22) The second project, outlined in paragraph 235, represented a combined attempt by the Departments of Education and Social Sciences to evaluate fundamental education. A survey was being made to ascertain the best techniques, after which the major responsibility would fall on the operating department. For that reason the cost came in the budget for the Department of Education.

(23) The CHAIRMAN said that the consideration of fundamental education was now completed. The discussion had been very valuable and a clear idea had emerged of how the different projects were knit together. He thanked the Directors of the Departments concerned for their statements.

(24) Mr. COWELL (United Kingdom) supported the remarks of the Chairman and proposed that they should be included in the Rapporteur's report.

**CHAPTER 4. CULTURAL ACTIVITIES** (continued)

Project 4.34: Development of libraries

Paragraphs 202-215

(25) No comment.

Paragraphs 216-218

(26) Mr. THOMAS (Director, Department of Cultural

Activities) gave a few details about the experiment currently proceeding, in association with the Colombian authorities, in organizing a public library in the industrial town of Medellin. The Director-General had just returned from taking part in the inauguration of the scheme. The library was not specially designed for fundamental education but the Colombian authorities were about to undertake a fundamental education drive in Medellin, and it was Unesco's intention to use the library as additional leverage. The drive was being conducted on the same lines as that in New Delhi, where the contracts had expired.

Paragraphs 224-229

(27) Turning to project D Mr. Thomas stated that one of Unesco's aims was the inter-library exchange of publications. In many countries exchange centres were already functioning and relaying Unesco activities, and it was felt that the Latin American countries should be invited to a conference in order to consider an extension of exchanges between themselves and the rest of the world.

(28) Mr. LEE (United States of America) pointed out that there was no mention of the Organization of American States, which was interested in the subject. He assumed that that Organization would not be associated with the project.

(29) Mr. THOMAS (Director, Department of Cultural Activities) said that, although the Organization of American States was not expressly mentioned, the Secretariat proposed to inform it of the project and obtain from it the same support received at the Sao Paulo Conference, in which the Organization of American States had taken an active part.

Project E (paragraphs 230-243)

(30) Mr. Thomas said that this project was a continuation of what had already been done for several years under the heading of Associated Projects. The list of publications in preparation or now appearing was given in paragraphs 233-243; all of them were designed to assist in the development of popular libraries in Latin America and South East Asia.

Paragraphs 264-267

(31) Mr. Thomas observed that paragraphs 252-267 indicated various fields in which it was proposed to give direct aid to Member States. Project H related to requests from the countries of southern Asia and dealt with the creation or development of national or university libraries.

(32) The CHAIRMAN, speaking as delegate of Australia, said that his Government considered the project of the greatest importance and had arranged for the Deputy National Librarian to accompany the Asian tour and to assist in co-ordinating results in Paris.

(33) Mr. THOMAS (Director, Department of Cultural Activities) added that this mission was functioning at the moment. Mr. E.J. Carter, Head of the Libraries Division, was on his way to South Asia, accompanied by the Australian librarian to whom the Chairman had referred. He wished to express the Secretariat's appreciation of the Chairman's co-operation which would help to strengthen Unesco's action in the field of libraries.

Paragraphs 268-277

(34) Mr. Thomas said that project I was another example of direct aid to Member States by setting up a small microfilm library, under the direction of a qualified expert, which would visit regions where, judging by requests received, the need appeared to exist. The unit was to begin work in 1955 and might be installed in Latin America in 1956, where it could be attached to the Havana office.

(35) The microfilming of all documents preserved in libraries, archives and so forth seemed to be an urgent necessity, and Unesco would like to make available to interested Member States an apparatus and an operator, thus enabling the most pressing needs to be met. This was a new form of direct assistance but one which was often asked for.

(36) In reply to a question by the representative of Israel, Mr. Thomas indicated that the appropriation of $7,000 represented the purchase of equipment.

(37) Mr. LEE (United States of America) suggested that the project should be awarded a low priority, as being a little premature, but would not press the point.

(38) Mr. COWELL (United Kingdom) asked what countries were involved.

(39) Mr. THOMAS (Director, Department of Cultural Activities) did not have before him the official requests by Member States, but emphasized that, wherever contacts were made with libraries and documentation centres, the problem arose of obtaining the means for microfilming. Hitherto, Unesco had done no more than give advice by indicating the most effective technical methods, whereas this item in the programme made provision for more extensive direct assistance by making equipment and materials available to any States which might request them.

(40) The delegates of the United Kingdom, Israel and Canada thought that the priority of the project should be raised. A formal proposal to that effect was made by Mr. AVIDOR (Israel) and seconded by Mr. JUNANKAR (India).

(41) In reply to Mr. SOMMERFELT (Norway), the CHAIRMAN explained that, if the motion were lost, the activity would remain equal in priority to other projects.

(42) The proposal of the delegate of Israel was rejected by 7 votes against, 3 in favour, with 1 abstention.

Project 4.35: Development of museums

Paragraphs 278-295

(43) Mr. THOMAS (Director, Department of Cultural Activities) drew attention to a textual amendment to the French version: the Executive Board thought that the title of project A "La croisade des musées" would be better worded "Campagne en faveur des musées". The idea of this campaign had been launched by the International Council of Museums and several articles had appeared in Museum, in order to bring home to local authorities and teachers the potential value to the community of a museum in its present-day concept. It was proposed that an international museum day (or week) should be organized - he himself preferred the idea of a week; the preparations would be made in 1955 and the day or week held in 1956. This was rather like what had been done for public libraries some years previously by means of a manifesto which had led to important results.

(44) The CHAIRMAN, speaking as delegate of Australia, said that his Government would give a lower priority to a campaign of the kind described than to action for direct aid.

Paragraphs 296-301

(45) No comment.

Paragraphs 302 and 303

(46) Mr. THOMAS (Director, Department of Cultural Activities) said that these paragraphs referred to continuous action by Unesco under a resolution adopted at the sixth session of the General Conference to encourage Member States to exchange exhibitions. An exhibition organized by the Australian National Commission was at present on tour in the United States of America and Canada, and the latter country was prepared to organize another one. Unesco would act as an intermediary or clearing house between Member States, and its budget would not be affected.

(47) Mr. LEE (United States of America) hoped that the Secretariat would continue to examine and appraise the value of techniques used for international understanding. It was possible to exchange exhibitions without increasing such understanding.

(48) Mr. THOMAS (Director, Department of Cultural Activities) said that the United States delegate's views would be taken into account.

Paragraphs 304-311

(49) No comment.

Paragraphs 312-317

(50) Mr. THOMAS (Director, Department of Cultural Activities) said that several States had approached the Secretariat with requests, in some cases of a very detailed nature. Burma, for instance, wanted to start a museum and a national library, while India and Pakistan had also approached Unesco, which was planning to send combined missions to give advice to these Governments over a lengthy period.

(51) Mr. COWELL (United Kingdom) said that the United Kingdom National Commission thought that aid to Burma, India and Pakistan could be increased, and he had earlier proposed reducing the allocation for a travelling exhibition to that end. He thought that a higher priority should be given to aid to Member States than to mobile museums.

(52) Mr. LEE (United States of America) supported the views of the United Kingdom delegate.

(53) Mr. MAHEU (Assistant Director-General) observed that a motion to increase project E did not necessarily imply a reduction in project D, a reduction which in any case had been rejected by an earlier vote.

(54) The CHAIRMAN thanked the Assistant Director-General for his explanation but said that a formal proposal would have to be made.

(55) Mr. JUNANKAR (India) proposed that a higher priority be given to the whole project. The proposal was seconded by the delegates of the United States of America and France.

(56) The proposal of the delegate of India was adopted by 8 votes to 1 with no abstentions.

(57) Mr. COWELL (United Kingdom) asked that the Rapporteur should relate his remarks on Section E to his earlier statement on Section D.

(58) After discussion, it was agreed that it was not appropriate to include views in the report and the United Kingdom delegate said that he would be satisfied if the minutes of the previous meeting reported his views sufficiently fully.

(59) In reply to a question by Mr. CABOUAT (France) whether the Committee should give priority to project E in exchange for withholding it from other projects, the CHAIRMAN said that the Committee was examining projects individually without taking account of the relations between them.

Project 4.41: History of the Scientific and Cultural Development of Mankind

Paragraphs 318-325

(60) The CHAIRMAN drew attention to document 8C/PRG/7.

(61) Mr. THOMAS (Director, Department of Cultural Activities) said that the project for a History of the Scientific and Cultural Development of Mankind, which had been exhaustively discussed at previous sessions of the General Conference, was well known to the Committee and he would confine himself to reporting the most recent progress made. The Commission had continued its work and had published five Cahiers; it had held an important meeting

last February and its Bureau had met still more recently. From its decisions it was clear that the manuscript of the six volumes of the History was to be ready at the end of 1956, but that the final revision of the English text - the first to appear - would take up part of 1957; the History would be published in 1958. The contract concluded with the firm of Little, Brown and Co. specified that the latter also undertook to publish two abridged editions, the first in one volume, designed for the general public, and the second in two volumes, designed for students. The Unesco Legal Affairs Bureau considered this contract to be very satisfactory. The problem of replacing two of the general editors who had died had caused some delay, but the editing was nevertheless making satisfactory progress. As regards the budget, it had been decided at the seventh session of the General Conference that $53,000 should be allotted to this project in 1953 - a figure which had been reduced to $30,000 for 1954 - in the hope of obtaining support from the Rockefeller Foundation; the Foundation however had rejected the request, as it felt that the scheme was a matter for Unesco. At its extraordinary session in July 1953 the Conference authorized the grant of additional funds, which the Executive Board had fixed at $27,000 for 1954; the same sum, to be exact, $57,500, was requested for the years 1955 and 1956, the Executive Board having unanimously expressed the opinion that the project should be completed. Document 8C/PRG/7 gave all the details of the draft project for 1955 and 1956.

(62) Mr. SOMMERFELT (Norway) said that the project had originally been opposed by Norway and other countries, who thought it would be better carried out by national bodies. Unesco's success, however, was now acknowledged. But he would like to have a more detailed account of how the funds had been spent.

(63) Mr. SILLER (Mexico) asked what circulation the Cahiers had had, what part Unesco had played in their distribution and whether it would be advisable for Unesco to assist in popularizing these publications. Through the intermediary of Unesco it might be possible to awaken interest in them in certain circles which were otherwise difficult to reach.

(64) Mr. THOMAS (Director, Department of Cultural Activities) said that the Cahiers were published by a firm which distributed them under contract with the Commission. The latter considered the distribution to be insufficient and fresh talks had been held between the Secretary-General of the Commission, the publisher and a Unesco representative in order to plan a more energetic distribution campaign.

(65) In reply to a question by Mr. SILLER (Mexico), Mr. THOMAS said that Unesco had taken no action yet but thought that its Publications Service might help in distributing the Cahiers.

(66) Mr. COWELL (United Kingdom) associated himself with the views of the delegate of Norway. With regard to the point raised by the Mexican delegate, he wondered whether there was any possibility of the price of the Cahiers being reduced, since their cost had been the chief obstacle to their distribution.

(67) Mr. THOMAS (Director, Department of Cultural Activities) welcomed this statement, which bore out the remarks of the Mexican delegate. A preliminary report had been drawn up as a result of discussions between the Commission, the publisher and Unesco; the Secretariat hoped that a serious effort would be made to distribute the Cahiers and was ready to lend its help.

(68) Mr. SOMMERFELT (Norway) said that there should be more publicity; the project was unknown in Scandinavian countries.

(69) Mr. BOW (Canada) asked whether funds would be required after 1957-58.

(70) Mr. THOMAS (Director, Department of Cultural Activities) remarked that the needs of the Commission would be fewer in 1957, since there would be no more contracts to conclude nor meetings to be provided for. Nineteen fifty-seven would be devoted to the essential revision required to give uniformity to the six volumes and it could be assumed that the requisite estimate would be very much below that asked for 1955 and 1956; in 1958, in the normal course of events, no further budget should be needed for the History, as the manuscript was to be delivered by the end of 1957.

Project 4.42 - Study of cultural relations (paragraphs 326-340)

(71) Mr. Thomas said that the title should be changed to read: Study of relations between cultures. Section A dealt with the publication of reports on the international discussions, organized in 1954, at Sao Paulo and Geneva, on the cultural relations between Europe and America; it was proposed to publish the results of these discussions and a selection of the communications.

(72) Section B comprised two parts, the first of which was the continuing collaboration established between Unesco and the Rencontres internationales de Genève. The latter had been held for eight years past. Since 1952 the Rencontres had concluded a contract with Unesco and in 1954 agreed to organize round-table discussions; the organizers had made great efforts to adapt themselves to Unesco methods and the Secretariat hoped that the successful collaboration secured would be maintained. The second part concerned the countries of Asia and America, and Unesco would like to organize these discussions in collaboration with the United States National Commission.

(73) Mr. LEE (United States of America) considered the section of great importance. With regard to the discussion referred to in paragraph 335, the idea of international discussions between representatives of Asian and American cultures was favourably received by the American National

Commission, which welcomed the opportunity for participation. He hoped that there would be adequate preparatory work so that the representatives from the two areas would have some prior knowledge and understanding of each other's culture and traditions.

(74) Mr. COWELL (United Kingdom) asked how the figures in paragraph 336 were related to the proposals in paragraphs 334 and 335.

(75) Mr. THOMAS (Director, Department of Cultural Activities) explained that the sums mentioned in paragraph 336 were divided between the two projects, the appropriation for 1955 being allotted to project (i) and that for 1956 to project (ii).

(76) Mr. CABOUAT (France) supported the remarks of the United States representative on the importance of the part which might be played by Section B in the development of international understanding.

(77) Mr. THOMAS (Director, Department of Cultural Activities) then gave an outline of Section C (paragraphs 337-339), which was the reply to a request presented to Unesco some considerable time ago. The Pan-American Institute of Geography and History and the National Archives of Mexico had undertaken to make an inventory of these documents so as to begin a study of them. Unesco had been requested to facilitate access to the archives concerned, and to help the missions which came to carry out the investigation. Mr. Thomas stressed the importance of this project both for the history of Latin America and for that of the development of relations between America and Europe; it was the natural sequel to the Geneva discussions, which was why it had been included in the programme.

(78) The CHAIRMAN asked how many research workers would be provided under the $8,000 allowed for 1955 and 1956 and for what period.

(79) Mr. AVIDOR (Israel) asked whether the contracts included publication and, if so, how research was provided for.

(80) Mr. THOMAS (Director, Department of Cultural Activities) said that there was only one contract with a qualified organization - to enable it to organize a mission, there was no question of publications.

(81) The CHAIRMAN asked on what basis the preliminary figure of $8,000 had been calculated.

(82) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that it was difficult to make precise calculations, but it had been assumed that there would be one expert in each year for approximately eight months.

(83) Mr. COWELL (United Kingdom) questioned the urgency of the project on the history of Latin America in paragraph 338 and the priority accorded to it.

(84) Mr. SILLER (Mexico), in reply to the representative of the United Kingdom, said that at one time some doubts were felt in Mexico as to the direction which these investigations should take, and who should carry them out, since some sectors of public opinion thought it was purely a domestic matter. However, as certain Latin American countries had no connexions with the European countries where the enquiries would be conducted, and Unesco offered better opportunities for disseminating the results, he approved the project. (85) The sum allotted to this work should be maintained until States were in a position to carry it out themselves.

(86) Project adopted.

Project 4.43: Dissemination of the visual arts and music

Paragraphs 341-350

(87) Mr. THOMAS (Director, Department of Cultural Activities) said that the credits included in paragraph 350 were intended for the publication of revised editions of the two catalogues which had already appeared; the catalogues were having a large sale.

Paragraphs 351-353

(88) This series in which two volumes had already appeared, would be continued with the publication of an album on aboriginal Australian art. The credits provided would permit the publication of three volumes a year; in 1955 they would be devoted to Norway, Yugoslavia and Iran.

(89) Mr. COWELL (United Kingdom) strongly supported the preparation of albums of reproductions of works of art but questioned the high figure for staff travel.

(90) Mr. THOMAS (Director, Department of Cultural Activities) said that Unesco's function was to provide the negatives. The practice was to send a specialist to the place in question, accompanied by a photographer of the firm of Pizzi, who would take the pictures. The appropriations mentioned in paragraph 353 were intended to cover the costs of three missions in three countries each year. As the emphasis was to be on little known works of art, mostly situated in Asia and Latin America, the travelling expenses would be relatively high. The publisher was responsible for publishing and distributing the albums at his own expense; he refunded a percentage of the selling price to Unesco.

(91) Mr. JUNANKAR (India) was also strongly in favour of the project, which was an important method of promoting cultural understanding. He would like to see more spent on the project and suggested that the Secretariat might prepare a more comprehensive plan on a five or ten year basis. It was important, however, that such publications should be within the reach of ordinary people. Their price was at present prohibitive.

He asked whether Unesco could consider itself financing a project for providing lower priced publications.

(92) Mr. COWELL (United Kingdom) asked for information on receipts from the sales of publications. Although the price was high, he wondered if it covered all overheads, including such items as staff travel. While appreciating the views of the Indian delegate, it was difficult to maintain quality with low costs, and the public must recognize that, if it wished for culture, it might have to sacrifice other things.

(93) The CHAIRMAN, speaking as delegate of Australia, asked whether National Commissions could help the project in kind, for instance by contributing coloured photos (Ektachromes) for the albums. It was not unreasonable to expect the Commissions to participate in disseminating culture.

(94) Mr. THOMAS (Director, Department of Cultural Activities) referring to the remark by the Indian representative on the high selling price of the albums, stated that at $15 they were still very much cheaper than other publications with such a high class content. Unesco supplied the publisher with the Ektachromes and the commentaries. The number of copies printed (10,000) was considerable for works of this kind, and the albums were widely distributed owing to the fact that they were issued in several languages. The publisher remitted 1% of the selling price to Unesco; for three albums this represented about $2,250 per annum. Although this sum did not reimburse Unesco for all its expenses, it enabled systematic surveys to be carried out in all those countries whose paintings were little known. Despite this, Mr. Thomas agreed with the Indian representative in considering that Unesco should prepare a systematic plan, for five years or more, which could be submitted to the next session of the General Conference. It should be noted, on the other hand, that the possibilities of distributing such works were not unlimited, and he wondered whether Unesco could not get the publisher to agree to publishing 6 albums each year. He mentioned that the Australian National Commission had arranged to take a number of photographs at its own expense, but it would be difficult to ask other National Commissions to do the same.
(95) The Secretariat was ready to study the suggestion, but Mr. Thomas observed that, if Unesco undertook to bear the essential cost, it could visit the various places itself and form its own opinion whether the works were of world-wide interest. The Secretariat would, however, welcome a recommendation by the Conference suggesting that Member States should bear part of the cost.

Project C (paragraphs 354-356)

(96) Mr. Thomas recalled that this activity already had quite a history, the first exhibition had been shown in 34 countries, the second in 36, the third in 47, and the fourth, which was of Japanese prints, was currently circulating; it had already visited 20 countries and in equal number were still expecting it. Mr. Thomas stressed that these exhibitions were warmly welcomed everywhere, and he stated that the next would be devoted to Chinese art. A selection of works already exhibitied would be shown in Montevideo during the current session of the General Conference. Mr. Thomas concluded by saying that, in accordance with a recommendation of the General Conference, the last two exhibitions had dealt with oriental art and that the Secretariat intended to continue the series.

(97) The CHAIRMAN asked whether the cost of supplies included the cost of sending and insuring exhibitions as far as the first benefiting country.

(98) Mr. SILLER (Mexico) said that the Mexican National Commission had much pleasure in supporting the project. The exhibition of reproductions of Japanese art had had considerable success in in Mexico. It had been shown in three galleries, one of them a State institution. In connexion with the exhibition three lectures had been given by the Japanese cultural attaché, by Señor Octavio Paz, and another expert respectively. The welcome given to this art exhibition had led to its being extended for a further three months.

(99) Mr. CABOUAT (France) said that he had already mentioned the importance attached by the French National Commission to these travelling exhibitions. His own impression confirmed the remarks of the Mexican delegate and led him to suggest that the Secretariat, while continuing to place sample exhibitions at the disposal of Member States, should also sponsor the sale of the reproductions exhibited; the money thus collected could be used to set up a fund which would enable fresh exhibitions to be held with no additional cost to Unesco. The execution of the project would undoubtedly be facilitated by collaboration with the International Association of Plastic Arts, the Association of Art Critics and the International Council of Museums .

(100) Mr. RAO (Acting Chief, Bureau of Programme and Budget) referred the Committee to the Appropriation Resolution. Any receipts by Unesco from sales were credited to miscellaneous income and shown as a reduction in the Appropriation Resolution.

(101) Mr. COWELL (United Kingdom), returning to the question of sales, felt that the time had come to draw up a balance sheet of commercial activities. It would be useful in discussions at the General Conference.

(102) Mr. MAHEU (Assistant Director-General) said that, if it was a question of obtaining information on the cost of, and possible revenue from, the project, the Secretariat was at the Committee's disposal to provide further details. If, on the other hand, the question at issue was the principle of placing the programme on a commercial basis, the Director-General, he feared, might voice some surprise and regret at such a principle

being raised in their discussions, especially in a cultural context.

(103) The CHAIRMAN interpreted the United Kingdom delegate's intention as being to show that, if revenue were taken into account, the cost of some projects might be less than appeared from the budget.

(104) Mr. RAO (Acting Chief, Bureau of Programme and Budget) suggested that discussion of revenue bringing items might better be left until the Appropriation Resolution was discussed. He realized that it would be useful to have the facts: for example, the Catalogue of Colour Reproductions (paragraph 347) had already more than covered its cost, and such a fact was good propaganda for Unesco in securing approval for other projects. He promised that full information would be supplied by the time the Appropriation Resolution came up for discussion.

(105) Mr. JUNANKAR (India) associated himself with the views of the Mexican delegate. While he agreed with the United Kingdom delegate that it was worth knowing how far some activities paid their way, it was important not to become obsessed with economies: there were dangers in commercial balance sheeting.

Paragraphs 357-359

(106) Mr. THOMAS (Director, Department of Cultural Activities) said that these three paragraphs concerning project D, had been transferred from the programme of the Department of Cultural Activities to that of Mass Communication.

Paragraphs 360-362

(107) Mr. Thomas said that these recordings were made under the auspices of the International Music Council with the help of a Unesco subsidy. All that the Secretariat did was to receive some copies of the recordings for distribution to Member States. The appropriation of $800 provided for under paragraph 359 for 1955 and 1956 was to cover the purchase of special containers for transporting the records.

(108) Mr. COWELL (United Kingdom) asked whether the records referred to in paragraph 361 were distributed free of charge or sold.

(109) Mr. THOMAS (Director, Department of Cultural Activities) replied that, in the case of folk music recordings, an agreement had been made with the Museum of Ethnography in Geneva, which produced the records selected by a committee of experts and sold them to learned societies. The International Music Council received no percentage of these sales. In the case of contemporary music, IMC acted as adviser to the publishing houses; in both cases a number of records were sent to Unesco for information of Member States.

Paragraphs 363-368

(110) Mr. Thomas referred to the agreements concluded with the boards of adjudicators at the Biennales of Venice and Sao Paulo, which enabled certain works to be reproduced and so become better known. In the case of music IMC had undertaken to have recordings made and musical scores printed. He drew attention to paragraph 367, concerning travel grants awarded to artists and writers, to a total of 5 for the years 1953 and 1954; the Secretariat hoped to raise this figure to 7 for the years 1955 and 1956.

Paragraphs 369-371

(111) Mr. Thomas said that the aim of this project was to request National Commissions to conduct an experiment in using all the modern methods of reproduction to encourage wider and more systematic public interest in artistic matters. The locality selected for the experiment should be a town of medium size, and the results would indicate what could be done to improve public taste.

(112) He added that there were two reasons why a reduction had been made in the budget for 1955. First, they were anxious that the reintroduction of the Index Translationum should not lead to an increase in the budget ceiling, and they had looked to see where savings could be made. Second, in 1955 a survey only would be made in the Member States, in which the Secretariat would collaborate; the project would not be put in hand until 1956.

(113) Mr. LEE (United States of America) said that, after studying all the art projects, he believed that the one under discussion was the least important and proposed its postponement.

(114) Mr. COWELL (United Kingdom) seconded the proposal.

(115) The proposal of the United States delegate was adopted by 6 votes to 3 with 2 abstentions.

Project 4.44: Translations (paragraphs 375-391)

(116) Mr. THOMAS (Director, Department of Cultural Activities) emphasized the great importance of this project, which was beginning to show results. He referred members of the Committee to the draft programme, where all the necessary explanations would be found. The project was progressing in a succession of series, the order of priority being Arabic, Ibero-American, Italian and Persian, in which 9, 6, 3 and 1 volumes respectively had been published. The General Conference had decided to extend this activity to the literature of Asia, and the Secretariat had turned its attention to India, Japan, Pakistan and Thailand; 25 works were in process of translation or printing, and negotiations were proceeding on 20 others, but no contracts had yet been concluded.

(117) Mr. JUNANKAR (India) strongly supported the project and said that he would welcome an extension of activity for both periods.

(118) Mr. COWELL (United Kingdom) agreed with the delegate of India on the importance of the work.

He regretted that there had been such a small output and thought that staff costs were too high in proportion to achievement.

(119) Mr. THOMAS (Director, Department of Cultural Activities) noted the Indian representative's wish for an increase in the number of volumes published; as already stated, 25 volumes were in course of production and 20 were being negotiated. The difficulties attaching to this translation programme were that it dealt with little known languages for which only an extremely limited number of competent translators were available and, in addition, revision of the texts entailed considerable delay. The practice was to ask publishing firms to take over publication on the basis of contracts concluded with Unesco, which undertook to buy a certain number of copies of each work. Remarking that it was not easy to find publishers, Mr. Thomas said that later on Unesco itself might possibly assume the cost of printing and commercial distribution. A professional publisher, however, would seem to have greater opportunities of reaching the public; another difficulty was bound up with the question of copyright, which also implied negotiations. Finally, he said he could assure the Committee that 25 volumes would shortly be appearing.

(120) Mr. COWELL (United Kingdom) hoped that the output would eventually justify the initial outlay. He asked for more information on how costs in paragraph 375 were calculated, and how the staff costs were apportioned.

(121) Mr. RAO (Acting Head, Bureau of Programme and Budget) said that other costs included contracts and meetings. In distributing staff costs, however, it was difficult to assess what percentage should be applied to each project. The amounts of $32,375 for 1955 and $33,195 for 1956 were based on the assumption that approximately 25% of the budget of the Division of Arts and Letters would be assigned to the project, including salaries and other staff costs under the Staff Regulations.

Paragraphs 398-414

(122) Miss LAISE (United States of America) noted that the staff of the Office of the Director followed the same pattern throughout the Organization, regardless of the number of staff employed. She also questioned the need for an additional clerk-stenographer (paragraph 403) in connexion with the implementation of the International Convention for the Protection of Cultural Property.

(123) Mr. MAHEU (Assistant Director-General) thought, in view of the United States delegate's first remark, that it would be better to discuss this problem of the staffing of the Director's office in relation to all Departments; to treat one Department separately from others might lead to unfair conclusions.

(124) Mr. THOMAS (Director, Department of Cultural Activities) pointed out that paragraph 403, as at present worded, called for a single post of clerk-stenographer E; in the corrigendum, provision was made, in addition, for a clerk-archivist F. He would mention that, since the Convention was signed, the work of the Secretariat had considerably increased; the Convention might come into operation shortly and it would then be essential to create this second post because of the specific tasks devolving upon the Secretariat, which it could not carry out with its present staff.

(125) Mr. SILLER (Mexico) asked Mr. Thomas whether the explanation he had just given referred to one or both of the posts in question.

(126) Mr. THOMAS (Director, Department of Cultural Activities) said it referred to both posts.

(127) Mr. CABOUAT (France) asked whether in 1954 any posts had been created for the work of preparing the Convention.

(128) Mr. THOMAS (Director, Department of Cultural Activities) said that a temporary post of secretary-stenographer had been created in order to deal with the large amount of correspondence. There would, however, be further tasks for the Secretariat once the Convention came into force - such as keeping a register of the works in each country which would be protected under the Convention, a list of which was to be communicated by the Secretariat to all Member States; the two posts for which permission was sought represented the minimum establishment necessary.

(129) Mr. AVIDOR (Israel) proposed the retention of only one of the two posts requested in the amended paragraph 403.

(130) Mr. CABOUAT (France) said that the French delegation felt somewhat reluctant to accept the proposals of the Secretariat. Every country had a central department with similar functions in such cases; in France, the fact of being the depository for a convention or agreement did not mean that new posts had to be created.

(131) Mr. MAHEU (Assistant Director-General) said that he was not proposing to evaluate the amount of work which this new situation would entail, but wanted to refer to the arguments adduced by the representative of the United States of America against creating these two posts. It was because Unesco hoped that the Convention would shortly be ratified that the Secretariat had estimated the amount of work which would result. He also pointed out to the representative of France that the responsibilities devolving upon Unesco in this connexion could not be compared with those of a country with which a diplomatic instrument was deposited, for example, the obligations of the United Kingdom in regard to the Unesco Constitution; it was not simply a question of depositing a text in the archives, but of keeping a register, with all the complicated work which this involved.

(132) Mr. SILLER (Mexico) proposed that the posts should not be filled immediately, but only when the need arose, i.e. when the Convention had been ratified.

(133) Mr. THOMAS (Director, Department of Cultural Activities) pointed out that only five ratifications were needed for the Convention to come into force. He emphasized that, apart from keeping a register, Unesco would then have many other responsibilities.

(134) Mr. SILLER (Mexico) asked whether these posts could not be provided when the need arose, or had they to be approved immediately because they would otherwise be suppressed?
(135) He pointed out that the United States delegation's proposal differed from his own. What his delegation proposed was that the posts should be created when the need for them arose.

(136) Mr. MAHEU (Assistant Director-General) said it was merely a matter of making provision in the budget for a situation that was expected to arise. The Director-General would only decide to create the post if it were found necessary after the Convention had come into force - a contingency which it was expected would arise during the 1955-56 financial year; these posts would be of a rather permanent value, whereas temporary posts were for some ten or twelve months only.

(137) Mr. SILLER (Mexico) asked whether any ratification had yet been received.

(138) Mr. THOMAS (Director, Department of Cultural Activities) replied in the negative.

(139) Mr. CABOUAT (France) thought that, if the Department of Cultural Activities needed staff to administer the Convention, there was no reason why that staff should not be in the permanent category. He therefore supported the proposal by the delegate of Israel.

(140) The proposal of the delegate of Israel, seconded by the delegate of France, was put to the vote and adopted unanimously.

(141) The CHAIRMAN announced that Natural Sciences would be discussed at the next meeting.

(142) Miss LAISE (United States of America) reserved the right to comment on the section of the programme dealing with copyright (Cultural Activities, project 4.13).

The meeting rose at 7.30 p.m.

# EIGHTH MEETING

*5 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION (continued)**

**CULTURAL ACTIVITIES (continued)**

Project 4.13: Paragraphs 84-100

(1) Mr. LEE (United States of America) suggested that, in order that the resolution contained in paragraph 86 should authorize the studies proposed in paragraph 93, it would be advisable to insert, after the words "Armed Conflict", in line 3, the words: "for the study c certain special copyright problems".

(2) Mr. THOMAS (Director, Department of Cultural Activities) agreed with Mr. Lee and proposed to join with him in working out a clearer wording of the resolution.

(3) Mr. LEE (United States of America) was of the opinion that the study of the rights of scientists should be referred to another Department, and although he considered the kind of activities mentioned in (c) and (d) useful, he would propose that these paragraphs be deleted from the programme for the present, in view of the general principle of concentration which his Government advocated.

(4) Mr. CABOUAT (France) asked Mr. Lee if he was alluding to the studies of special copyright problems dealt with in paragraphs 93-97, or if he had in mind other studies on the question. In the latter case close co-operation should be established with the interested organizations. In Europe the Berne Union should be consulted; copyright questions were also dealt with in the Council of Europe.

(5) The CHAIRMAN understood that the change suggested by the delegate of the United States of America was intended to cover the proposed studies only.

(6) Mr. LEE (United States of America) had no other study in mind. He agreed with the delegate of France in his desire that full use should be made of research carried out elsewhere.

(7) Mr. COWELL (United Kingdom) took the opportunity of expressing his country's gratification on learning that the United States of America had ratified the International Copyright Convention. It was a major event in publishing history, and he found it very satisfactory that it should have been achieved under the auspices of Unesco. If such a thing had happened 150 years ago, Sir Walter Scott would have died a rich man.

(8) Mr. LEE (United States of America) agreed that it had been an admirable function for Unesco to perform.

(9) Mr. SILLER (Mexico) asked the United Kingdom delegate if his country had already ratified the International Copyright Convention.

(10) Mr. COWELL (United Kingdom) replied that his country had long been a member of the Berne Copyright Convention. The differences between the two agreements were small, and were in process of adjustment.

(11) Mr. THOMAS (Director, Department of Cultural Activities) drew the attention of the United States delegate to the amended version of paragraphs 91-98(8C/5 Corr.), which had been prepared after the first meeting of the Provisional Copyright Committee and was based on its recommendations.

(12) Mr. LEE (United States of America) agreed that the changes introduced by the corrigendum were a considerable improvement.

**CHAPTER 2: NATURAL SCIENCES**

(13) The CHAIRMAN welcomed Mr. Auger, Director of the Department of Natural Sciences, and asked him to introduce the programme proposed under this chapter.

(14) Mr. AUGER (Director, Department of Natural Sciences) drew attention to the two sections of his Department's programme and budget. Section I was mainly concerned with permanent activities. For 1955-56 provision had been made for only one new activity - the International Geophysical Year - which would have to be continued in 1957-58. In 1955 Unesco was to contribute towards the establishment of a permanent Secretariat for that project. It had been put forward in 1951 by the Bureau of the International Council of Scientific Unions (ICSU), which had set up a Preparatory Committee; National Committees had been established in 13 countries. That activity afforded a fine instance of world-wide co-operation in the field of science.

(15) Section II consisted of planned activities in the field of scientific research and the teaching and dissemination of science. Mr. Auger drew special attention to research on the arid zone, physical

oceanography (the project on that subject was to be amended in the light of developments since the document was drafted), the expanded programme for science teaching, and the science co-operation offices, which were decentralized units for carrying out the natural sciences programme.

(16) The CHAIRMAN asked for general remarks on the chapter as a whole.

(17) Mr. COWELL (United Kingdom) said that, on principle, available resources should be applied to existing organizations before new developments were envisaged. He therefore proposed that more emphasis should be laid on international co-operation in scientific research at the expense of regional science co-operation offices and the programme for the dissemination of science. The existing organizations were doing a good deal of work in this last field. He also considered that, at the higher budgetary level, a disproportionate amount had been earmarked for the teaching of science, at the expense of other sections.

(18) Mr. AVIDOR (Israel) set a high value on the work in natural sciences in general. However, the National Commission of Israel had grave misgivings as to the advisability of keeping regional science co-operation offices. Regional activities could be performed just as well and often better by headquarters in Paris. Moreover, the regional office system tended to become contagious. It had already spread to the Department of Social Sciences.
(19) He agreed with the United Kingdom delegate that the development of international co-operation was highly important, as was also assistance to scientific research, and he thought that these projects should be strengthened at the expense of the regional offices. The dissemination programme could be transferred to the Department of Mass Communication, retaining the funds for earmarking to research.

(20) Mr. JUNANKAR (India) disagreed with the foregoing remarks. The programme of research and international collaboration was important, but the popularization of science should be considered as a high priority activity.
(21) His Government intended to put forward a separate resolution on nuclear energy. Unesco's efforts in Europe in this field were not enough.

(22) Mr. SOEBROTO (Indonesia) said that, while the remarks made by the delegate of Israel on regional offices might apply to countries relatively near to Unesco headquarters, they were not true of distant regions such as Asia. He suggested that the project for science co-operation offices should be maintained for distant countries.

(23) Mr. LEE (United States of America) reminded the meeting of its present purpose of concentrating the programme. This chapter could perhaps be taken a little further in that direction. He would like to have some indication whether or not projects were set up with an eye on the possibility of their being brought to an end at some definite stage.
(24) He also reminded the meeting that Unesco's true function was to stimulate activity, and that it should not become involved in work that Member States ought to be carrying out.

(25) Mr. MAHEU (Assistant Director-General) said that the new proposals would be considered later. With regard to the science co-operation offices, he could advance general arguments of wider relevance than scientific co-operation and raising the general problem of decentralization of Unesco's activities. The Committee might wish to arrange for a general discussion of the problem of decentralization when it had finished discussing the programme and budget. He recommended the Committee to confine itself for the time being to a consideration of the operation and budget of those offices.
(26) The whole of the science chapter was designed to secure a balanced treatment of the varying needs of Member States.
(27) Mr. Maheu wished to mention that in the course of recent months he had had an opportunity of attending various co-ordination meetings of the United Nations and Specialized Agencies and he had been struck by the great efforts being made for the dissemination of science in their respective fields by the Food and Agriculture Organization and the World Health Organization. Much had been achieved, but the results would not be lasting unless the general public in the countries concerned had a general understanding of science. Unesco had the task of encouraging such understanding.
(28) Frankly, he did not think that projects for the dissemination of science could be transferred to the Mass Communication Department; it was essentially a specialized activity.

(29) Mr. AUGER (Director, Department of Natural Sciences) assured the meeting that the Director-General of Unesco was specially anxious to use existing organizations for scientific co-operation rather than set up new ones. For the arid zone there was an Advisory Committee of nine members and no bureaucratic machinery. The same method was being considered for oceanographic research. Whenever it was possible to do without setting up new intergovernmental bodies, the opportunity should be taken. It had not been possible to adopt that procedure for nuclear research, but that subject was an exception.
(30) Unesco had one difficulty as regards the dissemination of science. There were groups such as associations for the advancement of science, but most of them existed only at the national level and Unesco was endeavouring to bring them together in international federations.
(31) Obviously Unesco could not stand aloof from so important a subject as nuclear research, but the Organization's work in that field could not be effective until specialized scientists were able to work for peaceful ends, unhampered by governmental restrictions. Great hopes could be placed on the projects under consideration in the United Nations; Unesco could intervene when the proper time came.

(32) Mr. COWELL (United Kingdom) enquired the purpose of the sums for consultants mentioned in paragraph 16.

(33) Mr. AUGER (Director, Department of Natural Sciences) explained that the expenses listed in

paragraph 16 included an annual sum of $1,196 to pay consultants whose advice was sought on the preparation of regional or international projects. The consultations covered practical, clearly defined subjects which could not always be foreseen. Those consultations had always been useful in the past and, if the appropriation were cut, it would greatly hamper the Department's activities.

(34) The CHAIRMAN asked on what basis the consultants had been budgeted for.

(35) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that sums had been provided for one consultant at $10 per diem for two weeks, and another at $20 per diem for 4 weeks, with journeys based on a medium distance from Paris.

(36) Mr. COWELL (United Kingdom) wondered whether similar arguments for the use of experts might not be urged by other departments. He asked for a careful consideration of the question, which had a wide implication. Paid experts should not be engaged for work that might be provided free by non-governmental organizations.

(37) Mr. AUGER (Director, Department of Natural Sciences) pointed out that his Department had always been able to secure the services of consultants. If other Unesco services had not followed that example and requested similar funds, it was perhaps because they did not need consultants. An overall picture or general information could be obtained from non-governmental organizations but the personal advice of highly specialized consultants always seemed preferable before starting discussions with international scientific organizations, as the Department of Natural Sciences very often had to do.

(38) As there were no further comments, paragraphs 14-16 were approved.

Section I: 2.1 Development of International Co-operation

Project 2.11: Co-operation with international scientific organizations (paragraphs 17-38)

(39) Mr. AUGER (Director, Department of Natural Sciences) referred to the origin of the Geophysical Year and the efforts made to inaugurate that project. It was the only new subvention his Department was requesting for the development of international scientific co-operation; the others merely renewed the assistance already granted in 1953-54.

Paragraphs 18-31: Subventions

(40) Mr. COWELL (United Kingdom) said that the National Commission of the United Kingdom was in favour of the subventions, but he suggested that some bodies, particularly in the fields of medical science and engineering, might be able to finance more and more of their own work. He wished to stress the principle that all subventions should gradually decrease with the passing of years.

(41) Mr. AUGER (Director, Department of Natural Sciences) drew the attention of the Committee to the fact that comparatively small amounts were proposed for the two organizations mentioned by the United Kingdom delegate. For each budgetary year the subvention requested for the Council of International Organizations of Medical Sciences (CIOMS) amounted to $18,000 and for the Union of International Engineering Associations (UATI) to $12,000. The same amounts had been granted in 1954 and were intended to promote the international work of those two organizations. The subvention proposed for the Union of International Engineering Associations was intended for the publication of multilingual dictionaries.

(42) Mr. BOW (Canada) agreed with the United Kingdom delegate that subventions should taper off.

Paragraphs 32-38

(43) Mr. LEE (United States of America) thought that assistance to the International Geophysical Year was a very appropriate type of Unesco activity. He would like to see more money go into that item, if available, in order to ensure its full implementation.

(44) Mr. COWELL (United Kingdom) supported the suggestion. That, and the three fellowships mentioned in paragraph 40, Exchange of Persons, should receive high priority.

(45) With reference to paragraph 33, he enquired whether the International Union of Biochemistry was likely to join the International Council of Scientific Unions.

(46) Mr. AUGER (Director, Department of Natural Sciences) said that, at its meeting in Naples, the Bureau of the International Council of Scientific Unions had already been in favour of admitting to membership the future International Union of Biochemistry, once established.

(47) The proposal of the United States delegate to give that project a high priority was put to the vote.

(48) It was adopted by 10 votes to 0, with 2 abstentions.

Project 2.12: Improvement of scientific documentation (paragraphs 39-58)

(49) Mr. AUGER (Director, Department of Natural Sciences) stressed the success achieved by the ICSU Abstracting Board for scientific literature. For physics, the Board issued abstracts in three journals, each in a different language. That arrangement had been extended in 1954 to chemistry and it was hoped to do the same shortly for the biological sciences. The results of the study of reference methods which was being made by the Council of International Organizations of Medical Sciences under a contract with Unesco had not come up to expectation. That activity had accordingly been deleted for 1955-56 (8C/5 Corr., Natural Sciences, paragraph 47 deleted and paragraph 48 amended).

(50) Mr. COWELL (United Kingdom) proposed to delete the contracts mentioned in paragraph 42. His

National Commission also thought very little of the translation of medical abstracts, which it considered a source of misinformation.

(51) Mr. LOW (Canada) supported the delegate of the United Kingdom on the two points he had mentioned, adding a query about paragraph 54: was the contract referred to necessary, in view of the subvention granted to that organization?

(52) Mr. SOEBROTO (Indonesia), speaking on paragraph 57, informed the meeting that his Government appreciated the aid given by Unesco in the field of terminology. Indonesia was faced with many problems of this order in replacing the Dutch language by Indonesian in schools.

(53) Mr. COWELL (United Kingdom) supported the Canadian delegate in the matter of paragraph 54. He also opposed paragraph 57, and would propose that it be given a low priority.

(54) Mr. LEE (United States of America) agreed with the delegate of the United Kingdom in wishing to reduce the priority of paragraph 57.

(55) Mr. AUGER (Director, Department of Natural Sciences) pointed out that the Advisory Committee could not meet unless Unesco paid the travel expenses of its members. The Committee had met every year since its establishment in 1949.

(56) The CHAIRMAN said that the Committee had before it a proposal to eliminate the contracts mentioned in paragraph 42, estimated to cost $700.

(57) Mr. CABOUAT (France) thought that the meeting was a permanent service and that only Unesco could defray its expenses. He was against Mr. Cowell's proposal to cut down that activity.

(58) The proposal of the United Kingdom delegate, seconded by the delegate of Canada, was put to the vote.

(59) It was rejected by 2 votes in favour, 6 against, and 3 abstentions.

(60) With regard to paragraph 45 concerning contracts to be concluded by Unesco with the Council of International Organizations of Medical sciences, Mr. AUGER (Director, Department of Natural Sciences), replying to Mr. Cowell, said that the deletion of translations of medical abstracts would result in a saving of $3,000.

(61) Mr. COWELL (United Kingdom) accordingly proposed that the budget for the activities covered by paragraph 45 should be thus reduced.

(62) The motion was put to the vote and adopted by 7 in favour, none against and 2 abstentions.

(63) Mr. AUGER (Director, Department of Natural Sciences), referring to paragraph 54, explained that the International Committee on Anatomical Nomenclature, set up by the Council of International Organizations of Medical Sciences, had just completed its work of preparing an international agreement on anatomical terminology. That project was quite in keeping with Unesco's aims and would surely enhance the Organization's prestige.

(64) Mr. COWELL (United Kingdom) was not hostile to the activity, but thought that the work would be better done if results were published in the learned journals of each country, and would stand a better chance of reaching the people interested than if they came out in a special publication.

(65) Mr. BOW (Canada) agreed with the delegate of the United Kingdom.

(66) Mr. AUGER (Director, Department of Natural Sciences) stated that, if that contract were deleted, the report could not be published in book form. It would be a less handy working tool if published in a periodical.

(67) Mr. CABOUAT (France) thought the publication of that report entirely in keeping with Unesco's general programme. The World Health Organization was doing the same kind of work for pharmaceutical nomenclature. As for the possibility of publishing the report in a specialized periodical, he preferred to abide by the Secretariat's views on that subject.

(68) The CHAIRMAN said that, as the question of publishing in the reviews of different countries had not been investigated by the Secretariat, it was perhaps better not to decide on it at that stage.

(69) Mr. CABOUAT (France) proposed deferring the Committee's decision until information was available on the possibility of publishing the report in a specialized periodical, if necessary as a supplement.

(70) Mr. AUGER (Director, Department of Natural Sciences) was afraid that, if the appropriation were deleted, the activity itself would have to be dropped, as no one could foresee the result of the commercial negotiations which would have to be undertaken.

(71) Mr. LEE (United States of America) considered that the general question raised was an interesting and complex one. It was true that, where the results of Unesco investigations could be published in private journals, they would be more likely to reach the audience that could profit from them than if distributed in Unesco pamphlets. On the other hand, there were parts of the world where that medium was not available. He would favour leaving a decision to the Secretariat, on the understanding that they explored both the less and the more developed areas.

(72) Mr. COWELL (United Kingdom) added that any attempt at a standard nomenclature in a branch of science could in the beginning be no more than tentative, so that its appearance in a learned journal, where it would receive the comments of scientists, would be preferable in the first place.

(73) The CHAIRMAN proposed that the Committee include that point in its Report to the Programme and Budget Commission.

(74) Mr. CABOUAT (France), as Rapporteur, agreed with the Chairman.

(75) Mr. MAHEU (Assistant Director-General) said that the Secretariat had considered that question. The reason why commercial publication of the report had not been envisaged was because, in the Director-General's opinion, it was better for Unesco itself to publish the report. In book form the report would provide tangible proof of the effectiveness of Unesco's action. Also, it would be more useful to readers in a single volume than if issued as a series of articles. It would be difficult for scientific journals to publish the report itself, whereas they would be glad to open their columns to discussion of the document.

(76) The proposal of the Canadian delegate, seconded by the delegate of the United Kingdom, was put to the vote and rejected by 5 votes to 3, with 4 abstentions.

(77) The CHAIRMAN then opened the discussion on the proposal of the delegate of the United Kingdom to delete paragraph 57.

(78) Mr. LEE (United States of America) seconded the proposal.

(79) Mr. CABOUAT (France) suggested giving the project a lower priority, instead of deleting it, as proposed by Mr. Cowell.

(80) Mr. AVIDOR (Israel) supported the delegate of France.

(81) Mr. ABDEL-RAHMAN (Egypt) said that the project was an extension of the efforts of Unesco in the domain of scientific terminology. A cut would limit this work to the field of European languages. He suggested that the project be maintained, and assistance to it, if possible, increased.

(82) Mr. JUNANKAR (India) supported the Egyptian proposal. The project was important in Asia, owing to the difficulties involved in the changeover from one language to another. It deserved a high priority.

(83) Mr. BOW (Canada) wished to make it quite clear that his support of the proposal to suppress the activity was based on his desire to concentrate the programme, not to reduce the field of operation of the activity.

(84) The CHAIRMAN explained that the Committee had three distinct proposals before it. He would first put to the vote the proposal of the delegate of the United Kingdom, then that of France, and lastly that of Egypt.

(85) The proposal put forward by the delegate of the United Kingdom and seconded by the delegate of the United States of America to suppress the activity was put to the vote and rejected by 4 in favour, 6 against and 2 abstentions.

(86) The proposal made by the delegate of France and seconded by the delegate of Israel to attribute a lower priority to the activity was put to the vote and adopted by 8 in favour, 3 against and 1 abstention.

Section II: 2.2 Contribution to research particularly for the improvement of the economic and social conditions of mankind

Project 2.21: International Advisory Committee on Research in the natural sciences programme (paragraphs 64-73) (see 8C/5 Corr., paragraphs 72 and 73)

(87) Mr. AUGER (Director, Department of Natural Sciences) explained that the saving made by dropping the study of referencing methods which was being carried out under contract by CIOMS (paragraphs 47 and 48) had been transferred to project 2.21 (paragraph 64 of the Corrigendum).

(88) No comments

Project 2.22: Assistance to scientific research

(89) Mr. Auger stated that the various projects mentioned (paragraphs 76-102), particularly research into the nature of cancer, would not in any way duplicate the work of the World Health Organization, which dealt with clinical medicine. Those projects were concerned with scientific research in basic fields, as was clear from the new wording of resolution 2.22 paragraph 75 of the Corrigendum).

(90) Mr. BOW (Canada) proposed that the arid zone research programme should be given the highest priority, while other activities in this section could be reduced.

(91) Mr. LEE (United States of America) seconded the proposal. The programme was well organized and had been achieving useful results.

(92) Mr. SILLER (Mexico) agreed with the delegates of the United States of America and Canada, and said that the Government of Mexico had followed the arid zone activities with the greatest interest and was applying in its territory some of the results obtained. He was in favour of granting the highest priority to that project, but not of deleting other projects for the purpose.

(93) Mr. CABOUAT (France) supported the proposal of the Canadian delegate to give a higher priority to the programme of arid zone research. He thought it a pity that the Proceedings of the Symposium on Wind and Solar Energy were to be published in English only and not in a bilingual English-French edition, like the Proceedings of the Symposium on the Formation and Erosion of Soils as affected by Climatic Factors, scheduled for 1956 (paragraph 79).

(94) Mr. MAHEU (Assistant Director-General) said that the Publications Committee, of which he was Chairman, had decided that the articles in the edition would be printed in their original languages and followed by a summary in the other language.

(95) The proposal of the delegate of Canada, supported by the delegates of the United States

of America, France and Mexico, was adopted by 10 votes to 0, with 2 abstentions.

(96) Mr. AUGER (Director, Department of Natural Sciences) proposed the postponement, for a year, of practical work on the humid tropical zone project (paragraphs 85-88) and to use the money thus saved in 1955 for the physical oceanography and marine biology projects (paragraphs 89-91), as their preparation was farther advanced.

(97) The CHAIRMAN said that Mr. Auger's remarks could be regarded as a verbal corrigendum to the sub-project on the humid tropical zone.

(98) Mr. COWELL (United Kingdom) wanted Mr. Auger's amendment carried farther, and wondered if one of the two meetings in 1956 could not be eliminated, since results could not be achieved so quickly.

(99) Mr. BOW (Canada) asked how far, if priority were granted to the arid zone research project, it would be advanced towards completion. It should be as far on the way as possible before another project was begun.

(100) Mr. AUGER (Director, Department of Natural Sciences) thought that Mr. Cowell would be pleased to know that the one-year postponement would not be a waste of time, as the preliminary surveys could be continued. A further saving of $5,000 could be made on the 1956 estimates for the humid tropical zone if only one meeting instead of two were organized. It was difficult to say exactly when the cycle of work on the arid zone could be completed. The study of five or six main projects should first be completed in the next few years. Moreover, if the funds requested were granted, the pilot projects proposed in paragraphs 92-100 would provide an opportunity of reviewing the knowlecge acquired.

(101) Mr. BOW (Canada) was satisfied by Mr. Auger's explanation.

(102) The CHAIRMAN pointed out that Mr. Auger's proposal could be voted upon, only if it were presented by a member of the Committee.

(103) Mr. COWELL (United Kingdom) formally proposed the reduction Mr. Auger had suggested.

(104) Mr. BOW (Canada) seconded the proposal.

(105) A vote was taken and it was adopted by 10 in favour, none against and 1 abstention.

Paragraphs 89-91

(106) Mr. AUGER (Director, Department of Natural Sciences) had not yet circulated the document setting forth the new programme proposed for physical oceanography and marine biology. It provided for the experience gained in the Indo-Pacific region and Latin America to be applied throughout the world, with the co-operation of the Food and Agriculture Organization and the competent scientific councils. A World Advisory Committee would be responsible for guiding and co-ordinating the work of several scientific councils for such areas as the North Atlantic and the Mediterranean. The Advisory Committee of Marine Sciences would have the same structure as the Advisory Committee on Arid Zone Research. The project was supported by the United Nations Food and Agriculture Organization.

(107) Mr. SILLER (Mexico) enquired what proportion of the funds would be contributed to that project by the Food and Agriculture Organization.

(108) Mr. AUGER (Director, Department of Natural Sciences) could make no promises for the Food and Agriculture Organization, but added that it had collaborated in 1953 in the Eighth Pacific Science Congress in Manila and could be relied on to support the project if it were in line with its own aims.

(109) Mr. COWELL (United Kingdom), on paragraph 90, asked whether the expenses of the intergovernmental conference should not be met entirely by the governments concerned.

(110) Mr. LEE (United States of America) asked for the budgetary implications of the remarks just made by Mr. Auger. He thought they implied an improvement in the working plans.

(111) Mr. AUGER (Director, Department of Natural Sciences) thought it better to drop the idea of convening an intergovernmental conference for Latin America in 1955 (paragraph 90) than to give up practical work. The budget proposed at that stage, together with the sum saved on humid tropical zone research, should be sufficient for all regional and international activities in connexion with oceanography.

(112) Mr. LEE (United States of America) thought the suggestion was excellent. He advocated caution, however, in going too far with a major project. Existing organizations should bear as much of the expense as possible.

(113) Approved.

Paragraphs 101 and 102

(114) Mr. AUGER (Director, Department of Natural Sciences) explained that the research on cancer (paragraphs 101 and 102) had been planned at the request of the Executive Board of Unesco. It involved contracts with experts who were to meet once in 1955. Several meetings were proposed for 1956 and might lead to the establishment of an intergovernmental or non-governmental body. The results obtained in 1955 could guide the Secretariat's work in 1956, but they could hardly be foreseen at that stage.

(115) Mr. SOMMERFELT (Norway) felt concerned at the expenses entailed in a continuation of activity after 1956. Could not the World Health Organization cover some of them?

(116) Mr. AUGER (Director, Department of Natural Sciences) could not foresee whether the project could be completed in 1956. If the work made rapid headway,

an international body with its own budget would be established. He personally thought that body could not be set up for three years. No promise could be given in that connexion on behalf of the World Health Organization, which would probably seek to define the extent of its functions in the matter, but would not consider collaborating in Unesco's project.

(117) Mr. COWELL (United Kingdom) shared the uncertainty expressed by the delegate of Norway. The lead in this matter should more properly be taken by the World Health Organization. He recommended deferment of the activity.

(118) Mr. BOW (Canada) asked whether the Executive Board had recommended this activity before or after it had adopted its report on the remodelling of the future programme.

(119) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that it had been discussed by the Executive Board before and commented on (8C/5 Add. 1, paragraph 12) with interest.

(120) Mr. LEE (United States of America) did not consider the comment made by the Executive Board in 8C/5 Add. 1 a very convincing expression of support. That argued for deferment. He suggested that the Department of Natural Sciences should find out what organizations were interested, and make a fuller statement of the situation to the next General Conference in two years time.

(121) The discussion was deferred to the next meeting.

The meeting rose at 12.50 p.m.

# NINTH MEETING

*5 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION (continued)**

**NATURAL SCIENCES (continued)**

Project 2.22: Assistance to scientific research

Paragraphs 101 and 102 (continued)

(1) The CHAIRMAN invited the Chairman of the Executive Board to state the Board's views on the proposed campaign.

(2) Sir Ronald ADAM (Chairman of the Executive Board) said that the Executive Board had given careful consideration to the subject and had agreed, first, that the World Health Organization should be consulted before a decision was taken and, second, that the views of the Advisory Committee on Research in the Natural Sciences programme should be ascertained. As a result of WHO's agreement to participate and the Advisory Committee's strong support, the Executive Board had unanimously approved the project. It was clear, from conversations with experts in the United States of America and the United Kingdom, that there was a lack of contact between the medical and the scientific sides of the problem, and that the results of scientific research were not transmitted to doctors rapidly enough. The Executive Board favoured the project in the hope of ameliorating the situation and helping to remove one of the serious causes of misery in the world. There was a strong dividing line between scientists' research on cell growth and the work of doctors, and it was essential that Unesco and WHO should be closely linked in the project.

(3) The CHAIRMAN recalled that at the previous meeting the United Kingdom delegate, supported by the delegates of Norway and the United States of America, had proposed that the project be postponed.

(4) In reply to a question by the delegate of Israel, Sir Ronald ADAM (Chairman of the Executive Board) said that the project would be a joint one between Unesco and WHO, since the closest collaboration between the scientific and medical sides was needed.

(5) Mr. AVIDOR (Israel) questioned the use of the word "campaign".

(6) The CHAIRMAN, speaking as delegate of Australia, also considered the title of the project misleading. The dividing line was clear: cancer, being a health problem, concerned WHO, while research on cell growth was a scientific matter and therefore concerned Unesco. He proposed amending the title to "Basic research on cell growth and related problems".

(7) Mr. AUGER (Director, Department of Natural Sciences) favoured the wording "Study of normal and abnormal cell growth", which he thought would satisfy WHO. The Committee should, however, note that this new title implied a change of attitude and that it would be well to make quite sure that the

project still fitted in with the Executive Board's intentions.

(8) Sir Ronald ADAM (Chairman of the Executive Board) remarked that the title had arisen out of a press conference at Unesco House. Since Unesco's work alone did not represent a campaign, he proposed amending the title to "Unesco's part in the Campaign against Cancer".

(9) Mr. MAHEU (Assistant Director-General) said that WHO had so far not committed itself; that body's chief concern was to make sure that Unesco was not undertaking projects which came within its own sphere.

(10) Mr. COWELL (United Kingdom) asked for an assurance that cancer was not one of the subjects already being investigated by bodies affiliated to the International Council of Scientific Unions.

(11) Mr. AUGER (Director, Department of Natural Sciences) replied that cell growth was a subject dealt with by the International Union of Biological Sciences, a body affiliated to ICSU, and also by the newly-founded International Union of Physiology, which was shortly to be admitted to ICSU. But in either case it was only one of their respective interests and Unesco could perfectly well undertake an investigation of this phenomenon in its relation to cancer, in agreement with the two unions. Research into cell growth was also of the utmost interest to the International Union against Cancer. Under the new arrangements which it was proposed to set up, contacts should be established with all these unions with a view to studying a specific problem not directly dealt with by any of them.

(12) Mr. LEE (United States of America) recognized the desirability of further investigation, but said that it was necessary to study what had already been done by other bodies. He proposed that the project should be struck out and the next two years be devoted to investigation by the Secretariat with a view to providing a better basis on which to formulate an approach to the problem.

(13) Asked by the CHAIRMAN, Mr. COWELL (United Kingdom) said that he would accept the United States delegate's proposal as meeting his own wishes.

(14) Sir Ronald ADAM (Chairman of the Executive Board) said that the Advisory Committee on Research in the Natural Sciences programme had been strongly in support of the project. That Committee was aware of the problems, and the strength of its support indicated the possibility of effective work starting at once.

(15) The CHAIRMAN asked whether a document existed on the Advisory Committee's discussions.

(16) Mr. MAHEU (Assistant Director-General) said that the views of the Advisory Committee were embodied in a document which had not yet been reproduced but could be read to the Committee.

(17) Mr. AUGER (Director, Department of Natural Sciences) wanted to make it clear that, if project B were struck out and the Secretariat were simply instructed to continue what it was doing, it could hardly make any headway in the matter without a budget appropriation for consultation with experts. He suggested that, rather than simply strike out paragraphs 101 and 102 from the programme, they should, if the idea of holding the constituent meeting proposed for 1956 were dropped, make provision at least for a meeting of experts.

(18) Mr. JUNANKAR (India) expressed his support for the views of the Chairman of the Executive Board. The project would provide an opportunity for scientists to collaborate in solving an important problem; moreover it had been approved by a body which, knowing the problems involved, considered that research could be undertaken at the present stage.

(19) Mr. AUGER (Director, Department of Natural Sciences) read out the Advisory Committee's recommendation and pointed out that its second paragraph reflected what he had said about the responsibilities of each of the two organizations.

(20) Mr. AVIDOR (Israel) asked if any information was available on what WHO had been doing in the field of cancer.

(21) Mr. AUGER (Director, Department of Natural Sciences) did not think WHO had taken any major action in the matter.

(22) Mr. AVIDOR (Israel) proposed that the project be deferred for one year to allow time for negotiation with WHO, that the conference be held in 1956 with the collaboration of WHO and the budget allocation for 1955 be transferred to 1956, the 1956 provision being deleted.

(23) Mr. BOW (Canada) recalled that it had been originally proposed to defer the project in the interests of concentrating the programme, and could not reconcile the Executive Board's recommendation on concentration with its approval of a new project. In any case he considered that such a project should be inspired by the World Health Organization. Without wishing to detract from its importance, the Canadian delegation supported the proposal to defer the project.

(24) There being no seconder for the delegate of Israel's proposal, the proposal of the United Kingdom delegate was put to the vote and adopted by 6 votes to 4 with no abstentions.

Project 2.31: Dissemination of science

(25) Mr. AUGER (Director, Department of Natural Sciences) said that the proposed activities might give an impression of greater dispersion than those in the section on scientific research. The fact was that there were many ways of disseminating science, hence a whole range of projects as varied as: project A, concerned with general scientific information the object of which was to secure the publication of information on scientific subjects, project B on travelling

science exhibitions, another channel of dissemination, etc. Project 2.31 comprised a wide variety of activities, each of which required to be judged separately. For 1955-56 the programme was primarily one of research; a well thought out programme of action could not be presented until 1957-58.

(26) Mr. COWELL (United Kingdom) regretted that sales of the periodical Impact of Science on Society were not very satisfactory, in spite of favourable opinion on its quality. He asked whether there was any additional information on its financial success since the preparation of the budget.

(27) Mr. AUGER (Director, Department of Natural Sciences) said that, though Impact was not, strictly speaking, a financial success, it had been repeatedly referred to in terms of warm appreciation in such important publications as the British periodical Nature, a well-known science publication of high standard, The Scientific American and Discovery. The non-specialized press also took it seriously, particularly in the United States of America. That seemed to prove that Impact was dealing successfully with subjects of vital interest.

(28) Mr. COWELL (United Kingdom) suggested that, since the object of the publication was to secure wide circulation of views, it would be better to include the articles of Impact in the periodical publications of the Department of Mass Communication.

(29) Mr. MAHEU (Assistant Director-General) pointed out that the success of any publication had to be considered from two angles, quantitative and qualitative. Obviously, the articles appearing in Impact could be distributed much more widely by the Department of Mass Communication, but Impact was aimed at a special public, not very large in numbers but influential in political, business and administrative circles. An example of what he meant was the publication in Impact of an article on the organization of the "Parliamentary and Scientific Committee" of the United Kingdom, which article had led to the formation of a similar parliamentary committee in France. The latter committee had had a great deal to do with the recent establishment of an Under-Secretaryship of State for Scientific Research. That might properly be considered a success for Impact.

(30) Answering a question by the delegate of Israel, Mr. AUGER (Director, Department of Natural Sciences, said that there were 200 subscribers to the English edition of Impact and 120 to the French edition, total sales per issue being 560 copies in English and 200 in French. In addition, 761 copies of the English edition and 422 copies of the French edition were sent free of charge by the Secretariat to addresses on a special distribution list.

Paragraphs 123-139

(31) Mr. AUGER read paragraph 129 and outlined the origin of the project. A few years back Unesco had published a compendium of plans for the low-cost production of simple apparatus for the teaching of science. This publication had been an immense success, especially in India and it was in response to an explicit request that Unesco had planned to publish a second compendium on the construction, furnishing and equipment of laboratories, which the Secretariat felt was a needed sequel to the first collection.

(32) Mr. JUNANKAR (India) supported Mr. Auger's statement. The designs were most useful, and his country had already started an experimental scheme for manufacturing equipment based on the drawings.

(33) Mr. BOW (Canada) asked which were the three countries mentioned in paragraph 136 as wishing to develop education in nuclear physics and cosmic rays, and whether it was an essential project.

(34) Mr. AUGER (Director, Department of Natural Sciences) said that paragraphs 135-139 dealt with a programme of technical aid to Member States in the domain of science teaching. As some States had requested technical aid for teaching about nuclear physics and cosmic rays - which could not be shewn to have any direct impact on their economic development - the project had been included in the natural science programme. Ecuador and Pakistan should be added to the list of States seeking such aid.

Project 2.41: Science co-operation offices (paragraphs 140-154)

(35) The CHAIRMAN suggested postponing a general discussion of the policy aspects of decentralization until the whole programme had been studied. It might, however, be useful to examine specific details at the present stage.

(36) Mr. AUGER (Director, Department of Natural Sciences) pointed out that the science co-operation offices, which had originally been bodies for the exchange of information, had evolved into organs for executing the Unesco programme in distant countries. The activities set out in project 2.41 had a direct connexion with the programme work of the Department.

(37) Mr. AVIDOR (Israel) asked what were the activities of the regional centres and whether they could not be carried out by headquarters in co-operation with National Commissions.

(38) The CHAIRMAN said that questions of that nature should be considered under decentralization of the programme as a whole.

(39) Following an exchange of views on the advantages of this kind of procedure, Mr. MAHEU (Assistant Director-General) suggested that, to overcome the difficulty, they agree that, for the examination of the proposals submitted in the project, the Committee proceed as though it accepted the principle of regionalization and that they hold over consideration of the actual principle of maintaining regional offices for the general discussion of the programme.

(40) The CHAIRMAN said that it would not be possible for members who had doubts on decentralization to join in the discussion at the present stage, but there could be an exchange of views on

specific details by those who approved the Director-General's approach.

(41) Mr. JUNANKAR (India) suggested that a working party be set up during the Conference to study the decentralization of Unesco's activities and report at the end of the Conference. The science co-operation offices could then be considered in relation to the general problem of decentralization and its organizational aspects.

(42) Mr. LEE (United States of America) said that it was important to consider the overall use of funds for natural sciences. He would prefer a lower priority for the science co-operation offices and suggested that any savings might be applied elsewhere, for example to the section on the teaching of science.

(43) The CHAIRMAN said that it would be quite proper to discuss priorities within the chapter on Natural Sciences without prejudging the general discussion of decentralization.

(44) Mr. BOW (Canada) agreed with the delegate of the United States' point concerning budgetary considerations, but did not approve of relating a decision on priority to the release of funds for another project.

(45) The CHAIRMAN explained that the United States delegate had only been concerned with priorities within the natural sciences programme.

(46) Mr. SILLER (Mexico) was against the proposal of the delegate of the United States of America. He felt that, if the science co-operation offices were continued, they should be provided with the requisite means to do their work. Until such time as the Conference decided to abolish them or to diminish their functions, they must retain the priority they were previously given.

(47) Mr. JUNANKAR (India) considered that the question of priorities should be studied within the general problem of decentralization, of which it was only one aspect.

(48) Mr. AVIDOR (Israel) agreed with the delegate of India. It was surely logical to discuss general policy before making decisions on details.

(49) Mr. LEE (United States of America) withdrew his proposal and the CHAIRMAN deferred to the view that discussion should be postponed.

(50) Mr. ABDEL-RAHMAN (Egypt) saw the science co-operation offices, not as a project proper but rather as part of Unesco's administrative machinery for effective implementation of the programme, and considered that they should be discussed not as part of the natural sciences programme but as an aspect of the implementation of Unesco's task as a whole.

(51) Mr. RANIERI (Uruguay) agreed with the delegate of Mexico and felt that the same views were held by all the countries of the Americas. This was the only service which Unesco maintained in that region and strong arguments for its retention were its accessibility and the fact that there was a common language over most of the region and that problems were similar throughout. He asked the Committee to maintain the present priority.

(52) The CHAIRMAN asked whether the Committee wished to defer discussion until the end of the programme and budget document.

(53) It was so agreed, Mr. BOW (Canada) requesting that budgetary considerations should be included.

Summary Tables (paragraphs 185-198)

(54) The CHAIRMAN pointed out that it had been agreed to defer discussion of the Director's office to the comparative examination at the end of the document.

(55) Mr. LEE (United States of America) said that in that case it would be better to defer discussion of the Staff Tables as a whole.

(56) The CHAIRMAN replied that it would be appropriate to discuss the staff in connexion with the programmes already approved.

(57) Mr. COWELL (United Kingdom) asked why, under International Co-operation in Scientific Research, there were two P-5 posts in 1954 but only one for 1955-56.

(58) Mr. AUGER (Director, Department of Natural Sciences) explained that the Division of International Co-operation on Scientific Research had the same number of posts in 1955 as in 1954, the abolition of a P-5 post having been offset by the establishment of a post at a lower grade. What had happened was that a post of Head of Division had become redundant as a result of subventions being passed in a lump sum to ICSU, which undertook to distribute those funds. As a result of this simplification one Head of Division was enough and it had been possible to establish a post at a lower grade for the work involved in developing the programme.

(59) Mr. AVIDOR (Israel) suggested that any decision to make changes in the science co-operation offices (paragraph 196) might result in increasing headquarters staff.

(60) Mr. AUGER (Director, Department of Natural Sciences) explained that the staff listed in that paragraph included those at headquarters dealing with regional affairs.

(61) The CHAIRMAN explained that the delegate of Israel foresaw that, if the science co-operation offices were suppressed, it might be necessary to strengthen headquarters staff to maintain the work.

**CHAPTER 3: SOCIAL SCIENCES**

(62) Mrs. MYRDAL (Director, Department of Social Sciences) said that the development of Social Sciences in the international field had been initiated by

Unesco. It was hoped that they could be used in solving some of the difficult problems of the day.
(63) For the years 1955-56 the Department of Social Sciences was organized in the same way as other departments, namely in two main sections: permanent and general services and special projects. An outline was given in paragraph 10. In Section I the main theme was stabilization, the only major addition being the Unesco Institute in Cologne. In Section II the main theme was concentration. There were five major projects listed. Unesco's work in the social sciences field was closely related to the interests of the United Nations and the other Specialized Agencies.
(64) With regard to the discussion of field and regional offices, there were two offices in existence, in the Middle East and Asia, as indicated in paragraphs 16-24. With a view to meeting the expressed requirements of Member States, it was envisaged that the Asian office might in 1956 be integrated in the proposed International Centre for Research on Social Problems of Industrialization.

(65) The CHAIRMAN asked for general discussion before the programme was considered in detail.

(66) Mr. BOW (Canada) was concerned at the large budgetary increase for 1955-56 and did not think it was the right time for expanding activities. The proposed projects were all valuable, but it was necessary to select and evaluate. He questioned the subventions in Section I, involving an increase of about $50,000; and with regard to Section II suggested selecting the two most important of the five major projects and deferring the others until sufficient progress had been made to demonstrate the value of the activities and perhaps obtain support and funds by a public appeal. He did not approve of the proposed expansion of activities under Section II and would prefer to see concentration on more important activities in other chapters: for example, transfers might be made to the Exchange of Persons Service.
(67) Finally, a high priority should be given to requests from Member States, since they were the judges of what assistance was needed and of how it would be best administered.

(68) Mr. FREY (German Federal Republic) favoured more emphasis on work in Section II, for example projects 3.5 and 3.6, and less on documentation and terminology.

(69) The CHAIRMAN, in reply to the delegate of Canada, said that changes in the budgetary balance and priorities between departments could only be discussed when the whole programme and budget had been dealt with.

Project 3.11: Co-operation with international social science organizations and institutions (paragraphs 25-54)

(70) Mrs. MYRDAL (Director, Department of Social Sciences) said that the increase in subventions mentioned by the Canadian delegate was mainly due to the annual grant of $32,000 to the Unesco Institute for Social Sciences, Cologne.

(71) Mr. BOW (Canada) said that, with the exception of the International Union of Scientific Psychology, all subventions showed an increase. After studying the explanation and document 8C/ADM/20, he was not convinced that there had been adequate evaluation of activities to support the increases or that the criteria for subventions were correctly applied. He proposed that the subventions be stabilized at the 1953-54 level.

(72) The CHAIRMAN drew attention to the list of subventions and comparative table for 1953-54 and 1955-56 in Annex I on page 233.

(73) Mr. MAHEU (Assistant Director-General) believed that the remarks of the delegate of Canada did not apply to the Unesco Institute for Social Sciences, for which a figure of $32,000 was shown in the list of organizations which received subventions through the Department of Social Sciences. He had already explained why the Secretariat had made provision for a subvention for this Institute and the other two Unesco Institutes in Germany; the Cologne Institute, therefore, should be omitted in any comparison between the financial years 1953-54 and 1955-56.

(74) In reply to a question from the CHAIRMAN, Mr. BOW (Canada) said that he was proposing that, with the exception of the Unesco Institute for Social Sciences, Cologne, subventions should be retained at the 1953-54 level.

(75) Mr. SOMMERFELT (Norway) pointed out that the social sciences were less developed than other Unesco activities, and the Secretariat had been urged to encourage development. It was not reasonable, therefore, to compare the Department of Social Sciences with other departments.

(76) In reply to a question from the delegate of Israel on the reasons for the increase in subventions, Mrs. MYRDAL (Director, Department of Social Sciences) explained that they were due to items formerly represented as contracts, which were now considered as subventions. In the majority of cases the increase in subventions was offset by the reduction in contracts, and the only real increase was in the case of the International Science Council, whose subvention had been raised from $15,000 to $18,000, because it was a young organization showing good progress and needing additional funds on account of wider geographical coverage. Unesco had given contracts to the organizations concerned for specific subjects to be discussed at their congresses; such special projects, however, were precluded by the concentration approach, and it had been decided to replace contracts by an increase in subventions, which in many cases resulted in an ultimate saving.

(77) The CHAIRMAN said that he would welcome more clarification and asked if the Acting Head, Bureau of Programme and Budget, could give comparative figures of conventions and contracts for the periods 1953-54 and 1955-56.

(78) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that it would be difficult to supply complete information at the

present stage, since it was not yet known what contracts would be given and to which organizations.

(79) The CHAIRMAN said that it was important for the Canadian delegate to have some comparison between the two periods, in view of his proposal to stabilize subventions at the 1953-54 level.

(80) Mr. MAHEU (Assistant Director-General) agreed that, as Mr. Rao had explained, it was difficult at that stage to foresee what contracts would be concluded and with whom. Would Mr. Rao say, however, whether, leaving the other organizations aside, he could not make the comparison suggested between the two financial periods for the two organizations which had had a very substantial increase - the International Statistical Institute, where the figure had risen from $5,000 to $14,000 and the International Committee on Social Science Documentation, which showed an increase from $3,000 to $9,000?

(81) Mr. BOW (Canada) asked whether the International Statistical Centre at Beirut would become self-supporting or whether Unesco would continue to provide assistance.

(82) Mrs. MYRDAL (Director, Department of Social Sciences) said that the International Statistical Institute, which was provided with $9,000 annually to set up training institutions in different areas, followed a policy of encouraging the host country to contribute on an increasing scale. For example, an institution set up in Calcutta in 1950 was now supported by the Indian Government and received no more funds from the International Institute. In the case of the regional training centre set up at Beirut in 1952-53, contributions from the Lebanese Government and private foundations would enable the International Institute to withdraw gradually from its financial responsibility.

(83) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that the $9,000 contract with the International Statistical Institute in 1953-54, added to the subvention of $5,000, accounted for the sum of $14,000 for the years 1955-56. With regard to the International Committee on Social Science Documentation, the contract amounts of $8,150 for 1953 and $4,950 for 1954 gave a total of $13,100, which, if offset against the increase of $12,000 in the subvention for 1955-56, gave a net reduction of $1,100.

(84) Mr. MAHEU (Assistant Director-General) pointed out that, in the case of the two associations whose subventions, on paper, had had a spectacular rise, there was in fact no increase in the total sum supplied by Unesco.

(85) Mr. BOW (Canada) said that one of his objections to subventions was the loss of control over funds. He could not understand the reason for the change from contracts to subventions.

(86) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that the definition had been made to prevent any overlap between the purposes for which the subventions were given and the purposes for which Unesco should receive services. As to the question of control, all proposals for subventions were submitted to the Executive Board for examination.

(87) Mr. AVIDOR (Israel) assumed that subventions were not earmarked for special activities.

(88) The CHAIRMAN asked why the subvention to the International Statistical Institute was directed to a specific rather than a general purpose, namely the maintenance of centres.

(89) Mrs. MYRDAL (Director, Department of Social Sciences) said that the description of the activities for which the subvention was given was to encourage the improvement of statistical training in various regions of the world. Developments were watched closely and there was constant consultation between the Executive Committee of the International Institute and the Secretariat over any new steps. Tasks to be undertaken were set out in the annual requests for subventions submitted to the Executive Board.

(90) The CHAIRMAN asked whether Unesco had any guarantee that the funds would in fact be used for the purpose for which they were intended. If so, a contract would be the normal procedure, under the criterion explained by Mr. Rao.

(91) Mr. RAO (Acting Chief, Bureau of Programme and Budget), referring to paragraphs 84-87 of the Technical Explanation, recognized the validity of the Chairman's comment. The Secretariat had had to give much consideration to the question of clarifying the difference between contracts and subventions. The change had been made because in a contract the main responsibility fell on the contractor.

(92) Mr. BOW (Canada) still saw some loss of control of funds under the subvention system as opposed to the contract system. If organizations undertook specific assignments for Unesco, then a contract should be given in accordance with the policy described by the Acting Head, Bureau of Programme and Budget. If not, subventions should be stabilized as he had already proposed.

(93) Mr. MAHEU (Assistant Director-General) pointed out that, while it was quite true that Unesco's control over funds was less stringent in the case of subventions than in that of contracts, such control nevertheless existed. The Committee was dealing with a marginal case and, if the delegate of Canada wanted the subvention to the International Statistical Institute to take the form of a contract, the Secretariat would not object.

(94) The CHAIRMAN recalled that the Programme and Budget Commission at the seventh session of the General Conference had recommended the use of contracts wherever possible.

(95) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that it would be possible to reconsider the interpretation in the case of the International Statistical Institute and give a contract, in accordance with the views of the Canadian delegate.

(96) Mr. AVIDOR (Israel) understood that the International Statistical Institute had given a written assurance to Unesco that the $14 000 would be used for establishing centres. As, however, the Unesco contribution was only a proportion of the budget of each centre, it was surely a subvention.

(97) Mr. CABOUAT (France), speaking as Rapporteur, asked whether the Committee was going to stand by the interpretation in figures given in the programme or whether the question of the category in which these appropriations would appear was still undecided, he had to insert a note to that effect in his report.

(98) The CHAIRMAN asked for a formal proposal from the Canadian delegate.

(99) Mr. BOW (Canada) proposed that the first six subventions in Annex I (p.233) be stabilized at the 1953-54 level and that the next two (see paragraphs 44 and 45, and 46-50) be reduced by a comparable amount.

(100) Mr. MAHEU (Assistant Director-General) said that the Canadian delegate's proposal was tantamount to asking that the subventions which had been increased be brought back to the 1954 level - a perfectly legitimate request - but the delegate was also asking that the subventions which had not been increased should be reduced in the same proportions. In his (the speaker's) view, if that proposal was to make sense, it should apply only to the first five organizations in the list whose subventions had been increased, without the justification being offered that subventions had replaced contracts.

(101) The CHAIRMAN said that the stabilization of the proposed subventions would apply only to the first five organizations concerned.

(102) Mr. AVIDOR (Israel) suggested as an alternative wording that the organizations should receive in 1955-56 not more than they had received in 1953-54 through subventions and contracts.

(103) Mr. MAHEU (Assistant Director-General) remarked that the delegate of Israel had spoken of what the organizations "received". Where a contract was concerned, no one was "given" anything; the funds passed in return for services rendered. There was therefore no gift by Unesco. He asked the Israeli delegate not to press his proposal.

(104) Mr. AVIDOR (Israel) withdrew his proposal.

(105) Mr. SILLER (Mexico) asked whether the Canadian delegate's proposal affected five only of the six organizations under discussion; in other words, whether the International Statistical Institute was not covered by the proposal.

(106) Mr. MAHEU (Assistant Director-General) replied that the Canadian delegate's proposal was to keep the first five organizations at the previous level.

(107) Mr. CABOUAT (France) said that, as far as the five organizations were concerned for which a reduction had been proposed, it was not a case of contracts having been converted into subventions. He would like to know on what grounds the Secretariat had proposed the increases in question.

(108) Mr. MAHEU (Assistant Director-General) said that the increases had been suggested for two reasons: firstly, some of the bodies in question were newly-established and were still in the growing stage; secondly, all of them were expanding their networks throughout the world, thus becoming more international; the numbers of their national branches were rising, which entailed larger expenditure.

(109) The CHAIRMAN thought that the Assistant Director-General's view did not allow for the eventual independence of organizations receiving subventions.
(110) He asked whether there was any support for the Canadian delegate's proposal.

(111) Mr. CABOUAT (France) thought that the Department of Social Sciences, more than any other department in Unesco, needed, for the pursuit of its activities, the certainty of progressively increasing financial support. The French delegation would vote in favour of the proposed budget.

(112) Mr. BOW (Canada) agreed with the views expressed by the delegate of France.

(113) There being no seconder for the Canadian proposal, the CHAIRMAN asked for comments on paragraphs 43-45.

(114) No comments.

Project 3.12: Clearing house for information and advisory service (paragraphs 55-70)

(115) Mrs. MYRDAL (Director, Department of Social Sciences) said that the two major items concerned were the International Social Science Bulletin and the Clearing House. The Bulletin was the only multidisciplinary international bulletin being published for the social sciences; it appeared in two languages and was receiving ever-increasing recognition. The Clearing House was small, but its work was now extended to cover also what had in earlier years been the subject of a separate project on "promotion of research".

(116) No comment.

Project 3.13: Improvement of social science documentation and terminology (paragraphs 71-90)

(117) Mr. BOW (Canada) asked whether the International Bibliography of Anthropology referred to in paragraph 82 was an essential project for 1955-56. It would need a large outlay and he considered it an item on which savings could be made.

(118) Mr. SOMMERFELT (Norway), referring to the same paragraph, pointed out that the sum of $23,170 covered five bibliographies. He considered bibliographies most important and welcomed particularly the one on anthropology, which would fill a long-standing

gap. He wondered, however, why the cost was so high, amounting to between $4,000 and $5,000 for each one, and said that similar work had been done in his country at a cost of $2,000.

(119) Mrs. MYRDAL (Director, Department of Social Sciences) said that Unesco, in collaboration with associations representing the various disciplines, had been investigating the need for international bibliographies and had decided to cover the main fields by bibliographies but leave abstracts to the responsibility of voluntary organizations. The anthropological bibliography was of great interest for technical assistance and other missions abroad. There was also a big demand from anthropologists themselves.
(120) With regard to the costs, the International Political Science and International Economic bibliographies had contracts of $2,000 each and those for Sociology and Anthropology $3,000 each, since anthropology covered a very wide field and the publication on Current Sociology contained trend reports in addition to an annual bibliography.

Project 3.2: Statistics relating to education, science and culture (paragraphs 91-112)

(121) Mr. CABOUAT (France) was prepared to agree to the Unesco Statistical Service being administered by the Department of Social Sciences. As, however, this was a division serving several departments, he would like to have an analysis showing the proportions of the appropriation allocated for servicing each individual department involved.

(122) Mr. MAHEU (Assistant Director-General) said that Mr. Cabouat's point would be borne in mind when they discussed the final percentages of the departmental budgets.

Project 3.3: Development of social science teaching (paragraphs 113-139)

(123) Mrs. MYRDAL (Director, Department of Social Sciences) said that a fact-finding survey had been conducted in eight countries and published in an important series, now containing 8 volumes. It was proposed to supplement it by smaller surveys on subjects of great practical importance but not constituting independent disciplines recognized by universities. In 1954 action in the regions had included three highly successful seminars, in Delhi, Costa Rica and Damascus, and the proposals in paragraphs 124-129 were the results of definite recommendations from those regions. A seminar in the southern part of Latin America was planned for countries which had not been able to attend the one in Costa Rica.
(124) With regard to technical aid to Member States, twenty-two requests for missions had been received, of which four had been met. Missions were planned for 1955-56 to help countries needing assistance in building up social science teaching at university and secondary school levels. It was hoped at a later stage to concentrate more on teaching aids.

Project 3.4. Social science and problems of international understanding and tensions (paragraphs 140-163)
(125) Mrs. Myrdal said that the project represented the continuation of studies in which Unesco had been interested since its inception. It was hoped to pursue investigations in 1955-56 with a view to finding positive means of reaching agreement and averting conflicts. It was also hoped to make use of public opinion polls to ascertain public opinion about Unesco, the United Nations and their ideals.

(126) Mr. COWELL (United Kingdom) said that the United Kingdom National Commission doubted the advisability of the use of public opinion polls proposed in paragraph 152 and of the guides on "How to read the news" referred to in paragraph 156. He proposed that paragraphs 152-156 inclusive be given a lower priority.

(127) Mr. LEE (United States of America) said that the National Commission in his country appreciated the importance of international understanding but were not entirely satisfied with Unesco's programme in that field. The Advisory Committee on Education for Living in a World Community was at present meeting in Paris and he proposed that discussion be deferred so that the programme could be modified in the light of the Committee's recommendations.

(128) Mr. RANIERI (Uruguay) enquired whether the report for publication in 1957 mentioned in paragraph 150 would be issued in Spanish.

(129) Mrs. MYRDAL (Director, Department of Social Sciences), in reply to the delegate of Uruguay, said that no decision had yet been made on the question of languages. With regard to paragraphs 152-157, Unesco had been promised valuable assistance by public opinion institutes in various countries. It was the first opportunity Unesco had of including questions in the public opinion polls and it would be an indirect means of encouraging public interest in the Organization and its work. It was, moreover, of great financial value to have these services free, since it was extremely costly to conduct a public opinion poll.

(130) The CHAIRMAN asked whether the delegate of Uruguay had referred to the report to be published in 1955, mentioned in paragraph 148, or to the publication of material referred to in paragraph 150.

(131) Mr. RANIERI (Uruguay) said that the report he meant was the one mentioned in paragraph 150, arising out of paragraph 149, on the development of international law since the end of the nineteenth century.

(132) Mr. CABOUAT (France) said that the French National Commission regarded projects 3.5 (the social sciences and problems of human rights and minorities) and 3.6 (social sciences and problems of social development) as important and would like them to have priority over the project on public acceptance or rejection of the principles of Unesco and the United Nations which - though it would not go quite as far as the delegate of the United Kingdom - his own Commission regarded as a much less important project.

(133) The CHAIRMAN asked for a seconder to the proposal of the United Kingdom delegate that the priority of paragraphs 152-156 be reduced.

(134) The proposal of the United Kingdom delegate, seconded by the Norwegian delegate, was adopted by 7 votes to nil with 4 abstentions.

Project 3.5: The social sciences and problems of human rights and minorities (paragraphs 164-190)

(135) Mrs. MYRDAL (Director, Department of Social Sciences) said that there were three main headings under human rights and minority groups: racial prejudice and discrimination; women; migrants. Much work had been done under the first heading and 220,000 copies of pamphlets with informational material had been distributed. She drew attention to a corrigendum relating to paragraphs 178 and 179, which had been written in the expectation that the International Conference on Race Relations meeting in Honolulu would recommend that Unesco take on a continuing responsibility for co-ordination of research in that field: in fact, it had set up an International Society for further studies. Unesco's contribution would be most valuable in the form of clearing house activities.

(136) Mr. SILLER (Mexico) expressed the Mexican National Commission's satisfaction with the quality of the booklets so far published on human rights, questions of racial discrimination and the protection of minorities. These excellent publications deserved to be treated as of the highest importance and to be given top priority.

(137) Mr. BOW (Canada) seconded the proposal of the Mexican delegate. The Canadian authorities considered the pamphlets on racial relations among the best of Unesco's publications.

(138) Mr. CABOUAT (France) endorsed the remarks of the delegate of Canada and supported the motion of the delegate of Mexico.

(139) The proposal of the delegate of Mexico that a higher priority should be given to the project on human rights and minorities was put to the vote and adopted unanimously.

(140) Mr. COWELL (United Kingdom), referring to paragraphs 178 and 179 as amended, asked for an assurance that similar activities were not performed by the Carnegie Foundation.

(141) Mrs. MYRDAL (Director, Department of Social Sciences) said that there were no such clearing house activities within the Carnegie Foundation.

(142) Mr. LEE (United States of America) asked that the Secretariat should take account, in its future programmes on women's political rights and political education, of a project in the Near East being undertaken by the Ford Foundation.

Project 3.6: Social sciences and problems of social development (paragraphs 191-215)

(143) Mrs. MYRDAL (Director, Department of Social Sciences) said that the project was a major one in the field of applied social sciences. Contributions from both theoretical and applied social science were made to the work of the United Nations and the other Specialized Agencies, particularly in relation to technical assistance. Paragraphs 207, 208 and 209 related to regional action in the form of symposia in three different parts of the world. A new feature was that regional seminars were to be undertaken, in co-operation with international professional organizations such as the International Sociological Association, the International Economic Association and with intergovernmental agencies, i.e., the Food and Agriculture Organization and the Economic Commission for Asia and the Far East as well as for Latin America.

(144) Mr. CABOUAT (France) said that the French National Commission attached great importance to Unesco's studies of the impact of technological change and industrialization on countries in process of development. On behalf of his National Commission, he supported the majority of the projects under this head and asked for the reinstatement in the present programme of a project on the development of democratic institutions in evolving countries which had appeared in the initial draft programme submitted to the thirty-seventh session of the Executive Board. Such a study would be of definite topical interest and he therefore asked for restoration of the appropriation of $4,000 originally earmarked for the International Political Science Association for production of a report on this most interesting problem.

(145) Mr. SOMMERFELT (Norway) said that the subject was a vast one, and it was important to secure continuation of the projects if they were to be of scientific value.

(146) Mr. COWELL (United Kingdom) wondered if more would be achieved by supporting existing organizations. It was an important subject and needed careful study, which might perhaps be given more satisfactorily by the Programme and Budget Commission with its wider membership.

(147) As a secondary consideration, he asked how deeply the Director-General was committed to the project. With regard to paragraphs 205 and 209, he assumed that Unesco would finance the whole project despite the co-operation of other Specialized Agencies. He would be interested to know whether technical assistance funds would be forthcoming for such a project.

(148) The CHAIRMAN did not agree with the United Kingdom delegate that the project should be referred direct to the Programme and Budget Commission: it was for the Advisory Committee to give all possible assistance by preliminary consideration.

International Centre for Research on Social Problems of Industrialization in South Asia (paragraphs 216-222)

(149) The CHAIRMAN drew attention to the Executive Board's comments in document 8C/5 Add.1 and asked if the Chairman of the Executive Board wished to comment.

(150) Sir Ronald ADAM (Chairman of the Executive Board) said that the problem was continually arising in all countries and there was a need for research. The Executive Board considered it of the highest importance.

(151) Mrs. MYRDAL (Director, Department of Social Sciences), replying to the delegate of the United Kingdom, said that, with regard to paragraph 205, the contribution of the International Labour Organization would be in the form of studies to complement Unesco's work. There might possibly be some indirect financial support through the European Productivity Agency. As far as paragraph 209 was concerned, there were definite promises of co-operation from both ECAFE and FAO, involving financial consequences for those organizations, which would not, however, necessarily reduce Unesco's contribution.

(152) Turning to paragraphs 216-222, a combined activity was envisaged, of which one part was to have a permanent character, and another part to be more temporary and flexible. The first concerned a documentation centre on problems of industrialization and economic development, which would be set up so as to be of permanent benefit to the host country, while the second, the research centre proper, would have a nucleus staff acting as a task force at the disposal of member governments, which need not involve commitment for any long future. The whole project presupposed a host country sufficiently interested to contribute to the costs. It was further proposed that the Social Science Officer in Delhi should become an integral part of the research centre, if established in that region. A detailed memorandum on structure and staff, as well as needs for premises and equipment, had been prepared and was being discussed with the Indian Government.

(153) Mr. COWELL (United Kingdom) thanked the Director of the Department of Social Sciences for her statement. With regard to paragraph 216, he wondered whether, since it was undertaking part of the project, the Indian Government might not be persuaded to undertake the whole.

(154) Mr. LEE (United States of America) said that the National Commission of his country was strongly in favour of the project contained in paragraphs 216-222. It was sponsored by a National Commission and would therefore have that Commission's active interest, and it was well planned. He proposed that it be given a higher priority.

(155) The proposal of the delegate of the United States of America, seconded by the delegates of the German Federal Republic, France and Mexico, was adopted by 5 votes to nil with 4 abstentions.

The meeting rose at 7.10 p.m.

# TENTH MEETING

*6 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION (continued)**

**CHAPTER 3: SOCIAL SCIENCES (continued)**

Project 3.7: The social sciences and evaluation techniques (paragraphs 226-246)

(1) Sir Ronald ADAM (Chairman of the Executive Board) said that the resolution contained in this part was one of the additions made after the Executive Board's discussion with the Director-General on the first draft. The Board had felt that it was necessary for the Secretariat to find out how new projects were getting on, and this had led to the idea of promoting the techniques of evaluation.

(2) Mrs. MYRDAL (Director, Department of Social Sciences) informed the meeting about the experiment in evaluation at present being carried out in Montevideo. The new institute for research on public opinion in Uruguay was collaborating, as well as the French Public Opinion Research Institute, in an attempt to measure the impact of the Conference.

(3) A corrigendum made to paragraph 238 was submitted in order to incorporate adjustments of the work plans after a meeting in Geneva, in July, with technical assistance representatives and social scientists. The Department had been asked to hold another small meeting in Geneva in the summer of 1955, together with TAB representatives, in order to check on the progress made in regard to evaluation of technical assistance. The Economic and Social Council (paragraph 239) had set up a committee of eleven government representatives to make a general evaluation of technical assistance programmes. Unesco would place at their disposal a consultant in scientific evaluation techniques.

(4) Mr. JUNANKAR (India) asked for details of the budget implications of the Montevideo enquiry.

(5) Mrs. MYRDAL (Director, Department of Social Sciences) replied that $4,000, saved in 1954 out of projects in the same chapter, would cover the required expenses.

(6) Mr. COWELL (United Kingdom, questioned the value of the activities described in paragraphs 243-246.

(7) Mrs. MYRDAL (Director, Department of Social Sciences) said that these activities were closely linked with those of the United Nations in this field. Some countries (notably Ceylon) had already been requesting help in evaluation of development schemes.

(8) Mr. COWELL (United Kingdom) proposed that, since the technique was a new one, it should be deferred until 1956. The budgetary provision for 1955 could be suppressed.

(9) Mr. SOEBROTO (Indonesia) and Mr. AVIDOR (Israel) supported the motion. It was then put to the vote and adopted by 10 in favour, none against and 1 abstention.

Summary Tables I and II (paragraphs 247-261)

(10) Mr. BOW (Canada) wished to raise the budgetary implications of the project on the Unesco Institute in Cologne, on which he had commented earlier. He suggested that the subvention allocated to this activity should receive a low priority.

(11) Mr. COWELL (United Kingdom) supported the proposal of the delegate of Canada.

(12) Mr. MAHEU (Assistant Director-General) asked the delegate of Canada whether he regarded the Cologne Institute for Social Sciences as less important than the Hamburg and the Gauting Institutes which were included in the Education chapter. If it was a question of an abstract evaluation, that was one thing. If, however, the considerations were exclusively budgetary, the Secretariat was prepared to put up a case for the $32,000 appropriation requested. The abstract evaluation, it was understood, would be made by the 1956 and not by the present General Conference.

(13) Mr. BOW (Canada) had intended to refer only to the budgetary implications of the project. His Government's attitude, however, was the same towards other institutes as it was towards this one.

(14) Mr. SOMMERFELT (Norway) thought the Institute in Germany had not had time to prove its worth. A reduction in the subvention at this stage might curtail its activity or force it to close down. It should be given another two years.

(15) Mr. LEE (United States of America) agreed with the delegate of Norway. He understood that the Secretariat was to evaluate the project. This should include a discussion of the relationship between the Department of Social Sciences and the Institute, which might be able to carry out some of the work done in Unesco.

(16) Count Von HARDENBERG (German Federal Republic) proposed that the suggestion by the delegate of the United States of America on achieving a closer relation between the Institute and the Department of Social Sciences, should figure in the Committee's report.

(17) A vote was taken on the proposal made by the delegate of Canada, and seconded by the delegate of the United Kingdom, to lower the priority of the Unesco Institute for Social Sciences in Cologne. It was rejected by 3 in favour, 6 against and 4 abstentions.

**CHAPTER 6: EXCHANGE OF PERSONS SERVICE**

(18) Mr. W. CARTER (Chief, Exchange of Persons Service) explained that the chapter was divided into three parts. I: clearing house and advisory services; II: administration of Unesco fellowships; III: more general promotional activity.

(19) Mr. AVIDOR (Israel) expressed dissatisfaction with the method of sending expert missions. The "expert mission" had come into prominence in the last few years with the launching of technical assistance programmes, not always proving to be a successful method of action. Even if familiar with the language of the country he was assigned to, the expert did not always penetrate its mentality. Or he might leave behind him a good plan but no one qualified to put it into practice. Mr. Avidor noticed and approved a tendency to shift the stress towards the training of local talent. That was more in line with Unesco's task, although the policy was a long-term one. Fellowships should be awarded before an expert was invited, so that, when the work of the expert ended, the students could be made better use of.

(20) The delegate of Israel accordingly proposed that a high priority should be given to fellowships, provided (1) they had received some endowment; (2) the holders were very carefully selected; (3) their work was well planned and executed.

(21) Mr. COWELL (United Kingdom) thought that the remarks of the delegate of Israel showed that fellowship activities required careful planning. The more money there was, the more fellowships there would be. He feared there was not enough money to go too far in that direction.

(22) Mr. LEE (United States of America) agreed with the delegate of the United Kingdom. He asked what was the basis used in calculating the proposed budget figures.

(23) Mr. W. CARTER (Chief, Exchange of Persons Service) said there was a standard budget of $2,900 per fellowship. That included maintenance allowance, two-way travel, a sum for travel within the various countries, books or small equipment, miscellaneous expenses and insurance. In many cases governments agreed to pay part or the whole of a fellow's salary while he was away. The figure was a flexible one, allowing for differences in cost of travel.

(24) Mr. SOEBROTO (Indonesia) seconded the proposal by the delegate of Israel that a high priority should be given to fellowships.

(25) Mr. JUNANKAR (India) endorsed one aspect of the statement by the delegate of Israel, that of an exchange of fellowships between the underdeveloped countries themselves. That could form a second part

of the fellowships programme. He also recommended that the Secretariat prepare a comprehensive, systematic and expanding programme of fellowships to meet the requirements of the various countries, taking into account and co-operating with national schemes already in existence.

(26) Mr. Junankar wondered whether the fellowships could not be attached to certain fixed basic institutions. That would make it possible to check up on progress more carefully.

(27) Mr. LEE (United States of America) agreed with both the delegate of India and the delegate of the United Kingdom. He strongly endorsed the remarks by Mr. Junankar on the possible uses of Unesco's facilities as a clearing house in this field. But the Organization should not get involved in a large programme of administering fellowships. He suggested in the interest of concentration that those at the higher level should receive a lower priority.

(28) Mr. CABOUAT (France) stressed the importance which the French National Commission attached to the Unesco system of fellowships. He agreed that Unesco fellowships should be supplementary to national programmes and, in his view, the first to benefit from the Unesco programme should be those countries least favourably placed as regards bilateral exchanges. Fellowships were most necessary in the most neglected domains of science and technology. He differed, however, from the delegate of Israel on the question of experts. In his view, the two systems, far from being opposed, were complementary. The best fellowship holders who had come to France had been recruited on the spot by experts from Unesco; that was the best method of selection even if it occasionally entailed administrative difficulties. He further felt that there should be no special priorities for the various items in the Exchange of Persons chapter, and the priority for each should be decided in the light of the priority given to the programme activity with which it was connected.

(29) The CHAIRMAN thought it wiser to defer a decision on Mr. Avidor's proposal until the details of the chapter had been debated. When the relative priority of the different chapters was being discussed, it would be possible to see what part Exchange of Persons should play in relation to the others.

(30) Mr. AVIDOR (Israel) reminded the Chairman that his recommendation was not stated in terms of the budget, but with a view to future planning.

(31) Mr. BOW (Canada) was torn between two points of view: the programme was an important one and the country to which a fellow was sent benefited as much as he himself. But, from the point of view of the budget, his delegation's position had already been made clear.

(32) Mr. W. CARTER (Chief, Exchange of Persons Service) explained, in answer to a remark by Mr. COWELL (United Kingdom), that the Unesco programme of fellowships did not overlap national programmes; it had certain distinctive characteristics. These were based on the following criteria:

1. The fellowships always related to a specific Unesco project.

2. The number proposed was on a sufficient scale to ensure an impact in one year. Only in new fields or for specific cases were one or two new fellowships proposed in a particular year.

3. They gave an opportunity to visit a variety of countries where there was a specific activity going on (e.g. fundamental education).

(33) Direct contact with Unesco and its work was a part of the programme of every fellowship.

(34) Mr. JUNANKAR (India) pointed out that the criteria outlined by Mr. Carter were different from those on which his own idea was based. He wished for a programme linked in large measure with the efforts of the countries concerned, within the framework of the Exchange of Persons programme.

(35) The CHAIRMAN said that the proposal by the delegate of India was an important one. The meeting should examine it again when the Executive Board's document on remodelling the programme was being discussed.

Project 6.1: Clearing house and advisory services (paragraphs 9-26)

(36) Mr. W. CARTER (Chief, Exchange of Persons Service), on paragraph 17, referred to Mrs. Myrdal's earlier remarks on the plans of her Department for 1956. The work described in this paragraph was the direct result of the advice of a social science consultant.

(37) Mr. COWELL (United Kingdom) supported this section. He paid tribute to the value of the publication Study Abroad. Incidentally, the work illustrated the complexity of the sphere Unesco was entering in attempting to give scholarships. Mr. Cowell wondered if the material contained in Teaching Abroad might not be more effectively disseminated by the International Association of Universities.

(38) Mr. W. CARTER (Chief, Exchange of Persons Service) said that the publication was distributed as a supplement to the International Universities Bulletin. If it were not printed under Unesco's budget, the expense of obtaining extra copies for universities that did not take the bulletin would come to almost the same as that incurred under the existing arrangement.

(39) Mr. CABOUAT (France) produced a new suggestion regarding paragraph 21: the Secretariat might perhaps get in touch with the International Union of Official Travel Organizations and secure the insertion of items about Travel Abroad in that body's journal.

(40) Mr. W. CARTER (Chief, Exchange of Persons Service) said there was a possibility of merging the two publications. Its technical aspects were being examined. This would spread interest in Unesco very widely and would have an important effect on the travel agencies. It might require a slight increase in the budget, but the impact would be well worth it, as a totally new market would be opened up.

Project 6.2: Fellowship administration (paragraphs 27-67)

(41) Mr. W. CARTER (Chief, Exchange of Persons Service), in answer to earlier remarks on this project by the delegate of the United States of America, said that higher budgetary level fellowships were tied up with technical aid projects in other parts of the programme.

(42) Mr. COWELL (United Kingdom) thought that separate itemizing might be helpful in this project.

(43) Mr. LEE (United States of America) wondered if it would not have been better for the figures in this programme to be shown under the different projects to which the fellowships were related.
(44) He referred to the remark he had made during the general discussion of the chapter, with reference to paragraphs 37 and 38, 44-46, 49-51, 55-63, and proposed that fellowships listed under the higher budgetary level be awarded a lower priority. He asked what the figures in paragraph 67 applied to.

(45) Mr. AVIDOR (Israel) opposed the suggestion by the delegate of the United States of America. All fellowships under the higher budgetary level should be considered as having the same relative importance as those of the normal budget.

(46) Mr. MAHEU (Assistant Director-General) felt apprehensive about the repercussions of the United States delegate's proposal. Fellowships were part and parcel of the projects of the departments. None of the projects with which the study grants mentioned by the United States delegate were connected had had its priority reduced; in some cases it had even been raised. Such a budgetary cut, therefore, could mean only one thing, namely, that the Committee disapproved of the whole system of fellowships, and this he refused to believe.

(47) Mr. CABOUAT (France) thought that the fellowships connected with programme projects should be shown in the relevant chapters with an indication of the proposed expenditure.

(48) Mr. MAHEU (Assistant Director-General), in reply, said that cross-references could be inserted in the relevant chapters of the programmes but that a budgetary transfer could not be considered, for the administrative responsibility rested essentially with the Exchange of Persons Service.

(49) Mr. SILLER (Mexico) asked on what criterion the study grants mentioned in paragraph 52 were awarded.

(50) Mr. W. CARTER (Chief, Exchange of Persons Service) explained that this activity was not in the category of specific technical aid. It was of a broader promotional nature. The ten fellowships offered for the last two-year period had aroused great interest. Thirty-seven out of the sixty Member States to which a circular had been sent had already replied.

(51) Mr. COWELL (United Kingdom) shared the view of the United States delegate over this question. He was not impressed by the number of Member States which had accepted the offer. He was in fact surprised that they had not all done so. He did not think the advantage to Unesco of the scheme was clear, and he proposed that it be awarded a low priority.

(52) Mr. AVIDOR (Israel) pointed out that the activity described in paragraph 52 was not under the higher budgetary level.

(53) Mr. W. CARTER (Chief, Exchange of Persons Service) said that the fellowships for artists and writers were very serious propositions, contrary to what the delegate of the United Kingdom inferred. National Commissions and governments had accepted the idea and sent highly qualified candidates. There had been a tendency to neglect artists and writers in favour of scientific and technical workers. This was a small step in the other direction.

(54) The CHAIRMAN pointed out that the proposal by the delegate of the United States of America that the fellowships referred to in paragraphs 37 and 38, 44-46, 49-51 and 55-63 should be awarded a lower priority, had not been seconded and he called for support for it.

(55) Mr. COWELL (United Kingdom) seconded that proposal.

(56) Mr. SILLER (Mexico) disagreed with what the United Kingdom delegate had said about paragraph 52. The Chief of the Exchange of Persons Service had stressed the importance of maintaining these particular fellowships and the delegation of Mexico supported that view, at any rate until the Universal Copyright Convention had been ratified.

(57) Mr. BOW(Canada)deplored the fact that the question of higher budgetary level had come up again. Had the meeting not agreed that decisions were not to be taken on that basis? He suggested that the project be taken section by section, with a reference to the projects with which the different sections were connected.

(58) Agreed.

(59) The CHAIRMAN asked the meeting to defer accordingly the discussion of paragraph 52 and to take up Section A, paragraphs 32-38.

(60) Mr. CABOUAT (France) asked the Committee to bear in mind the priorities given to the projects with which the fellowships were connected.

(61) Mr. MAHEU (Assistant Director-General) said that none of the projects to which the fellowships mentioned by the United States delegate related had had its priority reduced.

Section B, paragraphs 39-43

(62) No comments.

Section C

(63) Approved without comment.

Section D

(64) The proposal made earlier by the delegate of the United States of America on paragraph 52 was seconded by the delegate of Norway.

(65) Mr. LEE (United States of America) pointed out that the fellowships for artists and writers seemed to be exceptions to the standard rates. The grants of $3,500 were higher than the average.

(66) The CHAIRMAN remarked that also they did not relate to any specific project.

(67) Mr. CABOUAT (France) entirely agreed with the view previously expressed by the delegate of Mexico: it was a good thing for Unesco to encourage international exchanges of artists and writers.

(68) A vote was taken on the question of reducing the priority of the fellowships for artists and writers (paragraph 52). The motion was rejected by 3 in favour, 7 against and 1 abstention.

Section E, paragraphs 62 and 63

(69) Mr. LEE (United States of America) thought the sum allocated to fellowships in mass communication was too high, and proposed a low priority for this item.

(70) Mr. CABOUAT (France) formally moved that the discussion of the fellowships attaching to mass communication be held over until the Committee came to examine that Department's programme and budget.

(71) Agreed.

Section F, paragraphs 64-67

(72) On paragraph 67, Mr. W. CARTER (Chief, Exchange of Persons Service) explained, at the request of the delegate of the United States of America, that three types of fellowships were administered by the Exchange of Persons Service: normal programme; technical assistance; and fellowships sponsored by Unesco (about 20 to 25 a year since 1948), apart from those administered on behalf of governments for their own nationals. Five thousand dollars was a rough estimate of the possible budget under this heading. It would not cover the costs of the staff concerned; it was intended to meet the additional expenses incurred when there was a large request for administration.

Project 6.3: Promotion of Exchange of Persons for international understanding
Project 6.31: General promotion (paragraphs 69-76)

(73) Mr. W. CARTER (Chief, Exchange of Persons Service) explained that the meetings of experts referred to in these paragraphs, particularly that held in Bangkok, had had a considerable impact on the development of the programme of Unesco in the region concerned. The solution of many problems had been easier to find through direct contacts on the spot.

Project 6.32: Exchange of workers (paragraphs 77-91)
(74) The CHAIRMAN referred the meeting to document 8C/PRG/20 giving comments by the Director of the International Labour Organization on this project.

(75) Mr. COWELL (United Kingdom) considered that the leading part in promoting these activities should be taken by the International Labour Organization. He did not find quite satisfactory the reference to that Organization in paragraph 90, where it was stated that its co-operation would be sought".

(76) Mr. W. CARTER (Chief, Exchange of Persons Service) said that co-operation with the International Labour Organization was a constant factor of the programme ever since it had first been mooted. That Organization, however, considered that study tours concerned with adult education were a function of Unesco rather than one of its own.

(77) Mr. COWELL (United Kingdom) was grateful for Mr. Carter's partial reassurance. But did the ILO supply any cash?

(78) Mr. W. CARTER (Chief, Exchange of Persons Service) said that in spite of their efforts they had not secured much help on the budget side. This would no doubt eventually be forthcoming if delegations at meetings of the ILO shared the opinion expressed by Mr. Cowell.

(79) Mr. MAHEU (Assistant Director-General) agreed with the delegate of the United Kingdom. He had himself taken part in the discussions with the Specialized Agencies at Geneva. The Secretariat would redouble its efforts to secure the International Labour Organization's participation in the project financially as well as otherwise.

(80) There being no other speakers, project 6.32 (paragraphs 77-91) was approved.

Project 6.33: Exchange of young people (paragraphs 92-97)

(81) Mr. W. CARTER (Chief, Exchange of Persons Service) said that the criteria for the award of grants under this project had been made more strict. Youth organizations were asked to finance an additional period of 3 to 5 months for studies for any candidate they proposed, to be devoted to youth work. That might reduce expense, as far fewer organizations would qualify.

Project 6.34: Exchange of teachers (paragraphs 98-106)

(82) Mr. Carter said that the publication Teaching Abroad was becoming increasingly useful in this connexion (paragraph 103).
(83) Paragraphs 104 and 105, grants for regional cultural studies, were another activity which ventured a little way out of the usual technical field.

(84) Mr. COWELL (United Kingdom) remarked that young people did not know enough about their own culture to profit from the study of cultures abroad. He hoped this activity was not included at the expense of the exchange of young scientists.

(85) Mr. W.CARTER(Chief, Exchange of Persons Service) did not recall an actual project on the exchange of young scientists. He felt however that scientists had a great many opportunities of travel, particularly in the field of research. The university grants for the regional cultural studies project were one way of broadening the interests of young teachers and advanced students.

Summary Tables I and II (paragraphs 107-111)

(86) Mr. COWELL (United Kingdom) welcomed the strengthening of the staff. It would make it easier to maintain the essential contact with National Commissions.

The meeting rose at 12.45 p.m.

# ELEVENTH MEETING

*8 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56 BEFORE THE OPENING OF THE SESSION (continued)**

**DEPARTMENT OF MASS COMMUNICATION**

(1) Mr. DESJARDINS (Department of Mass Communication) submitted the proposed programme for his Department. To forestall any potential ambiguity arising from the dual or even tripartite character of the activities of the Department of Mass Communication, the Director-General had endeavoured to draw a clear distinction between its different functions. First, there was publicity, designed to reach the "enlightened" sectors and the masses. Its tasks were (a) to explain why Unesco existed, what it was, what it did and what it would do in future; (b) to foster international understanding by devoting a considerable part of its activities to propaganda for the United Nations and the Specialized Agencies and ensuring that the press, radio and visual means of communication gave support to the constitutional aims of Unesco, namely human rights, fundamental education, the struggle against illiteracy and against racial discrimination, and so forth. That work demanded close co-operation with the other Unesco departments and could be developed effectively only with the help of Member States and their National Commissions. Projects under this heading had been placed under general activities, Section I, items 5.1 and 5.2, "A. Public information and the promotion of international understanding". For the first time, large sums had been provided to help certain Member States and their National Commissions translate and adapt Unesco publications and documents, organize meetings designed to further international understanding, etc. That propaganda work, which everyone agreed was needed, absorbed by itself 53% of the staff and 50% of the proposed budget for the Department, not including the sums set aside for the latter's direction. The service was one which had to be made available to the entire Organization, as well as to the United Nations and Specialized Agencies. It was a function to which the Director-General attached the greatest importance and which was not peculiar to Unesco, since all the other Specialized Agencies of the United Nations devoted large sums to their publicity work - although less than Unesco in proportion to their budgets.

(2) Mr. Desjardins went on to the programme activities proper which Unesco was constitutionally obliged to undertake. These were found under Section I, B, Assistance in development of mass communication, reduction of obstacles to the free flow of information (by causing Member States to adhere to international conventions and administrative arrangements), mass communication clearing house, exchange and stimulation of educational, scientific and cultural programmes. Some of those activities would also be found under Section I, items 5.3 and 5.4. On the other hand, projects under item 5.5 (organization of pilot projects and research in the new techniques to facilitate development of mass communication in Member States and enable full use to be made of them for educational, scientific and cultural aims) had been placed, together with technical aid to Member States in the development of their mass communication services (item 5.6) under Section II, Special Activities, consisting, on the one hand, of pilot projects (item 5.5) and, on the other hand, of projects for technical aid (item 5.6). This part of the programme absorbed about 28% of the staff of the Department, and 28% of the total appropriations requested, plus 8% for technical assistance missions to Member States. It had to be emphasized that 70% of the proposed budget for these forms of assistance towards developing means of communication concerned almost exclusively the underdeveloped regions, while the remaining 30% was devoted to activities of interest to all Member States. In addition, all the projects envisaged under items 5.3, 5.4, 5.5 and 5.6 closely corresponded to requests which Unesco had been receiving for several years past from the Economic and Social Council (especially the seventeenth session, held in April last) and from the General Assembly of the United Nations. Mr. Desjardins stated that some of the projects were carried out jointly, or in close co-operation with the Departments of Education,

Social Sciences and Cultural Activities, and his Department naturally worked in constant liaison with Technical Assistance and the Exchange of Persons Service. The activities of the Department were, in other words, very largely linked with the activities of other Unesco departments. In conclusion, Mr. Desjardins mentioned project 5.7 of Section II: Voluntary international assistance, which covered activities that were also very valuable and had been approved by many Member States: these were activities of a somewhat special technical nature and some of them (e.g. item 5.71 - Unesco Coupon Scheme) were designed to facilitate the flow of educational, scientific and cultural materials, as well as the exchange of persons. Another item, 5.72, concerned the Gift Coupon programme, which, he pointed out, had an undeniable propaganda and publicity value. Twenty per cent of the staff and 14% of the budget of the whole Department were absorbed by this last function. Mr. Desjardins said he had merely described the various objectives of the Department; he proposed to give the Committee, as discussion of the programme proceeded, any additional explanations which might clarify certain parts of the projects submitted to it.

(3) The CHAIRMAN asked for discussion of the chapter as a whole before the projects were examined in detail.

(4) Mr. COWELL (United Kingdom) wished to pay tribute to the Director of the Department of Mass Communication for his work in preparing the programme; his absence was to be regretted. The scope of the activities of the Department of Mass Communication was so wide that that Department alone could easily use up the whole of Unesco's budget. It was, moreover, a Department which provided Member States with good opportunities for collaboration, and he considered that the Organization should call upon them to participate more closely. It had been underlined that Unesco acted as a publicity agent not only for itself but also for the United Nations and the other Specialized Agencies. He was uneasy on the matter of coordination, since the other agencies had their own budgets for propaganda. Unesco might well look to the United Nations and the Specialized Agencies for financial assistance. Mr. Cowell proposed that, owing to the varied nature of the objectives pursued by the Mass Communication Department, the Programme Commission should establish a working party to study the structure of that Department.

(5) Mr. LEE (United States of America) emphasized the primary need at this stage of Unesco's programme for a dynamic and imaginative programme of public information on its work rather than for clearing house activities, studies, agreements and elimination of obstacles. He did not consider that new resolutions were necessary for that purpose, but hoped that it would be achieved by the proposed administrative changes.

(6) Mr. CHAYET (France) agreed with the United Kingdom delegate and considered that the problem of the structure of the Department of Mass Communication should be thoroughly examined. The United Kingdom delegate had rightly recommended to the Programme and Budget Commission that it should lay particular stress on this problem. Mr. Chayet was also in favour of setting up a working party to study the division of functions in the Mass Communication Department. On the other point raised by the United Kingdom delegate, Mr. Chayet felt too that close attention should be paid to the assistance given by Unesco towards developing the mass communication services of countries badly equipped in that respect; that was, indeed, one of the essential tasks of the Organization.

(7) The CHAIRMAN asked whether the Committee would agree to the proposal that the attention of the Programme and Budget Commission should be drawn to the need to examine the organization and structure of the Department.

(8) Agreed.

(9) The Chairman then invited discussion of the programme in detail.

Project 5.1: Public information and promotion of international understanding by Member States (paragraphs 15-28)

(10) Mr. DESJARDINS (Department of Mass Communication) stated that this project dealt with direct assistance to Member States and National Commissions - assistance which had repeatedly been requested and was now being extended for the first time. He had nothing to add to the text of the programme, which was sufficiently explicit.

(11) Mr. SOMMERFELT (Norway), referring to paragraph 19, recalled the doubts expressed by his and other delegations at the previous Conference. He asked the Secretariat whether it was satisfied with the results of its initiative.

(12) Mr. DESJARDINS (Department of Mass Communication) said that the work done so far was only a beginning, based on requests received. Whether the experiment would be developed or not would depend on results.

(13) The CHAIRMAN said that the project had been included in the programme on the recommendation of a meeting of National Commissions at the time of the seventh session of the General Conference, and that it had been understood that Unesco and the National Commissions should contribute to it jointly. He wondered how far that policy had been kept to during the past year.

(14) Mr. COWELL (United Kingdom) asked how far Member States had contributed to the project.

(15) Mr. MAHEU (Assistant Director-General) said that the idea had been mooted at the last session of the General Conference by several delegations, the Swedish delegation in particular, in connexion with assistance to National Commissions. The experiment made in 1953-54 had had most encouraging results, many requests having been submitted to the Secretariat. With a very small amount of money - a few hundred dollars -

the National Commissions had been able to carry out a programme of translations which would have cost Unesco several thousand dollars; the total sum proposed, $15,000 for the two years, was small when it was remembered that Unesco now had 72 Member States. The appropriations so far granted ranged from $300 to $1,075. He could show the Committee the list of countries with which contracts had been concluded.

(16) In answer to a question by the CHAIRMAN, the Assistant Director-General indicated that the contributions of Member States had always exceeded that of Unesco, sometimes by as much as fifteen or twenty times.

(17) Mr. BOW (Canada) asked whether the contracts for 1955-56 included printing or whether they covered only translation.

(18) Mr. DESJARDINS (Department of Mass Communication) said that only adaptation and translation were envisaged for the present.

(19) Mr. JUNANKAR (India) said that the programme was a very important one. At present the majority of Unesco's publications were in English, French and Spanish, which were not understood in large areas of the world; if they were to reach a wider public, it was essential to increase the number of languages. He proposed that the programme should be given a higher priority.

(20) Mr. COWELL (United Kingdom) proposed that, since the work was of a scope wider than the programme of the Department of Mass Communication, discussion be deferred until the question of regionalization came up.

(21) Mr. MAHEU (Assistant Director-General) said that the Secretariat endorsed the suggestion that there should be a special enquiry by a working party into the administrative structure of the Department. The working party might also consider the scope to be given to paragraph 19.

(22) The CHAIRMAN interpreted the proposal of the United Kingdom delegate to mean that the activity in question was a case which the proposed working party might discuss.

(23) The proposal of the delegate of India, seconded by the delegate of the German Federal Republic, to raise the priority of sub-project (A) (paragraph 19), was adopted by 9 votes to nil with 2 abstentions. It was agreed that the report of the Committee should include a combined reference to the proposal of the delegate of the United Kingdom and that of the delegate of India.

(24) Mr. COWELL (United Kingdom), referring to paragraph 25, expressed surprise that a project entitled Direct Action by Member States should entail a cost to Unesco of $10,000 for the years 1955-56. He proposed the reduction of the budgetary provision in paragraph 28 to $100,000 spread over 1955 and 1956.

(25) The CHAIRMAN, speaking as delegate of Australia, questioned the use of Unesco funds for such activities. He considered the first example given in paragraph 26 ill chosen, since the Australian authorities, in producing the documentary film on Unesco in action in that country, had done without financial help from Unesco.

(26) Mr. LEE (United States of America) supported the views of the Australian delegate and said that he would like to see more emphasis put on activity and financial support by Member States. He, for his part, did not like the idea of Unesco financing the organization of "Unesco weeks" in Member States (paragraph 26, item 2).

(27) Mr. SOMMERFELT (Norway) agreed with the preceding speakers and was in favour of reducing the budgetary provision.

(28) Mr. BOW (Canada), while supporting the view of the United Kingdom delegate, pointed out that the Committee had not previously made recommendations on the specific allocation of funds. He asked whether the United Kingdom delegate would agree to limit his proposal to lowering the priority of the project, provided that his suggestion regarding the budget appeared in the summary records.

(29) Mr. COWELL (United Kingdom) agreed to modify his proposal accordingly.

(30) Mr. AVIDOR (Israel) was in favour of the budgetary reduction proposed by the delegate of the United Kingdom, and would further assign to the $10,000 a lower priority. The proposal was supported by the United Kingdom delegate, and adopted by 9 votes to nil with one abstention.

(31) Mr. MAHEU (Assistant Director-General) pointed out that it would be as well to make it clear that the lower priority accorded to this activity by the Committee referred only to the budget allocation and not to the substance of the project.

Project 5.2: Public information and promotion of international understanding by Unesco

Paragraphs 29-42

(32) Mr. DESJARDINS (Department of Mass Communication) said that this project covered the whole of the activities of the Press Division. In reply to the delegate of Norway, he stated that the amounts set aside for travel in paragraph 42 applied to all the preceding paragraphs. Journeys had been made to many countries, for instance, to organize press conferences in countries visited by the Director-General, to produce topical articles and to collect on-the-spot information. All these were activities which had resulted in the publication of articles in the Courier or in the preparation of booklets which had been distributed.

(33) Mr. JUNANKAR (India), recalling the statement of the United States delegate, considered that the information programme should be less concerned with

publicizing Unesco, the United Nations and the other Specialized Agencies. A co..structive approach to the problem was needed.

(34) Mr. LEE (United States of America) agreed with the delegate of India. Information should be concentrated on constructive Unesco work in progress, for example, seminars, technical assistance missions, experimental studies and other such activities, with a view to informing a public which was unaware of what was being done.

(35) Mr. COWELL (United Kingdom) supported the view of the United States delegate. He felt also that there was insufficient reference to co-operation with Member States and National Commissions, especially in paragraphs 31, 32 and 35.
(36) He regretted that limited time often made it possible only to raise points of criticism, but he wished to pay a tribute to the Director-General for his many achievements. The United Kingdom delegation had in the past criticized the Unesco Courier, and he was pleased to see that it had now greatly improved.
(37) Turning to paragraph 42, he asked whether staff travel, which accounted for a large sum, could be accommodated under paragraph 24, which provided for staff travel in connexion with activities in Member States.
(38) Finally, he proposed that resolution 5.2 should be expanded by the insertion of the following words after "authorized" in the first line: "with the co-operation of National Commissions and Member States".

(39) Mr. SILLER (Mexico) supported the proposal by the United Kingdom delegate in regard to resolution 5.2.

(40) Mr. MAHEU (Assistant Director-General) endorsed the remarks of the United Kingdom delegate on co-operation with National Commissions and co-ordination with the United Nations and the Specialized Agencies; the Secretariat always kept both those matters in mind.

(41) The proposal of the United Kingdom delegate was adopted.

(42) The CHAIRMAN, speaking as Australian delegate, referred to the press clippings service. The Australian authorities considered the cost of this service excessive and he would like some information on results.

(43) Mr. DESJARDINS (Department of Mass Communication) said that only one staff member was employed on the work. The press clippings service was of great importance in giving information on world reaction to Unesco; unfortunately, owing to insufficient funds, it was only possible to subscribe to services in a limited number of countries.

(44) Mr. MAHEU (Assistant Director-General) admitted that the total cost of making this world press survey was rather high, but it was essential for the Secretariat to know the attitude of the press in the different countries towards Unesco. Some of the unfavourable comments rested upon misunderstandings or were due to inadequate information which it was important to dispel or supplement by promptly issuing a corrective.

(45) Mr. COWELL (United Kingdom), while sympathizing with the Australian point of view, was impressed by the explanations of the value of the service. However, the service was an internal one for the whole of Unesco, and its use was not limited to the Department of Mass Communication. It might therefore be shifted to another part of the Organization, more centrally placed, and he proposed that it should be included among the items to be considered within the framework of the administrative study.

(46) Mr. SILLER (Mexico) considered that the task of compiling a press review could be carried out by the National Commissions and the regional offices of Unesco, which could send monthly or periodic reports as convenient. In that way the work could be done at lower cost and with great efficiency.

(47) Mr. MAHEU (Assistant Director-General) said that the Unesco regional offices were already doing this, but they also had to subscribe to press clipping agencies. The Secretariat would be happy to see the work done by the National Commissions, but he doubted whether this was possible. The delegate of Mexico had advocated reports every month, but that would be far too long an interval. If Unesco's reactions were to be effective, it would have to get the information promptly.

(48) In reply to the CHAIRMAN, Mr. DESJARDINS (Department of Mass Communication) said that his Department received every week nearly a thousand press cuttings in over twenty languages.

(49) Mr. BOW (Canada) recognized the importance of the service and asked whether the contracts in paragraph 42 applied to this service only or to the whole of project (A).

(50) Mr. DESJARDINS (Department of Mass Communication) said that the figures applied to the project as a whole, $3,000 being in respect of the press clipping service.

(51) Mr. JUNANKAR (India) asked how helpful the analysis of the reactions of the public through press cuttings had been in planning the programme of the Organization.

(52) Mr. MAHEU (Assistant Director-General) said that the Secretariat took those reactions into account, while continuing to use its own judgment in deciding on the general lines of the programme - and still more on how to carry it out.

(53) The CHAIRMAN drew attention to the United Kingdom delegate's proposal that the press cuttings service should be discussed in connexion with reorganization of the activities of the Department of Mass Communication. There being no objection, the Rapporteur was asked to take note accordingly.

Paragraphs 43-50

(54) The Chairman drew attention to document 8C/PRG/18 concerning the Unesco Courier.

(55) Mr. DESJARDINS (Department of Mass Communication) said that the situation of the Courier was clearly set forth in document 8C/PRG/18. Since the format of the publication had been changed, it had made some progress and sales were much better. Detailed figures of the number of copies printed, as well as of sales, with individual sales figures for those countries where the propaganda campaign was proceeding, were given in the document mentioned. He added that the annual income from subscriptions amounted to over $15,000.

(56) The CHAIRMAN asked whether paragraph 46 contained the whole appropriation for the Unesco Courier, or whether there were additional estimates in other parts of the programme.

(57) Mr. RAO (Acting Chief, Bureau of Programme and Budget) replied that the figures did not cover all the costs; the remainder came from the Publications Fund.

(58) Mr. AVIDOR (Israel), while reading and appreciating the Courier, did not understand its purpose. Paragraph 43 indicated that it was focused at school-teacher and university undergraduate level, but the number of teachers alone exceeded the circulation figures which had been given.

(59) Mr. MAHEU (Assistant Director-General) said that the intention in mentioning students and teachers was to give some indication of the cultural level of the public at which the Secretariat was aiming, without, however, suggesting that this would be the only public affected. While sales were still lower than the number of copies printed, a rapid increase in sales could nevertheless be observed, and for the first time it appeared that the future could be regarded optimistically.

(60) Mr. COWELL (United Kingdom) asked for figures on the cost of the Courier for the period 1953-54.

(61) Mr. RAO (Acting Chief, Bureau of Programme and Budget) replied that he would provide the answer a little later.

(62) Mr. AVIDOR (Israel), supported by Mr. COWELL (United Kingdom), suggested that the following question be studied: whether the Unesco Courier was necessary, and whether its function might not be fulfilled by other publications.

(63) It was agreed that the point should be included in the Committee's report.

(64) Mr. JUNANKAR (India) asked whether the work of the joint information mission proposed in paragraph 49 was not already being performed by the United Nations and the Specialized Agencies themselves.

(65) Mr. DESJARDINS (Department of Mass Communication) stated that the reference was to joint missions the costs of which were shared equally by four Specialized Agencies - UNICEF, WHO, FAO and Unesco, each paying 25%; the missions deal with both press and radio.

(66) In reply to the United Kingdom delegate, Mr. Desjardins said that members of the Secretariat sometimes took part in these missions, but that it was preferable for them to be led by well-known journalists, whose articles would be sure to have a better reception in the press. In reply to a question by the CHAIRMAN, Mr. Desjardins explained that the travel expenses of members of the Secretariat who formed part of such missions were included in the staff travel costs mentioned in paragraph 42.

(67) The CHAIRMAN expressed surprise at this explanation; he had always understood that the budgetary provisions shown with each project were directly related to it. Such flexibility in the application of resources was a new factor, which would have to be considered seriously.

(68) Mr. MAHEU (Assistant Director-General) added that the inclusion in these joint missions of journalists from outside the Secretariat had the twofold advantage of securing the services of journalists with world-wide reputation and of allowing them a freedom of expression that was not permissible to international officials. The missions were sometimes organized so as to fit in with staff travel; that was in conformity with a recommendation by the General Conference, which invited the Director-General to ensure, whenever possible, that members of the Secretariat who were travelling were used for several purposes, so far as their competence permitted. Thus the travel provided for in paragraph 42 might assist the missions envisaged in paragraph 50, the budget for which, however, covered only contracts with persons outside Unesco.

(69) Mr. COWELL (United Kingdom) asked whether a document could be produced isolating staff travel activities, with a view to ascertaining whether there was any overlapping.

(70) Turning to paragraph 49, he asked what evidence there was to justify the word "successful". He proposed, and Mr. JUNANKAR (India) seconded, that the project be given a lower priority.

(71) Mr. MAHEU (Assistant Director-General) pointed out that no travelling expenses were provided for in connexion with paragraphs 49 and 50, but journeys intended for other purposes might very well be used to implement these two paragraphs.

(72) The proposal of the United Kingdom delegate, seconded by the delegate of India, was adopted by 6 votes to 1, with 3 abstentions.

Paragraphs 51-64: Co-operation with radio organizations and production of recorded radio programmes

(73) Mr. DESJARDINS (Department of Mass Communication), in presenting this part of the programme, recalled that activities in this field comprised, inter alia, the preparation of weekly scripts designed for broadcasting stations and known as the Unesco World

Review, which contained two five-minute talks and a radio newsreel. It served broadcasting organizations in 115 countries with an audience of about 100 million listeners every week. Another activity consisted of recordings of interviews, and the preparation of recorded programmes for organizations which asked for them. Finally, in order to encourage national organizations to broadcast certain programmes, producers belonging to broadcasting organizations in Member States whose language was not one of the Unesco working languages were invited to take courses at the Secretariat, where they prepared the basic essentials for a series of broadcasts intended for their own country. That system had produced excellent results and the Secretariat proposed to extend it.

(74) In reply to an earlier question from the Chairman, Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that the printing costs of the Courier in 1953 were $40,000. The increase for 1955-56 was due to the new format and an increased circulation.

(75) Mr. COWELL (United Kingdom), reverting to paragraphs 51-64, considered the Radio Division among the most successful activities of the Department of Mass Communication. He asked whether there had been an increase in the number of receiving countries.

(76) Mr. DESJARDINS (Department of Mass Communication) replied that the broadcast had expanded and requests had steadily increased during the past two years.

(77) Mr. SILLER (Mexico) asked whether any action had been taken to ensure the broadcasting of Unesco announcements over commercial radio networks. In some cases it was difficult to induce such companies to take part in this publicity, but in others it was often possible to obtain collaboration.

(78) Mr. DESJARDINS (Department of Mass Communication) said that the Secretariat had established contact with commercial broadcasting organizations in many countries. These organizations warmly welcomed scripts with an educational, scientific or cultural value, which they had themselves no means of preparing and which were transmitted outside their commercial programmes; numerous contacts of this kind had been made, in particular with South American countries.

(79) The CHAIRMAN, referring to paragraph 64, project (F), asked why the cost of equipment was $4,500 in 1955 but increased to $15,000 in 1956.

(80) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that the 1956 figure included the cost of new equipment for studios in the new headquarters building.

(81) The CHAIRMAN wondered if such equipment should be included in the estimates for the new building.

(82) Mr. DESJARDINS (Department of Mass Communication) confirmed that the entire studio installation, sound-proofing, etc. was covered by the funds provided for the construction of the new Unesco building, but there were some expenses, such as the adaptation of existing apparatus to the new premises, which would be borne by the Department of Mass Communication.

(83) The CHAIRMAN said that he was not entirely satisfied by that explanation and asked to what exact use the additional appropriation of $10,000 would be put.

(84) Mr. MAHEU (Assistant Director-General) asked that the Secretariat be given time to refer to the detailed estimates for the construction of the new building.

(85) Mr. BOW (Canada) asked for an assurance that there were no hidden costs for the new headquarters in the 1955-56 budget in the present document.

(86) Mr. MAHEU (Assistant Director-General) gave that assurance; he repeated, as Mr. Desjardins had already stated, that the studio installation was included in the plans for the new building. All that was referred to here was the adaptation of existing apparatus to the new building and it was that point which he had asked for time to check upon.

(87) Mr. COWELL (United Kingdom) compared the allocations for the Unesco World Review in paragraph 53 with those for the production of recorded radio programmes in paragraph 64. The World Review, with its comparatively small cost, was obtaining excellent results; did the $70,000 in paragraph 64 produce proportionately greater results?

(88) Mr. DESJARDINS (Department of Mass Communication) said that the method of inviting "guest-producers" would bring in five or six countries, whereas that of sending programmes to broadcasting organizations would extend to about 115 countries, with consequent reduced expenditure and the certainty of obtaining much greater results. He considered that both methods were valuable and that both were necessary.

Paragraphs 65-71

(89) Mr. LEE (United States of America), referring to the proposed exhibitions in paragraph 65, suggested that the exhibitions programme be reviewed by a working party of the Programme Commission.

(90) With regard to the use of certain terms in the chapter, the United States National Commission had emphasized the desirability of "on-the-spot" reporting as opposed to "exclusive or semi-exclusive" stories referred to in paragraph 70.

(91) Mr. AVIDOR (Israel), referring to paragraph 66, asked if it would be necessary to produce an exhibition if the next Conference were held elsewhere than in Unesco House.

(92) Mr. MAHEU (Assistant Director-General) explained that all the budget estimates had been drawn up on the assumption that the next session of the General Conference would take place in Paris, but obviously, if the session were to be held elsewhere,

the words "in Unesco House" would have to be deleted from paragraph 66.

(93) Mr. BOW (Canada) asked whether the cost of the exhibition in question would be higher if the Conference were not held in Paris.

(94) Mr. MAHEU (Assistant Director-General) said that the Director-General was placing before the Conference a document about an invitation for the ninth session, which would come up for discussion by the Conference. At the moment it was difficult to give any exact details of the possible effects which acceptance of this invitation would have on the cost of the exhibition; transport charges would obviously have to be added to the proposed budget, but money might be saved by constructing certain parts of the exhibition on the spot.

Paragraphs 72-77

(95) Mr. SILLER (Mexico) considered that the cinema made a powerful contribution to international understanding; many people obtained much clearer ideas about other countries as a result of its influence. Unesco was carrying out effective and well-defined work in that direction. However, the production of educational films should be based on three conditions: (a) use should always be made of technicians who were nationals of the country where the film was to be made, so as to save costs and to avoid overdoing the folklore aspect; (b) approval of the script should be sought of the National Commission in the country where the film was to be made; and (c) permission to show the film should be obtained from the government concerned.

(96) Mr. DESJARDINS (Department of Mass Communication) assured the Mexican delegate that the Secretariat would duly note his observations; it was obviously desirable to ensure co-operation by governments and National Commissions and, so far as they existed, by local producers, when making films in collaboration with Member States.

(97) Mr. FREY (German Federal Republic) considered that efforts should be made to find film subjects which reflected regional points of view, rather than such as might be of interest to the world as a whole; it would be useful if a committee of experts were instructed to study the scenarios of films approved for production and see that regional points of view were respected.

(98) Mr. COWELL (United Kingdom), referring to paragraph 73, asked for a more detailed justification of the allocation for a film, which he considered high.
(99) With regard to project (K), he proposed that paragraphs 76 and 77 be deleted. Priority could not be given to small prizes of that nature, and the United Kingdom Commission doubted whether they were the best kind of stimulus in the field.

(100) Mr. DESJARDINS (Department of Mass Communication) referred to the success achieved by the film "World Without End".

(101) Mr. AVIDOR (Israel) proposed a lower priority for paragraphs 72-75.

(102) In reply to Mr. JUNANKAR (India, Mr. DESJARDINS (Department of Mass Communication) regretted that Africa had been omitted in error from the regions mentioned in paragraph 74.

(103) The proposal of the delegate of Israel, seconded by the delegate of the United Kingdom, was adopted by 8 votes to 1 with 2 abstentions.

(104) Mr. CABOUAT (France) recalled that the project mentioned in paragraphs 76 and 77 was the outcome of the work of a Committee set up by the Executive Board. He would like to know the conclusions reached by that Committee, which must have been of a positive nature, seeing that the project had been included in the programme.

(105) Mr. MAHEU (Assistant Director-General) confirmed that the project was the outcome of a proposal submitted to the Executive Board; the special committee had met during the Board's thirty-seventh session last March, and had made certain proposals which the Director-General had translated into a work and appropriations programme. The document prepared by the Executive Board, he added, had been addressed to all Member States.

(106) Mr. LEE (United States of America) seconded the motion to omit paragraphs 76 and 77.

(107) Mr. CABOUAT (France) stated that in the French delegation's view the method of international competitions was likely to give good results for smaller expenditure, and it also had the advantage of awakening public interest in Unesco and its aims. He formally moved that no vote be taken on the motion by the delegate of the United Kingdom until the representative of the Executive Board had given his views.

(108) Agreed.

(109) Mr. CHAYET (France) noticed that in discussing the means of publicity used by the Secretariat no reference had been made to topical newsreels. Were there any difficulties which militated against the use of such means of information?

(110) Mr. DESJARDINS (Department of Mass Communication) said he would revert to the point in connexion with paragraphs 158 and 159.

Assistance in development of mass communication (paragraphs 78-180) and Project 5.3: Free flow of information (paragraphs 81-126)

(111) Mr. Desjardins briefly reviewed the activities of the Division for the Free Flow of Information and of the Mass Communication Clearing House. Their tasks consisted mainly in reducing obstacles to the flow of information and in assembling, for redistribution, information capable of contributing towards the development of national information centres in Member States.

(112) Mr. COWELL (United Kingdom) said that Unesco's

initiative in this field involved certain diplomatic difficulties, and it was essential that staff in the section be maintained at an adequate level to deal with the various programmes involved and to carry out the necessary negotiations in a diplomatic manner. He was opposed to the extension of international conventions and did not consider the international instrument proposed in paragraph 94 necessary. He would like more information on negotiations with international agencies, in particular the International Labour Organization.

(113) The CHAIRMAN drew attention to document 8C/PRG/8.

(114) Mr. DESJARDINS (Department of Mass Communication) said that the draft international instrument to reduce obstacles to the free movement of persons engaged in educational, scientific and cultural activities and wishing to travel for purposes connected with those activities (document 8C/PRG/8) was an extremely technical one and he thought it would be necessary to set up a special working party to examine the proposal in detail.

(115) The CHAIRMAN proposed that the matter be left to this special working party.

(116) Mr. LEE (United States of America) associated himself with the remarks of the United Kingdom delegate. He was concerned with the free flow of information and wished to see no lessening of Unesco's interest in reducing barriers; at the same time success must not be jeopardized by over-emphasis of the legal approach. He supported the Chairman's proposal.

(117) Mr. DESJARDINS (Department of Mass Communication) said that the sixth and seventh sessions of the Conference had already decided it was advisable to take that action; it would be a good thing if a small working party elaborated the details before the question was discussed by the Commission.

(118) Mr. CHAYET (France) said that the French delegation would like the Secretariat to examine under what conditions technical equipment used for broadcasting or television could be temporarily imported for programme exchanges; an enquiry by Unesco on that point would be valuable.

(119) The CHAIRMAN asked if the French proposal could be included in an existing resolution; otherwise the French delegation would have to submit a formal proposal for consideration by the Executive Board.

(120) It was agreed that mention would be made of the proposal of the delegate of France in the Report.

(121) Replying to the Chairman, Mr. DESJARDINS (Department of Mass Communication) said it appeared at first sight that the French delegate's proposal could be taken over by the Secretariat and incorporated in the resolution on the programme without additional cost; it might be that after further study, proposals for fresh action would prove necessary. The Secretariat would study the point and give a reply shortly.

(122) In reply to the United States delegate's question whether the Secretariat had any definite subject in mind in connexion with paragraph 125, Mr. Desjardins said that a study entitled "The Printed Word", would go to press at the beginning of 1955; it had been prepared by Mr. Barker, Assistant Secretary of the British Publishers' Society; one study which had already appeared would be revised with a view to a second edition and a new study would be prepared for 1955-56; the choice of the subject submitted to the Executive Board would depend on how mass communication problems developed. It might perhaps usefully deal with schedules of press charges; he had no formal proposal to make at the moment.

Project 5.4: Clearing house and exchange and stimulation of educational, scientific and cultural programmes (paragraphs 127-142)

(123) Mr. Desjardins pointed out that the function of the clearing house was to ensure wide dissemination of existing knowledge. He listed the resultant activities as follows: the clearing house published bulletins and booklets which were put out for sale; requests addressed to the clearing house amounted on an average to 10 a day, and some of them entailed a great deal of work, sometimes lasting several months. The number of publications had been reduced, but it was essential, now and then, to issue a publication which filled a real need; such bulletins, which were mimeographed and did not appear regularly, gave detailed information solely intended for specialists.

(124) Mr. COWELL (United Kingdom), referring to paragraph 127, asked what justification there was for an additional increase in costs.

(125) Mr. DESJARDINS (Department of Mass Communication) drew attention to the breakdown in paragraph 162 (a) of the Corrigendum and explained that the additional money came either from the Department of Cultural Activities or from the Department of Mass Communication.

(126) On the CHAIRMAN's proposal, it was agreed to defer discussion until paragraph 162 was reached.

Paragraphs 143-145: Press, film and radio for children

(127) Mr. DESJARDINS (Department of Mass Communication) stated, with reference to paragraph 143, that a resolution had been submitted to the seventh session of the General Conference by the Italian delegation, asking for the creation of an international organization to safeguard children from the possible adverse influences of cinema, radio and press. Document 8C/PRG/16 contained the replies received from various Member States. It was therefore proposed to hold a meeting of a small committee of experts to determine future action by Unesco in this field; later contracts would have to be concluded with an international organization in order to set up a clearing house for information of a specialized nature.

(128) Mr. COWELL (United Kingdom), referring to paragraph 143, said that, since the activity was of national concern, it should suffice for Unesco to draw to

it the attention of Member States. He proposed a lower priority for the item.

(129) Mr. DESJARDINS (Department of Mass Communication) said, with reference to paragraph 144, that it had been proposed, as a result of the very detailed recommendations of the experts who met at Locarno, to continue the information work with a view to drawing up a list of films recommended for children and adolescents, to prepare a yearbook of producers of such films, to plan a conference to study related psychological problems and to organize an information centre on children's films. Unesco had agreed to prepare the list of films and had collected about 2,000 titles; it did not propose to finance the organization of a conference, which might be held as part of other meetings already envisaged. The World Brotherhood might lend its support for the execution of this plan. The International Centre was considered the most urgent project, with a view to encouraging the production of films for children. The Secretariat estimated a budget of $6,000, of which $2,000 would be for a meeting of experts, and $2,000 would be used annually to subsidize the centre.

(130) Mr. LEE (United States of America) supported the proposal of the United Kingdom delegate. There were important research programmes undertaken in many parts of the world, and Unesco could therefore in the interest of concentration devote its limited resources to other fields which called for its action.

(131) Mr. CHAYET (France) insisted that, on the contrary, the problems raised by paragraphs 143 and 144 were of great importance. The sums placed at the disposal of the Department for the purpose were relatively small and they should be left unchanged as exemplifying the importance of such exchanges of information in enabling each State to solve its own difficulties.

(132) Mr. CABOUAT (France) asked whether any contacts had been established with the International Children's Centre and what had been the results, if any.

(133) Mr. DESJARDINS (Department of Mass Communication) said that he had been in communication with a representative of the Centre, but pending a decision by the General Conference negotiations had not gone any further.

(134) The CHAIRMAN asked for a vote on the United Kingdom delegate's proposal to reduce the priority of project (B), paragraphs 143-145.

(135) The proposal was adopted by 7 votes to 4 with 1 abstention.

Paragraphs 146-148: Co-operation with communication research institutes

(136) The CHAIRMAN drew attention to document 8C/PRG/17.

(137) Mr. DESJARDINS (Department of Mass Communication) drew attention to the conclusions of document 8C/PRG/17. The agreement of specialists in all countries had been obtained, and a token sum included in the programme so as to ensure liaison between the existing organizations.

(138) Mr. COWELL (United Kingdom) said that project (C) was of interest to other departments (Education and Social Sciences) and asked whether full co-ordination within the Organization was assured. He asked whether the amount of $17,000 for clearing house activities (paragraph 142) was necessary.

(139) Mr. MAHEU (Assistant Director-General) said that inter-departmental co-ordination on the lines mentioned by the United Kingdom delegate did in fact exist, particularly in the case of the Department of Social Sciences. As it was a technical question, the main responsibility had been given to the Department of Mass Communication. From the budgetary standpoint, the amount could not be absorbed by the general budget of the three Departments concerned; consultations between mass communication specialists were essential, and that was why the project appeared in the budget of the Mass Communication Department.

The meeting rose at 12.55 p.m.

# TWELFTH MEETING

*8 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION (continued)**

**CHAPTER 5: MASS COMMUNICATION (continued)**

(1) Discussion of paragraphs 76 and 77: Prizes for films and film scenarios, was resumed.

(2) Sir Ronald ADAM (Chairman of the Executive Board) explained that this proposal had been added to the programme after considerable discussion by the Executive Board. There was a good deal of doubt whether prizes were the best method of promoting this activity. However, one project had finally been agreed on as an experiment.

(3) The proposal to delete paragraphs 76 and 77 was put to the vote and adopted by 6 in favour, 3 against and 1 abstention.

(4) Mr. MAHEU (Assistant Director-General) said that the Secretariat had simply given the Committee information and had taken no part in the discussion on the substance of the question. For the rest, the decision the Committee had just taken meant that all the projects relating to films had a lower priority. The only items unchanged in the programme were those relating to audio-visual aids other than films.

(5) The CHAIRMAN said that the question could be re-examined when the merits of the different chapters were being evaluated.

(6) Section D, paragraphs 149-153, was approved without comment.

Section E, paragraphs 154-156: The rôle of broadcasting in the dissemination of culture

(7) Mr. LEE (United States of America) proposed that this activity should receive a lower priority.

(8) Mr. MAHEU (Assistant Director-General) mentioned that the project of the Department of Mass Communication was to be carried out in co-operation with the Department of Cultural Activities (Cultural Activities, paragraphs 161-164) and that, in the latter chapter, it had been given a lower priority.

(9) Mr. COWELL (United Kingdom) seconded the proposal of the delegate of the United States of America.

(10) Mr. DESJARDINS (Department of Mass Communication) reported that the non-governmental organizations had strongly supported the conclusions of the meeting of experts, held in October 1953, regarding the importance of the part that radio could play in the spread of culture. Another meeting, which had taken place in London in July 1954 and had been attended by producers and directors, had laid stress on the invaluable help which scientists could give in the development of television and on the difficulties encountered in obtaining such co-operation. The advice of cultural experts should be sought in order to improve the use of broadcasting for the spread of culture. Finally, Member States and National Commissions could help to bring about a general improvement in programmes by selecting the best programmes broadcast in their countries and collecting information on their effects. In that way it would be possible to determine the best means of securing greater variety in programmes so as to give as full a reflection as possible of the great diversity of the world.

(11) As there were no other speakers, the proposal of the delegate of the United States of America, seconded by the delegate of the United Kingdom, that the project in question be given a lower priority, was put to the vote. It was adopted by 5 votes to 1, with 4 abstentions.

Paragraphs 157-159: International exchange and stimulation of production of educational, scientific and cultural programmes

(12) Mr. DESJARDINS (Department of Mass Communication) said that the great film festivals (Venice, Cannes, Locarno) co-operated with Unesco in stimulating, without expense to the Organization, the exchange of educational, scientific and cultural films and kinescopes - a matter which was of great economic importance to producers. Producers of scripts, films and film sequences had taken part in the television seminar in London. The technical problems to be solved were comparatively simple. The proposal was to hold a meeting of the organizers of the International Council for Educational Film and to prepare the ground for co-operation in the production of short films and television films.

(13) The organizers of the great world film festivals paid the expenses of meetings of experts, on the choice of whom Unesco was consulted, and arranged showings of educational films and art films.

(14) The following year, the Locarno Festival intended to organize a meeting of experts on the use of films in sociological research.

(15) Unesco ought to arrange, by contract, for the production of short news films and filmstrips dealing with its work. In order to secure the co-operation of

competent organizations such as the International Council for Educational Film, and to hold its place in that field, which concerned the whole world, Unesco would have to furnish supplies for newsreels to the value of $5,000.

(16) Mr. BOW (Canada) asked (1) whether educational films and television were advanced enough to justify this quite considerable expenditure and (2) whether the sums allocated to staff travel were not excessive.

(17) Mr. DESJARDINS (Department of Mass Communication explained that an experiment had been launched in rural areas by the French broadcasting and television company, in order to estimate the influence of educational films on the general public in somewhat backward regions. He was sure that such films had a good influence and mentioned that the technical difficulties of execution were negligible.

(18) Mr. RAO (Acting Chief, Bureau of Programme and Budget), replying to the Canadian delegate's second question, said that the staff travel was intended for visits to national radio and television organizations and attendance at film festivals. Two long, 6 medium and 11 short journeys had been planned for 1955-56.

(19) Mr. COWELL (United Kingdom) asked whether there had been an increase on the figures for 1953-54.

(20) Mr. RAO (Acting Chief, Bureau of Programme and Budget) offered to answer a little later.

(21) The CHAIRMAN wondered why these paragraphs were not included under the press and radio divisions. That was another point to be considered by the proposed working party on the reorganization of the Department.

(22) Mr. DESJARDINS (Department of Mass Communication) said that, in the programmes of the press and radio divisions, Unesco itself produced material, whereas, in the case in point, the proposal was to co-operate with the appropriate organizations and to promote production outside the Organization.

(23) Mr. RAO (Acting Chief, Bureau of Programme and Budget), in answer to the question put by the delegate of the United Kingdom, said that the sum was the same as for the present budgetary period, i.e. $12,000 for the whole section.

(24) Mr. COWELL (United Kingdom) asked if it could not be cut by, say, $2,000.

(25) Mr. MAHEU (Assistant Director-General) observed that the project was an unusual one and that so far the Committee had not discussed any similar suggestion. He warned the Committee against making budgetary cuts in projects before they had considered what effect they might have on the successful implementation of the programme.

(26) Mr. BOW (Canada) enquired whether any revenue could be expected from the films, once they had been produced.

(27) Mr. DESJARDINS (Department of Mass Communication) explained that about three-quarters of the appropriations were intended to promote productions that could not ordinarily be undertaken by private companies, which would not consider them financially worth while; so far, the idea of deriving revenue from the newsreels produced had not been considered.

Paragraphs 160-162: World Braille Council

(28) In connexion with the World Braille Council, Mr. Desjardins reminded the Committee that Unesco had undertaken to complete the unification of the Braille alphabet throughout the world. The alphabet itself had already been unified, but musical notation and mathematical, physical and chemical symbols still required unification. Unesco had concluded an agreement with the World Council for the Welfare of the Blind, whereby that organization undertook to provide the Secretariat of the World Braille Council by 1955. For 1955, the Director-General was asking for a sum of $5,000 for contracts in order to complete the unification of musical notation, and would like to ask for an appropriation in 1956 for that of mathematical, physical and chemical symbols.

(29) The CHAIRMAN remarked that this project, begun at the third session of the General Conference and due to be concluded in 1955, was a good example of an activity started by Unesco for which a termination date could be given in the near future. It was a highly successful project and he expressed his whole-hearted satisfaction.

(30) Mr. JUNANKAR (India) joined the Chairman in praising the project.

(31) Mr. COWELL (United Kingdom) understood that the World Council for the Welfare of the Blind hoped to receive a small subvention in 1956 as well. Had a formal request on the subject reached the Director-General?

(32) Mr. MAHEU (Assistant Director-General) pointed out to the delegate of the United Kingdom that it would be helpful to make a supplementary appropriation which could be used to help the World Council for the Welfare of the Blind in its work. Mr. Desjardins had mentioned the need for such an appropriation, and the Assistant Director-General asked Mr. Cowell whether he could propose the insertion of that appropriation in the proposed programme and budget.

(33) Mr. COWELL (United Kingdom) was quite ready to make the proposal, but did not know how much or in what form this aid was wanted.

(34) Mr. DESJARDINS (Department of Mass Communication) explained that the World Council for the Welfare of the Blind had mentioned, with gratitude, in a resolution, that Unesco intended to meet part of its expenses for 1955. In 1956, as in 1955, the best form of assistance would be a contract for a specific purpose.

(35) Mr. CABOUAT (France) seconded the proposal of the United Kingdom delegate that the World Council

be granted contracts in 1956 for the same sum as in 1955. At the request of the delegates of France and the United Kingdom, a mention of the recommendation would be included in the report of the Advisory Committee.

Paragraphs 162a-162h (document 8C/5 Corrigendum): Assistance in the production and dissemination of art films

(36) Mr. DESJARDINS (Department of Mass Communication) presented the project described in document 8C/5 Corrigendum.

(37) Mr. COWELL (United Kingdom) thought that art films had made a very good impression wherever they had been seen. With reference to 162d, what exact form was the encouragement of production to take? Was Unesco paying for the production of films? A more detailed work plan would be advisable.

(38) Mr. MAHEU (Assistant Director-General) drew the Committee's attention to the provision for assistance in film production (paragraph 162g) and added that he was anxious that the Secretariat should be allowed some latitude in carrying out the project.

(39) Mr. DESJARDINS (Department of Mass Communication) mentioned that the meeting of experts on the distribution of art films, in Venice, was intended to make production easier by improving distribution.

(40) Mr. MAHEU (Assistant Director-General) asked the delegate of the United Kingdom whether he would be satisfied with a drafting change consisting in the deletion of the reference to the encouragement of production from paragraph 162d, leaving only the mention of encouraging dissemination.

(41) The CHAIRMAN referring to paragraph 162g, asked whether, when giving financial aid, Unesco did not propose to request a matching contribution on the part of the Member State concerned.

(42) Mr. MAHEU (Assistant Director-General) remarked that the help supplied by Unesco would represent only a very small part of the production costs.

Section II: Project 5.5: Use of the means of communication for fundamental and workers' education

Paragraphs 165-173

(43) Mr. DESJARDINS (Department of Mass Communication), referring to the proceedings of the thirty-seventh session of the Executive Board, explained that the project for the establishment of an Educational Film Institute for Latin America (paragraphs 172 and 173) included provision for an educational film project for that area.

(44) Mr. SILLER (Mexico) reported that his Government was very much interested in the establishment of the Educational Film Institute for Latin America. It would give all possible facilities for setting up the Institute and, as soon as the relevant agreements were concluded, would carry out its part in them.

(45) Mr. COWELL (United Kingdom) asked whether the Organization of American States would be participating in the project.

(46) Mr. MAHEU (Assistant Director-General) replied that the Organization of American States was not taking part, but that it had been consulted and had given its agreement.

(47) Mr. LEE (United States of America) hoped the work would be co-ordinated with that of other agencies besides OAS.

(48) Sections (B), (C), (D) and (E) (paragraphs 174-182) were approved without comment. Discussion on Section (F) (Fellowships) was deferred until the end of the chapter.

Sections (G), (H) and (I) (paragraphs 184-189), excluding paragraph 186, which had been dealt with earlier

(49) Mr. BOW (Canada), referring to paragraph 184, asked what rôle the private foundation would play in the project. What would be the total cost? And what was expected to happen at the end of the two years covered by the budget?

(50) Mr. DESJARDINS (Department of Mass Communication) thought it was rather early to pass judgment on the project for a regional film library for the Middle East. In 1953, the Ford Foundation had asked Unesco to assist in setting up the regional film library. At the same time, the University of Syracuse (United States of America) had embarked on a study of visual aids and their use in the same region. The help provided by those two bodies might prove very useful to Unesco, which expected to receive a report from the University of Syracuse at any moment. Unesco would be required to supply a collection of films and filmstrips suitable for the region, to appoint an expert to work out the detailed operation of the film library, and would also have, at a later stage, to arrange for the production of visual aids. The Ford Foundation and the University of Syracuse would be responsible for submitting reports to the governments concerned and for transmitting their conclusions to Unesco.

(51) In the course of the discussion, it was stated that, after agreement with Unesco, which would undertake to provide assistance only on strictly limited terms and as the need arose, the Foundation and the University would ask the Organization to take part in the project and probably to secure the active co-operation of governments in the region.

(52) Project 5.5 was approved.

Project 5.6: Technical aid to Member States in development of mass communication services (paragraphs 190-199)

(53) In presenting the project, Mr. DESJARDINS (Department of Mass Communication) explained that it was intended solely to meet requests put forward by Member States. He quoted as examples the regional seminar held in Messina and the training seminar for television producers, etc., held in London.

(54) Mr. LEE (United States of America), in view of his country's great interest in technical aid, hesitated to question those activities, but he found the rather high sum insufficiently related to high priority areas. He suggested that the two parts together be given a low priority in such a way that countries receiving technical aid would be free to choose between fellowships or expert missions.

(55) Mr. COWELL (United Kingdom) said that half a loaf was better than no bread. Why not keep half the number of missions and lower the priority of the other half?

(56) Mr. LEE (United States of America) agreed.

(57) Mr. CABOUAT (France) asked whether the expert missions for which provision was made in paragraph 196 were to include experts covering all the preceding sections, or whether they were to be experts in the use of mass media for fundamental education.

(58) Mr. DESJARDINS (Department of Mass Communication) mentioned that, judging by past experience, Member States often called on the funds for technical assistance for economic development and on Unesco funds alike, for the development of fundamental education. He instanced several of the missions sent out in the past, in particular to Egypt, the Arab States, Turkey (two), etc.

(59) Mr. AVIDOR (Israel) supported the proposal of the delegate of the United Kingdom with regard to paragraphs 196 and 197 (expert missions) but not with regard to 198 and 199 (fellowships).

(60) Mr. CABOUAT (France) suggested that, as a general principle, the Committee should continue to accord a high priority to expert missions, at least so far as fundamental education was concerned. He made a formal proposal that half the funds should be allotted a higher priority, the remaining half being left as it was. At the request of Mr. Cowell, however, he amended his proposal, as a compromise, to lower the priority of the second half.

(61) The proposal by the delegate of the United Kingdom to lower the priority of half the number of expert missions was put to the vote and carried by 7 in favour, 3 against and 1 abstention. The French proposal to raise the priority of the remaining half was not seconded.

(62) Mr. LEE (United States of America) proposed that half the fellowships should receive a lower priority.

(63) Mr. DESJARDINS (Department of Mass Communication) pointed out that, as a sequel to an expert mission, Unesco often received from seven to ten requests for fellowships from the country concerned, when only one or two could be granted. Limitation of the number of expert missions therefore did not necessarily mean any appreciable reduction in the needs for fellowships.

(64) In the course of the discussion, he explained that Unesco's programme had always included provision for fellowships for the improvement of mass media.

(65) The proposal by the delegate of the United States of America to lower the priority of half the number of fellowships was not seconded.

(66) Returning to paragraph 183, Mr. W. CARTER (Head, Exchange of Persons Service) explained that the fellowships described under this heading had already been discussed under paragraph 32 of the chapter on Exchange of Persons in the field of fundamental education.

Project 5.7: Voluntary international assistance

(67) Mr. AVIDOR (Israel) called the attention of the Committee to the fact that the coupon scheme, while it brought in a certain income, involved losses to the National Commissions which might eventually devolve on the Organization. He referred to the case of Iran, which was to be brought up later, and to that of Israel.

(68) Mr. MAHEU (Assistant Director-General) remarked that the Government of Iran had put the question of gift coupons on the agenda of the General Conference.

(69) The CHAIRMAN suggested that the subject would be discussed more appropriately within the framework of the Programme Commission.

Paragraphs 211-221: Gift coupon programme

(70) Mr. AVIDOR (Israel) said that the scheme was still too young for proper evaluation. He stressed the importance of the effort made to avoid its eleemosynary aspect and to give it an educational value. Schools in needy countries, for instance, could find something to return to schools in donor countries, in exchange for their gifts.

(71) Mr. SILLER (Mexico) endorsed the remarks of the delegate of Israel.

(72) Mr. JUNANKAR (India) agreed with those views. He added that institutes should not be included in the gift scheme without prior consultation with and the approval of the respective National Commissions.

(73) Mr. SOEBROTO (Indonesia) endorsed the remarks made by the delegate of Israel.

(74) It was agreed that this point should be included in the report.

(75) The CHAIRMAN asked the Committee to resume the discussion of paragraphs 63 and 64 (work of Unesco's recording studios).

(76) Mr. MAHEU (Assistant Director-General) pointed out that the rather large sum requested in paragraph 64 was to be used for the conversion of the existing equipment in Unesco's sound recording studios or for the purchase of new equipment. Most of the existing equipment had been in use for six years.

Apart from the normal wear of such apparatus, account had to be taken of the progress since made in this field. Mr. Maheu assured the Committee that the appropriations asked for did not in any case overlap with the sums provided for the installation of the Organization's headquarters in the new building.

(77) In reply to a comment from Mr. COWELL, Mr. MAHEU added that he had no doubt that Unesco's Bureau of General Services would succeed in selling the outdated recording equipment advantageously.

Staff Tables I and II (paragraphs 222-251)

(78) Mr. JUNANKAR (India) enquired how, in view of the higher and lower priorities decided on, the staff table would be affected.

(79) Mr. MAHEU (Assistant Director-General) remarked that the Committee had made pretty drastic alterations in the priority projects. It would be wise to postpone discussion of the staff tables to give the Secretariat time to draw up new tables in accordance with the decisions taken by the Committee.

**CHAPTER 7: GENERAL RESOLUTIONS**

(80) The project on National Commissions (7.1) was deferred for discussion at a later stage in connexion with the general discussion on decentralization.

Project 7.2: Study of international cultural relations (paragraphs 13-21)

(81) Mr. MAHEU (Assistant Director-General) pointed out that the appropriations requested were small, considering the importance of the work.
(82) It had been decided by the General Conference in Florence in 1950 that Unesco should compile a collection of cultural agreements. It was to include bilateral and multilateral agreements. There had been a large number of requests for the collection from Member States and non-governmental organizations.
(83) Work had then begun on an analysis of the agreements from the legal standpoint. For that reason the Bureau of Legal Affairs was originally made responsible for the work and efforts had been made to elaborate model clauses for submission to Member States to guide them in their negotiation of subsequent agreements.
(84) Since then the analysis of cultural agreements had proceeded along different lines. It had been realized that the agreements were juridically fairly simple, but what mattered most was not the letter of the law but the application of the agreements. Hence the new direction given to the study of agreements, with the Executive Board's approval, in the course of the past two years.
(85) Document 8C/PRG/11, which had been submitted to the General Conference, was only an interim report; the material on which it was based was far from complete and some of the analyses were rather superficial. It should, however, show the Conference the full importance of cultural agreements in international co-operation.
(86) This might be a good opportunity of taking stock; the programme of Unesco had practically never taken systematic account of cultural agreements concluded by Member States between themselves. The Conference might consider what influence it might exercise on the relations of Member States outside the Organization and what support this important network could give it in the accomplishment of its mission.
(87) The Secretariat was asking for authority, and the necessary means, to continue its analysis of cultural relations in order to go more deeply into what it had already learnt. It would then be able to produce a real "study of cultural relations" instead of a "report on cultural agreements".

(88) Mr. JUNANKAR (India) asked whether the study of international cultural relations was so technical in character as to require the services of experts.

(89) Mr. MAHEU (Assistant Director-General) said that it was a highly complex technical problem. For the rest, the consultants provided for were not theorists but essentially practitioners. The amount of $2,000 a year did not seem to be excessive.

(90) Mr. COWELL (United Kingdom), though admitting a logical reason for this study, doubted its practical value. As it would not be affected by a delay, he suggested it should receive a lower priority.

(91) Mr. BOW (Canada) supported that proposal.

(92) Mr. LEE (United States of America) said the constant task of Unesco was to stimulate cultural activities in the different countries. It was surely necessary therefore to find out everything possible about the way cultural agreements between them were made and carried out. However, there again was an activity where Unesco could count on the co-operation of National Commissions, with resulting savings in budget.

(93) Mr. CABOUAT (France) supported resolution 7.2 and considered that Unesco House in Paris was the best place in the world to find information about cultural relations between countries. He had some sympathy, however, with the views voiced by the delegates of the United Kingdom and the United States of America, as he too, thought that the study of cultural agreements and of the relations between States should be carried out by members of the Secretariat without calling in outside consultants. He proposed that the Programme and Budget Commission should be asked to consider particularly carefully to what extent the sums provided for consultants could be deleted.

(94) Mr. SILLER (Mexico) asked what the Secretariat thought of the French delegate's proposal.

(95) Mr. MAHEU (Assistant Director-General) supposed that the qualified motion of the delegate of France might, in budgetary terms, mean the deletion of the sum of $2,000.

(96) Mr. COWELL (United Kingdom) maintained his own proposal, which he considered more drastic.

(97) Mr. JUNANKAR (India) insisted that jobs that could be done through ordinary channels did not call for consultants. He supported the proposal of the French delegate that the project should be maintained but the consultants suppressed.

(98) The motion presented by the delegate of the United Kingdom and supported by the delegate of Canada to lower the priority of the activity was rejected by 3 in favour, 6 against and 2 abstentions.

(99) The motion presented by the delegate of France that the question should be re-examined with the possibility of suppressing the consultants in mind was carried unanimously.

Project 7.3: Regional Office in the Western Hemisphere

(100) This project was deferred for later discussion.

CHAPTER 8: DOCUMENTS AND PUBLICATIONS SERVICE

(101) Mr. DELAVENAY (Chief, Documents and Publications Service) explained that his Service had no independent programme of its own but consisted of technicians, who were responsible for every stage of the technical production of the documents and publications, and for the distribution of publications.
(102) He emphasized the importance of the Administrative Liaison and Editorial Control units, and finally mentioned certain changes in the budget estimates for his Service, shown in document 8C/5 Corrigendum.

(103) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that in the Corrigendum an amount of $24,000 in 1955 and $34,000 in 1956, provided for freight and postage, had been eliminated, since it was considered reasonable and justified that these costs should come out of the Publications Fund, being related directly to sales turnover. He also explained that, in the Appropriation Resolution, the amount to be credited to Miscellaneous Income from Publications Fund had been reduced to $16,000 a year so as to give a more realistic reflection of anticipated sales.

(104) In reply to a question, Mr. MAHEU (Assistant Director-General) said that the Director-General had given much thought to the question of publications. They were an integral part of the programme and not an independent activity, as in the case of private publishing firms. They always had to be considered in relation to the programme and were really nothing else than instruments for its execution.
(105) The Documents and Publications Service had the necessary technical and budgetary resources for the production of those publications. However, as some machinery for supervision for the whole of the Secretariat was necessary, the Director-General had set up within the House two advisory committees: the Reading Committee and the Publications Board.
(106) The former, presided over by Mr. Chevalier, consisted of a very few permanent members and of other members who were added to the Committee when different subjects had to be dealt with. It was an ad hoc Committee convened as requested. It had to consider any manuscripts about which there was doubt, either because they left something to be desired or because they were unsuitable for publication by an intergovernmental organization, which was subject to restrictions from which the private publisher was free. It might also happen that a manuscript commissioned might not entirely fulfil expectations, or that the programme might change in the interim. In such a case, the manuscript had to be adapted to the new circumstances, or even to readers for whom it had not originally been intended. All manuscripts were of course considered by the departments responsible for them and by the editors in the Documents and Publications Service. It was generally not even necessary to submit them to the Committee. The Reading Committee met only to advise the Director-General in difficult cases and was convened at the request of the departments or of the Documents and Publications Service.
(107) The Publications Board, presided over by the Assistant Director-General, was quite different. The whole of the Secretariat was represented on it, with the exception of the Bureau of Personnel. It met regularly with an agenda issued in advance. It was responsible for formulating administrative and financial procedures for the implementation of publications plans. It dealt with such subjects as copyright negotiations, series of publications format, etc. It was also and more particularly responsible for considering the publication projects included in the work plans drawn up by the departments every six months. So far, all decisions had been adopted unanimously. The decisions and plans were submitted to the Director-General for approval.
(108) In conclusion, Mr. Maheu felt justified in claiming that the last two years had seen substantial progress made in the regularity, quality and appearance of Unesco's publications and in their reception by the public. This progress was largely due, he thought, to the administrative arrangements he had just described.

(109) Mr. FREY (German Federal Republic) wished to know how far the work of sales promotion and planning was connected with the tasks of the Publications Board and the Reading Committee.

(110) Mr. DELAVENAY (Chief, Documents and Publications Service) gave a brief description of the part played by the Sales and Distribution Division in the work of the Publications Board, where advantage was taken of its experience of distribution problems. He drew special attention to the use of sales statistics and to the expansion of sales promotion and circulation, with the help of specially prepared questionnaires, in countries where the National Commissions were able to co-operate actively in that work.

(111) Miss LAISE (United States of America) asked for comments on the specific observations made by the Budget Committee at the seventh session of the General Conference. In what degree had the staff been able to correct its methods of work along the lines suggested at that time, reducing the time-lag in the planning of publications, slowing down the publication of bibliographies and alternating their languages?

(112) Mr. RAO (Acting Chief, Bureau of Programme and Budget) replied that all the recommendations of the Budget Committee had been followed up. Thirty publications fewer had been planned for, and the budget for 1955, for instance, showed a marked decrease in funds allocated to contractual printing, compared with 1953. Publications were often appearing in tri- or bilingual form.

(113) Miss LAISE (United States of America) congratulated the Secretariat on these changes, but enquired why, if the costs of printing were down, the total costs of Documents and Publications Service had increased.

(114) Mr. RAO (Acting Chief, Bureau of Programme and Budget) replied that originally the staff had been exactly sufficient to meet the needs of the Department. Publications had been reduced but the carry-over had had to be absorbed. That was an expense which would not occur again.

(115) Mr. JUNANKAR (India) asked how many of the publications came out of the intellectual resources of Unesco, and how many from outside.

(116) Mr. MAHEU (Assistant Director-General) stated that 1954 was the last period for which there had been a carry-over of publications from the previous year.

(117) Mr. DELAVENAY (Chief, Documents and Publications Service) drew the attention of the Committee to paragraph 16 in the justification (Documents and Publications, paragraph 16), mentioning that there had been no increase in staff except in the Sales and Distribution Division, where a regional organization was to be set up. The production of documents took up as much of the time of his Service as did the production of publications, if not more, and cuts in the appropriations for contractual printing did not reduce the work of all the divisions. The Service had not only carried out printing work, without extra cost, in 1954, which, if done in the ordinary way outside the House, would have come to $47,000, but had been able to achieve a 12% reduction in the cost per standard page printed outside. Consequently, a reduction in the cost of outside printing did not mean a reduction in the work the Service was expected to do.
(118) In reply to the delegate of India, Mr. Delavenay was unable to say what percentage of the manuscripts were produced outside Unesco House.

(119) Mr. JUNANKAR (India) said that he had referred to 1953-54. During the last General Conference his delegation had raised this question and been informed that a large number of publications were produced by the departments themselves.

(120) Mr. COWELL (United Kingdom) paid tribute to the very satisfactory state of the Documents and Publications Service. He asked whether a code of practice containing the Publications Fund policies could be made available, embodying the reforms introduced in the rules of the Fund after Conferences.

(121) Mr. DELAVENAY (Chief, Documents and Publications Service) thanked the delegate of the United Kingdom. He reminded the Committee that the rules governing the Publications Fund had been promulgated by the General Conference at its fourth session and subsequently amended at the sixth and seventh sessions. An amendment (cf. Corrigendum, page 25) was also before the current session of the Conference. It would be advisable, as Mr. Cowell had suggested, to combine all the resolutions adopted at successive sessions in a single document.

(122) Miss LAISE (United States of America) asked (1) whether, in accordance with similar reforms in other international organizations, it would not be possible to reduce the number of publications and documents in number and in length. (2) What efforts were being made to achieve more economical publishing? (3) Whether the transfer of the promotional activities included in this chapter to Mass Communication could not be studied when the reorganization of that Department was being examined by the working party which had been envisaged for the purpose.

(123) Mr. MAHEU (Assistant Director-General), in reply to questions by the delegate of the United States of America, said that every Unesco document, after being produced by the originating service, was examined by the Documents and Publications Service and submitted to the Office of the Director-General which decided whether it should be for general distribution or whether the circulation should be restricted. There was therefore a real central control.
(124) The Secretariat was entirely in favour of reducing the number, format, length and volume of documents. It asked only to be protected against the often unreasonable requests of organizations, Member States and National Commissions; protected also against itself, for every secretariat had a tendency towards bureaucracy.
(125) The Director-General saw no objection to the proposal that the working party on the administrative structure of the Department of Mass Communication should consider the possibility of making that Department responsible for sales promotion, but nothing should be done to anticipate the decisions the working party might take about the organization of that Department.

(126) Mr. DELAVENAY (Chief, Documents and Publications Service) replied to the comments regarding the costs of publishing and the decentralization of printing contracts. The offset process, which was often recommended as being cheaper than type-setting, was more expensive in certain cases, for instance, when a revised edition was contemplated. Lead type was easier to readjust than the photographic plates for offset. Offset was less expensive in certain special cases: the printing of the proposed programme and budget by the offset process had made possible an economy of $5,000, and a considerable saving of time.
(127) With regard to the efforts made to secure lower rates for printing contracts, only 10% of the contracts were made in "hard currency" countries, such as Switzerland and the United States of America, and, in the latter case, those contracts were mainly for publications for local use. The remainder were

divided between France, the Netherlands, Belgium, the German Federal Republic, Austria, Italy, etc. Consideration was being given to the possibility of printing in Spain publications written in Spanish. Publications in Arabic were printed in Cairo and Beirut.

(128) In reply to a request from Mr. CABOUAT (France) for information about the conclusions of the thirty-seventh session of the Executive Board on the question of reducing the volume of documents, Mr. MAHEU (Assistant Director-General) added that another question before the Board had been the reduction of the items regularly placed upon its agenda. The number and length of reports had not, however, been reduced at all. The order to reduce the volume of paper should come from above, from the General Conference.

(129) Miss LAISE (United States of America) offered to make a proposal and put it before the next meeting of the Committee.

(130) Agreed.

**PART III**

(131) Chapter 1 was deferred until the arrival of the Director-General.

**CHAPTER 2: BUREAU OF THE COMPTROLLER**

(132) Mr. HARPER-SMITH (Comptroller) said that the various functions and staffing pattern were much the same in the budget for 1955-56 as they had been in the past, except for the suppression of the $2,200 spent on rental of IBM equipment, and the inclusion of $2,200 for an additional social security post. This was necessary because staff members in the field who had not been included in the pensions scheme had now been included.

(133) Miss LAISE (United States of America) questioned the inclusion of $500 for appeals to the United Nations Administrative Tribunal on pension fund matters.

(134) Mr. HARPER-SMITH (Comptroller) replied that this was a contingency item.

**CHAPTER 3: BUREAU OF PERSONNEL AND MANAGEMENT**

(135) Mr. FARR (Chief, Bureau of Personnel and Management) remarked that the seventh session of the Conference had reduced the service from 32 to 26 persons. The present proposals would now enable the Bureau to do its work, some of which was complex and difficult.

(136) Mr. JUNANKAR (India) asked for a statement giving the distribution of present staff nationwise throughout the departments.

(137) Mr. FARR (Chief, Bureau of Personnel and Management) replied that document 8C/ADM/11, which was to come up for full discussion before the Administrative Commission, contained that information.

(138) Miss LAISE (United States of America) wished for a statement on the number of reclassifications planned, by comparison with those that had taken place in 1953 and 1954.

(139) Mr. RAO (Acting Chief, Bureau of Programme and Budget), at the request of the Assistant Director-General, explained that posts were subjected to a very strict review to ensure that work was directly related to grade. There was a possibility of reclassification upwards as well as downwards. In professional staff in the last two years, 25 had been upgraded and 7 down.

(140) Mr. BOW (Canada) asked for the budgetary implications of the increases and decreases mentioned.

(141) Mr. JUNANKAR (India) asked why there were so many upgradings.

(142) Mr. FARR (Chief, Bureau of Personnel and Management) said that in a strict sense reclassification was a change in grade of a post when its duties had changed. In many cases there had been substantial changes in the duties of staff members, owing to changes in the programme. That should be taken into account in considering reclassification.

(143) Miss LAISE (United States of America) said that there was a quantitative and a qualitative expansion. When the new salary pattern along United Nations lines had been introduced in 1952, one purpose had been to broaden and increase the flexibility of grading. How did reclassification in Unesco compare, in terms of total size, with that effected in the United Nations? Miss Laise suggested that caution was called for in that direction.

(144) Mr. FARR (Chief, Bureau of Personnel and Management) thought it would also be useful to have a comparison of the grade structure of the Secretariat as it was in 1953-54 and as it was proposed in the present document, indicating the movement of the overall structure.

(145) Mr. JUNANKAR (India) understood that the criterion for upgrading was additional duties. Could that point be illustrated at the next meeting with special reference to some reclassified posts?

The meeting rose at 6.55 p.m.

# THIRTEENTH MEETING

*9 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION** (continued)

**PART III: GENERAL ADMINISTRATION**

**CHAPTER 3: BUREAU OF PERSONNEL AND MANAGEMENT** (continued)

(1) The CHAIRMAN asked the Chief of Bureau of Personnel and Management to reply to questions raised at the previous meeting.

(2) Mr. FARR (Chief, Bureau of Personnel and Management) said that the changes in grading proposed for the period 1955-56 comprised 25 movements upwards and 7 downwards in the Professional category and 61 and 3 respectively in the General Services category, 24 of the 61 concerning the Documents and Publications Service. To illustrate his previous statement on reclassification, he proposed to give an example of each of the various kinds of approach.
(3) (i) Department of Education: The replacing of a P-3 post under Adult Education in 1953-54 by a P-2 post in 1955-56 was not a reclassification, but was due to a reduction in the programme by transferring some of the work to the Department of Social Sciences.
(4) (ii) Department of Natural Sciences: The provision for two P-4 posts in 1955-56 instead of two P-3 posts in 1953-54 was an upgrading. The reorganization of the Department in 1954 by amalgamating two divisions each headed by a P-5 official eliminated one P-5 post and placed extra responsibilities on the two P-3 officials.
(5) (iii) Department of Natural Sciences: The substitution of a post under Teaching of Science from P-4 in 1953 to P-3 in 1954 and again to P-4 in 1955-56 reflected the growth of the programme.
(6) (iv) Department of Mass Communication: The raising of a Press Relations Officer from P-2 in 1953 to P-3 in 1955-56 was a genuine reclassification in recognition, after very careful study, of a mistake in classification.
(7) (v) Exchange of Persons Service: The proposed P-5 post for 1955-56 to replace a P-4 post in 1953-54 represented a reclassification of the existing post and an upgrading of the incumbent. The recommendation had been made, after considerable discussion, as a result of the increase in fellowships and in the number of agencies and governments concerned - both under the incumbent's administration - and the abolition of a P-4 post for administration of fellowships under the Technical Assistance Division, which led to an increase in the responsibilities attached to the post, the increase in work load alone not being a reason for upgrading.
(8) (vi) Documentation and Publications: In 1953-54 four Grade F proof-readers and four Grade P-1 copy-preparers were employed. Experience in 1954 had shown that the work would be performed more efficiently by staff able to carry out both functions, and it was accordingly proposed to replace the existing posts by eight at Grade P-1.
(9) (vii) Workshops Division: Eleven changes were proposed, all in the General Services category, the total cost for two years being $572. Technical developments in the Unesco Workshop had altered methods of handling documents, and the typing pool had been replaced by eleven technicians in types of reproduction who were doing work calling for technical skills above those of a typist. The proposals therefore reflected a change in the nature of the work. An important consideration in fixing salaries had been the best prevailing rates for the technicians, who were extremely difficult to recruit in Paris.
(10) The total cost of changes for two years was $73,000.
(11) With regard to the practice in the United Nations and other Specialized Agencies, comparison was difficult owing to differences in work and structure, but the Consultative Committee on Administrative Questions and other bodies were endeavouring to work out common lines of policy, so far as was practicable.
(12) The following figures were based on the most recent budgets of the organizations concerned.
(13) Comparison of Professional and General Service Grades:

| | Professional | General Services |
|---|---|---|
| Unesco | 45% | 55% |
| United Nations | 41% | 59% |
| FAO | 39% | 61% |
| WHO | 61% | 39% |

Comparison of Professional Grades:

| | P-5 | P-4 | P-3 | P-2 | P-1 |
|---|---|---|---|---|---|
| Unesco | 10% | 30% | 26% | 18% | 15% |
| United Nations | 11% | 26% | 38% | 15% | 10% |
| FAO | 9% | 26% | 27% | 22% | 17% |
| WHO | 8% | 29% | 15% | 34% | 13% |

The average level was therefore:

| | |
|---|---|
| Unesco | P-3.0% |
| United Nations | P-3.13 |
| FAO | P-2.99 |
| WHO | P-2.86 |

(14) Miss LAISE (United States of America) asked whether there was an increase in activity corresponding to the 86 upgradings, and pointed out that, while Unesco had 86 upgradings for a staff of 864, the United Nations had only 25 for a staff of 4,000. Although

individual changes were adequately justified, it was not clear why there was a constant shift of activity which resulted in an upward movement. It would be interesting to have comparative figures for other years. As had been pointed out in the United Nations in establishing the new salary scales, which were fairly liberal, it had been intended that fewer individual justifications should be necessary.

(15) Mr. RAO (Acting Chief, Bureau of Programme and Budget) promised to submit a written document giving the required comparative figures at the next meeting.

(16) The DIRECTOR-GENERAL pointed out that at the United Nations, staff was being reduced, which was no doubt the reason why few upgradings were recommended. Moreover, the United Nations work, being of a more administrative type than Unesco's, provided a higher degree of transferability.

(17) Miss LAISE (United States of America) agreed that an organization reducing its staff would be unlikely to consider reclassifications; nevertheless the difference between the figures relating to Unesco and the United Nations was so striking that she wondered whether it was due in part to the stability of the United Nations programme. Was it possible for Unesco to endeavour to achieve more stability.

(18) Mr. ROW (Canada) supported the statement of the United States delegate, adding that it was necessary to achieve stability both of reclassification and of the programme itself, since they were interrelated.

(19) The DIRECTOR-GENERAL said that it would facilitate the Secretariat's task if a level of reclassification could be set which should not be exceeded. There would, of course, be risks, since a growing programme needed flexibility, but it could be handled in the same way as the ceiling which had been given for the number of posts.

(20) Mr. JUNANKAR (India) asked whether, in the case of reclassification, the existing incumbent was retained in the higher post. He also wished to know the proportion of the budget spent respectively on the Professional and General Service categories.

(21) Mr. FARR (Chief, Bureau of Personnel and Management) replied that the incumbent of a reclassified post did not automatically assume the higher-grade post; a decision had to be made by an appointments committee. He proposed to answer the second question of the Indian delegate at a later stage.

(22) Mr. AVIDOR (Israel), while agreeing with the view of the United States delegate, could not support the Canadian delegate's suggestion that the programme must be stabilized. A growing organization needed flexibility, and he hoped to see an increase in both the budget and the activities of the Organization.

(23) Miss LAISE (United States of America) welcomed the Director-General's proposal on reclassifications, but wished for time to consider a proposal along the lines he had suggested.

(24) Mr. BOW (Canada) explained that his remarks concerning stability had been made from the budgetary angle. It was possible to have flexibility within the programme regardless of the budgetary appropriation.

(25) The DIRECTOR-GENERAL said that the setting of a level, based on the average given by the Chief of the Bureau of Personnel and Management, would automatically allow for control of the budget. The average could always be reduced, but it would be unwise to limit spending on reclassifications, because it was difficult to estimate the total very far ahead.

(26) The CHAIRMAN said that the Director-General's proposal had the advantage of providing the Organization with a positive policy on personnel. He proposed that it should be discussed in the light of the additional information to be provided for the next meeting.

(27) Mr. COWELL (United Kingdom), referring to the table on steps in salary grades (Annex VI, page 250), pointed out that a senior P-1 post would receive more than a junior P-2, so that the freezing of grades would not result in budgetary savings. He naturally supported any efforts to reduce expenditure, but was willing to give the Director-General a free hand within the total level, bearing in mind that the Constitution granted him full powers in staff matters.

(28) In reply to a question from Mr. JUNANKAR (India), Mr. FARR (Chief, Bureau of Personnel and Management) said that where, under reclassification, incumbents were not given the higher posts, they were either offered lower posts or dismissed.

(29) Mr. COWELL (United Kingdom) hoped that every effort would be made to find other work for people who lost their posts through reclassification. He asked whether there were any such cases in the proposals under consideration.

(30) Mr. FARR (Chief, Bureau of Personnel and Management) was unable to give any examples and pointed out that recruitment had been slowed down until after the Conference. In reply to a question from Mr. AVIDOR (Israel), he said that the average of P-3.02 was calculated on the first step of each grade. The reason why the cost of the 11 upgradings in the Workshops Division only amounted to $572 was that many incumbents had reached a step where an upgrading meant an increase of only $20 annually.

(31) The CHAIRMAN asked Mr. Rao for information on indirect personnel costs.

(32) Mr. RAO (Acting Chief, Bureau of Programme and Budget), referring to Table I on p. 243 of the proposed programme and budget, read the items under Common Staff Costs with the relative budgetary figure. Any savings that might be made in the course of executing the programme would be used on programme expenditure.

(33) Mr. COWELL (United Kingdom) asked whether any decrease was likely under item 14, Reimbursement of National Income Tax, as more members acceded to the International Convention on Privileges and Immunities.

(34) Mr. HARPER-SMITH (Comptroller) said that the item related almost entirely to staff at UN headquarters who had to pay United States income tax, as well as to a few United States citizens employed by the Organization who had not yet qualified for tax exemption.

(35) Mr. BOW (Canada) asked for an explanation of the high cost in 1955 under item 13, Travel of Staff and Dependents on Home Leave.

(36) Mr. RAO (Acting Chief, Bureau of Programme and Budget) explained that a larger number of staff would be going on home leave in that year.

(37) Miss LAISE (United States of America) said that the United States Government was exploring the possibilities of introducing legislation on income tax in connexion with the United Nations and the Specialized Agencies.

(38) With regard to the question of home leave, she reaffirmed the belief of the United States delegation that home leave should be on a three-year and not a two-year basis, since the latter practice could not but have a deleterious effect on Unesco's work. She wished to have that view recorded and also the continued concern of the United States delegation at the amount spent on temporary assistance during home leave periods.

(39) The DIRECTOR-GENERAL said that the Conference had already approved the right of the staff to annual leave and Unesco simply increased the travel allowance to enable staff members to return home. In the case of air travel, there was a slight increase in the time lost to the Organization, but time spent in travel by other means had to be taken out of the holiday period. In reply to a further question from Miss LAISE (United States of America), he confirmed that leave could only be taken when convenient to the Organization.

(40) The CHAIRMAN pointed out that the granting of home leave probably encouraged staff to take their holidays at one time, rather than spacing them out.

(41) Answering a question by the CHAIRMAN, Miss LAISE (United States of America) said that she would not press for inclusion of her remarks in the Committee's report, provided they appeared in the Summary Record.

**CHAPTER I: OFFICE OF THE DIRECTOR-GENERAL**

(42) The CHAIRMAN drew attention to p.26 of the Corrigendum.

(43) The DIRECTOR-GENERAL said that the changes in question were based partly on the Executive Board's decision to establish the post of Assistant Director-General for the remainder of 1954 and beyond that period subject to approval by the Conference. A further corrigendum had been discussed in private by the Executive Board, and would be submitted in a document, namely the addition of another Assistant Director-General and the elimination of the post of Deputy Director-General. He would like the Committee to discuss the two posts of Assistant Director-General, for both of which the Executive Board had proposed salaries of $14,000 with $2,000 representation allowance. Certain changes were proposed, resulting in a net saving, the most significant being the abolition of the Chief of Bureau of Official and External Relations (D-1) under paragraph 13 and the Director of Office of Director-General under paragraph 9, to be replaced by an Assistant Director-General and a P-5 post in the Director-General's office. He hoped to proceed further with reorganizing his office in order to make it a more effective instrument of general administration and would take every opportunity of saving. In reply to Mr. AVIDOR (Israel), he stated that the paper to be submitted would describe the work of the two Assistant Directors-General.

(44) Miss LAISE (United States of America) considered that the alterations would provide a much sounder administration. She hoped the new arrangement would be tried over the next two years and that no further changes would be made before the next Conference.

(45) The DIRECTOR-GENERAL confirmed that the Executive Board had already taken a decision on the lines of the United States delegate's suggestion; he assumed that it referred only to the three top posts.

**NEW YORK OFFICE**

(46) It was agreed that the item should be deferred until the discussion of general problems.

**BUREAU OF LEGAL AFFAIRS**

(47) No comment.

(48) The CHAIRMAN invited discussion on the Offices of the Directors of the Programme Departments, recalling that it had been agreed to discuss them on a comparative basis.

(49) Miss LAISE (United States of America) repeated an earlier observation on the tendency in Unesco to establish directorate staff regardless of the volume of work or number of staff to be supervised.

(50) Mr. FARR (Chief, Bureau of Personnel and Management) said that every department had a Director and Deputy Director and the Departments of Education and Mass Communication each had additional D-1 posts to take care of large sections of their programme. Each department had also an Administrative Officer at grade P-3 except in the case of Social Sciences, where the grade was P-2. No department was small enough not to need an administrative officer. Because of their size, the Departments of Education and of Mass Communication had an additional P-1 administrative assistant each, and a further similar post was proposed for the Department of Cultural Activities.

(51) Miss LAISE (United States of America) considered

that three points called for explanation: the need for a Deputy Director in each department; the reason why heads of divisions could not deputize for directors; whether administration could be centralized. The United Nations had similar problems and the view had been expressed that one way of developing personnel was to make division heads deputize for directors.

(52) The DIRECTOR-GENERAL said that it was essential to consider the nature of the responsibilities of heads of departments. In Unesco, in addition to heavy administrative responsibilities, there was considerable work in connexion with other organizations and with Member States. Experience had demonstrated the need for a Deputy, and he suggested that it might be useful to hear the view of a Director of one of the departments.

(53) Mr. AUGER (Director, Department of Natural Sciences) thought it essential for Directors of Departments to be assisted by a Deputy. Of the eight years he himself had spent in charge of a Department, he had had a Deputy only for the last four, and only then had he been able to attend adequately to the intellectual side of his work and with less detriment to his health. All Directors of departments agreed that the division of responsibilities had been satisfactorily arranged and had greatly improved the work of departments. Mr. Auger emphasized that it was important for Directors of departments to have a person with whom they could discuss each day's developments. Although Heads of Divisions could, if need be, deputize for Directors, it should not be overlooked that their work was, and had to be, of an even more specialized character. They did not, therefore, necessarily have the general grasp of the work of the department that was essential for a Director and his Deputy.

(54) With regard to the problem of Administrative Liaison Officers, Mr. Auger thought they were most useful in assisting the Deputy Director in his administrative duties and keeping in regular touch with all other services.

(55) Miss LAISE (United States of America) proposed that the Committee should recommend that the question be studied during the next two years and a special report made to the next Conference on the question of Deputy Directors and Administrative Officers. While she appreciated Mr. Auger's statement, it was important for the efficiency of the Organization to have greater exchange of persons and less specialization so that staff should gain a wider knowledge of the work of the Organization.

(56) It was agreed that the United States delegate's views should be included in the Committee's report.

(57) The CHAIRMAN recalled a suggestion, made during discussion of the Department of Cultural Activities, that the Library should be considered as a service to all departments and should not therefore be placed administratively in any one programme department.

(58) The DIRECTOR-GENERAL said that the suggestion was logical, but that it was difficult to decide which part of the administration should house it. There were reasons why it was preferable to keep it in a programme department, and Cultural Activities, which contained Unesco's bibliographical services, seemed a suitable department, but he was prepared to consider its transfer if there were strong feelings in favour of it.

(59) Mr. BOW (Canada) proposed that the matter should be included in the study suggested by the United States delegate. He would like to see a centralized machinery for evaluation rather than decentralized evaluation within departments, and asked if the Director-General in his review of administration could study the relative merits of centralization and decentralization.

(60) The DIRECTOR-GENERAL said that he had already considered the idea of a Department of Administration but had come to the conclusion that it was undesirable to increase top bureaucracy. He would, however, be glad to study the whole problem and make a report to the ninth session of the Conference.

(61) Miss LAISE (United States of America) suggested that the budget organization might be strengthened to enable it, in addition to controlling finance, to survey methods and organizational practices and especially to supervise field activities.

(62) Mr. ABDEL-RAHMAN (Egypt) proposed the establishment of a planning section attached to the Budget Bureau, so that methods of evaluation could be arranged at the same time as finance, and a direct means of ascertaining the results of a new project be established at the time the project was initiated. That would make evaluation of results far more effective.

(63) Mr. SOMMERFELT (Norway) said that the question of Archives ought to be considered in connexion with the Library.

(64) The DIRECTOR-GENERAL, referring to the Egyptian delegate's proposal, pointed out that the Bureau of Programme and Budget was already responsible for a considerable amount of planning and submitted a twice-yearly review of work plans, in addition to supervising all travel and all changes in work plans. It also joined the Director-General in tripartite discussions of work plans and travel in the different departments.

(65) Mr. ABDEL-RAHMAN (Egypt) insisted that criteria for judging the success of a programme should be established at its inception, so that the Director-General in executing it and the Conference in studying it could see whether or not the original aims had been successfully met.

## CHAPTER 4: BUREAU OF CONFERENCE PLANNING AND GENERAL SERVICES

(66) The DIRECTOR-GENERAL said that the Bureau had been operating in the most satisfactory way: it was well organized, had good personnel and excellent management; posts were kept to the minimum and the service had reached maturity in its procedures and activities.

(67) Mr. COWELL (United Kingdom) fully supported the Director-General's statement.

(68) Miss LAISE (United States of America)asked whether full use was being made of the Bureau, not only in connexion with conferences, seminars and meetings of experts, but also in connexion with administrative work in the departments. She asked who was responsible for providing administrative officers for meetings outside Unesco House in Paris.

(69) Mr. MONTAGNIER (Chief, Bureau of Conference Planning and General Services) pointed out that there were several categories of meetings. When meetings were held in Paris, the Bureau of Conference Planning was responsible for all practical arrangements. For important meetings held elsewhere, the Bureau helped in the preparations and delegated a member of the Bureau to be responsible for the organization of the Conference. For small meetings away from headquarters, a member of the department concerned handled all administrative arrangements, which was more economical than sending for the same purpose an official from the Bureau of Conference Planning.

**PART IV: COMMON SERVICE COSTS**

(70) Mr. Montagnier drew attention to the first paragraph of Part IV showing the savings proposed for the administration of the Common Services. Those savings were due partly to reduced prices(particularly for paper). Furthermore, after eight years, the Organization had sufficient equipment to meet its needs in the way of typewriters and office furniture, and the budget estimates provided for the periodic replacement of some items only. A slight increase in the appropriations requested for the Cleaning and Security Services (paragraph 24) would be required, owing to the decision to increase salaries in France. The Secretariat obtained those services under contract and was therefore required to make provision for that increase, which amounted to $9,600 in 1955 and $11,072 in 1956. Mr. Montagnier pointed out that that increase was offset by the reduction for office supplies referred to previously (paragraph 6). The expenses involved in the transfer of the Organization to its new premises had been calculated very closely and amounted to approximately $30,000. If the new building were not completed by the date indicated, an extra $15,000 or so would have to be provided for rental.

(71) The CHAIRMAN, referring to paragraph 4, asked whether it could still be expected that the new headquarters building would be completed during the first half of 1956.

(72) The DIRECTOR-GENERAL said that the most recent information was to the effect that the next Conference could be held in the new building by the beginning of October, although the main Secretariat building would not be entirely completed. In reply to a question from Mr. COWELL (United Kingdom), he confirmed that the work would be carried out at the normal cost.

(73) Miss LAISE (United States of America) proposed that the salary and allowances for the Secretary of the Staff Association in paragraph 39 be deleted. A Staff Association should be independent.

(74) Mr. SOMMERFELT (Norway) seconded the proposal.

(75) Mr. AVIDOR (Israel) suggested that the sum in question could be awarded to the Staff Association in the form of a subvention.

(76) Miss LAISE (United States of America) referred to the provision of $1,000 a year for staff cultural and recreational activities and proposed that the funds be transferred to the staff training programme, which was one of the weakest parts of the programme.Efforts being made to improve geographical distribution and to employ younger people emphasized the need for a language programme.

(77) Mr. COWELL (United Kingdom), supported by the delegate of the United States of America and Norway, asked whether other Specialized Agencies made similar budgetary provisions.

(78) Mr. FARR (Chief, Bureau of Personnel and Management) said that the provision for a Secretary to the Staff Association had first appeared in the 1953-54 budget. Staff Regulations provided for a Staff Association, and its proper functioning was in the interests of the Organization, which accordingly felt justified in providing for a Grade E secretary. Membership was voluntary and included about 90% of the staff on payment of a subscription. The Association financed many activities which contributed to the well-being of the staff and consequently of the Organization. Its constitution had been approved by the Director-General, and it was conducted in a representative and democratic manner. Moreover, it was able to deal with many queries which would otherwise have to be handled by the administrative services. Speaking as a former Chairman of the Staff Association and as existing Chief of the Bureau of Personnel, he considered that the Association served a useful purpose.

(79) The DIRECTOR-GENERAL said that, while there had been controversy between himself and the Staff Association, he believed that it was instrumental in developing a spirit of unity among the staff which was of value to the Organization. Its possibilities could be considerably developed in the coming two years.

(80) Miss LAISE (United States of America), while appreciating the Director-General's views, maintained her proposal. The Executive Board at its last session had stressed that the Organization should share responsibility when providing funds; it was not responsible for the actions of the Staff Association.

(81) After further discussion, it was agreed to defer the item until the information requested by the United Kingdom delegate had been provided, and that, if it were not forthcoming in time for a recommendation to be made, the Committee should point out the desirability for further study of the problem.

**PART I: GENERAL POLICY**

**CHAPTER 1: GENERAL CONFERENCE**

(82) Mr. MONTAGNIER (Chief, Bureau of Conference Planning and General Services) explained that the budget estimates had been drawn up on the assumption that the General Conference would hold its ninth session at the Organization's headquarters in Paris and that the session would be roughly on the same scale and last for the same period as that held in Paris in 1952. The greatest difference compared with the 1952 appropriations was for temporary assistance, which accounted for $137,000 in the 1952 budget, compared with $148,000 in 1953. That difference was due to the fact that it had been decided to alter the staff rules and to bring the salary of temporary staff into line with the initial salary of permanent Secretariat officials of the same category. There was an increase of $4,000 for supplies and materials (to cover the purchase of paper for the reproduction of documents during the Conference). In that connexion Mr. Montagnier reminded members of the wish expressed both by the Executive Board and the Committee itself to include under Part I all expenditure occasioned by the General Conference. The great difference in the provision for hospitality ($204 for 1952 and $3,000 for 1956) was due to the cancellation of the big final reception in 1952.

(83) Mr. AVIDOR (Israel) said that, with the growth of the Organization and the increase in the number of Member States, it was time to consider the programme of work of the General Conference. It was useless, in his view, for problems to be discussed by the Advisory Committee, the Programme and Budget Commission and the Conference, often including the same members, and he asked if the Secretariat and the Executive Board could consider the problem and report to the next Conference.

(84) The DIRECTOR-GENERAL said that the subject was automatically discussed by the Executive Board. The views of the delegate of Israel would be kept in mind.

(85) The CHAIRMAN said that it would be useful to have the views of the Administrative Commission

(86) Miss LAISE (United States of America) welcomed the statement of the delegate of Israel. The United States delegation hoped that the change in the status of the Executive Board might eliminate the need for the Advisory Committee.

**CHAPTER 2: EXECUTIVE BOARD**

(87) The DIRECTOR-GENERAL, referring to the budget proposed by the Chairman of the Executive Board, in consultation with its members and the Secretariat, said that the most important consideration was the number and length of sessions. The information appeared in paragraph 21.

(88) Mr. JUNANKAR (India) pointed out that his Government had extended an invitation to the next Conference, whereas the figures in the document were based on its being held in Paris.

(89) The DIRECTOR-GENERAL said that a paper had already been prepared giving the additional cost in case the Conference were held in India, and including appropriate additions to the cost of the Executive Board sessions which would be held at the time.

(90) It was agreed to discuss the document as it stood.

(91) Miss LAISE (United States of America) proposed reducing sessions of the Executive Board from 4 to 2 in one year, both to be held at the time of the Conference in a conference year.

(92) The proposal was supported by the delegates of the United Kingdom and France.

The meeting rose at 1.00 p.m.

# FOURTEENTH MEETING

*9 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

(1) Opening the meeting, the CHAIRMAN announced a change in the order of discussion in order to co-ordinate the Committee's work with that of the Executive Board. Instead of examining the new draft resolutions submitted by delegations, the Committee would first continue its discussion of the chapter in the draft programme and budget relating to the Executive Board. It would then go on to discuss the following items: (1) decentralization; (2) the general question of subventions; (3) draft resolutions submitted by delegations; (4) the budget balance between the various programme chapters; and (5) the Executive Board's Report on the Remodelling of Unesco's Future Programme.

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION** (continued)

**PART I – CHAPTER 2: EXECUTIVE BOARD** (continued)
**(Paragraphs 14 - 22)**

(2) The Chairman recalled that the delegate of the United States of America, seconded by the delegates of the United Kingdom and France, had proposed that, in order to allow for persons of the necessary calibre to be able to attend the sessions of the Board, the duration of these sessions be shortened and their number per year limited to two, plus the session held concurrently with that of the General Conference.

(3) Sir Ronald ADAM (Chairman of the Executive Board) assured the Committee that the Board never met for its pleasure, but was often obliged to exceed two meetings a year in order to deal with important matters which cropped up and upon which the Director-General wanted its advice. He believed it impossible to decide in advance exactly how many meetings would be required in 1955-56. He recalled that the Constitution stipulated that the Board should hold at least two meetings a year.

(4) As a former member of the Executive Board, Mr. SOMMERFELT (Norway) endorsed the remarks of the Chairman of the Board.

(5) Miss LAISE (United States of America) explained the reason for her delegation's proposal. It was felt that the General Conference should not refer so many administrative and financial questions to the Board, but should leave it free to discharge its primary duty, which was to examine the Organization's programme and make comments to the General Conference thereon. It should be concerned with policy matters, and not with administrative and financial details.

(6) Sir Ronald ADAM (Chairman of the Executive Board) remarked that the Board had made a careful study of the possibility of lightening its task, but had come to the conclusion that there were no questions with which it could cease to deal, unless the General Conference altered its resolutions. The programme and budget were henceforth the Director-General's responsibility, and it was not laid down in the Constitution that the Board should advise him thereon, but Sir Ronald Adam felt that the Board had been able to give the Director-General valuable advice on the programme during 1954, and he (Sir Ronald) would very much regret it if the practice were discontinued.

(7) Mr. SILLER (Mexico) associated himself with the remarks of the delegate of Norway. He thought it undesirable to lay down a rigid rule on the question. He agreed that it would be well to reduce the work falling on the Executive Board but thought that no fixed number of meetings should be prescribed. Under the terms of resolutions 41.122 and 41.123 of the seventh session of the General Conference, the Board had new responsibilities, while the extension of the period between sessions of the Conference to two years had increased its work in connexion with the execution of the programme. He therefore felt that the burden on the Board should be reduced but without fixing a definite number of meetings per year.

(8) Mr. ABDEL-RAHMAN (Egypt) recalled that the discussion had stemmed from budgetary considerations. Agreeing with the Chairman of the Board that it was very difficult to decide in advance when and how often the Board should meet, he proposed that the budgetary provision in document 8C/5 be approved, on the understanding that, if additional meetings of the Board proved necessary, the requisite transfers would be made.

(9) As the whole question was linked with the Conference's decision on the United States proposal to transform the Executive Board into a governmental body, so that no final decision could be taken for the time being, Miss LAISE (United States of America) proposed that the Committee confine itself to drawing the attention of the Administrative Commission to the problem, adding that the length of the Executive Board's sessions was having unfavourable consequences.

(10) It was agreed to do as Miss Laise had suggested.

General discussion on decentralization, with particular reference to the Science Co-operation Offices, the Liaison Office in New York, the Regional Office at Havana and work with National Commissions

(11) At the CHAIRMAN's request, Sir Ronald ADAM (Chairman of the Executive Board) gave the Board's views on the question. The Board had in private session discussed decentralization and methods of stimulating National Commissions; it had reached a conclusion on the general question of decentralization, but had not yet considered the Indian delegation's proposal on the subject. The majority of members of the Board were against a decentralization of Unesco, they were in favour of regional work through National Commissions and experts in various parts of the world. They were strongly against a rigid definition of regions.

(12) Mr. MAHEU (Assistant Director-General)spoke on the same lines as Sir Ronald Adam. In his view, decentralization of activities did not necessarily involve administrative decentralization. He favoured the utmost flexibility in putting the resolutions into effect. There were three main procedures for achieving decentralization:
(13) (i) Experts or members of the Secretariat could be sent out to help governments of Member States in specific undertakings. Such missions, adapted in their make-up to varying needs, should be on national lines rather than "regional" in the more or less arbitrary sense given to that term.
(14) (ii) Again, the co-operation offices could be used as vehicles for decentralization. Those offices were a proved success and it could be said that they met a definite need in the present state of scientific and technical civilization, the centres of which were still inequitably spread throughout the world.
(15) As far as the administrative structure of the offices was concerned, changes were possible, as Mr. Auger would be able to explain to the Committee. In that connexion, Mr. Maheu instanced the Far East and South Asia Science Co-operation Offices.
(16) The Director-General was willing to consider other ways of making the holders of these posts more mobile and of using them for the execution of the programme rather than on liaison.
(17) At Havana, the Regional Office functioned on different lines from the Science Co-operation Offices. Its scope was comprehensive. The Director-General hoped that the Committee would discuss this matter exhaustively.
(18) (iii) The third procedure consisted in developing National Commissions under resolutions 7.11 and 7.12. This project had been given what was hardly more than a token budget but nevertheless opened up a whole range of possibilities; it was another case in which rigid patterns would negate the objects aimed at; much flexibility, adaptability, indeed constant inventiveness were needed.
(19) As regarded, lastly, the New York Office, its purpose was to maintain touch not with one Member State or one group of Member States, but with the headquarters of the United Nations. It was not therefore concerned in the present study of how to decentralize administratively in carrying out the programme. Nor was it proposed to make any important change in the New York Office.

(20) Mr. ABDEL-RAHMAN (Egypt) thought that the term "decentralization" should be more clearly defined. He asked whether it was a question of administrative geographical decentralization, or of decentralization of the execution of the programme.

(21) Sir Ronald ADAM (Chairman of the Executive Board) stated that the Board had taken "decentralization" to mean the putting out of sub-branches of the Secretariat all over the world, and that was what members of the Board were strongly against.

(22) Mr. AVIDOR (Israel) agreed that the problem was how far administration should be decentralized; Unesco's programme activities obviously had to be decentralized. At the present time, there were seven administrative units outside Paris, and the question was whether that policy should be continued. Personally, Mr. Avidor thought not. The ideal would be for every Member State to have a permanent delegation at Unesco headquarters and for Unesco to have a representative in every Member State, but until that came about, Unesco should work through National Commissions and stimulate co-operation between Member States, without opening new offices. Indeed, the delegate of Israel considered that five of the existing seven offices could well be abolished. In setting up regional offices, the three following criteria might be followed: (1) the office should be in a geographical region where communications between the various units were easy and good; (2) it should be in a region where the Member States concerned had strong linguistic ties and a more or less common cultural level; (3) it should be in a region sufficiently far from headquarters for Unesco's influence not to be felt without the existence of such an office. Those conditions were not fulfilled by the offices in Delhi and Jakarta, nor by those in Cairo and Istanbul. As for Latin America, the Montevideo Office should suffice, and the Havana Office could be abolished.The delegate of Israel proposed that the Committee make a very strong recommendation to the General Conference on the lines he had suggested.

(23) Mr. SOMMERFELT (Norway) agreed with the distinction between administrative and operational decentralization, but he thought that, if the Science Co-operation Offices were doing good work, they should be allowed to continue, as their activities formed part of Unesco's assistance to the less developed countries. He was also in favour of the Office in New York. He suggested that the Secretariat might be asked to make a study of the question of administrative decentralization, and to report the results to the ninth session of the General Conference.

(24) Mr. COWELL (United Kingdom) shared some of the doubts expressed regarding the Science Co-operation Offices; they accounted for nearly one-third of the budget of the Department of Natural Sciences. There was, however, another form of decentralization which should be encouraged, and that was through non-governmental organizations. In his opinion, Unesco's policy of granting subventions

to international non-governmental organizations should be considered in the context of the general question of decentralization.

(25) Mr. SOEBROTO (Indonesia) strongly defended the Science Co-operation Offices. Although everything could be done from headquarters in Paris, distances were so great in certain cases that they would retard and hamper the work. His delegation would very much regret it if Unesco's offices in the East were abolished, for they rendered invaluable services there.

(26) Mr. SILLER (Mexico) proposed that no hard-and-fast recommendation be made to the General Conference. The Committee was not representative of all the geographical or cultural divisions of the world and the views of many regions had not been heard. It was not wise to generalize. Each office had its own characteristics, and it would therefore be inappropriate to adopt a firm recommendation. It was preferable to leave the Commission free to come to its own decision.

(27) Mr. RANIERI (Uruguay) supported the remarks of the delegate of Mexico.

(28) Since his visit to the Liaison Office in New York, Sir Ronald ADAM (Chairman of the Executive Board) no longer had any doubt of its utility; it did an enormous amount of work, particularly in connexion with Unesco's Gift Coupon Scheme. With regard to the Science Co-operation Offices, it was precisely because there were no international non-governmental organizations in certain regions that such offices were needed. The Executive Board felt, moreover, that the offices should not come under anyone but the Director of the Department of Natural Sciences; no one should intervene between Professor Auger and the scientists working in the field. The Board had suggested that the Delhi and Jakarta Offices be merged at Jakarta, because India was developing its science rapidly and could obtain help from non-governmental organizations, whereas Indonesia could not. With regard to the Havana Office, a member of the Board had prepared a confidential report on it, and it had been decided to suggest that the Secretariat should assess the value of the office again in two years time. After dealing with the very important question of the remodelling of Unesco's future programme, the Board had returned to the question of co-operation with National Commissions, which, in its view, were one of Unesco's greatest weaknesses. It intended to produce a paper on ways of strengthening National Commissions, but he doubted whether the Board would be able to finish it before the Conference opened.

(29) Miss LAISE (United States of America) proposed the establishment of a small working party to define the problem and to consider the various means of decentralizing Unesco's activities, i.e. through the Science Co-operation Offices, the Fundamental Education Centres, international non-governmental organizations, National Commissions, the Liaison Offices in Havana and New York, and the major projects in the remodelled programme. The working party would report back to the Committee, which would include those conclusions in its own report.

(30) Mr. MAHEU (Assistant Director-General) drew the Committee's attention to the draft resolution submitted by India on the decentralization of Unesco's activities (8C/DR/7). That resolution asked that a working party of the Programme and Budget Commission be set up, but if the Committee set up another working party the latter would be covering the same ground with all the risk of confusion that that entailed.

(31) Mr. CABOUAT (France) felt that his own views were very close to those of the Executive Board. In his opinion, the problem of decentralization was a vast one into which an enormous variety of considerations entered and he thought the Executive Board had been better placed to explore it than the working party proposed by Miss Laise would be.

(32) As Rapporteur, Mr. Cabouat therefore suggested that the Committee in its report

(1) draw the attention of the Programme and Budget Commission to the problem;

(2) ask the Commission to lay down criteria for the evaluation of the regional offices; and

(3) recommend to the Commission the formation of the working party suggested by the Indian delegation.

(33) The CHAIRMAN shared Mr. Maheu's misgivings at the idea of having a working party at the present stage. He thought that the Committee might limit its action for the time being to formulating the problem. Later, the Programme Commission might wish to ask the Committee to make a more detailed study of certain aspects of the problem of decentralization, and then it might be time to think about setting up a working party.

(34) Mr. AVIDOR (Israel) seconded the proposal by the delegate of France.

(35) Mr. SILLER (Mexico) was prepared to accept what the delegate of France proposed but was insistent that the Committee make no firm recommendation. It should rather confine itself to settling criteria and general principles to guide subsequent discussions in the Commission, where more States affected were represented.

(36) The CHAIRMAN requested the Committee to consider the section of the draft programme and budget concerning Science Co-operation Offices.

Project 2.41: Science Co-operation Offices (paragraphs 140-184)

(37) Mr. ABDEL-RAHMAN (Egypt) thought that the project should be moved to Section I of the Natural Sciences chapter, thus connecting it directly with the Director of the Department.

(38) Mr. MAHEU (Assistant Director-General) was anxious to remove any wrong impression in the mind of the delegate of Egypt. The Department of Natural Sciences comprised divisions and sections with general responsibilities and Science Co-operation Offices, which were the outposts of the Department at

regional level. Those offices were directly responsible to the Director of the Department through his deputy.

(39) To go farther and to merge the Science Co-operation Offices in the Director's Office would unduly burden the latter. In particular, it would artificially increase the latter's budget by a sum equivalent to one quarter of the total budget of the Department.

(40) The CHAIRMAN remarked that in the Department of Social Sciences, the co-operation posts were included with that of the Director.

(41) Mr. MAHEU (Assistant Director-General) pointed out that, in the Department of Social Sciences, the whole regional co-operation staff amounted to two persons in all, and there was no objection to their attachment to the Office of the Director of the Department. The reasons which had led the Secretariat to adopt a different solution for the Department of Natural Sciences were due to the very large number of officials concerned; they had their basis in practical considerations rather than in logic.

(42) Mr. ABDEL-RAHMAN (Egypt) accepted the explanation for pragmatic although not for rational purposes.

(43) Mr. AVIDOR (Israel) said it would be difficult, after having referred the subject to the Commission, to make any recommendation on it now. It might, however, be possible to go through the section item by item, and see if the activities could be run in each case by Member States or from headquarters just as cheaply.

(44) The CHAIRMAN shared the view of the delegate of Israel, who wondered whether it might not be better to ask Mr. Auger what activities could not be run by Member States or headquarters.

(45) Mr. AUGER (Director, Department of Natural Sciences) answered that it was indeed possible to do everything from Paris, but, if so, results could not be expected to be as good as under the existing system and expenses would be higher. Not everything could be done by letter: replies sometimes took a long time to arrive and letters were occasionally simply not answered.

(46) The rôle of the field officials was often difficult to describe in cut-and-dried terms but it was a very real one. For instance, they could reach the whole of their respective regions with little expense. From Paris the cost of similar journeys would work out much higher. Yet it was essential to have direct personal contacts, since many activities owed their success to them. For proof of that, it was only necessary to glance over the activities attributed to the offices abroad: thanks to those offices, scientists in the regions served could assess the importance of their own scientific standing, and exchanges of scientific publications could be established between the regions.

(47) The offices abroad were not an example of administrative decentralization but of decentralization of activities; they were administered from Paris.

(48) Mr. AVIDOR (Israel) was not satisfied with that explanation. The same could be said of other Departments of the Secretariat.

(49) Mr. SOEBROTO (Indonesia) remarked that science and education activities could not be placed on the same level. Every country had a more or less organized educational system, through which activities could be handled from Paris, but that did not apply to scientific activities.

(50) Mr. BOW (Canada) shared the doubts expressed by the delegate of Israel of the value of the regional offices.

(51) If the Committee had not agreed to refer the matter to the Programme and Budget Commission, he would have proposed lowering the priority of the projects. He asked Mr. Auger whether he was convinced that one-third of the budget for Natural Sciences should go to these offices.

(52) Mr. AUGER (Director, Department of Natural Sciences) explained that the co-operation offices, on the basis proposed in the draft programme and budget, would absorb not 30% but about 25% of his Department's budget. Fuller consideration could be given to possible changes in their activities, and some economies, say in their staff, could be effected. But there was little ground for hoping that the percentage proposed could be reduced appreciably as long as it was desired to maintain contacts on the existing scale.

(53) The CHAIRMAN did not consider that the decision on the problem of decentralization excluded changes in the relative priority of one part of the programme or another.

(54) Mr. ABDEL-RAHMAN (Egypt) pointed out that the figure of 25% for the field offices included a number of services for other departments in Unesco which were covered by regional offices. That should be taken into account in discussing the proportion between the two categories of activities.

(55) As the delegate of Canada had said, the Committee could not now take a decision on a question of principle.

(56) Mr. COWELL (United Kingdom) thought that the meeting had not had the opportunity to gain enough real information on the regional offices. It might be advisable to suggest that an enquiry be held by a neutral observer unconnected with Unesco or the Member States concerned, willing to undertake a systematic review of the management of these offices, before terminating an activity on which so much had been spent.

(57) In reply to what the delegate of the United Kingdom had said, Mr. MAHEU (Assistant Director-General) pointed out that extremely full details were given in the Director-General's report. In addition, an informatory booklet, entitled "Science Liaison", had recently been produced. It would be distributed during the meeting, and Mr. Maheu hoped that the delegates would be able to find adequate additional information therein.

(58) Regarding critical evaluation, the Secretariat was at the disposal of delegates. He thought, however, that expert missions to evaluate the work of offices abroad would cost money which could be better employed in the offices themselves on programme work. Besides, if the Committee wanted a body independent of the Secretariat, it could always approach the Executive Board, which met that last requirement and whose work of supervision could be - and was done - without extra cost.

(59) The CHAIRMAN added that the remarks made by the Assistant Director-General could apply to any of the evaluation projects for which the Co nmittee had agreed to vote funds.

(60) Mr. BOW (Canada) said that it was after having read the report of the Director-General that he had made his remarks. He maintained that the Committee was not in a position to pronounce on the real value of the offices. This was an example of the evident need expressed by the delegate of Egypt for setting up a machinery of evaluation in the Secretariat in some form or another.

(61) Mr. COWELL (United Kingdom) said that his Government had studied the projects as thoroughly as possible, but there was a residuum of uncertainty, and he therefore supported the delegate of Canada in his assertion that a continuing review was necessary.

(62) Mr. ABDEL-RAHMAN (Egypt) considered the Canadian delegate's proposal on evaluation important from a general point of view. It was not necessarily expensive. Auditing, for instance, could be carried out from Paris. He was asking for evaluation in order that the offices should be maintained, and eventually strengthened.

(63) Miss LAISE (United States of America) suggested that there should be a completely new perspective in the evaluation, in the light of the proposal to remodel the programme. Apart from the excellent job the offices might be making of the exchange of scientific information, was this activity one that Member States felt the most need of?

(64) Mr. CABOUAT (France) wished to make certain observations on the plea by the United Kingdom delegate for special evaluation machinery. In his view, the matter was rather outside the subject under discussion. The evaluation of activities was a normal function of the Secretariat and it was not clear how a new service to undertake evaluation could make an effective additional contribution. Moreover, there would be some danger of the new service's growing to a size which its usefulness did not warrant.
(65) It would be better to leave Member States the responsibility of making the evaluation and forwarding their remarks. In any case, the Programme and Budget Commission should be left entirely free to settle the question.

(66) The CHAIRMAN, summing up, said there had been two categories of remarks on the regional offices project: (1) general remarks and proposals linked with the problem of decentralization, which should be left to the working party; (2) interventions that were more specifically related to the Natural Sciences programme; Canada's proposal on the proportion of the Natural Sciences budget to be devoted to these projects; and the proposal of the United States delegation in terms of the future development of the programme, in relation to whether or not these activities were needed by a Member State.

(67) Mr. SOEBROTO (Indonesia), on the resolution that a working party should be established by the Programme and Budget Commission which would discuss the regional offices, requested that delegates from the interested countries should be appointed.

(68) Agreed.

(69) Mr. MAHEU (Assistant Director-General) thought the Indonesian delegate had made a constructive suggestion. He himself had no wish to intervene on the substance of the discussion but he had two remarks to make:
(1) The Committee would have noted that the delegates of Indonesia, Uruguay and Egypt, who represented States in whose territory Science Co-operation Offices were in operation, had pronounced in favour of the maintenance of such activities.
(2) Delegates had an admirable opportunity for assessing the work of one such Office either themselves or with the assistance of scientists in their delegations: a Science Co-operation Office was working in Montevideo itself and delegates were cordially invited to visit it.
(70) The suggestion of the delegate of the United States of America that some form of emulation between the services of Unesco be instituted contained the germ of an idea worth bearing in mind. Member States could be asked to comment on this point, either through questionnaires or on the occasion of visits paid by senior Unesco officials.
(71) Subject to more detailed study of the question, such a proposal was quite in line with the Director-General's views.

(72) Mr. BOW (Canada) hoped the project would not be evaluated in terms of its value to the country in which it was located, but in terms of the whole region.

(73) Mrs. PECSON (Executive Board) explained the method of work employed by the Executive Board in evaluating the project. It first considered the reports presented by the Secretariat on the achievements due to the Science Co-operation Offices, and the information received from the regions concerned. Then members of the Executive Board from the regions gave their own views, which made it easier to appreciate the real value of the work, and, lastly, the Executive Board had considered the reports brought back by the Director-General, the Chairman, and members of the Board who had visited the different regions.
(74) Mrs. Pecson gave details of the results achieved by the Science Co-operation Office in Manila: interest in scientific research had been accelerated, the tempo of work for the improvement of industrialization had been heightened, and National Science Councils had been stimulated to produce new legislation. Work

on oceanography and medicinal plants, the Pacific Science Congress, the Humid Tropical Zones project, irrigation systems and the propagation of increased opportunities for earning a living were some of the activities influenced.

(75) Mrs. Pecson added that a thorough evaluation, if undertaken now, would require the setting up of an expert committee, which would involve some expense.

(76) The CHAIRMAN enquired whether the proposal by the delegate of Egypt for granting high priority to the project, subject to the findings of the working party, was seconded.

(77) At the request of the delegate of Israel, the sections were taken separately. No comment was made on Sections A, B and C.

(78) On Section D, Mr. ABDEL-RAHMAN (Egypt) asked for an explanation of the combination of the two separate offices in one, in view of the Indian delegate's proposal about a regional office in Delhi.

(79) Answering the delegate of Egypt, Mr. AUGER (Director, Department of Natural Sciences) said that relations between Paris and the Jakarta and Delhi Offices respectively were direct and, as the plans stood, would remain so.

(80) He did not think, incidentally, that if the Indian proposal were adopted it would bring about major alterations in the programme.

(81) Mr. MAHEU (Assistant Director-General) explained that it was for reasons of economy that consideration had been given to combining the Jakarta and Delhi Offices.

(82) Mr. AUGER (Director, Department of Natural Sciences) explained that with a budget below a certain minimum the effectiveness of a Science Co-operation Office diminished appreciably; it was not enough merely to pay the salaries of the officials on the spot for them to be able to do useful work. It was for that reason that the appropriations had been kept at the 1953-54 level, but spread over three offices instead of five.

(83) The CHAIRMAN asked the meeting to decide on the motion presented by the delegate of Egypt to recommend a higher priority for the project as a whole, subject to the decision of the working party on the question of decentralization.

(84) Mr. AVIDOR (Israel) thought there had been a motion presented by the delegate of Canada to lower the priority of the project. He had asked for the project to be taken section by section, in case the meeting wanted to give a different degree of priority to the different sections.

(85) Mr. BOW (Canada) explained that he had not formally made that proposal, as he had not wanted to trespass on the ground of the working party, but he now proposed the lower priority, on the understanding that the offices would not be immediately eliminated, before any evaluation had been made.

(86) Mr. CABOUAT (France) doubted the appropriateness of taking a vote at that stage. He appealed to the delegates of Egypt and Canada to withdraw their motions, the upshot of which might be the elimination of an administrative organ - something the Committee had not yet done.

(87) Mr. ABDEL-RAHMAN (Egypt) withdrew his proposal to raise the priority of the project.

(88) Mr. BOW (Canada) withdrew his proposal to lower the priority of the project.

(89) Miss LAISE (United States of America), referring to the remarks made by the Assistant Director-General, expressed the interest of her delegation in any machinery that might be set up to evaluate the relative merits of the different services of Unesco from the point of view of Member States. She also appreciated the invitation to see the field office in Montevideo.

Project 3.01: Social Science Co-operation Offices

(90) Paragraphs 16-24 were approved without discussion.

The meeting rose at 6.45 p.m.

# FIFTEENTH MEETING

*10 November 1954 at 10 a.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION** (continued)

**CHAPTER 7: GENERAL RESOLUTIONS**

Project 7.3: Regional Office in the Western Hemisphere (paragraphs 22-27)

(1) The CHAIRMAN invited discussion on the Havana Office, bearing in mind the decision to recommend to the Programme and Budget Commission to set up a working party on the problem of decentralization.

(2) Mr. MAHEU (Assistant Director-General) introduced Mr. Francovich, Director of the Havana Regional Office.

(3) Mr. FRANCOVICH (Director of the Regional Office in the Western Hemisphere) reported briefly on the work of the Havana Regional Office. Despite its official title, it worked only in Latin America, among a group of peoples who were not only geographically related but linked by similarities of political, linguistic and economic organization, etc. so that they formed a homogeneous whole, an international community in which Unesco could develop the general lines of its policy. That was the real reason why the Office was necessary.

(4) The Havana Regional Office differed from the Science Co-operation Offices, in that the field of activity of the latter, being limited to the natural sciences, was sharply defined, whereas the Havana Office carried out in the whole of Latin America the full range of work required by the programme of Unesco, dealing with governments, National Commissions and scientific centres and covering an extremely wide and varied field.

(5) The activities of the Office could be divided into three main sections; the first was concerned with relations with the Member States in the region, the governments of those States, and their Ministries and authorities, and included the encouragement of the growth of National Commissions and the supplementing of their work. The Commissions were not functioning as they should and constant effort had therefore to be devoted to them. That work was carried out by the Regional Office through visits and through assistance to meetings and congresses, in regular consultation with the National Commissions, with whom it also maintained a considerable correspondence. In order to provide a stimulus to the Commissions, the Office produced and circulated its Monthly Information Bulletin, which gave news about Unesco and the Office itself.

(6) Secondly, the Havana Office was always at the disposal of the Secretariat for carrying out Unesco's programme in the countries of the region. Work done in that way was more effective than if done from Paris. The officials of the Regional Office were better acquainted with political, social and religious conditions, etc. in the countries concerned and knew better which people in Latin America were interested in the Unesco programme. Moreover, in carrying out the programme itself, technical assistance activities had to be conducted, and advice and guidance provided, in close co-operation with people who took an interest in Unesco. The assistance thus provided by the Regional Office reduced the amount of official travel necessary for members of the central Secretariat. It was easier to work from Havana than from Paris and the expenditure on travel was naturally lower.

(7) The third aspect of the work of the Havana Office was extremely important: through the Office, Unesco and all its regular forms of activity were continuously represented in the region. Unesco did not mean a programme only: it was a kind of conscience whereby a new type of international co-operation could be developed.

(8) In Latin America, there was a tendency to hold frequent meetings and conferences, between the countries designated as Spanish American, Latin American, Indo-American, etc. according to the special characteristics and cultural features of that region. If it were not for Unesco, such trends towards regionalism would become excessive.

(9) The Office collaborated in these meetings, attended them and offered them the benefit of its own experience, keeping before them the world-wide interests of Unesco. It took part in the meetings, acquainted them with the Organization's programme and made every effort to ensure that the resolutions they adopted were in accordance with Unesco's ideals. The Centre of American Studies, the Health Institute and the Caribbean Commission, for instance, were in direct and continuous contact with the Havana Office and could thus be influenced by Unesco. The work of the Office therefore covered a very wide field and entailed not only office work but travel.

(10) The Unesco Bulletin for Libraries was published in Spanish by the Regional Office and had a circulation of 1,000 to 1,500 copies. One thousand copies of the monthly Information Bulletin were distributed to Ministries, organizations and individuals interested in it throughout the region. In the same way, the Spanish edition of the Bibliographical Newsletter was distributed to people interested in that publication.

(11) To give an idea of the activities of the Havana Office, mention might be made of

some carried out in the previous month.
(12) On 4 October 1954, the study and information seminar for youth leaders in Latin America was opened. Sixty representatives took part in that seminar, which was extremely successful, as Mr. Maheu, who had been present at it, had seen. Mr. François had also expressed his satisfaction at the results of the meeting.
(13) On 15 October, the Office took part in the Second Inter-Latin American Congress on Education, held in Quito by the Institute of Hispanic Culture and attended by seven Ministers of Education and representatives of 14 countries. Unesco was invited and was also present. At that Congress, Mr. Francovich had reported on the work of Unesco and, as a result, the Congress adopted resolutions concerning co-operation with Unesco on many points.
(14) On 24 October, the Medellin pilot project Public Library for Latin America was opened - an extremely important event. The Regional Office had taken an active part in the preparations for the opening, and an expert, Mr. Carlos Victor Penna, had worked for five months organizing it. The Director-General, who had been present at the opening ceremony, had been able to appreciate the importance of the project, which was of great value to Colombia and should help enormously towards the development of public libraries in Latin America.
(15) Mr. Francovich did not think it necessary to enumerate further aspects of the work the Havana Regional Office was doing in execution of Unesco's programme in Latin America but was prepared to provide the Committee with any further information delegates might desire.

(16) Miss LAISE (United States of America) considered that neither the statement of the Director of the Regional Office nor the justification in the Director-General's Report gave a clear indication of what the Office had achieved. It was true that the initial activities would be largely concerned with disseminating information on Unesco and its work, but enough time had now elapsed for people interested in the development of regional programmes to ask what were the lessons to be learnt and what were the specific accomplishments expected from a regional office which could not be achieved by other means. She asked if it would be possible to have a brief summary of the Havana Office's contribution to the development of National Commissions in Latin America.

(17) Mr. MAHEU (Assistant Director-General) agreed that the question put by the delegate of the United States of America was a very important one but he emphasized that it was difficult to give a brief, categorical, immediate reply. Miss Laise had, in fact, asked what the Office had done which could not have been done without it. In his statement, Mr. Francovich had shown that the functions of the Office were of a general character and that the influence it exercised was indirect; it was rather difficult to say what was directly and exclusively due to the Office. The Secretariat did not claim that the Office was essential for the representation of Unesco in the region. The fact that the Office was situated in the centre of the countries it served conferred upon its activities a psychological value which, although difficult to measure, should not be underestimated.

(18) Mr. FRANCOVICH (Director of the Regional Office in the Western Hemisphere) said that an idea of the practical achievements of the Office could be gained from a description of the work it had done for libraries. The staff of the Office included a specialist on cultural activities, and work with libraries was an item in the programme of the cultural section. The work in that field would not have been done if there had been no such Office. The libraries specialist brought out the Unesco Bulletin for Libraries in Spanish and distributed it throughout the region, but the Bulletin published by the Office was not simply a literal translation of the one published in Paris; a quarter of the contents of each number was composed of material relating to the countries of Latin America. It was an important work of reference which would not have existed if it had not been published by the Office and it was thanks to it that Unesco's activities were known throughout Latin America.
(19) The same specialist circulated the Bibliographical Newsletter in Spanish, a task which took up much of his time.
(20) In addition to its publications, the Havana Office was greatly interested in library activities and took part in the librarians' conferences, of which two had already been held in Cuba, and others in Panama and Colombia. Those conferences were attended by librarians, who derived from them guidance and encouragement in their work. The libraries expert had also prepared a handbook on library conferences.
(21) There had also been a conference in Cuba on the exchange of publications. The countries concerned had concluded agreements on that type of exchange, but experience had shown that the agreements were often not implemented. The Havana Office had helped to publicize Unesco's programme regarding the exchange of publications for 1955-56.
(22) The influence of the expert was felt in the schools and universities but also reached out to other spheres. He had, for instance, taken part in other meetings such as that on rural libraries at Turrialba.
(23) The Havana Office also maintained close contacts with the National Commissions and had helped in establishing those of Nicaragua and Chile. Besides stimulating the work of the Commissions, it supplied them with information they required, through the Information Bulletin.

(24) Mr. SILLER (Mexico) confirmed that the work described in the statement by the Director of the Havana Regional Office was useful and constructive. The support of Unesco was extremely useful in the Caribbean region, Mexico and the whole of Central America. The National Commissions had made considerable progress, and the Mexican Commission, at least, had to thank the Regional Office for its co-operation in securing that result.
(25) Moreover, the Havana Office was doing work which could not be carried on in the same way from Paris. America, like Asia, had special characteristics that made Regional Offices necessary for carrying out campaigns which could thus be better

planned and more successfully executed. Lastly, the Havana Office was also necessary for securing the best results from missions of experts. The purpose of these Regional Offices was not decentralization but the extension of the activities of the Central Secretariat.

(26) Mr. RANIERI (Uruguay) entirely agreed with everything the delegate of Mexico had said and felt that the Havana Office was a necessary auxiliary for Unesco's work in Latin America. There should be continuity in the activities of Unesco, and he considered that the Havana Office should retain the priority allotted to it in the budget.

(27) Miss LAISE (United States of America) asked for information on the extent of co-operation between the Regional Office and the Organization of American States.

(28) Mr. COWELL (United Kingdom) expressed appreciation of the Cuban Government's contribution of $10,000 and asked whether financial assistance had been received from other Member Governments or from the Organization of American States and, if not, whether any might be expected in the future.

(29) Mr. MAHEU (Assistant Director-General) replied that such assistance from OAS was neither forthcoming nor expected.

Project 7.1: Development of National Commissions (paragraphs 3-12)

(30) The CHAIRMAN invited the Chief of the Division for Relations with Member States and National Commissions to introduce the item.

(31) Mr. CHEVALIER (Chief, Division for Relations with Member States and National Commissions), introducing project 7.1, mentioned that 62 of the 72 Member States at the moment had National Commissions, the highest proportion so far achieved. Their structure and operation were very varied; some were practically independent bodies, with a staff of up to 60 full-time officials and a budget of as much as $100,000, whereas others consisted only of a single official in a central government department, who had a list of leading people in the country; in some countries, meetings of those people were held, in others not. National Commissions of the second type could be regarded as existing in name rather than in fact. Between those two extremes were National Commissions consisting of a small nucleus of government officials, together with representatives of the world of culture. The Secretariat had drawn up a schedule of all the National Commissions in order to study their relations with government circles, and that survey had revealed a very great diversity. The distinguishing feature of the proposed programme was the desire to ensure that the necessary variety of methods made the Commissions really effective; the budget estimates set forth in material terms what were almost symbolic projects, indicating the directions in which the Secretariat wanted to act and the directions in which it had been asked to act by the National Commissions themselves. All the proposed activities had been tried and their efficacy proved. They included visits by the Secretaries of National Commissions, selected from different continents, to the headquarters of Unesco, at the rate of about ten a year, in order to see how the Secretariat worked and the kind of liaison that could be established between the Secretariat and their own countries. It was essential for the success of the system that the Secretaries of National Commissions should remain in office. The budget estimates for the project, which had amounted to $13,000 a year, had been reduced by 50% in order that the 50% saved might be devoted to another form of activity complementary to the former.

(32) This second activity consisted in the appointment of national correspondents, a method of procedure in accordance with the Constitution and widely used by the International Labour Organization, which devoted no less than $350,000 a year to correspondents and regional offices. This activity had been thought advisable by the Secretariat, but its efficacy naturally depended on the choice of the correspondents, who, it was proposed, should be appointed for a limited period in countries experiencing difficulties in setting up a National Commission, during which time they would take steps to establish the Commission. In the meantime, they would act as Secretaries of the National Commissions; an appropriation of $6,500 had been proposed for that purpose - a sum not exceeding that included in the previous budget and which should make it possible to appoint two or three such correspondents, paid at local rates, in different countries, whereas, if an international official were employed, all the funds would have to be used for one person.

(33) The third activity included in the programme, missions of members of the Secretariat, had already been tried out: in 1954, for instance, an official had visited two National Commissions which required reorganization and had taken the opportunity of attending regional seminars and meetings; $1,500 had been provided for work of that type.

(34) The programme then went on to provide for the organization of a regional conference; two conferences of that kind had already been organized by Unesco, at Havana in 1950 and at Bangkok in 1951. A third conference, which it had been decided, in 1952, should be held in the Middle East in 1953, had had to be replaced by a series of activities of interest to the region. A proposal had been made, at the instigation of a delegation to the General Conference, that a conference of 16 European National Commissions be held in 1955. In the light of experience with the previous conferences, and having regard to the smaller distances to be covered, a sum of $20,000 had been requested for that purpose.

(35) Mr. Chevalier concluded his statement by mentioning one other project, for the republication of the Handbook of National Commissions in looseleaf form so that sections which were out of date could be replaced. One thousand dollars was requested for that purpose for 1955.

(36) The CHAIRMAN drew attention to the following comment by the Executive Board in document 8C/5 Add.1:

"The Executive Board therefore stresses the necessity for governmental action to make National

Commissions more active and effective. On the other hand, provision should be made for the secondment of Secretariat members to National Commissions in accordance with Article VII 3 of the Constitution."

(37) Mr. SOMMERFELT (Norway), referring to paragraph 7, said that his Government had opposed the appointment of national correspondents at previous conferences and the situation did not merit any alteration in that attitude. It was a dangerous policy to encourage Member States to believe that everything was to be paid for by Unesco, and to take away the incentive of countries which had not yet established National Commissions.
(38) He also opposed the Regional Conference of European National Commissions proposed in paragraph 9. If such a conference were desired, it could be organized by other cultural organizations in Europe or by the National Commissions themselves.

(39) Mr. COWELL (United Kingdom) said that the National Commission in his own country had received invaluable help from the Division for Relations with Member States and National Commissions, with which it was in almost daily contact. Nevertheless, he agreed with the views of the delegate of Norway and deplored especially the revival of the proposal to appoint national correspondents. He appreciated the Secretariat's concern at the relatively slow development of National Commissions, which were essential to Unesco's work, but felt that it would not be hastened by financial aid or stimulation of individuals in the countries concerned. In any case, it was not clear what the functions of a national correspondent would be and, as he could not perform what must be essentially national functions without government aid, the government might well take care o. the entire activities. He also shared the delegate of Norway's objection to the proposed conference, which, while useful in areas with limited means of communication, was not really necessary in Europe.
(40) He supported the remainder of the programme, in particular the proposed Unesco Handbook of National Commissions (paragraph 11) and the visits by Secretaries of National Commissions to the Organization's headquarters (paragraph 6).

(41) Mr. AVIDOR (Israel) supported the views of the two previous speakers. The fact that there were already 62 National Commissions was proof that national correspondents were unnecessary. With regard to paragraph 9, while regional conferences were important in areas outside Europe to strengthen National Commissions, they were unnecessary in Europe. He proposed that the funds saved by suppressing the two projects should be applied to other activities for strengthening National Commissions.

(42) The CHAIRMAN asked the Chief of the Division for Relations with Member States and National Commissions if he could provide any evidence of the value of missions of Secretariat members proposed in paragraph 8.

(43) Mr. CABOUAT (France) reminded the meeting that complaints that the Organization was failing to secure a hearing, not only among the general public but also among teachers and cultural circles, were very common. The French delegation was convinced that the best means of securing such a hearing was through the National Commissions, and it would always be prepared to support any action to strengthen National Commissions or to encourage their establishment. The means proposed in paragraph 7 - appointment of national correspondents - seemed to be necessary in countries where the governments did not appear to take as much interest as they should in the setting up of a Commission. With regard to the organization of a conference of European National Commissions (paragraph 9), Mr. Cabouat was inclined to agree with the United Kingdom's view, although he felt that the appropriation requested might be left as it stood in order to give the Secretariat the opportunity of encouraging the establishment of new Commissions throughout the world or of promoting the work of existing Commissions; in that respect, he favoured the proposal of the delegate of Israel.

(44) Mr. SILLER (Mexico) agreed with part of what the representative of the United Kingdom had said, and was anxious that provision should be made, in paragraph 7, for another, different form of remuneration. He proposed that the activities referred to in the paragraphs in question should be carried out, at least in some cases, through the Co-operation Offices and Regional Offices, as that would make the work easier.

(45) Miss LAISE (United States of America) said that the United States Government considered the development of National Commissions a unique feature and one of the most important parts of Unesco's work and was disappointed that Secretariat efforts in that direction had been so small. She was disturbed by the small obligation for 1953 and the transfer of unused funds to another section through the non-materialization of a project. She asked whether the Secretariat could provide information on activities during the past two years.
(46) With regard to exchanges between the Secretariat and National Commissions, she proposed that these be expanded to include exchanges between National Commissions themselves.

(47) Mr. FREY (German Federal Republic) supported the previous speakers and, in particular, the proposals of the delegates of Israel and the United States of America.

(48) Mr. JUNANKAR (India) said that there had been adverse criticism of the reciprocal activities of Unesco and National Commissions and asked whether the Secretariat had made any effort to discover why, in spite of efforts by the Secretariat and Member States, National Commissions had never fulfilled their intended rôle. He supported the United States delegate's proposal for exchanges between National Commissions.

(49) Mr. RAO (Acting Chief, Bureau of Programme and Budget), replying to the delegate of the United States of America, said that the low level of obligations in 1953 was due to an allocation of $25,000 for

a regional conference in the Middle East being transferred from 1953 to 1954 and being assigned to other activities in the Middle East. The amounts for 1955-56, however, represented the minimum required to carry out the proposed activities. With regard to the transfer of funds to another section, the Director-General had considered that it would not be useful to invite the Secretaries of National Commissions to headquarters when the Secretariat was absent in Montevideo.

(50) Replying to the objections raised to the proposal that national correspondents be appointed, Mr. CHEVALIER (Chief, Division for Relations with Member States and National Commissions) agreed that it was an innovation, but the Secretariat, which had foreseen the objections in question, had endeavoured to anticipate them by proposing that correspondents be appointed only for a limited period, not exceeding two years. If, at the end of that time, they had not succeeded in setting up a Commission, the experiment would automatically come to an end. The establishment of a National Commission was still the aim, but it had been thought expedient to provide, in certain cases, for someone who could learn the work of Secretary of a National Commission. With regard to the relations between the correspondents and governments, it had been stipulated that correspondents could be appointed only at the proposal of their own governments, and that they would work only in full agreement with the national authorities; they would receive programme instructions from the headquarters of the Organization. It should not be forgotten that certain countries had great difficulty in seconding a full-time official for work connected with Unesco, and that the appointment of correspondents would provide a temporary solution. Mr. Chevalier left it to the Assistant Director-General to answer the objections to the proposal for a European conference.

(51) The usefulness of missions of members of the Secretariat to other countries had been questioned and, as an answer to the doubts expressed, Mr. Chevalier quoted the case of one of his colleagues, who had been sent to the Middle East, where he had been able to make arrangements for the reorganization of one National Commission and to promote the establishment of another; he had also taken advantage of a regional meeting to attempt to co-ordinate work throughout the region. The idea of exchanging information among the Secretaries of National Commissions had been put forward, and Mr. Chevalier could inform the Committee that the experiment had already been tried out during the current year when visits of Secretaries of National Commissions to headquarters had been made to coincide and several of the Secretaries had been given the opportunity of visiting other countries to study the organization of their National Commissions.

(52) The delegate of India had spoken of evaluating the results achieved and Mr. Chevalier mentioned that the Secretariat had considered doing this by assembling all the available information in order to determine the best way of organizing the National Commissions and of establishing contacts between Commissions in different countries. Overlapping had sometimes been discovered between National Commissions and governmental bodies and improvement in that respect was necessary. It might be well, when the working party had finished its discussions, to make a more detailed study of the organization and functions of National Commissions and their relations with governments.

(53) Mr. MAHEU (Assistant Director-General), referring to the proposal for convening a conference of European National Commissions, remarked that the justification for such a meeting was rather different from that for the similar regional meetings held in Havana and Bangkok or for the assistance it had been proposed to give to a regional conference in the Middle East in 1953. In those three cases, the object had been to encourage and help countries handicapped by their distance from headquarters, in setting up National Commissions or developing those already in existence which were still in the very early stages. In Europe, though there was still room for improvement, it could be said, in general, that the organization and functioning of the National Commissions were satisfactory. It had to be remembered, however, that in Europe several regional organizations wielded an influence over Member States which Unesco could not ignore. It had to maintain its influence in a region which was the scene of very important internal developments, all the more so because European representation on Unesco did not coincide with the membership of the organizations referred to. After recalling that certain European countries not represented on the Committee were closely interested in this proposal, the Assistant Director-General said, in conclusion, that the motives behind it were political rather than technical; it was for the Conference to say what should be done.

(54) The CHAIRMAN said that a vote had to be taken, first on the proposal of the delegate of Norway, seconded by the United Kingdom, to delete the activities in paragraphs 7 and 9 and, if that were adopted, on the proposal of the delegate of Israel, seconded by the delegate of the German Federal Republic, to retain the funds for other activities in the Division.

(55) Mr. CABOUAT (France) put forward a third proposal. If the project for a European conference were accepted, it would be wiser to hold the conference in 1956, as it would then be able to discuss the draft programme to be submitted to the General Conference at its ninth session. If it were held in 1955, it would have to limit itself to the current programme and to general considerations.

(56) Mr. MAHEU (Assistant Director-General) agreed that the proposal made by the delegate of France was a good one, but he pointed out that it raised a problem; the project, as proposed, drew the attention of the proposed conference to methods of implementing the programme, whereas the French delegate's proposal directed it towards the study of future programmes. The National Commissions were, however, government advisory bodies and Member States would have to decide whether it was a good thing to lead them to express their views formally on the draft programme.

(57) Mr. SILLER (Mexico) reminded the Chairman that he had made a proposal with regard to paragraph 7, suggesting that the activities there mentioned should be carried out through the Regional Offices. That did not imply any criticism of the existing system, but the procedure he had suggested would be cheaper and more practical.

(58) Mr. MAHEU (Assistant Director-General) mentioned that the Director-General was suggesting a variety of methods to the Conference so that the latter could decide which it preferred. The proposal for action at the national level was an alternative to another possibility - regional co-operation. But so far as he was concerned, there was no reason of principle for preferring one method to another; that was a question for consideration by the working party on decentralization.

(59) The CHAIRMAN asked if the delegate of Mexico would agree to his proposal being brought up when the working party was established.

(60) The Mexican delegate accepted the suggestion.

(61) Mr. CABOUAT (France) explained that he had never intended that National Commissions should be given powers normally pertaining to governments but, from the meetings of the French National Commission he had attended, he had gained the impression that the Commission would be very much interested in having an opportunity to discuss with other National Commissions problems it thought particularly important. A comparison of views on the draft programme might produce very good results.

(62) Miss LAISE (United States of America) proposed that paragraphs 7 and 9 should be voted on separately. With regard to paragraph 9, one of the difficulties was perhaps that the objects of such a conference had not been clearly defined. The United States National Commission considered an activity of that character necessary, since the object of developing National Commissions was not only to create new ones but to help existing ones to be useful to Unesco. The United States Commission had been hampered by the fact that its rôle was not clearly established and, if a conference could usefully be devoted to what National Commissions could and could not do in relation to the 1955-56 programme, it would serve a useful purpose. She supported evaluation among National Commissions but was in favour of the subject being discussed by the proposed working party.

(63) The CHAIRMAN asked for a vote on the proposal of the delegate of Norway, seconded by the United Kingdom delegate, to delete paragraph 7.

(64) The proposal was adopted by 7 votes to 1 with 4 abstentions.

(65) A discussion ensued on the proposal of the delegate of Israel that the funds released should be retained in the Division for other activities.

(66) Mr. SOMMERFELT (Norway) understood that the disposal of funds was to be left to the working party.

(67) The CHAIRMAN explained that the Committee could recommend the transfer of funds to other activities within the chapter, leaving the Director-General to make specific proposals. The procedure would be correct, since members had expressed views on priorities for specific items. The Director-General could, if necessary, make immediate proposals.

(68) Mr. MAHEU (Assistant Director-General) replied in the negative to the Chairman's last point and in the affirmative to his opening remarks. The Director-General's position was clear: he received the right, according to the Committee's recommendations, to make any subsequent proposals likely to help the Committee or the Programme Commission in its work. The Chairman was right in saying that the Committee could properly recommend the transfer of funds within any given chapter, but the Secretariat was not in a position to make immediate, practical proposals for the use of the sum thus made available.

(69) The CHAIRMAN was opposed to leaving the matter open; if no decision were taken, an unallocated sum would be left on completion of the examination of the programme and budget.

(70) Mr. ABDEL-RAHMAN (Egypt) considered that, as the Committee was acting in a programme and a budgetary capacity, it could assign funds in general terms to the section and defer proposals on their specific purposes.

(71) Turning to general considerations, one of the difficulties in Unesco's work had often been said to be the inactivity of National Commissions. The problem should therefore be one of Unesco's major considerations, even if inactivity were due to circumstances outside the Secretariat and the Conference. He would propose a higher priority, in respect of both finance and status, to the question of National Commissions, which were an instrument for judging the success of Unesco's work.

(72) Mr. COWELL (United Kingdom) was in complete agreement with the Egyptian delegate on the importance of the work of National Commissions. With regard to the vote on the delegate of Israel's proposal, he was not sure that it was necessary for funds to be spent within the Division in order to achieve the desired objective; they could, for example, be used to increase the expenditure for staff travel under different chapters to enable heads of Departments to visit National Commissions. He was reluctant to vote a sum for unspecified activities.

(73) Mr. JUNANKAR (India) asked if the Secretariat could prepare a document setting out the functions, scope and place of National Commissions in Unesco's programme and stating why it was considered they had not developed as had been originally hoped.

(74) Mr. MAHEU (Assistant Director-General) asked the delegate of India if he would be satisfied with a preliminary document; the Secretariat would be able to make a full analysis and submit a constructive report on the matter in 1955-56. The Director-General needed directives from the General Conference and the purpose of the project submitted had been

to evoke those. He was sorry to say that it was impossible to make a proper critical assessment immediately.

(75) The CHAIRMAN thought it would be preferable to rely on Secretariat participation in the working party and not ask for a document.

(76) Mr. AVIDOR (Israel) proposed that the Committee should recommend that the amount in question be assigned to general purposes in aiding Member States to strengthen their National Commissions.

(77) Mr. COWELL (United Kingdom) regretted that the suggestion did not solve his difficulty.

(78) The proposal of the delegate of Israel, seconded by the delegate of the German Federal Republic, that the sum of $13,000 released under paragraph 7 be retained in the project for activities in the development of National Commissions was put to the vote and adopted by 9 votes to 2 with 1 abstention.

(79) Mr. AVIDOR (Israel) proposed, and the Committee agreed, that the following words should be inserted after "headquarters" in paragraphs 6 and 12: "and/or National Commissions".

(80) The Committee then voted on the Norwegian delegate's proposal, seconded by the United Kingdom delegate, to delete paragraph 9. The proposal was adopted by 7 votes to 1 with 3 abstentions.

(81) Mr. CABOUAT (France) did not press for a vote on his proposal, but pointed out that it related to the same conference, except that it would have been held in 1956.

(82) The CHAIRMAN asked for a vote on the proposal of the delegate of Israel, seconded by the delegate of the German Federal Republic, that the sum of $20,000 available under paragraph 9, be retained for the purpose of developing National Commissions.

(83) The proposal was adopted by 8 votes to 2 with 1 abstention.

(84) Mr. MAHEU (Assistant Director-General) supposed that the decision taken on paragraph 6 applied to paragraph 12, which also related to visits by Secretaries of National Commissions to the Organization's headquarters, and that the total budget was therefore $26,000 instead of $13,000.

(85) The CHAIRMAN asked for a vote on the Egyptian delegate's proposal, seconded by the delegate of the United States of America, to accord a high priority to the development of National Commissions.

(86) The proposal was adopted by 9 votes to 1 with 1 abstention.

(87) Mr. CABOUAT (Rapporteur) summed up the results of the voting on project 7.1: the project as a whole had been allotted a high priority; the whole of the proposed appropriations stood; sub-paragraphs (b) and (d) were deleted.

(88) The CHAIRMAN confirmed that the Rapporteur's summary was correct.

New York Office (Part III, Chapter 1), paragraph 13

(89) Mr. MAHEU (Assistant Director-General) said there had been no appreciable changes. The staff for which provision was made in 1955-56 was the same as the existing staff. He wished to remind the Committee of the comments of the Chairman of the Executive Board, which were borne out by what he had seen for himself. The many and, in the aggregate, heavy functions carried out by the New York Office were not always appreciated, and the only criticism which could be made of the budget estimates was that they were too conservative, too modest. He recalled that the Office had nothing to do with decentralization; it was a liaison office between the United Nations and Unesco.

(90) In reply to a question from the United Kingdom delegate, Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that the two upgradings in the Professional category were reclassifications through increase of work.

(91) Mr. MAHEU (Assistant Director-General) mentioned that the Director-General, in view of the increased volume of work, had a choice between two possible courses - maintaining posts at the existing level and establishing an additional post, or increasing the responsibilities of existing posts without establishing a new post. The latter course had been adopted as being more economical.

(92) Discussion on the New York Office being concluded, the CHAIRMAN asked the Chief of Bureau of Personnel and Management if he was ready to supply the information asked for at the previous meeting.

(93) Mr. FARR (Chief, Bureau of Personnel and Management), referring to paragraph 39 of Part IV of the programme and budget, said that he had some information on the practice in other Specialized Agencies, but was waiting for additional information from the New York Office.

(94) It was agreed to defer discussion until complete facts were available.

(95) Miss LAISE (United States of America) asked whether the promised information on reclassifications was available, as she could not submit a proposal without information on the General Services category. With regard to the suggested average for the Professional category, she would like to suggest P-2.9, based on the averages quoted for Unesco, the United Nations, WHO and FAO. In the meantime, in connexion with the amount of $73,000 for reclassifications for 1955-56, she asked what was the total cost of within-grade increments in the same period.

(96) The CHAIRMAN understood that it had been agreed to accept the Director-General's average for the General Services category as being between grades D and E.

(97) Mr. COWELL (United Kingdom) was puzzled by the United States delegate's proposal. He considered that the system of working on an average grade was administratively impracticable and wondered how, if adopted, it could be put into practice. He asked whether it was used in other agencies.

(98) Mr. FARR (Chief, Bureau of Personnel and Management) said that the United Nations and all the Specialized Agencies kept a careful watch on the tendency for grading patterns in their secretariats to become higher. He was not, however, aware of any action to lay down methods of control, except that the Fifth Committee of the United Nations Assembly, on receipt of the Secretary-General's proposals for upgrading, had reduced the amount available. The Director-General's proposal had been for the Committee to set an average grade rather than deal with the matter in terms of finance. In maintaining the average, he would consider the administrative structure of divisions where upgradings were proposed, and make equivalent downgradings if necessary.

(99) Mr. COWELL (United Kingdom) was still sceptical of the procedure and considered it too arbitrary. Unesco's Constitution gave the Director-General complete freedom of action in staffing and, having appointed a Director-General, it was not advisable to restrict his actions in that respect.

(100) Miss LAISE (United States of America) said that she too had been sceptical, but had made her suggestion in view of the wishes expressed by the Director-General. She still wished for the information she had requested and also asked whether the 86 reclassifications had been taken into account when calculating the within-grade increases for 1955-56.

(101) Mr. RAO (Acting Chief, Bureau of Programme and Budget) said that within-grade increments had increased by $319,027 in 1955-56 over 1953-54, and he confirmed that the 86 reclassifications had been taken into account. An amount of 6% was deducted from the budget for established posts in each department to allow for turnover and lapses in recruiting for new posts.

(102) Miss LAISE (United States of America) proposed that the amount of $73,000 for reclassifications should be reduced to $50,000.

(103) Mr. MAHEU (Assistant Director-General) wished to know whether it was the intention of the delegate of the United States of America that the proposed reduction should be made specifically on reclassified posts, or was it to be spread over all the appropriations for established posts? Did she agree to a reduction of $23,000 in the whole budget for established posts, as a gesture?

(104) Miss LAISE (United States of America) accepted the Assistant Director-General's interpretation of her proposal.

(105) Mr. BOW (Canada) remarked that the Director-General would still be free to increase the proportion of high-grade posts if he so wished.

(106) The CHAIRMAN said that, while that would be the budgetary effect, the Director-General would no doubt wish to take account of the considerations behind the proposal and not make reclassifications on a large scale.

(107) Mr. MAHEU (Assistant Director-General) confirmed that opinion and thanked the delegate of the United States of America for her understanding of his question.

(108) Mr. COWELL (United Kingdom) said that, in the light of possible proposals to reduce the budget, it would be advisable to examine the summary by object of expenditure in Annex V of the programme and budget to see if cuts could be made in the major items. Staff costs being a major item, he supported the proposal of the delegate of the United States of America.

(109) The proposal of the United States delegate, seconded by the United Kingdom delegate, was adopted by 7 votes to nil with 3 abstentions.

The meeting rose at 12.50 p.m.

# SIXTEENTH MEETING

*10 November 1954 at 3.30 p.m.*

*Chairman:* Mr. GARDNER DAVIES (Australia)

**ITEM 7.2 OF THE AGENDA: PRELIMINARY CONSIDERATION OF THE DRAFT PROGRAMME AND BUDGET FOR 1955-56, BEFORE THE OPENING OF THE SESSION (continued)**

(1) The CHAIRMAN announced that, before the meeting could proceed to the discussion of the draft resolutions, a few general questions remained to be cleared up. He therefore asked if the delegate of Israel wished to comment on the general matter of subventions.

(2) Mr. AVIDOR (Israel) said that, after the advice offered by the Assistant Director-General, he was prepared to leave the matter to the Administrative Commission.

(3) The CHAIRMAN then opened discussion on document 8C/ADM/5, Report of the External Auditor, requested by the delegation of the United States of America at the seventh session of the General Conference.

(4) Miss LAISE (United States of America)suggested that, as the External Auditor was not present, the Committee's Report should contain a recommendation to the Administrative Commission to look into the question of whether the Secretariat should exercise a more detailed financial control over the funds allocated by contract to the Commission for the Scientific and Cultural History of Mankind. The question had arisen for the 1953 period, but, as the 1955-56 programme also included a contract to that Commission, it would be desirable to consider it.

(5) Mr. COWELL (United Kingdom) asked whether the discussion was confined to that international non-governmental organization, or whether it referred to a general principle. In the Directives governing relationships with non-governmental organizations, there was a new clause which provided for the auditing of their accounts. Did the delegate of the United States of America wish to extend her recommendation about the International Commission to non-governmental organizations as a whole?

(6) The CHAIRMAN pointed out that this was a contract subject to normal legal controls, but the United States proposal aimed at a more detailed control than would otherwise be secured.

(7) Mr. SOMMERFELT (Norway) asked for a more detailed account of how the funds had been used hitherto.

(8) Mr. MAHEU (Assistant Director-General) pointed out that the remarks of the United States delegate, in so far as they related to the 1955-56 budget, referred to a point concerning which the auditor had made certain observations. He suggested, therefore, that the delegate should put the question to the Administrative Commission. Not only was the Commission better placed to deal with it, but also it was a question referring to a document not presented to the Advisory Committee on Programme and Budget.

(9) The CHAIRMAN remarked that there would be two further opportunities of raising the question: (1) during discussion of the auditor's report to the Administrative Commission, (2) during discussion of the annual report of the International Commission by the Programme and Budget Commission (document 8C/PRG/7).

(10) Miss LAISE (United States of America) explained that she felt a need to go into the question at that stage for the reason that the Committee's willingness to support the project in the programme would depend on a satisfactory solution of the question of financial control over it. Payments in 1954 had been excessive and a satisfactory agreement between Unesco and the Commission would have to be found.

(11) Mr. COWELL (United Kingdom) supported the point of view expressed by the delegate of the United States of America and asked for a reference to it in the report.

(12) The proposal of the United States delegate, seconded by the delegate of the United Kingdom, was adopted by 11 votes with 1 abstention.

(13) The CHAIRMAN opened the debate on the question raised by the United Kingdom delegate as to the proportion of manuscripts produced within the Secretariat, compared with those prepared under contract.

(14) Mr. MAHEU (Assistant Director-General) said that there was not a single Unesco publication on which the Secretariat did not do some work. The amount done fluctuated between two extremes: (1) Booklets emanating from departments, such as, The Social Sciences , No. 12 in the series, Unesco and its Programme, which was issued jointly by the Departments of Mass Communication and Social Sciences. The Assistant Director-General further mentioned an illustrated publication entitled, Tambien las montañas se mueven, for the idea of which the Department of Mass Communication was wholly responsible and which had been brought out entirely by the Documents and Publications Service. Such publications were entirely the work of the Secretariat. (2) Publications commissioned under contract from one or more writers; e.g., Culture and Human Fertility, and Economics and Action, by Mr. Mendès-France. At this end of the scale, the Secretariat's contribution was smallest, but it did nevertheless play an active part by deciding on the work plan, the subject of the publication, the public for whom it is intended, and the author. In addition, Unesco put the manuscript into shape and undertook all the other technical and commercial operations leading up to the final publication of a book.
(15) With regard to the other two questions raised to which answers had not been given, Mr. Maheu said he would take the opportunity of mentioning that the document dealing with the expenditure for 1952 by categories of expenditure had been requested from Paris and had not yet arrived. Also, no reply had yet been received about the way the other Specialized Agencies arranged for the payment of the Secretary of their Staff Association.

**ANNEX VI, PAGE 250 OF THE PROPOSED PROGRAMME AND BUDGET**

(16) Miss LAISE (United States of America) wished to know: (1) whether experience had led to any adjustment in the standards since the 1952 programme; (2) to what degree the standards were co-ordinated with those of the United Nations and Specialized Agencies; and (3) whether the size and number of posts in local field staff would not be considered?

(17) Mr. RAO (Acting Chief, Bureau of Programme and Budget), in answer to point 1, replied that standards in the proposed budget were in most cases lower than those for 1953-54, particularly in respect of consultants' fees and contracts. There was a 12% reduction, compared with the 1953-54 budget, in the average cost of the standard page of contractual printing; a lower rate had been used in computing consultants' fees, etc.
(18) In answer to the second question, the United Nations and Specialized Agencies all had the same system of established posts, local field staff, etc., based on the same staff regulations. On the third question, Mr. Rao replied that a list of posts had not been included in the document for reasons of brevity, but it was available. Figures, for instance in the case of the Science Co-operation Offices, had been calculated on the basis of exact needs. In paragraph 197 of the chapter on Natural Sciences there was a list of local field staff, without details of the salaries paid to each, although the total number was given.

(19) Miss LAISE (United States of America) asked when Technical Assistance (8C/5 Annex VIII) would be discussed.

(20) The CHAIRMAN explained, in agreement with the Assistant Director-General, that this, being an activity external to the House, could be more suitably discussed after the general discussion of the results of the Committee's work, of the balance of chapters, and of the Executive Board's document on the future programme.

(21) Miss LAISE (United States of America) felt that it was important for the meeting to examine Technical Assistance forthwith, from the point of view of its administration, and also in terms of future programmes.

(22) Mr. MAHEU (Assistant Director-General) recalled that the United States delegation had expressed a wish at the opening of the session to consider the proposed programme and budget in the light of the previous programme and budgets and of the Executive Board's Report on the Remodelling of the Future Programme of Unesco. By that procedure, the Committee would be keeping within Unesco's own field of activity, whereas the technical assistance programme was a project in which Unesco merely participated in a joint undertaking by the United Nations and all the Specialized Agencies. The connexion between the technical assistance programme and the programme and budget proper was thus less immediate, and on that account less instructive than the relationship between the Proposed Programme and Budget for 1955-56 and the Remodelling of the Future Programme.

**ITEM 7.3 OF THE AGENDA: DISCUSSION OF DRAFT RESOLUTIONS SUBMITTED BY MEMBER STATES**

(23) Mr. MAHEU (Assistant Director-General) suggested that the draft resolutions of Member States be examined by the Committee one by one as the Executive Board finished its discussion of each and put forward its recommendations. These resolutions had been classified by the Secretariat in document DIV/55, which indicated the departments concerned. They fell into the following categories: (1) draft resolutions affecting a single department; (2) those affecting two or more departments; (3) those relating to Unesco's general policy and sometimes going beyond the purview of the Secretariat. If the Committee was agreeable to taking the resolutions in that order, the Secretariat was ready to answer any questions regarding draft resolutions affecting the Department of Education.

(24) The CHAIRMAN, speaking as delegate of Australia, suggested that the Committee recommend the submission to the Director-General, in future years, of resolutions on the programme at the time when it was being prepared, rather than when it was being adopted.

(25) Mr. COWELL (United Kingdom) supported the Chairman. In earlier years, when the programme was being built out of nothing, those resolutions had been more urgently needed, but at the present stage there was not so much excuse for last-minute novelties, particularly since, with a biennial Conference, Member States had ample time in which to submit their views. It was advisable to revise the rules and time-limits for the presentation of new resolutions.

(26) Mr. JUNANKAR (India) proposed taking the idea a step further by asking the Director-General himself to invite Member States to send their suggestions before he formulated his proposals.

(27) Mr. LEE (United States of America) endorsed the observations by the delegate of Australia, the United Kingdom and India. Before taking up the resolutions one by one, he wished to remark that from the point of view of the desired concentration of the programme, even if some of the resolutions contributed to it, a considerable number would work against it. He thought that a good many might be referred to the Secretariat for consideration in the future execution of the programme.

(28) Mr. MAHEU (Assistant Director-General) believed that the Director-General would favour the principle of the delegate of India's proposal. But such requests for action should not, as in this one, assume the form of draft resolutions, because in that case the Secretariat might find its hands tied and difficulty in including these requests with the others in a general scheme. It would be better for Member States to make simple suggestions.

(29) Mr. LEE (United States of America)agreed with the view expressed by the Assistant Director-General.

(30) It was decided to include it in the report.

Draft Resolutions relating to Education, Nos. 28, 37, 38, 39, 40 and 53

DR/28: Amendment to resolution 1.122 (paragraphs 99 and 100)

(31) Mrs. PECSON (Executive Board) said that the

Executive Board had not recommended this resolution, because there was already a project on the question in the programme.

(32) Mr. LEE (United States of America) suggested that the resolution be referred to the Secretariat for information.

(33) Mr. COWELL (United Kingdom) seconded the proposal.

(34) Agreed.

DR/37: Promotion of health education

(35) Mrs. PECSON (Executive Board) explained that the Board would prefer this draft to be reworded, in order to make it clear that it was a continuation of work already being carried out by the Organization.

(36) Mr. ELVIN (Director, Department of Education) remarked that this draft resolution merely instructed the Director-General to do something he was already doing. He suggested the Committee should propose a method of implementation, seeing that the Secretariat was already, and would continue to be, in contact with the World Health Organization.

(37) Mr. COWELL (United Kingdom) reminded the meeting of the danger of adding to school curricula. Would the delegation of Uruguay not be content to ask for the project to be studied by the Secretariat, as there was no suggestion of a method of work and no budgetary study.

(38) Mr. RANIERI (Uruguay) accepted the suggestion of the delegate of the United Kingdom.

DR/38: Teaching of the Charter of the United Nations and the Constitutions of the Specialized Agencies

(39) Mrs. PECSON (Executive Board) informed the Committee that the Executive Board recommended this project for approval.

(40) Mr. ELVIN (Director, Department of Education) said his Department was already engaged with the subject, although not necessarily and exclusively in the particular form of urging the teaching of the Constitution.

(41) Mr. LEE (United States of America) said that, in the absence of elaboration, the resolution was no more than a reaffirmation of what was being done. It should be referred to the Secretariat.

(42) Mr. ABDEL-RAHMAN (Egypt) supported the proposed resolution.

(43) It was put to the vote and adopted by 7 in favour, 2 against and 3 abstentions.

DR/39: Parallel use of Spanish and English in the Americas

(44) Mrs. PECSON (Executive Board) explained the Board's view that, since there was no assurance that other American States were in agreement with this proposal, which concerned them, further study of it was necessary.

(45) Agreed.

DR/40: Free education at all levels

(46) Mrs. PECSON (Executive Board) informed the Committee that this had not been recommended by the Executive Board, which felt the Organization should proceed by stages.

(47) Mr. RANIERI (Uruguay) said that draft resolution No. 40 submitted by his delegation related exclusively to official State-controlled education.

(48) Mr. SOMMERFELT (Norway) agreed with the view of the Executive Board and proposed its adoption.

(49) Agreed.

DR/53: Work by children of school age

(50) Mrs. PECSON (Executive Board) said that the Board recommended adopting this resolution.

(51) Mr. COWELL (United Kingdom) asked for its budgetary implications.

(52) Mr. ELVIN (Director, Department of Education) said that these would be postage expenses for letters to the International Labour Office in Geneva.

(53) It was agreed to recommend adoption.

DR/55: Teaching about human rights

(54) Mrs. PECSON (Executive Board) informed the meeting that it had been recommended for adoption by the Executive Board.

(55) Mr. ELVIN (Director, Department of Education) remarked that the first part of the resolution was addressed to Member States, and was a standard request on which Unesco was as active as possible. The second part, addressed to the Director-General, referred to the field of social sciences.

(56) Mr. MAHEU (Assistant Director-General) explained that the Department of Social Sciences had in mind to conclude a contract amounting to $5,000 in 1955 with the International Political Science Association for a study on the teaching of human rights.

(57) Mr. CABOUAT (France) recalled that in the course of the discussion on the programme and budget of the Department of Social Sciences, his delegation had proposed the restoration of an activity which had been included in the first version of the proposed programme and budget. He considered that the Uruguayan draft resolution was similar to the French proposal and his delegation was accordingly ready to support it.

(58) Mr. ABDEL-RAHMAN (Egypt), with reference

to the expression "rule of law" in (a) of the last paragraph, asked: what law?

(59) Mr. MAHEU (Assistant Director-General) thought it referred to the international acceptance of human rights. The Secretariat had only outlined a work plan based upon a provisional interpretation of a text it had not composed. The final interpretation would have to be given by the Commission.

(60) Mr. LEE (United States of America) said it was very difficult for the Secretariat to make a detailed work plan. He abided by his earlier views and proposed that the resolution should be given a low priority.

(61) Mr. COWELL (United Kingdom) called the attention of the meeting to the fact that the concept "rule of law" was in Article I of the Constitution of Unesco, and was, apart from that, a general theme of humanistic discussion, and therefore not an entirely practical proposition.

(62) Mr. BOW (Canada) hoped that during the hurried examination of the resolution the priorities allocated to projects already in the programme would not be changed.

(63) Mrs. MYRDAL (Director, Department of Social Sciences) said that a study under (b) would be difficult, but in respect of (a), the Community Development project (8C/5, paragraphs 211-213 of the chapter on Social Sciences) might be extended to include a comparative study of the economic, social and political elements referred to. That might best be achieved through the independent non-governmental organizations envisaged.

(64) Mr. CABOUAT (France) explained that his delegation accepted the Uruguayan proposal as qualified by his own interpretation of it and by the work plan. He then read the passage he had wanted to see included in chapter 3 (Social Sciences) of the draft programme and budget:

"B. Community Development

213-bis Democratic institutions in development programmes

In most development plans it is essential to provide not only for the application of democratic methods but also for the gradual introduction of the machinery of democratic government. To what extent can a particular form of democratic government existing in one country be transposed to another country, and what would be the consequences if it were? Experts with a special knowledge of comparative politics are at the present moment giving more and more detailed thought to these problems. Unesco should help in directing these studies so as to satisfy more fully the needs of countries undergoing rapid development. For this purpose the International Political Science Association will be asked to organize, in conjunction with its 1955 Congress, a symposium on this problem, at which reports would be submitted dealing with several different parts of the world.

1955 - $4,000 (Contract)
1956 - Nil"
